Independent study—4 hours. Prerequisite: course 194H. Writing of an honors thesis on a topic in French literature, civilization, or language studies under the direction of a faculty member. (P/NP grading only.) GE credit: AH, WC, WE—(I, II, III, (I, II, III.)

197T. Tutoring in French (1-4)
Seminar—1-2 hours; laboratory—1-2 hours. Prerequisite: upper division standing and consent of Chairperson. Tutoring in undergraduate courses including leadership in small voluntary discussion groups affiliated with departmental courses. May be repeated for credit for a total of 6 units. (P/NP grading only.)

197C. Tutoring in the Community (2-4)
Seminar—1-2 hours; laboratory—1-2 hours. Prerequisite: upper division standing and consent of Chairperson. Tutoring in public schools under the guidance of a departmental faculty member. May be repeated for credit for a total of 6 units. (P/NP grading only.)

198. Directed Group Study (1-5)
Prerequisite: consent of instructor. (P/NP grading only)

198S. Directed Group Study II (1-5)
Group study on focused topics in French literature and culture. May be repeated for credit. (P/NP grading only.)—II. (III.)

199. Special Study for Advanced Undergraduates (1-5)
(P/NP grading only)

Graduate

200. Introduction to Graduate Study in French (2)
Seminar—2 hours. Prerequisite: graduate standing. An introduction to a range of methodologies and critical practices in the field of French Studies, including literature, culture, and linguistics. The course will cover basic principles of bibliographic research in the humanities. (S/U grading only.)—I. (I.)

201. History of French (4)
Seminar—3 hours, term paper. Presentation of the main changes in the grammatical structures of French, from Latin to contemporary usage, involving textual analysis and sociolinguistic description.—I. (I.) Guynn, Russell Webb

202. Topics in French Civilization (4)
Seminar—3 hours, term paper. Prerequisite: graduate standing. Interdisciplinary approach to the study of French and Francophone civilization from the Middle Ages to the present. Course content will vary by instructor. May be repeated for credit.—(I.) Simon

204. Topics in Medieval Literature (4)
Seminar—3 hours; term paper. Study of Medieval French literature, focusing on a particular period, milieu, literary genre, or theoretical approach. May be repeated for credit when topic differs.—I. (I.) Guynn

205A. Sixteenth-Century Literature: The Humanists (4)
Seminar—3 hours. French humanism in its most varied forms. Although at different times Rabelais and Montaigne will be primarily studied, other leading intellectuals and religious writers will also receive attention. May be repeated for credit when different topic is studied.—I. (I.)

206A. Seventeenth-Century Literature: Theater (4)
Seminar—3 hours. Works of Corneille, Racine, Molière, and minor dramatists. One or more authors may be covered. May be repeated for credit with consent of instructor when different topics are studied.—I. (II.) Guynn

206B. Seventeenth-Century Literature: Prose (4)
Seminar—3 hours; term paper and/or exposé. Works of authors such as Pascal, Descartes, Mme de Lafayette. One or more authors may be covered. May be repeated for credit with consent of instructor when different topics are studied from quarter to quarter.—I. (I.)

206C. Seventeenth-Century Literature: Poetry (4)
Seminar—3 hours; term paper and/or exposé. Studies of the works of one or more poets of the period. May be repeated for credit with consent of instructor.—II. (III.)

207A. Eighteenth-Century Literature: Philosophies (4)
Seminar—3 hours; term paper. Not a course in philosophy, but an examination of the role of philosophy in the design and context of literary works. Study of one or more authors. May be repeated for credit.—II. (II.) Simon

207B. Eighteenth-Century Literature: Novel (4)
Seminar—3 hours. Rise of the novel. Study of narrative experiments in the context of the philosophical climate and new literary values. Course may treat one or more novelists of the period. May be repeated for credit when different topics are studied.—I. (I.)

208A. Nineteenth-Century Literature: Fiction (4)
Seminar—3 hours. Study of the works of one or several novelists and/or short-story writers of the period. May be repeated for credit with consent of instructor when different topics are studied.—I. (I.)

208B. Nineteenth-Century Literature: Poetry (4)
Seminar—3 hours. Study of the works of one or several poets of the period. May be repeated for credit with consent of instructor when different topics are studied.—III. (III.)

209A. Twentieth-Century: Prose (4)
Seminar—3 hours; term paper. Study of the works of one or several novelists of the period.—II. (II.) Fort

209B. Twentieth-Century: Theater (4)
Seminar—3 hours; term paper. Study of the works of one or several dramatists of the period. May be repeated for credit with consent of instructor.—II. (II.) Fort

209C. Twentieth-Century: Poetry (4)
Seminar—3 hours; term paper. Study of the works of one or several poets of the period. May be repeated for credit with consent of instructor.—II. (II.)

210. Studies in Narrative Fiction (4)
Seminar—3 hours. May be repeated for credit with consent of instructor when different topic is studied.—I. (I.)

211. Studies in Criticism (4)
Seminar—3 hours. May be repeated for credit with consent of instructor when different topic is studied.—II. (II.)

212. Studies in the Theater (4)
Seminar—3 hours. May be repeated for credit with consent of instructor when different topic is studied.—I. (I.)

213. Studies in Poetry (4)
Seminar—3 hours. May be repeated for credit with consent of instructor when different topic is studied.—I. (I.)

214. Study of a Literary Movement (4)
Seminar—3 hours. May be repeated for credit with consent of instructor when different topic is studied.—III. (III.)

215. Topics in French and Francophone Film (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing. Aspects of French and Francophone film from the Lumière Brothers through the present. Topics may include a specific historical period of filmmaking, film theories and the analysis of film form and narrative, and major filmmakers and filmic traditions. May be repeated two times for credit.—III. (III.)

224. Francophone Literatures (4)
Seminar—3 hours; term paper. Study of cultural productions (literature, film, visual arts) by Francophone peoples such as found in North Africa, West Africa, the Caribbean, South-East Asia, the Americas, and Metropolitan France. May be repeated for credit when topic differs and with consent of instructor.—Adjemunobi

250A. French Linguistics I (4)
Seminar—3 hours; term paper. Theoretical approach to the forms and functions of French, with emphasis on phonology and morphology. Overview of current linguistic theories and their application to French. Offered in alternate years.—II. (I.) Russell Webb

250B. French Linguistics II (4)
Seminar—3 hours; term paper. Theoretical approach to the forms and functions of French, with emphasis on syntax and semantics. Overview of current linguistic theories and their application to French. Offered in alternate years.—II. (I.) Russell Webb

251. Topics in the Linguistic Study of French (4)
Seminar—3 hours; project. Overview of approaches to university-level foreign language instruction and the pedagogical notions underlying current trends in classroom practices across commonly taught foreign languages. (Same course as German 291 and Spanish 291.)—I, II. (II.)

297. Individual Study (1-5)
(S/U grading only)

298. Group Study (1-5)
Seminar—1-5 hours. May be repeated for credit with consent of instructor.

299. Research (1-12)
(S/U grading only)

300. Dissertation Research (1-12)
(S/U grading only)

Professional

300. Teaching of a Modern Foreign Language (3)
Lecture/discussion—3 hours. Prerequisite: senior or graduate standing; a major or minor in a modern foreign language.—III. (III.)

300A. The Teaching of French in College (2)
Lecture/discussion—2 hours. Prerequisite: graduate standing or consent of instructor. Course designed for graduate teaching assistants with emphasis on problems and procedures encountered by teachers of lower division classes at the university. May be repeated for credit with consent of instructor. (S/U grading only.)—I. (I.) Russell Webb

300B. The Teaching of French in College (2)
Lecture/discussion—2 hours. Prerequisite: graduate standing or consent of instructor. Course designed for graduate teaching assistants with emphasis on problems and procedures encountered by teachers of lower division classes at the university. May be repeated for credit with consent of instructor. (S/U grading only.)—I. (I.)

306. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)
Fungal Biology and Ecology

(College of Agricultural and Environmental Sciences)

The minor in Fungal Biology and Ecology is open to all students interested in a concentrated exposure to and knowledge of fungi and allied organisms. The minor is sponsored by the Plant Pathology Department.

Minor Program Requirements:

Fungal Biology and Ecology ............... 18-20

Plant Pathology 130, 148, 150 ............... 10
Select 7.9 units from Food Science and Technology 104, Plant Pathology 40, 135, 185, Science and Society 30, Soil Science 111; Plant Pathology 224 (available to advanced students with consent of instructor) ........................................ 7.9

Minor Adviser. T. Gordon

Genetics

See Molecular and Cellular Biology, on page 430; and Integrative Genetics and Genomics (A Graduate Group), on page 352.

Geographic Information Systems

(College of Agricultural and Environmental Sciences)

The Department of Biological and Agricultural Engineering offers a minor in Geographic Information Systems with an emphasis on spatial analysis. This minor is ideal for students interested in information processing of spatial data related to remote sensing, land information systems, marine cartography, thematic mapping, surface modeling, environmental modeling resources management, public utility planning, emergency response, geomarketing, geotechnology, precision agriculture, archaeology, military exercises, and computer-aided design. Prerequisites include Mathematics 16A-16B, Statistics 13 or Plant Sciences 120 or Civil and Environmental Engineering 114, and Plant Sciences 21 or Computer Science Engineering 15.

Minor Program Requirements:

Geographic Information Systems .......... 18

Applied Biological Systems Technology/Landscape Architecture 150, Applied Biological Systems Technology 181N or 182, Environmental Science & Management 186, 186L ............................................. 13
Select five or more units from: Applied Biological Systems Technology/Hydrologic Science 181N or 182 Environmental Science & Management 108, 185 Environmental Science and Policy 168A, 168B, 171, 179 .................................................. 5

Minor Adviser. S. K. Upadhyaya and S.G. Vougioukas (Biological and Agricultural Engineering Department)

Geographic Studies

(College of Agricultural and Environmental Sciences)

The interdepartmental minor in Geographic Studies is defined by students in conjunction with their major program. Students must have completed at least one year of college-level geography and must have the approval of the minor’s advisor. Students must complete a minimum of 30 units, with at least 12 units at the 100 level or above. The minor is sponsored by the Department of Environmental Design.

Minor Program Requirements:

Geography (A Graduate Group), below.

Geography

(A Group Graduate)

See Geography (A Graduate Group), below.

Geography

(A Graduate Group)

Chris Benner, Ph.D., Chairperson of the Group
Group Office. Carrie Armstrong-Report, Student Affairs Officer, 133 Hunt Hall 530.752.4119, caruport@ucdavis.edu
http://geography.ucdavis.edu

Faculty

Gwen Arnold, Ph.D., Assistant Professor (Environmental Science and Policy)
Chris Benner, Ph.D., Associate Professor
Stephen Boucher, Ph.D., Associate Professor
(Marine and Environmental Economics)
Mary Cadena, Ph.D., Associate Professor (Plant Sciences)
Diana Davis, Ph.D., Associate Professor (History)
Adela de la Torre, Ph.D., Professor (Chicana/o Studies)
Natalia Deeb-Seikas, Ph.D., Associate Professor (Chicana/o Studies)
Patsy Ebanks-Obwens, M.L.A., Professor and Chair (Human Ecology)
Ryan Galt, Ph.D., Associate Professor (Human Ecology)
Steven Greco, Ph.D., Associate Professor (Human Ecology)
Luis Guarracino, Ph.D., Professor (Human Ecology)
Erin Hamilton, Ph.D., Assistant Professor (Sociology)
Susan Handy, Ph.D., Professor (Environmental Science and Policy)
Andrew Hargadon, Ph.D., Professor and Chair (Graduate School of Management)
Lynette Hart, Ph.D., Professor (Population Health and Reproduction)
Robert Hijmans, Ph.D., Associate Professor (Environmental Science and Policy)
Frank Hirtz, L.L.D., Ph.D., Sr. Lecturer SOE (Human Ecology)
Suad Joseph, Ph.D., Professor (Anthropology)
Carl Keen, Ph.D., Professor (Nutrition)
Martin Kenney, Ph.D., Professor (Environmental Health and Reproduction)
Jonathan London, Ph.D., Assistant Professor (Human Ecology)
Jeff D. Loux, Ph.D., Assistant Adjunct Professor (Human Ecology)

Minor Adviser. T. Gordon
Geography (A Graduate Group)

Nguyen Kien, Ph.D., Professor Emeritus (Anesthesiology)
F. Thomas Hyslop, Ph.D., Adjunct Professor Emeritus (Plant Sciences)
Dean MacCannell, Ph.D., Professor Emeritus (Human Ecology)
Heath Mossman, Ph.D., I.A., Professor Emeritus (Human Ecology)
E. Steve McNeil, M.L.A., Sr. Lecturer, SOE Emeritus
Landscape Architecture
Jay Mechling, Ph.D., Professor Emeritus (American Studies)
Patricia Mokhtarian, Ph.D., Professor Emeritus (Human Ecology)
Hugh Safford, Ph.D., Regional Ecologist/Lecturer (Human Ecology)
Patricia Mohktarian, Ph.D., Professor Emeritus (Human Ecology)
Eric Larsen, Ph.D., Associate Research Scientist (Public Service Research Program-JMIE)
Stefano Varese, Ph.D., Professor Emeritus (American Studies)
Geoffrey Wandeford-Smith, Ph.D., Associate Professor Emeritus (Human Ecology)
Miriam J. Wells, Ph.D., Professor Emeritus (Human Ecology)

Affiliated Faculty
Dave C. Campbell, Ph.D., Specialist in Cooperative Extension (Human Ecology)
Joyce Oudshoorn, Ph.D., Director (Public Service Research Program-JMIE)
Eric Larsen, Ph.D., Associate Research Scientist (Human Ecology)
Greg McPherson, Ph.D., Lecturer and Associate in the Agricultural Experiment Station
Lorene Oki, Ph.D., Associate Specialist in Cooperative Extension (Plant Sciences and Human Ecology)
Hugh Safford, Ph.D., Regional Ecologist/Lecturer WOS (Environmenal Science and Policy)
Kenneth Tate, Ph.D., Specialist in Cooperative Extension (Plant Sciences)
James Thorne, Ph.D. Research Scientist (Environmental Science and Policy)
Joshua Viers, Ph.D. Associate Research Scientist (John Muir Institute of the Environment)

Graduate Study. The Graduate Group in Geography (GGG) offers programs of study and research leading to the M.A. and Ph.D. degrees. Faculty and students share a common interest in spatial interaction between humans and the biophysical environment. The wide faculty interests attract a diverse set of students in such areas as biogeography, urban forestry and related natural science and engineering fields, as well as human geography and related social science fields. A number of faculty members use and teach geographic information systems, remote sensing, and related geographic techniques, and most have a strong orientation. The strengths of the Davis campus and its faculty enable the program to focus on important issues including people, place and power, community and regional identity, environmental interaction, agricultural sustainability, landscape architecture, environmental change, biogeography, natural resource management, and technological innovations in computing and use of geographic information systems. Students are mentored by faculty across the many colleges of the university.

Preparation. Most students considered for admission will have an undergraduate major in geography or a closely related field. Generally, a student without an undergraduate degree in geography will be required to complete the equivalent of a minor in geography, consisting of one course each in human geography, physical geography and geographic methods, plus any additional undergraduate course work required as background for the student’s research emphasis as determined by the student’s guidance committee.

Graduate Advisers. Chris Benner (Human Ecology), Ryan Galt (Human Ecology), Robert Hijmans (Environmental Science and Policy) and James Quinn (Environmental Science and Policy)

Courses in Geography (GEO)

Graduate
200AN. Geographical Concepts (4)
Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing. This course introduces students to the methods and findings of geography. Students are introduced to the approaches and content of the discipline, including contemporary research questions. A brief overview of the history of geographic thought and practice is done at the beginning of the course. I, II, III
200BN. Theory & Practice of Geography (4)
Lecture/discussion—4 hours. Prerequisite: graduate standing. Class size limited to 20. Development, application, and philosophical background of the theory in discipline of geography and geographical knowledge production. Similitudes and differences in theories employed in physical and human geography and cartography. Geographic contributions to interdisciplinary topics including biogeosciences, social sciences, and humanities. —II (II) Galt, Rios
200CN. Quantitative Geography (4)
Lecture—2 hours; laboratory—6 hours. Class size limited to 25. Prerequisites: a foundational understanding of quantitative approaches in spatial data analysis. Overview of different approaches used for inference, modeling, and prediction. Also learn how to write computer programs to implement these methods. —III (III) Hijmans
200DN. Socio-Spatial Analysis in Geography (4)
Lecture/discussion—4 hours. Class size limited to 25. Introduction to and overview of methodological approaches in social science analysis in interviews, and ethnographic fieldwork. Students develop a critical understanding of different methodological and theoretical approaches, and their appropriate applications in overall research design. —II (II) Benner, Ebanks-Owens
200E. Advanced Research Design in Geography (2)
Lecture/discussion—2 hours. Prerequisite: graduate standing; courses 200AN, 200BN, 200CN, and 200DN. Class size limited to 15. Helps Ph.D. students develop their research question, design their research plan and complete a full dissertation research prospectus. —III (III) Hijmans
201. Sources and General Literature of Geography (4)
Discussion—4 hours. Prerequisite: graduate standing in geography; consent of instructor. Designed for students preparing original geography. May be repeated for credit in one or more of the following subfields: physical, cultural, economic, urban, historical, political, conservation, and regional geography.
210. Topics in Biogeography (3)
Lecture—2 hours; discussion—I hour. Prerequisite: Evolution and Ecology 147 or Wildlife, Fish, and Conservation Biology 156 (may be taken concurrently) or equivalent; consent of instructor. For undergraduates. Current topics in historical and ecological biogeography, including macroecology and aeroecology, GIS and remote sensing, phylogeography, vegetation geography, community and species geography. Systematics, climate change, and conservation will be addressed. Offered in alternate years.
211. Physical Geography Traditions and Methodology (3)
Lecture/discussion—2 hours; term paper. Prerequisite: Introductory course in physical geography. Graduate-level standing in geography or related discipline. Course Description: Discussion of the physical aspects of human geography, including key concepts and current research in climatology, geography, soils geography, biogeography, predict aspects of climate change, watershed science, and coastal studies. Research paradigms, programs, and methodologies as used by physical geographers will be discussed. May be repeated for credit. Offered in alternate years. —I
212. Water Resource Management (3)
Lecture—3 hours. Prerequisite: Civil and Environmental Engineering 114, 141, and 142; and Environmental Engineering 153 recommended. Engineering, institutional, economic, and social basis for managing local and regional water resources. Examples in the context of California’s water development and management. Uses of computer modeling to improve water management. (Same course as Civil and Environmental Engineering 267) I, II, III
214. Seminar in Geomorphological Evolution (3)
Seminar—2 hours. Prerequisite: Evolution and Ecology 100 or 101 or consent of instructor. Recent developments in theoretical and experimental biogeography, historical biogeography and related themes in systematics, the biology of colonizing species, and related topics. (Same course as Population Biology 296) [S/U grading only].—III (III) Shapiro
230. Citizenship, Democracy, & Public Space (4)
Seminar—4 hours. Prerequisite: graduate standing or consent of instructor. Introduction to seminal works in political theory, philosophy, and the social sciences that focus on citizenship and the public sphere; development of academic and critical understanding regarding restructuring of public space in a pluralistic and global culture; discussion of contemporary case studies. (Same course as Landscape Architecture 200) III, Rios
233. Physical Planning and Design (4)
Lecture—2 hours; discussion—2 hours. Limited to graduate students. Regulation, design, and development of the built landscape, planning and land development processes, zoning and subdivision regulation, site planning, urban design goals and methods, public participation strategies, creatively designing landscapes to meet community ecological goals. (Same course as Landscape Architecture 205) Offered irregularly.—Wheeler
236. Transportation Planning and Policy (4)
Lecture/discussion—I hour. Transportation planning process at the regional level, including the role of transportation regional planning and transportation planning, tools and techniques used in regional transportation planning, issues facing regional transportation planning agencies, pros and cons of policy and planning strategies. Students taking this course previously as Transportation Planning and Policy 289 cannot repeat it for credit. Taking other Transportation Planning and Policy 289 offerings does not preclude taking Transportation Planning and Policy 220 for credit. (Same course as Transportation Planning and Policy 220) Offered in alternate years. —III
240. Community Development Theory (4)
Lecture/discussion—4 hours. Introduction to theories of community development and different concepts of community, poverty, and development. Emphasis on building theory; linking applied development techniques to theory; evaluating development policy; and examining case studies of community development organizations and projects. (Same course as Community & Regional Development 240) —I, II
244. Political Ecology of Community Development (4)
Lecture—4 hours. Prerequisite: graduate standing. Community development from the perspective of geographical political ecology. Social and environmental outcomes of the dynamics of relationships between communities and land-based resources, and between social groups. Cases of community conservation and development in and industrialized countries. (Same course as Community and Regional Development 244) —II (II) Galt
245. The Political Economy of Urban and Regional Development (4)
Lecture—4 hours. Prerequisite: Community and Regional Development 157, 244, or the equivalent. The political and economic restructuring and national and state policies are mediated by competing social production of urban form; role of the state in uneven development; dynamics of urban growth and decline, regional development in California. (Same course as Community & Regional Development 245.) (I, II.) (I, II.) (III.)

246. The Political Economy of Transnational Migration (4)
Lecture—4 hours. Prerequisite: graduate standing. Theoretical perspectives and empirical research on social, cultural, political, and economic processes of transnational migration to the U.S. Discussion of conventional theories will precede contemporary comparative perspectives on class, race, ethnicity, citizenship, and the ethnic economy. (Same course as Community & Regional Development 246.)—II. (II.) Guarnizo

248. Social Policy, Welfare Theories and Communities (4)
Seminar—4 hours. Prerequisite: graduate standing. Theories and comparative histories of modern welfare states and social policy in relation to legal/normative, organizational, and administrative aspects. Application of theories to specific issues within the U.S. and California context. Not open for credit to students having completed Community & Regional Development 248A and 248B. (Same course as Community & Regional Development 248.) Offered in alternate years. (II.) Dubcovsky

252. Landscape and Power (4)
Seminar—4 hours. Prerequisite: graduate standing or consent of instructor. How various representations of landscape have historically worked as agents of cultural power. Course framework is interdisciplinary, including studies of landscape representation in literature, art, photography, cartography, cinema, and landscape architecture. (Same course as Landscape Architecture 260.)—I. (I.) Schenker

270. Experimental Design and Analysis (5)
Lecture—3 hours; discussion/laboratory—2 hours. Prerequisite: Plant Sciences 120 or equivalent. Introduction to the research process and statistical methods to plan, conduct and interpret experiments.—II. (II.) Dubcovsky

271. Applied Multivariate Modeling in Agricultural and Environmental Sciences (4)

279. Discrete Choice Analysis of Travel Demand (4)
Lecture—4 hours. Prerequisite: Civil and Environmental Engineering 114. Behavioral and statistical principles underlying the formulation and estimation of discrete choice models. Practical application of discrete choice models to characterization of choice behavior, hypothesis testing, and forecasting. Emphasis on case studies from the real world data sets. (Same course as Civil and Environmental Engineering 254.)—I. (I.) (II.) (III.)

280. Field Studies in Geography (3)
Lecture—1 hour; fieldwork—6 hours. Prerequisite: undergraduate or graduate coursework in geography and consent of instructor. A topic or subdiscipline of geography will form the theme for the course in any given offering, with a focus on current research on this topic, field methodologies, and data analysis in human and physical geography. May be repeated twice for credit. Limited enrollment.

281. Transportation Survey Methods (4)
Lecture—4 hours. Prerequisite: Statistics 13; Civil and Environmental Engineering 251 recommended. Description of a variety of surveys commonly used in transportation demand modeling, including travel and activity diaries, attitudinal, panel, computer, and stated-response surveys. Discussion of sampling, experimental design, and survey design issues. Analysis methods, including factor, discriminant and cluster analysis. Not open for credit to students who have taken Civil and Environmental Engineering 255. (Same course as Transportation Technology and Policy 200.)—II. (II.)

286. Selected Topics in Environmental Remote Sensing (3)
Discussion—2 hours; lecture—1 hour; project. Prerequisite: consent of instructor; Environmental and Resource Sciences 186 or equivalent required; Environmental and Resource Sciences 186 recommended. In-depth investigation of advanced topics in remote sensing, geospatial information science, cartography, and sensor design and theory. Not open for credit to students who have taken Civil and Environmental Engineering 255. (Same course as Hydrologic Science 266.) May be repeated for credit. Offered irregularly.—Ustin

290. Seminar in Geographic Information Systems (1-3)
Seminar—1-3 hours. Prerequisite: Graduate standing or consent of instructor. The seminar will focus on specific topical areas within geography, which will vary from quarter to quarter. Students will be expected to present an oral seminar on an aspect of the general topic under discussion. May be repeated six times for credit. (S/U grading only)—I, II, III; (I, II, III.)

291. Seminar in Cultural Geography (4)
Seminar—3 hours. Prerequisite: consent of instructor. Individual study of a cultural topic under discussion. May be repeated three times for credit. (S/U grading only)—I, II, III. (II, III.)

295. Seminar in Urban Geography (4)
Seminar—3 hours. Prerequisite: graduate standing. (I, II, III.)

297. Graduate Group in Geography Seminar (2-4)
Seminar—Discussion—1 hour; term paper. Prerequisite: admission to the Graduate Group in Geography. Prerequisite: consent of faculty mentor. May be repeated for credit. (S/U grading only)—I, II, III. (I, II, III.)

A.B. Major Requirements:

Geology

[College of Letters and Science]

The Major Programs

"Civilization exists by geological consent—subject to change without notice."—Will Durant

Geology is the study of the Earth, and in particular its history, structure, and the processes that have molded our planet and its biosphere. Geology involves the origin of continents and ocean basins, earthquakes and volcanoes, variations in global climate, and how these physical changes impact the evolution of life. All of these planetary processes are viewed through the prism of "deep time," a perspective unique to geologists and one that distinguishes geology from most of the other physical sciences.

A significant component of geology is oriented toward the interaction between humans and the Earth. This aspect includes the study of resources such as minerals, oil, and water; identification and mitigation of Earth hazards such as earthquakes, landslides, floods, and volcanic eruptions; identification and mitigation of geologic processes in the natural environment; and in-depth study of the ancient and modern climate change.

The Program.

Students interested in becoming professional geologists or continuing their geological studies at the graduate level should complete the Bachelor of Science degree program. The Bachelor of Arts program is for students interested in an interdisciplinary program of study, or who plan to go into precollege teaching. Both programs allow students to emphasize an aspect of the field of particular interest to them. The upper division electives are not restricted to geology courses but must be chosen to provide a relevant, coherent, and indepth program of study. Transfer students should have completed as much as possible of the preparatory subject matter listed below.

Internships and Career Alternatives.

In recent years, UC Davis geologists have been environmental and geotechnical consulting firms, with oil companies, research laboratories and government agencies also providing opportunities. Students graduating with a Bachelor’s degree may get entry-level positions in the private sector or they may go on to attain their teaching credentials to fill the growing need for science teachers at all precollege levels. A Master’s degree is the most versatile professional level degree, and a Ph.D. is generally required for research and academic positions. Internships are strongly encouraged for undergraduates and are generally expected. A Ph.D. degree is generally required for most geologists or continuing their geology programs. Application requirements, it is possible for students to complete significant portions of the Geology major at an international institution provided that the student consults with one of the undergraduate advisors ahead of time and plans a course of study abroad that will complement their coursework at Davis. In recent years, UC Davis Geology majors have spent their junior or senior years completing upper division coursework at EAP partner institutions in New Zealand, Ghana, Chile, and the United Kingdom.

A.B. Major Requirements:

UNITs

Preparatory Subject Matter..............40-43

Geology 3, 3L, 50, 50L 60..........13

Mathematics 16A-16B or 21A-21B 6-8

Chemistry 2A-2B 8-10

Physics 7A-7B 8

Statistics 13 or 13V or 32 or 100 3-4

Depth Subject Matter.................36

Additional upper division electives chosen from upper division courses in geography and geology 20

Upper division courses in related fields may satisfy this requirement, approved in advance by the major advisor—16

Total Units for the Major..............76-79

Recommended. Chemistry 100 or Hydrologic Science 134, Physics 7C.
B.S. Major Requirements:

Preparatory Subject Matter: 57-59

Geology 3, 3L, 50, 50L, 60, 62  15
Mathematics 21A-21B-21C  12
Chemistry 2A-2B  10

Select one of the following three options:

General Geology option:

Chemistry 2C or Geology 132 or Hydrologic Science 134  5-6
Mathematics 32 or 100  3-4
Physics 7A-7B-7C or 9A-9B-9C  12

Geology/Paleontology option:

Chemistry 2C or Geology 132 or Hydrologic Science 134  5-6
Mathematics 32 or 100  3-4
Physics 9A-9B  4

Quantitative/Geophysics option:

Mathematics 21D and 22A  7
Physics 9A-9B-9C  15

Depth Subject Matter: 52

Additional upper division elective chosen from Geology 130-194 courses (only one of GEL/EDU 181 or GEL/EDU 183 may be applied toward elective credit), Hydrologic Science 144 and related fields (approved in advance by major advisor). No more than three units upper division elective credit for Geology 115-120 courses.

Maximal upper division elective credit for Geology 192 or 194A-194B or 194HA-194HB  16

Total Units for the Major: 107-111

English Composition Requirement. It is recommended that all majors complete the English composition requirement (University Writing Program 101 or 102 or 104) before or concurrently with the following courses: Geology 101, 105, 108, 109L, 110, 110L.

Recommended. For the B.S. degree, one or more of the following courses are recommended for any of the options or to supplement the options as listed:

Note that Mathematics 22A is not a prerequisite to Physics 9C.

- Geochmistry/Petrolgy option: Mathematics 22A, Physics 9C, Hydrology 134 or Chemistry 2C or Chemistry 100 or Chemistry 110A or Geology 132.
- Quantitative/Geophysics option: Mathematics 22B, Science 32 or 100, Hydrology 134 or Chemistry 2C or Chemistry 100 or Geology 132.

Major Advisers. K.M. Cooper, R. Molani, M. E. Oskin

Minor Program Requirements:

Students majoring in Geology can acquire a minor in the related fields of Oceanography, Geophysics or Environmental Geology. The requirements for these minors are listed alphabetically in this Catalog.

Geology: 19-24

Select one of the four emphases below:

- General Geology emphasis: 19-20
- Geology 50 or 1 and 50L  5-6
- Geology 101, 107, 108, 109, 110
- Geology 116 or 134  3

Minor Advisers. Same as major advisors.

Geology 60 emphasis: 19-22

Geology 50 and 50L  5
Civil Engineering 171, 171L  5

Three courses from: Geology 134, 161, 162, Hydrologic Science 103, 144, 146, Soil Science 118, 120  9-12

Minor Advisers. Same as major advisors.

- Geochemistry emphasis: 19-22
- Geology 60 and either 146 or 148  7
- Geology 110A and 110B, or Materials Science and Engineering 130 and 134  6
- Hydrologic Science 102  6

Minor Advisers. Same as major advisors.

- Paleobiology emphasis: 20-21
- Geology 101, 107, 109  8
- Geology 141 or 144  8

At least nine additional units from:

- Anthropology 131, 152, Evolution and Ecology 100, 105, 107, 112, 119, 140, 149, Geology 109, 150C  8-9

Minor Advisers. R. Molani, G. Vermeij

Science Teaching Credential. Students who wish to become a teacher should consult an advisor in the Geosciences and Science Teaching Program (MAST, http://mast.ucdavis.edu) at their first opportunity in order to combine the prerequisites for a credential with General Education requirements. MAST also offers seminars that give participants required experience in elementary, middle school, and high school classrooms. Students hoping to teach Earth and Planetary Science may prepare by satisfying the requirements for the B.S. degree in Natural Science (http://naturalsciences.ucdavis.edu) or the A.B. degree in Geology (77-79 units) and 36 additional units of science as outlined below. Students may also prepare for the science credential by completing the B.S. degree in Geology (107-111 units) and an additional 24 units as indicated by the asterisks (*) below:

Teaching Credential Subject Representative. H.W. Day. See also the Teaching Credential/M.A. Program on page 299.

Graduate Study. The Department of Earth and Planetary Sciences offers a program of study and research leading to the M.S. and Ph.D. degrees. For information regarding graduate study in geology, address the Graduate Adviser, Department of Earth and Planetary Sciences.

Graduate Advisers. M.L. Billen, E.S. Cowgill, Q. Yin

Courses in Geology (GEL)

Lower Division

1. The Earth (4)

- Lecture: 3 hours; discussion—1 hour. Introduction to the study of the Earth. Earth’s physical and chemical structure; internal and surface processes that mold the Earth; geological hazards and resources. Not open for credit to students who have completed course 50. Only 2 units of credit to students who have completed course 2. GE credit: SciEng | SE, SL, WE—II, II, III, (II, III), Osger

2. The Blue Planet: Introduction to Earth Science (3)

- Lecture: 3 hours. Study of the solid and fluid earth and its place in the solar system. Holistic examination of how the solid earth interacts with the atmosphere, hydrosphere, biosphere, and extraterrestrial environment. Not open for credit to students who have completed course 50. Only 2 units of credit to students who have completed course 1. GE credit: SciEng | SE, SL—II, (I)

3G. The Blue Planet: Introduction to Earth Science Discussion (1)

- Discussion: 1 hour. Prerequisite: course 2 concurrently. Small group discussion and preparation of short papers for course 2. GE credit: SciEng, Wrt | SE—I, II

3. History of Life (3)

- Lecture: 3 hours. Prerequisite: course 1 recommended. The history of life during the three and one-half billion years from its origin to the present day. Origin of life and processes of evolution; how to visualize and understand living organisms and their fossil remains. GE credit: SciEng | SE—II, II

3G. History of Life: Discussion (1)

- Discussion: 1 hour. Prerequisite: course 3 concurrently. Small group discussion and preparation of short papers for course 3. GE credit: SciEng, Wrt | SE, WE—II, II

3L. History of Life Laboratory (1)

- Laboratory: 3 hours. Prerequisite: course 3 concurrently. Exercises in understanding fossils as the clues to interpreting ancient life, including their functional morphology, paleoecology, and evolution. GE credit: SciEng | SE—II, II

4. Evolution: Science and World View (3)

- Lecture: 2 hours; discussion—1 hour. Introduction to biological evolution. Emphasis on historical development, major lines of evidence and causes of evolution; relationships between evolution and Earth history; the impact of evolution thought on other disciplines. GE credit: SciEng | SE, SL, WE—I, II

10. Modern and Ancient Global Environmental Change (3)

- Lecture: 3 hours. Fundamental scientific concepts underlying issues such as global warming, pollution, and the future of nonsustainable resources presented in the context of anthropogenic processes as well as natural forcing of paleo-environmental change throughout Earth’s history. GE credit: SciEng | SE, SL, VL—III, (III), Montaño

12. Evolution and Paleobiology of Dinosaurs (2)

- Lecture: 2 hours. Introduction to evolutionary biology: paleontology, ecology and paleoecology, using dinosaurs as case studies. GE credit: SciEng | SE—II, (II)

16. The Oceans (3)

- Lecture: 3 hours. Introductory survey of the marine environment. Oceanic physical phenomena, chemical constituents and chemistry of water, geological history, the seas biota and human utilization of marine resources. Not open for credit to students who have taken course 116. GE credit: SciEng | SE, SL, WE—II, II, III, (II, III), Hill, Summer

16G. The Oceans: Discussion (2)

- Discussion/labatory—2 hours; term paper or discussion. Prerequisite: course 16 (concurrent). Scientific method applied to discovery of the processes, biota and history of the oceans. Group discussion and preparation of term paper. Not open for credit to students who have taken course 116. GE credit: SciEng, Wrt | SE, WE—II, II, III

17. Earthquakes and Other Earth Hazards (2)

18. Energy and the Environment (3)

- Lecture: 3 hours. Conventional and alternative energy resources and their environmental impacts. Basic principles, historical development, current
20. Geology of California (2)
Lecture—2 hours. The geologic history of California, the origin of rocks and the environment in which they were formed, the structure of the rocks and the interpretation of their structural history, mineral resources, and appreciation of the California landscape. GE credit: SciEng | SE, SL.—II. (II.) Cowgill

25. Geology of National Parks (3)
Lecture—3 hours. Appreciation of the geologic framework underlying the inherent beauty of U.S. National Parks. Interpretation of individual parks to geologic processes such as mountain building, volcanism, stream erosion, glacial action and landscape evolution. GE credit: SciEng | SE, SL, VL—I. (I.) Osleger

28. Astrobiology (3)
Lecture—3 hours. Origin, evolution and distribution of life in our solar system and the Universe. Detecting habitable worlds, Drake equations, necessities and implications for the philosophical pursuit of the search for life elsewhere. GE credit: SciEng | SE, SL.—I. (I.) Yin

30. Fractals, Chaos and Complexity (3)
Lecture/discussion—3 hours. Prerequisite: Mathematics 21A or 21B. Familiarity with the basic ideas of fractal geometry and chaos and complexity. Basic theory and applications with examples from physics, earth sciences, mathematics, population dynamics, ecology, history, economics, biology, computer science, art and architecture. Offered in alternate years. (Same course as Physics 30.) GE credit: SciEng | QL, QF, SE.—II. (II.) Rundle

32. Volcanoes (3)
Lecture—3 hours. Study of eruptions and eruptive products of volcanoes in shaping the planet's surface, influencing its environment, and providing essential human resources. GE credit: SciEng | SE, SL

36. The Solar System (4)
Lecture—3 hours; discussion—1 hour. Nature of the sun, moons, and planets determined by recent observations and unannounced exploration of the solar system. Comparison of terrestrial, lunar, and planetary geological processes. Search for life on other planets. Origin and evolution of the solar system. (Former course 131-31G.) GE credit: SciEng, Writ | VI, VE, WE.—II. (II.) Iller, Wiersum

50. Physical Geography (3)
Lecture—3 hours. Prerequisite: high school physics and chemistry. The Earth, its materials, its internal and external processes, its development through time by sea-floor spreading and global plate tectonics. Students with credit for course 1 or the equivalent may receive only 2 units for course 50. GE credit: SciEng | SE, SL, VL—I. (I.) Iller, I. Iller, Billen, Zercher, Sienel

52. Physical Geography Laboratory (2)
Laboratory—6 hours. Prerequisite: course 50 [preferably taken concurrently]. Introduction to classification and recognition of minerals and rocks and to interpretation of topographic and geologic maps and aerial photographs. Students with credit for course 1L or the equivalent may receive only 1 unit for course 50L. GE credit: SciEng | SE, SL—I. (I.) Illey, I. Iller, Billen, Lesher

60. Earth Materials: Introduction (4)
Lecture—3 hours; laboratory—3 hours. Prerequisite: Chemistry 2A; Mathematics 16A or 21A; course 1 or 50L. Physical and chemical properties of rocks, minerals and other earth materials; structure and composition of rock-forming minerals; formation of minerals by precipitation from silicate liquids and aqueous fluids and by solid state transformations. GE credit: SciEng | SE—I. (I.) Day

62. Optical Mineralogy (2)
Lecture—1 hour; laboratory—3 hours. Prerequisite: course 60 (may be taken concurrently). High school physics is strongly recommended. Optical properties of inorganic crystals; techniques of mineral identification using the polarizing microscope; strategies for studying rocks in thin section. GE credit: SciEng | SE, VL—I. (I.) Day

81. Learning in Science and Mathematics (2)
Lecture/discussion—2 hours; field work—2 hours. Limited enrollment. Exploration of how students learn and develop understanding in science and mathematics classrooms. Introduction to case studies and interview techniques and their use in K-6 classrooms to illuminate student learning. (Same course as Education 81.) P/NP grading only. GE credit: SS, VI, WE.—I, II, III. (II, III.)

91. Geology of Campus Waterways (1)
Lecture/discussion—1 hour; fieldwork—1 hour. Research capabilities in the identification of surface geologic processes in waterways on campus including links among hydrologic, atmospheric, physical, and human processes; carbon cycling and interpreting processes from sediments; field research techniques; research project design and implementation; implications of results for society and environmental policy. May be repeated for credit three times. (P/NP grading only.) GE credit: SE.—I, II, III

92. Internship—(1-12)
Internship—3-36 hours. Prerequisite: consent of instructor; lower division standing. Work-learning experience on and off campus in all subject areas offered by the department. Internships supervised by a member of the faculty. May be repeated for credit up to 12 units. (P/NP grading only.) GE credit: SE.—II, III, (II, III)

98. Directed Group Study—(1-5)
Prerequisite: consent of instructor. May be repeated for credit. May be repeated for credit up to three times. (P/NP grading only.) GE credit: SE.—I, II, III

99. Special Study for Undergraduates—(1-5)
Prerequisite: consent of instructor; lower division standing. (P/NP grading only.) GE credit: SE.—I, II, III

101. Structural Geology (3)
Lecture—3 hours. Prerequisites: courses 50 and 50L, Physics 7A or 9A, Mathematics 16B or 21B, or consent of instructor. Study of processes and products of rock deformation. Introduction to structural geology through a survey of the forms and geometries of faults and folds, techniques of strain analysis, and continuum mechanics of rock deformation. GE credit: SciEng | SE—I, II, III. (II.) Cowgill, Oskin

101L. Structural Geology Lab (2)
Laboratory—6 hours; fieldwork—2 hours. Prerequisite: courses 50 and 50L, Physics 7A or 9A, and 101 (may be taken concurrently); or consent of instructor. Class size limited to 15 students per session. Laboratory exercises on the identification of structures and products of rock deformation. Introduction to the practice of structural geology through observations and analysis of rock deformation, including field measurement techniques and geologic mapping. GE credit: SciEng | SE, VL—I, II. (II.) Cowgill, Oskin

103. Field Geology (3)
Fieldwork and laboratory—9 hours; 7-8 days on weekends during quarter. Prerequisite: course 101L or consent of instructor; enrollment of pre-conference project and writing geological reports. Weekly classroom meetings devoted to preparation of maps, cross sections, stratigraphic sections, rock descriptions, and reports. GE credit: SciEng | SE, VL, WE—I, II, III. (II.) Cowgill

105. Earth Materials: Igneous Rocks (4)
Lecture—2 hours; laboratory—6 hours. Prerequisite: course 105, Mathematics 16A or 21A, Chemistry 2B (may be taken concurrently). Origins and occurrence of igneous rocks. Laboratory exercises emphasize the study of these rocks in hand specimen and thin section. GE credit: SciEng, Writ | VI, VE, WE—I, II. (II.) Cooper, Lesher

106. Earth Materials: Metamorphic Rocks (4)
Lecture—2 hours; laboratory—6 hours. Prerequisite: course 105, Chemistry 2B, Mathematics 16A or 21A. Physical and chemical properties of metamorphic rocks; interpretation of metamorphic environments. Laboratory exercises emphasize the study of these rocks in hand specimen and thin section. GE credit: SciEng, Writ | VI, WE—I, II. (II.) Carlston, Matano

107L. Earth History: Paleobiology Laboratory (2)
Laboratory—6 hours. Prerequisite: courses 3-3L or Biological Sciences 11B; course 107 (may be taken concurrently). Exercises in determining the ecological functions and evolution of individuals, populations, and communities of fossil organisms in field and laboratory. GE credit: SciEng | SE.—III. (III.) Carlson, Matano

108. Earth History: Paleoclimates (3)
Lecture—3 hours. Prerequisite: course 1 or Geology/Environmental Science and Policy 26; and Chemistry 2A; or consent of instructor. Geological and environmental factors controlling climate change, the greenhouse effect with a detailed analysis of the history of Earth's climate fluctuations over the last 600 million years. Past and present climate records are used to examine potential future climatic scenarios. GE credit: SciEng, Writ | VI, SL, WE.—I, II, III. (III.) Spera, Montezino

109. Earth History: Sediments and Stratata (2)
Lecture—2 hours. Prerequisite: courses 50-50L. Principles of stratigraphic and sedimentologic analysis. Evaluation of historical and modern global changes in sedimentation within terrestrial and marine environments. Examination of the plate tectonic, climatic and oceanographic factors controlling the distribution and exploitation of economic fluids within sedimentary rocks. GE credit: SciEng | SE—I, II. (II.) Summer

109L. Earth History: Sediments and Stratata Laboratory (2)
Laboratory—6 hours (includes four 1-day field trips). Prerequisite: course 109 (may be taken concurrently). Methods of stratigraphic and sedimentologic analysis of modern and ancient sediments. Identification of major sediment and sedimentary rock types. Outcrop and subsurface mapping of sedimentary basins. GE credit: SciEng, Writ | VI, VE, WE.—II. (II.) Summer

110. Summer Field Geology (8)
Fieldwork—8 hours/day, 6 days/week for six weeks. Prerequisite: course 105 recommended. Advanced application of geologic and geophysical field methods to the study of rocks. Includes development and interpretation of geologic maps and cross sections, paleomagnetic, electrical resistivity and seismic surveys; and field analysis of plutonic and volcanic rock suites. GE credit: SciEng, Writ | VI, VE, WE.—IV (IV) McClain, Oskin, Cowgill

115. Earth Science, History, and People (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: upper division standing; course 1. Study of interplay between the Earth and its human inhabitants through history, including consideration of ancient events such as earthquakes and eruptions as well as the geology of resources, topography, and water. GE credit: SciEng or SocSci, Writ | VI, OL, SE, WE.—II. (II.) Verosub
138. Introductory Volcanology (4)
Lecture—2 hours; fieldwork—6 hours. Prerequisite: upper division standing, course 60 and 109 or the equivalent, or consent of instructor. Principles of physical and chemical volcanology. Taught in a vol-
canically active setting (e.g., Hawaii) with a strong field component. GE credit: SciEng | SE—II. (III) Zierenberg
139. Rivers: Form, Function and Management (4)
Lecture—2 hours; fieldwork—3 hours. Prerequisite: courses 50, 50L, or equivalent; Mathematics 16B or 21B, or equivalent; course 116/Environmental Science and Policy 116; Mathematics 21D; Chemistry 2C or upper division standing, course 60 and 109 or the equivalent. Morphology, systematics, evolution, and direct use applications. Includes one day field trip on a weekend during the quarter. GE credit: SciEng | QL, SE—II. (III) Yin
140. Introduction to Process Geomorphology (4)
Lecture—3 hours; laboratory—3 hours. Prerequisite: course 1 or 50 or equivalent; Mathematics 16B or 21B, or equivalent. Qualitative description and interpretation of landscapes with emphasis on the relationships between physical processes, mass conservation, and landform evolution. Topics covered include physical and chemical weathering, hillslopes, debris flows, fluvial systems, alluvial fans, pedogenesis, eolian transport, glacial and Quaternary geochronology. Offered in alternate years. GE credit: SciEng | SE—II. (III) Motani
141. Evolutionary History of Vertebrates (3)
Lecture—2 hours. Prerequisite: course 141 (may be taken concurrently). Augments lecture course 141 through handling of specimens enabling in-person examination of three dimensional features observed in vertebrate skeletons, both fossil and living. Offered in alternate years. GE credit: SciEng | SE—II. (II) Motani
142. Basin Analysis (3)
Laboratory—2 hours; lecture—3 hours. Prerequisite: courses 50, 50L, and 109. Analysis of sedimentary basins from the identification of controls on sedimentary fill, subsidence analysis, sequence stratigraphy, core logs, and applications to petroleum exploration and hydrology. One two-day field trip. Offered in alternate years. GE credit: SciEng | SE, VL—II. (III) Summer
143. Advanced Igneous Petrology (5)
Lecture—3 hours; laboratory—6 hours. Prerequisite: course 105, Mathematics 16C or 21C, Chemistry 2C, or equivalent and chemical properties of magmatic environments and processes of igneous rock forma-
tion. Laboratory study of representative igneous rocks. GE credit: SciEng, WRT—II. (II) Cooper, Lesher
144. History of Geology (3)
Lecture—3 hours. Prerequisite: upper division course in environmental science or ecology, or an introduc-
tory course in paleobiology. Ancient ecosystems and the factors that caused them to change. Species, expansion and contraction of life forms, and geological caused variations in resource supply, and extinction provide historical perspective on the bio-
sphere of future. GE credit: SciEng | SE, WE—II. (II) Verneuil
145. Advanced Metamorphic Petrology (5)
Lecture—3 hours; laboratory—6 hours. Prerequisite: course 106, Hydrologic Science 134 or Chemistry 2C, Mathematics 16C or 21C. Metamorphic processes and the origin of metamorphic rocks. Labora-
tory study of representative rock suites. Offered in alternate years. GE credit: SciEng, WRT | SE—Day
146. Radiogenic Isotope Geochemistry and Cosmochemistry (3)
Lecture—3 hours. Prerequisite: Chemistry 2C, Phys-
ics 7C, and Mathematics 16C. Basic principles of nuclear chemistry and physics applied to geology to determine the ages of terrestrial rocks, meteorites, and other solar system objects, the age of the Earth, to trace geo-
logical/environmental processes, and the formation of the chemical elements in the Universe. Offered in alternate years. GE credit: SciEng | QL, SE—II. (III) Zierenberg
147. Geology of Ore Deposits (3)
Lecture—3 hours; laboratory—3 hours; optional one-weekend field trip. Prerequisite: Chemistry 2C or Hydrologic Science 134, courses 60, 62, and 105. Tectonic, lithologic and geochronological setting of major metallic ore deposits emphasizing ore deposit genesis, water/rock interaction and the envi-
ronmental effects of mining. Offered in alternate years. GE credit: SciEng | QL, SE—II. (II) Zierenberg
149. Geothermal Systems (3)
Lecture—2 hours; fieldwork. Prerequisite: courses 50 and 50L, Chemistry 2B or consent of instructor. Geophysical, geochemistry, and geochronology of geothermal systems, including electrical power generation and direct use applications. Includes one day field trip on a weekend during the quarter. GE credit: SciEng | QL, SE—II. (II) (III) Yin
150A. Physical and Chemical Oceanography (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 116/Environmental Science and Policy 116, Physics 9B; Mathematics 21D; Chemistry 2C or upper division standing in a natural science and con-
sent of instructor. Physical and chemical properties of seawater, fluid dynamics, air-sea interaction, cur-
rrents, waves, tides, mixing, major oceanic chem-
ical cycles. (Same course as Environmental Science and Policy 150A.) GE credit: SciEng | QL, SE—II. (II) (III) Yin
151C. Biological Oceanography (3)
Lecture—3 hours. Prerequisite: course 50 or 116. Introduction to the origin and geologic evolution of ocean compositions. Structure and composition of oceanic crust, marine volcanism, and deposition of marine sediments. Interpretation and explanation of the history of the ocean floor in terms of sea-floor spreading theory. (Same course as Environmental Science and Policy 150B.) GE credit: SciEng | SE—II. (II) (III) Yin
152. Paleobiology of Protista (4)
Lecture—2 hours; laboratory—2 hours. Prerequisite: courses 107 or Biological Sciences 1A or consent of instructor. Morphology, physiology, and ecology of single-celled organisms that are pre-
served in the fossil record. Offered in alternate years. GE credit: SciEng | SE—II. (III) (IV) Hu
153. Hydrogeology and Contaminant Transport (5)
Lecture—3 hours; laboratory—3 hours, term paper. Prerequisite: Hydrologic Science 145, Civil and En-
vironmental Engineering 144 or the equivalent.
Physical and chemical processes affecting groundwater flow and contaminant transport, with emphasis on analytical and conceptual techniques. Geophysical, hydrologic, and chemical fundamentals of hydrology and water resources. 3 units. GE credit: SciEng | SE. —II. (II.) Fogler

160. Geophysical Field Methods (3)
Lecture/discussion—3 hours; term paper. Prerequisite: Math 21C, Physics 7C or 9C, or consent of instructor. Introduction to quantitative methodologies for determining geologic data, including basic principles of statistics and probability, error analysis, hypothesis testing, inverse theory, time series analysis and directional data analyses. Use of computer in lectures and homework. GE credit: SciEng | QL, SE.—II. Rundle

161. Geophysical Geology and Geophysics (3)
Lecture—3 hours. Prerequisite: Mathematics 21C, Physics 5C or 7C or 9C, or consent of instructor. Geophysical methods applied to determining subsurface structure in tectonics, hydrogeology, geotechnical engineering, hydrocarbon and mineral exploration. Theory, survey design and interpretation of gravity, electrical resistivity, electromagnetic, reflection and refracted seismology, and ground-penetrating radar measurements. GE credit: SciEng | QL, SE.—I. Billen

162. Geophysics of the Solid Earth (3)
Lecture—3 hours. Prerequisite: Mathematics 21C, Physics 5C or 7C or 9C, or consent of instructor. Theory and use of physics in the study of the solid earth, including gravity, geomagnetism, and heat flow. Application to the interpretation of the regional and large-scale structure of the earth and to plate tectonics. Offered in alternate years. GE credit: SciEng | QL, SE.—III. Yin

163. Planetary Geology and Geophysics (3)
Lecture—3 hours. Prerequisite: Mathematics 21C, Physics 7C or 9C, and course 50 or 36 or Astronomy 10, or consent of instructor. Principles of planetary science. Planetary dynamics, including orbit mechanics, tidal interactions and ring dynamics. Theory of planetary interiors, gravitational fields, rotational dynamics. Physics of planetary atmospheres. Geological processes, landforms and their modification. Methods of analysis from Earth-based observations and spacecraft. GE credit: SciEng | QL, SE.—I. Yin

175. Advanced Field Geology (3)
Discussion—3 hours; fieldwork—6 hours. Prerequisite: consent of instructor. Advanced field studies of selected geologic terrains, interpretation and discussion of field observations. May be repeated two times for credit when instructors vary. (P/NP grading only.) GE credit: SE.—Cooper, Roeseke

181. Teaching in Science and Mathematics (2)
Lecture/discussion—2 hours; field work—2 hours. Prerequisite: major in mathematics, science, or engineering, or completion of a one-year sequence of science or calculus and consent of the instructor. Class size limited to 40 students per section. Exploration of effective teaching practices based on examination of how middle school students learn math and science. Selected readings, discussion and field experiences in high school classrooms. (Some course as Education 181) (P/NP grading only.) GE credit: SS, WE.—I, II, III, (II, III). Horn

182. Field Studies in Marine Geochemistry (2-8)
Lecture—3 hours; laboratory—1.5-3 hours, fieldwork—6.40 hours. Prerequisite: consent of instructor. Marine geochemistry with the opportunity of going to sea or into the field on land. Techniques of sea-floor sampling, including photography, marine geochemical sampling, and method of data reduction and sample analysis. Analysis of data/samples collected. GE credit: SciEng | SE.—Hill

183. Teaching High School Mathematics and Science (3)
Lecture/discussion—2 hours; field work. Prerequisites: course 81/Education 81 or course 181/Education 181 and major in mathematics, science, or engineering; or completion of a one-year sequence of science or calculus and consent of the instructor. Limit to 40 students per section. Exploration and creation of effective teaching practices based on examination of how high school students learn mathematics and science. Field experience in high school classrooms. (Same course as Education 183) GE credit: SocSci | OL, SS, WE.—I, II, III, (II, III, III). Pass/fail, more

190. Seminar in Geology (1)
Discussion—1 hour; seminar—2 hours; written abstraction. Prerequisite: major in Geology. Presentation and discussion of current topics in geology by visiting lecturers, staff, and students. May be repeated for credit. (P/NP grading only.) GE credit: SE.—I.

192. Internship in Geology (1-12)
Internship. Prerequisite: upper division standing; project approval prior to internship. Supervised work experience in geology. May be repeated for credit for a total of 10 units. (P/NP grading only) GE credit: SE.

194A-194B. Senior Thesis (3-3)
Prerequisite: open to Geology majors who have completed 135 units and who do not qualify for the honors program. Independent study of a selected topic, leading to the writing of a senior thesis. (Deferred grading only, pending completion of course work.) GE credit: SciEng | SS, WE.

198. Directed Group Study (1-5)
Lecture—1 hour; seminar—2 hours. Prerequisite: senior standing in Geology or consent of instructor. Open to all. Undergraduates (1-5). Offered in alternate years. —II. Spero

205. Advanced Field Stratigraphy (3)
Lecture—1 hour; field work—2 hours. Prerequisite: courses 109 and 110 or consent of instructor; course 206 recommended. Fieldwork over spring break. Application of stratigraphic techniques to research problems. Collection, compilation, and interpretation of field data. Integration of data with models for deposition and interpretations of Earth history. Topics vary. May be repeated for credit.—III. (II.) Sumner

206. Stratigraphic Analysis (3)
Lecture—3 hours. Prerequisites: courses 109, 109L or consent of instructor; course 144 recommended. Topics in advanced methods of stratigraphic analysis, regional stratigraphy and sedimentation, and sedimentary basin analysis. Emphasis on techniques used to interpret stratigraphic records and on current issues in stratigraphy and sedimentation. May be repeated for credit when topics differ.—II. (II.) Montañez

214. Active Tectonics (3)
Lecture/discussion—3 hours. Prerequisite: graduate standing or consent of instructor. Active deformation associated with faults, landslides, and volcanoes. Geodetic measurement techniques such as triangulation, trilateration and continuous recording System (GPS), and radar interferometry. GPS data acquisition and analysis. Inversion of geodetic data and mechanical models of crustal deformation.—III. (II.) Oskin

216. Tectonics (3)
Lecture/discussion—3 hours. Prerequisite: course 101 or consent of instructor. Nature and evolution of tectonic features of the Earth. Causes, consequences, and evolution of plate motion, with selected examples from the Earth’s deformed belts. Offered in alternate years when possible. —II. (III.) Bills, Falletti, McClain

217. Topics in Geophysics (3)
Lecture—1 hour; seminar—2 hours. Prerequisite: consent of instructor. Discussion and evaluation of current research in a given area of geophysics. Topic will change from year to year. May be repeated for credit.—II. (I.) Bills, Billen, Falletti

218. Analysis of Structures in Deformed Rocks (3)
Seminar—3 hours. Prerequisite: courses 100, 100L, 101, 101L, 170; or consent of instructor. Recent advances in the understanding and analysis of structures in brittlely and ductly deformed rocks. Detailed investigation of the characteristics of the structures, models for their formation, and applications to inferring the kinematics of larger scale tectonics. Offered in alternate years. —II. Cowgill

219. Fracture and Flow of Rocks (3)
Lecture—3 hours. Prerequisite: courses 100, 101, Mathematics 21 or 16, Physics 7 or 9, or consent of instructor. Origins of fractures in rocks and their role in fracture mechanisms, association with brittle and ductile deformation. Theoretical analysis, using continuum mechanics, and experimental evidence for the origin of the structures with emphasis on deformational processes in the earth. Offered in alternate years.—III. Billen

220. Mechanics of Geologic Structures (3)
Lecture—3 hours. Prerequisite: course 170, Mathematics 21C, Physics or 5A, or consent of instructor. Advanced petrography and geochemistry of sediments and sedimentary rocks. Geochemo, textural and mineralogical evolution of sedimentary rocks reflecting depositional or burial processes. Laboratory work emphasizes thin section study of rocks. May be repeated for credit when topic differs.—Sumner

227. Stable Isotope Biogeochemistry (4)
Lecture—2 hours; laboratory—6 hours. Prerequisite: course 144 or consent of instructor. Advanced topics in marine geochemistry. Principles of stable isotope fractionation and specific techniques for individual research using stable isotopes.—Spero

228. Topics in Paleoclimatology (3)
Lecture—3 hours. Prerequisite: courses 108, 150A or consent of instructor. Critical discussion and review of selected topics in paleoclimatology and paleoclmatology relating to the history of the processes controlling and affecting climate change and ocean circulation throughout the Phaneror. Topics may vary. May be repeated for credit. Offered in alternate years.—II. Spero

230. Geomorphology and River Management (3)
Seminar—3 hours. Prerequisite: graduate standing, course 139 or equivalent. Impacts of management and land use activities on the geomorphology of rivers and streams. Evaluation and use of analytical tools for river assessment and management, and stream restoration strategies and emerging issues in river management. May be repeated for credit when topic differs.

Quarter Offered: I—Fall, II—Winter, III—Spring, IV—Summer. 2015-2016 offering in parentheses.

Pre-Fall 2011 General Education (GE): Art/Humanities = AH; Science and Engineering = SciEng; Social Sciences = SS; Oral = Oral; Quantitative = QL; Science = Sci; Visual = Vis; World Cultures = WC; Writing Experience = WE.
232. The Oceans and Climate Change (3)
Lecture/discussion—3 hours. Prerequisite: graduate standing or consent of instructor. Modern climate change and linkages between the ocean-atmosphere-terrestrial climate system. Importance of the ocean in forcing climate change, and the impacts of anthropogenic processes on the ocean. Topics may vary. May be repeated three times for credit. Offered in alternate years. — (III.) Hill

235. Surface Processes (3)
Seminar—3 hours. Prerequisite: courses 50, 50L, 139Y, Mathematics 218 or 168 recommended. Recent advances in the analysis of landscapes and their evolution. Detailed investigation of the tools used to document surface processes. Evaluation of concepts and processes that govern landscape evolution. May be repeated for credit when topic differs. — (III.) Oskin

236. Inverse Theory in Geology and Geophysics (3)
Lecture—3 hours. Prerequisite: consent of instructor. Inversion of data for model parameters. Evaluation of parameter uncertainties. Linear and nonlinear problems for discrete and continuous models. Bakus-Gilbert inversion. Offered in alternate years. — McClain

238. Theoretical Seismology (3)
Lecture—3 hours. Prerequisite: consent of instructor. Elastodynamic wave equation. Greens functions and source representations. Ray theory. Plane and spherical waves and boundary conditions. Elastic wave propagation in stratified media. Offered in alternate years. (P/NP grading only.) —McCain

240. Geoophysics of the Earth (3)
Lecture—3 hours. Prerequisite: Earth Sciences and Resources 105; Mathematics 228. Physics of the earth’s crust, mantle, and core. Lapse rate’s equation and spherical harmonic expression of gravity and magnetic fields. Elastic wave equation in geologic media. Body and surface seismic waves. Equations of state, thermal structure of the earth. Offered in alternate years. — (III.)

241. Geomagnetism (3)

242. Paleomagnetism (3)

246. Physical Chemistry of Metamorphic Processes (3)
Lecture—3 hours. Prerequisite: course 145, Chemistry 110A, or consent of instructor. Physicochemical principles of metamorphic mineral assemblages and methods of interpreting the paragenesis of metamorphic rocks. Offered in alternate years. — Day

247. Metamorphic Petrology Seminar (3)
Seminar—3 hours. Prerequisite: course 145 or consent of instructor. Manufacturing and laboratory techniques. Instrumentation. Analysis of paleomagnetic data. Statistical methods. Rock magnetic properties. Geologic and geophysical applications. Offered in alternate years. — Versob

250. Advanced Geochemistry Seminar (3)
Seminar—3 hours. Prerequisite: course 146 or consent of instructor. Critical review of selected topics in geochemistry including: ore genesis, hydrothermal and geothermal fluids, recent and ancient sediments, isotope geochemistry, origin and chemistry of the oceans. Subject varies yearly depending on student interest. May be repeated for credit. Offered in alternate years.

251. Advanced Topics in Isotope Geochemistry and Cosmochemistry (3)
Lecture/discussion—2 hours; term paper. Prerequisite: graduate standing or consent of instructor. Astrophysical and petrologic origins of Solar System: synthesis of chemical elements, condensation sequence, star and planet formation, cosmochemistry, building blocks of planets, development on planets’ layered structure, atmosphere and the role of comets/asteroids for volatile delivery. May be repeated three times for credit when topics differ. Offered in alternate years. — (II.) Yin

253. Current Trends in Igneous Petrology (3)
Seminar—3 hours. Prerequisite: standing in Geology; course 143 or consent of instructor. Topical seminar designed to help graduate students develop and maintain familiarity with current and past literature in current subfields of petrology. May be repeated for credit when topic differs. (S/U grading only) — II. Lesher, Cooper

254. Physical Chemistry of Igneous Processes (3)
Lecture—3 hours. Prerequisite: course 142 or consent of instructor; Chemistry 110A required; Chemistry 110B and 110C recommended. Introduction of modern concepts in chemical thermodynamics and kinetics, and fluidic dynamic systems for graduate students in petrology. Offered in alternate years. — Lesher

255. Experimental Petrology (3)
Lecture—2 hours; laboratory—3 hours. Prerequisite: course 143 or consent of instructor. Introduction to techniques and methods of design and executing experiments on Earth-forming minerals and rocks. Problems and examples from igneous and metamorphic petrology will be utilized. Offered in alternate years. — Lesher

260. Paleontology (3)
Seminar—3 hours. Prerequisite: graduate standing in geology or a biological science. Selected problems in paleontology. Subject to be studied will be decided at an organizational meeting. May be repeated for credit when topic differs. — I. III. Vermeij

261. Paleobiology Graduate Seminar 1: Evolutionary Aspects (3)
Lecture—1 hour; seminar—2 hours. Prerequisite: graduate standing in Geology or a biological science; qualified undergraduates accepted on an exception-only basis. This content will treat one or more of several topics in paleobiology from a phylogenetic perspective, including major patterns in evolution, building the tree of life, extinction and phylogeny, phylogeography, and the relation between taxonomy and phylogeny. May be repeated for credit when topic varies. — I. III. Carlson

262. Paleobiology Graduate Seminar: Methodological Aspects (3)
Lecture—1 hour; seminar—2 hours. One or more major methods used in the study of fossils: Morphometrics and three-dimensional reconstruction of fossils, phylogenetic methodology, the application of geochemical techniques, and electron microscopy: May be repeated four times for credit if topic varies. — II. Motani

281N. Instrumental Techniques for Earth Scientists (3)
Lecture—2 hours; laboratory—3 hours. Prerequisite: Mathematics 21A, 21B, 21C, Physics 7A, 7B, 7C or 9A, 9B, 9C or consent of instructor. Laboratory research techniques for new graduate students in Geology. Demonstration of and exposure to appropriate techniques in research. — III. Spero, Yin

285. Field Studies in Marine Geochemistry (2-8)
Lecture—3 hours; laboratory—1-3 hours; field work—4-60 hours. Prerequisite: consent of instructor. Marine geochemistry with the opportunity of going to sea or into the field on land. Techniques of sea-floor mapping using bottom photography, marine geochemical sampling, and method of data reduction and sample analysis. Analysis of data/samples collected. — Hill

290. Seminar in Geology (1)
Seminar—1 hour; discussion—1 hour. Presentation and discussion of current topics in geology by visiting lecturers, staff, and students. (S/U grading only) — I, II, III. (I, II, III)

291. Geology of the Sierra Nevada (1)
Seminar. Prerequisite: consent of instructor. Short oral presentations by students and faculty concerning results of their past work and potential for future work in the Sierra. A written abstract is required following the format required at professional meetings. (S/U grading only) — Day

292. River Forum (1)
Seminar—1 hour. Prerequisite: graduate standing. Review and discussion of latest research and fundamental issues surrounding riverine systems, with emphasis on physical processes. Topics vary. (S/U grading only) — I, II, III. (I, II, III)

293. Geologic Event of the Week (1)
Discussion—0.5 hours; seminar—0.5 hours. Prerequisite: graduate standing. Seminar/discussion group to review and discuss recent earthquakes, volcanic eruptions, and other significant geologic events. The focus is on understanding the available observations, the physical processes behind each event, the geological setting, and societal consequences. May be repeated for credit when topic differs. (S/U grading only) — I, II, III. (I, II, III) Roese

295. Advanced Problems in Geodynamics (3)
Seminar—3 hours. Prerequisite: courses 100 and 101 or consent of instructor. Seminar dealing with problems in geodynamics. Topics will vary (e.g., ductile deformation mechanisms, brittle fracture, earthquake prediction, driving forces for plate tectonics, mantle convection). Emphasis on recent literature. May be repeated for credit when topic differs. Offered in alternate years. (S/U grading only)

296. Advanced Problems in Tectonics (3)
Seminar—3 hours. Prerequisite: course 101 or consent of instructor. Seminar dealing with current problems in tectonics of selected regions. Topics will change from year to year. Emphasis on study of recent literature. May be repeated for credit. Offered in alternate years. (S/U grading only) — I. Cowgill

297. Geophysics Forum (1)
Seminar—0.5 hours; discussion—0.5 hours. Prerequisite: graduate student status in the Geology Department, or consent of instructor. Seminar/discussion group to review and discuss latest research in structural geology and tectonics, and on-going research of participants. Topics will vary each quarter depending on the interests of the group. Occasional field trips to areas of current interest. May be repeated for credit when topic differs. Offered in alternate years. (S/U grading only)

298. Group Study (1-5)
Seminar—1 hour. Prerequisite: consent of instructor. Topics will be decided at an organizational meeting. May be repeated three times for credit when topic differs. Offered in alternate years. (S/U grading only)

299. Research (1-12)
(S/U grading only)

Professional

300. Methods of Teaching Geology (2)
Extensive writing or discussion—2 hours. Prerequisite: graduate standing student status in Geology. Introduction to graduate-level writing and undergraduate-level teaching skills in geology. Persuasive (propositional) writing workshop; discussions on campus teaching resources, presentation of techniques in teaching, and student management. (S/U grading only)

Quarter Offered: I,II,III; Pre-Fall 2011 General Education (GE): ArtHum—Arts and Humanities; SciEng—Science and Engineering; SocSci—Social Sciences; Div—Domestic Diversity; Wrt—Writing Experience Fall 2011 and on Revised General Education (GE): AH—Arts and Humanities; SE—Science and Engineering; SS—Social Sciences; ACGH—American Cultures; DD—Domestic Diversity; OL—Oral Skills; QL—Quantitative; SL—Scientific; VL—Visual; WC—World Cultures; WE—Writing Experience
room dynamics, evaluating student performance. Participation in teaching program required for Ph.D. in Geology. (S/U grading only.)—I, II, III, (I, II, III)

391. Academic Senate Distinctive Teaching Award
Winder McConnell, Ph.D., Professor Emeritus
Karl R. Menges, Dr.Phil., Professor Emeritus
H. Guenther Nerjes, Ph.D., Associate Professor Emeritus
Fritz Sammern-Frankenegg, Dr.Phil., Lecturer

The Major Program
The Minor Program offers in-depth study in the language and literature, the culture and commerce of the German-speaking world (primarily Germany, Austria and Switzerland). The key to the major lies in the careful balance between solid core requirements and the possibility to explore German subject areas through the lens of other disciplines, such as music, art, philosophy, history, and economics.

The Program. The department offers courses that highlight literary figures, movements and themes. These courses form the core of upper-division literature electives, but we also offer courses that discuss contemporary culture and commerce in German-speaking countries. Regardless of emphasis, students will find maximum practice in spoken and written German as well as in listening comprehension in all upper-division courses offered in German.

Career Alternatives. Completion of the major prepares students for study in German or for career opportunities in international fields ranging from employment in business and government to careers in the fine arts and sciences. Also, it permits admission to professional schools such as law and medicine.

A.B. Major Requirements:

Preparatory Subject Matter.............0-27
German 12-3 (or the equivalent).........0-15
German 20, 21, 22.................................0-12

Depth Subject Matter.........................44
General Program

German 101A, 101B, 103.....................12
German 120 or 118E.........................0-12
Four courses chosen from upper-division offerings taught in German .....................16
Three additional upper-division courses selected from either 104-109 or 121-129............12
Or courses in other disciplines that focus on German history, thought, and culture, upon approval of the major advisor. Electives include, but are not limited to:

Art History 176C, 177A, 177B
Comparative Literature 138, 140-142, 147
Economics 110B, 116, 160A and 160B, 162
Film Studies 142, 176A, 176B
History 142A, and 142B, 144A and 144B
Music 110B, 110C, 110D, 110E
Philosophy 170, 175
Political Science 117, 118C, 137

Note: Many of the above electives from other disciplines have prerequisites. The total of 44 upper-division units may include units earned in the Education Abroad Program.

Total Units for the Major.....................44

Minor Program Requirements:

The Department offers a German minor consisting of at least 20 upper-division units of courses taught in German. Students wishing to minor in German should consult the undergraduate advisor.

UNITS

German .............................................20

Major Adviser, C. Zhang

Honors and Honors Program. The honors program consists of two quarters of research (194H) terminating in an honors thesis. For details consult the undergraduate major advisor. Graduation with high or highest honors requires participation in the honors program.

Graduate Study. The Department offers programs of study and research leading to the M.A. degree and to the Ph.D. degree in German literature. Additional degree options for a designated emphasis are available through departmental affiliations with the programs in Social Theory and Comparative History, Critical Theory, Feminist Theory, and Second Language Acquisition. Detailed information may be obtained by writing to the Department Chairperson or the Graduate Advisor.

Graduate Adviser, SE Rose

Prerequisite Credit. Credit normally will not be given on the lower-division level for a course that is the prerequisite of a course already successfully completed.

Courses in German (GER)

Lower Division
Course Placement: Students with two years of high school German normally continue in German 2; those with three years, German 3; those with four years, German 20.

1. Elementary German (5)
Discussion—5 hours, laboratory—1 hour. Introduction to German grammar and development of all language skills in a cultural context with special emphasis on communication. Students who have successfully completed German 2 or 3 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed. Not open to students who have taken course 1A. GE credit: ArtHum | AH, WC.—I, II, III, (II, III)

Am. Mark Gottschalk

1A. Accelerated Intensive Elementary German (15)
Lecture/discussion—15 hours. Special 12 week accelerated, intensive summer session course that combines the work of courses 1, 2, and 3. Introduction to German grammar and development of all language skills in a cultural context with emphasis on communication. Not open to students who have completed courses 1, 2, or 3.—IV (IV) McCollum

2. Elementary German (5)
Discussion—5 hours, laboratory—1 hour. Prerequisite: course 1. Continuation of course 1 in areas of grammar and basic language skills. Not open for credit to students who have taken course 1A. GE credit: ArtHum | AH, WC.—I, II, (II, II)

Am. C. Zhang

3. Elementary German (5)
Discussion—5 hours, laboratory—1 hour. Prerequisite: course 2. Completion of grammar sequence and continuing practice of all language skills through cultural texts. Not open to students who have taken course 1A. GE credit: ArtHum | AH, WC.—I, II, (II, II)

Am. C. Zhang

6. Conversational German (4)
Discussion—3 hours, term paper. Prerequisite: course 3. Course 6 may be taken concurrently with course 20. Designed to develop intermediate language skills with special emphasis on communication and grammatical accuracy. GE credit: ArtHum | AH, WC.—I

Am. C. Zhang

10. German Fairy Tales from the Grimm to Disney (4)
Lecture/discussion—3 hours, term paper. Introduction to the genre of fairy tale with a focus on the Brothers Grimm and Hans Christian Andersen in their respective political/cultural contexts. Discusses filmic adaptations by Disney, DEFA and Hollywood. GE credit: ArtHum, Div, Wrt | AH, VL, WE.—I, II

Am. C. Zhang

Minor Program Requirements:

The Department offers a German minor consisting of at least 20 upper-division units of courses taught in German. Students wishing to minor in German should consult the undergraduate advisor.

40. Great German Short Stories (in English) (4)
Lecture/discussion—3 hours; extensive writing. Major German short stories from Goethe at the end of the eighteenth century to Thomas Mann at the beginning of the twentieth century. Offered in alternate years. GE credit: AH, VL, WE—II.

45. Vampires and Other Horrors in Film and Media (4)
Lecture—2 hours; discussion—1 hour; film viewing—3 hours. History of representations of vampires and horror generally from the 19th through 21st centuries. Emphasis on transnational history of the horror genre; psychologies of horror effects; issues of race, gender, and class; intersections with prejudice, medicine, modernity. (Same course as Film Studies 45.) Offered in alternate years. GE credit: ArtHum | ACGH, AH, DD, OL, VL, WC, WE—II, III. Fisher

48. Myth and Saga in the Germanic Cultures (4)
Lecture—3 hours; term paper. Knowledge of German not required. Reading in English translation from the Norse Eddas, the Volsung and Sigurd-Siegfried cycles, and the Gudrun lays, literary mythology in German Romanticism culminating in Wagner’s “total artwork” concept and The Ring of the Nibelung cycle. May not be counted toward major in German. GE credit: ArtHum, Wrt | AH, WC, WE—I, II. (I.)

49. Freshman Colloquium (2)
Seminar—2 hours. Prerequisite: open only to students who have completed 40 or fewer quarter units of transferable college-level work. Readings, discussion and term papers on treating topics such as communist-capitalist tension in German literary culture; masculine “versus” feminine authorial consciousness; disintegration of free association and language reflecting cultural transformation; exercising post-Holocaust national guilt and individual frustration—Germany’s new European “mission.”—II. (II.)

92. Field Work in German (1-12
Internship—3-56 hours. Lower division standing. Total immersive program in Germany or a German speaking setting in the U.S. to further develop students’ proficiency in the German language. (P/NP grading only.)

98. Directed Group Study (1-5)
Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.)

99. Special Study for Undergraduates (1-15)
(P/NP grading only.)

Upper Division

101A. Survey of German Literature, 800-1800 (4)
Lecture/discussion—3 hours. Prerequisite: course 22. German literature from the Middle Ages to Classicism (800-1800) with an overview of major movements and authors. GE credit: ArtHum | AH, WC, WE—I. (I.)

101B. Survey of German Literature, 1800-Present (4)
Lecture/discussion—3 hours. Prerequisite: course 22. German literature from the Age of Romanticism (1800) to the present with an overview of major movements and authors. GE credit: ArtHum | AH, WC, WE—II. (II.)

103. Writing Skills in German (4)
Lecture—3 hours; extensive writing. Prerequisite: course 22. Practice in different kinds of writing, such as abstracts, correspondence, lecture summaries, analysis of or response to short literary texts. GE credit: ArtHum | AH, WC, WE.

104. Translation (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: course 22. Exercises in German-English, English-to-German translation using texts from the areas of culture and commerce. Not open for credit to students who have completed course 104A. Offered in alternate years. GE credit: ArtHum | AH, OL, VL, WE.

105. The Modern German Language (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: course 22. Introduction to the linguistic analysis of contemporary German, including its phonology, morphology, syntax and semantics, as well as sociolinguistic considerations. GE credit: ArtHum, Wrt | AH, OL, VL, WC, WE—I, II. (I.) Arnett

109A. Business German (4)
Lecture/discussion—3 hours; laboratory—1 hour. Prerequisite: upper division consent of instructor. Specialized language course using business-oriented information and publications as the basis for discussions, roleplay, reports, compositions and translations. GE credit: ArtHum, Wrt | AH, OL, VL, WC, WE—II. (I.)

109B. Advanced Business German (4)
Lecture/discussion—3 hours; laboratory/discussion—1 hour. Prerequisite: course 22 or consent of instructor. Specialized advanced language course involving in-depth study of major business topics with the help of authentic texts and videos. Offered in alternate years. —II. (II.)

112. Topics in German Literature (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: upper division consent of instructor. Investigation of significant themes and issues within their European context. Knowledge of German is not required. May be repeated one time for credit. Offered in alternate years. GE credit: ArtHum, Wrt | AH, WC, WE—III.

113. Goethe’s Faust (4)
Discussion—3 hours; term paper. Knowledge of German not required. Intensive study of Goethe’s Faust in its entirety. Discussions in English; reading the text in the original is encouraged. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WC, WE—II, III.

114. From Marlene Dietrich to Run, Lola Run: German Women in Alternate and Film (4)
Lecture/discussion—3 hours; extensive writing. Knowledge of German not required. Women in German film from the Weimar Republic to present, with special emphasis on conceptualizations of gender, historical and political context, aesthetic and filmic innovations. GE credit: ArtHum, Wrt | AH, VL, WC, WE—II, III.

115. German Literature Since 1945 (4)
Lecture—3 hours; extensive writing. Knowledge of German not required. Major writers of the postwar generation of Austria, Switzerland and Germany: novelists, such as Celan, Walser, Handke; playwrights such as Frisch, Durrenmatt and Hochhuth, and poets, such as Celan, Enzensberger, and Aichinger. May be repeated for credit in different topic area. GE credit: ArtHum, Wrt | AH, WC, WE—II, III.

116. Readings in Jewish Writing and Thought in German Culture (4)
Lecture—3 hours; term paper. Prerequisite: Religious Studies 23 or consent of instructor. Historical tradition of Jewish thought in the German cultural context; unique contributions of Jewish writers to culture of the German-speaking world; what it means to be “other” in the mainstream culture. No credit will be given to those students who have completed Humanities 121. May be repeated two times for credit if topic differs. Offered in alternate years. (Same course as Jewish Studies 121.) GE credit: ArtHum, Div, Wrt | AH, OL, VL, WC, WE—II, III.

117. After the Catastrophe: Jews and Jewish Life in Post-1945 Germany (4)
Lecture/discussion—3 hours; term paper. Jews and Jewish culture in post-1945 Germany, with special attention to the 20th-century debate, photography, film, as well as websites and other media. Offered in alternate years. GE credit: ArtHum, Div, Wrt | ACGH, AH, DD, OL, VL, WC, WE—II. (II.) Fisch

118A. Vienna at the Turn of the Twentieth Century (The End of the Habsburg Empire) (4)
Lecture—1 hour; discussion—2 hours; extensive writing. Knowledge of German not required. Cultural ferment in Vienna, capital of the multinational Habsburg empire, at the turn of the century, with consideration of innovations in music, graphic arts, architecture, philosophy and psychology, heralding European modernism. Offered in alternate years. GE credit: ArtHum, Wrt | AH, WC, WE—I. Finney

118B. Weimar Culture: Defeat, the Roaring Twenties, the Rise of Nazism (4)
Lecture—1 hour; discussion—2 hours; extensive writing. Prerequisite: Knowledge of German not required. Expressionism in graphic arts, literature, film, New Objectivity, Brecht and Bauhaus considered in the context of the failure of the German experiment in democracy, the Weimar Republic of 1919-33. Offered in alternate years. GE credit: ArtHum, Wrt | AH, WC, WE—III.

118C. Germany Under the Third Reich (4)
Lecture/discussion—3 hours; term paper. Prerequisite: background in modern European history; course 118B recommended. Not open to students who have completed German 126C. Offered in alternate years. GE credit: ArtHum, Wrt | AH, WC, WE—II.

119. From German Fiction to German Film (4)
Lecture—3 hours; discussion—1 hour; term paper. Examines a number of film adaptations of major German prose works and plays to ascertain the types of changes involved in the shift from novel to film. The positive and negative effects achieved by such transferences. GE credit: ArtHum, Wrt | AH, OL, VL, WC, WE—II.

120. Survey of German Culture (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 22. Major developments in German art, philosophical thought, social institutions, and political history. GE credit: ArtHum | AH, WC, WE—II.

121. The Medieval Period in German Literature (4)
Discussion—3 hours; extensive writing. Prerequisite: course 22. Literary-historical profile of the Mittelhochdeutsche Blutezeit in terms of the significant epic, romances, and lyric poetry. Readings in German. Offered in alternate years. GE credit: ArtHum | AH, WC, WE—II.

122. Reformation and Baroque (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 22. Exemplary literary works of the 16th and 17th centuries tracing the principal lines of development and showing the reflection in literature of the social, as well as religious, scenes. Offered in alternate years. GE credit: ArtHum | AH, WC, WE—I.

123. Literature of the Classical Age (4)
Discussion—3 hours; term paper. Prerequisite: course 22. A critical assessment of principal works of Goethe and Schiller within the historical and philosophical context of their times. Offered in alternate years. GE credit: ArtHum | AH, WC, WE—I.

124. Major Movements in German Literature (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 22. Significant movements and schools in German literary history (e.g., the medieval troubadours, Storm and Stress, the romanticists, the George Circle, the expressionists), with emphasis on the broader cultural dynamics and ideologies as
these apply to individual literary works. May be repeated one time for credit when topic differs. Offered in alternate years. GE credit: ArtHum | AH, WC, WE.—II.

125. Short Fiction: 1880-1914 (4)
 Lecture—3 hours; term paper. Prerequisite: course 22. Reading of short German fiction from the fin-de-siècle period and representative of various prose styles and cultural currents. Offered in alternate years. GE credit: ArtHum | AH, WC, WE.—III.

126. Modern German Literature (4)
 Discussion—3 hours; extensive writing. Prerequisite: course 22. Selection of significant works by major writers, set in the broader cultural context: Works of Goethe to Kafka. Examination of representative authors from Goethe to Kafka. Offered in alternate years. GE credit: ArtHum | AH, OL, VI, WC, WE.—II.

143. Language Through Media (4)
 Lecture/discussion—3 hours; term paper. Prerequisite: course 22. Study of contemporary German-language news media (press, video, film, CD-ROM, internet) for insight into political and cultural developments in the German-speaking countries. Offered in alternate years. GE credit: ArtHum | AH, OL, VI, WC, WE.—II.

144. Marx, Nietzsche, Freud (4)
 Lecture/discussion—3 hours; term paper. Study of major texts of Marx, Nietzsche, and Freud, selected with an eye to their impact on 20th-century economic, political, and social thought. Focus on the political and social scene. Offered in alternate years. [Same course as Humanities 144.] GE credit: ArtHum, Wrt | AH, WC, WE.—I.

160. Love in the Middle Ages (4)
 Lecture—3 hours; discussion—1 hour. Prerequisite: course 22. Analysis of the phenomenon of love in selected medieval lyrical poems and romances of the twelfth and thirteenth century. Offered in alternate years. GE credit: ArtHum, Div | AH, WC, WE.—I.

168. Multiculturalism in German Literature (4)
 Lecture/discussion—3 hours; term paper or discussion—1 hour. Prerequisite: course 22. Examples of German literature from the High Middle Ages to the present that explore 'the encounter with the other': people of color, different beliefs and cultures, and inner-German minorities. Offered in alternate years. GE credit: ArtHum | AH, OL, VI, WC, WE.—II.

176A. Classic Weimar Cinema (4)
 Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: Humanities 1. German Weimar (1919-1933) cinema. Fritz Lang, F.W. Murnau, and G.W. Pabst among others. Influence on world-wide (esp. Hollywood) film genres such as film noir, horror, science fiction, and melodrama. Not open for credit to students who have completed Humanities 176. Offered in alternate years. [Same Course as Film Studies 176A.] GE credit: ArtHum, Wrt | AH, OL, VI, WC, WE.—I.

185. The Age of Bismarck (4)
 Discussion—3 hours; term paper. Prerequisite: course 22. Notable literary repercussions of the zenith of Germany's international status at the time of Bismarck's Chancellorship. The poetry of Storm, the prose of Fontane, the drama of Hauptmann. Offered in alternate years. GE credit: ArtHum | AH, WC, WE.—II.

192. Field Work in Germany (1-12)
 Internship—3-36 hours. Prerequisite: course 109A or consent of instructor. Total immersion program in Germany or a German-speaking setting in the U.S. to further develop student proficiency in the German language. May be repeated two times or up to 12 units of credit with consent of instructor. (P/NP grading only.)

194HA-194HB. Honors Program (3-3)
 Independent study—2 hours; term paper. Prerequisite: open only to majors with a 3.50 minimum GPA in at least 135 graduation units. (A) Research of an integrative nature (in either "General" or "Area Studies Emphasis" fields of major), guided by thesis advisor chosen by student; (B) Writing of Honors Thesis on topic selected by student in consultation with thesis advisor. (P/NP grading only. Deferred grading only, pending completion of course sequence.)

197T. Tutoring in German (1-4)
 Tutorial—3-12 hours. Prerequisite: consent of German Program Director. Tutoring in undergraduate courses included in German language program. May be repeated for credit with consent of instructor. (Same course as Film Studies 142) GE credit: ArtHum, Wrt | AH, OL, VI, WC, WE.—I. (I) Fisher

198. Directed Group Study (1-5)
 (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)
 (P/NP grading only.)

Graduate

202. Middle High German (4)
 Discussion—3 hours; lecture—1 hour. Outline of grammar; selections from Middle High German epic, romance, and lyric poetry. —II. (II)

 Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing. Introduction to cognitive grammar and application of cognitive grammar to language instruction. Syntactical problems and analyses relevant to the language the student will teach. Offered irregularly.—II. (II)

210. Techniques of Literary Scholarship (4)
 Seminar—3 hours; term paper. The bibliographical, organizational, and methodological tools and resources for advanced, independent research.—I. (I)

211. Concepts in Literary Theory (4)
 Seminar—3 hours. Advanced course in concepts of literary theory and criticism. Discussion of the emergence of theoretical concepts and their impact on the understanding and appreciation of literary works. Discussion in German and English, readings in German.—II. (II)

212. Contemporary Approaches to Literary Theory (4)
 Seminar—3 hours; term paper. Study of contemporary theoretical approaches to narrative texts, structuralism, deconstruction, feminism, Marxism/Frankfurt School, and reception theory in conjunction with the works of major authors.—II. (III)

239. Narrative and Narrative Theory (4)
 Seminar—3 hours; term paper. Study of narrative, in a theoretical and literary historical context, major elements of 19th- and 20th-century narrative, such as techniques of framing, refraction, and montage; narrative perspective; mimesis; and self-consciousness. Focus on paradigmatic prose texts alongside a spectrum of critical approaches. Offered in alternate years.—I. (I)

240. Forms of German Verse (4)
 Seminar—3 hours; term paper. The development of German verse from the Middle Ages to the present, with special emphasis on different techniques of text analysis and interpretation. May be repeated for credit with consent of instructor. Offered in alternate years.—II. (II)

241. The German Drama (4)
 Seminar—3 hours; term paper. The major forms of German drama from its origins to the middle of the twentieth century. May be repeated for credit with consent of instructor.—I. (I) Fisher

242. The German Novelle (4)
 Seminar—3 hours; term paper. The major German Novellisten, with particular emphasis on the flowering of this genre in the nineteenth century. May be repeated for credit with consent of instructor.—II. (II)

243. Fontane and the Rise of the Modern German Novel (4)
 Seminar—3 hours; term paper. Fontane, the father of the modern German novel and the chief German representative of the European novel at its greatest, in the context of the nineteenth-century European political and social scene.—II. (II)

244. Gender and Comedy (4)
 Seminar—3 hours; term paper. Analysis of plays of gender and gender in German-language comedy by male and female writers from the 18th century to the present. Authors treated include Lessing, Kleist, Buchner, Eberhard Eschenbach, Hauptmann, Hofmannsthal, Frisch, Langner, and Jelinek. Offered in alternate years.—III. (III)

252. The Writings of Lessing (4)
 Seminar—3 hours; term paper. Study of Lessing's theory of literature with particular emphasis upon his critical attacks on French drama.—I. (I)
Global and International Studies

253. Goethe (4) Seminar—3 hours; term paper. Study of the origins of Goethe's thought in German Romanticism, and his principal artistic, philosophical, scientific, and philosophical works. —I (I).

254. Schiller (4) Seminar—3 hours; term paper. A critical analysis of Schiller's major works and his impact on the intellectual climate in Germany during the late eighteenth and early nineteenth centuries. —II (II).

255. Aesthetics in the Age of Goethe (4) Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Emergence of aesthetic autonomy from eighteenth century normative poetics during the Age of Goethe. The shift from a model based on the imitation of nature (and the Ancients) to a new concept grounded in the individuality of aesthetic experience. —I (I).

257. Heinrich von Kleist (4) Seminar—3 hours; term paper. Kleist's important dramatic and prose works; special attention will be given to the peculiar hermeneutic problems in modern German, French, and Anglo-American Kleist criticism. —III (III).

258. The Novels of Thomas Mann (4) Seminar—3 hours; term paper. Reading of selected novels with emphasis on aesthetic techniques, originally, historical, and psychological views, and influence on the contemporary literary scene in Germany. —II (II).

259. Studies in Kafka (4) Seminar—3 hours; term paper. Study of Kafka's narrative techniques with special emphasis in the shorter works on the existential development from its roots in Expressionism. —II (II).

260. The Poetry of Rilke (4) Seminar—3 hours; term paper. Study of the principal motifs, myths, images, and problems in the poetry of Rainer Maria Rilke. —I (I).

261. Brecht and the Epic Theater (4) Seminar—3 hours; term paper. A reading of Brecht's works with emphasis on the ideas which impelled the development of new literary forms and concepts. —III (III).

262. Studies in Turn-of-the-Century Culture (4) Seminar—3 hours; term paper. Investigates literary currents in turn-of-the-century Germany and Austria against the background of contemporaneous developments in psychology, the visual arts, philosophy, and music. Authors treated include Hauptmann, Holz and Schlaf, Schnitzler, T. Mann, Wedekind, Musil, Hofmannsthal. Offered in alternate years. —II (II), Finney.

285. Middle High German Literature (4) Lecture/discussion—3 hours; term paper. Prerequisite: consent of instructor. Exegetical reading of Middle High German literary language. Examines linguistic and literary problems. May be repeated for credit when topic differs. —I (I), III (III).

288. The Renaissance and Reformation in German Literature (4) Seminar—3 hours; term paper. The parabolic and didactic style in Germany's literature during the sixteenth century. May be repeated for credit with consent of instructor. —I (I).

289. German Literature of the Baroque (4) Seminar—3 hours; term paper. The "Elegiantideale" and the varying methods used to portray it in seventeenth-century German literature. May be repeated for credit with consent of instructor. —I (I).

290. The Enlightenment in German Literature (4) Seminar—3 hours; term paper. Revolt against the concept of the "Elegiantideale," and evolution of a new literature based on reason and wit. May be repeated for credit with consent of instructor. —I (I).

291. Foreign Language Learning in the Classroom (3) Seminar—3 hours; project. Overview of approaches to university-level foreign language instruction and the theoretical notions underlying current trends in classroom practices across commonly taught foreign languages. (Same course as French 291 and Spanish 291.) —I (I), II (II), III (III), Anderson, Arnett, Blake, Iwaski.

292. Sentimentality and Sturm und Drang in German Literature (4) Seminar—3 hours; term paper. Reaction to overemphasis on Reason: the works of Herder, Lessing, and Gotthold Lessing. May be repeated for credit with consent of instructor. —III (III).

293. The Classical Age of German Literature (4) Seminar—3 hours; term paper. Inquiry into the aesthetic and humanistic qualities of Germany's greatest literary period. May be repeated for credit with consent of instructor. —II (II).

294. The Romantic Period in German Literature (4) Seminar—3 hours; term paper. Survey of the works of early-nineteenth-century authors in reaction against the age of classicism. May be repeated for credit with consent of instructor. —I (I).

295. Poetic Realism in German Literature (4) Seminar—3 hours; term paper. Consider the evolution of the Hauptmann generation, Symbolism, Expressionism, and the current conditions of the contemporary scene. May be repeated for credit with consent of instructor. —I (I).

296. Twentieth-Century German Literature (4) Seminar—3 hours; term paper. Outstanding figures in German literature between 1840 and 1980. Important phases in their developments will be treated. May be repeated for credit with consent of instructor. —II (II).

297. Special Topics in German Literature (4) Seminar—3 hours; term paper. Various special topics in German literature, which may cut across the usual period and genre rubrics. May be repeated for credit when topic differs. —II (II).

298. Group Study (1-5) Individual Study (1-12) Special Study for the Doctoral Dissertation (1-12) (S/U grading only.)

299. Proposal for the Doctoral Dissertation (1-12) (S/U grading only.)

Professional

300A. The Teaching of German (2) Lecture—2 hours. Prerequisite: graduate standing or consent of instructor. Theoretical instruction in modern teaching methods and demonstration of their practical application. Required of new teaching assistants. (S/U grading only.) —I (I), Arnett.

300B. Teaching Advanced German (2) Lecture—2 hours. Prerequisite: graduate standing or consent of instructor. Theoretical instruction in modern teaching methods and demonstration of their practical application. Required of new teaching assistants. (S/U grading only.) —II (II), Arnett.

300C. The Teaching of German (2) Lecture—2 hours. Prerequisite: graduate standing or consent of instructor. Theoretical instruction in modern teaching methods and demonstration of their practical application. Required of new teaching assistants. (S/U grading only.) —III (III), Arnett.

360. Teaching Assistant Training Practicum (1-4) Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.) —I (I), II (II), III (III), Arnett.

Professional

400. Tutorial and Instructional Internship (1-3) 4-week regular and 1-3 week supervision session; may be repeated for credit. —I (I), II (II), III (III).

Global and International Studies

[College of Letters and Science]

The interdisciplinary minor in Global and International Studies will enable students to learn about global and international issues at UC Davis, as well as gain first-hand academic experience abroad. The minor is also available to study abroad or participate in an international internship. Students will be expected to work closely with an academic adviser in developing an intellectually coherent program of study. Each proposal must be approved by the Faculty Director of UC Davis Study Abroad.

The minor is sponsored by the Humanities Program. For more information, see http://studyabroad.ucdavis.edu/students/.

Minor Program Requirements:

UNITS

Global and International Studies........... 24

Arts and Humanities Emphasis:

One course from: Anthropology 4, 20, International Relations 1, Political Science 3 or Sociology 5......................... 4

One upper division UC Davis general course on global or international studies in the Arts and Humanities............................................. 3-4

See program advisor for a list of approved courses.

Course cluster requirement.................. 16-17

The minor requires the selection of interrelated courses totaling a minimum of 16-17 upper division units in area and regional studies or thematic course clusters in global and international studies in the Arts and Humanities.

Suggested course clusters include: (1) Country or region-specific courses: Western Europe, Russian and East/Central Europe, Asia and the Pacific, Latin America and South America; Africa and the Middle East; Jewish Studies; specific countries.

or (2) Courses clustered around a thematic field in global and international studies: people and nationalities; the individual and society, arts, language, literature and culture.

Study Abroad and International Internships.

The course cluster requirement may be met in one of two ways: (1) completion of a minimum of 16-17 units in the course cluster emphasis by taking approved UC Davis upper division courses in the area of global/international studies and/or approved upper division courses taken while participating in a UC Davis Study Abroad, UC/EAP or another approved study abroad program, or (2) completion of 12 units of course work in a UC Davis accredited international internship, plus UC Davis courses sufficient to total 16-17 units. Those students who are unable to study abroad or participate in an international internship may fulfill the requirement by taking approved global/international courses at UC Davis. Students must meet with the GIS advisor and complete a Course Cluster Worksheet to demonstrate subject interrelatedness.

Social Science Emphasis:

One course from: Anthropology 20, International Relations 1, Political Science 3, or Sociology 5.......................................................... 4
One upper division UC Davis general course on global or international studies in the Social Sciences or Humanities is required. See program advisor for a list of approved courses.

Course cluster requirement ………… 16-17

The minor requires the selection of interrelated courses totaling a minimum of 16-17 upper division units in a general and international studies in the Social Sciences.

Suggested course clusters for the Social Science Emphasis.

(1) Courses clustered around a thematic field in global and international studies: world trade and development, peace and security, global environment, health, and natural resources.

Study Abroad and International Internships. The course cluster requirement may be met in one of two ways: (1) completion of a minimum of 16-17 units in the course cluster emphasis by taking approved UC Davis upper division courses in the area of global/international studies and/or approved upper division courses taken while participating in a UC Davis Study Abroad, UCEAP or another approved study abroad program, or (2) completion of 12 units of course work in a UC Davis accredited international internship, plus UC Davis courses sufficient to total 16-17 units. Those students who are unable to study abroad or participate in an international internship may fulfill the requirement by taking approved global/international courses at UC Davis. Students must meet with the GIS advisor and complete a Course Cluster Worksheet to demonstrate subject content.

Restrictions. No more than two courses from a single UC Davis department may be offered in satisfaction of the minor requirements.

Foreign Language Study. Students are strongly encouraged to study a foreign language, particularly the language of the country in which and about which they intend to study. However, only upper division course work may be used to fulfill requirements for the minor.

Health Informatics Program

2450 48th St., Suite 2800, Sacramento, CA 95817

916-734-8710; healthinformatics@ucdavis.edu

Faculty

Nicholas Anderson, Ph.D., Assistant Professor (Pathology and Laboratory Medicine)

April Coad, M.D., M.P.H., Assistant Clinical Professor (Dermatology)

Aaron Bair, M.D., M.S., Associate Professor (Emergency Medicine)

Matt Bishop, Ph.D., Professor (Computer Science)

Dariusz Borys, M.D., Assistant Professor (Emergency Medicine)

Robert Christoph, Ph.D., Professor (Pathology and Laboratory Medicine)

Mary Christoffer, D.V.M., Ph.D., Professor (Pathology, Microbiology, and Immunology) 

Christina Davis, M.D., Assistant Professor (Mechanical and Aerospace Engineering)

Estella Geraghty, M.D., M.S., M.P.H., Assistant Professor of Clinical Internal Medicine (General Medicine)

Fred Gorin, M.D., Ph.D., Professor (Neurology)

Bernd Hamann, Ph.D., Professor (Computer Science)

Calvin Hinch, M.D., F.A.C.P, Professor (Internal Medicine and Public Health Sciences)

Michael Hogarth, M.D., Associate Professor (Pathology and Laboratory Medicine)

Anthony Jerant, M.D., Associate Professor (Family and Community Medicine)

Tae Youn Kim, Ph.D., R.N., Associate Professor (Nursing)

Patrice Koehler, Ph.D., Associate Professor (Computer Science)

James Marcin, M.D., M.P.H., Associate Professor (Pediatrics)

Thomas Niesditt, M.D., M.P.H., Professor (Family and Community Medicine)

Hien Nguyen, M.D., M.A.S, Assistant Professor (Infectious Diseases)

Alberto Odar, M.D., Adjunct Professor (Nursing)

Sean Peisert, Ph.D., Assistant Adjunct Professor (Computer Science)

Jason Roal, M.D., Assistant Clinical Professor (Psychiatry)

J. Anthony Seibert, Ph.D., Professor (Radiology)

Hendry Ton, M.D., M.S., Associate Professor (Psychiatry)

XiaoWen Yang, Ph.D., Assistant Professor (Biostatistics)

Peter Yellowlees, M.B.B.S., M.D, Professor (Radiology)

Heather Young, Ph.D., R.N., G.N.P., F.A.A.N., Associate Vice Chancellor (Nursing)

Emeriti Faculty

Richard Walters, Ph.D., Professor Emeritus (Computer Science)

Affiliated Faculty

Mark Carroll, M.P.H., Lecturer (Pathology and Laboratory Medicine)

Jim Greene, M.D., M.S., Faculty (Pathology and Laboratory Medicine)

Wasyi Malvy, Ph.D. (Pathology and Laboratory Medicine)

Michael Minear, Chief Information Officer (UC Davis Health System)

Graduate Study. The Group currently offers an M.S. degree in Health Informatics. The program is primarily designed for clinicians (M.D., D.O., D.V.M., V.M.D., M.P.H., Ph.D., M.R., others) and healthcare IT professionals with Bachelor's degree. The course of study provides research-oriented training that spans the use of computer systems in medicine today, including methods for clinical data acquisition, storage, retrieval, development, use and implementation of the electronic medical record, management of clinical data, and the use of medical decision support systems. A research project and thesis are mandatory degree requirements.

Preparation. The Group encourages application from clinicians and healthcare IT professionals who have had experience in the manipulation of clinical information. Basic qualifications include an advanced degree in a related field or the equivalent in work experience. Proof of proficiency in a programming language is required. Applicants with extensive computer science or information technology background but little knowledge of clinical information would need to gain considerable practical experience in dealing with clinical information to be competitive in applying to the program.

Graduate Advisors. M. Carroll (Pathology and Laboratory Medicine), E. Geraghty (General Medicine), M. Hogarth (Pathology and Laboratory Medicine), A.Odor (Nursing), P. Yellowlees (Psychiatry)

Courses in Health Informatics (HII)

Graduate

202. Computer-Based Patient Records (4) Lecture/discussion—3 hours; discussion—1 hour. Prerequisite: current enrollment within the Health Informatics graduate program or consent of instructor. Introduction and overview of computer-based clinical record systems. Topics include data modeling, health system standards and terminologies; security, privacy and confidentiality; workflow modeling; data visualization; legal; decision support; public health; and evidence-based practice.—II. (III.) Odor

207. Decision Support Systems (4) Lecture discussion—2 hours. Prerequisite: consent of instructor. Explores decision support systems for medical application. Topics include medical decision making, uncertainty, review of existing decision support systems, knowledge engineering, data mining, and knowledge based systems.—II. (III.) Maly

208. Medical Informatics in Web-Based Enterprise Computing (4) Lecture—2 hours; discussion—2 hours. Introduction to the decision making processes and technologies that are involved in developing Web-based distributed enterprise applications in medicine. Focus on the informationist’s role as a team member.—II. (III.) Hogarth

209. Data Acquisition and Analysis (4) Lecture—2 hours; discussion—1 hour; laboratory—3 hours. Examines the nature, acquisition, and analysis of medical data. Data ranges from signals of electrical potentials, sounds, text, images (still and motion), and data from nucleic acid and protein expression and sequencing instruments.—I. (III.) Maly

211. Introduction to Health Informatics (4) Lecture—3 hours; discussion—1 hour. Overview course to give the student a broad exposure to the field of Health Informatics. Topics covered include, but are not limited to, networking, information systems, coding, HL7, Security and HIPAA. —I. (II.)

211V. Telemedicine (4) Web virtual lecture—3 hours; web electronic discussion—1 hour. Issues for the development and maintenance of a successful telemedicine program with focus on strategic planning, clinical applications, project management, risk management and legal issues; reimbursement and contracting; human resources and program sustainability.—I, II, III, (I, II, III) Yellowlees

212. Computer Security in Health Informatics (4) Lecture—3 hours; project. Prerequisite: course 210; 202; 209. Critical thinking about basic concepts in computer security and privacy. How the computer security and privacy impact health informatics, ranging from electronic health records to telemedicine to record, virtual surgery.—II, (I, II) Peisert

289A-E. G, I, Special Topics in Medical Informatics (1-5) Lecture, laboratory, or combination. Prerequisite: consent of instructor. Special topics in (A) Data Acquisition, (B) Electronic Medical Information, (C) Computer Based Patient Records, (D) Decision Support, (E) Medical Image Analysis, (F) Biostatistics, (H) Modeling Biological Systems, (I) Coding Systems. May be repeated for credit when topic differs.—I, II, (I, II, III)
334

Hebrew

289F. Database and Knowledge
Management (4)
Lecture/discussion—3 hours; term paper. Prerequisite: consent of instructor. Course objectives include
understanding the informatics techniques for data
capture, information management, and knowledge
generation that a student will use throughout their
career. May be repeated for credit.—I, II, III. (I, II,
III.) Lynch
289H. Modeling Biological Systems (4)
Lecture—3 hours; laboratory—1 hours.Class size
limited to 20 students. Create awareness of how
modern computer graphics have led to VR-Sim-Rob
applications, and how they are modifying the teaching of medicine and in some cases the diagnosis
and treatment of patients.—II. (II.) Odor
290. Seminar in Medical Informatics (1)
Seminar—1 hour. Restricted to 20 students. Discussion of current graduate research and topics in
Health Informatics. Oral presentations of individual
study. (S/U grading only.)—I, II, III. (I, II, III.) Odor
299. Research in Health Informatics (1-12)
Independent research in Health Informatics. (S/U
grading only.)—I, II, III. (I, II, III.)

The History major develops critical intelligence and
fosters an understanding of ourselves and our world
through the study of the past—both remote and
recent.
The Program. A student electing a major in History may complete Plan I or Plan II. Plan I enables
students to receive a broad education in histories of
several geographic areas. Plan II encourages interested students, including those preparing for graduate work in history, to enroll in a seminar, to
undertake independent work, and to study the history of historical thought as part of the major. Students preferring more active engagement in research
and writing are encouraged to follow Plan II.
Career Alternatives. A degree in history is excellent preparation for a professional career such as
teaching, law, journalism, public administration, or
business management. Professional schools in these
and related fields are looking for students who can
weigh conflicting evidence, evaluate alternative
courses of action or divergent points of view, and
express conclusions logically in everyday language.
These analytical skills are stressed in history classes,
and their mastery gives the history student a solid
preparation for subsequent training in a specialized
career.

A.B. Major Requirements:
UNITS
Preparatory Subject Matter
(Plan I or II) .......................................... 20
Five lower division courses chosen from the
following six fields, including at least two
from one field, one from a second field, and
one from a third field. The fifth course can be
taken from any field ............................. 20
(a) African and Middle East History: History
6, 15
(b) Asian History: History 6, 8, 9A, 9B
(c) European History: History 3, 4A, 4B, 4C
(d) Latin American History: History 7A, 7B,
7C
(e) U.S. History: History 17A, 17B, 72A,
72B
(f) World History: History 10A, 10B, 10C

Depth Subject Matter—Plan I............ 40-41
Four upper division courses from one of the
fields of concentration listed below......... 16
Two upper division courses from one of the
other fields of concentration listed
below................................................... 8
Two upper division courses from a field or
fields other than those chosen to satisfy the
two preceding requirements .................... 8
One additional upper division course
chosen from any of the fields ................... 4
One course from the following: History 101
or 102 or 103 (in field of
concentration) .....................................4-5
One of the courses taken to fulfill the above
requirements must deal with pre-modern
history.
Total Units for the Major, Plan I........ 60-61
Depth Subject Matter—Plan II................ 42
Four upper division courses from one of the
fields of concentration listed below. Include a
two-quarter sequence of courses ............ 16
Three upper division courses from one of the
other fields listed.................................. 12
History 101 .......................................... 5
History 102 in field of concentration (in
exceptional circumstances, a student may,
with the permission of an adviser, take the
seminar in another field) ......................... 5
History 103 in field of concentration ........ 4
One of the courses taken to fulfill the above
requirements must deal with pre-modern
history.
Total Units for the Major, Plan II............ 62
Fields of Concentration
(a) Europe: History 102A, 102B, 102C,
102D, 102E, 102F, 102I, 102P, 102X,
109A, 109B, 110A, 111B, 111C, 112A,
112B, 120, 121A, 121B, 121C, 122, 125,
130A, 130B, 130C, 131A, 131B, 131C,
132, 133, 134A, 135A, 135B, 136, 138A,
138B, 138C, 139A, 139B, 140, 141,
142A, 142B, 143, 144A, 144B, 145,
146A, 146B, 147A, 147B, 147C, 148A,
148B, 148C, 149, 151A, 151B, 151C,
151D, 160.
(b) United States History: History 102K,
102L, 102M, 102X, 120, 169A, 169B,
170A, 170B, 170C, 171A, 171B, 171D,
172, 173, 174A, 174B, 174C, 174D, 175,
176A, 176B, 177A, 177B, 178A, 178B,
179, 180A, 180B, 180C, 181, 182, 183A,
183B, 184, 185A, 185B, 188, 189.
(c) Asian History: History 102G, 102H,
102N, 102Q, 102R, 102X, 109A, 109B,
110, 110A, 111A, 112A, 112B, 112C,
113, 120, 190A, 190B, 190C, 190D,
191A, 191B, 191C, 191D, 191E, 191F,
193A, 193B, 193C, 194A, 194B, 194C,
194D, 194E, 195B, 196A, 196B.
(d) African History: 102O, 102X, 109A,
109B, 110, 110A, 112C, 115A, 115B,
(e) Latin American History: History 102J,
102X, 109A, 109B, 110, 110A, 160, 162,
163A, 163B, 164, 165, 166A, 166B, 167,
168, 169A, 169B.
(f) Within broad fields, a student may wish to
concentrate some of the courses on a
particular area or period, such as China or
Great Britain or Medieval Europe. Special
approval is not required.
Major Advisers. See the department’s website for
updated information.
History and Philosophy of Science. Courses
from the History and Philosophy of Science program
may count toward the History major. History and Philosophy of Science 130A fulfills upper division
requirements in the field of pre-industrial Europe. History and Philosophy of Science 130B, 150, and
180 fulfill upper division requirements in either the
U.S. or Modern Europe field.

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2015-2016 offering in parentheses
Pre-Fall 2011 General Education (GE): ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Domestic Diversity; Wrt=Writing Experience
Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SE=Science and Engineering; SS=Social Sciences;
ACGH=American Cultures; DD=Domestic Diversity; OL=Oral Skills; QL=Quantitative; SL=Scientific; VL=Visual; WC=World Cultures; WE=Writing Experience


The remaining major requirements can be fulfilled abroad provided that (a) the course should be evaluated as at least four UC Davis units, (b) the course should be considered upper division by the standards set forth by the UC Davis Study Abroad Program, and (c) the course should be offered in the field of History. Students may present copies of the course work, syllabus, and writing assignments to the department's liaison person with the Study Abroad office for approval.

Note: students who wish to receive credit for courses taken abroad under programs other than UC Davis Study Abroad Program and the Undergraduate Program Committee to do so.

Teaching Credential Subject Representative. See the Teaching Credential/M.A. Program on page 115.

Preparing for Careers in Teaching. History majors can pursue teaching. To ensure your undergraduate coursework prepares you for a subject matter competency test, please contact the History Project at 530-752-4383 or http://history.ucdavis.edu.

Graduate Study. The Department of History offers programs of study and research leading to the M.A. and Ph.D. degrees in history. Detailed information may be obtained by contacting the Graduate Adviser.

Graduate Advisers. See the department's website for updated information.

American History and Institutions. This University requirement can be satisfied by passing any one of the following courses in History: 17A, 17B, 72A, 72B, 170A, 170B, 170C, 171A, 171B, 171C, 172, 172A, 174A, 174B, 174C, 174D, 175, 176A, 176B, 177A, 177B, 178A, 178B, 180A, 180B, 181, 183A, 183B, 184, 189. The upper division courses may be used only with the consent of the instructor; see also Undergraduate requirements.

Courses in History (HIS)

Lower Division

3. Cities: A Survey of World Cultures (4)

Lecture—3 hours; lecture/discussion—1 hour. Survey of urban ways of life, focusing on up to ten cities selected by the instructor. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.—I, II, III. Langland, Stuart

4A. History of Western Civilization (4)

Lecture—3 hours; discussion—1 hour. Growth of western civilization from late antiquity to the Renaissance. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.—I, II. McKee

4B. History of Western Civilization (4)

Lecture—3 hours; discussion—1 hour. Development of western civilization from the Renaissance to the Eighteenth Century. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.—II. Landau, Stuart

4C. History of Western Civilization (4)

Lecture—3 hours; discussion—1 hour. Development of Western Civilization from the Eighteenth Century to the present. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.—II, III. Campbell, Sailer

6. Introduction to the Middle East (4)

Lecture—3 hours; discussion—1 hour. Survey of the major social, economic, political and cultural transformations in the Middle East from the rise of Islam (c. 600 A.D.) to the present; emphasizing themes in religion, politics, and society. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.—I. Tezcan

7A. History of Latin America to 1700 (4)

Lecture—3 hours; discussion—1 hour. Introduction to the history of the Americas from the late pre-Columbian period through the initial phase and consolidation of a colonial regime (circa 1700). Topics include conquest, colonialism, racial mixture, gender systems. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.—I. (I) C.F. Walker

7B. History of Latin America, 1700-1900 (4)

Lecture—3 hours; discussion—1 hour. Latin America from colony to republic. The nature of iberic colonialism, the causes for independence, the creation of nation states, the difficulties in consolidating these nations, and the rise of Latin America’s trade and export econmics in the nineteenth century. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.—II. (II) Renendez

7C. History of Latin America, 1900-present (4)

Lecture—3 hours; discussion—1 hour. Latin America since the beginning of the 20th century. Themes include export economies, oligarchic rule, crises of depression and war, corporatism, populism revolution and reform movements, cultural and ethnic issues. U.S.-Latin American relationships and cultural restructuring. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.—III. (III) Langland

8. History of Indian Civilization (4)

Lecture—3 hours; discussion—1 hour. Written reports. Survey of Indian civilizations from the rise of cities (ca. 2000 B.C.) to the present, emphasizing themes in religion, social and political organization, and art and literature that reflect cultural interactions and change. GE credit: ArtHum or SocSci, Div | AH or SS, WC, WE.—II. Sen

9A. History of East Asian Civilization (4)

Lecture—3 hours; discussion—1 hour. Surveys traditional Chinese civilization and its modern transformation. Emphasis is on how religion and political and social life, art and literature. Perspectives on contemporary China are provided. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.—I. III. Bassler

9B. History of East Asian Civilization (4)

Lecture—3 hours; discussion—1 hour. Surveys traditional Japanese civilization and its modern transformation. Emphasis is on how religion and political and social life, art and literature. Perspectives on contemporary Japan are provided. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.—II, III. Kim

10A. World History to 1530 (4)

Lecture—3 hours; discussion—1 hour. Historical examination of the changing relationship of human societies to one another and to their natural settings through the year 1530, with particular attention to long-term trends and to periodic crises that reshaped the links of culture and nature on a global scale. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.—I, II, III. Ananthahpt

10B. World History, c. 1530-1850 (4)

Lecture—3 hours; discussion—1 hour. Major topics in world history from the 14th century to the beginning of the 19th century. Topics will vary but may include oceans as systems of human communication and conflict; the global consequences of “industrial revolutions” in Europe and Asia. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.—II, III. Harris, Stolzenberg

10C. World History III (4)

Lecture—3 hours; discussion—1 hour. Major topics from world history of the 19th and 20th centuries, emphasizing the rise and fall of Western colonial empires; Cold War and the superpowers; the spread of the nation-states; and the processes of globalization. GE credit: ArtHum or SocSci, Div | AH or SS, WC, WE.—II, III. Dickinson, Ei Shakry

11. History of the Jewish People in the Modern World (4)

Lecture—3 hours; discussion—1 hour. Histories and cultures of the Jews since 1492. Topics include: the making of Jewish diasporas, roots of antisemitism, the Holocaust in images and texts, changing ideas of the self, Jews in America, and processes of modernizations of the Jewish past. Offered in alternate years. GE credit: ArtHum | AH, DD, VI, WC, WE.—I (I) Miller

12. Food and History (4)

Lecture—3 hours; discussion—1 hour. Survey of the ways humans have fed themselves from the dawn of humanity to the present. Transformation of plants and animals into food, cooking into cuisine, and ceremony into etiquette. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.—II, III. Resendez

15. Introduction to African History (4)

Lecture—3 hours; discussion—1 hour. Examination of the longrange historical context as background to current conditions in Africa. Includes the early development of African civilizations, the slave trade and...
99. Special Study for Undergraduates (1-5) Lecture—3 hours; discussion—1 hour. The experiences of the American people from the Colonial Era to the Civil War. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, DD, WE. —II. Decker

17A. History of the United States (4) Lecture—3 hours; discussion—1 hour. The experiences of the American people from the Colonial Era to the Cold War. Not open for credit to students who have completed course 17C. GE credit: ArtHum or SocSci, Div, Wrt | AC GH, AH or SS, DD, WE.—II, III, IV, V. (Hartigan-O’Connor, Kelm an, Smolen ski, Taylor)

17B. History of the United States (4) Lecture—3 hours; discussion—1 hour. The experiences of the American people from the Civil War to the end of the Cold War. Not open for credit to students who have completed course 17C. GE credit: ArtHum or SocSci, Div, Wrt | AC GH, AH or SS, DD, WE.—II, III, IV, V. (Hartigan-O’Connor, Kelm an, Smolen ski, Taylor)

72A. Social History of American Women and the Family (4) Lecture—3 hours; discussion—1 hour. Social and cultural history of women, sex roles, and the family from colonial America to the late nineteenth century emphasizing changes resulting from the secularization, commercialization, and industrialization of American society. GE credit: ArtHum or SocSci, Div, Wrt | AC GH, AH or SS, DD, WE.—II. Hartigan-O’Connor

72B. Social History of American Women and the Family (4) Lecture—3 hours; discussion—1 hour. Social and cultural history of women, sex roles, and the family in the twentieth century, emphasizing female reformers and revolutionaries, working class women, consumerism, the role of media, the “feminine mystique,” changes in family life, and the emerging women’s movement. GE credit: ArtHum or SocSci, Div, Wrt | AC GH, AH or SS, DD, WE.—II. Materson

98. Directed Group Study (1-5) Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.)

99. Special Study for Undergraduates (1-5) (P/NP grading only)

Upper Division

101. Introduction to Historical Thought and Writing (5) Lecture/discussion—4 hours; term paper. Prerequisite: consent of instructor. Study of the history of historical thought and writing, analysis of critical and speculative philosophies of history and evaluation of modes of organization, interpretation, and style in historical writing. GE credit: WE.—II, III. (Saler, Stollzenberg)

102A-S. X. Undergraduate Proseminar in History (5) Seminar—3 hours, term paper. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Consent of instructor. (B) Medieval; (D) Modern Europe to 1815; (E) Europe since 1815; (F) Russia; (G) China to 1800; (H) China since 1800; (I) Britain; (J) Latin America since 1810; (K) American History to 1787; (L) United States, 1787-1896; (M) United States since 1896; (N) Japan; (O) Africa; (P) Christianity and Culture in Europe, 50-1500; (Q) India; (R) Muslim Societies; (S) Education Abroad Program, GE credit: ArtHum, Wrt | AH or SS, WE; (X) Comparative History, selected topics in cultural, political, economic, and social history that deal comparably with more than one geographic field. May be repeated for credit. Limited enrollment.—I, II, III, IV, V, VI.

103. Topics in Historical Research (4) Discussion—3 hours; individual consultation with instructor, term paper. Prerequisite: consent of instructor. Individual research resulting in a research paper on a specific topic in one of various fields of history. May be repeated for credit. GE credit: WE.

104A. Introduction to Historical Research and Interpretation (4) Seminar—3 hours; term paper. Prerequisite: acceptance into History Department Honors Program. Directed reading and research aimed at preparing students to select appropriate topics and methodologies for a senior honors essay and to clarify their topics within a meaningful, broad context of historiographical interpretations. Culminates in the submission of a full prospectus for an honors essay. GE credit: WE.—II. (Spyridakis)

104B. Honors Thesis (4) Tutorial—4 hours. Prerequisite: course 104A. Research in preparation of a senior honors thesis under the direction of a faculty adviser. (Deferred grading only, pending completion of sequence.) GE credit: WE.—II.

104C. Honors Thesis (4) Tutorial—4 hours. Prerequisite: course 104A and 104B. Completion of a senior honors thesis under the direction of a faculty adviser. (Deferred grading only, pending completion of sequence.) GE credit: WE.—III. (Spyridakis)

108. Global Environmental History (4) Lecture/discussion—3 hours, project. Global, comparative study of environmental change, human perceptions of nature, and manipulations of nature have changed over time. Primary focus post-1500, emphasis on critically analyzing many common ideas of environmentalism. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WE.—I. Davis

109A. Global Environmental History (4) Lecture/discussion—3 hours, project. Global, comparative study of how environmental change, human perceptions of nature, and manipulations of nature have changed over time. Primary focus post-1500, emphasis on critically analyzing many common ideas of environmentalism. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WE.—Davis

109B. Environmental Change, Disease and Public Health (4) Lecture/discussion—3 hours, term paper. Analysis of environmental changes from pre-history to the present and their influence on disease distribution, virulence and public health, many of these changes have been driven by human action and transformations of pathogen ecosystems that have accelerated under globalization. GE credit: SciEng or SocSci, Div | SE or SS, SL—I, II. (Davis)

110. Themes in World History (4) Lecture—3 hours, term paper. Prerequisite: upper division standing. Issues and topics in world history. Topics will emphasize the interaction of diverse regions of the world as well as common patterns of historical change. May be repeated for credit if topic and/or instructor differs. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WE, WC, WE.

101A. Colonialism and the Making of the Modern World (4) Lecture—3 hours, term paper. History of the modern world, focusing on struggles between Eurocentric and colonized peoples; the global formation of capitalism; the creation of nation-states; and the constitution of bourgeois bodies and racial selves in modern societies. Offered in alternate years. GE credit: ArtHum | AH or SS, VL, WE.—III. El Shamy

111A. Ancient History (4) Lecture—3 hours; discussion or paper (student option). History of ancient empires of the Near East and of their heirs, the Hellenistic World. GE credit: ArtHum or SocSci, Wrt | AH or SS, WE.—I. Spyridakis

111B. Ancient History (4) Lecture—3 hours; discussion or paper (student option). Political, cultural and intellectual study of the Greek world from Minoan-Mycenaean period to end of Hellenistic Age. GE credit: ArtHum or SocSci, Wrt | AH or SS, WE, WC.—II. Spyridakis

112A. History of Modern Jewish History (4) Lecture—3 hours, term paper. Topics in the history of Jews from the Biblical era to the era of Jewish emancipation. Topics can be framed chronologically (e.g., medieval Jewry) or thematically (e.g., trade and Jewish communities). May be repeated one time for credit. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WE.

112B. Topics in Modern Jewish History (4) Lecture—3 hours, term paper. Topics in the history of Jews from the era of Jewish emancipation to the present. Topics can be framed chronologically or thematically (e.g., Zionism, assimilation, the post Holocaust diaspora). GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WE.

112C. History of Jews in the Muslim World (4) Lecture—3 hours, term paper. Prerequisite: upper division standing recommended. History of Jewish communities in the lands of Islam from the time of the Prophet Muhammad to the present day. GE credit: SocSci, Div, Wrt | AH or SS, WE.

113. History of Modern Israel (4) Lecture—3 hours, term paper. Topics include the rise and fall of utopian Zionism, the century-long struggle between Jews and Arabs, the development of modern Hebrew culture, the conflict between religious and secular Jews, and the nature of Israel’s multicultural society. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WE, WC, WE.—Bale

115A. History of Africa (4) Lecture—3 hours, term paper. Prerequisite: course 15 recommended. Introductory survey of the history of West Africa and/or the Congo region from the earliest times to the present. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WE.

115B. History of East and Central Africa (4) Lecture—3 hours, term paper. Prerequisite: course 15 recommended. Introductory survey of the history of east and central Africa from earliest times to the present. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WE, WC, WE.—Decker

115C. History of Southern Africa (4) Lecture—3 hours, term paper. Prerequisite: course 15 recommended. Introductory survey of the history of Southern Africa (including South Africa) from earliest times to the present. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WE, WC, WE.—Decker

113F. History of North, Horn, Sudan and Nile Valley (North and North-East Africa) (4)

Lecture—4 hours; term paper. This course shall investigate the history of the north and northeast regions of continental Africa, encompassing the Mediterranean area, the Maghreb, Sahara, Horn of Africa, the Nile Valley and the Sudan, covering the ancient period to the present. May be repeated up to four times for credit when instructor differs. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE. —II. Miller

116. African History: Special Themes (4)

Lecture—3 hours; term paper. Prerequisite: courses 115A and 115B recommended. Themes of African history, such as African states and empires, slave trade, relationship of Egypt to rest of Africa, Bantu origins and migrations, and French policy of Assimilation and Association. GE credit: ArtHum or SocSci | AH or SS, WC, WE.

120. World War II (4)

Lecture—3 hours; extensive writing. The Second World War from 1931 to 1945 in all of its theaters. Causes, conduct, and consequences of the war including military, political, economic, social, and cultural factors, with special emphasis on the battlefront strategy and mobilization of the home front. Offered irregularly. GE credit: SocSci | SS, WC, WE. —I, II, III, IV; Raino, R. L.

121A. Medieval History (4)

Lecture/discussion and panel presentations—3 hours. European history from “the fall of the Roman Empire” to the eighth century. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE. —McKee

121B. Medieval History (4)

Lecture/discussion and panel presentations—3 hours. European history from Charlemagne to the twelfth century. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE. —McKee

121C. Medieval History (4)

Lecture/discussion and panel presentations—3 hours. European history from the Crusades to the Renaissance. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE. —McKee

122. Selected Themes in Medieval History (4)

Lecture—3 hours; term paper. Each offering will focus on single major theme, such as medieval agrarian history, feudalism, the family, medieval Italy, the Crusades, which includes original sources in English translation and modern works. May be repeated for credit. GE credit: ArtHum or SocSci | AH or SS, WC, WE.

125. Topics in Early Modern European History (4)

Laboratory/discussion—3 hours; term paper. Prerequisite: course 4B recommended. Social and cultural history, 1300-1800. Topics such as medieval and Renaissance Italian, early modern Italy, Ancient Regime France, family and sexuality, and material culture and daily life. May be repeated for credit. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

130A. Christianity and Culture in Europe: 50-1450 (4)

Lecture—3 hours; written report or research paper. A history of the ideas and institutions of Christianity and their impact on the late Roman Empire and medieval Europe in terms of outlook on life, art, politics, and economics. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

130B. Christianity and Culture in Europe: 1450-1600 (4)

Lecture—3 hours; written report or research paper. A history of the Lutheran, Zwinglian-Calvinist, Radical, Anglican, and Catholic Reformations as foundation stones of a new culture in Europe, with special attention to the interconnections between the revival of antiquity and the different reform movements. GE credit: ArtHum or SocSci | AH or SS, WC, WE. —Harris

130C. Christianity and Culture in Europe: 1600-1850 (4)

Lecture—3 hours; written report or research paper. A survey of the intellectual, cultural and political reorientation of European society in the aftermath of the Wars of Religion. “Secularization” will be discussed in the context of the Enlightenment and Romanticism. GE credit: ArtHum or SocSci | AH or SS, WC, WE.

131A. Early Modern European History (4)

Lecture—3 hours; written reports. Prerequisite: courses 4A and 4B recommended. Western European history from about 1350 to about 1500. GE credit: ArtHum or SocSci | AH or SS, WC, WE. —Stuart

131B. European History During the Renaissance (4)

Lecture—3 hours; term paper. Survey of European society, politics, and culture from the late 15th through the early 17th centuries, with particular focus on the Italian and Northern Renaissance, the Protestant Reformation, and the Catholic Counter Reformation. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE. —Stuart

131C. The Old Regime: Absolution, Enlightenment, European Revolutions (4)

Lecture—3 hours; term paper. Survey of European society, politics, and culture in the 17th and 18th centuries, focusing on religious warfare, absolutism, Scientific Revolution, Enlightenment and the growth of religious tolerance, the French Revolution and the collapse of the old regime. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE. —Stuart

132. Crime and Punishment in Early Modern Europe (4)

Lecture—3 hours; term paper. Deviance and crime in early modern Europe, contrasting imaginary crimes, e.g. witchcraft, with “real” crimes such as highway robbery and infanticide. Examines impact of gender, sexual orientation, ethnicity, and class in process of criminalization. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE. —Stuart

133. The Age of Ideas (4)

Lecture—3 hours; written reports. The Enlightenment and its background in the eighteenth century. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE. —I. Stolzenberg

134A. The Age of Revolution (4)

Lecture—3 hours; written reports. Ideas and institutions during the French Revolution and the Napoleonic era. GE credit: ArtHum or SocSci | AH or SS, WC, WE.

135A. History of Science, 18th to 20th Century (4)

Lecture/discussion—3 hours; term paper. Prerequisite: upper division standing. Survey of the development of science, technology, and medicine from the ancient world to the eighteenth century, with special emphasis on Isaac Newton as the culmination of the seventeenth century scientific revolution. GE credit: ArtHum or SocSci | AH or SS, WC, WE.

135B. History of Science, 18th to 20th Centuries (4)

Lecture—3 hours; term paper. Prerequisite: upper division standing. Survey of the historical development of scientific thought in geology, biology, chemistry, and astronomy from the eighteenth century to the twentieth century, with special emphasis on the development of medical knowledge in epidemiology and anatomy; function of this knowledge, how it changed with technological breakthroughs and professionalization; and role of medicine in attitudes toward poverty, women, race, and disease. Offered in alternate years. GE credit: ArtHum or SocSci | AH or SS, WC, WE.

191F. History of the People’s Republic of China (4)
Lecture—2 hours; discussion—1 hour; extensive writing. Prerequisite: upper division standing. Comprehensive analysis of recent Chinese history, including land reform, the Cultural Revolution, the post-Mao era, and the consequences of the new economic policies of the 1980s. Not open for credit to students who have completed course 190C. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.—III.

1910. Special Topics in Chinese History to 1800 (4)
Lecture—3 hours; extensive writing. Prerequisite: course 9A or consent of instructor. Topics in the history of China from the beginning of the imperial period through the Qing dynasty. Topics may be framed chronologically (e.g., the Ming Dynasty) or thematically (e.g., Trade in early Chinese history). May be repeated one time for credit when topic differs. Offered irregularly. GE credit: AH, WC, WE.—Bosserly, Javers

191H. Special Topics in Chinese History after 1800 (4)
Lecture—3 hours; extensive writing. Prerequisite: consent of instructor. Topics in the history of China from 1800 to the present. Topics may be framed chronologically (e.g., The Republican Period [1911-1948]) or thematically (e.g., The Modern Evolution of Chinese Law). May be repeated one time for credit when topic differs. Offered irregularly. GE credit: AH, WC, WE.—Bosserly, Javers

1911. Sex and Society in Modern Chinese History (4)
Lecture—3 hours; term paper. Role of sex, gender, and family relations in the development of Chinese politics, society, and personal life in the modern period, 1900-present. Not open for credit to students who have completed course 190C. Offered irregularly. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.—El-Shakry

193A. History of the Modern Middle East, 1750-1914 (4)
Lecture—3 hours; term paper. Prerequisite: course 6 recommended. Transformation of state and society within the Middle East from 1750 to 1914 under pressure of the changing world economy and European imperialism. Themes include colonialism, Orientalism, Arab intellectual renaissance, Islamic reform, state formation, and revolution. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, VI, WC, WE.—El-Shakry

193B. History of the Modern Middle East from 1914 (4)
Lecture—3 hours; term paper. Prerequisite: course 6 recommended. The Middle East from the turn of the 20th century to the present. Themes include the legacies of imperialism, cultural renaissance, the World Wars, nationalism, Palestine/Israel, Islamic revival, gender, revolutionary movements, politics of oil and war, cultural modernism, exile and diaspora. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, VI, WC, WE.—El-Shakry

193C. The Middle East Environment: Historical Change and Current Challenges (4)
Lecture/discussion—3 hours; project. Prerequisite: upper division standing recommended. Examines Middle East environment and human use of nature over last 10,000 years. Integrates environmental, historical and current environmental problems. Case Studies of Egypt, Maghreb countries, Arabian peninsula/Gulf countries, desertification, water, indigenous, Global Commons. GE credit: ArtHum or SocSci | AH or SS — Davis
Graduate

201A-N, P-O, S-T, W, X. Sources and General Literature of History (4)
Seminar—3 hours; term paper. Prerequisite: consent of instructor. Designed primarily for students preparing for higher degrees in history. (A) Ancient; (B) Medieval; (C) Renaissance and Reformation; (D) Early Modern Europe; (E) Europe since 1815; (F) China to 1880; (G) China since 1880; (H) Britain; (I) Latin America; (J) United States to 1877; (K) United States, 1878-1896; (L) United States since 1896; (M) Middle East; (N) Modern Japan; (P) African Historiography; (Q) Cross-Cultural Women’s History; (S) History of Science and Medicine; (T) Jewish History; (W) Sources and General Literature of History; (X) World History. May be repeated for credit when different subject area is studied.

202A-I. Major Issues in Historical Interpretation (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing. Fundamental issues and debates in the study of history. (A) Ancient; (B) Medieval Europe; (C) Modern Europe; (D) India; (E) Africa; (F) China; (G) Japan; (H) United States; (I) Latin America. Readings, papers, and class reports. May be repeated for credit when different subject area is studied. — I, II, III, (I, II, III).

203A Research Seminar (4)
Seminar—3 hours; tutorial—1 hour. Designed for students preparing for higher degrees in history. Individual research and analysis resulting in substantial research paper of publishable quality. Completion required of all Ph.D. candidates. The three courses must be taken in continuous sequence, ordinarily during second year. — I (I).

203B-203C Research Seminar (4-4)
Seminar—3 hours; tutorial—1 hour. Prerequisite: course 203A. Designed for students preparing for higher degrees in history. Individual research and analysis resulting in substantial research paper of publishable quality. Completion required of all Ph.D. candidates. The three courses must be taken in continuous sequence, ordinarily during second year. — II, III, (II, III).

204. Historiography (4)
Seminar—3 hours; term paper. Major issues in the philosophy and methodology of history. — I (I).

221. Medieval History (4)
Seminar—3 hours. Prerequisite: courses 121A, 121B, 121C recommended. Topics in the history of medieval and early Renaissance Europe.

245. Modern European History (4)
Seminar—3 hours. Prerequisite: course 201E. Primary sources and research methodologies in the history of modern France and Germany. May be repeated one time for credit. — III (III).

261. Latin American History (4)
Seminar—3 hours. Prerequisite: two courses in Latin American history, reading knowledge of Spanish or Portuguese. — I, II, III, (I, II, III).

271A-271B. United States History (4-4)
Seminar—3 hours; term paper. Prerequisite: course 2101 or 202H. Research in literature, methods, and sources on aspects of United States history culminating in each student completing a research paper in the field by the end of the second quarter. May be repeated for credit. (Deferred grading only, pending completion of sequence.)

291A. Chinese History (4)
Seminar—3 hours; term paper. Prerequisite: consent of instructor. Research on topics to be chosen by the students for the purpose of writing article-length papers. May be repeated for credit. (Deferred grading only, pending completion of sequence.) — Bossler

291B. Chinese History (4)
Seminar—3 hours; term paper. Prerequisite: consent of instructor. Completion of article-length papers on topics chosen by students. May be repeated for credit. (Deferred grading only, pending completion of sequence.) — Bossler

291C. Methods and Issues in Chinese History (4)
Seminar—2 hours; tutorial—1 hour. Prerequisite: reading knowledge of Chinese; consent of instructor. Readings in Chinese historical materials. Training in the use of Chinese reference works (including online resources). May be repeated for credit. — I (I) Bossler

292. College Teaching Internship (4)
Internship—4 hours. Prerequisite: course 300 (may be taken concurrently). Student prepares and teaches one lower division history course in a nearby community college under the supervision of a UC Davis instructor and a community college instructor. (S/U grading only.)

298. Group Study (1-5)

299. Research (1-12)
(S/U grading only.)

299D. Individual Study (1-12)
(S/U grading only.)

Professional

389. Introductory Seminar for Teaching Assistants (1)
Seminar—1 hour. Prerequisite: must be enrolled in course 390. An introduction to the broad comparative and theoretical issues of teaching methods and techniques in history. (S/U grading only.) — I (I).

390. Teaching History in College (2)
Discussion—2 hours. Designed for teaching assistants with emphasis on problems and procedures encountered by teachers of lower division classes at the university. (S/U grading only.)

History and Philosophy of Science

(University of California, Davis)

Department of History

Joseph Dumit, Ph.D., Program Director

Program Office, 1240 Social Sciences and Humanities Building
530-752-0703

Committee in Charge

Thomas Beamish, Ph.D. (Sociology)
Mario Biagioli, Ph.D. (Science and Technology Studies, School of Law)
Patrick Carroll, Ph.D. (Sociology)
Timothy Choy, Ph.D. (Anthropology, Science and Technology Studies)
Marisol de la Cueva, Ph.D. (Anthropology)
Joseph Dumit, Ph.D. (Anthropology, Science and Technology Studies)
James Griesemer, Ph.D. (Philosophy)
Caren Kaplan, Ph.D. (American Studies)
Camil Millburn, Ph.D. (History)
Roberta Milestein, Ph.D. (Philosophy)
Daniel Stolzenberg, Ph.D. (History)
Madhavi Sunder, J.D. (School of Law)

Minor Program Requirements:

The interdisciplinary minor in the history and philosophy of science invites students to examine historical and contemporary problems in a variety of scientific disciplines, and to explore concepts and procedures basic to science and how they have evolved. The

Chris van Kessel, Ph.D., Professor (Plant Sciences)

Astrid Volder, Ph.D., Assistant Professor (Plant Sciences)

M. Andrew Wachter, Ph.D., Professor (Viticulture and Enology)

Larry E. Williams, Ph.D., Professor (Viticulture and Enology)

John I. Yoder, Ph.D., Professor (Plant Sciences)

Florence Zakharov, Ph.D., Associate Professor (Plant Sciences)

Maciej Zwiencienki, Ph.D., Associate Professor (Plant Sciences)

Horticulture and Agronomy (A Graduate Group)
Human and Community Development

Interdisciplinarity and Career Alternatives. At least one practicum course is required. A second practicum or supervised independent study can be used to fulfill the restricted elective requirement for the major. In addition, students can intern in schools, early childhood education or senior centers, hospitals, rehabilitation centers, probation offices, group foster homes, mental health clinics, or as tutors for handicapped or bilingual students. Human development graduates fill a wide variety of positions in preschools, elementary and special educational settings, programs designed for parents, families, and the elderly, as well as governmental jobs related to social services for people of all ages. Students who emphasize biological aspects of human development can apply to medical school or pursue training for positions in the health sciences. Human development prepares students to pursue advanced degrees in behavioral and social sciences, education, social work, family law, or health sciences.

Preparatory Requirements. UC Davis students who wish to change their major to Human Development must complete the following courses with a combined grade point average of at least 2.50. All of the following courses must be taken for a letter grade:

- Psychology 1: 4 units
- Statistics 10 or 13: 4 units
- Sociology 46A or 46B: 4 units

One course from: Anthropology 1, 2 or 15
One course from: Biological Sciences 2A, 10, 10V, Microbiology 10, Molecular and Cellular Biology 10, Neurobiology, Physiology, and Behavior 12: 3-5 units

One course from: Molecular and Cellular Biology 10 or Biological Sciences 101: 4 units
One course from: History 17A, 17B, 72A, 72B, or Political Science 1: 4 units
Two courses from: Philosophy 5, 30, 31, 32, or 38: 8-9 units
One course from: Neurobiology, Physiology, and Behavior 101, or Psychology 101: 3-5 units
One course from: Psychology 41 or Sociology 46A and 46B, or Statistics 10 or 13: 3-5 units

B.S. Major Requirements: 38-47 units

Preparatory Subject Matter: 8-9 units

Two courses from: Anthropology 1, 2, or 15: 8-10 units

One course from: Biological Sciences 2A, 10, 10V, Microbiology 10, or Neurobiology, Physiology, and Behavior 12: 3-5 units

One course from: Molecular and Cellular Biology 10 or Biological Sciences 101: 4 units
One course from: History 17A, 17B, 72A, 72B, or Political Science 1: 4 units
Two courses from: Philosophy 5, 30, 31, 32, or 38: 8 units
One course from: Neurobiology, Physiology, and Behavior 101, or Psychology 101: 3-5 units
One course from: Psychology 41 or Sociology 46A and 46B, or Statistics 10 or 13: 3-5 units

Depth Subject Matter: 50-55 units

Life Span Human Development 100A, 100B, 100C: 4 units

Research Methods: Human Development 120: 12 units

Biological Processes: one course from: Biological Sciences 101H, Human Development 117, Nutrition 111A, or Psychology 121: 4 units

Social Processes - one course from: Human Development 102, 110, 130, or 160: 4 units

Cognitive Processes - one course from: Human Development 101, 103, 122, 161, or 163: 4 units

Practicum: one course from: Human Development 140-140L, 141 or 142 or 143: 4-6 units

Restricted Electives: 19-20 units

At least one of the courses from the Depth Subject groups or Restricted Electives listed above must focus on one of the followings:adin/adulthood/age (101, 102, 103, 110, 130, 132) and one on adulthood/aging (117, 143, 160, 161, 163).

English Composition Requirement: 4 units

In addition to the College English Composition requirements, choose one from University Writing Program 101, 102A, 102B, 102C, 102D, 102E, 102F, 102G, 102H, 104A, 104B, 104C, 104D, 104E, 104F, 104G, 104H, 104I, 104J, 104K.

Total Units for the Major: 92-106 units

Biological Sciences 101 cannot be used to satisfy both the Preparatory Subject Matter and the Depth Subject Matter Requirements.

Major Adviser: Lisa Miller

Minor Program Requirements:

The Department of Human and Community Development offers two minors.

Aging and Adult Development: 3-6 units

Three of the following courses: Human Development 101C, 117, 143, 160, 161, or 163: 12 units

Two courses from the following: Human Development 110; Exercise Biology 117; Psychology 121, 123, 126, 130, or 155: 6-8 units

Minor Adviser: L. Miller, B. Ober

Human Development: 20 units

Human Development 100A and 100B: 8 units

Two courses from: Human Development 101, 102, 103, 130, 132, 161 or 163: 8-10 units

Minor Adviser: K. Conger

Graduate Study. Graduate study is available through a Master of Science degree in child development, and a Ph.D. degree in human development. See also Graduate Studies, on page 111.

Courses in Human Development (HDE)

Questions pertaining to the following courses should be directed to the instructor or to the Human and Community Development Advising Center in 1303 Hart Hall 530-752-2244.

Lower Division

12. Human Sexuality (3 units)

Lecture—3 hours. Vocabulary, structure/function of reproductive system; sexual response; pre-natal development; pregnancy and childbirth; development of sexuality; rape and sexual assault; birth control; sexually transmitted diseases; homosexuality; establishing/maintaining intimacy; sexual dysfunctions; communication; enhancing sexual interaction, cultural differences in attitudes towards sexuality. GE credit: SocSci, Div I | ACGH, DD, SS.—I, III. (I, II, III.)

92. Internship (1-12)

Internship—3-36 hours. Prerequisite: field work experience or at least one course (e.g., course 100A, 100B, 140 or 141) or supervisor's approval; consent of instructor. Supervised internship, off campus and on campus, in community and institutional settings. May be repeated for credit for a total of 12 units or if involves progressively greater (supervised) participation in program delivery or assessment. (P/NP grading only) —I, II, III. (I, II, III.)

98. Directed Group Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only)

99. Special Study for Undergraduates (1-5)

(P/NP grading only)
Upper Division

100A. Infancy and Early Childhood (4)
Lecture—4 hours. Prerequisite: Psychology 1, Biological Sciences 1A, or 2A, or 10. Biological, social, and cultural aspects of psychological growth and development of children, prenatal through age six. Two observations of preschool children required.—II, (I, II) Chen, Hibel

100B. Middle Childhood and Adolescence (4)
Lecture—4 hours. Prerequisite: course 100A, 120, or the equivalent; introductory biology. Interplay of biological and social-cultural factors in the emotional, cognitive and social development from middle childhood through adolescence.—II, III, (II, III) Guey, Nishina

100C. Adulthood and Aging (4)
Lecture—4 hours. Prerequisite: Psychology 1 or 1S. Development during early, middle, and late adulthood; cognitive, biological, and psycho-social aspects of adult development. Emphasis on normative patterns of development which characterize “successful aging.”—I, III, Ober

101. Cognitive Development (4)
Lecture—3 hours; term paper. Prerequisite: course 100A or 100B or Psychology 140. Pass One restricted to Human Development or Psychology majors. Theories, evidence, and debates in the field of cognitive development, such as nature/nurture, constraints on learning, and the role of plasticity. Topics include attention, memory, concepts about the physical and social world, and language. (Same course as Psychology 141.) GE credit: Wrt | WE—I, II, III, (II, III) Chen, Gibbs, Goodman, Graf, Estes, Lagattuta, Rivero

102. Social and Personality Development (4)
Lecture—3 hours; term paper. Prerequisite: course 100A or 100B or Psychology 140. Pass One open to Human Development or Psychology majors. Social and personality development of children, infancy through adolescence. Topics include the development of personality, achievement motivation, self-understanding, sex-role identity, and antisocial behavior. Emphasis on the interface between biological and social factors. (Same course as Psychology 142.) GE credit: SocSci, Wrt | SS, WE, WE—I, II, III, (II, III, II) Belsky, Gibbs, Hastings, Thompson

103. Cross-Cultural Study of Children (4)
Lecture—4 hours. Prerequisite: course 100A or Consent of instructor. Cross-cultural study of children in developing countries and among minority groups in the U.S. GE credit: SocSci, Div | ACGH, DD, SS, WC.—II, III

110. Contemporary American Family (4)
Lecture—4 hours. Prerequisite: Consent of instructor. Factors currently influencing American families including changing economic conditions, changing sex roles, divorce, and parenthood; theories and research on family interaction.—II, (I) K. Conger

117. Longevity (4)
Lecture—3 hours; term paper. Prerequisite: upper division standing or consent of instructor. Nature, origin, determinants, and limits of longevity with particular reference to human aging; emphasis on implications of findings from non-human model systems including natural history, ecology and evolution of life span; description of basic demographic techniques including life tables. (Same course as Entomology 117.) GE credit: SciEng, Wrt | SE, SL, WE—I, II (II) Carey

120. Research Methods in Human Development (4)
Lecture—3 hours; laboratory—3 hours. Prerequisite: Statistics 13 or Education 114 or Psychology 41 or Sociology 46A & 6B. Scientific process, research design, and experimental controls; APA manuscript style and scientific writing; statistical analysis and interpretation of results. Laboratory exercises to collect data, analyze and interpret results, and write scientific papers. GE credit: SocSci, Wrt | SS, WE—I, III, (II, III) Nishina, Liu

121. Psychological Assessment (4)
Lecture—4 hours. Prerequisite: courses 100A-100B; elementary statistics. Current issues and methodology related to the process of psychological assessment with children.

130. Emotionally Disturbed Children (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: courses 100A and 100B or consent of instructor. Discussion of theories and related behaviors and learning difficulties in children.

132. Individual Differences in Cognition (4)
Lecture—4 hours. Individual differences in cognition, including learning disabilities and giftedness. Education implications and neurodevelopmental substrates of individual differences in cognition.

140. Communication and Interaction with Young Children (2)
Lecture—2 hours. Prerequisite: course 100A; concurrent enrollment in course 140, required; consent of instructor. Integration of research, theory and practice in child development, emphasizing the role of relationships in creating a growth-promoting environment for young children. Includes: peer relationships, emotional understanding and self regulation, attachment, communication and school readiness. To enroll, students must sign up for laboratory time with the Center for Child and Family Studies located at 244 First Street, Davis, CA.—I, II, III, (II, III, III) Chen

140L. Laboratory in Early Childhood (3-5)
Laboratory—6-12 hours; laboratory/discussion—3 hours. Prerequisite: course 140, must be taken concurrently for first 3 units of credit; students must contact the Center for Child and Family Studies to enroll. Application of theories of learning and development to interaction with infants, toddlers, and preschoolers at Early Childhood Center. Applied skills in communication, guidance and curriculum. Limited enrollment. May be repeated up to two times for credit. (P/NP grading only)—I, II, III, (II, III, III) Chen

141. Field Study With Children and Adolescents (4-6)
Lecture—2 hours, fieldwork—6-12 hours. Prerequisite: course 100A or 100B; consent of instructor. Study of children’s affective, cognitive and social development within home/school environments, hospitals and foster group homes. May be repeated for credit for a total of 12 units. —I, II, III, (II, III, III)

142. Field Study with Emotionally Distressed Children and Adolescents (4-6)
Discussion—1.5 hours; fieldwork—6-12 hours. Prerequisite: course 130 (may be taken concurrently); consent of instructor. Field study with children who are identified as emotionally distressed, including those with internalizing and externalizing behavioral problems. May be repeated for credit for a total of 12 units following consultation with and consent of instructor.

143. Field Studies of the Elderly (4-6)
Discussion—2 hours; field work—6-12 hours. Prerequisite: course 100C or 160 may be taken concurrently. Apply theory and research on adult development and aging, work with older adults in a variety of settings, and develop skills relevant to that application. Develop a small research project.—I, Miller

160. Social Aspects of Aging (4)
Lecture/discussion—4 hours. Prerequisite: Consent of instructor. Introduction to human development neuroscience, including contextual and genetic influences on adolescence, puberty, transitions, and social/family contexts and processes. Emphasis on multi-level mechanisms underlying adolescent behavioral and emotional development. Offered in alternate years.

164. Developmental Neuroscience and Adolescent Psychopathology (4)
Lecture—4 hours. Prerequisite: graduate standing in Human Development, Psychology, Education, Neuroscience or consent of instructor. Introduction to human development neuroscience. Understanding of adolescent development, adolescence and its characterization as a time of risky and unhealthy behavior and vulnerability to onset of mental disorder as well as issues around personality of the adolescent brain and prevention/intervention. Offered in alternate years.—I, (II) Guyer
239. Developmental Trajectories in Typical and Atypical Children; Birth to Five (4)
Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing in Human Development. Psychology, Sociology, a related social science, or permission of the instructor. Discuss theories of development in typical and atypical children from birth to five from a socio-cultural perspective including parent-child interaction, peer interactions, cultural contexts of learning, as well as theoretical and empirical issues for understanding continuities and discontinuities in development. Offered in alternate years. —III.

240. Peer Relationships During Adolescence (4)
Lecture/discussion—4 hours. Prerequisite: graduate standing in Human Development. Psychology, Education, or consent of instructor. Course examines the role of peer relationships in adolescent development including forms and functions at the individual, dyadic, and group levels. Ethnicity and cross-cultural research, including surveys, peer nominations/sociometric, experimental, and observational designs. —Nightingale.

250. Current Research on Family Relationships (4)
Lecture/discussion—6 hours; term paper. Prerequisite: graduate standing in Human Development. Graduate Group, Psychology, Sociology, a related social science, or permission of the instructor. Discussion of theories, methods, and current research on the nature and development of sibling, romantic, and parent-child relationships across the lifespan. Emphasis on interactional and family processes examined in ethnic/cultural contexts. Implications for individual development will be addressed. —III. K. Conger

252. Family Research, Programs and Policy (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing in Human Development. Psychology, Sociology, related social sciences, or consent of instructor. Course examines the competing interests of research, policy, and service on current issues of family functioning and individual well being. The course considers communication barriers between researchers, practitioners, and policy makers. Offered in alternate years. —III (K. Conger.

290. Seminar (3)
Seminar—3 hours. Discussion and evaluation of the theories, research, and issues in human development. Different topics each quarter. —I, II, III. (I, II, III)

290C. Research Conference (1)
Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Supervising instructors lead research discussions with their graduate students. Research papers are reviewed and project proposals are presented and evaluated. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III)

291. Research Issues in Human Development (4)
Seminar—4 hours. Prerequisite: graduate standing in the Behavioral Sciences. In-depth presentations of research issues in particular areas of behavioral development. —I, II, II R. Conger.

292. Graduate Internship (1-12)
Internship—3-36 hours. Prerequisite: consent of faculty (internship sponsor) and satisfactory completion of placement relevant course work, for example: Education 213, 216; course 222, 242; Law 272, 273. Individually designed supervised internship, off campus, in community or institutional setting. Developed with advice of faculty mentor. May be repeated for credit up to 12 units if justified skill acquisition and promise of informing evaluation research. (S/U grading only.)—I, II, III. (I, II, III)

298. Group Study (1-5)

299. Research (1-12)
(S/U grading only)

Human Development (A Graduate Group)

Graduate Study. The interdisciplinary and interdepartmental options are embedded within specific departmental courses. Each graduate program offers a program of study leading to the Ph.D. degree. The program provides lifespan study of human behavioral development, with a balance of emphasis on biological, cognitive, and socio-emotional development in context. Recipients of the degree will be prepared to teach, to conduct research, and to be actively involved in public service in human behavioral development.

Applicants seeking admissions and fellowships consideration must submit all materials by our priority December 15 deadline. The final admissions deadline is March 1. See our website for more details.

Graduate Adviser. Contact the Group office.

10. Issues and Concepts in the Humanities (2)
Discussion—2 hours. Prerequisite: course 1 concurrently. Small group discussions and preparation of short papers for course 1. May be repeated one time for credit if topic differs. GE credit: ArtHum, Wrt | AH, WE.

2A. Global Humanities Forum (4)
Lecture—3 hours; extensive writing. Introduction to humanities topics and methodologies; analysis of major figures, works, and genres in world arts and literatures, with emphasis on relationships between history, society, and culture. May be repeated one time for credit if topic differs. GE credit: ArtHum | AH, WC, WE.—I, II, III. (I, II, III.)

2B. American Humanities Forum (4)
Lecture—3 hours; extensive writing. Introduction to humanities topics and methodologies; analysis of major figures, works, and genres in American arts and literatures, with emphasis on relationships between history, society, and culture. May be repeated one time for credit if topic differs. GE credit: ArtHum | AH, WC, WE.—I, II, III. (I, II, III.)

3. Medicine and Humanities (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: completion of Subject A requirement. Evolution of the medical arts into the “science of medicine.” The culture of medicine in the context of society, medical ethics. GE credit: ArtHum or SocSci, Wrt | AH or SS, WE.

4. Animals and Human Culture (2)
Lecture—2 hours. The meaning of human relations with animals studied across a variety of historical periods and culture and from a variety of humanistic perspectives. Offered in alternate years. GE credit: ArtHum, Wrt | AH.

4D. Animals and Human Culture Discussion (2)
Discussion—2 hours. Prerequisite: concurrent enrollment in course 4. Small group discussions and preparation of short papers for course 4. Offered in alternate years. GE credit: ArtHum, Wrt | AH, WE.—I.

7. Travel and Travel Literature (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: Subject A requirement. History of travel from the age of exploration to the modern era. Contempary trends in travel, including mass tourism, adventure travel, and ecotourism. Social, economic, and cultural issues related to modern trends in travel. Analysis of literary representations of travel. GE credit: ArtHum, Div, Wrt | AH, WC, WE.

8. Introduction to Perspectives on Narrative (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: satisfaction of Subject A requirement. Interdisciplinary approach to the use of story across time, culture, and discipline. How the telling and retelling of particular stories reflect the values, concerns, and assumptions of their original audiences and genres. GE credit: ArtHum or SocSci, Div, Wrt | AH, WE.

9. Don Quixote and the Modern World (2)
Lecture—2 hours. Reading Don Quixote as emblem of modernity in the West. Issues of reality versus illusion, heroism, freedom and self-fulfillment, racial tolerance, and love. Don Quixote in other cultural and popular media: film, dance, art, musical drama, and television. Offered in alternate years. GE credit: ArtHum, Wrt | AH, WC.

9D. Don Quixote and the Modern World Discussion (2)
Discussion—2 hours. Prerequisite: course 9 concurrently. Small group discussions and preparation of short papers for course 9. Offered in alternate years. GE credit: ArtHum | AH, WC.

13. Witches: Myth and Historical Reality (4)
Lecture—3 hours; extensive writing. This course examines historical construction of the witch. The four areas covered are: European pagan religions and the spread of Christianity; the “Burning” Times in early modern Europe; 17th-century New England and the Salem witch trials; and fairytale. GE credit: ArtHum, Div, Wrt | AH or SS, WE.

15. Language and Identity (4)
Lecture/discussion—3 hours; extensive writing. Introduction to topics related to the construction of identity through language use, including geographical and social factors affecting language. Language ideology affecting linguistic groups, including bilinguals and non-native speakers of English. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WE.

18. Performance and the 21st Century (4)
Lecture/discussion—3 hours; extensive writing. Live performance and globalization in the twenty-first century. Consideration of the cultural context of performing arts and artists including their methods of creativity. GE credit: ArtHum or SocSci, Div, Wrt | AH, WE.

30. Narrative and Argumentative Approaches to Major Current Issues in the Media, Culture, and Society (4)
Lecture/discussion—3 hours; term paper. Prerequisite: English A or the equivalent. Interdisciplinary approach to contemporary issues (abortion, AIDS, civil rights, war and peace, and other topics which individuals, communities and institutions define themselves in American society, by applying principles of narrative theory to the narratives where these issues are embedded. GE credit: ArtHum or SocSci, Div, Wrt | AH, WE.

92. Internship (1-12)
Internship—3-36 hours. Internships in fields where students can practice their skills. May be repeated for credit. (P/NP grading only.)

Upper Division

144. Marx, Nietzsche, Freud (4)
Lecture/discussion—3 hours; term paper. Study of major texts of Marx, Nietzsche, and Freud, selected with an eye to their impact on 20th-century economics, ethics, and attitudes toward eros. Particular focus on conceptions of the self and the individual’s relation to society. Offered in alternate years. GE course as German 144.) GE credit: ArtHum, Wrt | AH, WC.—I.

180. Topics in the Humanities (4)
Lecture/discussion—3 hours; term paper. Analysis of interdisciplinary issues in the Humanities. Topics will vary. May be repeated one time for credit. GE credit: ArtHum, Wrt | AH, WE.

192. Internship (1-12)
Internship—3-36 hours. Internships in fields where students can practice their skills. May be repeated for credit. (P/NP grading only.)

198. Directed Group Study (1-4)
Prerequisite: consent of instructor. GE credit: ArtHum, Div, Wrt | AH, WC, WE.

199. Special Study for Advanced Undergraduates (1-4)
Prerequisite: consent of instructor. (P/NP grading only.)

Graduate

250. Topics in the Humanities (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Topics in the humanities, selected by the instructor. May be repeated one time for credit.

292. Graduate Internship (1-15)
Lecture—3 hours; lecture/discussion—1 hour. Prerequisite: consent of instructor required. Individually designed supervised internships in community or institutional setting. Developed with advice of faculty mentor. May be repeated for credit up to 15 units. (S/U grading only.)

298. Directed Group Study (1-5)
Prerequisite: graduate standing or consent of instructor. GE credit: ArtHum, Div, Wrt | AH or SS, WE.

299. Individual Research (1-4)
Individual research in the humanities resulting in a formal written research report. (S/U grading only.)

Quarter Offered: Fall, Winter, Spring, Summer 2015-2016 offering in parentheses.

Pre-Fall 2011 General Education (GE): ArtHum—Arts and Humanities; SciEng—Science and Engineering; SocSci-Social Sciences; Div—Domestic Diversity; Wrt—Writing Experience

Human Rights

(College of Letters and Science)

http://humanrightsminor.ucdavis.edu

The interdisciplinary minor in Human Rights gives students a chance to explore human rights as both a specific issue and within larger contexts through a wide variety of disciplines and courses.

Courses in the minor provide students with an opportunity to approach human rights as a practical, as well as an intellectual problem. The minor will be of special interest to students majoring in area studies and those planning to pursue careers in public service, law and international relations. Students will take courses in which human rights problems are the central focus of the course and other courses, which while not having human rights as their central theme, include elements that address the history, theory, practice, violation, promotion and protection of human rights, or in which students have the opportunity to conduct research projects relevant to the study of human rights.

The minor is sponsored by the Religious Studies Program.

Program Objectives

In addition to completing Religious Studies 90 or 134, students must take two additional Core Courses. In addition to the Elective Course list. Students must select courses from at least three different departments or programs to satisfy minor requirements.

Minor Program Requirements:

UNITS

Human Rights............................................ 20

Religious Studies 90 or 134 ..................... 4

Choose two core courses from the following:

History 142A, Religious Studies 131, Sociology 104, Spanish 159†...................... 8

Choose two elective courses from the following:

* With prior permission of the Interdisciplinary Minor in Human Rights advisor, students may substitute one course from the list of electives as a core course.
† When taught as “Witnessing in Latin America: Trauma, Violence and Memory.”
* Only if topic is related to human rights.

Graduate

Graduate 200A. History, Theory and Criticism of Human Rights (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Restricted to graduate students. Introduces the advanced study of human rights and the theoretical and practical elaboration of the international Human Rights system. Seminar will engage with criticism of Human Rights and develop research and teaching within disciplinary and interdisciplinary frameworks. (Same course as Study of Religion 231E.) Offered in alternate years. (II.) Waterpough

200B. Memory, Culture, and Human Rights (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Restricted to graduate students. Explores the multiple convergences among memory, culture, and human rights. Discusses diverse approaches to how societal actors in different historical, cultural, and national settings, construct meanings of past political violence, intergroup conflicts, and human rights struggles. (Same course as Cultural Studies 210.) Offered in alternate years. (I.) Lazzara

Hydrologic Sciences (A Graduate Group)

Gregory Pasternack, Ph.D., Chairperson of the Group

Group Office. 1152 Plant and Environmental Sciences Building 530-752-1669; http://gsgg.ucdavis.edu

Faculty

Fabian Bombardelli, Ph.D., Assistant Professor (Civil and Environmental Engineering)
William Casey, Ph.D., Professor (Chemistry)
Randy Dahlgren, Ph.D., Professor (Academic Senate Distinguished Teaching Award)
Helen Dahlke, Ph.D., Assistant Professor (Chemistry)
Sarah Dorr, Ph.D., Professor (Chemistry)
Peter Hermes, Ph.D., Associate Professor (Chemistry)
Jan Hopmans, Ph.D., Professor (Chemistry)
William Harworth, Ph.D., Professor (Chemistry)
S. Geoffrey Schladow, Ph.D., Professor (Civil and Environmental Engineering)
Mark Lubel, Ph.D., Professor (Environmental Science and Policy)
Douglas Mackay, Ph.D., Adjunct Professor (Civil and Environmental Engineering)
Jay Lund, Ph.D., Professor (Civil and Environmental Engineering)
Samuel Sandoval Solis, Assistant Professor, Cooperative Extension Specialist (Cooperative Extension Specialist)
Miguel Marino, Ph.D., Distinguished Professor (Environmental Science and Policy)
Kate Scow, Ph.D., Professor (Environmental Science and Policy)
Bryan Weare, Ph.D., Professor Emeritus (Environmental Science and Policy)
Wendy K. Silk, Ph.D., Professor (Environmental Science and Policy)
Susan Ustin, Ph.D., Professor (Environmental Science and Policy)
Tom Young, Professor (Civil and Environmental Engineering)

Emeriti Faculty

Charles Goldman, Professor Emeritus (Civil and Environmental Engineering)
Theodore Hsiao, Ph.D., Professor Emeritus (Civil and Environmental Engineering)
Jeffrey Mount, Ph.D., Professor Emeritus (Civil and Environmental Engineering)
Miguel Marin, Ph.D., Distinguished Professor Emeritus (Civil and Environmental Engineering)
Paul Sabatier, Ph.D., Professor Emeritus (Environmental Science and Policy)

Affiliated Faculty

Roger Bales, Ph.D., Professor (UC Merced School of Engineering)
Phil Dully, Ph.D., Adjunct Associate Professor (School of Natural Resources, UC Merced)
Stephen Grillot, Ph.D., Water Relations Specialist (UC Merced)
Richard Snyder, Ph.D., Biometeorological Specialist (UC Merced)

Graduate Study. The Graduate Group in Hydrologic Sciences is an interdisciplinary program offering M.S. and Ph.D. degrees. Course work is available from many programs, including Hydrologic Sciences, Civil and Environmental Engineering, Geology, and Soil Science. Education in the group broadens the skills and knowledge of the physical science or engineering student interested in the occurrence, distribution, circulation and properties of water.
Hydrology

of water on earth. Because of water’s ubiquity and importance to physical, chemical and biological pro-
cesses, water can involve the geologic, atmospheric and oceanic sciences, as well as engi-
neering and other applied physical sciences. Basic to the program are core courses in fluid dynamics, hydraulic geometry, hydrology, hydrogeo-
chemistry, hydrologic techniques, and hydrologic policy. Students can pursue specializations in hydro-
geochemistry, surface water, subsurface hydrology, infiltration and drainage, watershed hydrology and water resources management. The subsurface hydrology specialization includes hydrogeology and vadose-zone hydrology.

Preparation. Applicants to the program are expected to be familiar with techniques or to be completing an undergraduate degree in environmental or physical sciences, mathematics, or engineering. Undergradu-
ate study must include one year each of calculus, of physics with calculus, and of chemistry. A second year of vector calculus, linear algebra and differen-
tional equations is recommended and will be required, before completion of graduate work. Additional courses in applied statistics, computer programming, and geology are recommended.

Specialization. Each student will pursue an indi-
vidual program of advanced study under the direc-
tion of a group of faculty members with similar interests but different background. Course work in addi-
tion to the above is typically taken in the most appropriate departments.

Graduate Adviser. Graham Fogg, Ph.D., Peter Hennes, Ph.D., and Carlos Puente, Ph.D.

Graduate Admissions Adviser. Mark E. Gris-
mer, Ph.D.

Courses in Hydrologic Sciences (HYD)

Graduate

200. Survey of Hydrologic Sciences (1)
Seminar—1 hour; term paper. Prerequisite: open to students in the Hydrologic Sciences program. Semi-
nar covers current hydrologic sciences and the diversity of sci-
ces included in the program. Students prepare a paper and presentation in their area of research interest. May be repeated twice for credit. (S/U grading only.)—I. Ustin, Grismer

205. Continuum Mechanics of Natural Systems (4)
Lecture/discussion—4 hours. Prerequisite: Mathe-
matics 210 and 228, Physics 9B. Continuum mechanics of dynamic air, water, earth and biological systems using hydraulic, heat and electrical conductivity; diffusivity; dispersion; strain; stress; deformation gradient; velocity gradient; stretch and strain. A prerequisite to Biological Sciences 205.—I. Wallender

210. Vadose Zone Transport Processes and Modeling (3)
Lecture/discussion—3 hours. Prerequisite: Soil Sci-
cence 107, Mathematics 228, programming lan-
guage, or consent of instructor. Principles and modeling of water flow and chemical transport in the vadose zone, with specific applications to soils. Top-
ics include hydraulic properties, finite difference application to unsaturated water flow, parameter optimization, diffusive and convective transport in gaseous and liquid phases. Offered in alternate years.—I. Fogg

243. Water Resource Planning and Management (3)
Lecture—3 hours. Prerequisite: course 141 or Civil and Environmental Engineering 142. Applications of deterministic and stochastic mathematical program-
ting techniques to water resource planning, analy-
sis, design and management. Water allocation, capacity expansion, and reservoir operation. Con-
struction costs and water supply and drought. Water quality management. Irrigation planning and operation models. (Same course as Biological Sys-
tems Engineering 243.)—I. Marino

252. Hillslope Geomorphology and Sediment Budgets (4)
Lecture—3 hours; fieldwork—3 hours. Prerequisite: course 141 or Geology 35 or Civil and Environ-
mental Engineering 142 or consent of instructor. Explora-
tion of theoretical and empirical foundations of sediment production on hillslopes using computer models and field measurements. Survey of processes and landforms associated with sedi-
ment deposition in the coastal zone. Application of geomorphic principles to coastal management issues. Offered in alternate years.—III. Pasternack

256. Geomorphology of Estuaries and Deltas (4)
Lecture—3 hours; fieldwork—3 hours. Prerequisite: course 141 or Geology 35 or Civil and Environmen-
tal Engineering or consent of instructor. Survey of the processes and landforms associated with sedi-
ment deposition in the coastal zone. Application of geomorphic principles to coastal management issues. Offered in alternate years.—III. Pasternack

Professional

396. Teaching Assistant Training Practicum (1)
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—II, III, (I, II, III)

Professional

410. OSHA HAZWOPER Refresher Course (1)
Lecture—1 hour. Updates hazardous materials han-
dling information for purposes of keeping certifica-
tion current. Certification lapses until the refresher course is complete. (P/NP grading only.)—II. Grismer

440. Hazardous Waste Operations Training (3)
Lecture—2 hours; laboratory—2 hours. Prerequisite: upper division standing in College of Agricultural and Environmental Sciences. Forty-hour course designed to meet the requirements of Federal OSHA regulations 1910.120. Covers the health, regu-
latory, processing and safe handling issues/pro-
blems associated with working with hazardous materials. (P/NP grading only.)—III. Grismer

Hydrology

[College of Agricultural and Environmental Sciences] Faculty, see under Department of Land, Air and Water Resources, on page 364, Hydrology Section.

The Major Program

Hydrology is the study of the occurrence, distribu-
tion, circulation, and behavior of water and water-
borne materials in the environment of Earth. It includes practical measurement and technical analy-
sis of water phenomena underground, on the Earth’s surface, and in the atmosphere. Contemporary hydrologic problems containing an interdisciplinary nature per year include environmental restoration, sustain-
ability of groundwater and surface water resources, water pollution, and natural disasters such as floods, droughts, landslides, avalanches, and land subsid-
ence. The management of these problems demands hydrologists with the comprehensive, inter-
derdisciplinary education embodied in this program. Beyond its societal utility, hydrology can be an exci-
ting science for the curious-minded. Hydrologists explore natural phenomena such as climate change, waterfalls, health of coral reefs, biogeochemical cycles, and aquifers.

The Program. A hydrologist needs a strong back-
ground across the basic sciences of physics, mathe-
matics, chemistry, and biology. Breadth of understanding comes from exposure to ecology, geology, engineering, policy, and law. Depth of experience is provided by core hydrology courses, internship opportunities, and practical outdoor train-
ing. Students choose electives to match their interests and career goals. Transfer students should have completed as much as possible of the preparatory subject matter listed below.

Internships and Career Alternatives. Job opportunities in hydrology exceed the available sup-
ply of trained hydrologists. Students commonly obtain internships and jobs with state and federal
agencies, private consulting firms, environmental interest groups, irrigation districts, and utility compa-
nies. Federal agencies hiring hydrologists include the U.S. Geological Survey, U.S. Department of
Agriculture (Fish and Wildlife, Agricultural Research, Forest Service, and National Resource Conservation
Service), Environmental Protection Agency, and national research laboratories (Lawrence Livermore
National Laboratory, Oak Ridge National Labora-
tory). State and local agency employers include Cal-
ifornia’s Departments of Water Resources, Regional Water Quality Control Boards. To obtain
higher levels of responsibility and salary, hydrolo-
gists often seek advanced degrees, and the hydro-
logy major is designed to provide students with a
highly competitive education to get into graduate
school.

B.S. Major Requirements:

Preparatory Subject Matter ........................................ 71

- Biological Sciences 2A, 2B ........................................ 10
- Chemistry 2A, 2B, 2C .......................................... 15
- Physics 9A, 9B, 9C ............................................... 15
- Mathematics 21A, 21B, 21C, 21D, 22A, 22B 22
- Geology 50, 50X .................................................. 5

- Engineering 6 or the equivalent ............................... 4

Depth Subject Matter ............................................. 46-55

- Hydrologic Science 103N or Engineering 103 or Water Analysis ............................... 4
- Civil and Environmental Engineering 114 or Statistics 130A and 130B .............................. 4-6
- Hydrologic Science 134, 141, 142, 144, 151, 211, 213
- Soil Science 107 ................................................... 5
- Select one of Hydrologic Science 150, Agricultural and Resource Economics 147, Environmental Science and Policy 161, 166N .................................................. 3-4
- Select three of Hydrologic Science 110, 124, 143, 146, Civil and Environmental Engineering 141, Applied Biological Systems Technology 165 ................................................. 9-13

Restricted Electives ............................................. 16-26

To supplement or expand areas of student interest selected with approval of adviser

Total Units for the Major .................................. 129-148

Major Adviser. Peter Hernes (Land, Air and Water Resources)

Minor Program Requirements:

Hydrology

The Hydrology Section of the Department of Land,
Air and Water Resources offers the minor in Hydro-
logy for environmental or natural science students
who have an interest in water/environmental issues.

The interested student should have completed prepa-

ratory subject matter course work in calculus (Mathematics 16B), chemistry (Chemistry 2A; Chemistry 2B recommended), physics (Physics 7A), and biology (Biological Sciences 2A). Course work in the minor provides fundamental skills and knowledge of the hydrologic sciences. The program is sufficiently flexible for students to pursue particular water issues or problems of interest to them.

UNITs

Hydrology ..................................................... 20-23

- Hydrologic Science 103N or Engineering 103 ............................................ 4
- Hydrologic Science 141 or Environmental Science and Management 100 .................. 4
- Hydrologic Science 144 .......................................... 4
- Soil Science 107 ................................................... 5
- Hydrologic Science 134, Chemistry 100, Soil Science 111, Environmental Science and Policy 151 .................................................. 3-6

Watershed Science

The Hydrology Program of the Department of Land, Air and Water Resources offers the minor in Water-
shed Science. This minor is intended for environmen-
tal, natural, or social science students who have an interest in the interfaces between hydrology, ecol-
omy, policy, and management. The interested student should have completed preparatory course work in calculus (Mathematics 16B; Mathematics 2A; Chemistry 2B recommended), physics (Physics 7A), and biology (Biological Sciences 2A). Course work in the minor provides fundamental skills and knowledge on the management of water basins in the context of current water resources and ecologic problems.

Minor Program Requirements:

UNITs

Watershed Science ........................................ 21-26

Hydrologic Science 141 or Environmental Science and Management 100 .................. 4
- Soil Science 111 .................................................. 4
- Hydrologic Science 144 or Soil Science 107 ............................................. 4-5
- Hydrologic Science 124, or Hydrologic Science 150 .................................. 4
- Hydrologic Science 143, Environmental Science and Management 144, or Environmental Science and Policy 151 .................................................. 3-4
- Hydrologic Science 150, Environmental Science and Management 121, or Environmental Science and Policy 151 .................................................. 3-4

Minor Advisor. Graham Fogg 530-752-6810; gefogg@ucdavis.edu

Advising Center. 1150 PES Building

Courses in Hydrologic Science (HYD)

Questions pertaining to the following courses should be directed to the instructor or to the Resource Sci-
ces Teaching Center in 113 Vehmeyer Hall or in 1150 Plant and Environmental Sciences Building 530-752-1603.

Lower Division

10. Water, Power, Society (3)

Lecture—2 hours; discussion—1 hour. Water resources issues. How water has been used to gain and wield socio-political power. Water resources development in California as related to current and future sustainability and quality. Roles of science and policy in solving water prob-
lems. (Same course as Science and Society 10.) GE credit: SciEng or SocSci, WRT | SE or SS, SL—III. (II.) Foy.

47. Watershed Processes and Water Quality in the Tahoe Basin (2)

Lecture/labatory—21 hours; fieldwork—9 hours; discussion—3 hours; term paper. Prerequisite: basic knowledge of hydrology, soil, or hydrologic sci-
ences. Watershed processes, runoff water-quality management, restoration in Lake Tahoe Basin. Soils, precipitation-runoff, revegetation and adaptive man-
agement relating to erosion control, effective solu-
tions, development of restoration strategies. Students develop field restoration. Course involves 3 days of instruction in Tahoe City. (Same course as Environmental Sciences 217.) Not open to students who have successfully completed Environmental and Resource Sciences 47. [Formerly Envi-
ronmental and Resource Sciences 47.] GE credit: SciEng or Environ, WRT | SE or SS, SL—III. (II.) Potter.

92. Hydrologic Science Internship (1-12)

Internship—3-36 hours. Prerequisite: lower division student, consent of instructor. Work experience off campus in Hydrologic Science. Internship supervised by a member of the faculty. (P/NP grading only.)—I, II, III, (I, II, III)

98. Directed Group Study (1-5)

Prerequisite: consent of instructor. Offered irre-
gradely. (P/NP grading only)

Upper Division

103N. Fluid Mechanics Fundamentals (4)

Lecture—4 hours. Prerequisite: Physics 9B. Fluid mechanics axioms, fluid physics, kinematics, velocity fields for one-dimensional incompressible flow and boundary layers, turbulent flow time averaging, potential flow, dimensional analysis, and macro-
scopic balances to solve geometrical problems. [Same course as Biological Systems Engineering 103.] Offered irregularly. GE credit: SciEng | QL, SE, SL—II. (I.) Wallender

110. Irrigation Principles and Practices (3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: Physics 7A; Soil Science 100 recommended. Gen-
ceral course for agricultural and engineering students dealing with soil and plant aspects of irrigation and drainage. Soil-water principles including soil water movement, plant responses to irrigation regimes, water use by crops; also irrigation systems and water quality. Not open for credit to students who have completed Water Science 101. Offered in alternate years. GE credit: SciEng | SE, SL—III. (II.) Goldhammer, Grattan

124. Plant-Water-Soil Relationships (4)

Lecture—3 hours; discussion—1 hours. Prerequisite: one upper division course in soil science, such as Soil Science 100; and one upper division course in plant science or plant biology, such as Plant Biology 111; or consent of instructor. Principles of plant inter-
actions with soil and atmospheric water environ-
ments and practical applications to crop manage-
ment (e.g., irrigation) and plant eco-physiolog-
y (e.g., drought). Not open for credit to students who have completed Water Science 104. GE credit: SciEng | QL, SE, SL—II. (III.) Shackle

134. Aquatic Geochemistry (6)

Lecture—4 hours; laboratory—3 hours. Prerequisite: Chemistry 2B. Chemistry of natural waters; dielotropic properties of water; thermal and density properties; weathering and reaction relations; metal hydrolysis; acid-base equilibria; metal coordination chemistry; solubility calculations; electron-exchange reactions; sorptive partitioning; ion exchange; and dissolved organic matter. GE credit: SciEng | QL, SE, SL—II. (III.) Hernes, Parikh

141. Physical Hydrology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Physics 9B, Mathematics 218, course 100 recom-

mended. Introduction to the processes that constitute the hydrologic cycle. Special emphasis on a quanti-
tative description of the following processes: precipi-
tation, infiltration, evaporation, transpiration, surface runoff, and groundwater movement. GE credit: SciEng | QL, SE, SL—II. (I.) Puente

142. Systems Hydrology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 141 or Civil and Environmental Engineering 142. General courses considering hydrologic pro-
cesses from a systems or statistical model perspec-
tive. General probability concepts are applied to frequency, time series and spatial data analysis. Lin-
ear systems are also considered in conjunction with Kalman filter techniques. GE credit: SciEng | QL, QL, SE—II. (II.) Puente

143. Hydrological Processes in Ecosystems (3)

Lecture—3 hours. Prerequisite: course 141 or Envi-
ronmental and Resource Science 100. Movement and storage of water are integral parts of landscape and ecosystem functioning. Hydrological processes in individual ecosystems, fluid transfer from and to aboveground water, linking the myriad components of the landscape. Offered in alternate years. GE credit: SciEng | QL, QL, SE, SL—II. (II.) Pasternack

144. Groundwater Hydrology (4)

Lecture—4 hours. Prerequisite: Mathematics 16B or 21A; course 103 or Engineering 103 recom-

146. Hydrogeology and Contaminant Transport (S) Lecture—3 hours; laboratory—2 hours; term paper. Prerequisite: course 144 or Civil and Environmental Engineering 144 or the equivalent. Physical and chemical processes affecting groundwater flow and contaminant transport, with emphasis on realistic hydrogeologic examples. Groundwater geology and chemistry. Fundamentals of groundwater flow and transport analysis. Laboratory includes field pumping test and work with physical and computer models. [Same course as Geology 156.] GE credit: SciEng | SE. —II. (II.) Fogg

147. Runoff, Erosion and Water Quality Management in the Tahoe Basin (S) Lecture/lab—30 hours; fieldwork—15 hours; discussion—10 hours; term paper. Prerequisite: Physics 7B or 9B, Mathematics 16C or 21C, Civil and Environmental Engineering 142 or course 141 or Environmental and Resource Sciences 100. 5 days of instruction in Tahoe City. Practical hydrology and runoff water quality management from Tahoe Basin slopes. Development of hillslope and riparian restoration concepts, modeling and applications from physical science perspectives including precipitation-runoff relationships, sediment transport, and detention ponds. [Same course as Biological Systems Engineering 147.] GE credit: SciEng | QL, SE, SL. —IV. (IV) Grismer

150. Water Law (3) Lecture—3 hours. Prerequisite: Environmental and Resource Sciences 100 or consent of instructor. Principles and issues of California Water Law. Types of water rights, groundwater rights and management, and protection of instream uses. Water projects, role of federal government and federal and state relations. Basic water quality acts, endangered species act, water transfers and current water issues. GE credit: SocSci | ACGH. —II. (II.) Cahill

151. Field Methods in Hydrology (4) Lecture—2 hours; laboratory—3 hours; fieldwork—3 hours. Prerequisite: Environmental and Resource Sciences 100 or course 141. Measurement methods and data analysis for evaluation of water storage, movement, and conservation in the field. Equipment such as data loggers, water and sediment samplers, pressure transducers, weather stations, surveying equipment, and flow meters will be used. Offered in alternate years. GE credit: SciEng | QL, SE, SL. —II. Pasternak

182. Environmental Analysis using GIS (4) Lecture—2 hours; laboratory—4 hours. Prerequisite: Applied Biological Systems Technology 180 or the equivalent GIS experience and skills; general biology and/or ecology courses recommended. Ecosystem and landscape modeling with emphasis on hydrology and solute transport. Spatial analysis of environmental risk assessment including ecological risk assessment, natural resource management. Spatial database structures, scripting, data models, and error analysis in GIS. Offered in alternate years. [Same course as Applied Biological Systems Technology 182.] GE credit: SciEng | QL, SE, SL, VL. —II. (II.) Hijmans

192. Hydrologic Science Internship (1-12) Internship—3-40 hours. Prerequisite: completion of B4 units and consent of instructor. Work experience off and on campus in water science. Internship supervised by a member of the faculty. (P/NP grading only.)—I, II, III. (I, II, III)

198. Directed Group Study (1-5) (P/NP grading only) P/NP grading only. —I, II, III. (I, II, III)

199. Special Study for Advanced Undergraduates (1-5) Prerequisite: senior standing. (P/NP grading only.)—I, II, III. (I, II, III)

Immunology (A Graduate Group)

Charles Bevis, M.D., Ph.D., Chairperson of the Group

Group Office. 5217 Vet Med 3A; 530-754-0103; http://immunology.comped.ucdavis.edu/

Faculty

Iannis Adamopoulos, Ph.D., Assistant Professor (Microbiology, and Immunology)
Paul Ashwood, Ph.D., Associate Professor (Microbiology, and Immunology)
Nicole Baumgardh, D.V.M., Ph.D., Professor (Center for Comparative Medicine and Pathology, Microbiology and Immunology)
Andreas Baumler, Ph.D., Professor (Microbiology, and Immunology)
Charles Bevis, M.D., Ph.D., Professor (Microbiology, and Immunology)
Christopher L. Bowlsus, M.D., Associate Professor (Gastroenterology)
Khoa Cho, Ph.D., Associate Adjunct Professor (Surgery)
Saty a Dandekar, Ph.D., Professor and Chair (Microbiology, and Immunology)
Laurel J. Gerwit (Pharmaceutical V.M., Ph.D., Professor Pathology, Microbiology, and Immunology)
Tizaporn Goldkorn, Ph.D., Professor (Pulmonary and Critical Care Medicine)
Leigh G. Griffiths, Ph.D., Associate Professor (Animal Science, and Immunology)
Richard W. Harper, M.D., Ph.D., Associate Professor (Pulmonary and Critical Care Medicine)
Volkan Heinrich, Ph.D., Associate Professor (Biomedical Engineering)
James E.K. Hildreth, M.D., Ph.D., Professor and Dean (Molecular and Cellular Biology)
Daniel Hwang, Ph.D., Adjunct Professor (Nutrition)
Kirk C. Klaing, Ph.D., Professor (Animal Science)
Kit S. Lam, M.D., Ph.D., Professor and Chief (Hematology and Oncology)
Pam Lein, Ph.D., Professor (Molecular Biosciences)
Patrick S.C. Leung, Associate Adjunct Professor (Rheumatology, Allergy and Clinical Immunology)
Shirley Luckhart, Ph.D., Professor (Microbiology, and Immunology)
Emanuel Maurerakis, M.D., Assistant Professor (Dermatology)
Kimberly A. Allister, Ph.D., Associate Professor (Neurology)
Stephanie J. McSorley, Ph.D., Associate Professor (Center for Comparative Medicine and Anatomy, and Immunology)
Liu A. Miller, Ph.D., Associate Professor (Anatomy, Physiology, and Cell Biology)
William J. Murphy, Ph.D., Professor (Dermatology)
Lori Navarro, Ph.D., Professor (Microbiology and Molecular Genetics)
Robert T. O’Donnell, M.D., Ph.D., Professor (Hematology and Oncology)
John Peters, Ph.D., Associate Professor-in-Residence (Internal Medicine)
Kent E. Pinkerton, Ph.D., Professor and Director (Anatomy, Physiology, and Cell Biology, and Immunology)
Distinguished Teaching Award Graduate/Professional
David Pleasure, M.D., Ph.D., Professor (Neurology, and Pediatrics)
Siba Raychaudhuri, M.D., Clinical Assistant Professor and Chief Rheumatologist (Sacramento VA Medical Center)
Grace L. Rosenquist, Ph.D., Associate Professor (Neurobiology, Physiology, and Behavior)
Barbara Shackleford, Ph.D., Associate Professor (Microbiology, and Immunology)
Scott I. Simon, Ph.D., Professor (Biomedical Engineering)
Jay Solnick, M.D., Ph.D., Professor (Center for Comparative Medicine and Medical Microbiology and Immunology)
Athena Soulika, Ph.D., Assistant Professor (Dermatology)
Charles B. Stephensen, Ph.D., Adjunct Professor (Western Human Nutrition Research Center)
Jeffrey L. Stott, Ph.D., Professor (Pathology, Microbiology, and Immunology)
Yoshikazu S. Takada, M.D., Ph.D., Professor (Dermatology)
Suzanne S. Teuber, M.D., Professor (Rheumatology, Allergy and Clinical Immunology)
Jose V. Torres, Ph.D., Professor (Microbiology, and Immunology)
Allfonso Tramontano, Ph.D., Adjunct Professor (Nephrology)
Renee M. Tsolis, Ph.D., Associate Professor (Microbiology, and Immunology)
Joseph M. Tuscano, M.D., Professor (Flematology and Oncology)
Judy Van de Water, Ph.D., Professor-in-Residence (Rheumatology, Allergy and Clinical Immunology)
Andrew Vaughn, Ph.D., Professor (Radiation Oncology)
Robert H. Weiss, M.D., Associate Professor (Nephrology, and Immunology)
Rene Wu, Ph.D., Professor (Anatomy, Physiology and Cell Biology)
Heike Wulff, Ph.D., Associate Professor (Medical Microbiology, and Immunology)
Susan Zunino, Ph.D., Associate Adjunct Professor (Nutrition)
Huanjuan Zhou, Ph.D., Assistant Professor (Microbiology, and Immunology)

Graduate Study. The Graduate Group in Immunology offers an interdisciplinary program of study in an exciting field of biology and medicine leading to the M.S. and Ph.D. degrees. Participating faculty from various Schools and Departments at UC Davis provide research opportunities in diverse areas of applied immunology. Areas of focus include infection and immunity (including host response regulation to parasites, viruses and bacteria), nutrition and immunity, autoimmunity, immune regulation, neuro-immunology, cancer therapy and immune mediators and their uses for diagnosis and treatment.

Preparation. Applicants for candidacy to these programs should have completed undergraduate preparation in mathematics, physics, chemistry, biochemistry, molecular and cellular biology or related biological and medical sciences.

For work leading to the Ph.D. degree, the requirements include cell biology, chemical immunology, cellular immunology, immunohematology, and advanced immunology. In addition to these general requirements, more specialized preparation in at least one of the following is required: (a) microbiological specialties (bacteriology, virology, parasitology, medical microbiology); (b) zoological specialties (cell biology, endocrinology, embryology, pathology, histology, cytology, physiology); (c) medical specialties (pathology, anatomy, pharmacology, clinical pathology, reproduction, hematology, epidemiology); (d) biochemistry/biophysics specialties (biologically active molecules, control mechanisms); (e) genetic specialties (developmental genetics, population genetics, cyto genetics, molecular genetics).

Graduate Adviser. See the graduate program website at http://immunology.comped.ucdavis.edu/people/

Courses in Immunology (IMM) Additional courses are available and listed under the individual sponsoring departments. Contact the Group office for information.

Graduate

201. Introductory Immunology (4) Lecture—4 hours. Prerequisite: graduate standing. Comprehensive introduction to the principles of immunology. Limited enrollment. —I. (I.) Miller
201L. Advanced Immunology Laboratory Rotations (4)
Laboratory/discussion—12 hours. Laboratory assignment in two research laboratories. Individual research problems with emphasis on methodological/procedural experience and experimental design. May be repeated two times for credit. (S/U grading only)—I. (I.) Ashwood

202L. Advanced Immunology Laboratory Rotations (5)
Laboratory/discussion—15 hours. Laboratory assignment in two research laboratories. One four-week and one six-week assignment in immunology research laboratories. Individual research problems with emphasis on methodological/procedural experience and experimental design. May be repeated two times for credit. (S/U grading only)—II. (I.) Ashwood

203. Cancer Immunology (2)
Lecture—1 hour, term paper. Covers concepts in cancer biology, immunological control and immune effector mechanisms. It will also cover topics such as: immune surveillance, immune effector mechanisms and current concepts in immunotherapy. Offered in alternate years.—II. (I.) Murphy

204. Topics in Innate Immunity (2)
Extensive written or discussion—1 hour, performance instruction—1 hour. Prerequisite: course 201 or equivalent; course 293 preferred. Restricted to first-year GGI and MGG students; others with permission of instructor. Enrollment limited to 18 students. Covers current topics in the field of innate immunity through student seminar presentations and critical evaluation of the literature. Concepts include: pathogen recognition, intercellular communication, specialized cellular function and effector/signaling molecules. Offered in alternate years.—IV. (I.) Bevins

292. Immunotoxicology Seminar (2)
Seminar—2 hours. Prerequisite: graduate standing in Pharmacology/Toxicology, Immunology, Physiology, or Biochemistry. Seminar presentations dealing with principles of xenobiotic effects on immune system functions and specific examples of drugs and environmental chemicals exerting toxic effects on the immune system. Offered in alternate years. (S/U grading only.)—J. Golub

293. Current Concepts in Immunology (4)
Lecture/discussion—4 hours. Prerequisite: Pathology, Microbiology, and Immunology 126 or consent of instructor. Innate and acquired immunity as defense mechanisms against disease. Mechanisms regulating the distinct cell types driving these responses and current concepts in the literature. Offered in alternate years.—II. Baumgart

294. Comparative Clinical Immunology (4)
Lecture/discussion—4 hours. Prerequisite: Pathology, Microbiology, and Immunology 126 or consent of instructor. Clinical immunology in animals and man. Pathogenesis of representative infectious diseases, hypersensitive reactions, and autoimmunity. Emphasis on species differences, and non-immune effector mechanisms to combat infections or mediate pathology. Not open for credit to students who have completed course 294A. Offered in alternate years.—C. Van der Meer

295. Cytokines (3)
Lecture—2 hours; discussion—1 hour. Prerequisite: course 293 or consent of instructor. Cytokines and their involvement in human and animal physiology, disease, molecular mechanisms and receptor systems. Immune and non-immune actions. Overlapping/redundant functions referred to as the “cytokine network.” Offered in alternate years.—III. Erickson

296L. Advanced Virology in Immunology (2)
Seminar—2 hours. Prerequisite: graduate standing or consent of instructor. Presentation, discussion, and analysis of faculty research topics in immunology. Required for Immunology Graduate Students every year until they have passed their qualifying examination. May be repeated for credit. (S/U grading only)—I. (I.) Maveraikis

297. Mucosal Immunology (2)
Lecture—1 hour; discussion—1 hour; term paper. Prerequisite: course 201 or equivalent. Basic concepts and current research topics in the field of mucosal immunology, with an emphasis on human immunology. Major emphases include innate and adaptive mucosal immunity, the gastrointestinal tract, the lung, lymphocyte trafficking, and mucosal vaccination. Offered in alternate years.—II. Shacklett

Independent Study Program

Information. Chairperson, Committee on Courses of Instruction, 530/752-2231

The Independent Study Program provides an opportunity for upper division students to design and pursue a full quarter (12-15 units) of individual study in an area of special interest. A program qualifying as Independent Study will consist of one or more courses in the 190-199 series. While the theme of such a program may be reasonably broad, a recognizable common thread should unite all the academic work you undertake during an independent study quarter. Regularly offered formal courses will only be acceptable as a part of such a program if they clearly fit its theme and contribute something essential toward the realization of its objectives. The program is not to be considered a way to take more variable-unit courses than normally permitted.

The procedure for enrolling in an Independent Study Program is as follows:
(1) Develop, in general terms, a plan of study;
(2) Locate a faculty sponsor or panel of sponsors and with their help and approval develop a detailed plan;
(3) Complete a project proposal form (obtained from the Academic Senate office) and submit it to the Academic Senate Committee on Courses of Instruction.

The deadline for applications is the tenth day of instruction of the term before; see the Academic Calendar, on page 1, for specific dates.

You must report the completion or termination of the project to the Committee on Courses of Instruction.

Individual Major

(Email: [college@ucdavis.edu](mailto:college@ucdavis.edu)

College of Agricultural and Environmental Sciences, College of Biological Sciences, and College of Letters and Science)

The Major Program

The Individual Major, an integrated program composed of courses from two or more disciplines, is designed by the student and is subject to approval by faculty advisers and appropriate college committees. This major enables a student to pursue a specific interest that cannot be accommodated within the framework of an existing major. It must clearly and specifically meet the student’s educational goals as well as meet university and college academic standards.

College of Agricultural and Environmental Sciences

The Individual Major in this College has been suspended indefinitely.

Program Office. 150 Wark Hall 530/752-0100
http://caes.ucdavis.edu/StudentInfo/Advising/undergraduate-advising

Student Proposal. An Individual Major may be organized by a student having a specific academic interest not represented by an established major. Each student wishing an Individual Major should submit a proposal to the Dean’s Office, prior to reaching 120 units, for review by the Student Actions and Individual Major Subcommittee. This proposal must include an essay describing the special educational aims of the student, including a statement indicating why the educational objectives cannot be met by existing majors; (2) a list of planned courses; and (3) faculty adviser recommendations. It is critical that students contact a college counselor in the Dean’s Office for consultation and development of the proposal.

UNITS

Preparatory Subject Matter........ (variable)
Lower division courses basic to the program or needed to satisfy prerequisites for upper division requirements.

Depth Subject Matter...........45-54
Upper division course work must include:
(a) Interrelated courses of 45 upper division units from two or more areas of study;
(b) At least one of the two or more areas of study must be within the College of Agricultural and Environmental Sciences;
(c) At least 30 of the 45 upper division units that are required in the program must be taken from courses provided by the College of Agricultural and Environmental Sciences.

Unrestricted Electives.............(variable)
Total Units for the Major...........45-54

Master Adviser, Thomas Gordon, Ph.D. (Plant Pathology)

College of Biological Sciences

Program Office, Biology Academic Success Center, 1023 Sciences Laboratory Building, 530/752-0410

Student Proposal. A student who wishes to propose an individual major must submit the proposal to the Committee on Undergraduate Student Petitions prior to reaching 120 units. It is important for the student to make arrangements to speak with an adviser in the Biology Academic Success Center early in the development of his/her major as no individual major will be approved after a student has completed 120 units.

A.B. and B.S. Major Requirements:

UNITS

Preparatory Subject Matter....... (variable)
Lower division courses basic to the program or needed to satisfy prerequisites for upper division requirements as determined by the Committee on Undergraduate Student Petitions.

Depth Subject Matter ....... 45 units minimum
Upper division course work must include:
(a) At least 30 units from courses offered by departments in the College of Biological Sciences;
(b) additional requirements as determined by the Committee on Undergraduate Student Petitions. See the Biology Academic Success Center for details.
(c) for the B.A. degree, a maximum of 80 units toward the major; for the B.S. degree, a maximum of 110 units toward the major.

All University, General Education, and College of Biological Sciences Bachelor’s degree requirements.........................(variable)
Total Units for the Degree............180

Principal Adviser (selected by student). A faculty member in a department or program in the College of Biological Sciences.
Integrative Genetics and Genomics (A Graduate Group)

**Formerly Genetics**
David Neale, Ph.D., Chairperson of the Group

**Faculty**

- **Steffen Abel, Ph.D., Professor Emeritus** (Plant Sciences)

Courses in Genetics (GGG)

Graduate

201A. Advanced Genetic Analysis (5)
Lecture-discussion—5 hours. Prerequisite: Biological Sciences 101, Statistics 100 or the equivalent, graduate standing. Fundamentals of genetic analysis and chromosome structure using model organisms including mutation, transmission, complementation, suppression, and enhancement as well as epigenetic phenomena at the whole organism and molecular levels.—II. (II)

201B. Genomics (5)
Lecture—3 hours; discussion—2 hours. Prerequisite: course 201A, 201C or the equivalent. Prokaryotic and eukaryotic genomes. Experimental and analytical approaches to study model organisms, a broad range of native and agricultural species, humans, and complex traits. Introduction to computational genomics and the research and the theory and mechanics of data analysis. Structural, functional, and comparative genomics. Related issues in bioinformatics.—I. (II)

201C. Molecular Genetic Mechanisms in Disease (4)
Lecture-discussion—4 hours. Prerequisite: Biological Sciences 101 or the equivalent. Pass one restricted to graduate students in genetics, microbiology or biochemistry and molecular biology graduate groups. Exploration of how basic mechanisms of molecular biology contribute to health and disease. Diseases related to animals, plants, and microbes will be highlighted focusing on the assembly, function and regulation of DNA, RNA, and protein. —III. (Ill) Segal

201D. Quantitative and Population Genetics (5)
Lecture—5 hours. Prerequisite: course 201A or consent of instructor. Basic concepts of quantitative and population genetics including gene and genotypic frequencies, multiple factor hypothesis, phenotypic and genotypic values, heritability, selection, genetic variation, the detection of quantitative trait loci and evolution in populations. Experimental and analytical methods. —II. (II)

205. Molecular Genetics Laboratory (5)
Laboratory—1.5 hours. Prerequisite: Biological Sciences 101 may be taken concurrently or the equivalent, enrolled in Genetics Graduate Group. Students will conduct experiments in molecular genetics laboratories. Individual research problems will emphasize experimental design, experience with methodologies, and data interpretation. May be repeated up to three times for credit. (S/U grading only)—I, II, III. (I, II, III) Segal

210. Horizontal Gene Transfer (3)
Lecture-discussion—3 hours. Prerequisite: background in basic microbiology and genetics required. Introductory course in molecular biology, biotechnology and microbial genetics recommended. Transfer of genes between unrelated organisms in nature. Dissemination of foreign DNA from genetically engineered organisms, including plants and animals. Mechanisms by which genes are transferred horizontally, and between kingdoms.—II. (II)

211. Concepts in Human Genetics and Genomics (3)
Lecture/discussion—3 hours. Prerequisite: course 201A or the equivalent; course 201B, 201C or the equivalent recommended. Human genomic organization; genetic structure of populations; positional cloning; application of linkage, association, and haplotypes; quantitative trait loci analyses; integrative genetic studies of gene expression; DNA repair mechanisms in genetic disease; mutation analyses; epigenetics; mitochondrial disease; gene manipulation and therapy.—II

220. Genomics and Biotechnology of Plant Improvement (3)
Lecture—3 hours. Prerequisite: Biological Sciences 101 or the equivalent. Integration of modern biotechnology and classical plant breeding including the impact of structural, comparative and functional genomics on gene discovery, characterization and functionalization. Also covers molecular markers, plant transformation, hybrid production, disease resistance, and novel output traits. (Same course as Plant Sciences 220)—II. (II)
Foreign Language Requirement ........... 0-15
Students must complete three sequenced
quarters (15 units) of courses in one foreign
language or its equivalent. Passing a foreign
language proficiency examination, a score of
5, 4, or 3 on a foreign language Advanced
Placement exam (except Latin), or a score of
550 on the SAT II Subject Test will also
satisfy this requirement.

Internship Requirement ..................... 4
Students must complete at least four units of
internship. Internships can be chosen in
consultation with an adviser. Internship
requirement waived for students enrolled in
the UC Education Abroad Program.

Areas of Specialization ......................... 44-45
Agricultural Production Option............... 45
Biological Sciences 2A and 2B ............. 10
Chemistry 2A and 2B ......................... 10
15 units from: Animal Science 118, 124,
136A, 136B, 143, 144, 145, 146, Avian
Sciences 121, Entomology 110, 135,
Environmental Horticulture 100, 133,
Environmental Science and Management
100, Hydrology 124, International
Agricultural Development 142, 160,
Plant Pathology 121, 130A, 130B,
110C, 110L, 112, 113, 130, 150,
170A, 170B, 172, 176, Soil Sciences
109, 118 ........................................... 15
Restricted Electives: Courses selected in
consultation with an adviser ................ 10

Trade and Economic Development
Option .................................................. 44-45
Mathematics 166 ................................ 3
Sociology 1 or Anthropology 2 ............ 4-5
20 units from: Agricultural and Resource
Economics 15, 100A, 100B, 115B, 120,
121, 130, 136A, 136B, 143, 175, 176
Community and Regional Development
141, Economics 160A, 160B, Textiles and
Clothing 174 .................................... 20
Restricted Electives: Courses selected in
consultation with an adviser ............... 17

Environmental Issues Option ............... 45
Biological Sciences 2A and 2B ............ 10
Environmental Science and Policy 1 ....... 4
16 units from: Agricultural and Resource
Economics 147, 175, 176, Environmental
Science and Policy 100, 101, 105, 110,
160, 161, 170, 171, 172, 175, Plant
Sciences 101, 147, 147L, 150,
Environmental Horticulture 150, 160,
160L ............................................... 16

Restricted Electives: Courses selected in
consultation with an adviser ............... 15

Total Units for Major ..................... 116-134
International Agricultural Development
Abroad ............................................. 0-40
Major Adviser, P. Brown in 3041 Wickson Hall
(Plant Sciences)

Advising Center for the major is located in 1220
Plant and Environmental Sciences 5307521715.

Minor Program Requirements:

International Agricultural Development
Enrollment .......................... 21-33
International Agricultural Development 10
and Agricultural Economics 115A ............... 8
Plant Sciences 101, 110A, 110C, 112, 6-7
International Agricultural Development 103,
170, 195A or Community and Regional
Development 142 ................................ 7-8

Minor Adviser, P. Brown

Advising Center for the minor is located in 1220
Plant and Environmental Sciences 5307521715.

Courses in International
Agricultural Development (IAD)
Questions pertaining to the following courses should
be directed to the instructor or to the Department
of Plant Sciences Advising Center in 1220 Plant
and Environmental Sciences 5307521715.

Lower Division

10. Introduction to International
Agricultural Development (4)
Lecture—discussion—4 hours. Prerequisite: intro-
ducatory social science course (Anthropology,
Sociology, Economics, International Agricultural Development). How social and cultural factors influence technologi-
ical change in agriculture, theories of diffusion of
innovations; social impact analysis and technology
assessment. GE credit: SocSci, Div, Wrt | SS, WE, —II. (II.)
Brown

92. Internship (1-12)
Internship—3-36 hours. Prerequisite: consent of
instructor. Supervised internship, off and on campus,
in community and institutional settings. (P/N grading
only.)—I, II, III, (I, II, III)

Upper Division

103. Social Change and Agricultural
Development (4)
Lecture—discussion—4 hours. Prerequisite: intro-
ducatory social science course (Anthropology,
Sociology, Economics, International Agricultural Development). How social and cultural factors influence technologi-
ical change in agriculture, theories of diffusion of
innovations; social impact analysis and technology
assessment. GE credit: SocSci, Div | SS, WE,
142. Equipment and Technology for Small
Farms (2)
Lecture—1 hour, laboratory—3 hours. Types and
characteristics of agricultural equipment and technol-
ogies appropriate for small commercial farming.
Adjustment and calibration of equipment. Selection of
and budgeting for equipment. (Same course as
Applied Biological Systems Technology 142.) GE
credit: SciEng | QL, SE, VL—III. (II) Shafii

160. Agroforestry: Global and Local
Perspectives (3)
Lecture—discussion—3 hours. Prerequisite: Plant
Sciences 2 or Biological Sciences 1C or 2C; Plant
Sciences 142 or 150 or Biological Sciences 2B or a
general ecology course. Traditional and evolving
types of crops in agricultural ecosystems; their multiple
roles in environmental stabilization and production of
food, fuel, and fiber; and socioeconomic barriers to
the adoption and implementation of agroforestry
practices. Not open for credit to students who have
taken previously taken Agricultural Management
and Rangeland Resources 160. [Former course Agri-
cultural Management and Rangeland Resources
160.] (Same course as Plant Sciences 160.) Offered in
alternate years. GE credit: SciEng | SE—I. (II)
Gradziel

170. Program Development for
International Agriculture (4)
Lecture—discussion—4 hours. Prerequisite: course
10. Principles of leadership and management for
international agricultural development. Organiza-
tions and organizational behavior, and the implica-
tions for planning and administering organizations
involved in the global development effort.—I. (I.)

190. Proseminar in International
Agricultural Development (1)
Seminar—1 hour. Presentation and discussion of cur-
cent topics in international agricultural development by
visiting lecturers, staff and students. May be
repeated for credit. (P/N grading only.)
192. Internship (1-12)
Internship—3-36 hours. Prerequisite: consent of instructor. Supervised internships, off and on campus, in community and institutional settings. (P/NP grading only.)—I, II, III (I, II, III)

195A. Field Study in Agricultural Development—California (3)
Lecture—2 hours; seminar—6 hours; fieldwork. Prerequisite: consent of instructor. Students will incur travel expenses. Observation of agricultural development strategies and effects on rural communities. Discussion with farmers, workers and organizational staff members. Analysis of farm commodities, institutions and experiences in dealing with agricultural development problems. International influence on U.S. agriculture. (P/NP grading only.)

198. Directed Group Study (1-5)
Prerequisite: consent of instructor. Directed group study. (P/NP grading only.)—I, II, III (I, II, III)

199. Special Study for Advanced Undergraduates (1-5)
Prerequisite: consent of instructor. Special study for advanced undergraduates. (P/NP grading only.)—I, II, III (I, II, III)

Graduate

200N. Philosophy and Practice of Agricultural Development (5)
Lecture/discussion—5 hours; term paper. Introduces key elements of philosophy and practice of agricultural development. Themes include: major paradigms of development, historical context within which these paradigms operate, various development techniques and initiatives emerging from agricultural paradigms of development; historical context within agricultural lands, extractive zones (fisheries, forests) and wildlands, with emphases on conservation and sustainability. Comparison of industrial democracies and poor industrial nations. (Same course as Ecology 217.)

220. Food and Nutrition Strategies in Developing Countries (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: Agricultural and Resource Economics 100A. Identifies important topical problems in food and nutrition policy, develops theoretical frameworks suitable for their analysis, examines the empirical information relevant to the problems and, using theory data, draws appropriate policy implications. Offered in alternate years.

290. Seminar in International Agricultural Development (1-2)
Seminar—1-2 hours. Prerequisite: consent of instructor. Discussion and critical evaluation of advanced topics and issues in international agricultural development. May be repeated for credit. (S/U grading only.)—I, II, III (I, II, III)

291. Topics in International Agricultural Development (1-3)
Lecture/discussion—1-3 hours. Prerequisite: consent of instructor. Selected topics dealing with current issues in agricultural development in lesser developed nations. Variable content. May be repeated one time for credit.—I, II, III (I, II, III)

292. Graduate Internship (1-12)
Internship—3-36 hours. Prerequisite: participation in H. Humphrey Fellow Program or consent of instructor. Involves student in supervised internship, whether or on campus, in community, business or institutional setting. Developed with advice of faculty mentor and Humphrey Coordinator. (S/U grading only.)—I, II, III (I, II, III)

298. Directed Group Study (1-5)
Prerequisite: consent of instructor. Directed group study. (S/U grading only.)—I, II, III (I, II, III)

299. Research (1-12)
Prerequisite: consent of instructor. Research. (S/U grading only.)—I, II, III (I, II, III)

Professional

396. Teaching Assistant Training Practicum (1-1)
Prerequisite: graduate standing. Teaching assistant training practicum. May be repeated for credit. (S/U grading only.)—I, II, III (I, II, III)

International Agricultural Development (A Graduate Group)

Faculty

Kassim Al-Khatib, Ph.D., Professor (Plant Sciences)
Roger Baldwin, Ph.D., Assistant Cooperative Extension Specialist, Agronomist and Lecturer (Wildlife, Fish, and Conservation Biology)
Diane M. Barrett, Ph.D., Specialist in Cooperative Extension (Food Science and Technology)
Mark Bell, Ph.D., Lecturer (Plant Sciences)
Stephen Boucher, Ph.D., Associate Professor (Agricultural and Resource Economics)
Kenneth H. Brown, Ph.D., Professor (Nutrition)
Patrick H. Brown, Ph.D., Lecturer (Plant Sciences)
Colin A. Carter, Ph.D., Professor (Agricultural and Resource Economics)
Michael R. Carter, Ph.D., Professor (Agricultural and Resource Economics)
Patricia A. Conrad, D.V.M., Ph.D., Professor (Pathology, Microbiology, and Immunology)
Kathryn G. Dewey, Ph.D., Professor (Nutrition)
Serge I. Doroshov, Ph.D., Professor (Animal Science)
Richard Evans, Ph.D., Specialist in Cooperative Extension (Plant Sciences)
James Fadel, Ph.D., Professor (Animal Science)
Steven Fenimore, Ph.D., Cooperative Extension Specialist (Plant Sciences)
Louise Ferguson, Ph.D., Specialist in Cooperative Extension Specialist (Plant Sciences)
Howard Ferris, Ph.D., Professor (Nematology)
Albert Fisher, Ph.D., Professor (Plant Sciences)
Ryan E. Galt, Ph.D., Assistant Professor (Human and Community Development)
Paul L. Gepts, Ph.D., Professor (Plant Sciences)
Robert Gilbertson, Ph.D., Professor (Plant Pathology)
Rachael Goodhue, Ph.D., Associate Professor (Agricultural and Resource Economics)
Thomas Gradowelz, Ph.D., Professor (Plant Sciences)
Richard D. Green, Ph.D., Professor (Agricultural and Resource Economics)
Luis Guarnizo, Ph.D., Professor (Human and Community Development)
Timothy K. Hartz, Ph.D., Specialist in Cooperative Extension and Lecturer (Plant Science)
James Hill, Ph.D., Professor (Agricultural and Resource Economics)
Robert Hijmans, Ph.D., Associate Professor (Environmental Science and Policy)
Frank W. Hirtz, Ph.D., Senior Lecturer (Human and Community Development)
William Horwath, Ph.D., Professor (Land, Air and Water Resources)
Russell C. Howe, Ph.D., Associate Professor (Animal Science)
Theodore Hsiao, Ph.D., Professor (Land, Air and Water Resources)
Silas S. O. Hung, Ph.D., Professor (Animal Science)
Lovel S. Jarvis, Ph.D., Professor (Agricultural and Resource Economics)
Bryan M. Jenkins, Ph.D., Professor (Biological and Agricultural Engineering)
Marion Jenkins, Ph.D., Research Engineer (Civil and Environmental Engineering)
Suad Joseph, Ph.D., Professor (Anthropology, Women and Gender Studies)
Katrina Jessoe, Ph.D., Adjunct Professor (Agricultural and Resource Economics)
Lucia Kaiser, Ph.D., Community Nutrition Specialist in Cooperative Extension (Nutrition)
Ermias Kebed, Ph.D., Professor (Agricultural Engineering)
Kurt Kornbluth, Ph.D., Adjunct Professor (Biological and Agricultural Engineering)
Bruce Lingquist, Ph.D., Professional Researcher (Plant Sciences)
Jay Lund, Ph.D., Professor (Civil and Environmental Engineering)
Travis Lybbert, Ph.D., Associate Professor (Agricultural and Resource Economics)
Miguel A. Marino, Ph.D., Professor (Land, Air and Water Resources; Civil and Environmental Engineering)
Philip E. Martin, Ph.D., Professor (Agricultural and Resource Economics)
Mark A. Matthews, Ph.D., Professor (Viticulture and Enology)
G. David Miller, M.Sci., Lecturer (Plant Sciences)
Elizabeth J. Mitcham, Ph.D., Specialist in Cooperative Extension (Plant Sciences)
Jeffrey P. Mitchell, Ph.D., Professor (Agricultural Extension and Lecturer (Plant Sciences)
Dan Potter, Ph.D., Professor (Plant Sciences)
Daniel Putnam, Ph.D., Cooperative Extension Specialist, Agronomist and Lecturer (Plant Sciences)
Pamela C. Ronald, Ph.D., Professor (Plant Pathology)
Scott Rozelle, Ph.D., Adjunct Professor (Agricultural and Resource Economics)
Roberdo S. Sainz, Ph.D., Professor (Animal Science)
Richard Sexton, Ph.D., Professor (Agricultural and Resource Economics)
Rajender Paul Singh, Ph.D., Professor (Biological and Agricultural Engineering)
Michael P. Smith, Ph.D., Professor (Human and Community Development)
International and Community Nutrition

Marjorie Haskell, Ph.D., Associate Researcher (Nutrition)
Sonja Y. Hess, Ph.D., Associate Project Scientist (Nutrition)
Sandra Huffman, Sc.D., Researcher (Nutrition)
Lucia Kaiser, Ph.D., Specialist in Cooperative Extension (Nutrition)
Charles B. Stephens, Ph.D., Adjunct Professor (Nutrition)
Marta V. Loan, Ph.D., Adjunct Professor (Nutrition)
Steven A. Vosti, Ph.D., Associate Adjunct Professor (Agricultural and Resource Economics)

Graduate Study. The Program in International and Community Nutrition, an Organized Research Unit located in the Department of Nutrition, coordinates specialized course work and research leading to the Designated Emphasis in International and Community Nutrition for students in various graduate programs. The program focuses on both theoretical and practical issues concerning the identification, treatment, and prevention of human nutritional problems in low-income countries and in disadvantaged groups in the United States. Students enrolled in the Designated Emphasis are expected to (1) complete the course requirements already established by their respective graduate programs, (2) participate in a weekly advanced seminar in international and community nutrition, (3) complete additional core courses in international nutrition (Nutrition 219A, 219B, 258) and selected courses in the related disciplines of epidemiology, statistics, and social and behavioral sciences, and (4) conduct their dissertation research on a relevant topic under the supervision of a professor who is a member of the Program in International and Community Nutrition. Students accepted into the following doctoral programs are automatically eligible to participate in the Designated Emphasis: Nutrition, Agricultural and Resource Economics, Epidemiology, Anthropology, and Human Development. Students from other programs may also be accepted by special request to the Program Director. Upon graduation, students receive a Ph.D. in their major field, with specific recognition for the Designated Emphasis in International and Community Nutrition.

Graduate Adviser. Contact the Program office.
the American civil trial, and foundational substantive and procedural law such as real property, torts, criminal law and procedure, civil procedure, and contracts.

201B. Advanced Topics in United States Law (3)
Lecture/discussion—20 hours. Prerequisite: Law School education or equivalent. Orientation to advanced topics in U.S. law - Intellectual Property (including copyright and trademarks), Commercial and Consumer Law, Advanced Contracts, Antitrust, Taxation, Remedies in Law, Environmental Dispute Resolution, Remedies and introduction to trial techniques and legal research/writing.

202. Introduction to Contracts (4)
Lecture/discussion—20 hours. Prerequisite: Law school education or the equivalent. Examines formation of the sorts of promises that are enforced and the nature of protection given promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrinal adjustments/changes to social demands.

202A. Introduction to Contracts Formation (2)
Lecture/discussion—20 hours. Prerequisite: Law school education or equivalent. Examines formation of the sorts of promissories that are enforced and the nature of protection given promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrinal adjustments/changes to social demands. Offered irregularly—II, IV, (II, IV)

202B. Contracts Performance (2)
Lecture/discussion—20 hours. Prerequisite: Law school education or equivalent. Examines issues of performing promises that are enforceable and possible breach of promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrinal adjustments/changes to social demands. Offered irregularly—II, IV, (II, IV)

202B. Contracts Performance (2)
Lecture/discussion—20 hours. Prerequisite: Law school education or equivalent. Examines issues of performing promises that are enforceable and possible breach of promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrinal adjustments/changes to social demands.

203. Civil Procedure (2)
Lecture/discussion—20 hours. Prerequisite: Law school education or the equivalent. Study of the fundamental and recurrent problems in civil actions including the methods used by federal and state courts to resolve civil disputes.

204. International Joint Ventures (3)
Lecture/discussion—20 hours. Prerequisite: Law School education or equivalent; course 201. Internaional and U.S. business law and legal transactions. Legal planning, problem solving, decision making and negotiations related to the break-up and dissolution of a major international joint venture. U.S. laws including finance, tax, bankruptcy, labor, antitrust, environmental, corporate structures and intellectual property.

205. Introduction to Constitutional Law (4)
Lecture/discussion—20 hours. Prerequisite: Law school education or equivalent. Principles, doctrines and controversies regarding the structure and division of powers in American government. Includes judicial review, jurisdiction, standing to sue, federalism, federal and state powers and immunities, and the separation of powers among branches of the federal government.

205A. Overview of US Constitutional Law (2)
Lecture/discussion—20 hours. Prerequisite: Law School education or equivalent. Principles, doctrines and controversies regarding the structure and division of powers in American government. Includes judicial review, jurisdiction, standing to sue, federalism, federal and state powers and immunities, and the separation of powers among branches of the federal government.

205AS. Overview of US Constitutional Law (2)
Lecture/discussion—20 hours. Prerequisite: Law School education or equivalent. Principles, doctrines and controversies regarding the structure and division of powers in American government. Includes judicial review, jurisdiction, standing to sue, federalism, federal and state powers and immunities, and the separation of powers among branches of the federal government.

205B. Constitutional Law—Protection of Individual Rights (2)
Lecture/discussion—20 hours. Prerequisite: Law School education or equivalent. Principles, doctrines and controversies regarding the U.S. Constitution Bill of Rights, including due process of law, equal protection, freedom of religion, freedom of speech, separation of religion and state action, and congressional legislation in aid of civil rights and liberties.

211. Negotiations and Alternative Dispute Resolution (1)
Lecture/discussion—10 hours. Prerequisite: course 201, law school education or the equivalent. Mechanisms for resolving disputes including the alternatives to litigation such as negotiation, mediation, and arbitration. Advantages and disadvantages of each approach.

212. Introduction to Negotiation (2)
Lecture/discussion—20 hours. Prerequisite: Law school education or the equivalent. Introduction to theoretical and empirical approaches to negotiation for the purposes of making deals and resolving legal disputes.

212. Introduction to Negotiation (2)
Lecture/discussion—20 hours. Prerequisite: Law school education or the equivalent. Introduction to theoretical and empirical approaches to negotiation for the purposes of making deals and resolving legal disputes.

214. Advanced Negotiation (2)
Lecture/discussion—20 hours. Prerequisite: Law school education or equivalent. Principles and empirical approaches to advanced negotiations including negotiation framework, models, styles, multiple party/issue negotiations and settlements.

214S. Advanced Negotiation (2)
Lecture/discussion—20 hours. Prerequisite: Law school education or equivalent. Principles and empirical approaches to advanced negotiations including negotiation framework, models, styles, multiple party/issue negotiations and settlements.

215. Business Associations (4)
Lecture/discussion—20 hours. Prerequisite: course 201, law school education or the equivalent. Legal rules and concepts applicable to business associations including general partnerships, joint ventures, limited partnerships, limited liability entities, and sole proprietorships.

215S. Business Associations (4)
Lecture/discussion—20 hours. Prerequisite: Law School education or equivalent. Legal rules and concepts applicable to business associations including general partnerships, joint ventures, limited partnerships, limited liability entities, and sole proprietorships.

216. International Business Transactions (2)
Lecture/discussion—20 hours. Prerequisite: course 201 and law school education or the equivalent. Legal problems arising from international business transactions. Focus on international sales contracts, choice of law, forum selection clauses, letters of credit, transfers of technology, regulation of bribery, development of joint ventures, repatriation of profits, foreign exchange problems, and national efforts to control imports.

217. Alternative Dispute Resolution (2)
Lecture/discussion—20 hours. Prerequisite: Law school education or the equivalent. Introduces students to a wide variety of alternative dispute resolution procedures, with an in-depth emphasis on negotiation, mediation and arbitration.

219. Advanced Writing Project (4)
Project. Prerequisite: course 201, law school education or the equivalent. The completion of a written research project under the active supervision of a faculty member in satisfaction of the research-writing requirement. (S/U grading only)

220. United States Taxation of Multinational Investments (2)
Lecture/discussion—20 hours. Prerequisite: course 201, law school education or the equivalent. An analysis of the United States taxation of multinational investments including jurisdiction of tax, the U.S. tax system, foreign tax credits, treaties, and transfer pricing.

227. Criminal Procedure (2)
Lecture/discussion—20 hours. Prerequisite: Law school education or equivalent. Federal constitutional limits on government authority to gather evidence and investigate crimes. Includes Fourth Amendment limits on search, seizure, and arrest; Fifth Amendment privilege against self-incrimination; Sixth Amendment right to counsel.

228A. Mergers and Acquisitions Law (2)
Lecture/discussion—20 hours. Prerequisite: Law School education or equivalent. Practical approach to mergers and acquisitions with an in-depth look at the planning, negotiation and completion of mergers and acquisitions.

228AS. Mergers and Acquisitions Law (2)
Lecture/discussion—20 hours. Prerequisite: Law School education or equivalent. Practical approach to mergers and acquisitions with an in-depth look at the planning, negotiation and completion of mergers and acquisitions.

228B. Mergers and Acquisitions Law (2)
Lecture/discussion—20 hours. Prerequisite: course 201, law school education or the equivalent. Structuring and jurisdictional issues associated with securitization practice. Topics include the regulation of public offerings, transactions by corporate insiders, regulation of corporate disclosure and conduct, and the liabilities of corporations and individuals under antifraud provisions.

239. Mediation (2)
Lecture/discussion—20 hours. Prerequisite: Law school education or the equivalent. Introduction to the mediation process. Development of communication skills, the ability to analyze disputes, to understand why mediation succeeds or fails, and understand the advantages and limitations of mediation as a method of resolving disputes.

242. Private International Law (2)
Lecture/discussion—20 hours. Prerequisite: course 201; Law School education or equivalent. Operating law across national borders; emphasis on methods of resolving international disputes. International aspects of jurisdiction, choice of law, judgment enforcement, forum choice, process service, taking of evidence, foreign sovereign immunity, extra-territorial regulation of antitrust, securities, other national laws.

242S. Private International Law (2)
Lecture/discussion—20 hours. Prerequisite: course 201; Law School education or equivalent. Operating law across national borders; emphasis on methods of resolving international disputes. International aspects of jurisdiction, choice of law, judgment enforcement, forum choice, process service, taking of evidence, foreign sovereign immunity, extra-territorial regulation of antitrust, securities, other national laws.
of evidence, foreign sovereign immunity, extraterritorial regulation of antitrust, securities, other national laws.

247. Banking Law (1)
Lecture/discussion—10 hours. Prerequisite: course 201, law school education or the equivalent. Institution features of international banking transactions, the structure of international banking, and the mechanics of overseeing large loans. Emphasis on negotiable instruments such as bills of lading, letters of credit, standby letters of credit, and interbank transactions.

249. Comparative Law (1)
Lecture/discussion—10 hours. Prerequisite: course 201 and law school education or the equivalent. A comparative study of the development of laws of legal traditions. Attention to the historical reasons for their divergence, contemporary approaches to universal problems such as succession, torts, and contracts, the cross-fertilization of laws and difficulties commonly associated with importing foreign law into new territory.

250. International Trade Law (3)
Lecture/discussion—20 hours. Prerequisite: course 201, law school education or the equivalent. An investigation of global trading systems including international trade in goods and services, e-commerce, international intellectual property, international tax systems, and international finance. Emphasis on preparing for a trial in the United States. Includes the study of pretrial motions, jury selection, opening statements, rules of evidence, closing arguments, and the selection of appropriate strategies.

251. United States Litigation Issues (1)
Lecture/discussion—10 hours. Prerequisite: course 201, law school education or the equivalent. Prevention and resolution of disputes in international commerce. Emphasis on preparing for a trial in the United States. Includes the study of pretrial motions, jury selection, opening statements, rules of evidence, closing arguments, and the selection of appropriate strategies.

262. Antitrust (1)
Lecture/discussion—10 hours. Prerequisite: course 201, law school education or the equivalent. Historical and institutional background of antitrust law in the United States. The statutory framework including price fixing, limits on distribution, monopolization and mergers, and reporting requirements. Offered in alternate years.

270. Financing International Transactions (3)
Lecture/discussion—20 hours. Prerequisite: course 201 and law school education or the equivalent. How capital is raised in international markets. Investment strategies for U.S. markets. Taxation of financial investments, international currency regulation, and assessing rates of return on international investments.

274. Intellectual Property (2)
Lecture/discussion—20 hours. Prerequisite: Law School or equivalent; course 201. Intensive study of intellectual property law. Including copyright, trademark and patent law and unfair competition.

274S. Intellectual Property (2)
Lecture/discussion—20 hours. Prerequisite: Law School or equivalent; course 201. Intensive study of intellectual property law. Including copyright, trademark and patent law and unfair competition.

283. Contract Remedies (2)
Lecture/discussion—20 hours. Prerequisite: Law School education or equivalent. Covers a range of remedies for contract breach: remedies under common law and equity, liquidated damages clauses, remedies for mistake and unconscionability as well as breach of contract for the Sale of Goods under UCC Article II.

283S. Contract Remedies (2)
Lecture/discussion—20 hours. Prerequisite: Law School education or equivalent; course 202A, 202B or equivalent. Covers a range of remedies for contract breach: remedies under common law and equity, liquidated damages clauses, remedies for mistake and unconscionability as well as breach of contract for the Sale of Goods under UCC Article II.

285. Environmental Law (2)
Lecture/discussion—20 hours. Prerequisite: Law School education or the equivalent. Introduction to federal and state environmental laws; historical development of environmental law; the role of courts, the legislature and the executive branch in the development and implementation of environmental policy. Review of major statutes.

289. Licensing Agency in Intellectual Property & Technology (4)
Lecture/discussion—20 hours. Prerequisite: course 201. Law School education or equivalent. Intellectual property as it relates to current forms of legal protection and how new innovations fit into these models, including public-private technology transfer, patents, institutional objectives, technology transfer offices, and government policy. (S/U grading only.)

290. American Legal System Research Seminar (1)
Seminar—5 hours. Prerequisite: course 201, law school education or equivalent. Advanced seminar in a current topic in International Commercial Law. May be repeated three times for credit when topic differs.

292. International Commercial Law Seminar (1-4)
Lecture/discussion—20 hours. Prerequisite: Law School education or equivalent. Advanced seminar in a current topic in International Commercial Law. Topic will change each year the course is offered. May be repeated two times for credit when topic differs.

292S. International Commercial Law Seminar (1-4)
Lecture/discussion—20 hours. Prerequisite: Law School education or equivalent. Advanced seminar in a current topic in International Commercial Law. Topic will change each year the course is offered. May be repeated two times for credit when topic differs.

299. Advanced Research in Legal Problems (1-4)
Prerequisite: course 201, law school education or the equivalent. Student individualized research projects under faculty supervision. (S/U grading only.)

International Relations

(Ethran Scheiner, Ph.D., Program Director)
Program Office. 464 Kerr Hall 330-754-8098
Committee in Charge
Kyle Joyce, Ph.D. (Political Science)
Alison Ledgerwood, Ph.D. (Psychology)
Eric Schraeder, Ph.D. (University Writing Program)
Deborah Swenson, Ph.D. (Economics)

The Major Program
Problems of security, development, ethnic conflict, human rights, health, and the environment increasingly confront us at a global rather than a national level. With its theoretical models and real-world application, the study of international relations is an exciting and highly relevant interdisciplinary major.

The Program. Graduation with a major in international relations requires completion of introductory courses in political science, economics, statistics, and history. The major also requires fluency in English and a working knowledge (approximately 24 to 30 units of course credits or equivalent fluency) of one other modern language. Students choose one of four tracks that encompass major topical areas in combination with an area studies emphasis:

1. World Trade and Development;
2. Peace and Security;
3. Global Environment, Health, and Natural Resources;
4. Peoples and Nationalities.

Upper division coursework for Tracks I, II and III is composed of twelve courses. Students choosing Track IV, Peoples and Nationalities, are required to study or work abroad for a minimum of one quarter; upper division coursework is reduced to nine classes in recognition of the experience gained through education abroad.

Programs, Internships, and Career Alternatives.
One program of special interest to international relations majors is the Education Abroad Program, which provides for an alternative to the life and culture of other cultures. At UC Davis, the Internship and Career Center assists students in obtaining legislative, legal, and business internships. In addition, the UC Davis Washington Center arranges internships and runs a full-credit academic program in Washington, D.C. with a full range of opportunities for International Relations majors (see also UC Washington Program (UCDC), on page 534). International relations graduates are prepared for employment in government agencies (such as the Foreign Service), state agencies, international or non-governmental organizations (such as the United Nations), foundations, and companies having interests in international business, trade, or finance. The stringent language requirement of the major program enhances career prospects in jobs which demand knowledge of the language and culture of other countries.

International Relations Abroad. International Relations strongly encourages all students to participate in the UC Education Abroad Program; those who choose to study Track IV, Peoples and Nationalities, must study or work abroad for a minimum of one quarter. A maximum of five courses taken abroad may be applied toward the 12 upper division courses in Tracks I, II, and III of the International Relations major. In Track IV, the Four Area Studies courses may be done abroad. Courses are selected with the approval of an adviser for the International Relations program.

Preparatory Requirements. Before declaring a major in International Relations, students must complete the following courses with a combined GPA of at least 2.500 at the University of California or other four-year school (at least 3.000 for similar courses taken at community college). All courses must be taken for a letter grade.

Major Adviser. Daniel Kono (Political Science)
Courses in International Relations (IRE)

Lower Division

1. Global Interdependence (4)
   Lecture—3 hours; discussion—1 hour. Development of the concept of global interdependence along its political, economic, demographic, cultural, technological, and environmental dimensions. Focus on the ways societies and states interact. Course provides the foundation for upper division multidisciplinary work in international relations. GE credit: SocSci | SS, WE—II, III.
   98. Directed Group Study (1-5)
   Prerequisite: consent of instructor. (P/NP grading only.)
   99. Special Study for Undergraduates (1-5)
   Prerequisite: consent of instructor. (P/NP grading only.)
   Upper Division
   104. The Political Economy of International Migration (4)
   Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: upper division standing. Analysis of worldwide migration patterns, and social scientific theories of international and transnational migration. Focus in economical, political, and social impact of immigration and potential for international and regional cooperation. (Same course as Sociology 104.) GE credit: SocSci | OL, SS, SS.
   190. Topics in International Relations (4)
   Lecture/discussion—4 hours. Prerequisite: consent of instructor. Selected topics in international relations. Variable content. May be repeated for credit when topic differs. GE credit: WE.
   192. International Relations Internship (1-12)
   Internship—3-36 hours to be arranged. Prerequisite: upper division standing and consent of instructor. Work experience in international relations, with term paper summarizing the practical experience of the student. (P/NP grading only.) GE credit: SS, WE.
   194HA-194HB. Special Study for Honors Students (4-4)
   Seminar—2 hours; term paper. Prerequisite: open only to majors of senior standing who qualify for honors program. Directed reading, research, and writing on topics selected by students and instructor in preparation of a senior honors thesis under direction of a faculty adviser. (Deferred grading only, pending completion of sequence.) GE credit: SocSci | OL, SS, WE—II, III, III.
   198. Directed Group Study (1-5)
   Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)
   199. Special Study for Advanced Undergraduates (1-5)
   Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

International Science Studies

This interdisciplinary minor in International Science Studies will introduce College of Agricultural and Environmental Sciences students to global issues, which affect their major disciplines in the current world, and also provide an opportunity to gain first hand experience abroad when appropriate. The goal of this minor is to enable our college students to develop greater international competence and to enhance their employability.

The minor assumes that the student will have a major in the sciences, and that classes taken under one of the three tracks in the minor will contribute depth to the existing major or establish depth in a selected additional field of study. Students will be expected to work closely with an academic advisor in developing an intellectually coherent program of study. A minimum of 18 units at upper division work is required. Only a single course can be counted toward both major and minor and no course can be used to satisfy the requirements of more than one minor.

Minor Program Requirements:

Education Abroad Program courses taught overseas and relevant international internships will count towards the minor requirement with advisor’s approval. For each track, students can take a maximum of three units from EAP courses, with a valid transcript, and three units from relevant international internships. The international internship activities would require a pre-approved study plan with the academic adviser before the maximum of three units can be awarded. Language and culture related courses are encouraged, but not required for the minor.

Internship Experience

The Internship and Career Center facilitates a campus-wide internship program. All internships, both credit and non-credit, can be taken for Transcript Notation with completion of required evaluation reports. The notation briefly describes the nature and location of the internships experience. Questions pertaining to academic credit and Transcript Notation may be directed to The Internship and Career Center.

Course Credit. Internship courses (numbered 92 and 192) are available for credit on a variable-unit and Passed/Not Passed grading basis. A maximum of 12 units of 92 and/or 192 courses may be counted toward the 180-unit minimum needed for graduation. To qualify for the 192 course, students must have acquired 84 units of credit. All credited internships require approval and sponsorship by a faculty member from an appropriate discipline. Arrangements may be made through the department of the sponsoring faculty member and facilitated by The Internship and Career Center Staff.

The Major Program

The major in Italian provides a solid language background which will enable the student to develop an appreciation for the numerous Italian contributions not only to the arts, but also to political theory, science, literature and other expressions of human creativity, which continue to influence our global world. The Program. The Italian program is geared to the specific needs and interests of the students, who enjoy the advantages of a small classroom setting and the individualized mentoring of dedicated professors. While the use of Italian is stressed in language and literature courses, the Italian program is interdisciplinary in nature. Starting at the lower-division level, students collaborate closely with academic advisers in order to design a major or minor curriculum which includes culture, film, art history,

8A. Italian Conversation (3)
Discussion—3 hours. Prerequisite: course 3 or the equivalent. Course designed to offer practice in speaking Italian. May be repeated one time for credit. (P/NP grading only) GE credit: WC.—I, II, III.

8AS. Italian Conversation (3)
Discussion—3 hours. Prerequisite: course 3 or the equivalent. Practice in the speaking of Italian. Course is taught abroad. May be repeated for up to 6 units of credit. Not open for credit to students who have completed course 8B. (P/NP grading only) GE credit: —I, II, III.

8B. Italian Conversation (3)
Discussion—3 hours. Prerequisite: course 3. Course designed to offer practice in speaking Italian. (P/NP grading only) GE credit: WC.—II, III.

8BS. Italian Conversation (3)
Discussion—3 hours. Practice in the speaking of Italian. Course is taught abroad. May be repeated for up to 6 units of credit. Not open for credit to students who have completed course 8B. (P/NP grading only) —I, II, III.

9. Reading Italian (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 5. Reading and discussion of modern Italian prose, including selections from creative, scientific and juridical writings. Introduction to contemporary Italian literature and culture. Strengthening the student's command of the Italian language. GE credit: WC.—I, II, III, I, II, III.

9S. Reading Italian (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 5 or SS. Reading and discussion of modern Italian prose, including selections from creative, scientific and juridical writings. Introduction to contemporary Italian literature and culture as well as strengthening the student's command of the Italian language. This course is taught abroad. Not open for credit to students who have completed course 9. GE credit: WC.—I, II, III.

50. Studies in Italian Cinema (4)
Lecture—2 hours; discussion—1 hour; term paper. Introduction to Italian cinema through its genres. Focus is on cinema as a reflection of and a comment on modern Italian literature. Film will be studied as an artistic medium and as a form of mass communication. ArtHum, Wrt | AH, WC, WE.—II, III, I, II, III.

90X. Lower Division Seminar (1-2)
Seminar—1.2 hours. Prerequisite: lower division standing and consent of instructor. Examination of a special topic in Italian language or culture (such as Italian culture seen through film, Italian feminism, literature, or politics) through shared readings, discussions, writing assignments, or special activities such as film screening or laboratory work.

98. Directed Group Study (1-5)
Primarily intended for lower division students. (P/NP grading only)

98S. Directed Group Study (1-4)
Prerequisite: consent of instructor. Group study on focused topics in Italian literature and culture. Varies according to instructor. This course is offered abroad. May be repeated for credit when topic differs. (P/NP grading only) —I, II, III.

99S. Special Study for Advanced Undergraduates (1-5)
Prerequisite: consent of instructor. Opportunity for a faculty member to work with an advanced undergraduate student in a focused manner on an aspect of a topic or topics of mutual research/creative interest. This course is offered abroad. May be repeated for credit when topic differs. (P/NP grading only) —I, II, III.

Upper Division

101. Advanced Conversation, Composition, and Grammar (4)
Lecture—3 hours. Prerequisite: course 9 or consent of instructor. GE credit: ArtHum | AH, OL, WC, WE.—I, II. (I.) Heyer-Caput

101S. Advanced Composition, Conversation and Grammar (4)
Lecture—3 hours; extensive writing. Prerequisite: course 9 or consent of instructor. Expository writing in Italian, with emphasis on advanced grammar, organization, and vocabulary building. Course will be taught to students who have completed course 101. GE credit: ArtHum | AH, OL, WC, WE.—III.

104. Italian Translation and Style (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 101 or consent of instructor. Practice in translation from and to English. Italian, using literary and non-literary texts of different styles. Analysis of linguistic problems and elements of style contained in the translation material. GE credit: AH, WC.—III.

104T. Translation and Style (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 101 or consent of instructor. Practice in translation from Italian to English and English to Italian, using literary and non-literary texts of different styles. Analysis of linguistic problems and elements of style contained in the translation material. Course will be taught abroad. Not open for credit to students who have completed course 104. GE credit: ArtHum | AH, WC.—III.

105. Introduction to Italian Literature (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 101 or consent of instructor. Introduction to the study of the classical periods, works, and movements of the Medieval, Renaissance, and Early Modern periods in Italy. GE credit: ArtHum | AH, OL, WC.—II, III, I, II, III. (I.) Heyer-Caput, Schiesari

105T. Introduction to Italian Literature (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 101 or consent of instructor. Introduction to the study of the principal authors, works, and movements of the Medieval, Renaissance, and Early Modern periods in Italy. This course is taught abroad. Not open for credit to students who have completed course 105. GE credit: ArtHum, Div, Wrt | AH, OL, WC.—III.

107. Survey of Italian Culture and Institutions (4)
Lecture—3 hours; term paper. Assessment of the impact of regional autonomy on Italian cultural life from the Middle Ages to the present. Special emphasis will be placed upon achievements in literature, the arts, philosophy, and socio-political institutions. To be taught in English. GE credit: ArtHum or SacSci | AH, OL, SS, VI, WC, WE.—I, II, III.

107S. Survey of Italian Culture and Institutions (4)
Lecture/discussion—3 hours; term paper. An assessment of the impact of regional autonomy on Italian cultural life from the Middle Ages to the present. Special emphasis will be placed upon achievements in literature, the arts, philosophy, and socio-political institutions. To be taught in English. Not open for credit to students who have completed course 107. GE credit: ArtHum or SacSci | AH, OL, SS, VI, WC, WE.—I, II, III.

108. Contemporary Issues in Italian Culture and Society (4)
Lecture/discussion—3 hours; term paper. Analysis of cultural issues in contemporary Italy. Myth and reality of imagined Italies; Italian identities; immigration and race relations; the media and popular culture. Taught in English. GE credit: ArtHum or SacSci, Div, Wrt | AH, OL, SS, VI, WC, WE.—II, III. (I.) Bassi

108S. Contemporary Issues in Italian Culture and Society (4)
Lecture/discussion—3 hours; term paper. Analysis of cultural issues in contemporary Italy, myth and reality of imagined Italies; Italian identities; immigration and race relations; the media and popular culture. Taught in English. This course will be taught abroad. Not open for credit to students who have completed course 108. GE credit: ArtHum or SacSci, Div, Wrt | AH, OL, SS, VI, WC, WE.—II, III.

110. Medieval and Renaissance Poetry: St. Francis to Petrarch (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Study of the origins of Italian religious and secular poetry of the 13th and 14th centuries. A diversified poetry is illustrated in works of St. Francis, Dante, Petrarch, the Sicilian School, the New Sweet Style Poets, and other authors. Offered in alternate years. GE credit: ArtHum | AH, OL, WC, WE.—II, III.

113. Dante Alighieri, Divina Commedia (Inferno, Purgatorio, Paradiso) (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Study of Dante Alighieri’s Divina Commedia, and its role in the development of Italian language and literature. Emphasis will be placed on reading the whole poem within the historical context of the Middle Ages. GE credit: ArtHum | AH, OL, WC, WE.—II, III.

114. Boccaccio, Decameron, and the Renaissance Novella (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Study of the development of the short story in Italy, as exemplified in Giovanni Boccaccio’s Decameron, in his predecessors and Renaissance followers. Offered in alternate years. GE credit: ArtHum | AH, OL, WC, WE.—I, II.

115A. Studies in the Cinquecento (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Study of the principal authors, works, and movements of the Medieval, Renaissance, and Early Modern periods in Italy. GE credit: ArtHum | AH, OL, WC.—II, III, I, II, III. (I.) Heyer-Caput, Schiesari

115B. Italian Literature of the Renaissance and the Baroque: From Cellini to Marino (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 115A. Continued examination into the loss of an ideal. Emphasis on the conflicts in Michelangelo and Tasso leading to Marino, with an excursion on Galilei’s role in the formation of a modern scientific and journalistic writings. Introduction to literary styles. Analysis of key texts from the high moment of the Italian Renaissance. The political and aesthetic legacy of humanism will be foregrounded in relation to authors such as Ficino, Ariosto, Machiavelli, Aron, Cabezie, and Tasso. Offered in alternate years. GE credit: ArtHum | OL.—III. (III.) Schiesari

115C. Italian Drama from Machiavelli to the Enlightenment (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Development of comic and tragic forms as critical representations of their societal and historical contexts, i.e. Machia
evelli and the logic of power. Barocco: Transfer in the service of counter-reformation Italy, Goldoni’s comedies and bourgeois social consciousness. Offered in alternate years. GE credit: ArtHum | OL.—I. Schiesari

115D. Early Modern Italian Lyric (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Examination of the poetic tradition influenced by Petrarch: Consideration of the relation between gender and genre in such poets as Petrarch, Bembo, della Casa, Tasso, Marino, Gasparo Stampa, Veronica Franco, Isabella di Morra. Offered in alternate years. GE credit: ArtHum | OL.—I, II, III. Schiesari

118. Italian Literature of the Eighteenth Century (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Examination of the poetic tradition influenced by Petrarch: Consideration of the relation between gender and genre in such poets as Petrarch, Bembo, della Casa, Tasso, Marino, Gasparo Stampa, Veronica Franco, Isabella di Morra. Offered in alternate years. GE credit: ArtHum | OL.—I, II, III. Schiesari

119. Italian Literature of the Nineteenth Century (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Romanticism in Italy, including Manzoni, Verga, and Verismo. GE credit: ArtHum | AH, OL, WC, WE.—II, III. (I.) Heyer-Caput
120A. Italian Literature of the Twentieth Century: The Novel (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Development of the novel from Svevo to the present. Emphasis on the work of Svevo, Levi, Moravia, Pavese, and Vittorino. GE credit: ArtHum, Div | AH, WC, WE — Cannon, Hoyer-Capit

120B. Italian Literature of the Twentieth Century: Poetry and Drama (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Italian poetry with emphasis on Hermeticism; the theater of Luigi Pirandello and its role in the development of contemporary Italian drama. GE credit: ArtHum, Div | AH, WC — Hoyer-Capit

121. New Italian Cinema (4)
Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: course 1 and upper-division standing, or consent of instructor. Italian cinema of the 21st century in the context of profound cultural and social changes in Italy since World War II. Productions by representative directors such as Amelio, Giordano, Moretti, Muccino are included. Knowledge of Italian not required. Offered in alternate years. (Same course as Film Studies 121.) GE credit: ArtHum, Div, Wrt | AH, OL, VL, WC, WE — III. Hoyer-Capit

121S. New Italian Cinema (4)
Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: course 1 and upper-division standing, or consent of instructor. Italian cinema of the 21st century in the context of profound cultural and social changes in Italy since World War II. Productions by representative directors such as Amelio, Giordano, Moretti, Muccino are included. Knowledge of Italian not required. [Same course as Film Studies 121S.] GE credit: ArtHum, Div, Wrt | AH, OL, VL, WC, WE — II, III, I, II.

131. Autobiography in Italy (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. The development of representations of selfhood with particular attention to generic conditions, the confessional tradition and the problem of women’s self-representation. Authors studied may include Petrarch, Tasso, Casanova, Alfieri, Zvekov, Sibilla Aleramo and Primi. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, OL, WC, WE — III. Hoyer-Capit, Schiesari

139B. Italian Literature in English: Boccaccio, Petrarch and the Renaissance (4)
Lecture/discussion—3 hours; term paper. Petrarch and Boccaccio and their relations to the Middle Ages and the Renaissance; the Renaissance, with particular attention to the works of Lorenzo de’ Medici, Leonardo da Vinci, Machiavelli, Ariosto, Michelangelo, etc. GE credit: ArtHum, Div | AH, OL, WC, WE — II, III.

140. Italian Literature in English Translation: Dante, Divine Comedy (4)
Lecture/discussion—3 hours; term paper. Prerequisite: any course from the GE Literature Preparation List. Reading of Dante Alighieri’s Divine Comedy, through the other world realms of Inferno, Purgatory, and Paradise. GE credit: ArtHum, Wrt | AH, OL, WC, WE — I, II.

141. Gender and Interpretation in the Renaissance (4)
Lecture/discussion—3 hours; term paper. Prerequisite: completion of Subject A requirement, at least one course in literature, or consent of instructor. Critical analysis of Renaissance texts with primary focus on issues such as human dignity, education and gender politics; “high” and “low” culture and its relation to literary practices. (Same course as Comparative Literature 138.) GE credit: ArtHum, Div, Wrt | AH, OL, WC, WE — I. I. Schiesari

142. Masterpieces of Modern Italian Narrative (4)
Lecture—1.5 hours; discussion—1.5 hours; term paper. Prerequisite: either English 3, Comparative Literature 2, or History 4C. Analysis of major works of Italian narrative fiction from unification of Italy to present. Students will learn to use representative methods and concepts which guide literary scholarship. Consideration of works within European social and cultural context. Offered in alternate years. GE credit: ArtHum, Wrt | AH, WC, WE — III.

145. Special Topics in Italian Literature (4)
Lecture/discussion—4 hours. Prerequisite: course 9 or consent of instructor. Study of special topics and themes in Italian literature, such as comic literature, epic poetry, pre-twentieth century theater, fascism, futurism, women and literature, and the image of America, etc. May be repeated for credit when topics differ. GE credit: ArtHum, Wrt | AH, OL, VL, WC, WE — I, II, III, I, II, III.

145S. Special Topics in Italian Literature (4)
Lecture/discussion—4 hours. Prerequisite: course 9 or consent of instructor. Study of special topics and themes in Italian literature, such as comic literature, epic poetry, pre-twentieth century theater, fascism, futurism, women and literature, the image of America, etc. This course is taught abroad. May be repeated for credit. Not open for credit to students who have completed course 145. GE credit: ArtHum, Wrt — III.

145ST. Special Topics in Italian Literature (4)
Lecture/discussion—4 hours. Prerequisite: course 9 or consent of instructor. Study of special topics and themes in Italian literature, such as comic literature, epic poetry, pre-twentieth century theater, fascism, futurism, women and literature, the image of America, etc. This course is taught abroad. May be repeated for credit. Not open for credit to students who have completed course 145. GE credit: ArtHum, Wrt | AH, OL, VL, WC, WE — II, III.

150. Studies in Italian Cinema (4)
Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: Humanities 10 or consent of instructor. Introduction to Italian cinema through its genres. Focus on cinema as a reflection or a comment on modern Italian history. Film as an artistic medium and as a form of mass communication. GE credit: ArtHum, Div, Wrt | AH, OL, VL, WC, WE — II, III.

190X. Upper Division Seminar (1-2)
Seminar—1-2 hours. Prerequisite: upper division standing and consent of instructor. Examination of a special topic in Italian language or culture through shared readings, discussions, written assignments or special activities such as film screening or laboratory work. Limited enrollment. May not be repeated for credit. GE credit: ArtHum | AH, WC, WE.

192. Italian Internship (1-12)
Internship—3-36 hours. Prerequisite: upper division standing and consent of instructor. Participation in government and business activities to gain work experience and to develop a better knowledge of Italian language and culture. (P/NP grading only.)—I, II, III (1, II, III)

194H. Special Study Honors Students (3)
Independent study—3 hours. Prerequisite: open only to seniors of major standing who qualify for honors program, or consent of instructor. Study under the direction of a faculty member, leading to a senior honors thesis on a topic in Italian literature, civilization, or language studies. (P/NP grading only.) GE credit: AH, WC.

195H. Honors Thesis (3)
Independent study—3 hours. Prerequisite: course 194H. Writing of the honors thesis on a topic in Italian literature, civilization, or language studies under the direction of a faculty member. (P/NP grading only.) GE credit: AH, WC, WE.

Committee in Charge

David Biale, Ph.D. (History)
Zeev Maoz, Ph.D. (Political Science)
Susan Miller, Ph.D. (History)
Sven-Erik Rose, Ph.D. (German)
Diane Wolf, Ph.D. (Sociology)

The Program of Study

The Program in Jewish Studies offers students the opportunity to explore Jewish history, Jewish communities, literature, religion, and culture in a comparative perspective and multicultural framework. Courses include Hebrew language instruction as well as the study of classical and modern Jewish texts in translation. The interdisciplinary minor in Jewish Studies provides an introduction to the study of Jewish culture, thought, history, and literature. Students learn a broad range of methodologies and critical concepts in these areas and gain insight into the relation between Jewish identities, histories, and representations and those of the cultures in which Jews throughout the world have lived.

Quarter Offered: I—Fall, II—Winter, III—Spring, IV—Summer, 2013-2016 offering in parentheses.

Fall 2011 and on Revised General Education (GE): AH—Arts and Humanities; SE—Science and Engineering; SS—Social Sciences; AGCH—American Cultures; DD—Diverse Domesticity; OL—Oral Skills; QL—Quantitative; SL—Scientific; VL—Visual; WC—World Cultures; WE—Writing Experience
Upper Division

10. Introduction to Jewish Cultures (4)
Lecture—3 hours; term paper. Diverse Jewish cultures created over the past 2,000 years using examples from less-familiar communities such as India, China, and Ethiopia. Topics include the tensions between homeland/diaspora and questions of identity (race, nationality, culture, or religion). GE credit: Scit, Div, Wrt | SS—III.

120. Cinema and the American Jewish Experience (4)
Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: 120 recommended. Examination of American cinema to reveal how Jewish identity is expressed and submerged, tracing the relations between religion, identity, race, politics, and art. Not open for credit to students who have completed Humanities 122. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WE—I.

121. Oral History and Jewish Life (4)
Lecture/discussion—3 hours; term paper. Oral history methodologies and application to an in-depth oral history interview about Jewish life. Topics include oral history practices and ethics, immigration, migration, religious practice, ethnic relations, and community organization structures. Not open for credit to students who have completed Humanities 123. GE credit: SocSci, Wrt | SS—III.

Emeriti Faculty

Thomas A. Cahil, Ph.D., Professor Emeritus
John J. Carroll, III, Ph.D., Professor Emeritus
G. Stuart Pettypgrove, Professor Emeritus
Ruth Reck, Ph.D., Professor Emeritus
Roger H. Shaw, Ph.D., Professor Emeritus
Marilyn L. Shetron, Ph.D., Professor Emeritus
Su-Tzai Soong, Ph.D., Professor Emeritus
Bryan C. Weare, Ph.D., Professor Emeritus

Affiliated Faculty

Richard L. Snyder, Ph.D., Lecturer (Atmospheric Science) and Specialist in Cooperative Extension

Faculty—Hydrology

Susen Usin, Chairperson
Office. 1110 Plant and Environmental Sciences Building 330-752-1130

Helen Dahlke, Ph.D., Assistant Professor (Integrated Hydrological Sciences/Hydrologic Modeler)
Graham E. Fogg, Ph.D., Professor (Hydrogeology)
Mark E. Grimes, Ph.D., Professor (Hydrological Science, Biological and Agricultural Engineering)
Peter J. Hennes, Ph.D., Associate Professor (Hydrologic Science)
Jan W. Humpans, Ph.D., Professor (Vadose Zone Hydrology)
Gregory B. Pasternack, Ph.D., Professor (Watershed Hydrology)
Carlos E. Puentes, Ph.D., Professor (Hydrology)
Samuel Sandoval Soils, Ph.D., Assistant Professor (Hydrological Sciences/CE Specialist in Water Management)
Susan Usin, Ph.D., Professor (Environmental and Resource Sciences)

Emeriti Faculty

David A. Goldhamer, Ph.D., Lecturer Emeritus
Donald W. Grimes, Ph.D., Lecturer Emeritus
Theodore C. Hsiao, Ph.D., Professor Emeritus
Allen W. Knight, Ph.D., Professor Emeritus
Miguel A. Mariño, Ph.D., Professor Emeritus
Donald R. Nielsen, Ph.D., Professor Emeritus
Frank E. Robinson, Ph.D., Professor Emeritus
Verne H. Scott, Ph.D., Professor Emeritus

Affiliated Faculty

Stephen Grant, Ph.D., Lecturer (Hydrologic Science) and Specialist in Cooperative Extension
Timothy A. Hallett, Ph.D., Specialist in Cooperative Extension
Doug Mackay, Ph.D. Adjunct Professor (Hydrologic Science)

Lawrence J. Schwankl, Ph.D., Lecturer (Atmospheric Science)

Affiliated Faculty

A. Toby O’Gren, Ph.D. Specialist in Cooperative Extension

Faculty—Atmospheric Science

Michael J. Singer, Ph.D. Professor Emeritus
Richard D. Gratohn, Ph.D., Professor (Atmospheric Science)
Terrence R. Nathan, Ph.D., Professor (Atmospheric Science)

Affiliated Faculty

Michael J. Singer, Ph.D. Professor Emeritus
Richard D. Gratohn, Ph.D., Professor (Atmospheric Science)
Land, Air and Water Resources is a multidisciplinary department with faculty who specialize in atmospheric, environmental, soil, hydrology, and water engineering. Teaching and research focus on both agricultural forestry, natural ecosystems, climate change and environmental science.

The faculty contribute to numerous other undergraduate and graduate programs in the Colleges of Letters and Science, Engineering, and Agricultural and Environmental Sciences.

**Major Programs.** Undergraduates in the department major in Atmospheric Science, Environmental and Resources Sciences, Environmental Science and Management, and Hydrology, and Soil and Water Science; see http://lawr.ucdavis.edu/academic_programs.htm.

Undergraduate Advising Center is located in 1150 Plant and Environmental Sciences Building 530-752-1603.

Graduate Study. Graduate work is offered in the area of Atmospheric Science, Hydrologic Sciences, and Soils and Biogeochemistry. For detailed information, contact 530-752-1669 or see http://lawr.ucdavis.edu/academic_programs.htm.

Courses. See courses listed under Atmospheric Science, Hydrologic Sciences, Hydrology, Environmental and Resources Sciences, Environmental Science and Management, and Soil Science. See also the websites listed above.

**Landscape Architecture**

College of Agricultural and Environmental Sciences (Department of Human Ecology)

Paty Ebanks Owens, M.L.A., Chairperson, Human Ecology, Landscape Architecture, and Environmental Design

Elizabeth Boults, M.L.A., Continuing Lecturer

Steven E. Greco, Ph.D., Associate Professor

Eric Larsen, Ph.D., Associate Research Scientist

Jeff Loux, Ph.D., Associate Adjunct Professor

Brett Milligan, M.L.A., Assistant Professor

N. Claire Napawan, M.L.A., Assistant Professor

Lorenzo Oki, Ph.D., Associate Specialist in Cooperative Extension

Paty Ebanks Owens, M.L.A., Professor

David de la Pena, Ph.D., Assistant Professor

Michael Rios, Ph.D., Associate Professor

Sheryl Ann Simpson, Ph.D., Assistant Professor

Stephen Wheeler, Ph.D., Associate Professor

Emeriti Faculty

Mark Francis, M.L.A., Professor Emeritus

Dean MacCannell, Ph.D., Professor Emeritus

Health Massey, M.F.A., Professor Emerita

E. Byron McCulley, B.S.L.A., Continuing Lecturer

Edward S. McNiel, M.L.A., Senior Lecturer, SOE Emeritus

Robert L. Thayer, Jr., M.A., Professor Emeritus

**The Major Program**

Landscape architecture is planning and design of land areas where human use requires adaptation or conservation of the environment. Students who study landscape architecture are concerned about the welfare of the environment and the people who use and shape it. They are capable of solving physical problems and are able to visualize and think in terms of spaces and three-dimensional concepts. The program is fully accredited by the Landscape Architecture Accreditation Board (LAAB) which is the only architectural accreditation in the United States. The program was last reviewed in 2012.

**The Program.** The curriculum balances creativity and visual and spatial skills with technical expertise and a thorough background in physical, natural, and social sciences. Students develop profiency at problem solving relating to design of parks, public spaces, energy-efficient neighborhoods, land reclamation projects, city and regional planning, and landscape planning for wilderness and scenic regions, coastal and riparian environments, and agricultural landscapes. The program stresses a process-oriented approach to design and emphasizes environmental and community values.

**Preparatory Requirements.** Students are admitted to the landscape architecture major only after submitting a portfolio for review by the faculty. Contact the Landscape Architecture Advising Office for further information in 135 Hunt Hall 530-754-8628.

**Career Alternatives.** Graduates may find jobs in private landscape architecture firms or public agencies, non-profit organizations, and corporations employing landscape architects. The landscape architecture major provides the student with excellent preparation for graduate school or career development in a wide range of environmental and design-related fields.

B.S. Major Requirements:

**Preparatory Subject Matter.** 75-78

English Writing ....................... 4

Communication 1 .......................... 4

Biological Sciences 2A, 2B .......... 5

Environmental Horticulture 6 ....... 4

One course from: Mathematics 16A; Statistics 13; Computer Science 10 .......... 4

One course from: Chemistry 2A, 10; Physics 1A, 10; Geology 1; Geology 1 or Soil Science 103 ........................................... 5

Two courses satisfying Social Sciences general education requirement .... 8

Two courses satisfying Arts and Humanities general education requirement .... 8

Landscape Architecture 1, 2, 3, 21, 30, 50, 60, 70 It is strongly recommended that students register for these courses during their junior year and after completing Calculus.

**Depth Subject Matter.** 61

Landscape Architecture 160, 161, 170, 171 ............................................ 24

Three studios from Landscape Architecture 191 ........................................ 18

Honors alternative: Landscape Architecture 191; Landscape Architecture 102, Honors Thesis (landscape Architecture 199) ........ 20

Landscape Architecture 120 or 150 . 4

Landscape Architecture 190 [three quarters] ........................................... 3

Psychology 152 ................................ 4

Environmental Humanities, Science, and Engineering 133, 105 .............. 8

Restricted Electives ..................... 20

Select 20 units of upper division courses in consultation with adviser ........... 20

**Total Units for the Major** 158

**Major Adviser.** Stephen Wheeler

Advising Center is located in 135 Hunt Hall 530-754-8628.

**Graduate Study.** Graduate-level landscape architecture courses are available to students pursuing graduate programs compatible with or directed toward landscape management, planning, and design issues. Department faculty are active members of various professional societies, including Community Development, Geography, Transportation Technology and Policy and Ecology. Faculty members have expertise in many areas, including landscape history, social theory, practice of public space design, historic landscape preservation, city and regional planning, community participation in urban landscape design, landscape ecology, resource management, bioregionalism, and regenerative landscape systems.

Graduate students pursue more focused interests, expanding their professional expertise and/or constructing advanced research in landscape architecture or related disciplines.

**Courses in Landscape Architecture (LDA) Lower Division**

1. **Introduction to Environmental Design (4)**

   Lecture—3 hours; discussion—1 hour; term paper. Introduction to the role of design professionals in contributing to the built environment at a range of scales. Introduction to basic methods used by design professionals to evaluate design, plan, and manage landscapes and the built environment. Not open for credit to students who have taken course 40. GE credit: ArtHum or SciEng or SocSci, Wrt | AH or SE or SS, VL, WC, WE—II. (II) Napawan

2. **Place, Culture and Community (4)**

   Lecture—4 hours. Introduction to recognizing and reading cultural landscapes, and the application of cultural landscape meaning to the creation of contemporary built environments. Topics include patterns and influences relating to agriculture, military, transportation, housing, wilderness, recreation and tourism. GE credit: SocSci, Wrt | AGCH, SS, VL, WE—II. (II) Wheeler

3. **Sustainable Development: Theory and Practice (4)**

   Lecture—2 hours; extensive problem solving—2 hours, discussion—1 hour. Origins, theoretical perspectives, and practical applications of the concept of sustainable development at a range of scales (site, building, neighborhood, city, region, and nation) through lectures, sketch exercises, student projects, walking tours. GE credit: ArtHum, Wrt | AGCH, SS, VL, WE—II. (II) Wheeler

21. **Environmental Design Visualization (5)**

   Lecture—3 hours; laboratory/discussion—3 hours. Prerequisite: course 1. Restricted to Landscape Architecture majors. Introduction to the development of simple computer-aided drafting and expressive techniques. Introduction to computer-aided graphics techniques. GE credit: ArtHum | AH, VL, WE—II. (II)

23. **Computer Graphics for Landscape Architecture (4)**

   Studio—8 hours; two all-day field trips. Prerequisite: course 21. Landscape architectural communications explored through the construction of basic computer-aided drafting, drawing, rendering, desktop publishing, and photorealistic simulation.

30. **History of Environmental Design (4)**

   Lecture—2 hours; discussion—1 hour. Prerequisite: course 1. Pass a one restricted to Pre-Landscape Architecture and Landscape Architecture majors or consent of instructor. History of Environmental Design across disciplines, including landscape architecture, planning, community and urban design. GE credit: ArtHum, Wrt | AGCH, AH, VL, WE—II. (II)

50. **Site Ecology (4)**

   Lecture—2 hours; laboratory—2 hours. Prerequisite: Biological Sciences 1A, 2A or 10 or an introductory course in biology, botany, or plant science; priority given to Landscape Architecture majors. Introduction to ecological concepts, including nutrient dynamics, population regulation, community structure, ecosystem function. Principles will be applied to human activities such as biological conservation, ecological restoration, landscape planning, and management. Weekly laboratory devoted to field exercises in local ecosystems. GE credit: SciEng | SE, VL, WE—III. (III) Greco

60. **Landform and Grading Studio (6)**

   Studio—8 hours; extensive problem solving. Prerequisite: course 1, 21, 30, 70. Restricted to Landscape Architecture major. Introduction of landform and topography as landscape medium and utilization of grading and drainage to design meaningful and functional spaces. Introduction to site analysis, site planning, and the conventions of grading & drain-
Landscape Architecture

Prerequisite: consent of instructor. (P/NP grading)

Landscape Architecture (1-5)

99. Special Study for Undergraduates in Landscape Architecture majors. Introduction to basic principles of design towards the creation of space. Introduction to design methodologies and skills necessary to define, manipulate, and represent the built environment. Workshops in 2D computer graphic techniques and 3D physical modeling making will reinforce design principles. GE credit: ArtHum or SciEng | AH, OL, VL, WE.—II. (III.) Rios

98. Directed Group Study in Landscape Architecture (1-5)

Prerequisite: consent of instructor. Directed group study. (P/NP grading only)

99. Special Study for Undergraduates in Landscape Architecture (1-5)

Prerequisite: consent of instructor. (P/NP grading only)

Upper Division

102. Methods in Design and Landscape Research (4)

Seminar—4 hours; term paper. Prerequisite: course 170, 171, 172, 180. Restricted to Landscape Architecture majors only. Introduction to landscape research. Lectures provide a historical overview of research methodology. GE credit: ArtHum | AH, OL, VL, WE.—II. (II.) Owens

120. Advanced Computer Applications (4)

Studio—8 hours; two-all day field trips. Prerequisite: course 21, 30, 50, 70. Open to Landscape Architecture majors. Application of 3D modeling and rendering skills in landscape architecture. GE credit: ArtHum | AH, OL, VL, WE.—I. (I.) McClure

140. Green Building, Design, and Materials (4)

Lecture—2 hours; laboratory—4 hours. Prerequisite: course 21, 30, 50, 70. Restricted to Landscape Architecture majors only. Sustainable design and construction techniques in site and building scale. Studio work using computer-aided design, geographic information systems, and other advanced computer programs. (III.) McNeil

160. Design and Build Studio (6)

Studio—8 hours; extensive problem solving; fieldwork. Prerequisite: course 1, 2, 3, 21, 30, 50, 70. Restricted to Landscape Architecture majors. Introduction to the spatial design and construction of small-scale projects. Hands-on approach to learning and understanding design (concrete, and stone) and methods in landscape construction, and the application of technical skills (including detailing, cost estimation, and specifications). GE credit: ArtHum or SciEng | AH, OL, VL.—I. (I.) Greco, Upadhyaya

161. Technology 3: Professional Practice and Construction Documents (4)

Studio—8 hours. Prerequisite: courses 21, 23, 60 and 160. Legal documents and applications for various systems by which landscape construction may be developed. Student teams will develop detailed proposals for real-world sites. GE credit: ArtHum or SciEng | AH, OL, VL.—I. (I.) McCuller

170. Site Planning and Design Studio (6)

Studio—8 hours. Prerequisite: course 21, 30, 50, 70. Open to Landscape Architecture majors. Application of place-making and design skills in local landscapes. Site analysis of social and environmental conditions in the field. Lectures link design projects to contemporary theories and practices. Includes workshops in computer-aided drafting. GE credit: ArtHum | AH, OL, VL.—I. (I.) Greco

171. Urban Design and Planning Studio (6)

Studio—8 hours. Prerequisite: course 21, 30, 50, 70. Restricted to Landscape Architecture majors. Studio devoted to designing urban landscapes at regional, sub-regional, and neighborhood scales. Focuses on understanding complex social, economic, and environmental factors, developing sustainability principles and applying them through design and policy. GE credit: ArtHum | ACGH, AH, OL, VL.—II., III. (II., III.)

180. Advanced Design and Planning Studio (6)

Studio—8 hours; fieldwork; extensive problem solving. Prerequisite: course 60, 160, 170, 171, 172. Restricted to Landscape Architecture majors or consent of instructor. Application of advanced theories and methods of design and planning to real-world projects. May be repeated for up to 18 units of credit. GE credit: ArtHum or SciEng | AH, OL, VL.—I, II, III. (I, II, III.)

180A. Special Topics in Landscape Architecture: Urban Design (2)

Lecture—2 hours. Prerequisite: upper division standing. Theories and methods of urban and community design. Offered in alternate years. GE credit: SciEng | ACGH, SS.—I. (I.) Loux

180B. Special Topics in Landscape Architecture: Social Factors in Landscape Architecture (2)

Lecture—2 hours. Prerequisite: upper division standing. Concepts in environmental psychology as they relate to landscape architecture. Discussion of needs of various user groups of a land area. Introduction to past occupancy evaluations. Open to alternate years. GE credit: SciEng | ACGH, SS.—II. (II.) Loux

180C. Special Topics in Landscape Architecture: Art of the Environment (2)

Lecture—2 hours. Prerequisite: courses 1 and 30. Priority given to Landscape Architecture and Design majors. Introduction to environmental art. Encouragement of critical thinking about the interaction of art and landscape and environmental issues. Offered in alternate years. (I.) Greco

180F. Special Topics in Landscape Architecture: Landscape Ecology (2)

Lecture—2 hours. Prerequisite: course 50 or an introductory course in Ecology. Theories, major concepts and research methods of landscape ecology. Spatial structure, function and dynamics of various landscape types. Biological conservation, ecological restoration, and landscape planning, design, and management. Not open for credit to students who have taken Landscape Architecture 183. Offered in alternate years. GE credit: SciEng | SE, WE.—II. (II.) Greco

180G. Special Topics in Landscape Architecture: Landscape and Regional Land Planning (2)

Lecture—2 hours. Prerequisite: upper division standing. Theories, laws, and practices of community planning. Creation of livable and sustainable communities and natural landscapes. Smart growth, new urbanism, neo-traditional town planning, transit-oriented, and sustainable communities. Traditional neighborhood planning vs. participatory planning and design approaches. Offered in alternate years. GE credit: SciEng | ACGH, SS.—II. (II.) Loux, Wheeler

180L. Special Topics in Landscape Architecture: Regenerative Landscape Systems (2)

Lecture—2 hours. Prerequisite: courses 1 and 30. Priority given to Landscape Architecture majors. Theories, basic techniques and applications for various systems by which landscape construction may be developed. Focuses on understanding complex social, economic, and environmental factors, developing sustainability principles and applying them through design and policy. GE credit: SciEng | ACGH, SS.—II. (II.) Loux, Wheeler

180P. Special Topics in Landscape Architecture: Community Participation in Design (2)

Lecture—2 hours. Prerequisite: upper division standing. History and role of community participation in landscape design; methods of community involvement, including workshops techniques. Introduction to design processes, including public participation. Offered in alternate years. GE credit: SciEng | ACGH, SS.—I. (I.) Loux

180Q. Special Topics in Landscape Architecture: Public Space (2)

Lecture—2 hours. Prerequisite: upper division standing. Critical study of public spaces, including parks, plazas, playgrounds, greenways and community gardens. Current issues associated with design and management of the public environment of cities. Offered in alternate years. GE credit: SciEng | ACGH, SS.—II. (II.) Loux

180V. Special Topics in Landscape Architecture: Urban and Community Design (2)

Lecture—2 hours. Prerequisite: upper division standing. Theories and methods of community and neighborhood design. Past and contemporary approaches including new urbanism, planned unit development, mixed use, pedestrian and transit-oriented development. Issues of open space and community form. Offered in alternate years.

Quarter Offered: I-Fall, II-Winter, III-Spring, IV-Summer; 2015-2016 offering in parentheses

Fall 2011 and on Revised General Education (GE): ArtHum—Arts and Humanities; SciEng—Science and Engineering; SocSci—Social Sciences; Div-Domestic Diversity; WRW—Writing Experience

ACGH—American Cultures; DD—Domestic Diversity; OL—Oral Skills; QL—Quantitative; SL—Scientific; VL—Visual; WC—World Cultures; WE—Writing Experience
180N. Special Topics in Landscape Architecture: Planting Design (2)
Lecture—2 hours. Prerequisite: upper division standing in Environmental Horticulture 6. Develop an understanding of the sensory, visual and functional importance of plants in the landscape. Visualization and design of planting landscapes. Development of planting plans. Offered in alternate years. Not open for credit to students who have taken course 156. 180O. Special Topics in Landscape Architecture: Current Issues in Landscape Architecture (2)
Lecture—2 hours. Prerequisite: course 1 and 30. Priority will be given to Landscape Architecture and Design majors. Study of current issues in landscape architecture with emphasis on design and/or design history. Offered in alternate years.
180P. Special Topics in Landscape Architecture: Water in Community Planning and Design (2)
Lecture—2 hours. Prerequisite: course 50 or equivalent with consent of instructor. Upper division standing or above. Priority given to Landscape Architecture majors. Theories, policies, methods, and resources related to the integration of water resource systems with urban/community planning and landscape design including water use/demand, quality, treatment, conservation, and storm water management. Offered in alternate years.—Loux, M.
180Q. Historic Preservation (2)
Lecture—2 hours. Prerequisite: upper division standing. Priority given to Landscape Architecture majors. Roots and present focus of historic preservation movements, current philosophies and laws governing preservation, restoration, and revitalization as they affect landscape architects. Offered in alternate years.—(I, II, III) McNiel

181A. Postmodern Landscapes Design and Planning Studio (3)
Studio—6 hours; one field trip required. Prerequisite: course 170; course 180A concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180A. Offered in alternate years.
181C. Art of the Environment Design and Planning Studio (3)
Studio—6 hours; one field trip required. Prerequisite: course 170; course 180A concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180C. Offered in alternate years.—Masey, S.
181F. Landscape Ecology Design and Planning Studio (3)
Studio—6 hours. Prerequisite: course 170; 180F must be taken concurrently. Priority to Landscape Architecture majors. Design theory and methods to real-world projects in ecology. Ecological principles and their application in biological conservation, ecological restoration, and landscape planning, design, and management. Field required. Offered in alternate years. GE credit: SciEng | OL, VL, SE.—I, Greco
181G. Special Topics in Landscape Architecture: Landscape and Regional Land Planning Studio (3)
Studio—6 hours. Prerequisite: course 170, course 181G concurrently. Applications of recent models and practices of urban planning and design to create vibrant and sustainable cities, towns, villages, rural, and natural landscapes. Testing of models by creating plans and designs for new communities, and for urban infill, restoration or redevelopment projects. Field trip required. Offered in alternate years. GE credit: VL.—Loux, Wheeler
181H. Bioregional Landscape Design and Planning Studio (3)
Studio—6 hours; one field trip required. Prerequisite: course 170; 180H must be taken concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180H. Offered in alternate years.

181L. Regenerative Landscape Systems Design and Planning Studio (3)
Studio—6 hours; one field trip required. Prerequisite: course 170; course 180L concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180L. Offered in alternate years.

181J. Community Participation in Design: Design and Planning Studio (3)
Studio—6 hours; one field trip required. Prerequisite: course 170; course 180J concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180J. Offered in alternate years.

181M. Urban and Community Design: Design and Planning Studio (3)
Studio—6 hours; one field trip required. Prerequisite: course 170; course 180M concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180M. Offered in alternate years.

181N, 181P. Special Topics in Landscape Architecture: Social Factors in Landscape Architecture (2)
Lecture—2 hours. Prerequisite: Psychology 155 and upper division standing. Concepts in environmental psychology as they relate to landscape architecture. Discussion of needs of various user groups of a land area. Introduction to post occupancy evaluations. Offered in alternate years. GE credit: DD, OL, VL.—Owens

181Q. Current Issues Design and Planning Studio (3)
Studio—6 hours; one field trip required. Prerequisite: course 170; course 180Q concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180Q. Offered in alternate years.

181R. Special Topics in Landscape Architecture: Water in Community Planning and Design Studio (3)
Studio—6 hours. Prerequisite: courses 50 and 61 (or equivalent courses with consent of instructor); course 170; course 180R concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180R. Offered in alternate years.

181S. Special Topics in Landscape Architecture: Historic Preservation Studio (3)
Studio—6 hours. Prerequisite: junior standing in the Landscape Architecture course 180S to be taken concurrently. Methods and tools currently used by professional preservation architects and planners, including inventory and evaluation methods and traditional architectural design approaches. Field trip required. Offered in alternate years.—I, II, III, (I, II, III) McNiel

190. Proseminar in Landscape Architecture (1)
Seminar—1 hour. Lectures and discussion of critical issues in landscape architecture. May be repeated three times for credit. (P/NP grading only)—I, II, III, (I, II, III)

191. Landscape Architecture Planning & Design Studio (2)
Seminar—1 hour; workshop—3 hours. Prerequisite: course 1, 70, and 170 or consent of instructor. Priority to Landscape Architecture majors. Faculty initiated workshops featuring advanced studies and applications of original work in landscape architecture. May be repeated for up to 20 units of credit.—I, II, III, (I, II, III)

192. Internship in Landscape Architecture (1-12)
Internship. Prerequisite: senior standing in Landscape Architecture. Professional field experience in landscape architecture. May be repeated for a total of 12 units. (P/NP grading only.)

193A. Senior Project in Landscape Architecture (3)
Studio—6 hours. Prerequisite: senior standing in Landscape Architecture. Projects will focus on a critical area of landscape architectural design, planning, analysis, communication, or research. Limited enrollment. Required of all Landscape Architecture majors. (P/NP grading only)—I, II, III

193B. Senior Project in Landscape Architecture (4)
Studio—8 hours. Prerequisite: course 193A and senior standing in Landscape Architecture. Projects will focus on a critical area of landscape architectural design, planning, analysis, communication, or research. Limited enrollment. Required of all Landscape Architecture majors. (P/NP grading only)—I, II, III

197T. Tutoring in Landscape Architecture (1-5)
Tutoring—3-15 hours. Prerequisite: consent of instructor. Directed group study. (P/NP grading only)

198. Directed Group Study in Landscape Architecture (1-5)
Prerequisite: consent of instructor. Directed group study. (P/NP grading only)

199. Special Study for Advanced Undergraduates in Landscape Architecture (1-5)
Prerequisite: consent of instructor. (P/NP grading only)

Graduate
200. Citizenship, Democracy, & Public Space (4)
Seminar—4 hours. Prerequisite: graduate standing or consent of instructor. Introduction to seminal works in political theory, philosophy, and the social sciences that focus on citizenship and the public sphere; development of critical perspective regarding restructurings of public space in a pluralistic and global culture; discussion of contemporary case studies. (Same course as Geography 230.)—I, II, III

201. Theory and Philosophy of the Designed Environment (4)
Seminar—4 hours. Prerequisite: course 140 or the equivalent, graduate standing or consent of instructor. Examines the major theories of environmental design. Epistemology of design serves as framework to examine modern landscape architecture, architecture, urban design and planning. Normative theories of design are reviewed along with the social and environmental sciences. Offered in alternate years.—II, Rios

202. Methods in Design and Landscape Research (4)
Seminar—4 hours. Prerequisite: Statistics 102 or the equivalent, graduate standing or consent of instructor. Explores methods of the research and advanced design and planning methods employed in landscape architecture. Exercises provide the student...
204. Case Studies in Landscape Design and Research (4)
Seminar—4 hours; field trip required. Prerequisite: graduate standing in Landscape Architecture, Ecologi-
gy, Geography or Community Development or con-
sent of instructor. Real-world designed environment
situations where creative activity and/or basic
research is the primary product. Advanced land-
scape problems will be utilized at the site, urban or
rural scale. Offered in alternate years.

205. Physical Planning and Design (4)
Lecture—2 hours; discussion—2 hours. Limited to
graduate students. Regulation, design, and develop-
ment of urbanized landscape, planning and land-
development processes, zoning and subdivision reg-
ulation, site planning, urban design goals and meth-
ods, public participation strategies, creatively
designing landscapes to meet community and/or
ecological goals. [Same course as Geography 233.]
Offered irregularly.—Wheeler

210. Advanced Landscape Architecture Studio (4)
Laboratory—8 hours. Prerequisite: course 113 or the
equivalent; graduate standing or consent of instruc-
tor. Exposes students to real-world, designed environ-
ment situations where creative activity and/or basic
research is the primary product. Advanced land-
scape problems will be utilized at the site, urban or
rural scale. Offered in alternate years.

220. Public Space and Culture (3)
Seminar—3 hours. Prerequisite: course 182 or the
equivalent; graduate standing or consent of instruc-
tor. Explores the public environment of cities includ-
ing their streets, parks, and squares. Public life and
culture of American cities is examined and design
responses to this culture evaluated. Typology is used
to identify spaces. Offered in alternate years.

230. Landscape and Memory (4)
Seminar—4 hours; term paper. Prerequisite: gradu-
ate standing or consent of instructor. Theories of
memory from other fields (critical theory, psycho-
analysis, history) applied to landscape design, espe-
cially heritage and tourist sites. The relationships
between place, memorial, and event. Offered in
alternate years.

240. Historic, Cultural Landscapes: Concept,
Perception, Preservation (4)
Seminar—4 hours. Prerequisite: graduate standing
or consent of instructor. Historic cultural landscapes,
as defined by the National Register of Historic
Places. Identification and analysis of aerial extent,
structured makeup, integrity, and historical signifi-
cance using common and emerging methods and
tools. Offered in alternate years.—McNiel

250. Life-Place: Bioregional Theory and
Principles (4)
Seminar—3 hours; tutorial—1 hour. Prerequisite:
graduate standing or consent of instructor. The
emerging concept of bioregionalism as a hypothe-
sis for environmental quality, theoretical structures
and practical methods by which individuals and groups
identify with naturally-bounded “life-places” or “biore-
gionales” and strive to live respectfully and recip-
rocally within them. Offered in alternate years.

260. Landscape and Power (4)
Seminar—4 hours. Prerequisite: graduate standing
or consent of instructor. How various representations
of landscapes have been worked as agents of cultural
power. Course framework is interdisciplinary,
including studies of landscape representation in
literature, art, photography, cartography, cinema, and
landscape architecture. [Same course as Geolo-
gy 252.]—I. (J.) Schenker

270. Environment and Behavior (4)
Seminar—3 hours; tutorial—1 hour. Prerequisite:
graduate standing or consent of instructor; Psychol-
ogy 144 recommended. Factors that influence human
interaction with their surroundings and the
mechanisms used for recognizing and addressing
general and specific human needs in community
development and design decisions. Offered in alter-
ate years.

280. Landscape Conservation (3)
Seminar—3 hours. Prerequisite: contact department
for prerequisite courses; graduate standing or con-
sent of instructor. Focus is on land planning, design,
and management techniques to further the goal of
resource preservation. Examines current critical the-
ory in the establishment and management of conser-
vation areas. Offered in alternate years.—II. Greco

290. Graduate Seminar in Landscape Architecture (2)
Seminar—2 hours. Prerequisite: graduate standing
and consent of instructor. Seminar on selected topics
in landscape architecture research, analysis, plan-
ning, design, communication, or education. May
be repeated for credit. (S/U grading only)

297. Practicum in Landscape Architecture (1-10)
Independent study—1-10 hours. Prerequisite: gradu-
ate standing and consent of instructor. Opportunity
for students to work directly in the field with academic-
ists at other institutions or with professionals in an
office setting. Gives experience beyond the confines
of campus and allows direct interaction with the
community. (S/U grading only)

298. Group Study (1-5)
Prerequisite: graduate standing and consent of
instructor. (S/U grading only)

299. Directed Individual Research for
Graduate Students (2)
Requires consent of instructor. May be repeated
for credit. (S/U grading only)

Professional

396. Teaching Assistant Training Practicum
(1-4)
Prerequisite: graduate standing. May be repeated
for credit. (S/U grading only)—I, II, III (I, II, III)

Landscape Restoration

[College of Agricultural and Environmental Sciences]
This minor is of particular interest to students major-
ing in Wild life, Fish, and Conservation Biology, Envi-
ronmental Science and Management, Landscape
Architecture, Biological Sciences, Evolution and
Ecology and Plant Biology, Biological Sciences 1C
or Plant Sciences 2 is a prerequisite to some courses
in the minor. The minor is sponsored by the Depar-
tment of Plant Sciences.

Minor Program Requirements:

UNITS
Landscape Restoration.............................. 19-25
Select one of Environmental Science and
Policy 155, Plant Biology 102, 117, 147,
Plant Sciences 144.......................... 4-5
Select one of Environmental Horticulture 100,
130, 133, Plant Biology 119, Plant
Sciences 124, 176
Soil Science 10 or 100......................... 3-5
Environmental Horticulture 160 and 160L
4
Select one of Environmental Horticulture 150,
Environmental Science and Policy 155,
Landscape Architecture 180F, 180H, 180l,
Plant Sciences 130, Wildlife, Fish, and
Conservation Biology 155.................... 2-4
Plant Sciences 192.......................... 3

Minor Adviser. T.P. Young (Plant Sciences)
Advising Center is located in 1224 Plant and
Environmental Sciences 530-752-7738.

Latin American and Hemispheric Studies

[College of Letters and Science]
Charles F. Walker, Ph.D., Program Director
Program Office, Hemispheric Institute on the
Americas, 1277 Social Sciences and Humanities
Building 530-752-3046

Committee in Charge
Jelmer Eerkens, Ph.D., Professor (Anthropology)
Liza Grandio, Ph.D., Associate Professor
[Native American Studies]
Luis Guarnizo, Ph.D., Professor
(Human and Community Development)
Erin Hamilton, Ph.D., Assistant Professor (Sociology)
Robert Irwin, Ph.D., Professor
(Spanish & Portuguese)
Robert Newcomb, Ph.D., Professor
(Spanish and Portuguese)
Betina Ng’weno, Ph.D., Associate Professor
[African American & African Studies]
Pablo Ortiz, Ph.D., Professor (Music)
Marc Schenker, Ph.D., Professor
[Medicine & Public Health]
Charles Walker, Ph.D., Professor (History)

The minor in Latin American and Hemispheric Stud-
ies offers students the opportunity to explore connec-
tions throughout the Western Hemisphere from an
array of perspectives across multiple academic
fields.

The minor is made up of six courses, arranged in
three tiers: Basic (one lower division course on the
history of Latin America); Core (two introductory
upper division courses chosen from a designated list
of fields other than History); and Elective (three addi-
tional upper division courses from a designated list
of courses that focus primarily on Latin American
and/or Hemispheric issues). Students are strongly
couraged to develop proficiency in Spanish or Portug-
esian, either through coursework (such as comple-
tion of Spanish 24 or 33), or through life experi-
ence such as study abroad.

Minor Program Requirements:

UNITS
Latin American and Hemispheric Studies
.................................................. 24
Basic Courses........................................ 4
One course from: History 7A, 7B, 7C core
courses.................................................. 8
One course each from two of the following
categories:
(a) Anthropology 144;
(b) Native American Studies 115;
(c) Spanish 150 or 151;
(d) Political Science 143
Elective Courses.................................. 12
Three courses selected from the following
list to achieve a total of 24 units: African
and African American Studies 107A, 155,
155, 163, 172, 180; Anthropology 130C, 146,
Art History 151; Chicano/a Studies 130,
160, Comparative Literature 151, 152,
165; Film Studies 185A; Music 127; Native
American Studies 110A, 110B, 110C,
110D, 120, 129, 131, 181A, 181B,
181C, 184; History 160, 162, 163A,
163B, 164, 165, 166A, 166B, 167, 168,
169A, 169B; Spanish 107A, 117, 149,
151, 153, 154, 155, 156, 157, 158,
159, 163, 170, 171, 172, 174, 175,
176, 177; Portuguese 109, 159, 161,
162, 163; Women’s Studies 80, 102

Quarter Offered: I=Fall; II=Winter; III=Spring; IV=Summer; 2015-2016 offering in parentheses
Pre-Fall 2011 General Education (GE): ArtHum—Arts and Humanities; ScieEng—Science and Engineering; SocSci—Social Sciences; Div= demás; DemDiv= Demographic Diversity; Wr= Writing Experience
Fall 2011 and on Revised General Education (GE): ArtHum—Arts and Humanities; ScieEng—Science and Engineering; SocSci—Social Sciences; Div= demás; DemDiv= Demographic Diversity; Wr= Writing Experience

ACGH=American Cultures; DD=Domestic Diversity; OL=Oral Skills; QL=Quantitative; SL=Scientific; VL=Visual; WC=World Cultures; WE=Writing Experience
200. Introduction to Law (1)
Discussion—1 hour. Introduction to basic concepts of the law, the historical roots of common law and equity, the present system in its practical operation, the modes of reasoning used by courts and attorneys, and the ethical standards of statutory interpretation. (S/U grading only.)

200A. Introduction to the Law of the United States (2)
Discussion—2 hours. History and fundamental principles of the United States’s legal system. Important current legal issues, developments and trends. Required for LLM. Students who have not attended a U.S. law school. Fall semester only. (S/U grading only.)

201. Property (4)
Discussion—4 hours. A study of doctrines and concepts of property law with primary emphasis on real property. Course coverage includes: the estates in land system; the landlord-tenant relationship, conveyancing, and private and public land use control.

202. Contracts (5)
Discussion—5 hours. Examine sorts of promises that are enforced and the nature of protection given to parties. Consider possible effects of reliance on broken promises and remedies for harm done to intangible interests.

203. Civil Procedure (5)
Discussion—5 hours. A study of the fundamental and recurrent problems in civil actions including the methods used by federal and state courts to resolve civil disputes.

204. Torts (5)
Discussion—5 hours. Familiarizes students with legal rules, concepts and approaches pertinent to the recovery for personal injuries, property damages and harm done to intangible interests.

205. Constitutional Law I (4)
Discussion—4 hours. The principles, doctrines and controversies regarding the basic structure of government and division of powers in American government. Specific topics include judicial review, jurisdiction, standing to sue, federalism, federal and state powers and immunities, and the separation of powers among the branches of the federal government.

206. Criminal Law (3)
Discussion—3 hours. Study of the bases and limits of criminal liability. Coverage of the constitutional, statutory, and case law rules which define, limit, and provide defenses to individuals liability for the major criminal offenses.

207. Legal Research and Writing I (2)
Discussion/labatory—2 hours. This fall semester course taught by Wylick Program Fellow faculty is an integrated legal research and writing skills course. Basic legal research resources and strategies are introduced and practiced.

207A. Legal Research (LLM) (1)
Discussion—1 hour. A description of the evolution and use of sources of law and secondary authority. LLM students only.

208. Legal Research and Writing II (2)
Discussion—2 hours. Focuses on persuasive writing and oral advocacy. Students will complete integrated research and writing assignments, including a complaint, a strategic defense office memorandum, a motion to dismiss in federal court, and an appellate brief, with oral arguments by all students.

Second and Third Year Courses
(c) Constitutional Law: 216A, 218, 240, 288A
(e) Estate Planning: 214, 223, 221
(g) Family Law: 225, 242, 272, 435
(k) Individual and Group Study: 411A, 418, 416, 417, 418, 419, 498, 499
(o) Legal Theories and Ethics: 220T, 237, 250, 258, 259, 284, 286C, 286D
(u) Clinical Programs: 425, 430, 440, 455, 460, 470
(v) Clinical Programs-InHouse Clinics: 420, 430, 440, 480, 485
210. Criminal Justice Administration Seminar (2)
Seminar—2 hours. This course compares U.S. criminal procedure with that of other countries, particularly the differing roles of the prosecutor, defense counsel, and the judge. Limited enrollment.

210A. Police Seminar (2) 
Seminar—2 hours. Restricted to 10 students. What are the expectations and roles of the police in a democratic society? We need order maintenance and crime control, but to assume these tasks the police must sometimes intrude upon interests considered fundamental to free societies.

210B. Sociology of Criminal Procedure (2) 
Seminar—2 hours. Limited enrollment. What are the expectations and roles of the police in a democratic society? We need order maintenance and crime control, but to assume these tasks the police sometimes intrude upon interests considered fundamental to free societies.

211. Negotiation (2) 
Discussion—2 hours. Limited enrollment. Skills course teaches theoretical and empirical approaches to negotiation strategy for the purposes of making deals and resolving disputes. Students participate in simulations to hone their negotiation skills, and write analytical papers.

211A. Advanced Negotiation Strategy and Client Counseling (3) 
Discussion—3 hours. Prerequisite: consent of instructor. Application Course. Must apply and secure professor’s approval to enroll. Will involve participating in discussions and a series of simulations. Your classmates will be counting on you to actively participate and be well prepared for every simulation. Do not apply to take this course unless you are willing and able to participate fully and can accept constructive feedback. If you anticipate missing more than two class sessions, do not apply to take this course.

211B. Medical Liability Law and Policy (2) 
Discussion—2 hours. This course will consider the many ways in which society seeks to establish and maintain quality in patient care.

213T. Terrorism and International Law (2) 
Seminar—2 hours. Terrorism remains a pressing concern. Developing effective remedies for responding to it within the bounds of the law is critical. Therefore, the new generation of international lawyers needs to be familiar with the relevant law and standards.

214. Estate and Gift Tax (3) 
Discussion—3 hours. Prerequisite: course 220; course 221 recommended. Fundamentals of federal taxation, including the estate tax, the gift tax, and the generation-skipping transfer tax.

215. Business Organizations (4) 
Discussion—4 hours. Legal rules and concepts applicable to business associations, both public and closely held. Corporate form of organization, partnerships, and other associational forms.

215A. The Law of Corporate Governance Seminar (2) 
Seminar—2 hours. Prerequisite: course 215. Advanced issues in the governance of publicly held corporations. Separation of ownership and control and how the law has addressed this issue at the theoretical level and in the context of topics such as the duties of corporate directors, shareholder voting rights, and competition among states to attract corporate charters.

215S. Special Session Business Associations (4) 
Discussion—4 hours. Provides a broad survey of the legal rules and concepts applicable to business associations, both public and closely held.

216A. Law and Religion (2) 
Discussion—2 hours. Restricted to 20 students. Federal constitutional law relating to religion; the interpretation and application of the Free Exercise Clause and the Establishment Clause of the First Amendment.

217. Telecommunications Law (3) 
Discussion—3 hours. Economic and administrative regulation of telephony, radio and television broadcasting, and video technologies such as cable and direct broadcast satellites. Emphasis on the recently enacted Telecommunications Reform Act and the role of the Federal Communications Commission, as well as other sources of regulation such as related antitrust law and state public utility regulation.

218. Constitutional Law II (4) 
Discussion—4 hours. Students who have completed course 218A or course 218B may not take this course. Principles of the First Amendment and the Equal Protection Clause.

218A. Constitutional Law II—Equal Protection (2) 
Discussion—2 hours. Students who have previously taken course 218A or who plan to take course 218 for 4 units in Spring 2011, may not take this course. Students enrolled in this course will be given priority registration spring semester 2011 to enroll in course 218B. Federal and Equal Protection Clause of the Fourteenth Amendment.

218B. Constitutional Law II—First Amendment (2) 
Discussion—2 hours. Students who have previously taken course 218A or who plan to take course 218 for 4 units in Spring 2011 may not take this course. Students not required to take course 218A in order to take this course. Principally covers the free speech clause of the First Amendment.

218T. Selected Topics in Constitutional Law (2) 
Seminar—2 hours. Examines two core themes of Constitutional Law I and Federal Jurisdiction: federalism and separation of powers. Concentrates on habeas corpus and the Eleventh Amendment as vehicles for examining the constitutional themes in greater depth.

218A. Separation of Powers (2) 
Discussion—2 hours. Study of the separation of powers in our federal government by focusing on certain historical events and their impact on constitutional law.

218B. Law of War (3) 
Discussion—3 hours. Surveys the law of armed conflict as it applies to today’s battlefield.

218C. Antidiscrimination Law (4) 
Discussion—4 hours. Course offers an overview of federal constitutional and statutory antidiscrimination law in the United States.

219. Evidence (4) 
Discussion—4 hours. Covers rules regarding the admissibility of testimonial and documentary evidence during the trial of civil and criminal cases, including rules governing relevancy, hearsay, the examination and impeachment of witnesses, expert opinion, and constitutional and statutory privileges.

219A. Advanced Evidence (3) 
Discussion—3 hours. Prerequisite: course 219. Limited to six students; selected by professor. Interested students complete an application form; available in the Law Registrar’s Office. Credit is contingent on attending all classes and participating in all exercises. Participation is crucial to the success of the course, as students will be working in teams of three. Do not take this course unless you are willing and able to participate fully and can accept criticism. Public interest lawyers often spend much time in the courtroom. Prosecution, defendant, and legal aid offices usually don’t have resources to hire lawyers in trial work. Seeks to help remedy this deficiency by helping develop witness interrogation skills. (S/U grading only)

220. Federal Income Taxation (4) 
Discussion—3 hours. Surveys the federal income tax system, with consideration of the nature of income, when and to whom income is taxable, exclusions from the tax base, deductions and credits, and tax consequences of property ownership and disposition.

220A. Federal Income Taxation (3) 
Discussion—3 hours. Surveys the federal income tax system, with consideration of the nature of income, when and to whom income is taxable, exclusions from the tax base, deductions and credits, and tax consequences of property ownership and disposition.

220B. Tax and Distributional Justice (2) 
Discussion—3 hours. Advanced tax course designed to introduce students to issues of tax policy, with particular emphasis on tax distribution (i.e., who or what should pay taxes in society) and tax incidence (i.e., who or what ends up paying taxes in society).

220BT. Law of Banking and Financial Institutions (2) 
Discussion—2 hours. Guides to dual regulatory system, and an understanding of banks and other financial institutions, such as thrifts, credit unions, industrial banks, finance companies, and money transmitters, as well as large versus community banks.

220S. Special Session Federal Income Taxes—Div 2 (2) 
Discussion—2 hours. Introduction to the basic principles of federal income taxation using the American federal tax model. Topics include identification of income subject to taxation, gains and losses from property transactions, the timing of income and deductions and the identity of people subject to tax on particular items of income.

220T. State and Local Taxation (3) 
Discussion—3 hours. Introduction to fundamentals of state and local taxation. Beginning with historical and constitutional aspects, students will analyze recent developments in state and local taxation and their impact on client representation.

221. Trusts, Wills and Decedents’ Estates (3) 
Discussion—3 hours. Study of the law of decedent’s estates, wills, and trusts.

222. Critical Race Theory Seminar (3) 
Discussion—3 hours. Examines race relations and racial discrimination in America through the perspectives of proponents of the Critical Race Theory
222A. Accounting for Lawyers (2)
Discussion—2 hours. Exposes student to basic principles of accounting, from the perspective of the practicing attorney.

222B. Law and Statistics (3)
Discussion—3 hours. Introduction to fundamentals of statistical analysis and how statistical analysis is used in the law and public policy. Course goal is to help students become excellent consumers of statistical information and evidence.

229. Scientific Evidence (3)
Discussion—3 hours. Prerequisite: course 219. In addition to examining the evidence law governing the admission of evidence, this course considers trial advocacy in presenting and attacking such testimony. Limited enrollment.

230. International Environmental Law (3)
Discussion—3 hours. Prerequisite: prior course work in environmental law and/or international law is helpful. Course may be taken for credit only once. Course is offered in the fall and the spring. May satisfy Advanced Writing Requirement with professor’s permission. Provides an introduction to the core principles and basic principles of international environmental law and policy.

231. Sex Based Discrimination (3)
Discussion—3 hours. Issues raised by legal and social distinctions between men and women. Explores potential remedies for discrimination drawn from constitutional law, statutory enactments, and common law developments. Subject matter areas include sex-based discrimination in constitutional law, family law, reproductive rights, educational opportunity, criminal law, and employment.

231A. Sexual Orientation, Gender Identity, and the Law (2)
Discussion—2 hours. Examines the legal and social regulation of sexual orientation and gender identity.

232. Real Estate Finance (2)
Discussion—2 hours. An introduction to fundamentals of real estate, and of lender remedies in the event of debtor default. The practical application of California legal doctrines.

233. Property Law & Race (2)
Seminar—2 hours. Seminar explores the extent to which property law (both federal, state, and local statutes, and administration regulations) historically impacted and currently shapes conceptions of race, racial groups, and racial relations.

234. Administrative Law (3)
Discussion—3 hours. The U.S. Constitution and the federal Administrative Procedure Act constrain and regulate decision making by government agencies and officials.

236. Securities Regulations (3)

236A. Securities Regulation (2)
Discussion—2 hours. Prerequisite: course 215 or consent of instructor. Legal rules and concepts applicable to business associations, both public and closely held. Complex issues of organization, partnership and other associations.

236B. Securities Regulation II (2)
Discussion—2 hours. Prerequisite: course 215 or consent of instructor; course 236A recommended. Securities Exchanges and Regulation of the regulation of securities markets. Topics covered include regulation of securities markets and securities professionals, responsibilities of securities lawyers, continuous reporting, transactional securities fraud, and enforcement of the securities acts.

239. Mediation: Theory and Practice (3)
Discussion—3 hours. Prerequisite: course 211, 297. The basic, practical knowledge necessary to begin a mediation practice. Detailed understanding of the mediation process to counsel clients knowledgeably about the mediation option and represent clients ably in mediation. Comprehensive, development of the ability to analyze disputes to understand why negotiations succeed or fail, and understanding of the advantages and limitations of mediation as a method of resolving disputes. The stages of a mediation: contracting (establishing contact with the parties and explaining the process), developing the issues, working the conflict, resolving the conflict, and closure. Limited enrollment.

240. Elections and Political Campaigns (2)
Discussion—2 hours. Covers selected constitutional and statutory aspects of federal and state elections, including campaign finance, initiatives, and other topical issues. Limited enrollment.

244. Commercial and Bankruptcy Law (4)
Discussion—4 hours. The business debtor who doesn’t have enough money (or is unwilling) to pay his debts. Remedies available to creditors to force payment, along with devices that creditors may use to give themselves priority against limited assets. Examination of the role of bankruptcy. Bankruptcy as both a means for providing funds for creditors, and as a device for maximizing asset value.

245. Corporate and White Collar Crime (3)
Discussion—3 hours. The law of conspiracy, corporate criminal liability, mail and wire fraud, RICO, money laundering, and environmental crimes and associated defenses.

Seminar—2 hours. Offers overview of the constitu-
law governing the death penalty in the United States.
ized disciplines.
246. Federal Jurisdiction (3)
Discussion—3 hours. Prerequisite: course 205. A study of subject-matter jurisdiction of federal courts.
247A. International Aspects of U.S. Taxation (3)
Discussion—3 hours. Prerequisite: course 220. Study of the federal tax treatment of partner-
ship and partnerships, including entities classified as partnerships.
247A. International Aspects of U.S. Taxation (3)
Discussion—3 hours. Prerequisite: course 220. Completion or current enrollment in a course covering the
domestic taxation of corporations is suggested but not required. Corporate tax may be taken concur-
rently. Examine the U.S. income tax laws and poli-
cies related to the taxation of foreign income of U.S.
persons and U.S. income of foreign person.
247B. Corporate Tax (3)
Discussion/laboratory—2 hours. Examination of the federal income tax relationship between corpora-
tions and their owners. Covers the transfer of funds into a corporation on formation and the re-transfer of
money and property from the corporation to its shareholders.
248. Public International Law (3)
Discussion—3 hours. Introductory course covers basic international law concepts and the law-making
process.
248A. Jurisdiction in Cyberspace Seminar (2)
Seminar—2 hours. Review concepts in international law, conflicts of law, cyberlaw, and federal jurisdic-
tion to address the growing multi-jurisdictional con-
flits created by the Internet. Examine European
efforts at crafting intra-European jurisdictional rules, as
well as other international jurisdiction treaty projects
such as those at the Hague. Limited enrollment. GE
credit: Win.
248B. International Human Rights (2)
Discussion—2 hours. Introduces international human
rights legal system through an examination of its his-
torical origins and precursors and a review of its
international legal backdrop, including the character
and sources of international law, the UN Charter
and the UN system.
248BT. Advanced International Law (3)
Discussion—3 hour. Prerequisite: basic course in international law or consent of instructor. Review
books of international law; Hugo Grotius and Judge
Rosalyn Higgins. The careful resolu-
don of disputes, law of war and peace, and interna-
tional legal process. GE credit: WE
248TC. International Economics Law (3)
Discussion—3 hours. This course will examine the architecture of the international economic system,
with a focus on business models and investment.
248TT. Theories of International Law (2)
Discussion—2 hours. International law, once cri-
tiqued as powerless and ineffective, is now chal-
enged as a threat to American democracy. An intro-
duction to competing theories of international law,
including natural law, positivism, realism, liberal-
ism, constructivism, fairness, legal process, and
world public order.
249. Comparative Law (3)
Discussion—3 hours. The uses of comparative
method, principal differences between common law
and civil law and the styles of legal reasoning that
prevail in these two great legal cultures. Topics
include the evolution of the civil law, the phenome-
non of codification, the structure of European civil
codes and the interpretation of their provisions,
the respective roles of counsel, judges and law teachers,
civil law procedure and a survey of selected legal
areas of substantive law. Knowledge of a foreign
language is not required.
249S. Special Session Comparative Law (1)
Discussion—1 hour. This course will provide a com-
parative perspective for students of American law.
After an initial look at the uses of the comparative
method, discussions will be centered around the
main differences between common law and civil law
and the style of legal reasoning that prevails in the
civil law. Topics to be covered will be the evolution of the civil law and the idea of codification,
the structure of European civil codes and the interpretation of their provisions, the
personnel of the law and procedure in civil law
countries, and the analysis of selected problems
of substantive law. Knowledge of a foreign language
will not be required.
250. Jurisprudence Seminar (2)
Seminar—2 hours. Deals principally with the ques-
tion of how judges should decide ‘hard cases,”
test the content of the law is in doubt and compe-
tent arguments have or could be offered for mutually
inconsistent decisions in favor of either party. Limited
enrollment.
250AT. Legal Theory Workshop (2)
Seminar—3 hours. Introduction to cutting edge
research by legal academics and professors in affili-
ated disciplines.
250BT. Writing Requirement Workshop (2)
Seminar—2 hours. Students who have written a
course paper or an independent study paper and
would like to take papers to the next level, producing
a work of publishable quality. (S/U grading only)
GE credit: WE.
250T. Asian American Jurisprudence (3)
Discussion—2 hours. Legal, social, and political dis-
course on Asian relations has traditionally been
framed in Black/White terms. This course disrupts the
traditional view by taking Asian Americans seri-
ously.
251. Labor Law (2)
Discussion—2 hours. Survey of the legislative, adminis-
trative, and judicial regulation of labor rela-
tions under federal law. Historical development of
labor law, the scope of national legislation, union
organization and recognition, the legality of strikes,
picketing, and the negotiation of collective bargain-
ing agreements.
251T. Labor Law I (2)
Discussion—2 hours. Restricted to students who pre-
viously took Labor Law in Fall 2008 may not enroll in
Labor Law I. Survey of the legislative, administra-
tive, and judicial regulation of labor relations under federal law.
251T. Labor Law II (2)
Discussion—2 hours. Prerequisite: course 251T pre-
ferred; not required. Survey of the legislative, admin-
istrative, and judicial regulation of labor relations under federal law.
252. International Litigation and Arbitration (3)
Discussion—3 hours. Current developments in inter-
national law, conflict of laws, civil procedure, arbi-
tration, and comparative law in the context of
transactions and disputes that cut across national
boundaries.
252. International Litigation and Arbitration (3)
Discussion—3 hours. Survey course covers legal and
policy issues related to developing, protecting and
preserving affordable, safe and accessible housing and
sustaining viable, diverse communities.
254A. Law and Rural Livelihoods Seminar (2)
Seminar—2 hours. Provides broad overview of law as
it relates and applies to rural people and places.
254T. Practicum in Rural Community Advocacy (3)
Seminar—3 hours. Provides an opportunity to learn
about Participatory Action Research (PAR) methods
and community-based law practice in the context
of rural community development and advocacy. Using
these skills and knowledge to serve rural California
communities.
255. Pension and Employee Benefit Law (3)
Discussion—3 hours. Prerequisite: course 220. The
federal regulation and taxation of private pensions
and employee benefits. The Employee Retirement
Income Security Act (ERISA), including such topics as
coverage, forfeitures, spousal rights, creditor access,
fiduciary duties, preemption of state law, remedies,
and other litigation issues. Internal Revenue Code
issues such as discrimination in favor of the highly
compensated, limitations on contributions, and related bene-
fits, rollovers, IRAs, early distribution penalties, and
minimum distribution rules.
256. Land Use (2)
Discussion—2 hours. Local agencies, developers,
environmental interest groups, and others who regu-
larly deal with the administrative and legislative
applications of land use planning and development
laws. Topics include zoning, general plans, local
government land use regulations, and related areas
of litigation. The expanding role of the California
Environmental Quality Act.
257. Legislative Process (2)
Discussion—2 hours. Fundamental elements of the
legislative process, including legislative procedure;
the legislature as an institution; lobbying; statutory
interpretation, legislative-executive relations; and the
legislature’s constitutional powers and limitations.

Quarter Offered: FI-Spring, F-Winter, SS-Fall, W-Summer; 2015-2016 offerings in parentheses
Pre-Fall 2011 General Education (GE): AA=Arts and Humanities; SC=Science and Engineering; SS-Social Sciences; Div=Diverse Domesticity; Wrt=Writing Experience
Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SE=Science and Engineering; SS=Social Sciences; ACH=American Cultures; DD=Domestic Diversity; OL=Oral Skills; GQ=Quantitative; SL=Scientific; V=Visual; WC=World Cultures; WE=Writing Experience
257A. Legislative Intent Seminar (2)
Seminar—2 hours. Theories and principles of statutory and constitutional interpretation. Original intent vs. living constitution; permissible kinds of evidence for determining legislative intent; canons of construction; extent to which initiatives should be interpreted similarly to laws.

257B. Statutory Interpretation (3)

258. Professional Responsibility (2)
Discussion—2 hours. The American Bar Association's Model Rules of Professional Conduct and the Code of Judicial Conduct, which are tested on the Multistate Professional Responsibility Examination, and the California Rules of Professional Conduct, which are tested on the California Bar Examination. Issues affecting the legal profession, including lawyers' ethical duties and responsibilities to clients, the courts, third parties, and the legal system.

258A. Legal Ethics and Corporate Practice (3)
Discussion—3 hours. Focus on corporate practice to explore the ethical responsibilities of lawyers.

258BT. Mindfulness and Professional Identity Seminar—3 hours. Introduction to the practice of meditation and connect it with readings about the legal profession.

259. Feminist Legal Theory (2)
Discussion—2 hours. Provides an overview of feminist legal theory and considers how its various strands inform legislative and judicial law making. Satisfies Advanced Writing Requirement.

259A. Women, Islam and the Law (2)
Seminar—2 hours. This course will study legal and religious reform movements for women's rights within Muslim communities in the context of current scholarly and political debates about fundamentalism, democracy, equality, secularism, universalism, and multiculturalism. This is a limited enrollment seminar.

259P. Women and the Law Practicum (1)
Discussion/lecture. Prerequisite: prior or concurrent enrollment in course 259. Complements the content of the feminist legal theory course by providing students the opportunity to consider how feminist theory may be used to inform law-making.

260. Employment Discrimination (3)
Discussion—3 hours. Examine federal laws prohibiting employment discrimination, including Title VII of the Civil Rights Act of 1964, the Equal Pay Act, the Age Discrimination in Employment Act, the Americans with Disabilities Act, the Rehabilitation Act of 1973, and §1981. The law teacher will discuss cases.

260AT. Employment Law (2)
Discussion—2 hours. Provides an overview of employment law, labor law and employment discrimination law and aims to serve as a foundation for understanding the law and policy (statutory and common law) that surround the employer-employee relationship.

261. Judicial Process (2)
Discussion—2 hours. Examines the role of the court in the legal process, the administration of justice, and the challenge of maintaining trust in the judicial process.

262. Regulated Industries (2)
Discussion—2 hours. Analyzes the role of the government in the regulation of industries, including the ethical responsibilities of lawyers.

263A. Trial Practice I (3)
Discussion—2 hours; laboratory—1 hour. Prerequisite: course 219, may be taken concurrently. Introduction to the preparation and trial of cases, including trial advocacy, legal research, oral and written communication, and the handling of evidence.

264. Water Law (2)
Discussion—2 hours. Property rights in surface waters, including riparian rights, prior appropriation, and public rights use of water bodies; environmental constraints on exercise of water rights; groundwater rights and management; federal allocation and control of water resources; legal aspects of interstate allocation.

264A. Ocean and Coastal Law (2)
Discussion—2 hours. Introduction to the goals and challenges of coastal and ocean policy, the complicated web of conflicting interests in coastal lands and ocean waters; regulation of coastal development; domestic and international fisheries management; and preservation of ocean resources.

265. Natural Resources Law Seminar (2)
Seminar—2 hours. Topics for each year. This year, we will take a close look at the challenges of managing the Sacramento-San Joaquin Delta, which is both the most important estuary on the west coast and the hub of California's water delivery system. Limited enrollment.

266A. Cyberlaw (2)
Discussion—2 hours. Emerging legal issues crucial to the conduct of business in cyberspace. Discussion of the evolving current and future. Topics may include the Internet and the World Wide Web.

267. Civil Rights Law (3)
Discussion—4 hours. Civil remedies for civil rights violations under the primary United States civil rights statute. Special topics may cover actions for constitutional and statutory violations under Title 42 USC §1983, affirmative defenses, and abstention doctrines.

267B. Civil Rights Seminar (2)
Seminar—2 hours. The social, political, legal, and historical factors leading to the creation of the United States Commission on Civil Rights in 1957. The United States Commission on Civil Rights is a bipartisan, independent agency established by the Civil Rights Act of 1964. It is directed to investigate complaints alleging deprivations of the right to vote, voter fraud, and study and collect information relating to discrimination and the denial of equal protection of the laws under the Constitution on the basis of race, color, religion, sex, age, disability, or national origin; and submit reports, findings and recommendations to the President and to Congress. The role that the USCCR has played and continues to play in American politics, legislative enactments and the national dialogue on equality, fairness and justice in the context of civil and human rights. Satisfies Advanced Legal Writing Requirement. Limited enrollment.

269. Basic Finance for Lawyers (2)
Discussion—2 hours. Prerequisite: Business Association course 219 or concurrent enrollment. Focus on how corporations raise money, stocks and bonds, etc.; understanding other business-related law school courses.

269AT. The Financial Crisis: Law & Policy (2)
Discussion—2 hours. Examine the impact of the financial crisis on the economy and the role of the courts, third parties, and the legal system.

269B. Exemptions and Taxation Focus (2)
Discussion—2 hours. The Conceptual basis and substantive law criteria for the determination of charitable contributions, intermediate and non-profit organizations. Focus is on understanding and advising your clients and for understanding other business-related law school courses.

269C. Corporate Finance (3)
Discussion—2 hours. Elective course 219 or concurrent enrollment recommended. Focus on how corporations raise money, stocks and bonds, etc.; how deals are structured and why corporations use a strategy instead of another.

269D. Seminar on Financial Regulation (2)
Seminar—2 hours. Introduction to the legal and regulatory issues presented by contemporary capital markets.

270. International Business Transactions (2)
Discussion—2 hours. Select legal problems arising from international business transactions. Topics may include the international sales contract, letters of credit, transfers of technology, regulation of bribery, development of joint ventures, reparation of profits, and foreign exchange problems.

270S. Special Session International Business Transactions (2)
Discussion—2 hours. A consideration of selected legal problems arising from international business transactions. Topics may include the international sales contract, letters of credit, transfers of technology, regulation of bribery, reparation of profits, and national efforts to control imports.

270T. Life-Cycle Business Transactions (3)
Discussion—3 hours. Prerequisite: Business Association and/or Trusts. Wills & Estates are recommended for enhanced comprehension. Focus is on understanding the drafting process for various types of transactions and the actual transactional documents typically encountered.

271. Nonprofit Organizations and Drafting (3)
Discussion—4 hours. Prerequisite course 215 or consent of instructor. Legal rules and concepts applicable to nonprofit organizations.

271A. Nonprofit Organizations: State and Local Governance Issues (2)
Discussion—2 hours. Prerequisite course 215 may be taken concurrently with instructor. State and local laws applicable to nonprofit organizations, i.e., public interest, cultural, religious, educational, and other not-for-profit entities. Federal tax exemptions of nonprofits and local laws impacting nonprofits with respect to incorporation or charitable trust formation, operation and governance, dissolution, fiduciary obligations of trustees, officers, directors, and management, and investment obligations vis-à-vis trust assets, cy pres rights, rights of members of social clubs, trade associations and labor unions, enforcement of obligations and rights by the attorney general and others, and regulation of charitable solicitation. Topics may include local property tax and other tax exemptions, nonprofit accounting issues, public private partnerships and Federal antitrust and constitutional constraints.

271B. Nonprofit Organizations: Tax Exemptions and Taxation Focus (2)
Discussion—2 hours. Prerequisite: course 215 or consent of instructor. Legal rules and concepts applicable to nonprofit organizations. Conceptual basis and substantive law criteria for the federal and state income tax exemption of nonprofit organizations and other particular circumstances and activities which will and will not result in income taxation or financial sanction, including qualifications for exempt status, the nondistribution constraint, the inurement and private benefit concepts, limitations on campaign activities, permissible lobbying expenditures, and the unrelated business income tax. Focus is on understanding and advising your clients and for understanding other business-related law school courses.

Purpose is to give you background necessary for understanding and advising clients and for understanding other business-related law school courses.
sanctions, the differences between private foundations and public charities, special excise taxes, the exempt organization private letter ruling and reporting requirements. Topics may include non-profit accounting issues, local property tax and other local tax exemptions, and public/private partnerships.

271T. Nonprofit Organizations-Key Legal Topics (2)
Discussion—2 hours. Legal issues raised in operating and governing a nonprofit organization, primarily a public charity.

272. Family Law (3)
Discussion—3 hours. An introduction to the legal regulation of the family.

274. Intellectual Property (3)
Discussion—3 hours. Provides a broad survey of intellectual property law.

274A. International Intellectual Property and Development (2)
Discussion—2 hours. In September 2007, the World Intellectual Property Organization adopted a development agenda that would rewrite that body’s mandate, placing the concerns of the poor at the center of international intellectual property law and policy.

274AS. Summer Session Intellectual Property (2)
Discussion—2 hours. This course provides a broad survey of the field of intellectual property. Areas covered will include trademarks, patents, trade secrets, idea protection, unfair competition, and copyright.

274BT. Law of Trade Secrets and Restrictive Covenants (2)
Discussion—2 hours. Focus is on the law of trade secrets, including the Uniform Trade Secret Act (UTSA), restrictive covenants not to compete, and current case law developments in the areas of employee mobility and raids, and corporate espionage.

274CT. Knowledge Commons, Collaborative Authorship, Open Access (2)
Seminar—2 hours. Focuses on the increasingly global diffusion and success of collaborative forms of cultural and technoscientific production rooted in copyright-based licenses.

274D. Intellectual Property in Historical Context Seminar (2)
Seminar—2 hours. How the legal system has adapted to earlier periods of rapid change by creating, delimiting, and expanding intellectual property rights (IPRs). Required paper satisfies advanced writing requirement. Limited enrollment.

274T. Theory and History of Intellectual Property (2)
Seminar—2 hours. Seminar traces development of intellectual property law in the U.S. and Europe because it is not possible to understand the logic and shape of current Intellectual Property concepts outside of their messy history.

275. Complex Litigation (2)
Discussion—2 hours. Issues that frequently arise in large complex litigation involving multiple parties and multiple claims.

275A. Intellectual Property Agreement Drafting for Biotech & Pharma
Seminar—2 hours. Prerequisite: upper-division Business Law course or Intellectual Property course; priority given to students that have completed course 274. Covers the negotiation and drafting of intellectual property agreements common in the biotechnological and pharmaceutical arena.

276. Juvenile Justice Seminar (2)
Seminar—2 hours. Examines unique historical, political and legal context in which Indian tribes operate casinos, including impacts on tribal sovereignty, relationships between tribes, states, and local governments, and changing relationships among the tribes themselves, members with particular relevance to experience of California.

278. Pretrial Skills (2)
Discussion—2 hours. This course uses role-playing exercises, videotaped simulations, and related projects to introduce students to lawyering skills basic to the practice of law, including client interviewing, witness interviewing and discovery, including deposition. Limited enrollment.

279. Public Sector Labor Law (2)
Seminar—2 hours. Prerequisite: course 251 or consent of instructor. Application of private sector labor law doctrines to the public sector. Emphasis on the four California public sector statutes and the impact of constitutional law on public employees. Class presentation and seminar paper required. Satisfies advanced writing requirement. Limited enrollment.

280. Advanced Legal Writing: Analytical & Persuasive Writing (2)
Seminar—2 hours. Prerequisite: consent of instructor. Develop essay writing skills and performance test drafting typically employed on the bar examination. (S/U grading only.)

280AT. Legal Analysis (2)
Discussion—2 hours. Selected enrollment by permission of professor. 280A’s only. Focuses on skills critical to law school success, and ultimately, bar exam success. (S/U grading only.)

280BT. Problem Solving and Analysis (2)
Discussion—2 hours. Prerequisite: consent of instructor. Restricted to third-year Law students only. Skills focused on the development of legal analytical and organizational methods essential to successful completion of the Performance Test component of the California Bar Exam (and other states), and, by extension, to success in the practice of law. (S/U grading only.)

281. Local Government Law (2)
Discussion—2 hours. Local Government Law explores the structure of state and local government through the lens of the virtues and flaws of the ideas of Madison and DeTocqueville, i.e., centralized federal government vs. decentralized local government.

282. Energy Law Seminar (2)
Seminar—2 hours. The history, law, and public policy of energy regulation in the United States with an emphasis on economic and environmental regulation. Competitive restructuring of the natural gas and electric utility industries emphasized. The basic regulatory scheme for large consumers such as hydroelectric power, coal, oil, and nuclear power explored. Recommended to anyone who has an interest in the energy sector, various models of economic regulation, and regulated industries.

282AT. Renewable Energy Seminar (2)
Seminar—2 hours. Seminar will provide a broad overview of renewable energy law and policy with a particular focus on the California policy and institutional context.

283. Remedies (3)
Discussion—2 hours. Survey of modern American civil remedies law in both private and public law contexts. Topics addressed include equitable remedies, equitable deceit, malpractice, fraud, relief, reformation, and money damages in torts and contracts.

284. Law and Economics (4)
Discussion—4 hours. Prior study of economics is not required. Introduces students to the economic analysis of law.

285. Native American Law (3)
Discussion—3 hours. Seminar focuses on legal relations between Native American tribes and the federal and state governments.

277. Indian Gaming Law Seminar (2)
Seminar—2 hours. Examines unique historical, political and legal context in which Indian tribes operate casinos, including impacts on tribal sovereignty, relations between tribes, states, and local governments, and changing relationships among the tribes themselves, members with particular relevance to experience of California.

278. Pretrial Skills (2)
Discussion—2 hours. This course uses role-playing exercises, videotaped simulations, and related projects to introduce students to lawyering skills basic to the practice of law, including client interviewing, witness interviewing and discovery, including deposition. Limited enrollment.

279. Public Sector Labor Law (2)
Seminar—2 hours. Prerequisite: course 251 or consent of instructor. Application of private sector labor law doctrines to the public sector. Emphasis on the four California public sector statutes and the impact of constitutional law on public employees. Class presentation and seminar paper required. Satisfies advanced writing requirement. Limited enrollment.

280. Advanced Legal Writing: Analytical & Persuasive Writing (2)
Seminar—2 hours. Prerequisite: consent of instructor. Develop essay writing skills and performance test drafting typically employed on the bar examination. (S/U grading only.)

280AT. Legal Analysis (2)
Discussion—2 hours. Selected enrollment by permission of professor. 280A’s only. Focuses on skills critical to law school success, and ultimately, bar exam success. (S/U grading only.)

280BT. Problem Solving and Analysis (2)
Discussion—2 hours. Prerequisite: consent of instructor. Restricted to third-year Law students only. Skills focused on the development of legal analytical and organizational methods essential to successful completion of the Performance Test component of the California Bar Exam (and other states), and, by extension, to success in the practice of law. (S/U grading only.)

281. Local Government Law (2)
Discussion—2 hours. Local Government Law explores the structure of state and local government through the lens of the virtues and flaws of the ideas of Madison and DeTocqueville, i.e., centralized federal government vs. decentralized local government.

282. Energy Law Seminar (2)
Seminar—2 hours. The history, law, and public policy of energy regulation in the United States with an emphasis on economic and environmental regulation. Competitive restructuring of the natural gas and electric utility industries emphasized. The basic regulatory scheme for large consumers such as hydroelectric power, coal, oil, and nuclear power explored. Recommended to anyone who has an interest in the energy sector, various models of economic regulation, and regulated industries.

282AT. Renewable Energy Seminar (2)
Seminar—2 hours. Seminar will provide a broad overview of renewable energy law and policy with a particular focus on the California policy and institutional context.

283. Remedies (3)
Discussion—2 hours. Survey of modern American civil remedies law in both private and public law contexts. Topics addressed include equitable remedies, equitable deceit, malpractice, fraud, relief, reformation, and money damages in torts and contracts.

284. Law and Economics (4)
Discussion—4 hours. Prior study of economics is not required. Introduces students to the economic analysis of law.

285. Native American Law (3)
Discussion—3 hours. Seminar focuses on legal relations between Native American tribes and the federal and state governments.

277. Indian Gaming Law Seminar (2)
Seminar—2 hours. Examines unique historical, political and legal context in which Indian tribes operate casinos, including impacts on tribal sovereignty, relations between tribes, states, and local governments, and changing relationships among the tribes themselves, members with particular relevance to experience of California.

278. Pretrial Skills (2)
Discussion—2 hours. This course uses role-playing exercises, videotaped simulations, and related projects to introduce students to lawyering skills basic to the practice of law, including client interviewing, witness interviewing and discovery, including deposition. Limited enrollment.

279. Public Sector Labor Law (2)
Seminar—2 hours. Prerequisite: course 251 or consent of instructor. Application of private sector labor law doctrines to the public sector. Emphasis on the four California public sector statutes and the impact of constitutional law on public employees. Class presentation and seminar paper required. Satisfies advanced writing requirement. Limited enrollment.

280. Advanced Legal Writing: Analytical & Persuasive Writing (2)
Seminar—2 hours. Prerequisite: consent of instructor. Develop essay writing skills and performance test drafting typically employed on the bar examination. (S/U grading only.)

280AT. Legal Analysis (2)
Discussion—2 hours. Selected enrollment by permission of professor. 280A’s only. Focuses on skills critical to law school success, and ultimately, bar exam success. (S/U grading only.)

280BT. Problem Solving and Analysis (2)
Discussion—2 hours. Prerequisite: consent of instructor. Restricted to third-year Law students only. Skills focused on the development of legal analytical and organizational methods essential to successful completion of the Performance Test component of the California Bar Exam (and other states), and, by extension, to success in the practice of law. (S/U grading only.)

281. Local Government Law (2)
Discussion—2 hours. Local Government Law explores the structure of state and local government through the lens of the virtues and flaws of the ideas of Madison and DeTocqueville, i.e., centralized federal government vs. decentralized local government.

282. Energy Law Seminar (2)
Seminar—2 hours. The history, law, and public policy of energy regulation in the United States with an emphasis on economic and environmental regulation. Competitive restructuring of the natural gas and electric utility industries emphasized. The basic regulatory scheme for large consumers such as hydroelectric power, coal, oil, and nuclear power explored. Recommended to anyone who has an interest in the energy sector, various models of economic regulation, and regulated industries.

282AT. Renewable Energy Seminar (2)
Seminar—2 hours. Seminar will provide a broad overview of renewable energy law and policy with a particular focus on the California policy and institutional context.

283. Remedies (3)
Discussion—2 hours. Survey of modern American civil remedies law in both private and public law contexts. Topics addressed include equitable remedies, equitable deceit, malpractice, fraud, relief, reformation, and money damages in torts and contracts.

284. Law and Economics (4)
Discussion—4 hours. Prior study of economics is not required. Introduces students to the economic analysis of law.
286E. Reproductive Rights, Law, and Policy (2) Seminar—2 hours. Addresses a variety of laws and practices that affect reproductive health and proactive decision making. Limited enrollment.

287. Public Land Law (3) Discussion—3 hours. Legal aspects of federal land management, including the history of public land law, the role of federal lands and specialized law dealing with particular natural resources and uses found on federal lands (minerals, timber, range, wildlife, recreation and preservation).

287A. Law (2) Seminar—2 hours. Will explore the theory and practice of law pertaining to the enactment and administration of public benefits programs for poor and other disadvantaged persons in our society. Limited enrollment.

287T. Law and Society Seminar (2) Seminar—2 hours. Study of law and society challenges traditional legal scholarship by exploring multiple ways in which law both shapes and is shaped by societies and social interactions. Seminar will introduce students to important literature and debates in the field. Limited enrollment.

288. Advanced Constitutional Law Seminar (2) Seminar—2 hours. Prerequisite: Prior or concurrent enrollment in course 218 or 218A. Explores in-depth selected topics or problems in constitutional law and theory. Current focus is on the interpretation and application of the federal commerce clauses of the First Amendment. Limited enrollment.

288B. Supreme Court Simulation Seminar (2) Seminar—2 hours. Consideration in depth of approximately nine cases involving constitutional law that will be decided during the present term of the U.S. Supreme Court. Limited enrollment.

289A. Biotechnology Law and Policy (2) Seminar—2 hours. Coverage includes the regulation of biotechnology research, including restrictions on cloning and fetal stem cell research; regulation of the products of biotechnology to protect human health or the environment, including restrictions on use or distribution of genetically modified organisms; the availability and scope of intellectual property protection for biotechnology products, including genes and engineered organisms, and the international law governing access to the natural resources that provide the starting materials for biotechnology and trade in bioengineered organisms or their products. Limited enrollment.

290T. International Trade Law (4) Discussion—4 hours. Review existing landscape of trade regulation from the World Trade Organizations, to regional organizations such as NAFTA, ASEAN, and the European Union.

291A. International Finance (3) Discussion—3 hours. How a framework of national and international laws and institutions regulates and fails to regulate the flow of money around the world.

291B. International Investment Dispute Seminar (2) Seminar—2 hours. This seminar will examine the law of investor-state dispute resolution.

292T. Advanced Topics in Immigration and Citizenship Law (2) Seminar—2 hours. Conducts a closer examination of various topics and subject matters that relate to immigration and citizenship law.

293. Public Interest Law Seminar (2) Seminar—2 hours. This class will examine the issues and problems associated with providing civil legal services to persons and interests in American society that typically have been unable to afford or otherwise obtain representation from the private bar.

293AT. Contemporary Issues in Economic Justice (2) Discussion—2 hours. Provides an introduction to the social justice critique of free markets.

293T. Public Interest Lawyering, Civil Rights and Employment Law (2) Seminar—2 hours. Prerequisite: course 260, 260AT. Advanced course covers employment law issues through the lens of public interest lawyers and their constituencies.

294A. Law and Popular Culture (2) Seminar—2 hours. This course examines works of popular culture, films, and legal texts. Each session will focus on one particular film and cultural icons in terms, particular problem or problems of law, law practice, legal ethics, traditional ethics, or public policy.

295A. Trademark and Unfair Competition Law (2) Discussion—2 hours. Prerequisite: course 274 recommended. We will take an intensive look at selected issues in Trademark Law, including the concepts of trademarks and unfair competition, acquisition and loss of trademark rights, infringement, trademarks as speech, and international aspects of trademark protection.

295T. Brands and Trademarks (2) Seminar—2 hours. Explores the challenges brands pose to traditional trademark law. Taking a close, interdisciplinary look at branding: from the business school’s theories of brand management to semiotic analyses of bromance meaning to art criticism of brand advertisements.

296. Copyright (3) Discussion—3 hours. Thorough examination of the law of copyright, including its application to literature, music, films, television, art, computer programs, and the Internet. Issues addressed include copyright protection, the copyright owner’s rights, the term of protection, copyright ownership and transfer, infringement, and defenses to infringement.

296T. Entertainment Law (2) Discussion—2 hours. Explores the many facets of Entertainment Law.

297. Alternative Dispute Resolution (3) Discussion—3 hours. Introduces students to a wide variety of alternative dispute resolution procedures, with an emphasis on negotiation, mediation and arbitration. Limited enrollment.

297AT. Commercial Arbitration Seminar (2) Seminar—2 hours. Trace the development of commercial arbitration, with a special emphasis on hot-button contemporary issues like consumer and employment arbitration, the separability doctrine, preemption of state law, and the arbitrability of statutory claims.

Professional

400A. Study Abroad—University College Dublin, Ireland (2) Independent study. Students must apply and be accepted into the International Study Abroad Program. Semester away study abroad at the University College Dublin, Ireland. Enhance knowledge of international legal regimes and obtain a global legal educational experience. (S/U grading only)

400B. Study Abroad—University of Copenhagen, Denmark (12) Independent study. Students must apply and be accepted into the International Study Abroad Program. Semester study abroad at the University of Copenhagen, Denmark. Enhance knowledge of international legal regimes and obtain a global legal educational experience. (S/U grading only)

400C. Study Abroad—China University of Political Science and Law (12) Independent study. Students must apply and be accepted into the International Study Abroad Program. Semester-away study abroad at the China University of Political Science and Law. Enhance knowledge of international legal regimes and obtain a global legal educational experience.

400D. Study Abroad—University of Lausanne, Switzerland (12) Independent study. Students must apply and be accepted into the International Study Abroad Program. Semester-away study abroad at the University of Lausanne, Switzerland. Enhance knowledge of international legal regimes and obtain a global legal educational experience. (S/U grading only)

400S. Critical Topics in Environmental Law in a Comparative Perspective (2) Seminar—2 hours. Enrollment by application only. Intensive, two-week program provides an opportunity for U.S. and international law students to study environmental law by examining European Union and U.S. environmental law policies and regulatory regimes. (S/U grading only)

408. Community Education Seminar (3) Seminar/clinic—3 hours. Trains students to educate the community about basic legal rights and responsibilities. Students attend an initial four-hour orientation, followed by weekly seminars that will prepare students to teach in a local high school at least two times per week. Paper or project required, to be determined by instructor. Limited enrollment. (S/U grading only)

408A. Educational Policy and the Law Seminar (2) Seminar—2 hours. Prerequisite: course 235 recommended. Examines the interaction between policy and the law of various educational themes such as the “right” to an education, financial equalization, merit and testing, privatization of education, and educational access. Limited enrollment.

409. Environmental Law Moot Court Competition (1) During the first eight weeks of fall semester, students research and submit briefs as appellants, respondents, or third parties on a problem of environmental law that is prepared by the National Environmental Law Moot Court Board. Students attend four to six classes (including guest lectures) on aspects of appellate advocacy, legal writing, and environmental law. Members of the spring environmental law moot court team will be selected on the basis of performance in class. (S/U grading only)

410A. Appellate Advocacy I (2) Discussion/laboratory. Basic appellate practice and procedure. Beginning instruction in oral advocacy skills and an opportunity to practice these skills in front of a moot court. Limited enrollment. (S/U grading only)

410B. Appellate Advocacy II (Moot Court) (2) Practice—2 hours. Continuation of course 410A. Focuses on the development of effective appellate brief writing skills and the refinement of oral advocacy skills. Limited enrollment. (S/U grading only)

411. Journal of International Law and Policy (1-2) The Journal is a biannual journal produced by King Hall students with an interest in international law. The editor-in-chief of the journal receives two units of credit each semester. The managing editor receives one unit of credit each semester. (S/U grading only)

411A. International Law Journal (1-2) The Editor in Chief of the Journal of International Law and Immigration receives two credits for each semester of service. Only one person may receive this credit in any one semester or cumulative. Managing and executive editors each receive one unit. (S/U grading only)
411B. Journal of Juvenile Law and Policy (1-2)
A biannual publication of the UC Davis School of Law that addresses the unique concerns of children in the American legal system. The editor-in-chief of the journal receives two credits each semester. Managing editors receive two credit each semester. (S/U grading only)

411C. UC Davis Business Law Journal (1-2)
Run by dedicated law students who are committed to providing current and valuable legal and business analysis. The journal addresses a broad spectrum of issues that fall within the intersection of business and the law. May be repeated two times for credit. (S/U grading only)

412. Carr Intraclass Trial Advocacy Competition (2-5)
Competition—1 hour. Named after the late Justice Frances Carr, this competition is open to second- and third-year students. A preliminary round is followed by quarter-finals, semi-finals, and a final round. Students in mock trials presided over by judges and critiqued by experienced litigators. Limited enrollment. (S/U grading only)

413. Interschool Competition (1-3)
Prerequisite: consent of appropriate faculty adviser. Participation in the interschool court and lawyer skills competitions. Enrollment is limited to students actually representing the School in the interschool competitions. Competition must be authorized by the faculty advisers. The faculty adviser may condition the award of academic credit for any particular competition on the performance of such actual work as may be reasonable to justify the credit. May not aid in the legal writing requirement. (S/U grading only)

414. Moot Court Board (1)
Prerequisite: courses 410A-410B. Members of Moot Court Board may receive one credit for each semester of service on the board, up to a maximum of two. Credit awarded only after certification by Moot Court Board and approval of the faculty advisers to Moot Court Board. Limited enrollment. (S/U grading only)

414A. Negotiations Board (1)
Variable—1 hour. Prerequisite: consent of instructor. Members of the King Hall Negotiations Board assist in the administration of the King Hall Negotiation Team by performing a variety of tasks under the supervision of the course instructor. One unit of credit for each semester of service on the board, up to a maximum of two units per academic year. Credit awarded only after approval by the instructor. (P/NP grading only)

415. Trial Practice Honors Board (1)
Members of the Trial Practice Honors Board administer the Frances Carr competition. Members are nominated by their Trial Practice I adjuncts. Students receive one credit for serving on the Board, awarded upon approval of the faculty adviser. (S/U grading only)

416. Law Review Writer (1-3)
The writing of a law review article under the editorial supervision of editors of the UC Davis Law Review. Office hours (including but not limited to Bluebooking and cite-checking) are required. 1 or 2 units, required. In the spring semester, credit is obtained only upon achieving status as a member of the UC Davis Law Review, which requires that the student has made substantial progress towards meeting the selection criteria. Credit is awarded only after certification by the editor in chief and approval of the faculty advisers. One unit of credit is earned the first semester. Two units are earned the second semester. Credit is awarded upon nomination and acceptance of nomination to the Editorial Board. One unit is earned second semester if only a membership draft and office hours are completed. May be repeated for credit. (S/U grading only)

417. Law Review Editor (1-2)
Editors must have completed an editorialship article and must perform editorial duties requiring a substantial time commitment. Credit awarded only after certification by the editor-in-chief of the Law Review and approval of the faculty advisers to the Law Review. Students are credited over two semesters for service as an editor. Deferred grading pending only, pending completion of sequence.

418. Environmental Law and Policy Journal (1-2)
Independent study. Each year nearly 100 King Hall students work together to publish Environments. Getting involved with the journal will provide you with the chance to develop essential skills that will benefit you throughout school and career. (S/U grading only)

419. Advanced Writing Project (1-4)
The completion of a writing requirement project under the active and regular supervision of a faculty member in satisfaction of the legal writing requirement. The writing project must be an individually authored work of rigorous intellectual effort of at least 20 typewritten double-spaced pages, excluding footnotes. The project may take any of several forms, for example, a paper, a brief, a memorandum of law, a proposed statute, a statutory scheme or set of administrative regulations (with explanatory comments), a will or agreement (with explanatory comments). The advanced writing project may also be undertaken in connection with another course or seminar to satisfy the legal writing requirements. The number of units shall be approved by the faculty supervisor and will depend upon the scope of the writing effort. (S/U grading only)

419A. Advanced Writing Project (1-4)
The completion of a writing requirement project under the active and regular supervision of a faculty member in satisfaction of the legal writing requirement. The writing project must be an individually authored work of rigorous intellectual effort of at least 20 typewritten double-spaced pages, excluding footnotes. The project may take any of several forms, for example, a paper, a brief, a memorandum of law, a proposed statute, a statutory scheme or set of administrative regulations (with explanatory comments), a will or agreement (with explanatory comments). The advanced writing project may also be undertaken in connection with another course or seminar to satisfy the legal writing requirements. The number of units shall be approved by the faculty supervisor and will depend upon the scope of the writing effort. (S/U grading only)

419B. Special Session Advanced Writing Project (1-4)
The completion of a writing requirement project under the active and regular supervision of a faculty member in satisfaction of the legal writing requirement. The writing project must be an individually authored work of rigorous intellectual effort of at least 20 typewritten double-spaced pages, excluding footnotes. The project may take any of several forms, for example, a paper, a brief, a memorandum of law, a proposed statute, a statutory scheme or set of administrative regulations (with explanatory comments), a will or agreement (with explanatory comments). The advanced writing project may also be undertaken in connection with another course or seminar to satisfy the legal writing requirements. The number of units shall be approved by the faculty supervisor and will depend upon the scope of the writing effort. (S/U grading only)

420. Civil Rights Clinic (2-6)
Clinical activity. Prerequisite: prior or concurrent enrollment in course 219. Students may work only on individual civil rights matters. (S/U grading only; deferred grading only, pending completion of sequence)

420A. Immigration Law Clinic (4)
Clinical Activity—8 hours. Prerequisite: Prior or concurrent enrollment in course 292. Each student is required to enroll for two semesters, receiving four units each semester for total of eight units. Provides legal representation to indigent non-citizens in removal proceedings before U.S. Immigration Courts, the Board of Immigration Appeals, and federal courts, including the Ninth Circuit Court of Appeals. (S/U grading only; deferred grading only, pending completion of sequence)

420B. Immigration Law Clinic (4)
Clinical Activity—8 hours. Prerequisite: Prior or concurrent enrollment in course 292. Each student is required to enroll for two semesters, receiving four units each semester for total of eight units. Provides legal representation to indigent non-citizens in removal proceedings before U.S. Immigration Courts, the Board of Immigration Appeals, and federal courts, including the Ninth Circuit Court of Appeals. (S/U grading only; deferred grading only, pending completion of sequence)

445. Legislative Process Externship (2-5)
Clinical activity. Prerequisite: course 240 (may be taken concurrently) or consent of instructor. Practical experience in the operation of the office of a legislator or a legislative committee. The major thrust of the program is to enable students to become familiar with the give and take realities of making laws, as contrasted with their interpretation and enforcement. Journals are required. (S/U grading only)

450. Environmental Law and Policy Journal (1-2)
Clinical activity—2.6 hours. Prerequisite: course 262. Directed study. Students observe procedures and practices of a governmental or private agency. Enrolled students are required to write a term paper of approximately 10 pages. Limited enrollment. (S/U grading only)

455. Employment Relations Externship (2-6)
Clinical activity. Prerequisite: course 251 or 260 (may be taken concurrently). Practical experience in employment relations, including employment discrimination and public sector labor law. (S/U grading only)

460. Federal and State Taxation Externship (2-6)
Clinical activity—2.1 hours. Prerequisite: course 220. Students will have the opportunity to work with the Internal Revenue Service or other governmental tax authorities. Journals and attendance at group meetings are required. (S/U grading only)

465. Family Protection Clinic (4)
Clinical activity. Prerequisite: course 219 (may be taken concurrently). Representation of low-income persons in family law matters arising out of situations involving family violence. Students are supervised by the staff attorney at the clinic's office located in Woodland at the Sexual Assault and Domestic Violence Center of Yolo County. (S/U grading only)

470. Civil Rights Clinic (2-6)
Clinical activity. Prerequisite: prior or concurrent enrollment in course 219. Students may work only on individual civil rights matters. (S/U grading only; deferred grading only, pending completion of sequence)

472. Civil Rights Clinic (2-6)
Clinical activity. Prerequisite: prior or concurrent enrollment in course 219. Students may work only on individual civil rights matters. (S/U grading only; deferred grading only, pending completion of sequence)
may be applied toward the practicum requirement for the Public Interest Law Program. (S/U grading only.)

465. Intellectual Property Externship (2-6) Clinical activity. Prerequisite: course 293 and Com- parative Public Services recommended. Opportunity to work for government, academic, and nonprofit entities. (S/U grading only.)

470. Administration of Criminal Justice Externship (2-6 or 12) Clinical activity—2-12 hours. Prerequisite: Com- pletion of, or concurrent enrollment, in courses 219 and 227; course 268.3A recommended. Earn practical experience working full or part-time in a District Attorney’s or Public Defender’s office in one of several surrounding counties or in a federal Public Defender’s office. Students participate in the many activities associated with the office for which they extern: observation, interviewing, research, counseling, motion practice, and trials under State Bar rules. Limited enrollment. (S/U grading only.)

475. Washington UC-DC Law Program (10) Clinical activity—10 hours. Open to 2L and 3L stu- dents. Uniquely collaborative externship program in Washington, D.C., combining weekly seminars with full-time field placement offering students an unparalleled opportunity to learn how federal statutes, regulations, and policies are made, changed, and understood in the nation’s capital. (S/U grading only.)

475A. Law Making and Law Changing in the Nation’s Capital (3) Seminar—3 hours. Companion seminar to the Washington UC-DC Externship. Designed to enhance the externship experience in three principal ways.

480. Clinical Program in Prison Law (2-6) Clinical program. Provides practical experience in providing legal services to real clients who have var- ious claims related to their incarceration in state prison. The services require analysis and application of Constitutional Law, state statutory law, agency regulations, and the rules of professional responsibility. Students will work under the direct supervision of the Prison Law clinical director and will be assigned a portion of the director’s caseload. Students will be required to follow the law office procedure of the clinic and employ skills such as interviewing, research, writing, negotiating, and possibly, the preparation of legal documents to be filed in court. (S/U grading only.)

485. California Supreme Court Clinic (6) Clinical activity—6 hours. Class size limited to 6 stu- dents. California Supreme Court Clinic provides students with an immersive experience in litigating cases before the state’s highest court.

490T. Aoki Federal Public Defender Clinic (4) Clinical activity—4 hours. Students submit applica- tions for the course. Outgrowth of the work of the Aoki Center on Race and Nation. As part of its work, the Aoki Center provides educational opportu- nities to students interested in critical race perspec- tives in practice.

495. Legal Research and Writing I (2) Discussion—2 hours. Integrated legal research and writing skills courses. Basic legal research resources and strategies are introduced and practiced. (S/U grading only.)

498. Group Study (1-4) Prerequisite: consent of instructor. Group of students with common interest in studying a stated legal problem may plan and conduct their own research and seminar program under the direction of faculty. Class size limited to no fewer than 4 or more than 10 students. (S/U grading only.)

498A. Group Study (1-4) Prerequisite: consent of instructor. Group of students with common interest in studying a stated legal problem may plan and conduct their own research and seminar program under the direction of faculty.

499. Independent Research Project (1-4) Students may receive credit for individual projects, subject to the following regulations: (1) the project may extend over no more than two semesters; (2) each project will be under the supervision of a fac- ulty member; (3) an outline of the project must be approved by the supervising faculty member; (4) normally, no faculty member will be permitted to supervise more than five students working on individ- ual programs during any semester; and (5) each stu- dent must submit an individual paper or approved alternative to the supervising faculty member. (S/U grading only.)

499A. Independent Research Project (1-4) Students may receive credit for individual projects, subject to the following regulations: (1) the project may extend over no more than two semesters; (2) each project will be under the supervision of a fac- ulty member; (3) an outline of the project must be approved by the supervising faculty member; (4) normally, no faculty member will be permitted to supervise more than five students working on individ- ual programs during any semester; and (5) each stu- dent must submit an individual paper or approved alternative to the supervising faculty member. Grad- ing is on a Satisfactory/ Unsatisfactory basis unless a request for letter grading has been made in advance.

499B. Law Students Study Away (10) Independent study. Students studying away from UC Davis, School of Law. (S/U grading only.)

499C. Joint Degree Student-GSM (10) Joint degree course for graduate School of Manage- ment students. (S/U grading only.)

499S. Special Session Independent Research Project (1-4) Students may receive credit for individual projects, subject to the following regulations: (1) the project may extend over no more than two semesters; (2) each project will be the supervision of a fac- ulty member; (3) an outline of the project must be approved by the supervising faculty member; (4) normally, no faculty member will be permitted to supervise more than five students working on individ- ual programs during any semester; and (5) each stu- dent must submit an individual paper or approved alternative to the supervising faculty member.

499SA. Special Session Independent Research Project (1-4) Students may receive credit for individual projects, subject to the following regulations: (1) the project may extend over no more than two semesters; (2) each project will be under the supervision of a fac- ulty member; (3) an outline of the project must be approved by the supervising faculty member; (4) normally, no faculty member will be permitted to supervise more than five students working on individ- ual programs during any semester; and (5) each stu- dent must submit an individual paper or approved alternative to the supervising faculty member.

499SB. Special Session Independent Research Project (1-4) Students may receive credit for individual projects, subject to the following regulations: (1) the project may extend over no more than two semesters; (2) each project will be under the supervision of a fac- ulty member; (3) an outline of the project must be approved by the supervising faculty member; (4) normally, no faculty member will be permitted to supervise more than five students working on individ- ual programs during any semester; and (5) each stu- dent must submit an individual paper or approved alternative to the supervising faculty member.
Linguistics

Total Units for the Major……………48-68

Students interested in teaching foreign languages. Teaching Area of emphasis; it is also of relevance to communication. Cultural, historical, and political dimensions of language contact. GE credit: ArtHum | AH—II, III.

Major Adviser. R.Bayley

Minor Program Requirements:

(1) General Linguistics, which provides the student with basic knowledge of language structure and linguistic analysis.

(2) Linguistics for Language Teachers, which especially complements the major in English with the Teaching Area of emphasis; it is also of relevance to students interested in teaching foreign languages.

UNITS

General Linguistics…………………24
Linguistics 1, 103A, 103B, 106, 108, 109, 110, 120, 121, 131, 141, 151, 152………………4

Additional units selected from upper division Linguistics courses and other upper division courses listed in the major requirements in consultation with an advisor………………..8

Linguistics for Language Teachers……24
Linguistics 1, 106, 165…………………12
Linguistics 160 or 163…………………4
Linguistics 173 or Education 151…………………4

Minor Adviser. Same as Major adviser

Graduation Recommendation. Though not required, it is recommended that all courses offered in satisfaction of the Linguistics major be taken for a letter grade.

Honors and Honors Programs. The honors program consists of six units of 194H credit normally taken in the fall and winter quarters of the senior year. Completion of the program is a prerequisite for High or Highest Honors at graduation. Specific eligibility criteria may be obtained from the major adviser. For general information regarding graduation with honors and Dean’s Honors Lists, please see Academic Information, on page 73.

Graduate Study. The Linguistics Graduate Group offers study and research leading to the M.A. and Ph.D. degrees. Please see Linguistics [A Graduate Group], on page 380; more detailed information may be obtained from the Graduate Adviser or from the Chairperson of the Linguistics Group.

Graduate Adviser. R.Aronovich, J. Menard-Warwick

Courses in Linguistics (LIN)

Lower Division

1. Introduction to Linguistics (Linguistics 1)
Lecture—3 hours; discussion—1 hour. Introduction to the study of language, its nature, diversity, and structure. GE credit: ArtHum or SoSci, Wrt | AH, SS—II, III, IV, V, VI.

1Y. Introduction to Linguistics (Web Virtual Lecture—3 hours; discussion—1 hour. Introduction to the study of language, its nature, diversity, and structure. GE credit: ArtHum or SoSci, Wrt | AH or II, III, IV.

5. Global English and Communication (4)
Lecture—2 hours; discussion—2 hours. English as a global language and its uses in intercultural communication. Cultural, historical, and political dimensions of varieties of English spoken around the world. Experiential grounding in strategies for increasing interpretive and verbal communicative competence for a globalized world. (Same course as Communication 3) GE credit: ArtHum or SoSci, Div.

6. Language and Society (4)
Lecture—3 hours; discussion—1 hour. Language as a social phenomenon. Topics include linguistic diversity, language and identity, language and social structure, speech communities and social networks, the effect of social factors on language variation, linguistic consequences of language contact. GE credit: SoSci, Div, Wrt | ACGH.

20. Oral English for Undergraduate ESL Students (3)
Lecture/discussion—3 hours. Prerequisite: consent of instructor; limited primarily to students who have fulfilled their Subject A requirement or have completed course 23. Practice in oral English for undergraduate ESL students. Students will learn to identify and modify features of their pronunciation which limit their ability to communicate clearly. Students will also learn and practice strategies for effective participation in academic tasks. May be repeated one time per credit with consent of coordinator. (P/NP grading only.)

24. English Structures and Strategies in Academic Writing (4)
Lecture/discussion—4 hours. Prerequisite: course 23. Practice in academic writing designed to prepare undergraduate students from language backgrounds other than English for successful academic work. Development of essay writing, critical thinking, and reading skills. Development of clear, accurate language for presenting an effective argument. Open to students from language backgrounds other than English. (Same as English 24.)

25. English for International/ESL Graduate Students (4)
Lecture/discussion—4 hours. Prerequisite: admission by placement examination or consent of instructor. Open to international and ESL graduate students and limited status international undergraduates (Education Abroad Program participants). A multi-skills ESL course designed to help international/ESL students improve their English language skills for successful academic study. Emphasis on writing, speaking, listening, reading, and academic culture. (P/NP grading only.)—I.

26. Writing for International Graduate Students (3)
Lecture—3 hours. Prerequisite: satisfactory completion of course 25 if held for it, or consent of instructor. Admission limited to international graduate students. Focuses on writing needed for academic work, including summaries, critiques, research and grant proposals, memos, resumes, and research papers. Includes a review of grammar needed for writing and some focus on reading skills and American vocabulary and idioms. (P/NP grading only.)

27. Academic Writing for ESL Students (4)
Lecture/discussion—4 hours. Writing skills necessary for upper division courses, including skills crucial to writing lab and project reports, summaries, critiques, abstracts, and responses to exam questions. Includes practice with the syntax, grammar, and vocabulary characteristic of academic writing. Offered irregularly.

28. Reading in Scientific and Technical Subjects for ESL Students (4)
Lecture/discussion—4 hours. Instruction and practice in reading scientific and technical texts. Techniques for comprehension, language and idioms, and use of note-taking and summarizing, vocabulary enrichment. (P/NP grading only.)

96. Directed Group Study in English as a Second Language (1-5)
Variable—1-5 hours. Prerequisite: consent of instructor. Directed group study of topic in English as a Second Language (ESL). May be repeated for credit by consent of the ESL coordinator. (P/NP grading only.)—I, II.

98. Directed Group Study (1-5)
Prerequisite: consent of instructor. Offered for lower division students. (P/NP grading only.)

99. Special Study for Undergraduates (1-5)
Prerequisite: consent of instructor. Offered for lower division students. (P/NP grading only.)

Upper Division

103A. Linguistic Analysis I: Phonetics, Phonology, Morphology (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 1. Introduction to fundamental methods and concepts used in linguistic analysis, focusing on phonetic, phonological, and morphological phenomena. Emphasizes development of analytical skills and appreciation of structural regularities and differences among languages. Not open for credit to students who have completed course 139. GE credit: ArtHum | AH—II, III.

103B. Linguistic Analysis II: Morphology, Syntax, Semantics (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 1. Introduction to fundamental methods and concepts used in linguistic analysis, focusing on morphological, syntactic, and semantic phenomena. Emphasizes development of analytical skills and appreciation of structural regularities and differences among languages. Not open for credit to students who have completed course 140. 103B GE credit: ArtHum | AH—II, III.

105. Topics in Language and Linguistics (4)
Lecture—3 hours; term paper. Prerequisite: course 1 and consent of instructor. Detailed examination of a major contemporary linguistic theory, a major contemporary issue or related set of issues in linguistics, or the structure of a particular language or language family. May be repeated for credit when topic differs. Offered irregularly.

106. English Grammar (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or English 3 or University Writing Program 1 or consent of instructor. Survey of present-day English grammar as informed by contemporary linguistic theories. The major syntactic structures of English, their variation across dialects, styles, and registers; their development, and their usefulness in describing the conventions of English. (Same course as English 106 and University Writing Program 106) GE credit: ArtHum | AH.

111. Introduction to Phonological Theory (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 103A. Contemporary phonological theory with emphasis on syllable structure, metrical structure, phonology-morphology interaction, and typological variation in these areas, from the perspective of optimality-theoretic approaches. GE credit: ArtHum | AH—II, III.

112. Phonetics (4)
Lecture—3 hours; term paper. Prerequisite: course 1. Detailed examination of articulatory and acoustic phonetics. GE credit: SciEng | SE—I, II, III, IV.

121. Morphology (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: courses 103A, 103B. Introduction to the analysis of word structure and the relation of word structure to the lexicon and other grammatical components. GE credit: ArtHum | AH—II, III.

127. Text Processing and Corpus Linguistics (4)
Lecture—3 hours; extensive problem solving. Prerequisite: course 1, course 5, course 6, or Anthropology 4. Investigation of the lexical organization of human languages through corpus linguistics. Application of principles of linguistic analysis, automatic text pro-
166. The Spanish Language in the United States (4)
Lecture—3 hours; term paper. Prerequisite: course 1 or Spanish 111N; and Spanish 23 or the equivalent. Linguistic features of the varieties of the Spanish language spoken throughout the United States; phonology, morphology, syntax, vocabulary. Focus on the relationship between United States Spanish and other world varieties of Spanish, within a historical framework. GE credit: SocSci, Div, Wrt | SS.

171. Introduction to Psycholinguistics (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or courses 103A, 103B recommended. Introduction to psychological issues relating to the implementation of language and linguistic structure during speech production and comprehension and to the implications of research in psychology and related fields for linguistic theory. Offered in alternate years. GE credit: SS.—Corina

173. Language Development (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 103B. The study of development of language and language-based abilities. Relationships between human cognition and computer representations of cognitive processing. Not open for credit to students who have completed course 7. GE credit: SciEng or SocSci | SE or SS.—II. Ojeda

180. Second Language Learning and Teaching (4)
Lecture/discussion—4 hours. Prerequisite: course 1 or equivalent. Psycholinguistic and sociolinguistic theories of second language learning. Connections between theoretical perspectives and pedagogical practices in formal and informal second language settings, with focus on tutoring. (P/NP grading only.) GE credit: ArtHr or SocSci, Div, Wrt | SS, WE.—III. Ward

183. Language, Gender, and Society (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or Anthropology 4. Investigation of real and putative (stereotyped) gender-linked differences in language structure and usage, with a consideration of some social and psychological consequences of such differences. Focus is on English, but other languages are also discussed. GE credit: SocSci, Div, Wrt | ACGH, DD, SS, WE.—II. Timm, Mernd-Warwick

165. Introduction to Applied Linguistics (4)
Lecture—3 hours; discussion—1 hour. Applications of linguistic principles and the analysis of language-related issues in the world. Exploration of a range of language-related problems including issues related to language learning, teaching to issues concerning language and gender, race, class and the media. GE credit: SocSci | SS, WE.—III. Ramana

177. Computational Linguistics (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or consent of instructor. Understanding the nature of language through computer modeling of linguistic abilities. Relationships between human cognition and computer representations of cognitive processing. Not open for credit to students who have completed course 7. GE credit: SciEng or SocSci | SE or SS.—II. Ojeda

182. Multilingualism (4)
Lecture/discussion—4 hours. Issues in multilingualism from a global perspective: e.g., multilingual communities; multilingualism and identity (gender, ethnicity, nationality); language ideologies and educational and sociopolitical policies surrounding multilingualism; acquisition of multilingualism; discursive practices of multilinguals. Limited enrollment. GE credit: SciEng or SocSci, Div, Wrt | SS, WE.—II. Menang-Warwick

192. Internship in Linguistics (1-12)
Internship—3-36 hours; two written reports. Prerequisite: courses 103A, 103B recommended. Not open for credit to students who have completed course 7. GE credit: SciEng or SocSci, Div, Wrt | SS, WE.—III. Ramangan, Timm

199. Special Study for Honors Students (1-5)
Independent study—1-5 hours. Prerequisite: open to upper division students. May be repeated for credit. (P/NP grading only.)

205A-205B-205C-205D. Topics in Linguistic Theory and Methods (4)
Seminar—3 hours; term paper. Prerequisite: consent of instructor. Survey of fundamental issues raised by contemporary linguistic theories lying outside the generative grammar orthodoxy, with emphasis on issues crucial to applications of linguistics. GE credit: ArtsHum or SocSci | AH, Div, SE, WE.—II. Ojeda

211. Advanced Phonological Theory and Analysis (4)
Lecture—3 hours; term paper. Prerequisite: course 111. Critical examination of current phonological theories. (P/NP grading only.)

212. Advanced Phonetics (4)
Lecture—3 hours; term paper. Prerequisite: course 112. Advanced investigation of the physiological basis of speech articulation and acoustic phonetics. GE credit: SciEng | SE and WE.—II. Ojeda

231. Advanced Syntactic Theory and Analysis (4)
Lecture—3 hours; term paper. Prerequisite: course 131. Critical survey of current theories of syntax. Offered in alternate years. GE credit: SciEng | SE and WE.—II. Ojeda

241. Advanced Semantic Theory and Analysis (4)
Lecture—3 hours; term paper. Prerequisite: course 141 or consent of instructor. Advanced critical exploration of contemporary theories of linguistic semantics. Offered in alternate years.—II. Ojeda

251. Principles of Historical Linguistics (4)
Lecture—3 hours; term paper. Prerequisite: course 151. Advanced analysis of the theory and methods of historical linguistics. GE credit: SciEng | SE and WE.—II. Ojeda

252. Romance Linguistics (4)
Lecture—3 hours; term paper. Prerequisite: course 151. Examination of the development of the Romance languages from 500 to the modern era. Application and critical examination of methods of historical and comparative linguistics in particular areas of structural change in Romance. GE credit: SciEng | SE and WE.—II. Ojeda

260. Variation in Speech Communities (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 281 or consent of instructor. Linguistic variability in time, space, and society. Theoretical issues related to social and linguistic constraints in variation, issues and methods in the quantitative study of language variation, and applications of variation theory to sociolinguistic research. Not open for credit to students who have completed course 7. GE credit: SciEng or SocSci | SE and WE.—II. Ojeda

297. Tutoring in Linguistics (1-4)
Lecture—3 hours; term paper. Prerequisite: upper division standing, consent of instructor, and consent of department chairperson. Leading of small voluntary discussion groups affiliated with one of the department's regular courses. May be repeated for credit. (P/NP grading only.)

298. Directed Group Study (1-5)
Independent study—1-5 hours. Prerequisite: consent of instructor. (P/NP grading only.)

299. Special Study for Advanced Undergraduates (1-5)
Independent study—1-5 hours. Prerequisite: open to undergraduate students. (P/NP grading only.)

Graduate

200A. Foundations of Linguistics I (4)
Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing. Survey of fundamental issues raised by pre-generative linguistics in the twentieth century, with emphasis on issues crucial to applications of linguistics. GE credit: ArtsHum or SocSci, Div, Wrt | AH.—II. Ojeda

200B. Foundations of Linguistics II (4)
Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing. Survey of fundamental issues raised by contemporary linguistic theories lying outside the generative grammar orthodoxy, with emphasis on issues crucial to applications of linguistics. GE credit: ArtsHum or SocSci, Div, Wrt | AH.—II. Ojeda

205A-205B-205C-205D. Topics in Linguistic Theory and Methods (4)
Seminar—3 hours; term paper. Prerequisite: consent of instructor. Survey of current linguistic theories and methodologies. May be repeated for credit when topic differs.

211. Advanced Phonological Theory and Analysis (4)
Lecture—3 hours; term paper. Prerequisite: course 111. Critical examination of current phonological theories. (P/NP grading only.)

212. Advanced Phonetics (4)
Lecture—3 hours; term paper. Prerequisite: course 112. Advanced investigation of the physiological basis of speech articulation and acoustic phonetics. GE credit: SciEng | SE and WE.—II. Ojeda

231. Advanced Syntactic Theory and Analysis (4)
Lecture—3 hours; term paper. Prerequisite: course 131. Critical survey of current theories of syntax. Offered in alternate years. GE credit: SciEng | SE and WE.—II. Ojeda

241. Advanced Semantic Theory and Analysis (4)
Lecture—3 hours; term paper. Prerequisite: course 141 or consent of instructor. Advanced critical exploration of contemporary theories of linguistic semantics. Offered in alternate years.—II. Ojeda

251. Principles of Historical Linguistics (4)
Lecture—3 hours; term paper. Prerequisite: course 151. Advanced analysis of the theory and methods of historical linguistics. GE credit: SciEng | SE and WE.—II. Ojeda

252. Romance Linguistics (4)
Lecture—3 hours; term paper. Prerequisite: course 151. Examination of the development of the Romance languages from 500 to the modern era. Application and critical examination of methods of historical and comparative linguistics in particular areas of structural change in Romance. GE credit: SciEng | SE and WE.—II. Ojeda

260. Variation in Speech Communities (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 281 or consent of instructor. Linguistic variability in time, space, and society. Theoretical issues related to social and linguistic constraints in variation, issues and methods in the quantitative study of language variation, and applications of variation theory to sociolinguistic research. Not open for credit to students who have completed course 7. GE credit: SciEng or SocSci | SE and WE.—II. Ojeda
264. Current Issues in Language and Gender (4)
Seminar—3 hours; term paper. Graduate standing; prerequisite: 2, or equivalent. Focus on gender, language, and the construction of gender through language. Does not fulfill requirement toward the M.A. degree. May be repeated for credit with permission of the instructor. —Menard-Warwick

265. Language, Performance, and Power (4)
Seminar—3 hours; term paper. Graduate standing or consent of instructor. Exploration of the intersection between linguistic and social theories in the language-state relation and the performance of identity. Ideological sources of language difference and the two-way nation-building and linguistic difference. Political, economic, sociolinguistic, and ethnographic approaches to understanding linguistic inequality. (Same course as Anthropology 265.) (Offered in alternate years.—Shibamoto Smith

280. Theories of Second Language Acquisition (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 2, or equivalent. Discussion of current research in second language acquisition; evaluation of research designs and methods of analyses, formulation of research questions and hypotheses and design of study with thought to various methods of data collection. —I. Menard-Warwick

281. Research Methods in TESOL/SLD (4)
Lecture—3 hours; term paper. Prerequisite: course 280. Research methods in second language research; evaluation of research designs and methods of analyses, formulation of research questions and hypotheses and design of study with thought to various methods of data collection. —I. Menard-Warwick

282. Individual and Social Aspects of Bilingualism (4)
Lecture—3 hours; term paper. Broad overview of bi- and multilingualism, with focus on theoretical and descriptive research. Topics covered range from language processing in bilinguals to codeswitching to language as political issue in multilingual states. —III. Timm

283. Politics of Bi and Multilingual Literacy (3)
Lecture/discussion—3 hours; term paper. Anthropological, psycho-social, political, and educational perspectives on bi- and multilingualism. Power, colonialism, speakers, and varieties and the unequal distribution of social goods. Analysis of how competing factors keep peoples disenfranchised. —Ramanathan

289. Pedagogical Applications of Second Language Acquisition (4)
Seminar—3 hours; term paper. Prerequisite: course 280. Pedagogical implications of various theories of second language acquisition, facilitation of language acquisition in classroom settings, and techniques for conducting classroom-based research in language learning. —Bayley

297. English as a Second Language Tutoring/Tutoring (1-4)
Tutoring—1-4 hours. Prerequisite: course 300, 301, or 302 (may be taken concurrently). Teaching classes for ESL graduate students. Aiding the ESL undergraduate composition classes; tutoring foreign graduate student Teaching Assistants in pronunciation. Does not fulfill requirement toward the M.A. degree. May be repeated for credit. (S/U grading only.)

298. Directed Group Study (1-5)
Directed Group Study—1-5 hours. Prerequisite: admission to Ph.D. program in Linguistics. The Ph.D. program offers a program of study leading to the M.A. and the Ph.D. degrees. The M.A. program offers research in linguistic theories and methods. Second language acquisition; facilitation of language learning. —Bayley

299. Research (1-12)
Research—1-12 hours. Prerequisite: admission to Ph.D. program in Linguistics. May be repeated for credit with consent of coordinator. Does not fulfill requirement toward a major. —I. Menard-Warwick

300. Language Pedagogy (4)
Lecture/discussion—4 hours. Prerequisite: graduate standing in Linguistics or consent of instructor; concurrent enrollment in course 297T recommended. Methods of teaching second languages to non-native speakers, street/alternate current linguistic theories, and strategies. (Same course as Anthropology 265.) Offered in alternate years.—Shibamoto Smith

301. Teaching Academic Literacy (4)
Seminar—1.5 hours; tutorial—14 hours; project: practice. Prerequisite: graduate standing; course 300 or consent of instructor. Methods of teaching advanced academic literacy in a second language, with a focus on ESL composition. Lesson development, teaching and tutoring in the UC Davis ESL program. —II. Ramanathan

302. Recent Research and Special Projects in TESOL (4)
Lecture—4 hours. Prerequisite: courses 300 and 301. Review of recent research in second language acquisition and the teaching of English to speakers of other languages. Continued teaching and tutoring in the UC Davis ESL clinic. Each student also designs and reports on a classroom research project.

305. Second Language Literacy and Technology (4)
Lecture/discussion—1.5 hours; web electronic discussion—1.5 hours. Prerequisite: course 2, or equivalent coursework experience in second language pedagogy; consent of instructor; graduate students only. Exploration of literacy theory and critical pedagogy in relation to new instructional and communication technologies. Practice experience in teaching second language literacy; reflection on connections between theory and practice. Limited enrollment. —Menard-Warwick

310. Language Pedagogy for Teacher Educators (4)
Seminar—3 hours; tutorial; project: fieldwork. Prerequisite: admission to Ph.D. program in Linguistics or consent of instructor; significant language teaching experience. Current issues in second language pedagogy, with a focus on communicative methodology, participatory curricula design, and classroom literacy practice. Emphasis on reflective teaching and action research. May be repeated up to 12 units for credit. —I. Menard-Warwick, Ramanathan

391. Oral English for ESL Students (3)
Lecture—2 hours; laboratory—2 hours. Prerequisite: open only to non-native speakers of English with prior enrollment to international student teaching assistants; completion of any required ESL courses or consent of instructor. Course gives non-native English-speaking students, particularly international student teaching assistants, intensive work in oral English to increase fluency, accuracy, and use of appropriate English language. (East Asian Languages and Cultures)

396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.) —I, II, III.
Literature in Translation

The following courses are open to students throughout the campus. The readings can be in English. See departmental listing for the course description.

Chinese
10. Chinese American Literature [in English]
11. Great Books of China [in English]
50. Introduction to the Literature of China and Japan [in English]
100A. Daoist Traditions

Luso-Brazilian Studies

(College of Letters and Science)

The Department of Spanish and Portuguese sponsors the minor in Luso-Brazilian Studies, which offers students the opportunity to engage with the Portuguese-speaking world as a global space, as well as gain in-depth knowledge of Brazilian literature, culture and society. The minor is structured to facilitate engagement with Latin American, peninsular, and transatlantic topics, while ensuring that students master the essential skills of linguistic competence, and literary and cultural knowledge.

UNITs

Technology Management .................... 20
Choose five courses from: Management 120, 140, 150, 160, 170, 180.................... 20

Courses in Management

(MGT/MGB/MGP)

Lower Division

11A. Elementary Accounting (4)

11B. Elementary Accounting (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 11A. Theory of product costing; analyzing the role and impact of accounting information in decision making; planning and performance evaluation. GE credit: SocSci | SS.—III. (III.

Upper Division

100. Introduction to Financial Accounting (3)
Lecture—3 hours. Course is open to all upper division undergraduate and graduate students, except those in the Graduate School of Management. Introduction to financial accounting, including balance sheet and statements of income and cash flow, as well as their analysis by investors and managers.

120. Managing and Using Information Technology (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 11A, Mathematics 16B, 17B, or 21B, Statistics 100, 102, 103, or 108. Introduction to computer hardware, systems software, and information systems. Management of information technology and the impact of information systems on modern management. —III.

140. Marketing for the Technology-Based Enterprise (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 11A, Mathematics 16B, 17B, or 21B, Statistics 100, 102, 103, or 108. Marketing in technology-based companies, with emphasis on how scientists, engineers, and business people interact to develop and market products and services.—II.

150. Technology Management (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 11A, Mathematics 16B, 17B, or 21B, Statistics 100, 102, 103, or 108. Management of firms in high technology industries such as software development and biotechnology research. Motivating and managing workers, organizing for innovation, and making decisions.—I.

160. Financing New Business Ventures (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 11A, Mathematics 16B, 17B, or 21B, Statistics 100, 102, 103, or 108. Concepts and methods used to structure and finance new business ventures. Topics include the evaluation of new investment projects, raising venture capital, the role of the venture capitalist, and the choice of organizational structure in new ventures.—II.

170. Managing Costs and Quality (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 11A, Mathematics 16B, 17B, or 21B, Statistics 100, 102, 103, or 108. Designing cost systems in high technology organizations and managing operations to maximize quality and minimize costs. Topics include activity based costing and management, quality control and process design, cost allocation, and differential costing for decision making.—I.

180. Supply Chain Planning and Management (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 11A, Mathematics 16B, 17B, or 21B, Statistics 100, 102, 103, or 108. Quantitative techniques for analysis and management of modern supply chains for the production and delivery of goods and services.—I. Woodruff

Graduate—Core Courses

200A. Financial Accounting (3)
Lecture—3 hours. Prerequisite: graduate student in the Graduate School of Management. Introduction to the concepts and objectives underlying the preparation of financial statements. Topics include understanding the accounting cycle, measurement of valuation and cost, recognition of events, and analysis of financial statements and the nature of transactions associated with financial position of a firm.—I. (I.) Vermal

200B. Managerial Accounting (3)
Lecture—3 hours. Prerequisite: graduate student in the Graduate School of Management. Information managers should know to be effective, including: product costing, motivating people, and differential analysis for decision making. Includes team projects and written and oral presentations.—II, IV (II, IV.) Ramanan

201A. The Individual and Group Dynamics (3)
Lecture—3 hours. Prerequisite: graduate student in the Graduate School of Management. Examines basic psychological and social psychological processes shaping human behavior and applies knowledge of these processes to the following organizational problems: motivation, job design, commitment, socialization, culture, individual and group decision making, and team building.—I. (I.) Elsbach

201B. Organizational Structure and Strategy (3)
Lecture—3 hours. Prerequisite: graduate student in the Graduate School of Management. Analysis of structural properties of organization including differentiation and vertical and horizontal integration. Alternative structural arrangements including functional, divisionalized, matrix, and hybrid structures. Relationship between environment, structure, and strategic objectives. Organization life cycle and changes.—II, III, IV, V. (II, IV.) Ramanan

202A. Markets and the Firm (3)
Lecture—3 hours. Prerequisite: course 201A. Examines the interaction of consumers, firms and government, and the effect this interaction has on the use of resources and the firm profitability. Fundamentals of demand concepts such as marginal analysis, opportunity cost, pricing, and externalities are introduced and applied.—II. (II.)

202B. Business, Government, and the International Economy (3)
Lecture—3 hours. Prerequisite: course 202A. Examines the influence of government and international factors on business. Topics include distribution of income, business cycles, inflation and interest rates, the federal debt, monetary policy and international trade and finance.—II. (II.)

203A. Data Analysis for Managers (3)
Lecture—3 hours. Prerequisite: graduate student in the Graduate School of Management MBA program or consent of instructor. Introduction to and use of statistics and data analysis for managerial decision making. Descriptive statistics, principles of data collection, analysis, sampling, quality control, regression, and forecasting. Applications of data analytic methods to problems in marketing, finance, accounting, production, operations, and public policy.—II. (II.)

203B. Forecasting and Managerial Research Methods (3)
Lecture—3 hours. Prerequisite: course 203A. Practical statistical methods for managerial decision making covers regression analysis, time series analysis and forecasting, design and analysis of experiments
223. Power and Influence in Management (3)
Seminar—3 hours. Prerequisite: consent of instructor. Investigation of the bases of power in organizations and the tactics used to translate power into influence. Topics include the control of resources (including information), social psychological processes (including compliance and the construction of meaning, and ethics.—I. (I.) Palmer

224. Managing Human Resources (3)
Lecture/discussion—3 hours. Restricted to students in the MBA program. Explore choices firms make in managing working conditions as to wages, benefits, working conditions, and other management policies and practices. Analyze employment systems fit with firms’ environments and strategies, and consequences of choices managers make regarding policies and practices. Not open to students who have taken MGT/B 224.—II. (II.) Hsu

239. Digital Marketing (3)
Lecture/discussion—3 hours. Prerequisite: course 204. Course equips students for a career in digital marketing and social media. Topics include online advertising, search engine optimization, interactive mktg, online privacy issues, e-commerce, social influence, social networking, and social influence, integrating social and traditional media.—III. (III.) Yoganarasimhan

240. Management Policy and Strategy (3)
Lecture—3 hours. Prerequisite: first-year core courses of M.B.A. program for chance of missteps, objectives strategies, policies, structures, measures and incentives which bear on the management of an organization. Real client organizations, in the private and public sectors, are assigned to student teams as the subjects of study.—II. (II.) Suran

241. New Product Development (3)
Lecture/discussion—3 hours. Prerequisite: course 249 or consent of instructor; restricted to graduate students in the School of Management. Disseminates state-of-the-art concepts and methods to enhance the effectiveness of new product development activities. Focuses on the understanding of managerial issues and how acquiring the ability to solve problems.—III. (III.) Naik

242. Marketing Communications (3)
Lecture—3 hours. Issues in designing a marketing communications strategy. Topics include mass and direct communications, institutional aspects of advertising, consumer behavior, evaluating ad effectiveness, determining ad budget, creative strategy, and use and abuse of promotions.—III. (III.) Naik

244. New Venture / Small Business Venturing (3)
Lecture—3 hours. Emphasizes starting a new business venture or managing a small, ongoing business during its formative stages. The business plan. Legal forms, financial considerations, the management team. The entrepreneurial student develops a detailed business plan.—IV. (IV.)

246. Negotiation and Team Building (3)
Lecture—3 hours. Prerequisite: courses 202, 205. Teaches basic theory of negotiation; applies theory to process of building teams to achieve business purposes. Covers integrative and distributive strategies of claiming value, how to recognize bargaining tricks, uncovering hidden agendas, brainstorming to extend Pareto frontier.—II. (II.) (III.) Elsbach

247. Customer Service as a Marketing Tool (3)
Lecture—3 hours. Understanding the distinct features of services, how to create value through service, methods of building strong relationships with customers, methods of measuring and building customer satisfaction, and measuring the financial impact of service improvement.—I. (I.)

248. Marketing Strategies (3)
Lecture—3 hours. Examines marketing process by which organizations develop strategic marketing plans. Includes definition of activities and products, marketing audits, appraising market opportunities, design of new activities and products, and organizing marketing planning function. Applications to problems in private and public sectors.—I. (I.) Rubel

249. Marketing Research (3)
Lecture—3 hours. Course addresses the managerial issues and problems of systematically gathering and analyzing information for making private and public marketing decisions. Covers the cost and value of information, research design, information collection, measuring instruments, data analysis, and marketing research applications.—III. (III.) Bunch

250. Technology, Competition and Strategy (3)
Lecture—3 hours. Prerequisite: completion of first-year core courses at the Graduate School of Management or the equivalent. Restricted to students in the MBA program. Why is software typically so defective? Why do many firms in the IT industry give away their best products free? This course helps you analyze questions like these by modeling competition and strategy in the network, technology and information industries.—II. (II.) Bhargava

251. Management of Innovation (3)
Lecture—3 hours. Managing innovative enterprise in changing and uncertain environments. Covers technology forecasting and assessment, program selection and control, financial management, regulation, and ethics.—I. (I.) Biggert

252. Managing for Operational Excellence (3)
Lecture—3 hours. Open to students in the Graduate School of Management. Explores the management of operations as applied to manufacturing as well as services provided both inside and outside the organization. Develop an understanding of how uncertainty affects planning and delivery by looking at fundamental models of operations.—IV. (IV.) Woodruff

260. Corporate Finance (3)
Lecture—3 hours. Focuses on planning, acquiring, and managing a company’s financial resources. Includes discussion of financial aspects of mergers and other forms of reorganization; analysis of investment, financial, and dividend policy; and theories of optimal capital structure.—III. (III.) Scherbina

261. Investment Analysis (3)
Lecture—3 hours. Examines asset pricing theories and relevant evidence, including the investment performance of stocks and bonds. Topics include the efficiency of markets, dollar denomination, portfolio diversification, factors influencing the value of stocks and other investments, and portfolio management and performance.—IV. (IV.) Chen

263. Derivative Securities (3)
Lecture/discussion—3 hours. The behavior of options, futures, and other derivative securities markets and how public agencies, business and others use those markets. Trading strategies involving options, swaps, and financial futures contracts. Pricing of derivative securities, primarily by arbitrage methods. Open to students enrolled in the MBA program.—III. (III.)

265. Business Taxation (3)
Lecture—3 hours. Analysis of the impact of business taxation on investment, production, and finance decisions. Discussion of the relationship between business organization and tax liability. Course is not intended for tax specialists.—II. (II.) Yetman

266. International Finance (3)
Lecture—3 hours. Prerequisite: course 207 or the equivalent. Open economy macroeconomics, balance of payments theory, and financial decision making in multinational firms.—II. (II.)

267. Teams and Technology (3)
Lecture/discussion—3 hours. Restricted to working professional MBA students or consent of instructor. Theory and practice of managing teams with primary goals of: providing conceptual guidelines for analyzing and diagnosing group dynamics and determining strategic options as a manager; impart-
ing interpersonal skills for implementing effective strategies; understanding how technological change affects business processes—III.  

268. Articulation and Critical Thinking (3)  
Laboratory/discussion—3 hours. With commitment to this course, students will become competent public speakers, write well at a level expected in business, think critically and analytically about business challenges and have a useful personal code of ethics to shape their actions and decisions. No student may repeat course for credit.—I (II).  

269. Business Intelligence Technologies—Data Mining (3)  
Lecture/discussion—3 hours. Prerequisite: completion of core courses at the Graduate School of Management or the equivalent. Restricted to students in the MBA program. May be repeated for credit.—III. (III.) Y. Yang  

270. Corporate Financial Reporting (3)  
Lecture/discussion—3 hours. Prerequisite: completion of core courses at the Graduate School of Management or the equivalent. For MBA students and others who use accounting and other information in making rational investment, lending decisions. Emphasis is placed on the analysis of financial information in a variety of contexts. Where applicable, recent research in finance and economics is discussed.—III. (II.) Griffin  

271. Strategic Cost Management (3)  
Laboratory/discussion—3 hours. Theoretical frameworks and associated techniques for using organizational design and cost management to achieve a sustainable, profitable cost structure. Topics include: targeting; strategies for low cost, total cost of ownership, cost of customers, implementing structural change, and incentives.—III. (III) Anderson  

272. Evaluation of Financial Information (3)  
Lecture—3 hours. Studies how investors, creditors, others use accounting and other information in making rational investment, lending decisions. Emphasis is placed on the analysis of financial information in a variety of contexts. Where applicable, recent research in finance and economics is discussed.—III. (III.) Griffin  

273. Accounting and Reporting for Government Nonprofit Entities (3)  
Lecture—3 hours. Concepts, methods, and uses of accounting and financial reporting by governmental and nonprofit entities. In addition to budgeting and performance evaluation, and accounting for entities such as hospitals, universities, and welfare agencies.  

274. Corporate Governance (3)  
Lecture—3 hours. Prerequisite: restricted to full-time MBA students or consent of instructor. Discusses how corporations can better operate in the interests of shareholders and public. Directly relevant to managers, consultants in compensation and incentives, staff working on mergers and acquisitions, corporate regulators, shareholder rights activists, and board members. II, III, (III. I.)  

275. Real Estate, Finance and Development (3)  
Lecture—3 hours. Prerequisite: courses 201A and 207. Focus on single family, attached, detached, multi-family, and light commercial development. Students will study examples which make up successful real estate developments. Course will consider financial aspects involved in land acquisition, land development, construction, and project lending.—III.  

281. Systems Analysis and Design (3)  
Lecture—3 hours. Design and specification of computer-based information systems. Applications systems development life cycle, use requirements and feasibility assessment, logical and physical design, program development and testing, conversion and implementation.  

282. Supply Chain Management (3)  
Lecture/discussion—3 hours. Prerequisite: completion of first-year core courses at the Graduate School of Management or the equivalent, knowledge of Microsoft Excel. Restricted to students in the MBA program. Matching supply with demand is a primary challenge in any firm: excess supply is too costly, inadequate supply irritates customers. Matching supply to demand is easiest when a firm has a flexible supply process, but flexibility is generally expensive.—II. (II.)  

284. Applied Linear Models for Management (3)  
Lecture—3 hours. Covers regression, analysis of variance, and multivariate analysis. Topics will focus on applications to management and policy problems.—Tsai  

285. Time Series Analysis and Forecasting (3)  
Lecture—3 hours. Considers application of time series methods to evaluation and forecasting of problems. Covers univariate and multivariate ARIMA models and transfer function models. Applications will be in such areas as economics, finance, budgeting, program evaluation, and industrial process control.—Tsai  

286. Telecommunications and Computer Networks (3)  
Lecture—3 hours. Prerequisite: course 280. Communication systems components; common carrier services; design and control of communications networks; network management and distributed environment; local area networks; data security in computer networks.—Tsai  

287. Database Systems (3)  
Lecture—3 hours. Prerequisite: course 280. Hierarchical, network, and relational models for database systems. Design and implementation of models. Performance evaluation and forecasting. Query languages; database structures and languages. Data security and integrity. Application to managerial decision making and decision support systems.—II. (II.) Yang  

288. Special Topics in Management of Information Systems (3)  
Lecture—3 hours. Managerial aspects of information systems. Topics stressing applications in organizations chosen from: economics of computers and information systems, support systems, management of computer-based information systems, office automation.—Topics  

290. Topics in General Management (3)  
Seminar—3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Advanced topics in general management. May be repeated for credit.—I, II, III, (II, III.) Woodruff  

291. Topics in Organizational Behavior (3)  
Seminar—3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Advanced topics in social psychology and sociology of organizations. Varied topics to cover more extensively issues discussed in courses 201A and 201B, or current interest topics in fields of business writing, business communications, development, or workplace processes. May be repeated for credit.—I, II, III, (I, II, III.) Woodruff  

292. Topics in Finance (3)  
Seminar—3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Contemporary and emerging issues in finance. Application of modern techniques of finance to business problems. Use of appropriate electronic database and research techniques. May be repeated for credit.—I (I.)  

293. Topics in Marketing (3)  
Seminar—3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Advanced topics in marketing, which may include marketing research, new product development, brand management, pricing, distribution management, service marketing, hitech marketing, advertising, sales promotions, marketing through the Web. May be repeated for credit.—I (I.)  

294. Topics in Accounting (3)  
Seminar—3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Contemporary and emerging issues in financial management accounting. Application of modern techniques of evaluation and analysis of financial information. Use of appropriate electronic database and research techniques. May be repeated for credit.—I (I.)  

295. Topics in Information Technology (3)  
Seminar—3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Applications of information technology to management and management of information technology. Adaptation to the dynamic nature of the field. May be repeated for credit.—I (I.)  

296. Topics in Technology Management (3)  
Seminar—3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Cyclical nature of innovation and technological change, features of innovative firms and industries, national innovation systems, and impact of information technologies on innovation processes. May be repeated for credit.—III. (III.) Bhargava  

297. Topics in International Management (3)  
Seminar—3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Broader environmental issues which U.S. firms and their foreign competitors operate. Integration of material from other topics (marketing, strategy, finance, accounting, information technology, technology management) into the international setting. May be repeated for credit.—IV. (IV.)  

298. Directed Group Study (1-5)  
Prerequisite: consent of instructor. (S/U grading only.)  

299. Individual Study (1-12)  
Prerequisite: consent of instructor. (S/U grading only.)  

Professional  

401. Crisis Management (1)  
Laboratory/discussion—1 hour. Establishes and explores the defining characteristics of crises. Will learn to anchor crisis management firmly within overall strategic management and also acquire a set of useful tools and techniques for both and handling actual crises.—(S/U grading only).—I (I.) Biggs  

402. Crisis Communications and Reputation Management (1)  
Laboratory/discussion—1 hour. Intended to provide you with an understanding of the framework and tools necessary to successfully address communications and reputation management tasks in a variety of crisis situations. (S/U grading only).—I (I.) Friedman  

403. Business Statistics Practicum (1)  
Project—1 hour. Prerequisite: MGT, MGB, or MGB 203A is a prerequisite. In addition, students must be concurrently enrolled in (or completed) MGT, MGB, or MGB 203B. Restricted to students in the MBA program. Applies techniques and concepts in business statistics to real case studies.—II (II.)  

404. Organizational Change Management (1)  
Laboratory/discussion—1 hour. Challenges in getting significant changes made in organizations. Learn Organization Change Management (OCM) techniques and discuss case situations where OCM techniques play a role. (S/U grading only).—II (II.) Mathur  

405. Business Literature (1)  
Laboratory/discussion—1 hour. Will examine Business history – historical trends that might influence contemporary business. Some argue that the recent
collapse of our financial system might have been averted if business leaders had a better sense of history. (S/U grading only)—II. (II.) Biggar

406. Ethical Issues in Management (1)
Lecture/discussion—1 hour. Explores the philosophical foundation of ethical theory and its recent applications to business situations. Professional codes of ethics, as promulgated by educational, managerial, engineering, scientific, medical and legal professional societies, are presented. (S/U grading only)—II. (II.)

407. Storytelling for Leadership (1)
Lecture/discussion—1 hour. Internals the fundamental principles behind stories that educate, influence, motivate, inspire, persuade and connect. (S/U grading only)—III. (III.)

408. The Business of the Media (1)
Lecture/discussion—1 hour. Focuses on the media industries and how emerging digital technologies are disrupting the way media consumption, distribution and business models work. Will highlight the economics of several media—the news and entertainment. (S/U grading only)—II. (II.),IV. (IV.)

409. Managing Multi-Asset Class Investment Portfolios (1)
Lecture/discussion—1 hour. Prerequisite: course 202. 203A, discussing a wide variety of investment principles, both theoretical and pragmatic. Helps prepare students to more thoughtfully approach investment decision-making. Topics include: Endowments, pension funds, family offices, sovereign wealth funds, and insurance companies. —III. (III.)

410. Corporate Governance (1)
Lecture/discussion—1 hour. Covers recent and not-so-recent accounting scandals, discussing how corporations can better operate in the interests of shareholders and the public, and learn from people who rely on corporate governance in making investment decisions. (S/U grading only)—I. (I.),II. (II.),III. (III.),IV. (IV.)

411. Turnaround Management (1)
Lecture/discussion—1 hour. Evaluate the financial performance of a company, identify opportunities for improvement, propose real solutions to enhance performance, and gain inspiration to action in staff. (S/U grading only)—I. (I.),II. (II.),III. (III.),IV. (IV.)

412. International Marketing (1)
Lecture/discussion—1 hour. Understanding basic concepts of international marketing. Understanding and analyzing the economic, political, social and cultural forces impacting businesses operating internationally, and the interdependent environments across countries. How to develop and implement an international marketing strategy; where and how to compete, how to adapt to your marketing mix. —II. (II.)

413. Sustainable Business Ventures: Business and Energy (1)
Lecture/discussion—1 hour. Introduction to sustainable goals, indicators, values, measurement techniques, and practice how it applies to large and small enterprise. —II. (II.)

414. Multi-Channel Marketing (1)
Lecture/discussion—1 hour. Multi-channel marketing strategies empower managers to create value for different customer segments. Covers the necessary concepts to evaluate and select go-to-market strategies in order to capitalize on the ubiquity of modern customers. (S/U grading only)—I. (I.),II. (II.),III. (III.),IV. (IV.)

415. Climate Change and Corporate Strategy (1)
Lecture—1 hour. Prerequisite: course 205. Restricted to students in the MBA program. Focuses on the finance principles related to the risk and return of the private equity (PE) industry, valuation of PE target companies, the structuring of leveraged buyouts (LBOs), and the management of portfolio companies. (S/U grading only)—II. (II.)

417. Incentives and Controls (1)
Lecture/discussion—1 hour. Understand how organizations use financial and nonfinancial performance management systems to motivate people and manage resources. (S/U grading only)—I. (I.),II. (II.),III. (III.),IV. (IV.)

418. Scientific Discovery and Business Innovation: The Food and Agriculture Sector (1)
Lecture—3 hours. Restricted to students in the MBA program. Scientific discovery and business innovation within the food and agriculture sector profoundly influences the sustainability of society and enterprise competitiveness. Students will learn how business innovation models co-exist antagonistically or synergistically with scientific discovery and its influence on enterprise competitiveness. (S/U grading only)—II. (II.),III. (III.),IV. (IV.)

424. Practicum for Managing People in Modern Organizations (1)
Project—1 hour. Prerequisite: course 224. Restricted to students in the MBA program. Provides solid grounding in the management of work and the employment relationship. Examines firms’ interrelated policies and practices for managing people. —II. (II.)

434. Practicum for Pricing (1)
Project—1 hour. Prerequisite: course 234. Restricted to students in the MBA program. Enhance understanding of the principles and concepts learned in Pricing by: (1) performing statistical and mathematical skills, and (2) requiring a report for a Real Pricing case. —II. (II.),Iang

440. Integrated Management Project (3)
Project—3 hours. Prerequisite: first-year core courses of M.S.A. and application learning. Solve complex business challenges for real world clients. Student teams learn practical consulting skills while their clients benefit from the student’s experience, insights, and work product. (Deferred grading only, pending completion of sequence.) —I. (I.)

440A. Integrated Management Project (3)
Lecture/discussion—3 hours. Prerequisite: first-year core courses of MBA program. Restricted to full-time (day) MBA students. Applies classroom learning to solve complex business challenges for real world clients. Student teams learn practical consulting skills while their clients benefit from the student’s experience, insights, and work product. (Deferred grading only, pending completion of sequence.) —I. (I.)

442. Practicum for Marketing Communication (1)
Project—1 hour. Prerequisite: course 242. Restricted to students in the MBA program. Provides experience applying concepts learned in Marketing Communications to a realistic advertising or communication problem faced by firms. —III. (III.)

443. Practicum for Customer Relationship Management (1)
Project—1 hour. Prerequisite: course 243. Restricted to students in the MBA program. Hands-on training in applying Customer Relationship Management concepts and metrics to secondary data. Enhances ability to interpret results and decide the right type of marketing actions by requiring an executive report at the end of the quarter. —I. (I.)

448. Practicum for Strategy (1)
Project—1 hour. Prerequisite: course 248. Restricted to students in the MBA program. Provides opportunities to apply the concepts covered in the Marketing Strategies class through a project group involving the analysis of strategic marketing decisions based on business-related issues, simulation and modeling. —I. (I.)

449. Marketing Research Practicum (1)
Project—1 hour. Prerequisite: course 249. Restricted to students in the MBA program, or in some cases with permission of instructor. Provides opportunities to apply the concepts and methods covered in the Marketing Research class. Hands-on and project-based, work could be either individual or in groups depending on enrollments and/or interests of students. —III. (III.)

450. Practicum for Technology Strategy and Competition (1)
Project—1 hour. Prerequisite: course 250. Restricted to students in the MBA program. In-depth practicum project course. Apply the concepts and methods learned in course 250 to a real-world business problem, through data collection, data analysis, simulation, modeling and post-model interpretation. —II. (II.)

460. Practicum for Corporate Finance and Real Estate (1)
Project—1 hour. Prerequisite: course 260. Restricted to students in the MBA program. Work in groups to select a value and a financial entity; could be a firm, a sports player, a building, a project, or a patent. Grade based on an in-class presentation and a write-up. —III. (III.)

461. Practicum for Investment Analysis (1)
Project—1 hour. Prerequisite: course 261. Restricted to students in the MBA program. Provides practical experience applying concepts learned in Investment Analysis to a realistic portfolio management setting via a hypothetical exercise or a realistic executive summary and presentation of an investment proposal for a hypothetical client. —I. (I.)

464. Practicum for Taxes and Business Strategy (1)
Project—1 hour. Prerequisite: course 264. Restricted to students in the MBA program. Practical application project drawing from the tax planning theory contained in course 264. Project consists of a business formation and operating, change in organizational (incorporation), and movement into multinational and multi-jurisdictional tax. —I. (I.)

465. Practicum for Venture Capital (1)
Project—1 hour. Prerequisite: course 265. Restricted to students in the MBA program. Provides an opportunity to apply concepts learned in a realistic setting. Complete project analyzing a potential investment in a hypothetical venture and prepare a deal term sheet/investment agreement. —III. (III.)

467. Practicum for Teams and Technology (1)
Project—1 hour. Prerequisite: course 267. Restricted to students in the MBA program. Groups are allocated a business or technology problem and are required to investigate the performance, creativity, conflict, information sharing, and leadership behaviors of a real world team. Provide consulting advice to the team, which not only gives analytic skills, but also builds presentation skills. —III. (III.)

469. Practicum for Business Intelligence Technologies (1)
Project—1 hour. Prerequisite: course 269. Restricted to students in the MBA program. Provides experience applying concepts learned in Business Intelligence Technologies to real business problems. —III. (III.)

482. Practicum for Supply Chain Management (1)
Project—1 hour. Prerequisite: MGT, MGB, or MGB 282 is a prerequisite or co-requisite. Restricted to students in the MBA program. Provides experience applying concepts learned in Supply Chain Management to a realistic management setting via a project. —I. (I.)

490. Directed Group Study Management Practicum (3)
Lecture/discussion—3 hours. Prerequisite: consent of instructor; sponsorship of a GSM Academic Senate faculty member; approval of graduate advisor. Projects:

Quarter Offered: I-Fall, II-Winter, III-Spring, IV-Summer, 2015-2016 offering in parentheses

Pre-Fall 2011 General Education (GE): ArtH—Arts; Div—Division; H—Humanities; SciE—Science; SocSci—Social Sciences; Div—Division; Wrt—Writing Experience

Fall 2011 and on Revised General Education (GE): AH—Arts and Humanities; SciE—Science and Engineering; SocSci—Social Sciences; ACGH—American Cultures; DD—Dominant Diversity; OL—Oral Skills; QL—Quantitative; SL—Scientific; VL—Visual; WC—World Cultures; WE—Writing Experience
Managerial Economics

(College of Agricultural and Environmental Sciences)

http://manecon.ucdavis.edu

Faculty. See Agricultural and Resource Economics, on page 143.

Major Advisers. Contact Department office.

Undergraduate Advising Center for the major, minor, and course offerings (including peer advising) is located in 1176 Social Sciences and Humanities Building, 530-754-9536, http://manecon.ucdavis.edu.

The Major Program

The Managerial Economics major at UC Davis is a disciplinary program combining strong preparation in microeconomic theory and quantitative methods. It prepares students for the analysis of management and policy issues in business, finance, marketing, production, agriculture, food distribution, natural resources, the environment, resource allocation, and international trade and development. Students specialize in one of three options: (1) Managerial Economics focuses on the economic aspects of managerial decision-making. (2) Environmental and Resource Economics focuses on issues related to the use of resources and environmental quality. (3) Agricultural Economics focuses on the economic and policy aspects of production and marketing of foods and fibers. Students in the Managerial Economics program develop valuable skills and strengths that lead to careers in business and government.

Internships and Career Alternatives. Students in managerial economics have opportunities to gain additional career information and preparation through internships in a variety of private business and governmental agencies. Graduates qualify for supervisory and management training positions in banking, finance, commodity and stock brokerages in the private sector, farm and ranch production, food and agricultural processing, agricultural sales and service, and a variety of agency career positions in local, state, and federal government. Graduates are well qualified to seek advanced degrees in agricultural and resource economics, economics, business administration, public policy, or law. For more information, see http://iccweb.ucdavis.edu.

Study Abroad. The Agricultural and Resource Economics department wishes to accommodate students who would like to complement their Managerial Economics degree with a study abroad experience. Up to eight units of upper division credit (excluding core courses) from international campuses may be used towards the completion of the degree or the prerequisite courses. These courses will apply towards the Managerial Economics degree or minor, students need to select courses from the pre-approved list at UC Davis Study Abroad or pre-approve in the Agricultural and Resource Economics department for the courses they wish to complete.

B.S. Major Requirements:

UNITs

Major English Requirement 4

Choose one course from: English 3, University Writing Program 1, 18, 19, 101, 102A-G, 104A-F. (May not duplicate courses taken to meet the English Composition requirement for the College of Agricultural and Environmental Sciences.) NOTE: University Writing Program 104A is highly recommended.

Preparatory Subject Matter 35-37

One course from: Plant Sciences 21, Engineering Computer Science 10, 15 or 30 3-4

Economics 1A-1B 8

Management 11A-11B 8

Mathematics 16A-16B, 17A-17B, or 21A-21B 8

Statistics 13, 103 8

Major Breadth Social Science, Natural Science, Natural Resources, 37 and Agricultural Sciences.

Managerial Economics emphasis

Agricultural and Resource Economics 100A, 100B, 106, 155 and Economics 101 20

Restricted Electives 32

Choose at least one of the options below:

Managerial Economics option

Agricultural and Resource Economics 18, 4

Choose at least 12 units from: Agricultural and Resource Economics 112, 118, 119, 136, 157, 171A, 171B.

Environmental and Resource Economics option

Agricultural and Resource Economics 175, 176 8

Select the remaining 15 units from the aforementioned courses or upper division courses in Agricultural and Resource Economics and/or, Economics, Environmental Change and Policy 160, 161, 163, 165, 166, 167, 171, 172, 173, Environmental Toxicology 138.

Agricultural Economics option

Choose at least 15 units from Agricultural and Resource Economics 120, 121, 130, 132, 138, 139, 140, 145, 150.

Select the remaining 17 units from the aforementioned courses or upper division courses in Agricultural and Resource Economics and/or, Economics, Environmental Science and Policy 168A, 168B, 178.

Select additional upper division Agricultural and Resource Economics courses to complete the 18-unit total for the minor.

Environmental and Natural Resource Economics emphasis

Agricultural and Resource Economics 100A or the equivalent 4

Additional upper division courses in Agricultural and Resource Economics 14

Managerial Economics emphasis

Agricultural and Resource Economics 100A or the equivalent 4

Additional upper division courses in Agricultural and Resource Economics 14

Select 9 or more units from Agricultural and Resource Economics 112, 118, 136, 157, 171A, 171B.

Select additional upper division Agricultural and Resource Economics courses to complete the 18-unit total for the minor.

Agricultural Economics emphasis

Agricultural and Resource Economics 100A or the equivalent 4

Additional upper division courses in Agricultural and Resource Economics 14

Select 9 or more units from Agricultural and Resource Economics 120, 130, 132, 138, 139, 140, 145, 150.

Select additional upper division Agricultural and Resource Economics courses to complete the 18-unit total for the minor.

Graduate Study. Students who meet the admission requirements of Graduate Studies and the Department of Agricultural and Resource Economics may pursue studies leading to the M.S. and Ph.D. degrees. For information on admission to graduate study, degree requirements, consult the Graduate Program Coordinator in the Department of Agricultural and Resource Economics; also see http://agecon.ucdavis.edu.

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2010-2016 offering in parentheses.

Pre-Fall 2011 General Education (GE): A=Arts, P=Project, H=Humanities, S=Science, E=Engineering, S=Social Sciences, D=Domestic Diversity, W=Writing Experience

Fall 2011 and on Revised General Education (GE): A=Arts and Humanities, S=Science and Engineering, SS=Social Sciences, ACQ=Cultural Awareness, DD=Domestic Diversity, OL=Oral Skills, QL=Quantitative, SL=Scientific, VL=Visual, WC=World Cultures, WE=Writing Experience
Marine and Coastal Science

The major in Marine and Coastal Science focuses on the interdisciplinary nature of marine sciences by exposing students to core, breadth, and focus area courses in the discipline, in addition to a strong foundation of science preparatory material. The major builds upon existing strengths at UC Davis in marine and coastal sciences as well as field-based courses offered at Bodega Marine Laboratory to provide students with a unique, interdisciplinary, "hands on" education. Initial advising is provided by the Department of Earth and Planetary Sciences for interested students.

The Program. The major begins with introductory courses in mathematics, chemistry, physics, biology, and earth sciences. These are followed by core courses in Marine Science. The major requirements provide focus and breadth, so that each student gains mastery in one area and broad exposure to many facets of Marine and Coastal Science. Focus and Breadth areas include: Coastal Environmental Processes, Marine Ecology and Organismal Biology, Marine Environmental Chemistry, and Oceans and the Earth System.

In this major, students will be exposed to the foundation disciplines within marine science (biology, chemistry, geology, physics) as well as modern issues facing marine and coastal environments; e.g., climate change, pollution, carbon cycling, conservation. The major requires field experience, independent research, and a capstone course. The major program includes both research and internship experiences to help prepare students for career paths.

Advising. Students majoring in Marine and Coastal Science are encouraged to meet with their faculty advisor (assigned, based upon Focus Area choice) once per year to review their coursework plans. Advising is available through the Department of Earth and Planetary Sciences, and student peer advisors are available. Faculty advisors include: Tessa Hill (College of Letters and Science), Gary Cherr (College of Agricultural and Environmental Sciences), and Brian Gaylord (College of Agricultural and Environmental Sciences).

The student's chosen Focus Area will determine the college into which the student is admitted, the college where the degree is awarded, and the associate department:
- Coastal Environmental Processes, College of Agricultural and Environmental Sciences; Environmental Science & Policy
- Marine Ecology & Organismal Biology, College of Biological Sciences; Evolution & Ecology
- Marine Environmental Chemistry, College of Agricultural and Environmental Sciences; Environmental Toxicology
- Oceans and the Earth System, College of Letters and Science; Earth and Planetary Sciences

B.S. Major Requirements:
† denotes courses only offered at Bodega Marine Laboratory.

Marine Environmental Chemistry. Emphasis on major themes in marine chemistry, geochemistry, the carbon cycle, and contaminant fate and transport.

The focus area requirement can be fulfilled using:

* Some courses may require additional prerequisites, such as: Chemistry 88, Geology 50, 60, Hydrology 145, Engineering: Civil and Environmental 144.

Oceans and the Earth System. A study of our changing oceans in the context of earth system history, including climate change, paleoceanography, ecological shifts, conservation, and marine policy.

The focus area requirement can be fulfilled using:

* Some courses may require additional prerequisites, such as: Atmospheric Sciences 60, Chemistry 8A, B, Geology 1, Economics 1A, Hydrology 145, Environmental Resource Sciences 100, Inter- national Relations

Breadth Requirement equal or greater than 8

Complete one course from each category below that is not the student's chosen Focus Area, totaling equal or greater than 8 units.

Coastal Environmental Processes. The breadth requirement can be fulfilled using the following courses: Atmospheric Sciences 116, Environmental Science & Policy 152, *155, Geology 182, Wildlife, Fish & Conservation Biology *157

Marine Ecology and Organismal Biology. The breadth requirement can be fulfilled using the following courses: Atmospheric Sciences 120, Environmental Science & Policy *110, *114, 115, Environmental Toxicology *127, Neurobiology, Physiology, and Behavior 114+114P

Marine Environmental Chemistry. The breadth requirement can be fulfilled using the following courses: Environmental Toxicology *120, Chemistry 100, Geology 182, Hydrology 134, 141

Oceans and the Earth System. The breadth requirement can be fulfilled using the following courses: Atmospheric Sciences 116, Environmental Science & Policy 166N, Evolution & Ecology *120, Geology 107, 108, Wildlife, Fish and Conservation Biology 154

* Some courses may require additional prerequisites; see above.

Field Requirement

Quarter Offered:
- Fall, Winter, Spring, Summer

Pre-Fall 2011 General Education (GE): AH = Arts and Humanities; S = Science and Engineering; SS = Social Sciences;
- AGHC = American Cultures; DD = Domestic Diversity; OL = Oral Skills; QQ = Quantitative; SL = Scientific; VL = Visual; WC = World Cultures; WE = Writing Experience

Fall 2011 and on Revised General Education (GE): AH = Arts and Humanities; S = Science and Engineering; SS = Social Sciences;
- AGHC = American Cultures; DD = Domestic Diversity; OL = Oral Skills; QQ = Quantitative; SL = Scientific; VL = Visual; WC = World Cultures; WE = Writing Experience

Quarterly Offered:

Fall, Winter, Spring, Summer
Master of Education (M.Ed.) (A Graduate Group)

The Master of Education (M.Ed.) program is no longer admitting students; admissions are suspended.

Master of Professional Accountancy (A Graduate Group)

Robert Yetman, Ph.D., Chairperson of the Group
Group Office, Gallagher Hall 530752.7658; fax 530.754.9355; http://gsm.ucdavis.edu/mastere-professional-accountancy

Faculty
Shannon W. Anderson, Ph.D., Professor (Graduate School of Management)
Roger Edelen, Ph.D., Associate Professor (Graduate School of Management)
Paul A. Griffin, Ph.D., Professor (Graduate School of Management)
Donald A. Palmer, Ph.D., Professor (Graduate School of Management)
N.V. Ramanan, Ph.D., Assistant Professor (Graduate School of Management)
Hollis A. Skalle, Ph.D., Professor (Graduate School of Management)
Michelle Yetman, Ph.D., Associate Professor (Graduate School of Management)
Robert Yetman, Ph.D., Professor (Graduate School of Management)

Affiliated Faculty
Will Snyder, M.B.A, C.P.A., Professor (Executive Director)

Graduate Adviser. Contact the Group office.

Courses in Master of Professional Accountancy (ACC)

201. Financial Reporting (4)
Lecture—4 hours. Restricted to Master of Professional Accountancy graduate students. Coverage includes the fundamentals of accounting and reporting of financial events and transactions. Emphasizes the preparation of balance sheets, income statements, cash flow statements, of cash flow, and statements of stockholders’ equity.—II. (II.)

Lecture—4 hours. Prerequisite: course 201 or Management 200A. Restricted to graduate students in the Graduate School of Management. Focuses on the Preparation of financial statements. Topics include accounting recognition, measurement, and disclosure, as well as the theoretical foundations of and motivations for financial reporting choices.—II. (II.)

205. Advanced Financial Reporting (4)
Lecture—4 hours. Prerequisite: course 203. Restricted to graduate students in the Graduate School of Management. Advanced treatment of recognition, measurement, and disclosure of items including depreciation, accounting for income taxes, mergers and acquisitions, consolidations, special-purpose entities, and foreign subsidiaries. Includes accounting for financial instruments and financial reporting entities, as well as advanced treatment of international accounting standards.—III. (III.)

211. Tax Reporting and Analysis (4)
Lecture—4 hours. Restricted to Master of Professional Accountancy graduate students. Introduction to the taxation of business entities and their related transactions, with an emphasis on the details of tax law and tax reporting requirements. Topics include individual, partnership, and corporate taxation, as well as tax theory. Not open for credit to students who have completed Management 264.—I. (I.)

213. Intermediate Tax Reporting and Analysis (4)
Lecture—4 hours. Prerequisite: course 211 or Management 264. Restricted to graduate students in the Graduate School of Management. Detailed analysis of federal taxation of individuals. Topics include the timing of income recognition, deductions, and credits for tax purposes, as well as the basics of property transactions.—II. (II.)

215. Advanced Tax Reporting and Analysis (4)
Lecture—4 hours. Prerequisite: course 213. Restricted to graduate students in the Graduate School of Management. Advanced treatment of complex tax transactions and entities. Topics include aspects of federal taxation of pass through entities and the applicable impact upon individual taxpayers. Coverage includes basis analysis as applicable to pass through entities and an introduction to professional responsibilities.—III. (III.)

217. Taxation of Individuals, Property, and Estates (4)
Lecture—4 hours. Prerequisite: course 213. Restricted to graduate students in the Graduate School of Management. In-depth analysis of individual income tax issues and property transactions including non-taxable exchanges, compensation, gifts, and transfers taxes. Expanded analysis of multiple tax issues is on the interaction of the taxation of complex individual transactions as well as planning techniques.—III. (III.)

219. Taxation of Business Entities (4)
Lecture—4 hours. Prerequisite: course 213. Restricted to graduate students in the Graduate School of Management. Analysis of detailed business entity tax issues including basis calculations, alternative minimum tax, multistate and multinational taxation, stock options, and mergers and acquisitions. Tax planning for entities and relationships between business entities and their owners. Offered irregularly.—III. (III.)

231. Analysis and Use of Accounting Reports (4)
Lecture—4 hours. Prerequisite: course 203. Restricted to graduate students in the Graduate School of Management. Evaluation of financial statements by managers and persons outside the firm, such as investors, creditors, and financial analysts. Topics include cash flow vs. income measurement, ratio and valuation analysis, and the effects of international accounting standards. Not open for credit to students who have completed Management 272.—II. (II.)

241. Auditing and the Accounting Profession (4)
Lecture—4 hours. Prerequisite: course 201 or Management 200A. Restricted to Graduate School of Management students. Introduction to the audit environment, professional standards, the accounting profession, and the professional responsibilities of accountants. Integrate audit topics across the areas of financial, tax, and tax systems accounting. (S/U grading only).—I. (I.)

243. Auditing and Attestation Services (4)
Lecture—4 hours. Prerequisite: course 241. Restricted to graduate students in the Graduate School of Management. Advanced treatment of the audit process and environment. Topics include audit planning and performance, evidence, internal controls, professional standards, and audit reports. Reviews, compilations and attestations services are examined, as are governmental agency audits.—III. (III.)

251. Managerial Accounting and Controls (4)
Lecture—4 hours. Prerequisite: course 201 or Management 200A. Restricted to graduate students in the Graduate School of Management. Analysis of management accounting systems including cost accounting, performance measurement, and compensation and reward systems. Focuses on the production of information useful for managerial decision-making, as well as the design of these systems. Not open for credit to students who have completed Management 271.—II. (II.)

253. Accounting Information and Control Systems (4)
Lecture—4 hours. Prerequisite: course 201 or Management 200A. Restricted to graduate students in the Graduate School of Management. Analysis of information systems used for accounting, record-keeping, and control. Topics include the regulatory requirements of accounting control systems as well as their implementation and auditing considerations.—III. (III.)

261. Communications for Professional Accountants (4)
Lecture—4 hours. Prerequisite: course 201 or Management 200A. Restricted to graduate students in the Graduate School of Management. Overview of written and oral professional communications with an emphasis on structuring and documenting audits and reports, understanding audiences (investors, creditors, regulators, and other stakeholders), and consideration of ethical and regulatory responsibilities.—II. (II.)

271. Accounting Ethics (4)
Lecture—4 hours. Prerequisite: course 201 or Management 200A. Restricted to graduate students in the Graduate School of Management. Analysis of accountants’ professional responsibilities and ethics. Topics include the behavioral foundations of ethics in a business environment, how those elements affect accountants’ integrity, objectivity, and independence. Professional standards related to accountants’ conduct are also covered.—I. (I.)

Master of Preventive Veterinary Medicine (A Graduate Group)

Ashley Hill, D.V.M., M.P.V.M., Ph.D., Chairperson of the Group

Faculty
John Adaska, D.V.M., M.P.V.M., Ph.D., Associate Professor of Clinical (Pathology, Microbiology & Immunology)
Sharif Aly, BVSc, M.P.V.M., Ph.D., Assistant Professor (Population Health and Reproduction)
Robert Atwill, D.V.M., M.P.V.M., Ph.D., Professor (Population Health and Reproduction)
Chris Barker, MS, Ph.D., Assistant Adjunct Professor (Pathology, Microbiology & Immunology)
Courses in Preventive Veterinary Medicine (MPM)

Professional

402. Medical Statistics I (5)
Lecture—37 sessions; laboratory—13 sessions. Prerequisite: MPMV standing in the School of Veterinary Medicine or consent of instructor. Statistics in clinical, laboratory, and population medicine: graphic, tabular, and tabular presentation of data; probability, binomial; Poisson, normal, t-, F-, and Chi-square distributions; elementary nonparametric methods; simple linear regression, multiple regression, logit models; computer applications of statistical procedures in population medicine.—I. (I.) Farver

403. Medical Statistics II (3)
Lecture—20 sessions; laboratory—10 sessions. Prerequisite: Medical Statistics I. MPMV standing in the School of Veterinary Medicine and/or successful completion of course 402 (or equivalent) or consent of instructor. Analysis of variance in biomedical sciences; nonparametric statistical methods; multiple regression; biomedical applications of statistical methods. Microcomputer applications to reinforce principles that are taught in lecture. Continuation of course 402.—II. (II.) Farver

404. Medical Statistics III (4)
Lecture—3 hours; laboratory—2 hours. Prerequisite: Medical Statistics II. MPMV standing in the School of Veterinary Medicine and/or successful completion of course 403 (or equivalent) or consent of instructor. Continuation of course 403. Analysis of time dependent variation and trends, analysis of multivariate frequency tables; logistic regression; survival analysis selecting the best regression equation; biomedical applications.—III. (III.) Farver

405. Principles of Epidemiology (4)
Lecture—4 hours. Prerequisite: Medical Statistics II. MPMV standing in the School of Veterinarian Medicine or consent of instructor. Basic epidemiologic concepts and approaches to epidemiologic research, with examples from veterinary and human medicine, including outbreak investigation, infectious disease epidemiology, properties of tests, and an introduction to epidemiologic study design and surveillance. (Same course as Epidemiology 205A.)—I. (I.) Gold, Miller

405L. Epidemiology Laboratory (1)
Lecture—1 session; laboratory—1 session. Prerequisite: Medical Statistics II. MPMV standing in the School of Veterinary Medicine or consent of instructor. Practical application of epidemiological methods using the microcomputer as a tool to solve problems. Utilizes spreadsheets and databases as tools to organize and analyze data. Emphasizes epidemiological methods introduced in course 405. Data sets provided.—I. (I.) Lehnenbauer

406A. Epidemiologic Study Design (3)
Lecture—20 sessions, discussion—6 sessions, laboratory—4 sessions. Prerequisite: Medical Statistics III. MPMV standing in the School of Veterinary Medicine or consent of instructor. Builds on concepts presented in course 405. Concepts of epidemiologic study design—clinical trials, observational cohort studies, case control studies, stratified studies—introduced in course 405 and covered in more depth, using a problem-based format. Discussion of published epidemiologic studies. (Same course as Epidemiology 206.)—II. (II.) Miller

408A. Veterinary Research: Planning and Reporting (1)
Lecture—20 sessions. Prerequisite: Medical Statistics II and consent of instructor. Planning, critical analysis, ethics, and written and oral communication of veterinary research.—Foley

408B. Veterinary Research: Planning and Reporting (1)
Lecture—10 sessions. Prerequisite: Medical Statistics II and consent of instructor. Planning, critical analysis, ethics, and written and oral communication of veterinary research.—Foley
### Mathematical and Physical Sciences

**[College of Letters and Science]**

Louise H. Kellogg, Ph.D., Program Director

**Program Office.** 118 Everson Hall

**Committee in Charge**

Andreas J. Albrecht, Ph.D. (Physics)
Sheila David, Ph.D. (Chemistry)
Joel Hass, Ph.D. (Mathematics)
Isabel P. Montañez, Ph.D. (Earth and Planetary Sciences)

Motohico Mulase, Ph.D. (Mathematics)
Academic Senate Distinguished Teaching Award

Wolfgang Polonik, Ph.D. (Statistics)
Francisco J. Samaniego, Ph.D. (Statistics)

Academic Senate Distinguished Teaching Award

Howard J. Spero, Ph.D. (Earth and Planetary Sciences)

Xiangdong Zhu, Ph.D. (Physics)

**The Program of Study**

The Division of Mathematical and Physical Sciences teaches the concrete mathematics behind the experimental studies and theoretical analyses to find solutions to real world problems. Students learn to address issues such as cleaning up the environment, preserving natural resources and creating innovative materials for the future. From the study of atoms to the examination of distant galaxies, from abstract number theory to the development of new chemical compounds, the division provides students with the skills to build the world of tomorrow.

The program in Mathematical and Physical Sciences provides an organizational structure within the College of Letters and Science for facilitating the development of innovative curricular initiatives across the mathematical and physical sciences, including offering broadly conceived, integrative undergraduate- and graduate-level courses. The program also may house resident faculty pursuing interdepartmental research and teaching in this area of inquiry.

**Courses in Mathematical and Physical Sciences (MPS)**

#### Lower Division

1. **General Science: Science in the News** (4)
   - Lecture—3 hours; laboratory/discussion—1 hour. Prerequisite: lower division standing. Basic principles in science include numeracy, scale, energy, and time; the scientific method; good and bad science. Emphasis on science topics recently in the news. GE credit: SciEng—III.
   - 11A-11B. Mathematical and Physical Sciences Seminar (2–2)
   - Lecture—2 hours. Prerequisite: mentorship for undergraduate research participants in the physical and mathematical sciences. Research and writing in the mathematical and physical sciences. Presentations by various science faculty members.—II. (III.)

**Mathematics**

See Mathematics; and Applied Mathematics (A Graduate Group), on page 165.

**Mathematics**

Joel Hass, Ph.D., Chairperson

**Department Office.** 1130 Mathematical Sciences Bldg. 530-752-0827; studentervices@math.ucdavis.edu; http://www.math.ucdavis.edu

**Faculty**

Eric Babson, Ph.D. Professor
Zhaojun Bai, Ph.D., Professor (Computer Science)
Craig Berghem, Ph.D., Professor
Joseph Biello, Ph.D., Associate Professor
James Bremer, Ph.D., Associate Professor
Angela Y. Cheer, Ph.D., Professor
Jesus De Loera, Ph.D., Professor
C. Albert Fannjiang, Ph.D., Professor
Roland Freund, Ph.D., Professor
Dmitry B. Fuchs, Ph.D., Professor
Janko Gravner, Ph.D., Professor
Robert Guy, Ph.D., Associate Professor
Joel Hass, Ph.D., Professor
John K. Hunter, Ph.D., Professor
Michael Kapovich, Ph.D., Professor
Matthias Koepe, Ph.D., Professor
Gregory J. Kuperberg, Ph.D., Professor
Timothy Lewis, Ph.D., Associate Professor
Fu Liu, Ph.D., Professor
Kevin Luli, Ph.D., Assistant Professor
Alexander I. Mogilner, Ph.D., Professor
Ben Morris, Ph.D., Professor
Motohico Mulase, Ph.D., Associate Professor
Academic Senate Distinguished Teaching Award
Bruno I. Nachtergaele, Ph.D., Professor
Brian Osnessman, Ph.D., Associate Professor
Alessandra Pizzaro, Ph.D., Associate Professor
E. Gerry Puckett, Ph.D., Professor
Dan Romik, Ph.D., Associate Professor
Naoki Saito, Ph.D., Professor
Anne Schilling, Ph.D., Professor
Jennifer Schluens, Ph.D., Professor
Albert Schwarz, Ph.D., Professor
Steve Shkoller, Ph.D., Professor
Alexander Soshnikov, Ph.D., Professor
Thomas Strohmer, Ph.D., Professor
J. Blake Temple, Ph.D., Professor
UC Davis Distinguished Professor 2012
Becca Thomasos, Ph.D., Assistant Associate Professor
Abigail Thompson, Ph.D., Professor
Academic Senate Distinguished Teaching Award
Craig A. Tracy, Ph.D. Professor
Monica Vazirani, Ph.D., Professor
Samuel Walcott, Ph.D., Assistant Professor
Andrew Waldron, Ph.D., Professor
Qinglan Xia, Ph.D., Assistant Associate Professor

**Emeriti Faculty**

David Bohnette, Ph.D., Professor Emeritus
Donald C. Benson, Ph.D., Professor Emeritus
Carlos R. Borges, Ph.D., Professor Emeritus
Robert J. Bux, Professor Emeritus
Guilbank D. Chakaroen, Ph.D., Professor Emeritus
Academic Senate Distinguished Teaching Award
Doyle O. Cutler, Ph.D., Professor Emeritus
James R. Diederich, Ph.D., Professor Emeritus
Allan L. Edelson, Ph.D., Professor Emeritus
Robert D. Giroux, Ph.D., Professor Emeritus
Kurt Kreith, Ph.D., Professor Emeritus
Arthur J. Krener, Ph.D., Professor
Melven R. Krom, Ph.D., Professor
Gary J. Krupsky, Ph.D., Professor Emeritus
Arthur D. Mead, Ph.D., Professor Emeritus
Academic Senate Distinguished Teaching Award
E. O. Miltion, Ph.D., Professor Emeritus
Academic Senate Distinguished Teaching Award
Donald A. Norton, Ph.D., Professor Emeritus
Washe F. Mfeffer, Ph.D., Professor Emeritus
G. Thomas Sallee, Ph.D., Professor
Academic Senate Distinguished Teaching Award

Sherman K. Stein, Litt.D. (hon.), Ph.D., Professor Emeritus
Academic Senate Distinguished Teaching Award
Howard J. Wein, Ph.D., Professor Emeritus
Roger Wets, Ph.D., Professor Emeritus

**Affiliated Faculty**

John Chuchi, Ph.D., Lecturer
Ali Dad-del, Ph.D., Lecturer
Academic Federation Excellence in Teaching Award
Duane Koub, Ph.D., Lecturer
Lawrence Marx, Ph.D., Lecturer

**The Major Programs**

Mathematics is the study of abstract structures, space, change, and the interrelations of these concepts. It also is the language of the exact sciences.

**The Program.** Students majoring in mathematics may follow a program leading to either the Bachelor of Arts or the Bachelor of Science degree. After completing basic introductory courses such as calculus and linear algebra, students plan an upper division program in consultation with a faculty adviser. The upper division course offering is grouped into entry level, core, and enrichment courses. Entry level courses are designed to serve as a bridge between the core mathematics of the lower division and the more abstract concepts taught in upper division courses. The core courses are intended to provide basic mathematical techniques, whereas the enrichment choices allow students to further mathematical knowledge and skills that feature their research or career interests. This individualized program can lead to graduate study in pure or applied mathematic, elementary or secondary level teaching, or to other professional goals. It can also reflect a special interest such as computational and applied mathematics, computer science, or statistics, or may be combined with a major in same subject.

**Career Alternatives.** A degree in mathematics provides entry to many careers in addition to teaching. For instance, operations research, systems analysis, computing, actuarial work, insurance, and financial services are a few of many careers. Mathematics is also a sound basis for graduate work in a variety of fields, such as law, teaching, and economics.

**A.B. Major Requirements:**

**UNITS**

Preparatory Subject Matter........................43-50
Mathematics 12 (or high school equivalent)..............0.3
One of the following two options: (a) Mathematics 24A-24B and 108 OR (b) Mathematics 67-68 .................................47
Computer Science 30 or Engineering 6 .... 4 Mathematics 22AL or equivalent MATLAB knowledge.................................0.1
Additional Non-Mathematics courses chosen from natural sciences............................12
NOTE: Basic knowledge of MATLAB is required for both Mathematics 67 and 22A. Students can learn it on their own, enroll in Engineering 6, Mechanical Engineering 5 or in the one unit course Mathematics 22AL (can be taken concurrently).

**Depth Subject Matter**...............................37-42
A. Entry Level (Optional)..............................0.4
Suggested choice; one course from:
Mathematics 108, 114, 115A, 141, 145
B. Core..................................................16
Mathematics 125A ......................................
Mathematics 125B ....................................
Mathematics 135A ....................................
Mathematics 150A ...................................
C. Choose one Plan from the following two; up to 4 of these 16 units may be approved upper division courses outside of the Department of Mathematics with extensive use of mathematics........................................18

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2015-2016 offering in parentheses

Pre-Fall 2011 General Education (GE): A=American Arts and Humanities; S=Science and Engineering; SS=Social Sciences; DD=Dominic Diversity; WE=Writing Experience

Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SE=Science and Engineering; SS=Social Sciences; AC=American Culture; DE=Dominic Diversity; WE=Writing Experience
Plan 1: General Mathematics
Additional upper division mathematics units selected in consultation with and subject to approval of an adviser. .......................... 18
Plan 2: Secondary Teaching
Mathematics 111 .................................. 4
Mathematics 115A ..................................... 4
Mathematics 141 ...................................... 4
Additional upper division mathematics units selected in consultation with and subject to approval of an adviser.
NOTE: Students who wish to satisfy the single subject matter waiver for the teaching credential should see an adviser as early as possible.
D. Capstone Course: Mathematics 189 or 192 (Internship in Applied Mathematics or 194 (Undergraduate Thesis) or 180 (Special Topics) can be taken in consultation with the Undergraduate Vice Chair .............................................. 3-4
Total Units for the Major ..................... 80-92
Applied Mathematics
B.S. Major Requirements:
UNITS
Preparatory Subject Matter .................. 42-52
Mathematics 12 (or high school equivalent) .......................... 0-3
One of the following two options: (a) Mathematics 22A and 108 OR (b) Mathematics 67 .......................... 4-7
Computer Science 30 or Engineering 6 .................................. 5
Physics 9A (Plans 1 and 2) or one course from: Physics 7A, Statistics 13, 32, 100 (Plan 2) .......................... 5-8
NOTE: Basic knowledge of MATLAB is required in both Mathematics 67 and 22A. Students can learn it on their own, enroll in Engineering 6, Mechanical Engineering 5 or in the one unit course Mathematics 22AL (can be taken concurrently).
Depth Subject Matter ......................... 51-56
Choose one plan from the following two:
Plan 1: General Mathematics
A. Entry Level (Optional) .......................... 0-4
Suggested choices: one course from: Mathematics 108, 114, 115A, 141, 145
B. Core ............................................. 28
Mathematics 150A ..................................... 4
Mathematics 150B ..................................... 4
Mathematics 150C ..................................... 4
Mathematics 135A ..................................... 4
Mathematics 125B ..................................... 4
Mathematics 128 ..................................... 4
Mathematics 135A ..................................... 4
C. Enrichment ....................................... 20
1. One of four courses from: Mathematics 111, 114, 115A, 115B, 133, 135B, 141, 145, 147, 148, 156, 158, 158B .......................... 16
2. One of four courses from: Mathematics 119A, 124, 128A, 128B, 129, 133, 167, 168 or one approved upper division course outside the Department of Mathematics with extensive use of mathematics .......................... 4
D. Capstone Course: Mathematics 189 or 192 (Internship in Applied Mathematics or 194 (Undergraduate Thesis) or 180 (Special Topics) or an approved substitute in consultation with the Undergraduate Vice Chair .............................................. 3-4
Plan 2: Mathematics for Secondary Teaching
A. Entry Level (Optional) .......................... 0-4
Suggested choices: one course from: Mathematics 108, 114, 145
B. Core ............................................. 28
Mathematics 150A ..................................... 4
Mathematics 150B ..................................... 4
Mathematics 150C ..................................... 4
Mathematics 135A ..................................... 4
Mathematics 125B ..................................... 4
Mathematics 128 ..................................... 4
Mathematics 135A ..................................... 4
C. Enrichment ....................................... 20
1. One of four courses from: Mathematics 111, 114, 115A, 115B, 133, 135B, 141, 145, 147, 148, 156, 158, 158B .......................... 16
2. One of four courses from: Mathematics 119A, 124, 128A, 128B, 129, 133, 167, 168 or one approved upper division course outside the Department of Mathematics with extensive use of mathematics .......................... 4
D. Capstone Course: Mathematics 189 or 192 (Internship in Applied Mathematics or 194 (Undergraduate Thesis) or 180 (Special Topics) or an approved substitute in consultation with the Undergraduate Vice Chair .............................................. 3-4
Total Units for the Major ..................... 85-98
Mathematics
B.S. Major Requirements:
UNITS
Preparatory Subject Matter ................. 34-42
Mathematics 12 (or high school equivalent) .......................... 0-3
One of the following two options: (a) Mathematics 22A and 108 OR (b) Mathematics 67 .......................... 4-7
Computer Science 30 or Engineering 6 .................................. 5
Physics 9A (Plans 1 and 2) or one course from: Physics 7A, Statistics 13, 32, 100 (Plan 2) .......................... 5-8
NOTE: Basic knowledge of MATLAB is required in both Mathematics 67 and 22A. Students can learn it on their own, enroll in Engineering 6, Mechanical Engineering 5 or in the one unit course Mathematics 22AL (can be taken concurrently).
Depth Subject Matter ......................... 51-56
Choose one plan from the following two:
A. Entry Level (Optional) .......................... 0-4
Suggested choice: one course from: Mathematics 108, 114, 115A, 141, 145
B. Core ............................................. 28
Mathematics 150A ..................................... 4
Mathematics 150B ..................................... 4
Mathematics 150C ..................................... 4
Mathematics 135A ..................................... 4
Mathematics 125B ..................................... 4
Mathematics 128 ..................................... 4
Mathematics 135A ..................................... 4
C. Enrichment ....................................... 20
1. One of four courses from: Mathematics 111, 114, 115A, 115B, 133, 135B, 141, 145, 147, 148, 156, 158, 158B .......................... 16
2. One of four courses from: Mathematics 119A, 124, 128A, 128B, 129, 133, 167, 168 or one approved upper division course outside the Department of Mathematics with extensive use of mathematics .......................... 4
D. Capstone Course: Mathematics 189 or 192 (Internship in Applied Mathematics or 194 (Undergraduate Thesis) or 180 (Special Topics) or an approved substitute in consultation with the Undergraduate Vice Chair .............................................. 3-4

Total Units for the Major ..................... 86-98
Recommended Language Preparation, Bachelor of Science degree candidates are advised, but not required, to satisfy the same language requirement as that for a Bachelor of Arts degree candidate, and to fulfill it in French, German, or Russian.
Major Advisers. For a current list of faculty and staff advisers, contact the Student Services office at studentservices@math.ucdavis.edu, or our website: https://www.math.ucdavis.edu/undergrad/advising/advisers/.
Depth Subject Matter Requirements. Certain mathematically oriented courses given by other departments are admissible in partial satisfaction of the depth subject matter requirements with prior departmental approval. Up to three units of Mathematics 194 may be counted toward the depth subject matter requirements. Additionally, up to three units of Mathematics 198 or Mathematics 199, can be counted.
Quarter Offered: I-Fall, II-Winter, III-Spring, IV-Summer; 2015-2016 offering in parentheses.
Pre-Fall 2011 General Education (GE): AA/AS-Domain, CSU-General, CSU-Transfer, UC-A, B, C, D, E, F, G; UC-Upper Division; WRT-Writing Experience
Fall 2011 and on Revised General Education (GE): AH-Arts and Humanities; SCI-Science and Engineering; SS-Social Sciences; DIV-Div-Domestic Diversity; WR-Writing Experience
ACGH-American Cultures, DD-Domestic Diversity, OL-Oral Skills, SL-Quantitative, SL-Scientific, VU-Visual, WC-World Cultures, WE-Writing Experience
Mathematics 391
12. Precalculus (3) Lecture—3 hours. Prerequisite: two years of high school algebra, plane geometry, plane trigonometry, and satisfying the Mathematics Placement Requirement. Limits; differentiation of algebraic functions; analytic geometry; applications, in particular to maxima and minima problems. Not open for credit to students who have completed course 17A, 17B, 17C, 21A, 21B, or 21C with a C or better. GE credit: SciEng | QL, SE, SL—I, II, III, (II, III). 17B. Short Calculus (3) Lecture—3 hours. Prerequisite: two years of high school algebra, plane geometry, plane trigonometry, and satisfying the Mathematics Placement Requirement. Limits; differentiation of algebraic functions; analytic geometry; applications, in particular to maxima and minima problems. Not open for credit to students who have completed course 17A, 17B, 17C, 21A, 21B, or 21C. Only 2 units of credit to students who have previously completed course 17A. GE credit: SciEng | QL, SE, SL—I, II, III, (II, III). 16A. Short Calculus (3) Lecture—3 hours. Prerequisite: course 16A, 17A, or 21A. Integration; calculus for trigonometric, exponential, and logarithmic functions; applications. Not open for credit to students who have completed courses 17C, 21A, or 21B. Only 2 units of credit to students who have completed course 17A. GE credit: SciEng | QL, SE, SL—I, II, III, (II, III). 16C. Short Calculus (3) Lecture—3 hours. Prerequisite: course 16B, 17B, or 21B. Differential equations; partial derivatives; double integrals; applications; series. Not open for credit to students who have completed course 17C. GE credit: SciEng | QL, SE, SL—I, II, III, (II, III). Note: Mathematics 16A, 16B, and 16C are for students who will take no more Mathematics courses. Mathematics 17A, 17B, and 17C have the same level of rigor as 16A, 16B, and 16C, yet are much more broadly mathematically (containing algebra, differential equations and probability, besides traditional calculus), and are intended for biology students who do not wish to take more rigorous Mathematics courses. 17A. Calculus for Biology and Medicine (4) Lecture—3 hours; discussion—I hour. Prerequisite: two years of high school algebra, plane geometry, plane trigonometry, and analytical geometry, and satisfying the Mathematics Placement Requirement. Introduction to differential calculus via applications in biology and medicine. Limits, derivatives of polynomials, trigonometric, and exponential functions, graphing, applications of the derivative to biology and medicine. Not open for credit to students who have completed course 16B, 16C, 21A, 21B, or 21C; only 2 units of credit to students who have completed course 16A. GE credit: SciEng | QL, SE, SL—I, II, III, (II, III). 17B. Calculus for Biology and Medicine (4) Lecture—3 hours; discussion—I hour. Prerequisite: course 16A, 17A, or 21A. Introduction to integral calculus and elementary differential equations via applications to biology and medicine. Fundamental theorem of calculus, techniques of integration including integral tables and numerical methods, improper integrals, elementary first order differential equations, applications in biology and medicine. Not open for credit to students who have completed course 16C, 21B, or 21C. Only 2 units of credit for students who have completed course 16B. GE credit: SciEng | QL, SE, SL—I, II, III, (II, III). 17C. Calculus for Biology and Medicine (4) Lecture—3 hours; discussion—I hour. Prerequisite: course 16B, 17B, or 21B. Matrix algebra, functions of several variables, partial derivatives, systems of differential equations, and applications to biology and medicine. Not open for credit to students who have completed course 21C; only 2 units of credit to students who have completed course 16C. GE credit: SciEng | QL, SE, SL—I, II, III, (II, III). 21A. Calculus (4) Lecture—3 hours; discussion—I hour. Prerequisite: two years of high school algebra, plane geometry, plane trigonometry, and analytic geometry, and satisfying the Mathematics Placement Requirement. Functions, limits, continuity. Slope and derivative. Differentiation of algebraic and transcendental functions. Applications to motion, natural growth, graphing, extrema of a function. Differentials. L'Hospital's rule. Not open for credit to students who have completed course 16B, 16C, 17B, or 17C. Only 2 units of credit to students who have completed course 16A or 17A. GE credit: SciEng | QL, SE, SL—I, II, III, (II, III). 21AH. Honors Calculus (4) Lecture/discussion—4 hours. Prerequisite: a Precalculus Diagnostic Examination score significantly higher than the minimum for course 21A is required. More intensive treatment of material covered in course 21A. Offered irregularly. GE credit: SciEng | QL, SE. 21AL. Emerging Scholars Program Calculus Workshop (2) Workshop—6 hours. Prerequisite: concurrent enrollment in course 21A. Functions, limits, continuity. Slope and derivative. Same course content as course 21A. Enrollment for students in the Emerging Schol- ars Program by instructor's invitation only. Offered irregularly. (P/NP grading only) GE credit: SE. 21B. Calculus (4) Lecture—3 hours; discussion—I hour. Prerequisite: course 21A or 21AH. Continuation of course 21A. Definition of definite integral, fundamental theorem of calculus, techniques of integration. Application to area, volume, arc length, average of a function, improper integral, surface area, arc length. Only 2 units of credit to students who have completed course 16B, 16C, 17B, or 17C. GE credit: SciEng | QL, SE, SL—I, II, III, (II, III). 21BH. Honors Calculus Lecture/discussion—4 hours. Prerequisite: a grade of B or better in course 21A or 21AH. More intensive treatment of material covered in course 21B. Students completing 21BH can continue with course 21CH or the regular 21C. Offered irregularly. GE credit: SciEng | SE. 21BL. Emerging Scholars Program Calculus Workshop (2) Workshop—6 hours. Prerequisite: course 21A or 21AL; concurrent enrollment in 21B. Continuation of course 21A. Same course content as 21B. Enrollment for students in the Emerging Scholars Program by instructor's invitation only. Offered irregularly. (P/NP grading only) GE credit: SE. 21C. Calculus (4) Lecture—3 hours; discussion—I hour. Prerequisite: course 16C, 17C, 21B, or 21BH. Continuation of course 21B. Sequences, series, tests for convergence, Taylor expansions. Vector-valued functions, calculus, scalar and vector fields. Partial derivatives, total differentials. Applications to maximum and min- imum problems in two or more variables. Applications to physical systems. GE credit: SciEng | QL, SE, SL—I, II, III, (II, III).
21CH. Honors Calculus (4)
Lecture/discussion—4 hours. Prerequisite: a grade of B or better in course 21B or 21BH. More intensive treatment of material covered in course 21C. Offered infrequently. GE credit: SciEng | SE.

21CL. Emerging Scholars Program Calculus Workshop (2)
Workshop—6 hours. Prerequisite: course 21B or 21BH; concurrent enrollment in 21C. Continuation of course 21B. Same course content as course 21C. Enrollment for students in the Emerging Scholars Program by instructor’s invitation only. [P/NP grading only.] Offered irregularly. GE credit: SciEng | SE.

21D. Vector Analysis (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 21C or 21CH. Continuation of course 21C. Definite integrals over plane and solid regions in various coordinate systems. Line and surface integrals. Green’s theorem, Stoke’s theorem, divergence theorem. GE credit: SciEng | QL, SE.—I, II, III. (I, II, III.)

21M. Accelerated Calculus (5)
Lecture/discussion—4 hours; discussion/lab—1 hour. Prerequisite: grade of B or higher in both semesters of high school calculus or a score of 4 or higher on the Advanced Placement Calculus AB exam, and obtaining the required score on the Precalculus Diagnostic Examination and its trigonometric component. Accelerated treatment of material from courses 21A and 21B, with detailed presentation of theory, definitions, and proofs, and treatment of concepts requiring augmentation of calculus at a condensed but sophisticated level. Not open for credit to students who have completed course 21A or 21B. only 3 units of credit will be allowed to students who have completed course 1A and only 2 units of credit will be allowed to students who have completed course 1B. Offered irregularly. GE credit: SciEng | SE.

22A. Linear Algebra (3)
Lecture—3 hours. Prerequisite: nine units of college mathematics and Engineering 6 or Knowledge of Matlab or course 22AL [to be taken concurrently]. Matrices and linear transformations, determinants, eigenvalues, eigenvectors, diagonalization, factorization. Not open for credit to students who have completed course 67. GE credit: SciEng | QL, SE.—I, II, III. (I, II, III.)

22AL. Linear Algebra Computer Laboratory (1)
Laboratory—2.3 hours. Prerequisite: nine units of college mathematics. Introduction to Matlab and its use in linear algebra. (P/NP grading only.) GE credit: SciEng | QL, SE.—I, II, III. (I, II, III.)

22B. Linear Algebra (3)
Lecture—3 hours; discussion—2 hours. Prerequisite: courses 21C; 22A or 67. Solutions of elementary differential equations. GE credit: SciEng | QL, SE.—I, II, III. (I, II, III.)

25. Fundamentals of Mathematics (3)
Lecture—3 hours. Prerequisite: satisfaction of the Mathematics Placement Requirement. Introduction to fundamental mathematical ideas selected from the principal areas of modern mathematics. Properties of the primes, the fundamental theorems of arithmetic, properties of the rationals and irrationals, binary and other number systems. GE credit: SciEng | QL, SE.—I, II, III. (I, II, III.)

28. Modern Linear Algebra (4)
Lecture/discussion—4 hours. Prerequisite: course 21B. Introduction to the rigorous treatment of abstract mathematical analysis. Proofs in mathematics, induction, sets, cardinality; real number system, theory of convergence of sequences. Not open for credit to students who have completed former course 127A. GE credit: SciEng | SE.—I, II, III. (I, II, III.)

36. Fundamentals of Mathematics (3)
Lecture—3 hours. Prerequisite: satisfaction of the Mathematics Placement Requirement. Introduction to fundamental mathematical ideas selected from the principal areas of modern mathematics. Properties of the primes, the fundamental theorems of arithmetic, properties of the rationals and irrationals, binary and other number systems. GE credit: SciEng | QL, SE.—I, II, III. (I, II, III.)

67. Modern Linear Algebra (4)
Lecture/discussion—4 hours. Prerequisite: course 21A or consent of instructor. Rigorous treatment of linear algebra; topics include vector spaces, bases and dimensions, orthogonal projections, eigenvalues and eigenvectors, similarity transformations, singular value decomposition and positive definiteness, nonhomogeneous problems and the method of eigenvector expansions, Poisson’s Equations. GE credit: SciEng | QL, SE.—I, II. (I, II.)

71A-71B. Explorations in Elementary Mathematics (3-3)
Lecture—2 hours; laboratory—3 hours. Prerequisite: two years of high school mathematics. Weekly explorations of mathematical ideas related to the elementary school curriculum will be carried out by cooperative learning groups. Lectures will provide background and synthesize the results of group exploration. (Expanded to pending completion of sequence.) Offered irregularly.

89. Elementary Problem Solving (1)
Lecture—1 hour. Prerequisite: high school mathematicians through precalculus. Solve and present solutions to challenging problems in elementary mathematics. May be repeated one time for credit. (P/NP grading only.) Offered irregularly.

98. Directed Group Study (1-5)
Prerequisite: consent of instructor. (P/NP grading only.)—I, II, III. (I, II, III.)

99. Special Study for Undergraduates (1-5)
Prerequisite: consent of instructor. (P/NP grading only.)—I, II, III. (I, II, III.)

Upper Division

108. Introduction to Abstract Mathematics (4)
Lecture/discussion—4 hours. Prerequisite: course 21B. A rigorous treatment of mathematical concepts with emphasis on the ideas underlying the development of abstract mathematical ideas, to read and write mathematical concepts, and to prove theorems. Designed to serve as preparation for the more rigorous upper division courses. GE credit: SciEng, Wrt | SE.—I, II, III. (I, II, III.)

111. History of Mathematics (4)
Lecture—3 hours; term paper or discussion. Prerequisite: eight units of upper division Mathematics; one of the following courses: 11A, 21B, 115A, 116, 119A, 141, or 145. History of mathematics from ancient times through the development of calculus. Mathematics from Arab, Hindu, Chinese and other cultures. Selected topics in the history of modern mathematics. GE credit: SciEng | SE.—I, II, III. (I, II, III.)

114. Convex Geometry (4)
Lecture/discussion—4 hours. Prerequisite: courses 21C, 22A or 67. Topics selected from the theory of convex bodies, convex functions, geometric inequalities, combinatorial geometry, and integral geometry. Designed to serve as preparation for the more rigorous upper division courses. Offered in alternate years. GE credit: SciEng | SE.—I, II, III. (I, II, III.)

115B. Number Theory (4)
Lecture—3 hours; extensive problem solving. Prerequisite: courses 22A or 67 (or equivalent) and 115A (or equivalent). Euler function, Moebius function, congruences, primitive roots, quadratic reciprocity law. Offered in alternate years. GE credit: SciEng | QL, SE.—II. (II.)

116. Differential Geometry (4)
Lecture—3 hours; extensive problem solving. Prerequisite: course 125A. Vector analysis, curves, and surfaces in three dimensions. Offered in alternate years. GE credit: SciEng | SE.—II. (II.)

118A. Partial Differential Equations: Elementary Methods (4)
Lecture—3 hours; project. Prerequisite: courses 22A; 22B or 67. Derivation of partial differential equations; separation of variables; equilibrium solutions and Laplace’s equation; Fourier series; method of characteristics for the one dimensional wave equation. Solution of nonlinear homogeneous equations. GE credit: SciEng | QL, SE.—I. (I.)

118B. Partial Differential Equations: Eigenfunction Expansions (4)
Lecture—3 hours; project. Eigenfunction expansions. GE credit: SciEng | QL, SE.—II. (II.)

121A. Partial Differential Equations: Green’s Functions and Transforms (4)
Lecture—3 hours; extensive problem solving. Prerequisite: course 118B. Green’s functions for one-dimensional problems and Poisson’s equation. Separation of variables; transforms; Green’s functions for time dependent problems; Laplace transform and solution of partial differential equations. Offered irregularly. GE credit: SciEng | QL, SE.—II. (II.)

121B. Ordinary Differential Equations (4)
Lecture—3 hours; extensive problem solving. Prerequisite: courses 21D; 22A or 67. Scalar and planar autonomous systems; nonlinear systems and linearization; existence and uniqueness of solutions; matrix solution of linear systems; phase plane analysis; stability analysis; bifurcation theory; Liapunov’s method; limit cycles; Poincare Bendixon theory. GE credit: SciEng | QL, SE.—I, II, III. (I, II, III.)

121C. Mathematical Biology (4)
Lecture—3 hours; project. Prerequisite: courses 22A or 67. Methods of mathematical modeling of biological systems including difference equations, ordinary differential equations, stochastic and dynamic programming models. MATLAB programming required. Offered in alternate years. GE credit: SciEng | QL, SE.—I, II, III. (I, II, III.)

125A. Real Analysis (4)
Lecture—discussion—4 hours. Prerequisite: course 25. Functions, limits of functions, continuity and uniform continuity, sequences of functions, series of real numbers, series of functions, power series. Not open for credit to students who have completed former course 127B. GE credit: SciEng | SE.—I, II, III. (I, II, III.)

125B. Real Analysis (4)
Lecture/discussion—4 hours. Prerequisite: course 67 and 125A. Theory of the derivative, Taylor series, integration, partial derivatives, Implicit Function Theorem. Not open for credit to students who have completed former course 127C. GE credit: SciEng | QL, SE.—I, II, III. (I, II, III.)

128A. Numerical Analysis (4)
Lecture—3 hours; project. Prerequisite: Computer Science: Engineering 30 or equivalent; course 21C. Error analysis, approximation, interpolation, numerical differientation and integration. Programming in language such as Pascal. Familiarity with BASIC required. GE credit: SciEng | QL, SE.—I. (I.)

128B. Numerical Analysis in Solution of Equations (4)
Lecture—3 hours; project. Prerequisite: Computer Science: Engineering 30 or equivalent; courses 21C; 22A or 67. Solution of nonlinear equations and nonlinear systems. Minimization of functions of several variables. Simultaneous linear equations. Eigenvalue problems. Linear programming. Programming in language such as FORTRAN or BASIC required. GE credit: SciEng | QL, SE.—I. (I.)
124C. Numerical Analysis in Differential Equations (4)
Lecture—3 hours; project. Prerequisite: Computer Science: Engineering 130 or equivalent; courses 22A or 67, 22B. Difference equations, operators, numerical solutions of ordinary and partial differential equations. Programming in language such as Pascal, Fortran, or BASIC required. GE credit: SciEng | QI, SE. —III. (III.)

129. Fourier Analysis (4)
Lecture—3 hours; extensive problem solving. Prerequisite: courses 21D, 22A or 67, 22B, or consent of instructor. Fourier series and integrals, orthogonal sets of functions. Topics selected from trigonometric approximation, orthogonal polynomials, applications to signal and image processing, numerical analysis, and different equations. GE credit: SciEng | QI, SE. —III. (III.)

133. Mathematical Finance (4)
Lecture—3 hours; extensive problem solving. Prerequisite: courses 67, 135A. Analysis and evaluation of deterministic and random cash flow streams, and pricing of basic financial instruments, interest rate theory, meanvariance portfolio theory, capital asset pricing models, utility functions and general principles. MATLAB programming required. Offered in alternate years. GE credit: SciEng | QI, SE. SL. —III.

135A. Probability (4)
Lecture/discussion—4 hours. Prerequisite: course 125A. Probability spaces, discrete probability, combinatorial analysis; independence, conditional probability; random variables, discrete and continuous distributions, probability mass function, joint and marginal distributions, expectation, moments, variance, Chebyshev inequality; sums of random variables, random walk, large number law, central limit theorem. Not open for credit to students who have completed course 132A. GE credit: SciEng | QI, SE. —I, II, III. (II, III.)

135B. Stochastic Processes (4)
Laboratory/discussion—4 hours. Prerequisite: courses 135A, 22A or 67. Generating functions, branching processes, characteristic function, Markov chains; convergence of random variables, law of iterated logarithm; random processes, Brownian motion, stationary processes, renewal processes, queueing theory, martingales. Not open for credit to students who have completed course 132A. GE credit: SciEng | QI, SE. —I, II, III. (II, III.)

145. Combinatorics (4)
Lecture/discussion—4 hours. Prerequisite: course 218. Combinatorial methods using basic graph theory, counting methods, generating functions, and recurrence relations. Designed to serve as preparation for the more rigorous upper division courses. GE credit: SciEng | QI, SE. VL. —I, II, III. (I, II, III.)

146. Algebraic Combinatorics (4)
Lecture/discussion—4 hours. Prerequisite: courses 218, 22A or 67, 135A. Basic notions of point set and combinatorial topology. GE credit: SciEng | QI, SE. —I, II. (II.)

147. Topology (4)
Lecture—3 hours; extensive problem solving. Prerequisite: courses 22A or 67, 135A. Basic notions of point set and combinatorial topology. GE credit: SciEng | QI, SE. —II. (II.)

148. Discrete Mathematics (4)
Lecture/discussion—4 hours. Prerequisite: course 67, or courses 22A and 25. Coding theory, error correcting codes, finite fields and the algebraic concepts needed in their development. Not open for credit to students who have completed former course 149B. GE credit: SciEng | QI, SE. —II, III. (II, III.)

150A. Modern Algebra (4)
Lecture/discussion—4 hours. Prerequisite: course 67. Basic concepts of groups, symmetries of the plane. Emphasis on the techniques used in the proof of the ideas (lemmas, etc.) developing these concepts. Precise thinking, proof writing, and the ability to deal with abstraction. GE credit: SciEng | QI, SE. —I, II. (II.)

150B. Modern Algebra (4)
Lecture/discussion—4 hours. Prerequisite: course 150B. Linear forms, rings, factorization, modules. GE credit: SciEng | SE. —II. (II.)

150C. Modern Algebra (4)
Lecture/discussion—4 hours. Prerequisite: course 150B. Group representations, fields, Galois theory. GE credit: SciEng | SE. —III. (III.)

160. Mathematical Foundations of Database Theory, Design and Performance (4)
Lecture—3 hours; project. Prerequisite: course 22A or 67, one of the following courses: 25, 108, 114, 115A, 141, or 145. Relational model, relational algebra, relational calculus, normal forms, functional and multivalued dependencies. Separability. Cost-benefit analysis of physical database design and reorganization. Performance via analytical modeling, simulation, and queueing theory. Block accesses; locking; operating system contention; CPU intensive applications. Offered irregularly. GE credit: SciEng | QI, SE. —III.

165. Mathematics and Computers (4)
Lecture—3 hours; project. Prerequisite: Computer Science: Engineering 30 or equivalent; course 22B and one of the following courses: 25, 67, 108, 114, 115A, 141 or 145. Introduction to computational mathematics, symbolic computation, and computer generated/verified proofs in algebra, analysis and geometry. Investigation of rigorous new mathematics developed in conjunction with modern computational questions and the role that computers play in mathematics and experimentation. GE credit: SciEng | QI, SE. —I, II. (I, II.)

167. Applied Linear Algebra (4)
Lecture—3 hours; extensive problem solving. Prerequisite: course 22A or 67, knowledge of a programming language. Applications of linear algebra, LU and QR matrix factorizations, eigenvalue and singular value matrix decompositions. GE credit: SciEng | QI, SE. —I, II. (I, II.)

168. Optimization (4)
Lecture—3 hours; extensive problem solving. Prerequisite: Computer Science: Engineering 30 or equivalent; courses 21C or 25, 22A or 67. Linear programming, simplex method. Basic properties of unconstrained nonlinear problems, descent methods, conjugate direction method. Constrained minimization. Programming language required. GE credit: SciEng | QI, SE. —III. (III.)

180. Special Topics (3)
Lecture—3 hours. Prerequisite: courses 25 and 67, or consent of instructor. Special topics from various fields of modern, pure, and applied mathematics. Some recent topics include Knot Theory, General Relativity, and Fuzzy Sets. May be repeated for credit when topic differs. GE credit: SciEng | SE. —I, II. (I, II.)

185A. Complex Analysis (4)
Lecture—3 hours; extensive problem solving. Prerequisite: courses 67, 125A. Complex number system, analyticity and the Cauchy-Riemann equations, elementary functions, complex integration, power and Laurent series expansions, residue theory. GE credit: SciEng | SE. —II. (II.)

185B. Complex Analysis (4)
Lecture—3 hours; extensive problem solving. Prerequisite: course 185A. Analytical functions, elementary functions and their mapping properties, applications of Cauchy’s integral theorem, conformal mapping and applications to heat flow and fluid mechanics. Offered in alternate years. GE credit: SciEng | SE. —II. (II.)

189. Advanced Problem Solving (3)
Lecture—3 hours. Prerequisite: courses 21D; 22A or 67, 25. Solution and presentation of advanced problem solving techniques. Solve and present interesting challenges across all areas of mathematics. Offered irregularly. GE credit: SciEng, Wrt | OL, QL, SE. WE. —III. (III.)

192. Internship in Applied Mathematics (1-3)
Internship, final report. Prerequisite: upper division standing; project approval by faculty sponsor prior to enrollment. Supervised work experience in applied mathematics. May be repeated for credit for a total of 10 units. (P/NP grading only.)—I, II, III. (I, II, III.)

194. Undergraduate Thesis (3)
Prerequisite: consent of instructor. Independent research under supervision of a faculty member. Student will submit written report in thesis form. May be repeated with consent of Vice Chairperson. (P/NP grading only.) GE credit: SE. —I, II, III. (I, II, III.)

197TC. Tutoring Mathematics in the Community (1-5)
Seminar—1-2 hours; laboratory—2-6 hours. Prerequisite: upper division standing and consent of instructor. Special projects in mathematics education developing techniques for mathematics instruction and tutoring on an individual or small group basis. May be repeated one time for credit. (P/NP grading only.)—I, II, III. (I, II, III.)

199. Special Study for Advanced Undergraduates (1-5)
(P/NP grading only.) GE credit: SE. —I, II, III. (I, II, III.)

Graduate

200A-200B. Problem-Solving in Analysis (1-1)
Lecture—1 hour; extensive problem solving. Prerequisite: courses 201ABC. Problem-solving in graduate analysis: continuous functions, metric spaces, Banach and Hilbert spaces, bounded linear operators, the spectral theorem, distributions, Fourier series and transforms, Lp spaces, Sobolev spaces. May be repeated two times for credit. (Deferred grading only, pending completion of sequence.)—I, II, III. (I, II, III.)

201A-201B. Analysis (4-4-4)

202. Functional Analysis (4)

205. Complex Analysis (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 185 or the equivalent, or consent of instructor. Analytic continuation, Riemann surfaces, conformal mappings, Riemann mapping theorem, entire functions, special functions, elliptic functions.—III. (III.)
and vector spaces over fields. Field extensions. Commutative rings. Representation theory and its applications. —III. (III.)

258A. Numerical Optimization (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: courses 25, 167. Numerical methods for infinite dimensional optimization problems. Newton and Quasi-Newton methods, linear and sequential quadratic programming, barrier methods, large-scale optimization, theory of approximations, infinite and semi-infinite programming; applications to optimal control, stochastic optimization and distributed systems. Offered in alternate years. —II.

258B. Variational Analysis (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: courses 25 and 167, or consent of the instructor. Foundations of optimization theory. The design of solution procedures for optimization problems. Modeling issues, and stability analysis. Offered in alternate years. —II.

261A. Lie Groups and Their Representations (4)

261B. Lie Groups and Their Representations (4)

265. Mathematical Quantum Mechanics (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: courses 215A, 240A, 250A-250B or the equivalent or consent of instructor. Mathematical foundations of quantum mechanics: the Hilbert space and Operator Algebra formulations; the Schrödinger and Heisenberg equations, symmetry in quantum mechanics, basics of spectral theory and perturbation theory. Applications to atoms and molecules. The Dirac equation. Offered in alternate years. —II.

266. Mathematical Statistical Mechanics and Quantum Field Theory (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 265 or consent of instructor. Mathematical principles of statistical mechanics and quantum field theory. Topics include classical and quantum lattice systems, variational principles, spontaneous symmetry breaking and phase transitions, second quantization and Fock space, and fundamental of quantum field theory. May be repeated one time for credit. Offered in alternate years. —II.

271. Applied and Computational Harmonic Analysis (4)
Lecture—3 hours; extensive problem solving. Prerequisite: courses 1229 or 201C, and 1288 or 167, or 129 and or equivalent, or consent of instructor. Introduction to mathematical basic building blocks (wavelets, local Fourier basis, and their relatives) useful for diverse fields (signal and image processing, numerical analysis, and statistics). Emphasis on the connection between the continuum and the discrete worlds. Offered in alternate years. —II.

280. Topics in Pure and Applied Mathematics (3)
Lecture—3 hours. Prerequisite: graduate standing. Special topics in various fields of pure and applied mathematics. Topics selected based on the mutual interests of students and faculty. May be repeated for credit when topic differs. —I, II, III. (I, II, III.)

290. Seminar (1-6)
Seminar—1-6 hours. Advanced study in various fields of mathematics, including analysis, applied mathematics, discrete mathematics, geometry, mathematical biology, mathematical physics, optimization, partial differential equations, probability, and topology. May be repeated for credit. (S/U grading only). —I, II, III. (I, II, III.)

298. Group Study (1-5)
299. Individual Study (1-12)

299D. Dissertation Research (1-12)

Professional
301A-301B-301C. Mathematics Teaching Practicum (3-3-3)
Fieldwork—5 hours, discussion—1 hour. Prerequisite: course 202A-202B and 202C and 303A-303B-303C concurrently or consent of instructor. Specialist training in mathematics teaching. Teaching, training, and cross observing classes taught using large group Socratic techniques, small group guided inquiry experiences, and/or other approaches to teaching at various grade levels. Required for advanced degrees in mathematics education. May be repeated one time for credit. Offered irregularly.

302A-302B-302C. Curriculum Development in Mathematics (1-1-1)
Lecture/discussion—1 hour. Prerequisite: course 303A-303B-303C concurrently or consent of instructor. Mathematics curriculum development for all grade levels. Required for advanced degrees in mathematics education. May be repeated one time for credit. Offered irregularly.

303A-303B-303C. Mathematics Pedagogy (1-1-1)
Lecture/discussion—1 hour. Prerequisite: course 302A-302B-302C or 210L concurrently or consent of instructor. An investigation of the interplay of mathematical pedagogy and mathematical content, including a historical survey of past and present methods in view of some of the influences that shaped their development. May be repeated one time for credit. Offered irregularly.

390. Teaching Assistantship Training (3)

Medical Pharmacology and Toxicology

See Medicine, School of, on page 396.

Medical Microbiology

See Medicine, School of, on page 396.

Medical, School of

Julie Ann Freischlag, M.D.
Vice Chancellor of Human Health Sciences Dean, School of Medicine

Fred Meyers, M.D., M.A.C.P.
Vice Dean, School of Medicine

Brent Sayre, M.D.
Senior Associate Dean for Clinical Research

Edward Callahan, Ph.D.
Associate Dean for Finance

Lars Berglund, M.D., Ph.D.
Senior Associate Dean for Clinical Research

David Acosta, M.D.
Associate Vice Chancellor for Equity, Diversity and Inclusion

Andreea Seritan, M.D.
Assistant Dean for Student and Resident Diversity

James Goodnight, Jr., M.D.
Associate Dean for Cancer Center

Jeffrey Zucker, M.D.
Associate Dean for Cancer Center

Mark Henderson, M.D.
Associate Dean for Admissions and Outreach

Darin Latimore, M.D.
Associate Dean for Student and Resident Diversity

James Nuovo, M.D., M.P.H.
Associate Dean for Graduate Medical Education

Andrea Seritan, M.D.
Associate Dean for Student Wellness

Mark Servis, M.D.
Senior Associate Dean for Curriculum and Competency Development

School of Medicine Dean’s Office

Admission Requirements and Professional Curriculum
Detailed information can be obtained from the School of Medicine, see School of Medicine, on page 127.

Courses in the School of Medicine Curriculum for the School of Medicine
The curriculum for the M.D. degree at the UC Davis School of Medicine is a four-year program providing comprehensive preparation for graduate medical training (residencies) and the practice of medicine. It offers a blend of basic science training and clinical experience with opportunities for research.

The first year curriculum begins in August and extends through May and is organized into two blocks. The basic science portion of the first block includes courses in Molecular Biology, Cell and Tissue Biology, Gross Anatomy/Embryology/Radiology, and Human Physiology. The major organizing theme is structure-function along the continuum of hierarchical biologic structure from molecule to cell, tissue and major organ systems. The three year Doctoring curriculum begins in January, and is presented concurrently with the other courses. The focus of Doctoring 1 is physical examination training using standardized patients and models, correlated with correlated gross anatomy and physiology by organ system. Behavioral medicine, epidemiology, biostatistics, cross-cultural medicine, and ethics are woven into the cases and didactic presentations and team-based learning modules. Students are required to attend preceptorships in the community and participate in home visits. Periodic quizzes and review sessions with basic science courses throughout the block for formative assessment, and all courses administer comprehensive summative final examinations in December.

The second block of the first year curriculum begins in January and extends through April, with final exams in early May. There are two major threads, each of which is composed of several integrated courses. The Doctoring 1 course is offered concurrently. The Immunology/Microbiology/Pharmacology/Pathology/Pharmacy thread presents an introduction to host defense, infection, basic pharmacologic principles, and general pathologic processes. The Endocrinology/Nutrition/Reproduction/Genetics (ENRG) thread covers embryology, cell concepts, genetics, basic and clinical nutrition, reproductive medicine, and clinical endocrinology. The General Pathology course includes female GU and endocrine pathology, and the pharmacology course covers antibiotics and endocrine pharmacology, with the goal of integration with concurrent courses. Periodic quizzes and review sessions provide formative feedback, and final examinations are used for summative assessment. The Doctoring 1 course continues with an emphasis on interviewing skills and clinical assessment. Cases are used in the problem-based learning approach for basic-science-clinical correlation, and for the exploration of psychosocial issues. Preceptorships and home visits continue. The Doctoring 1 course concludes with a comprehensive final examination, and also includes an observed complete history and physical examination.

The first year curriculum ends with a six week unscheduled block that may be used for vacation, remediation, electives, research, and international experiences.

The second year curriculum is composed of three blocks (Blocks 3-5). Block 3 begins in late June and extends through August with a neurosciences block composed of integrated neuroanatomy-clinical neurosciences. The latter emphasizes the pathophysiologic basis of common neurological disorders. The systemic pathology curriculum continues with a focus on neuropathology, and the pharmacology course covers neur谛armacology. A clinical psychiatry course is also presented during this period. The Doctoring 2 course begins, focusing on advanced clinical skills and clinical reasoning using a combination of standardized patient assessments, problem-based learning, sub specialty physical examination sessions, preceptorships, and didactics in clinical epidemiology, medical economics, and socio-behavioral medicine. The remainder of the second year is devoted to a composed of pathophysiology courses with tight integration of the systemic pathology and pharmacology courses. The courses are organized according to organ system (cardiovascular, pulmonary, renal, musculoskeletal system, hematolgy, gastroenterology, oncology, and dermatology). The Doctoring 2 curriculum continues concurrently with its focus on advanced clinical skills, epidemiology, ethics, and problem based assessment. History taking and physical diagnosis skills are correlated with the ongoing pathophysiology courses. Like the first year, all of the second year courses utilize periodic quizzes and review sessions and a comprehensive final examination. The Doctoring 2 course includes an objective structured clinical examination (OSCE) using standardized patients at the end of the course series.

The second year curriculum ends in February and is followed by a six week, unscheduled block for preparation for USMLE Step 1, remediation, elective, and vacation.

The third-year program begins in April and includes six required clerkship rotations in the clinical specialties: eight weeks each of surgery, medicine, obstetrics/gynecology, pediatrics, primary care (jointly administered by Family and Community Medicine and Internal Medicine) and psychiatry. Students may elect to defer one of the required clerkships to the fourth year. The third year Doctoring program consists of longitudinal small groups led by faculty members who remain with their group throughout the year as the students rotate through their clerkships. Doctoring 3 themes include advanced interviewing techniques, clinical reasoning, clinical epidemiology, evidenced based medicine, and ethics/jurisprudence. Students must take a comprehensive clinical skills examination at the end of the third year which features self-assessment and faculty feedback.

The fourth year curriculum features built-in flexibility to allow students with their medical careers. The early start to the fourth year in May allows students to pursue electives for early exposure to clinical specialties or to complete clerkships which may have been deferred. All students are required to select a minimum of 32 weeks of clinical electives in addition to a single 4-week special study module or scholarly project. The Special Study modules are designed to integrate basic sciences with clinical sciences, provide opportunities for students to practice and refine fundamental skills in critical appraisal and analysis of emerging scientific developments, and to allow students to focus indepth on a multidisciplinary topic of special interest to the student. The Scholarly Project requires independent inquiry with faculty mentorship and leads to a publishable manuscript and a presentation of the project at a research forum held in the winter.

Individual student programs are designed under the guidance of college directors, mentors and faculty advisors, with the support of the Career Advising Office. Each student’s fourth year program must be approved by the Fourth Year Oversight Committee to ensure appropriate breadth, depth, and vigor. There are strict guidelines for the choices and time allowed away from the home institution. To satisfy the fourth-year clerkship requirements, the student must successfully complete the required course work, clerkships, and fourth year requirements. Students must pass USMLE Step 1, USMLE Step 2, CS and CK, and complete the fourth year clinical performance examination. In addition to the fourth-year elective program available, there is the opportunity for students to select from a variety of electives during the first two years. Examples include electives in history of ethics and medicine, medical Spanish and insights in clinical research. Most students also participate in one of several student-run, community clinics for elective credit during their first and second years.

Coordination with other Advanced Degree Programs
The curriculum for the M.D. degree provides flexibility and encourages coordination with other advanced degree programs (Ph.D., M.S., M.A., and M.P.H.). The programs offer a wide breadth of study areas and draw upon the considerable expertise of the entire campus faculty. The Department of Public Health Sciences offers an M.P.H. program in conjunction with the M.D. program. This program is designed for students interested in disease prevention and community health, health professionals and State Health Department employees.

School of Medicine administrators enthusiastically support students interested in pursuing advanced degree programs. The dual-degree program for the M.D./Ph.D. is designed to train physicians to meet, respond to, and solve the broad diversity of problems and dilemmas facing current and future health care. Students are encouraged to seek degrees in any of the campus wide Ph.D. programs, including those in social sciences and humanities. The UC Davis School of Medicine awards competitive fellowships each year to students enrolled in the M.D./Ph.D. program.

Required Curriculum for the M.D. Degree
The following listing is the typical sequencing of all courses required for completion of the M.D. degree. Course descriptions are given under the individual departmental course offerings.

First-Year Required Courses
Year 1, Block 1
- Molecular Medicine, BCM 410A
- Gross/Radiologic-Developmental Anatomy, CHA 400
- Human Physiology, HPH 400
- Human Microscopic Anatomy, CHA 402
- Doctoring 1, MDS 411A

Year 1, Block 2
- Medical Immunology, MMW 480A
- Medical Microbiology, MMW 480B
- General and Endocrine Pathology, PMD 410A
- Pharmacology, PHA 400A
- Endocrine-Nutrition-Reproduction-Genetics, "ENRG", MDS 406
- Doctoring 1, MDS 411B

Second-Year Required Courses
Year 2, Block 3
- Neuroanatomy, CHA 403
- Systemic Pathology, PMD 410B
- Pharmacology, PHA 400C
- Clinical Neurosciences, NEU 420
- Fundamentals of Clinical Psychiatry, PSY 403
- Doctoring 2, MDS 421A

Year 2, Block 4
- Inpatient Medicine, DER 420
- Musculoskeletal System, OSU 421
- Doctoring 2, MDS 421B

Year 2, Block 5
- Cardiovascular System, IMD 420D
- Pulmonary and Critical Care, IMD 420C
- Nephrology, IMD 420E
- Hematology, IMD 420A
- Systemic Pathology, PMD 410C/D
- Pharmacology, PHA 400C/D
- Doctoring 2, MDS 421C
- Oncology, HON 420
- GI System, IMD 4208
- Doctoring 2, MDS 421C

Third- and Fourth-Year Required Courses
Third-Year Clerkships
- Internal Medicine
- Clerkship—IMD 430 .......... 8 weeks
- Surgery
- Clerkship—SUR 430 .......... 8 weeks
- Pediatrics
- Clerkship—PED 430 .......... 8 weeks

Quarter Offered: I-Fall, II-Winter, III-Spring, IV-Summer; 2015-2016 offering in parentheses
Pre-Fall 2011 General Education (GE): Art/Hum—Arts and Humanities; SciEng—Science and Engineering; SocSci—Social Sciences; DivDom—Domestic Diversity; Wrt—Writing Experience
Fall 2011 and on Revised General Education (GE): AH—Arts and Humanities; SE—Science and Engineering; SS—Social Sciences; AGCM—American Cultures; DD—Domestic Diversity; OL—Oral Skills; QL—Quantitative; SL—Scientific; VL—Visual; WC—World Cultures; WE—Writing Experience

Medicine, School of
Primary Care Clerkship—FAP 430, POP 438 .................. 8 weeks
Obstetrics and Gynecology Clerkship—OBG 430 .................. 8 weeks
Psychiatry—PSY 430, POP 438 ................................. 8 weeks

Quarter Offered:
Fall—II, III, IV
Winter—II, III, IV
Spring—III, IV
Summer—II, III, IV

Pre-Fall 2011 General Education (GE):
AH=Arts and Humanities; SC=Science and Engineering; SS=Social Sciences; DD=Dominant Diversity; WR=Writing Experience

Fall 2011 and on Revised General Education (GE):
AH=Arts and Humanities; SC=Science and Engineering; SS=Social Sciences; AC=American Cultures; DD=Dominant Diversity; OL=Oral Skills; QL=Quantitative; SL=Scientific; VL=Visual; WC=Worls Cultures; WE=Writing Experience

Medical Sciences (MDS)

Lower Division

99. Special Study in Medicine for Undergraduates (1-5)
Independent study—3-15 hours. Prerequisite: consent of instructor. Participate in research projects related to medicine, with faculty in the School of Medicine. (S/U grading only.)—I, II, III, IV (I, II, III, IV)

Upper Division

192. Medical Education Internship for Advanced Undergraduates (1-12)
Internship—3-36 hours. Prerequisite: competency with computers. Enrollment dependent on availability of intern positions. Participate in projects related to curriculum development in support of curriculum for M.D. degree. Gain work experience and appreciation for innovative approaches to learning in basic and clinical sciences of medical education. May be repeated for credit for up to 12 units. (P/NP grading only.)—I, II, III, IV (I, II, III, IV)

Professional

401. Applications of Computers to Medical Practice (2)
Autotutorial—2 hours. Prerequisite: enrollment in medical school. Practicum in computer applications relative to practice of medicine, with emphasis on email, literature searching, file transfer, and hospital information services. Course given online, at home or in lab, time and place determined by preceptor. (P/F grading only.)—I, II, III, IV (I, II, III, IV)

405. Metabolism, Endocrinology, Reproduction and Nutrition (9.5)
Lecture—3.8 hours; discussion/lab—2.8 hours. Prerequisite: consent of instructor. Restricted to Medical school students. Basic and pathophysiologic processes involved in the human metabolic and endocrine system. (P/F grading only; pending completion of sequence.)—II, III, IV (I, II, III, IV)

411A. Doctoring 1 (4)
Discussion—1 hour; clinical activity—1 hour; lecture/discussion—1 hour. Prerequisite: approval of committee on student progress. Medical students only. Small, case-based learning groups with training in patient communication and interviewing techniques, clinical identification and problem solving, applications of social, psychological, cultural, bio-ethical, and basic science concepts to patient case scenarios, outpatient clinical experiences and didactic presentations. (P/F grading only; deferred grading only, pending completion of sequence.)—II, III, IV (I, II, III, IV; Eidson-Ton, Onate)

411B. Doctoring 1 (5)
Discussion—1.5 hours; clinical activity—1.5 hours; lecture/discussion—1.8 hours. Medical students only. Small, case-based learning groups with training in patient communication and interviewing techniques, clinical identification and problem solving, applications of social, psychological, cultural, bio-ethical, and basic science concepts to patient case scenarios, outpatient clinical experiences and didactic presentations. (P/F grading only; deferred grading only, pending completion of sequence.)—I, II, III, IV (I, II, III, IV; Eidson-Ton, Onate)

420. Multisystem Clinical Presentations (0.5)
Extensive problem solving—15 hours; independent study—6 hours. Prerequisite: completion of Pathophysiology Block; consent of instructor. Case-based approach to clinical medicine. (P/F grading only.)—I, II, III, IV (I, II, III, IV)

421A. Doctoring 2 (6)
Discussion—1 hour; discussion/laboratory—1 hour; internship—0.5 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress; medical students only. Application of multidisciplinary basic, social and clinical science concepts to cases in small groups. History, physical examination, and assessment of the student in the context of the patient. (P/F grading only; deferred grading only, pending completion of sequence.)—II, III, IV (I, II, III, IV; Venugopal)

421B. Doctoring 2 (6)
Discussion—1 hour; discussion/laboratory—1 hour; internship—0.5 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress; medical students only. Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small groups. History, physical examination and assessment of the student in the context of the patient. (P/F grading only; deferred grading only, pending completion of sequence.)—IV (I, II, III, IV; Molla, Scolla)

421C. Doctoring 2 (6)
Discussion—1 hour; discussion/laboratory—1 hour; internship—0.5 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress; medical students only. Application of multidisciplinary basic, social and clinical science concepts to cases in small groups. History, physical examination and assessment of the student in the context of the patient. (P/F grading only; deferred grading only, pending completion of sequence.)—I, II, III, IV (I, II, III, IV; Molla, Scolla)

430A. Doctoring 3 (2)
Discussion—3 hours. Prerequisite: approval by SOM Committee on Student Progress. Restricted to Medical students only. Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (Deferred grading only; pending completion of sequence. H/P/F grading only.)—IV (I, II, III, IV; Wilkes)

430B. Doctoring 3 (2)
Discussion—2 hours. Prerequisite: approval by SOM Committee on Student Progress. Restricted to Medical students only. Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (Deferred grading only; pending completion of sequence. H/P/F grading only.)—I, II, III, IV (I, II, III, IV; Wilkes)

430C. Doctoring 3 (2)
Discussion—2 hours. Prerequisite: approval by SOM Committee on Student Progress. Restricted to Medical students only. Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (Deferred grading only; pending completion of sequence. H/P/F grading only.)—I, II, III, IV (I, II, III, IV; Wilkes)

440A. Doctoring 4 Teaching Fellowship (1)
Discussion—0.5 hours; seminar—0.25 hours. Prerequisite: courses 430A/B/C/D and approval by Instructor of Record. Restricted to Medical students only. Instruction on teaching methodology and pedagogy. Mentored teaching of junior medical students in seminar, lecture, and bedside. (Deferred grading only; pending completion of sequence. H/P/F grading only.)—IV (I, II, III, IV; Wilkes)

440B. Doctoring 4 Teaching Fellowship (1)
Discussion—0.5 hours; seminar—0.25 hours. Prerequisite: courses 430A/B/C/D and approval by Instructor of Record. Restricted to Medical students only. Instruction on teaching methodology and pedagogy. Mentored teaching of junior medical students in seminar, lecture, and bedside. (Deferred grading only; pending completion of sequence. H/P/F grading only.)—IV (I, II, III, IV; Wilkes)

440C. Doctoring 4 Teaching Fellowship (1)
Discussion—0.5 hours; seminar—0.25 hours. Prerequisite: courses 430A/B/C/D and approval by Instructor of Record. Restricted to Medical students only. Instruction on teaching methodology and pedagogy. Mentored teaching of junior medical students in seminar, lecture, and bedside. (Deferred grading only; pending completion of sequence. H/P/F grading only.)—IV (I, II, III, IV; Wilkes)

441. Combined Ophthalmology and Otolaryngology Clerkship (6)
Clinical activity—4 weeks. Prerequisite: approval by Committee on Student Promotion and Evaluation. Fundamental knowledge of ophthalmology and otolaryngology for the treatment of eye, ear, nose and throat problems at a level of training of general phy-
400 Medicine, School of

493. Independent Special Study Module (3-12)
Prerequisite: consent of instructor. FYOC approval required. Award education experience that meets Special Study Module requirements. (H/P/F grading only)—I, II, III, IV. (I, II, III, IV)

493A. International and Comparative Health Care—Sciences (3-9)
Discussion—20 hours; lecture—10 hours. Prerequisite: consent on instructor. Restricted to UC Davis School of Medicine students only. Through a series of lectures, seminars and clinical experiences, all occurring in other nations, students will research how health care systems address critical health issues. In 2007, Chronic Disease is the local issue. (H/P/F grading only)—I, II, III, IV. (I, II, III, IV) Wilkes

493B. International and Comparative Health Care—Clinical (3-9)
Clinical activity—30 hours. Prerequisite: consent of instructor. Restricted to UC Davis School of Medicine students only. Through a series of lectures, seminars and clinical experiences, all occurring in other nations, students will research how health care systems address critical health issues. In 2007, Chronic Disease is the local issue. (H/P/F grading only)—I, II, III, IV. (I, II, III, IV) Wilkes

493QA. Improving Quality in Health Care (3)
Lecture—8 hours; discussion/laboratory—10 hours; project—10 hours. Prerequisite: consent on instructor. Working in interdisciplinary teams, will explore the theory and practical methods being employed to make improvement in health care systems while providing an opportunity for interprofessional educational experience. (Same course as Nursing 493A.) (H/P/F grading only; deferred grading only, pending completion of sequence.)—I. (I) Bakerjian, Shaikh

493QB. Improving Quality in Health Care (3)
Lecture—8 hours; discussion/laboratory—10 hours; project—10 hours. Prerequisite: consent on instructor. Working in interdisciplinary teams, will explore the theory and practical methods being employed to make improvement in health care systems while providing an opportunity for interprofessional educational experience. (Same course as Nursing 493B.) (H/P/F grading only; deferred grading only, pending completion of sequence.)—II. (II) Bakerjian, Shaikh

493QC. Enhancing Patient Safety in Health Care (6)
Seminar—6 hours; clinical activity—8 hours; discussion—6 hours. Prerequisite: fourth-year Medical student; consent of instructor. Interprofessional module is designed to expose the theory and practical methods being employed to improve patient safety in health care while providing an opportunity for interprofessional educational experience. (Same course as Nursing 493C). (P/F grading only)—I, II, III, IV. (II, II, III, IV) Bakerjian, Natale

495. Medicine Literature Review (1-9)
Discussion—3-27 hours. Prerequisite: medical student in good academic standing and permission of the Associate Dean of Curricular Affairs. Independent study: topics for selection include, but are not restricted to, medical ethics, economics and jurisprudence, culture and medicine, and medical anthropology. (P/F grading only.)

497A. Scholarly Project (2)
Seminar—0.25 hours; independent study—0.5 hours. Prerequisite: project proposal must be accepted by the Scholarly Project Executive Committee (SPEC). Restricted to fourth year medical school students only. Develop a research project on a focused topic area, implements the research, writes a publishable paper, and presents an oral summary of the project. (Deferred grading only, pending completion of sequence. H/P/F grading only)—I, II, III, IV. (I, II, III, IV) Schaefer

497B. Scholarly Project (2)
Seminar—0.25 hours; independent study—0.5 hours. Prerequisite: Project proposal must be accepted by the Scholarly Project Executive Committee (SPEC). Restricted to fourth year medical school students only. Develop a research project on a focused topic area, implements the research, writes a publishable paper, and presents an oral summary of the project. (Deferred grading only, pending completion of sequence. H/P/F grading only)—I, II, III, IV. (I, II, III, IV) Schaefer

497C. Scholarly Project (2)
Seminar—0.25 hours; independent study—0.5 hours. Prerequisite: Project proposal must be accepted by the Scholarly Project Executive Committee (SPEC). Restricted to fourth year medical school students only. Develop a research project on a focused topic area, implements the research, writes a publishable paper, and presents an oral summary of the project. (Deferred grading only, pending completion of sequence. H/P/F grading only)—I, II, III, IV. (I, II, III, IV) Schaefer

499. Research in Medical Education and Curriculum Development (4-9)
Independent study—10-36 hours. Prerequisite: medical student in good standing and competency with computers. Research and development of an independent project related to expanding computer-assisted resources in support of the MD curriculum at UC Davis. (H/P/F grading only)—I, II, III, IV. (II, II, III, IV)

Departmental Courses:

Anesthesiology and Pain Medicine (ANE)

Upper Division

192. Internship in Anesthesiology (1-6)
Internship—3-18 hours. Prerequisite: upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in anesthesia and pain medicine (P/F grading only)—I, II, III, IV. (I, II, III, IV)

199. Special Study for Advanced Undergraduates (1-5)
Prerequisite: consent of instructor. (P/F grading only)

Professional

461. Anesthesiology Clinical Clerkship (3-18)
Prerequisite: medical student. In-depth exposure to anesthesiology through informal lectures and mentoring by anesthesiologists. Emphasis on understanding of anesthetic principles in managing administration of general, regional, and specialized anesthetic procedures. (H/P/F grading only)—I, II, III, IV. (I, II, III, IV) Yao

461. Perioperative Medicine (3-12)
Clinical activity—30 hours. Prerequisite: successful completion of third-year clerkship; consent of IOR. Two week rotation provides a broad exposure to various patient care services within the Department of Anesthesiology and Pain Medicine to apply medical knowledge to safely care for patients. (H/P/F grading only)—I, II, III, IV. (II, II, III, IV) Pins

463. Multidisciplinary Pain Management (6)
Clinical activity—30 hours; lecture/discussion—10 hours. Prerequisite: senior medical student in good standing. Senior clerkship to expose students to all facets of treating pain in all aspects of clinical care: outpatient and inpatient settings, acute and chronic pain, end of life issues, pediatrics, rehabilitation, etc. Daily clinics, rounds, and lectures. (H/P/F grading only)—I, II, III, IV. (II, II, III, IV) Singh

465. Away Acting Internship in Anesthesiology (3-18)
Clinical activity—40 hours. Prerequisite: satisfactory completion of Anesthesiology Clerkship; consent of instructor. Work at the level of a sub intern in inpatient and/or outpatient settings. Expectation is to provide direct patient management. May be repeated for credit. (H/P/F grading only)—I, II, III, IV. (I, II, III, IV) Yao

480. Brief Introduction to Clinical Anesthesiology and Chronic Pain Management (3)
Clinical activity—25-30 hours (two weeks). Prerequisite: second-year medical student. Daily experience in clinical anesthesiology at the preoperative screening unit, operating room, post anesthetic care unit, chronic pain management clinic with daily clinical correlation case discussions, and one-on-one interac-
tion with faculty anesthesiologists. (H/P/F grading only)—I, II. (II) Fraulini

493B. Interdisciplinary Medicine in Pain Care (6)
Lecture—5 hours; lecture/laboratory—10 hours; laboratory—16 hours; clinical activity—4 hours. Prerequisite: consent of instructor; UC Davis School of Medicine students only. This course will review and demonstrate the application of basic physiology and pharmacology to patient care. There will be an in-depth analysis of the physiology and pharmacology of the cardiovascular, pulmonary, nervous, renal and endocrine systems. Limited enrollment. (H/P/F grading only)—I, II. (II) Fleming

499. Anesthesiology Research (4-18)
Laboratory—12-54 hours. Prerequisite: third- or fourth-year medical students, advanced standing undergraduate and veterinary medicine students; or consent of instructor. Problems in clinical and/or laboratory research. May be repeated for credit. (H/P/F grading only for medical students.)—I, II, III, IV. (II, II, III, IV)

Biological Chemistry (BCM)

Lower Division

92. Internship in Biological Chemistry (1-12)
Internship—3-36 hours; final report. Prerequisite: consent of instructor. Supervised work experience in biological chemistry and related fields. (P/F grading only)

Upper Division

192. Internship in Biological Chemistry (1-12)
Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project prior to internship by preceptor. Supervised work experience in Biological Chemistry and related fields. (P/F grading only)

198. Group Study (1-5)
Prerequisite: consent of instructor. For undergraduate students desiring to explore particular topics in depth. Lectures and conferences may be involved. (P/F grading only)

Quarter Offered: Fall, II—Winter, III—Spring, IV—Summer; 2015-2016 offering in parentheses

Pre-Fall 2011 General Education (GE): AH—Arts and Humanities; SC—Science and Engineering; SS—Social Sciences; DD—Domestic Diversity; WRW—Writing Experience

Fall 2011 and on Revised General Education (GE): AH—Arts and Humanities; SC—Science and Engineering; SS—Social Sciences; ACGH—American Cultures; DD—Domestic Diversity; OL—Oral Skills; QL—Quantitative; SL—Scientific; VL—Visual; WC—World Cultures; WRW—Writing Experience
199. Special Study for Advanced Undergraduates (1-5)
Prerequisite: consent of instructor. (P/NP grading only.)

Graduate

209. Prostaglandins/Leukotrienes and Related Lipids (2)

217. Molecular Genetics of Fungi (3)
Lecture—3 hours. Prerequisite: graduate standing in a biological science. Biochemistry 101B; Genetics 100, 102A; Botany 119; Plant Pathology 130, 215X. Microbiology 215 recommended. Advanced treatment of molecular biology and genetics of filamentous fungi and yeasts, including gene structure, organization and regulation; secretion; control of reproduction; molecular evolution; transformation; and gene manipulation. Offered in alternate years. [Same course as Plant Pathology 217. — II. Holland, Tyler]

222. Mechanisms of Translational Control (2)
Lecture—1 hour; discussion—1 hour. Prerequisite: Biochemistry 201C or consent of instructor. Molecular mechanisms of protein synthesis and translational control in eukaryotic cells, with emphasis on mammalian cells and their viruses. An advanced graduate level treatment of topics of current interest, with readings and discussion of primary papers from the literature. Offered in alternate years. — II. HERSHEY

230. Practical NMR Spectroscopy and Imaging (1)
Lecture—1 hour. Prerequisite: Chemistry 107A-107B, Physics 5A-5B-5C or 9A-9B-9C, or consent of instructor. Basic theory, experimental methods, and instrumentation of NMR. Enables students to understand NMR spectroscopy and imaging experiments. (S/U grading only). — I. I.

231. Biological Nuclear Magnetic Resonance (3)
Lecture—3 hours. Prerequisite: Molecular and Cellular Biology 221A or equivalent or consent of instructor. Principles and applications of magnetic resonance in biomedicine. Fundamental concepts and the biophysical basis for magnetic resonance applications in areas of tissue characterization, imaging, metabolic regulation, and cellular bioenergetics. (Same course as Biophysics 231). — III. Jue

291. Seminar in Genetic Approaches to Pathogenesis of Human Disease (1)
Seminar—1 hour. Prerequisite: student in Genetics Graduate Group of consent of instructor. Current genetic approaches to understanding the pathogenesis of disease and mammalian development presented and critically discussed by faculty, fellows and students. Topics include Mendelian and non-Mendelian diseases, imprinting, homologous recombination, statistical methods, genetic epidemiology and cell cycle dependent expression. (Same course as course 491.) [S/U grading only]. — I, II, III, IV, I, II, III, IV

299. Group Study (1-5)
Prerequisite: consent of instructor. For graduate students desiring to explore particular topics in depth. Lectures and conferences may be involved.

299. Research (1-12)
Prerequisite: consent of instructor. (S/U grading only.)

Professional

410A. Genetics and Molecular Medicine (4)
Lecture—3 hours; discussion—3 hours; web virtual lecture—1 hour. Prerequisite: consent of instructor. Medical Students Only. Based on the clinical and genetic consequences of disease. Molecular aspects of human disease are highlighted throughout the course. (Same course as Pediatrics 420.) (P/F grading only; deferred grading only, pending completion of sequence.) — I, IV, I, IV. G. SAWYER

491. Seminar in Genetic Approaches to Pathogenesis of Human Disease (1)
Seminar—1 hour. Prerequisite: student in Genetics Graduate Group of consent of instructor. Current genetic approaches to understanding the pathogenesis of disease and mammalian development presented and critically discussed by faculty, fellows and students. Topics include Mendelian and non-Mendelian diseases, imprinting, homologous recombination, statistical methods, genetic epidemiology and cell cycle dependent expression. (Same course as course 491.) [P/F grading only]. — I, II, III, IV, I, II, III, IV

493. Medical Genomics (6)
Clinical activity—4 hours; lecture—4 hours; laboratory—12 hours. Prerequisite: consent of instructor. Four-week module covering the clinical applications and applications of medical genomics. Topics will include an introduction to the human genome and human genomics, genetic and epigenetic variation and the ethics of genetic testing. (P/F grading only). — I, II, III, IV, I, II, III, IV. H. HERMAN, S. G. SAWYER

497T. Tutoring in Biological Chemistry (1-5)
Tutoring—3-15 hours. Prerequisite: advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum of the School of Medicine. (H/P/F grading only.)

498. Group Study (1-5)
Prerequisite: medical students with consent of instructor. (P/F grading only.)

499. Research (1-12)
Prerequisite: medical students with consent of instructor. (H/P/F grading only.)

Courses in Cell Biology and Human Anatomy (CHA)

Upper Division

101. Human Gross Anatomy (4)
Lecture—4 hours. Prerequisite: Biological Sciences 2A, concurrent enrollment in Exercise Biology 106L or course 101L strongly recommended. Upper division students only. Pass one open to upper division Exercise Biology or Anthropology majors only; Pass 2 open to Seniors in any major; Open enrollment at the start of the quarter for upper division students in any major. Detailed study of the gross anatomical structure of the human body, with emphasis on function and clinical relevance to students entering health care professions. (Same course as Exercise Biology 106.) GE credit: SciEng | SE—II. [S/U grading only].

101L. Human Gross Anatomy Laboratory (3)
Laboratory—9 hours. Prerequisite: Biological Sciences 2A, must take Exercise Biology 106 or course 101L concurrently (or have already completed). Upper division students only, Pass one open to upper division Exercise Biology or Anthropology majors only; Pass 2 open to Seniors in any major; Open enrollment at the start of the quarter for upper division students in any major; mandatory attendance on first day of lab. Detailed study of protected human cadavers in small group format with extensive hands-on experience. (Same course as Exercise Biology 106L.) GE credit: SciEng | SE. — II. I. Gross

192. Internship in Morphology (1-12)
Internship—3-36 hours; final report. Prerequisite: upper division standing; laboratory science experience including some chemistry; approval of project by preceptor prior to period of internship. Experience of supervised internship in research laboratories of members of the department. (P/NP grading only.)

197T. Tutoring in Cell Biology and Human Anatomy (1-5)
Discussion—1 hour; laboratory—6-9 hours. Prerequisite: completion of course 101 with a grade of B or better and consent of instructor. Provides laboratory instruction in gross and microscopic human anatomy, with small groups of undergraduates under the supervision of the instructor. (S/U grading only)

200. Graduate Human Gross Anatomy (6)
Lecture—4 hours; laboratory—6 hours. Prerequisite: consent of instructor. Lectures on human gross anatomy and cadaver dissection laboratory. Topics arranged by region; emphasis on osteology, neuromuscular anatomy, cardiovascular anatomy, gastrointestinal anatomy and anatomy of reproductive systems. Only two under 200 level students will have completed course 101. Open only to full-time graduate students. — II. I. BLANKENSHIP, G. TUCKER

202. Human Microscopic Anatomy (5)
Lecture—3 hours; laboratory—6 hours. Examines the normal microscopic structure of the basic cells, tissues, and organs of the body. Lectures emphasize morphology and structure-function relationships. Accompanying laboratory exercises involve analysis and identification of sectional material at the light microscopic and ultrastructural levels. — II. S. BECK

203. Neurobiology (4)
Lecture—3 hours; laboratory—3 hours. Prerequisite: two upper division or one graduate course in Neurobiology, consent of instructor. Physiology and anatomy of the normal human nervous system in an integrated format. — III. [S/U grading only].

290. Seminar (1)
Seminar—1 hour. Prerequisite: consent of instructor. (S/U grading only). — I, III, I, III

290C. Research Group Conference (1)
Discussion—1 hour. Prerequisite: graduate student with research experience (may be taken concurrently); consent of instructor. Discussion of problems, progress and literature relevant to current research undertaken by laboratory groups in Human Anatomy. (S/U grading only). — I, II, III, I, II, III

298. Advanced Group Study (1-5)
Prerequisite: consent of instructor.

299. Research (1-12)
Prerequisite: consent of instructor. (S/U grading only.)

Professional

400. Developmental, Gross, and Radiologic Anatomy (7.5)
Lecture—2 hours; laboratory—5 hours. Prerequisite: consent of Committee on Educational Progress. Medical Students only. An integrated presentation of developmental, gross and radiologic anatomy. Embryology and radiology correlated with the dissection of the entire body. Embryology from implantation to birth. (Deferred grading only, pending completion of sequence.) (P/F grading only). — I, IV, I, IV. TUCKER
402. Cell and Tissue Biology (4.5) Lecture—2 hours; laboratory—4 hours. Prerequisite: approval of Student Director. Only Medical Students only. Microscopic structure of the basic cells, tissues and organs of the body with an emphasis on how structure explains function. Analysis and discussion of sections of both light microscopic and ultrastructural levels. (Deferred grading only, pending completion of sequence) (P/F grading only)—I, II, IV Beck

403. Medical Neuroanatomy (5) Lecture—3 hours; discussion/laboratory—10 hours; laboratory—16 hours; clinical activity—4 hours. Prerequisite: consent of instructor. Restricted to School of Medicine students only. Anatomy of the human nervous system. Focus on gross external and internal morphology of brain and spinal cord, and function, neuroanatomy of motor, sensory and cognitive systems. Incorporates application of neuroanatomy to clinical problem solving. (Same course as Surgery 493.) (P/F grading only)—I, IV Blankenship, Gross

493. Clinically-Oriented Anatomy Special Study Module (6) Seminar—10 hours; laboratory activity—14 hours; autobiography—10 hours; independent study—10 hours. Prerequisite: consent of instructor; UC Davis School of Medicine students only. All attend the following laboratory and laboratory modules for courses 400 and 402 during the four-week section (approximately seven anatomy labs and three to four histology labs); tutor last-year students during the laboratory sessions; prepare and present a clinical correlate session. (H/P/F grading only)—I, II, III, IV. (II, III, IV) Beck, Gross, Fitzgerald, Tucker

497T. Tutoring in Human Anatomy (1-5) Tutoring—3-15 hours. Prerequisite: advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the Department of Anatomy’s required curriculum for the School of Medicine. (H/P grading only)

498. Advanced Group Study (1-12) Lecture—2 hours; laboratory study—10 hours. Prerequisite: successfully complete course 400, block 1; restricted to medical students only. Anatomical study of the heart, thoracic cavity, abdomen, pelvis, extremities, vascular system, peripheral nervous system and central nervous system. Focus on the understanding of anatomy related to common surgical interventions. (Same course as Surgery 492.) (H/P grading only)—I, II, III, IV. (I, II, III, IV) Blankenship, Khatri

493B. Anatomy Medical Education Special Study Module (6) Lecture—25 hours; discussion—10 hours. Prerequisite: completed one of the following courses: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program or other SOM/CTSC training programs; consent of instructor. Anatomy and physiology of conducting clinical epidemiologic research. Familiarity with three basic study designs (cross-sectional, case-control, and cohort). Discussion of principles of measurements in clinical epidemiological studies, basic methods for analyzing data, and ethical issues involved in conducting research. (Formerly Medical Sciences 462CR.) (S/U grading only)—IV. (IV) McCurdy, Romano

202. Introduction to Clinical Epidemiology and Study Design (3) Lecture—25 hours; discussion—10 hours. Prerequisite: completed one of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program or other SOM/CTSC training programs; consent of instructor. Anatomy and physiology of conducting clinical epidemiologic research. Familiarity with three basic study designs (cross-sectional, case-control, and cohort). Discussion of principles of measurements in clinical epidemiological studies, basic methods for analyzing data, and ethical issues involved in conducting research. (Formerly Medical Sciences 462CR.) (S/U grading only)—IV. (IV) Magruder, Romano

203. Methods in Clinical Research (5) Lecture—3 hours; discussion—2 hours. Prerequisite: completed one of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program or other SOM training programs; consent of instructor. Overview of major approaches to clinical research, including health services research, research techniques, informatics, GCRIC, and preclinical methodologies to enhance clinical projects. Overview of UCD clinical research support infrastructure. Methodologies applicable to clinical research and interdisciplinary perspectives. (Formerly Medical Sciences 463CR.) (S/U grading only)—IV. (IV) Berglund, Kravitz, Murphy

204. Responsible Conduct of Research (3) Lecture—3 hours. Prerequisite: consent of instructor; completed one of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing. Application and acceptance into the Clinical Research Graduate Group, K30 program or other SOM training programs. The nine NIH-man- dated modules: Data Acquisition and Reporting, Mentor Training, Publication Practices and Authorship, Peer Review, Collaborative Science, Human Subjects, Research with Animals, Conflict of Interest, Research Misconduct, and Entrepreneurship/Industry Collaborations/Intellectual Property/Technology Transfer. (Former course Medical Sciences 464CR.) (S/U grading only)—IV. (IV) Kon, Wun

205. Introduction to Medical Statistics (4) Lecture—3 hours; laboratory—2 hours. Prerequisite: completed one of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program or other SOM training programs of instructor. Biomedical applications of statistical methods in clinical, laboratory, population medicine. Graphical/tabular data presentation, probability, binomial, Poisson, normal, t, variance distributions, elementary nonparametric methods, simple linear regression/correlation, life tables. Microcomputer applications of statistical procedures in population medicine. (Former course Medical Sciences 465CR.) (S/U grading only)—IV. (IV) Yang

220. Basics of Stem and Progenitor Cells (1) Lecture—1 hour. Prerequisite: Molecular, Cellular, and Integrative Physiology 200, 200L; consent of instructor; graduate standing. This is a lecture course designed for graduate students who have experience in cell culture techniques. It is designed to give a broad overview of the field and current cells of interest to the greater research community. (S/U grading only)—I, II, III, IV. (III) Tanouye

222. Ethical Issues in Stem Cell Biology (1) Lecture/discussion—1 hour. Prerequisite: consent of instructor; graduate standing. Critical presentation and analysis of recent articles in stem cell biology and small group discussions of the ethical issues surrounding this area of research. (S/U grading only)—II. (II) Kemoto, Rich

230. Congestive Heart Failure, Mechanism of Disease (3) Lecture/discussion—2 hours; project—3 hours. Prerequisite: consent of instructor and graduate standing; completion of course 250. Cutting edge techniques used in clinical research such as electrophysiology, cardiovascular surgery, cardiac catheterization and echocardiography, team science, and patient management. Lectures are presented by experts on each technique, with an emphasis on use in translational research. (S/U grading only)—I, II, III, IV, (I, II, III, IV)

233. Molecular Mechanisms of Disease: Cancer (3) Lecture/discussion—2 hours; project—3 hours. Prerequisite: consent of instructor. Restricted to students pursuing the designated emphasis in Translational Research; graduate standing; cutting edge research on underlying mechanisms of cancer development, progression and prevention - clinical trials/ drug development, signaling pathways and molecular mechanisms of cancer development, recent basic research on cancer stem cells, genetics and epigenetic events and animal models used. (II) Goldkorn

250. Predoctoral Clinical Research Training Program Research Project Research Integration (1) Seminar—0.5 hours; discussion—0.5 hours. Prerequisite: consent of instructor and enrollment in the Predoctoral Clinical Research Training Program in the College of Medicine. Students register for this course; are assigned a journal club, seminar/discussion, and research integration sessions. May be repeated three times for credit (S/U grading only)—I, II, III, (II, III)

250. Integrating Medicine Into Basic Science (1) Lecture—3.75 hours; discussion—6 hours; seminar—2.5 hours; clinical—8 hours. Prerequisite: consent of instructor; graduate standing; acceptance into HHMI Integrating Medicine into Basic Science program. Four-week summer institute consisting of didactic lectures, reading assignments, group discussions, and clinical rotations to acculturate students to the medical environment. Cutting edge techniques used in clinical research such as electrophysiology, cardiovascular surgery, cardiac catheterization and echocardiography, team science, and patient management. Lectures are presented by experts on each technique, with an emphasis on use in translational research. (S/U grading only)—I, II, III, IV. (I, II, III, IV) Kenyon

Quarter Offered: I—Fall, II—Winter, III—Spring, IV—Summer. 2015-2016 offering in parentheses.
290C. Literature in Translational Research (1)
Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Critical presentation and analysis of recent journal articles in translational research by students. May be repeated for credit. (S/U grading only.)—I, II, III, IV. (I, II, III, IV) Knowlton

290D. Literature in Translational Research (1)
Discussion—1 hour. Prerequisite: consent of instructor; graduate standing. Critical presentation and analysis of recent journal articles in translational research by students. May be repeated for credit. (S/U grading only.)—I. (I) Knowlton

298. Group Study in Clinical Research (1-5)
Prerequisite: consent of instructor. Special topics in Clinical Research appropriate for group study at the graduate level. Restricted to students enrolled in the Mentored Clinical Research Training Program. (S/U grading only.)

299. Clinical Research (1-5)
Prerequisite: consent of instructor. Independent research and special topics in clinical research appropriate for graduate level. Restricted to students enrolled in the Mentored Clinical Research Training Program. (S/U grading only.)

Dermatology (DER)

Upper Division

192. Internship in Cutaneous Biology (1-4)
Internship—8-20 hours; final report. Prerequisite: upper division standing or consent of instructor. Approval of project prior to internship by preceptor. Supervised work experience involving research on the skin. (P/NP grading only.)—Isserof, Izumiya, Liu, Murphy, Takada

199. Special Study in Cutaneous Biology (1-12)
Prerequisite: advanced undergraduate standing and/or consent of instructor. Special study by individual arrangement of specialized topics in biology of skin. May be repeated for credit. (P/NP grading only.)—Isserof, Izumiya, Liu, Murphy, Takada

Graduate

299. Research in Cutaneous Biology (1-12)
Laboratory—3.6 hours. Prerequisite: consent of instructor. Independent research in cellular and biochemical mechanisms of cutaneous biology and pathology. (S/U grading only.)—Isserof, Izumiya, Liu, Murphy, Takada

Professional

420. Integumentary System (2)
Lecture/discussion—3 hours; clinical activity—0.25 hours. Prerequisite: approval of School of Medicine Committee on Student Promotions. Restricted to Medical students only; student must have passed all SOM Year 1 courses. Cell biology, pathology, and physical diagnosis of the skin. Recognition of normal variations and common or important dermatoses. Patient demonstrations of select conditions. (P/F grading only.)—I, II, Espan, Isserof

466. Away Acting Internship in Dermatology (3-18)
Clinical Activity—70 hours; lecture—6 hours. Prerequisite: consent of instructor. Work at the level of a sub intern in inpatient and/or Outpatient settings. Expectation is to provide direct patient management. May be repeated for credit. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV) Fazel

470. Introduction to Dermatopathology (6)
Clinical—20 hours; independent study—20 hours; lecture/discussion—6 hours. Prerequisite: previous rotation in a Dermatology Clerkship, consent of instructor. Restricted to fourth-year medical student. Integrated, multi-specialty approach to the microscopic diagnosis of inflammatory and neoplastic skin disorders. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV) Bar, Fung, Komorowski

480. Insights in Dermatology (1-3)
Clinical activity—3-9 hours. Prerequisite: first- and second-year medical students in good academic standing; consent of instructor. Clinical experience limited to observation of delivery of dermatologic care and attendance at some conferences. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV)

495. Wound Healing: From Bench to Bedside (6)
Clinical activity—12 hours; laboratory—8 hours; autotutorial—15 hours; term paper. Prerequisite: medical students only. An integrated, multi-specialty approach to clinical soft tissue wound healing. —I, II, III, IV. (I, II, III, IV) Armstrong

498. Special Topics in Clinical Dermatology (1-6)
Independent study—3-18 hours. Prerequisite: medical students with consent of instructor. Individually arranged study of special topics in clinical dermatology determined by student and instructor. Assigned readings and/or clinical examination of selected patients. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV) Armstrong

499. Research in Cutaneous Biology (1-12)
Laboratory—3.36 hours. Prerequisite: consent of instructor. Research, either laboratory or clinical, on ongoing projects within the department under supervision of faculty. (P/F grading only.)—Armstrong Emergency Medicine (EMR)

Lower Division

92. Emergency Medicine Clinical Research Internship (1-4)
Prerequisite: undergraduate student in good academic standing at UC Davis; consent of instructor. This course is intended to give the undergraduate student an opportunity to conduct “hands-on” clinical research in the Emergency Department. Through the lecture/discussion, students will learn the basics of conducting and developing clinical research studies, using examples from ongoing studies. May be repeated for credit up to four units. Units awarded will depend on hours worked. —I, II, III, IV. (I, II, III, IV) Panacek

902. Emergency Medicine Survey (1-6)
Lecture—4 hours; discussion—16 hours; independent study—10 hours. Prerequisite: consent of instructor. Current health policy issues affecting emergency medicine. Participation in policy discussions, attend meetings with California Medicine, School of 403

Quarter Offered: I-Fall, II-Winter, III-Spring, IV-Summer. 2015-2016 offerings in parentheses:

Pre-Fall 2011 General Education (GE): AH=Arts and Humanities; SC=Science and Engineering; SE=Social Sciences; ACH=Dominant Cultures; ASC=Dominant Diversity; WRT=Writing Experience
Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SC=Science and Engineering; SE=Social Sciences; ACH=Dominant Cultures; ASC=Dominant Diversity; VL=Oral Skills; QT=Quantitative; SC=Scientific; VI=Visual; WC=World Cultures; WRT=Writing Experience
403FC. SJVP Longitudinal Primary Care Clerkship at UCSF (C) (2)

Clinical activity—45 hours; lecture—2 hours—workshop; 2 hours.
Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only; deferred grading only, pending completion of sequence.)—I. (III.) Eidson-Ton, Vierra

430TA. TeachMS Longitudinal Primary Care Clerkship (A) (4)

Clinical activity—45 hours; lecture—2 hours—workshop—2 hours.
Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Internal Medicine and Psychiatry for 24 weeks.

430TB. TeachMS Longitudinal Primary Care Clerkship (B) (6)

Clinical activity—45 hours; lecture—2 hours; workshop—2 hours.
Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Internal Medicine and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only; deferred grading only, pending completion of sequence.)—I. (II, III) Nesbit

Professional

401. Introductory Preceptorship in Family Practice (3-9)

Clinical activity—20-40 hours. Prerequisite: completion of first year of medical training. Preceptorship in family practice offers an introduction to clinical medicine. 20 hours or 40 hours per week in a family physician’s office, doing patient interviews, history-taking, and performing physical exams. (H/P/F grading only.)—I. (II, III) Eidson-Ton

405. The Healer’s Art (1)

Lecture—0.6 hours; workshop—3 hours. Prerequisite: consent of instructor. Limited to first-year medical students. Learning to strengthen your humanity and remain openhearted to awake the difference between professional burnout and a fulfilling life. Opportunity to learn tools for self care, healing loss, finding meaning, strengthening commitment and becoming a true healer. (P/F grading only.)—II. (I) Eidson-Ton, Neyhart

411. Selected Studies of Systems for Chronic Illness Care (3)

Clinical activity—4 hours; discussion—4 hours. Prerequisite: course 405A, 405B, 406C, medical students with consent of instructor. Understanding of chronic illness, particularly diabetes, participation in patient care, alternative techniques. May be repeated for credit. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV) Fong

430. Primary Care Clerkship (12)

Clinical activity—45 hours; lecture—2 hours; workshop—2 hours. Prerequisite: approval by School of Medicine Committee on Student Progress.

430FA. SJVP Longitudinal Primary Care Clerkship at UCSF (A) (4)

Clinical activity—45 hours; lecture—2 hours; workshop—2 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructors. Longitudinal Clerkship runs concurrently, with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only; deferred grading only, pending completion of sequence.)—I. (I) Eidson-Ton, Vierra

430FB. SJVP Longitudinal Primary Care Clerkship at UCSF (B) (6)

Clinical activity—45 hours; lecture—2 hours; workshop—2 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently, with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only; deferred grading only, pending completion of sequence.)—II. (I) Eidson-Ton, Vierra

430TC. TeachMS Longitudinal Primary Care Clerkship (C) (2)

Clinical activity—45 hours; lecture—2 hours; workshop—2 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Internal Medicine and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only; deferred grading only, pending completion of sequence.)—III, IV. (I, II) Eidson-Ton, Henderson, Holt, Vierra

434. Primary Care Clinics-Clinica Tepati (3-12)

Clinical activity—32-36 hours; seminar—0-2 hours; lecture—1-2 hours. Open to medical students in all four years of medical school. Medical students will learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Provides exposure to special health care needs of various ethnic and poverty-level populations. May be repeated for credit. (P/F grading only.)—I, II, III, IV. (I, II, III, IV) Fong

435. Primary Care Clinics-Imani Clinic (3-12)

Clinical activity—32-36 hours; seminar—0-2 hours; lecture—1-2 hours. Open to medical students in all four years of medical school. Medical students will learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Provides exposure to special health care needs of various ethnic and poverty-level populations. May be repeated for credit. (P/F grading only.)—I, II, III, IV. (I, II, III, IV) Fong

436. Continuity Clinic in Primary Care—Shifa Clinic (3-12)

Clinical activity—32-36 hours; seminar—0-2 hours; lecture—1-2 hours. Open to medical students in all four years of medical school. Learning counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Provides exposure to special health care needs of vari-
ous ethnic and poverty-level populations. May be repeated for credit. (P/F grading only.)—I, II, III, IV. (I, II, III, IV) Yaman-Ton

437. Primary Care Clinics-Knights Landing (3-12)
Clinical activity—2-3 hours; lecture—1 hour. Must complete an application and interview prior to registration. Experiences in diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Provides exposure to special health care needs of various ethnic and poverty-level populations. Observations of the community of Knights Landing. May be repeated for credit. (P/F grading only.)—I, II, III, IV. (I, II, III, IV) Eidson-Ton

439D. Directed Clinical Studies in Family Medicine (1-12)
Clinical activity—40 hours. Prerequisite: consent of instructor. Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence. May be repeated for credit. (P/F grading only.)—I, II, III, IV. (I, II, III, IV) Eidson-Ton

439R. Directed Studies in Family Medicine (1-12)
Clinical activity—40 hours. Prerequisite: completion of third-year primary care plus clerkship or consent of instructor. Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Community on Student Progress and approved by the course IOR. May be repeated for credit. (P/F grading only.)—I, II, III, IV. (I, II, III, IV) Eidson-Ton

449. Advanced Preceptorship in Family Medicine (3-18)
Clinical activity—40 hours. Prerequisite: completion of third-year primary care plus clerkship or consent of instructor. Individual directed studies in extended preparation for patients with common medical problems seen by primary care physicians in an outpatient setting. May be repeated up to 18 units of credit. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV) Eidson-Ton

450. CAM in Family & Community Health (3-18)
Variable—20-40 hours. Intended to grant units for away rotations; not offered at the UC Davis Medical Center. Complementary and alternative medicine courses at away institutions that cover various aspects of integrative medicine, including but not limited to: botanicals, homeopathy, mind/body, naturopathy, massage, traditional Chinese medicine, osteopathy, and energy medicine. Offered irregularly. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV) Eidson-Ton

460. Geriatrics in Community Health (3-6)
Fieldwork—24 hours; clinical activity—12 hours; lecture—4 hours. Prerequisite: course 430. Visits to community agencies including mental health teams, adult day health centers, a diagnostic and research center, and care management specialists. Observation and participation in MMSE’s, patient-family conferences, interdisciplinary team meetings, neuropsychiatric testing and home visit evaluations. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV) Eidson-Ton

468. International Preceptorship (3-12)
Clinical activity—40 hours. Prerequisite: medical student with consent of instructor. Preceptorship with a family practitioner in a foreign country (arranged by study center or with assistance of the Family and Community Medicine Department.) Participate in clinical activities, analyze and report characteristics of the practice. May be repeated up to 12 units of credit. Prerequisite: consent only.—I, II, III, IV. (I, II, III, IV) Eidson-Ton

469. Inpatient Acting Internship in Family Medicine (3-12)
Clinical activity—40 hours. Prerequisite: completion of third-year of medical school or consent of instructor. Opportunity to work with only. Comprehensive primary medical care of inpatients on a family medicine hospital service and in a family medicine outpatient clinic. May be repeated up to 12 units of credit. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV) Eidson-Ton

470. Inpatient Clinical Elective in Family Medicine (3-12)
Clinical activity—40 hours. Prerequisite: completion of third-year of medical school or consent of instructor. Open to medical students only. Comprehensive primary medical care of patients on a family medicine hospital service. Usually includes inpatient and outpatient experience. May be repeated up to 12 units of credit. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV) Eidson-Ton

475. Combined Inpatient/Outpatient Clinical Elective in Family Medicine (3-12)
Clinical activity—40 hours. Prerequisite: completion of third-year of medical school or consent of instructor. Open to medical students only. Combined inpatient and outpatient elective. Consists of comprehensive primary medical care of patients on a family medicine hospital service and in a family medicine outpatient clinic. May be repeated up to 12 units of credit. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV) Eidson-Ton

488. Selected Studies in Family Practice (1-9)
Prerequisite: medical students with consent of instructor. Assigned readings in family practice to increase understanding on selected topics relating to family medicine. May be repeated for credit. (P/F grading only.)—I, II, III, IV. (I, II, III, IV) Eidson-Ton

490. Health Care to Underserved Populations (1)
Lecture—1 hours. Prerequisite: Sociology, Political Science, or Applied Behavioral Science background recommended, or registration in medical school. Discusses sociocultural perspectives of underserved populations impacting health; roles of family/interpersonal relationships in making health care decisions; the nature of ethnic/racial/socioeconomic health care disparities; and clinicians’ perspectives in treating people of cultures which are unfamiliar and/or uncomfortable with Western medicine. May be repeated for credit. (P/F grading only.)—I, II, III, IV. (I, II, III, IV) Nesbit

493. Aging and Health (6)
Seminar—12 hours. Prerequisite: consent of instructor. Is disease specific to the inevitable consequence of aging? We will spend four weeks exploring this question by reviewing the biology of aging, physiologic changes seen in aged individuals and disease processes commonly found in elderly persons. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV) Lin, Neyhart

495. LGBTIQA Healthcare Lecture Series (1)
Lecture—6 sessions. Increase the awareness of medical issues surrounding the LGBTIQA community and arm students with knowledge of the health disparities the community faces. Provide better quality care to the LGBTIQA patients cared for by all physicians. May be repeated for credit. (P/F grading only.)—I, II, III, IV. (I, II, III, IV) Eidson-Ton

499. Research (1-12)
Directed reading, discussion and/or laboratory project. Prerequisite: senior standing in biology, chemistry, physics, psychology, or engineering. (P/NP grading only.)

Graduate

210A. Advanced Physiology (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: Physiology Ph.D. program, or consent of instructor. Advanced course in general concepts of physiology, surveying homeostasis, cellular and selected topics, and neurophysiology. (Same course as Physiology 210A.)—I. (I) Cale, Payne

298. Group Study (1-5)
Prerequisite: consent of instructor. For graduate students desiring to explore particular topics in depth. Lectures and conferences may be involved.

299. Research (1-12)
Prerequisite: consent of instructor. (S/U grading only)

Professional

400. Human Physiology (6)
Lecture—3 hours; laboratory—2 hours. Medical student only. General and cellular physiology of neurons, muscle, and epithelial cells and systemic physiology of cardiovascular, respiratory, gastrointestinal, and renal systems. Deferred grading only, pending completion of sequence. (P/F grading only.)—I, IV. (I, IV) Payne, Widdicombe

403. Medical Neuroanatomy (5)
Lecture—3 hours; laboratory—1 hour; discussion/lab—1 hour. Prerequisite: Successful completion of course 400, block 1; restricted to medical students only. Anatomy of the normal human nervous system, to include gross external and internal morphology of brain and spinal cord, and function neuroanatomy of motor, sensory and cognitive systems. Incorporates application of neuroanatomy to clinical problem solving. (Same course as Cell Biology and Human Anatomy 403F.) (P/F grading only.)—I, IV. (I, IV) Blankenship, Gross

493. Physiological Principles in SICU SSM (6)
Lecture—5 hours; lecture/laboratory—10 hours; laboratory—16 hours; clinical rounds—4 hours. Prereq: consent of instructor; restricted to UC Davis School of Medicine students only. Special Study Module, a four week course on the topic: Care of the Critically Ill Surgical Patient: U.S. Physiological Principles to Guide Treatment of Patients with Common Surgical Problems. (Same course as Surgery 493SC) (P/F grading only.)—I, II, III, IV. (I, II, III, IV) Cota, Holcroft

497T. Tutoring in Human Physiology (1-5)
Tutoring—3-15 hours. Prerequisite: advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the required curriculum of the School of Medicine. (P/NP grading only.)—Cala
Internal Medicine (IMD)

Lower Division

92. Internship (1-4)

Internship—3-12 hours. Prerequisite: lower division standing and consent of instructor. Supervised internship in internal medicine and related fields. (P/NP grading only)—Last

98. Directed Group Study (1-2)

Seminar—1-2 hours. Prerequisite: lower division standing and consent of instructor. Directed group study in medicine and related fields. (P/NP grading only)—Last

99. Undergraduate Research in Medicine: Molecular and Cell Biology (1-3)

Prerequisite: consent of instructor. (P/NP grading only)—Last

Upper Division

164. Practicum in Community Health Clinic: Bayanihan Clinic (1-2)

Clinical activity—5 hours. Through active participation in the medical aspects of community health clinics, the undergraduate student gains knowledge of the organization, administration, and problem-solving capabilities. May be repeated for credit. (P/NP grading only)—I, II, III, IV (I, II, III, IV) Guerrero

192. Internship in Internal Medicine (1-12)

Internship—3-36 hours, final report. Prerequisite: upper division standing. Supervised work experience in internal medicine and related fields. (P/NP grading only)

194. Practicum in Community Health Clinics (1-3)

Clinical activity—5-15 hours on Saturday mornings and during the week as necessary, excluding holidays. Prerequisite: consent of instructor. The undergraduate student, through active participation in the medical aspects of community health clinics, gains knowledge of the organization, administration, and problem-solving capabilities of these primary care facilities. May be repeated for credit. (P/NP grading only)—I, II, III, IV (I, II, III, IV) Kumanogoda

198. Directed Group Study (1-2)

Seminar—1-2 hours. Prerequisite: consent of instructor. Directed group study in medicine and related fields. (P/NP grading only)—Last

199. Special Study for Advanced Undergraduates (1-3)

Prerequisite: upper division standing; consent of instructor. (P/NP grading only)

Graduate

214. Topics in Medical Ethics (1)

Seminar—1 hour. The complex moral, legal, and ethical dilemmas that patients, families, and health care providers face today’s clinic. May be repeated one time for credit. (S/U grading only)—I

220D. Cardiovascular System (2.5)

Lecture/discussion—5.5 hours. Prerequisite: Human Physiology 200, graduate student status and consent of instructor. Principles of etiology, mechanisms, diagnosis and management of the major diseases of the cardiovascular system. Included are ischemic, valvular, hypertensive, cardiomyopathic, pericardial, and conductive disorders. (I, II) Laslett

250. Medicine and the Law (3)

Lecture/discussion—2 hours; project—2 hours. Legal and bioethical principles and concepts in medicine. Topics include standard of care, informed consent, reproductive medicine, and end-of-life issues. (S/U grading only)—II Rich

290C. Controversies in Clinical Research (1)

Seminar—3 hours. Clinical Research Study design and data analysis related to controversial research areas. Presentations assigned to and given by faculty/student teams. May be repeated for credit. (S/U grading only)—II, III (III) Lane, Meyers

Professional

414. One Health: A Course on Global Health (1)

Conference—8 hours. Global health problems are complex and require culturally-sensitive, socially-acceptable, and action-oriented approaches to create practical and cost-effective solutions. Will examine major health problems created by the convergence of human, animal and environmental influences. May be repeated for credit. (P/F grading only)—I, II, III, IV, (I, II, III, IV) Wilkes

416. Summer Institute on Race and Health (6)

Independent study—30 hours. Prerequisite: consent of instructor. Limited enrollment. Using field trips, media, readings, and clinical experiences, 8-10 first year medical students will explore issues of race, health disparities and related issues in a 4 week institute during the summer break. (P/F grading only)—II, III Fancher, Fernandez, Garcia, Murray-Garcia

420A. Hematology (2)

Lecture/discussion—1 hour, discussion—1 hour. Prerequisite: consent of instructor. Restricted to Medical students only. Malignant disorders of blood cells and transfusion therapy. Covers acute leukemia, myelodysplasia, myeloproliferative disorders, lymphoma, and myeloma. (P/F grading only)—I, II O’Donnell

420B. Gastrointestinal System (2.5)

Lecture—2 hours; discussion—2 hours. Prerequisite: approval of Committee on Student Progress; medical student only. Basic pathophysiological principles of digestive diseases on which clinical concepts and judgments can be developed. Emphasis on pathophysiological basis of gastroenterological and hepatic disorders with discussion of major disorders and their diagnosis and management. (P/F grading only)—II, III, (II, III) Terrado

420C. Pulmonary & Critical Care Medicine (2.5)

Laboratory/discussion—5.5 hours. Prerequisite: approval of SOM’s Committee on Student Promotions. Restricted to Medical students only; student must pass all SOM Year 1 courses. Clinical aspects of respiratory and cardiac physiology, and pathology. Diagnostic procedures and a description of the major pulmonary diseases & disorders, and critical care medicine. (P/F grading only)—I, II Stollwerck

420D. Cardiovascular System (2.5)

Lecture/discussion—5.5 hours. Prerequisite: Approval of the School of Medicine Committee on Student Promotions. Restricted to Medical students only: student must pass all SOM Year 2 courses. Principles of etiology, mechanisms, diagnosis and management of the major diseases of the cardiovascular system. Included are ischemic, valvular, hypertensive, cardiomyopathic, pericardial, and conductive disorders. (H/P/F grading only)—I, II Venugopal

420E. Nephrology (2)

Lecture—2 hours; discussion—2 hours; laboratory—2 hours. Prerequisite: approval of Student Progress Committee. Fundamentals of disorders of body water, electrolytes and acid/base balance; major categories and mechanisms of parenchymal renal diseases; urinary tract infections. (P/F grading only)—II, IV Yeun

430. Medicine Clerkship (12)

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Clerkship is divided into two, four-week blocks, one each at UCSF and Kaiser Hospitals. Time is spent in direct patient care situations under the guidance of faculty. Ongoing patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence)—II, III (II, III) Aronowitz

430A. SJVP Longitudinal Medicine Clerkship at UCSF (A) (4)

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. Ongoing patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence)—I, II Aronowitz, Johl

430B. SJVP Longitudinal Medicine Clerkship at UCSF (B) (6)

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. Ongoing patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence)—III, (III) Aronowitz, Johl

430C. SJVP Longitudinal Medicine Clerkship at UCSF (C) (2)

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. Ongoing patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence)—I, II Aronowitz, Johl

430T. TeachMS Longitudinal Medicine Clerkship (A) (4)

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. Ongoing patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence)—I, II Aronowitz, Johl

430B. TeachMS Longitudinal Medicine Clerkship (B) (4)

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. Ongoing patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence)—II, III Aronowitz, Johl

430C. TeachMS Longitudinal Medicine Clerkship (C) (2)

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. Ongoing patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence)—II, III Aronowitz, Johl

439D. Directed Clinical Studies in Internal Medicine (1-12)

Clinical activity—40 hours. Prerequisite: consent of instructor. Individual directed studies in extended preparation for modified curriculums to complete a clinical rotation following a leave of absence. May be repeated for credit. (P/F grading only)—I, II, III, (I, II, III) Prescott

Quarter Offered: T-Fall, II-Winter, III-Spring, IV-Summer; 2015-2016 offering in parentheses

Pre-Fall 2011 General Education (GE): AH=Arts and Humanities; SE=Science and Engineering; SS=Social Sciences; Div=Domestic Diversity; Wre=Writing Experience

Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SE=Science and Engineering; SS=Social Sciences; AGCH=American Cultures; DD=Domestic Diversity; OL=Oral Skills; QL=Quantitative; SL=Scientific; VL=Visual; WC=World Cultures; WE=Writing Experience
439R. Directed Studies in Internal Medicine (1-12)
Clinical activity—30 hours; independent study—10 hours. Prerequisite: consent of instructor. Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies are individualized to meet the needs of the student as directed by the Committee on Student Progress and approved by the course IOR. May be repeated for credit. (H/P/F grading only)—I, II, III, IV. (I, II, III, IV)

450A. Medicine and the Law (1.5)
Seminar—2 hours; discussion—2 hours. Prerequisite: consent of instructor. Restricted to Medical students only. Legal and ethical principles and concepts in medicine. Topics include standard of care, informed consent, reproductive medicine, and end-of-life issues. Offered irregularly. (Deferred grading only, pending completion of sequence. H/P/F grading only.)—II. (II) Rich

450B. Medicine and the Law (1.5)
Seminar—2 hours; discussion—2 hours. Prerequisite: consent of instructor. Restricted to Medical students only. Legal and ethical principles and concepts in medicine. Topics include standard of care, informed consent, reproductive medicine, and end-of-life issues. Offered irregularly. (Deferred grading only, pending completion of sequence. H/P/F grading only.)—III. (III) Rich

459. Oncology: Research and Treatment of Cancer (2)
Lecture/discussion—2 hours. Prerequisite: second-, third-, or fourth-year medical student and/or consent of instructor. Comprehensive review of current treatment practices of cancer and state-of-the-art second-impact on the family and prevention of cancer. Emphasis on epidemiology, molecular biology, and pharmacology. (H/P/F grading only)—I. (II) DeCirigno

460. Correctional Health Care Clerkship (1-4)
Clinical activity—full time. Prerequisite: fourth-year medical student in good academic standing. Covers Correctional Health delivery and the effects of detention and incarceration on health status. Special emphasis on problems unique to health care delivery in a prison setting. Student will spend time in clinical settings at three prison facilities. (H/P/F grading only)—I, II, III, IV. (I, II, III, IV) Silva

462. Medicine Wards AI (6)
Clinical activity—40 hours. Prerequisite: Medicinal Sciences 431; consent of instructor; demonstrated ability to accept responsibility. Limited enrollment. Assessment of active intern and all primary physician on medical ward under direction of medical resident and staff. Teams rotation every fifth night. Emphasis on evidence-based inpatient care. May be repeated for credit. (H/P/F grading only)—I, II, III, IV. (I, II, III, IV) Johl

463. Acting Internship in Medicine Intensive Care Unit (MICU) (6)
Clinical activity—40 hours. Prerequisite: completion of third-year of medical school; consent of Director of MICU. Limited enrollment. At UCSDMC, student functions as acting intern on MICU service under direction of medical resident and staff. Responsibility for patients admitted to MICU. On call in hospital every fourth night. (H/P/F grading only)—I, II, III, IV. (I, II, III, IV) Sandrock

464. Bayanihan Primary Care Clinic (3)
Clinical activity—6 hours. Prerequisite: consent of instructor. Restricted to medical students in all four years of medical school. Under the guidance and supervision of a physician, medical students will learn patient history taking, medical documentation, counseling, and diagnosis and treatment of patients with chronic and acute disease. Provides exposure to the special needs of various ethnic and socioeconomic groups. May be repeated for credit. (P/F grading only)—I, II, III, IV. (I, II, III, IV) Guerrero

465. Medicos-Global Health Sciences (9)
Lecture—5 hours; clinical activity—25 hours; fieldwork—5 hours; project—5 hours. Prerequisite: consent of instructor; medical students only. Travel to foreign country for four weeks to collaborate with faculty from local universities and work in urban and rural environments. Experiences are divided among visiting faculty and medical students. (P/F grading only.)—IV. (IV) Wilkes

468. Ambulatory Internal Medicine Elective (8)
Clinical activity—40 hours. Prerequisite: course 430; consent of instructor; demonstrated ability to accept responsibility. Limited enrollment. Hands-on primary care ethics and ambulatory setting supervised by a general internist. Emphasis on evidence-based outpatient care. (H/P/F grading only)—I, II, III, IV. (I, II, III, IV) Henderson

470. Landmark Clinical Trials and Evidence-Based Medicine (3)
Lecture/discussion—10 hours; clinical activity—8 hours. Prerequisite: fourth-year medical student. Ten landmark clinical trials from a historical, clinical, and epidemiological point of view. Prerequisites of evidence-based medicine. (H/P/F grading only)—III. Kravitz, Amsterdam

480. Person Centered Assessment (1)
Lecture—1 hour. Prerequisite: open to all medical students. Person-centered assessment modalities and diagnostic approaches with regards to Internal Medicine and its different subspecialties. (P/F grading only)—I. Fitzgerald

494. Practicum in Community Health Clinics (1-3)
Clinical activity—15-40 hours. Prerequisite: medical student with consent of instructor. Students are assigned to clinical settings that demonstrate ethnic, urban/rural differences of community health. Through active participation in health care delivery, students are able to relate conceptual with practical aspects of primary health care. May be repeated for credit. (H/P/F grading only)—I, II, III, IV. (I, II, III, IV) Kumagai

497. Medicine, Bioethics and the Holocaust (3)
Lecture/discussion—10 hours. Prerequisite: medical students only, consent of instructor. The concept of “evil” and the role of collaborators, bystanders and participants exemplified by the holocaust and compared to problems physicians face in practice today. Demonstration that evil emerges incrementally until taken for granted. (P/F grading only.) Offered irregularly—II, III.

498. Group Study in Internal Medicine (1-18)
Prerequisite: consent of instructor. Special study for medical students which may involve laboratory or library research, ambulatory or inpatient care. Consent required. (H/P/F grading only)—I, II, III, IV. (I, II, III, IV) Meyers

499. General Medicine Research (1-18)
Independent study—20 hours. (H/P/F grading only)—I, II, III, IV. (I, II, III, IV) Meyer

500. Internal Medicine—Cardiology (CAR)
Upper Division
192. Internship in Cardiology (1-18)
Internship—336 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in cardiology. May be repeated for credit up to 12 units. (P/NP grading only.)

199. Cardiology Research (1-5)
Prerequisite: consent of instructor. Special study by individual arrangement in cardiovascular medicine. Work will include directed readings, laboratory and discussions. (P/NP grading only.)

220. Basic Science in Cardiology (1)
Lecture—1 hour. Prerequisite: graduate or medical student status. Fundamentals underlying cardiovascular medicine. Including hemodynamics, neural control of the circulation, biochemistry and some experimental design and statistics. Experts in each of these fields will give current experience in these areas. Offered in alternate years. (S/U grading only.)—III. Kaufman

Professional
401. Clinical Cardiology Clerkship: Kaiser (3-18)
Clinical activity (4-weeks)—8-12 hours (hospital); 1-5 hours (clinics). Prerequisite: third-year medical students with advance approval by Division of Cardiology. Emphasis placed on history taking and physical examination of pediatric and adult patients with congenital and acquired cardiovascular disease. Hospital rounds in CUCU and elsewhere. The roles of ECG, PCG, and cardiac fluoroscopy, etc., in office cardiology will be evaluated. May be repeated for credit. Limited enrollment. (H/P/F grading only)—I, II, III, IV.

460. Cardiology Clinical Clerkship (3-18)
Clinical activity—full time (2-12 weeks). Prerequisite: Internal Medicine 430, third and fourth-year medical students in good academic standing with consent of instructor. Participation with members of subspecialty consultation service in initial clinical evaluation, work-up, management, and follow-up of patients with cardiac disorders. Twice weekly rotation in patient clinics per week. May be repeated for credit. Limited enrollment. (H/P/F grading only)—I, II, III, IV.

461. Management of Coronary Artery Disease: Coronary Care Unit (3-18)
Clinical activity (inpatient service)—full time (4 weeks). Prerequisite: completion of second year of medical school and advanced approval by Division of Cardiology. Research in laboratory and exercise testing to be determined by instructor. Current methods of clinical research involving certain aspects of diagnosis and treatment. Includes acute coronary care, hemodynamic monitoring, stress testing, cardiac catheterization, pathologic correlations and the modern approach to therapy, both medical and surgical, based on pathophysiological mechanisms. May be repeated for credit. Limited enrollment. (H/P/F grading only)—I, II, III, IV.

464. Preventive Cardiology (3-6)
Seminar—2 hours (for 2-4 weeks); clinical activity—full time (2-4 weeks). Prerequisite: completion of third year of medical school. Clinical experience, weekly seminar and reading on primary and secondary prevention of cardiovascular disease. Will be carried out in Lipid and Hypertension Clinics, Exercise Laboratory, Cardiac Care Unit, Cardiac Catheterization, and Cardiac Surgery Unit. Consent required. (H/P/F grading only)—II, III, IV. (II, III, IV) Amsterdam

480. Insights in Cardiology (1-3)
Clinical activity—3-9 hours. Prerequisite: medical student in good academic standing and approval by Division of Cardiology. Students attend one or more cardiovascular medicine clinics: general, hypertension, arrhythmia. Introduction to the diagnosis/treatment of common cardiovascular problems. (H/P/F grading only)—I, II, III, IV.

493. Gender Specific Medicine (SSM) (6)
Lecture—5 hours; lecture/laboratory—10 hours; laboratory—16 hours; clinical activity—4 hours. Prerequisite: consent of instructor; restricted to UC Davis School of Medicine students only. Special Studies Module, a four week course on the topic: Basic Science Principles Relating to Gender Specific Medicine. (Same course as Obstetrics & Gynecology 493.) (H/P/F grading only)—I, II, III, IV. (I, II, III, IV) Sweet, Villablanca

498. Special Group Study: EKG Unit (1-12)
Special study—2-week sessions. Prerequisite: medical students with advance approval by monthly attending faculty. Special group study in cardiology for medical students in EKG unit. May include lectures, directed readings, laboratory and discussions. May be repeated for credit. Limited enrollment. (H/P/F grading only)
409. Research (1-12)  
Prerequisite: approval by Division of Cardiology.  
(H/P/F grading only.)

Internal Medicine—Endocrinology, Diabetes and Metabolism (EMN)  

Upper Division  
192. Internship in Endocrinology (1-12)  
Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in endocrinology. May be repeated for credit up to 12 units. (P/NP grading only.)

Graduate  
299. Research (1-12)  
Prerequisite: consent of instructor. Endocrinology research. (S/U grading only)

Professional  
460. Endocrinology Clinical Clerkship (3-18)  
Clinical activity (inpatient-outpatient service)—full time (3 days per week). Prerequisite: Internal Medicine 430 and/or consent of instructor. Participation with members of subspecialty service in the initial evaluation, work-up, management and follow-up of patients with endocrinologic disorders. Limited enrollment. (H/P/F grading only)—I, II, III, IV. (I, II, III, IV)

485. Introduction to Health Care Ethics (1-3)  
Clinical activity—3-9 hours; oral presentation. Prerequisite: student in good academic standing and consent of instructor. First- or second-year students observed in morning Endocrine and Diabetes clinics and attend bi-weekly noon and afternoon endocrine conferences. They also give brief endocrine physiology oral presentation to the endocrine group. (H/P/F grading only)—I, II, III, IV. (I, II, III, IV)

499. Research (1-12)  
Prerequisite: consent of instructor. (H/P/F grading only)

Internal Medicine—  
Gastroenterology (GAS)  

Upper Division  
192. Internship in Gastroenterology (1-12)  
Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in gastroenterology. May be repeated for credit up to 12 units. (P/NP grading only.)

Graduate  
299. Research (1-12)  
Research in gastroenterology. (S/U grading only)

Professional  
460. Gastroenterology Clinical Clerkship (3-18)  
Clinical activity—30 hours. Prerequisite: completion of third year of medical school. Work-up, manage, and follow-up new patients on active inpatient consultation service. Gastroenterology/Hepatology patients. Daily rounds with attending physician. May be repeated for credit. (H/P/F grading only)—I, II, III, IV. (I, II, III, IV) Terrado

480. Insights in Gastroenterology (1-3)  
Clinical activity—3-9 hours; oral presentation. Prerequisite: student in good academic standing and consent of instructor. First- or second-year medical student in good academic standing. May be repeated for credit. (S/U grading only)—I, II, III, IV. (I, II, III, IV)

499. Research (1-12)  
Prerequisite: consent of instructor. (H/P/F grading only)

Internal Medicine—  
Hematology-Oncology (HON)  

Upper Division  
192. Internship in General Medicine (1-12)  
Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in general medicine. May be repeated for credit up to 12 units. (P/NP grading only.)

Graduate  
291. Seminars in Human Health Services Research and Clinical Epidemiology (1)  
Seminar—1 hour. Critical review, evaluation, and discussion of research in human health services and clinical epidemiology. Presentation of statistical, epidemiologic, and econometric methods. Students present their own research and critique the work of others. May be repeated for credit. (Same course as Epidemiology 291.) (S/U grading only)—I, II, III, IV. (I, II, III, IV)

Professional  
460. General Medicine Consults (1-18)  
Clinical activity (inpatient-outpatient service)—40 hours. Prerequisite: fourth-year medical students with consent of instructor, a general medicine clerkship. Supervised opportunity to see entire spectrum of medical problems encountered by a general internist.Student spends time in General Medicine Clinic and on the General Medicine Consult Service. Consult Service is particularly concerned with medical evaluation of surgical patients. Limited enrollment. (H/P/F grading only)—I, II, III, IV. (I, II, III, IV) Keenan

470. Health Care Ethics (3-9)  
Lecture/discussion—2 hours; laboratory/discussion—1 hour. Prerequisite: consent of instructor. Guided independent study of issues in biomedical ethics, with discussion of readings that are based on student interests and needs. Participation in ethics rounds. (Same course as Nursing 470.) (S/U grading only)—II, III, IV. (III, IV) Loewy

485. Introduction to Health Care Ethics (1)  
Lecture—10 weeks. Prerequisite: medical student in good standing. Introduction to concepts and methods of healthcare ethics. Emphasis on principles and methods. (H/P/F grading only)—I. (I) Loewy

493A. Teaching the Basics Sciences SSM (6)  
Lecture—6 hours; lecture/laboratory—8 hours; laboratory—30 hours; tutorial—10 hours. Prerequisite: consent on instructor; concurrent registration in Medical Sciences 440. Restricted to UC Davis School of Medicine students only. Special Studies Module, a yearlong in program that includes small group discussion and discussion education technique and theory. (H/P/F grading only)—I, II, III, IV. (I, II, III, IV)

499. General Medicine Research (1-18)  
Discussion—3-9 hours; clinical research—6-40 hours. Prerequisite: consent of instructor. Student will be involved in a clinical research problem within the General Medicine Consult Service. May be repeated for credit. (H/P/F grading only)

Internally—  
Hematology-Oncology (HON)  

Upper Division  
199. Research in Hematology-Oncology (1-5)  
Laboratory—hours variable. Prerequisite: upper division standing and consent of instructor. Experience in laboratory research. (P/NP grading only)—I, II, III, IV. (I, II, III, IV)

Graduate  
298. Topics in Hematology (1-4)  
Prerequisite: one year of graduate work and/or consent of instructor. Basic concepts of the physiology of the hematopoietic organ, the pathophysiology of hematopoietic disease, and concepts of therapeutics will be offered for study. The specific topics will be dictated by the interest and background of the students.

299. Research (1-12)  
Prerequisite: consent of instructor. Laboratory investigation contributing to the dissertation for a graduate degree. (S/U grading only)

Professional  
420. Oncology (4)  
Lecture/discussion—2 hours. Prerequisite: approval by the SOM Committee on Student Promotions. Restricted to Medical student only; students must pass all Year 1 SOM courses. Covers the principles of oncology and the pathophysiologic aspects of specific, common cancers correlated with organ systems pathophysiology and systemic pathology courses. (H/P/F grading only; deferred grading only; pending completion of set sequence).—I, II, III, IV. (II, III)

420A. Oncology (4)  
Lecture—2 hours. Prerequisite: consent of instructor. Restricted to Medical student only. Covers the principles of oncology and the pathophysiologic aspects of specific, common cancers correlated with organ systems pathophysiology and systemic pathology courses. (H/P/F grading only).—II. (II)

460. Hematology—Oncology Acting Internship (1-18)  
Clinical activity—full time (4-12 weeks). Prerequisite: fourth-year medical student in good academic standing. Acting intern on inpatient hematology/oncology ward service. May be repeated for credit. Limited enrollment. (H/P/F grading only)—I, II, III, IV. (I, II, III, IV)

461. Hematology—Oncology Consult Clerkship (6-12)  
Clinical activity—full time (4-8 weeks). Prerequisite: fourth-year medical student in good academic standing. Student is an integral member of the inpatient hematology and oncology consult service, the bone marrow service, and will attend all conferences sponsored by the Division. May be repeated for credit. Limited enrollment. (H/P/F grading only)—I, II, III, IV. (I, II, III, IV)

462. Hematology—Oncology Ambulatory Clerkship (3-18)  
Clinical activity—30 hours. Prerequisite: fourth-year medical student in good academic standing, consent of instructor. Limited enrollment. Outpatient rotations in related clinics. Participation with members of the subspecialty service in the initial clinical evaluation, work-up, management and follow-up of the patient with hematologic or oncologic disorders. (H/P/F grading only)—I, II, III, IV. (I, II, III, IV)

493. Cancer as an Educational Process (1-6)  
Seminar—10 hours; clinical activity—14 hours; autotutorial—6 hours; independent study—10 hours. Prerequisite: consent on instructor. Restricted to UC Davis School of Medicine students only. Covers cancer as a process, beginning with risks and prevention, neoplasia, microinvasion, treatment options, metastases and systemic therapy, pain medicine and palliative care, and cancer communication. Format includes traditional lectures, student-led case discussions, and problem-based learning. (H/P/F grading only)—I, II, III, IV. (II, III, IV) Meyer, van Erichs Fitzwater
499. Research (1-12)  
Prerequisite: consent of instructor. (H/P/F grading only.)

Internal Medicine—Infectious Diseases (IDI)  
Upper Division

141. Infectious Diseases of Humans (1)  
Lecture—1 hour. Prerequisite: introductory knowl-
edge in biology and chemistry recommended. Course integrates information on biological and molecular nature of the causative organism, modern diagnostics, treatment and prevention strategies, and the role of infectious diseases in contemporary society and throughout human history. (P/NF grading only.)—I. (I.) Danekar

192. Research Internship in Internal Medicine (1-12)  
Internship—3-36 hours; final report. Supervised work experience in the division of Infectious Diseases. Undergraduates will have an opportunity to acquire research experience in clinical settings. May be repeated for credit up to 12 units. (P/NP grading only.)

199. Infectious Diseases Research (1-5)  
Prerequisite: chemistry through organic chemistry (in addition, microbiology and immunology preferred), consent of instructor. Discrete problem requiring reading and actual manual effort in solution will be assigned to each student. Progress and results will be reviewed at intervals with instructor and via seminar presenta-
tion. (P/NP grading only.)

Graduate

211. Epidemiology and Prevention of Infectious Diseases (3)  
Lecture—2 hours; discussion—1 hour. Prerequisite: Epidemiology 205B, 207 or Internal Medicine 421. Infectious disease epidemiology and prevention, with equal emphasis on human and veterinary diseases. Major categories of infectious diseases by mode of transmission. (I.) DeFierme, Sandrock

299. Research in Infectious Diseases (1-12)  
Prerequisite: consent of instructor. Laboratory investiga-
tion contributing to the dissertation for a graduate degree. (S/U grading only.)

Professional

440. Introduction to AIDS and Related Disorders (1.5-6)  
Clinical Activity—30 hours; discussion—10 hours. Prerequisite: first and second year medical students must be in good academic standing and have con-
sent from the instructor. Familiarizes students with the diagnosis and treatment of individuals infected with the human immunodeficiency virus. Students will interview patients, observe patient care and partici-
pate in ongoing clinic research as well as examine alternative lifestyles. May be repeated for credit. (H/P/F grading only.)—I, II, III, IV. (IV.) Levenswork

450. Clinical and Social Care of the Injection Drug User (1-4)  
Lecture—1 hour; clinical activity—3 hours. Prerequi-
site: first and second year medical students in good academic standing. Lecture and guided clinical practice in a supervised clinical setting, focusing on the social and medical aspects of health care for injection drug users. May be repeated for credit up to 24 units. (H/P/F grading only.)—I, II, III, IV. (II, III, IV.)

460. Infectious Diseases Clinical Clerkship (3-6)  
Clinical activity: Prerequisite: successful completion of years of study at School of Medicine. Limited enrollment with priority to fourth-year medical students. Patients ill with infectious diseases, including AIDS, will be evaluated and presented at rounds and case conferences. Patients are also seen in the Infectious Diseases Clinic. Instruction in clinical microbiology and the proper use of the laboratory will be provided. (H/P/F grading only.)—I, II, III, IV. (II, III, IV.) Cohen

499. Research Topics in Infectious Disease (2-12)  
Prerequisite: successful completion of the first year of study in School of Medicine, graduate students (approved for graduate credit), and/or consent of instructor. Discrete problem requiring reading and actual manual effort in solution will be assigned to each student. Progress and results to be reviewed at intervals with instructor and via seminar presenta-
tion. (H/P/F grading only.)

Internal Medicine—Nephrology (NEP)  
Upper Division

192. Internship in Nephrology (1-12)  
Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project by pre-
ceptor prior to internship. Supervised work experi-
nce in nephrology. May be repeated for credit up to 12 units. (P/NF grading only.)—I, II, III, IV. (II, III, IV.)

Graduate

299. Nephrology Research (1-12)  
Prerequisite: consent of instructor. (S/U grading only.)

Professional

444. Curriculum Design for Doctoring (1)  
Project—2 hours; seminar—1 hour. Prerequisite: consent of instructor; second year standing in medi-
cal school. Design of Doctoring curriculum for medi-
cal students in focused topic areas to be announced annually. Students will design sessions, consider resource needs, and work with IOs to initiate the curriculum. (P/F grading only.)—IV. (IV.)

460. Nephrology and Fluid Balance (3-6)  
Clinical activity—4 completion of 3rd year medical school. Completion of Medicine Care Clerkship; consent of the instructor. Active participation in all inpatient/outpatient clinical activities, attendance at specific lectures and conferences at UC Davis Medi-
cal Center covering the field of nephrology and fluid-electrolyte disorders. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (II, III, IV.) Feun

499. Research in Nephrology (3-18)  
Prerequisite: individual arrangement and consent of instructor. Independent laboratory research on a spec-
cific problem related to biochemical or immunologic causes of renal disease and/or uremic disorders in humans or animals. (H/P/F grading only.)

Internal Medicine—Pulmonary Medicine (PUL)  
Upper Division

192. Internship in Pulmonary Medicine (1-12)  
Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project by pre-
ceptor prior to internship. Supervised work experi-
nce in pulmonary medicine. May be repeated for credit up to 12 units. (P/NP grading only.)

Graduate

299. Pulmonary Disease Research (1-12)  
Laboratory. Prerequisite: by arrangement only. Pul-
monary disease research activity with focus in inhala-
tion toxicity, oxidants or lung biochemistry, and cell and molecular biology. (S/U grading only.)—Cross

Professional

460. Comprehensive Pulmonary Medicine Clerkship (3-6)  
Clinical activity—40 hours. Prerequisite: completion of second year of medical school and/or consent of instructor; completion of Internal Medicine Clerkship. Rotation intended to provide a comprehensive intro-
duction to diagnosis and treatment of common pulmonary disorders. (H/P/F grading only.)—I, II, III, IV. (II, III, IV.) Stollwerk

461. Critical Care Clinical Clerkship (3-6)  
Clinical activity—40 hours. Prerequisite: completion of second year of medical school and/or consent of instructor; completion of Internal Medicine and Sur-
gical Clerkships. Rotation intended to provide stu-
dent education in the Critical Care Management of surgical/critical patients. May be repeated for credit. (H/P/F grading only.)—I, II, III, IV. (II, III, IV.) Stol-
werk

462. Pulmonary Clinical Clerkship (3-6)  
Clinical activity—35 hours. Prerequisite: completion of second year of medical school and/or consent of instructor; completion of Internal Medicine Clerkship. Similar to course 460. Rotation designed for students interested in learning pulmonary medicine, but who do not desire the comprehensive experience offered by a four-week pulmonary rotation. May be repeated for credit. (H/P/F grading only.)—I, II, III, IV. (II, III, IV.)

475. Encounters in Ethics in the ICU (3-6)  
Clinical Activity—12 hours; lecture/discussion—6 hours; independent study—6 hours. Prerequisite: 4th year Medical Student. Care for critically ill adults with complex medical disease carries with it unique ethical roles and duties for the physician. (H/P/F grading only.)—I, II, III, IV. (II, III, IV. Black

480. Pulmonary—Critical Care Medicine Insights (1-3)  
Clinical activity—3-9 hours. Prerequisite: student in good academic standing and consent of instructor. Student will attend respiratory outpatient clinics and inpatient pulmonary consultation rounds and medi-
cal intensive care rounds. Introduction to diagnosis and treatment of common pulmonary disorders. (H/P/F grading only.)—I, II, III, IV. (II, III, IV.) Albertson

499. Research (1-12)  
Prerequisite: consent of instructor. (H/P/F grading only.)

Internal Medicine—Rheumatology-Allergy (RAL)  
Lower Division

99. Directed Research in Immunology (1-5)  
Laboratory. Prerequisite: consent of instructor. Inde-
pendent research will be encouraged in basic immu-
nology, including the role of the cellular immune system in oncogenesis. (P/NP grading only.)—I, II, III, IV. (II, III, IV.)

Upper Division

192. Internship in Rheumatology-Allergy (1-12)  
Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project by pre-
ceptor prior to internship. Supervised work experi-
nce in rheumatology-allergy. May be repeated for credit up to 12 units. (P/NP grading only.)

99. Directed Research in Immunology (1-5)  
Laboratory. Prerequisite: consent of instructor. Inde-
pendent research will be encouraged in basic immu-
nology, including the role of the cellular immune system in oncogenesis. (P/NP grading only.)

Graduate

209. Current Topics in Immunology: From Presentations to Grants (3)  
Lecture—1 hour; term paper or discussion—1 hour; project—1 hour. Prerequisite: Immunology 201. Cur-
rent developments in various aspects of immunology and their interrelationships. Focus on areas of immu-
nology not currently covered in the basic and advanced immunology courses. Oral presentation, written review and grant preparation. (I.) Van de Water

Quarter Offered:
I=Fall; II=Winter; III=Spring; IV=Summer; 2015-2016 offering in parentheses

Pre-Fall 2011 General Education (GE): AH—Arts and Humanities; SC—Science and Engineering; SS—Social Sciences; ACH—American Cultures; DD—Domestic Diversity; WRT—Writing Experience

Fall 2011 and on Revised General Education (GE): AH—Arts and Humanities; SC—Science and Engineering; SS—Social Sciences; ACH—American Cultures; DD—Domestic Diversity; OR—Oral Skills; QL—Quantitative; SL—Scientific; VL—Visual; WC—World Cultures; WE—Writing Experience

Medicine, School of
299. Research in Autoimmune Disease (1-12)
Laboratory. Prerequisite: consent of instructor. Independent research will be encouraged in both animal models of human disease (including congenitally athymic [nude], asplenic, and New Zealand mice) and the cellular immune system of patients with systemic lupus erythematosus, polymyositis and drug hypersensitivity. (S/U grading only.)

Professional

460. Rheumatology Clinical Clerkship (1-18)
Clinical activity—240 hours. Prerequisite: Medical Sciences 431 and consent of instructor. Participation with members of the subspecialty service in the diagnosis and therapeutic management of patients with rheumatologic diseases. May be repeated for credit. (H/P/F grading only)—I, II, III, IV, (I, II, III, IV)

461. Allergy Clinical Clerkship (3-18)
Clinical activity (inpatient-outpatient service)—full time (2 to 12 weeks). Prerequisite: completion of second year of medical school and consent of instructor. Student will work with practicing allergist in daily work with patients and participate in weekly allergy clinic and teaching conferences. Study of the literature. Will see patients with problems in clinical immunology, in vitro and in vivo, asthma, allergic rhinitis. (H/P/F grading only)—I, II, III, IV, (I, II, III, IV)

470. Practicum in Care of the Terminally Ill (3-6)
Clinical activity—35 hours; seminar—5 hours. Prerequisite: consent of instructor. Restricted to fourth year medical students in good standing. Work with hospice interdisciplinary team. Direct experience in the care of patients with illnesses where no cure is possible. Emphasis on symptom relief, end of life issues, physician assisted suicide. (H/P/F grading only)—I, II, III, IV, (I, II, III, IV) McMillian

480. Insights in Rheumatology (1-3)
Clinical activity—3-9 hours. Prerequisite: student in good academic standing and consent of instructor. Participation in rheumatology consultation rounds, rheumatic disease clinics and conferences with supervised readmissions in rheumatology. (H/P/F grading only)—I, II, III, IV, (I, II, III, IV)

499. Research (1-12)
Prerequisite: medical student with consent of instructor. Part-time participation in active clinical and basic research projects which can involve both patient care and relevant laboratory procedures. Students can gain experience in clinical medicine and clinical investigation. May be repeated for credit. (H/P/F grading only)—I, II, III, IV, (I, II, III, IV)

Medical Microbiology (MMI)

Upper Division

130. Medical Mycology (2)
Lecture—2 hours. Prerequisite: a course in pathogenic microorganisms of course. This is a course for students who have completed Medical Microbiology as a component of the required curriculum of the School of Medicine. (H/P/F grading only)

280. The Endogenous Microbiota in Lifespan Health and Disease (3)
Lecture—3 hours. Prerequisite: graduate standing. Recent research into host-associated microbial communities has yielded important insights into the microbial composition of mucosal surfaces, and how the composition of these communities contributes to normal development, metabolism, education of the immune system, and disease susceptibility. Not open for credit to students who have completed Internal Medicine. Infectious Diseases 280. (I, II, III) Dandekar, Tsolis

299. Research in Autoimmune Disease (1-12)
Prerequisite: consent of instructor. Independent research will be encouraged in both animal models of human disease (including congenitally athymic [nude], asplenic, and New Zealand mice) and the cellular immune system of patients with systemic lupus erythematosus, polymyositis and drug hypersensitivity. (S/U grading only.)

Professional

410. Physician Scientist Molecular Medicine Journal Club (1)
Lecture—1 hour. Weekly seminars by students on research articles in current literature. Topics/articles to be selected by instructors to include a broad range of frontiers in biomedical literature. May be repeated for credit. (H/P/F grading only)—(I, I) Bevins

430. Medical Mycology (2)
Lecture—2 hours. Prerequisite: a course in pathogenic microbiology and consent of instructor. Various aspects of pathogenic fungi, particularly affecting humans, will be discussed including epidemiology, pathogenesis and pathology, diagnosis and therapy. Offered in alternate years. (Same course as 130.) (H/P/F grading only)—I, II, III, IV, (I, II, III, IV) Shackleford, Torres

480. Medical Microbiology (5.5)
Lecture—2.75 hours; laboratory/discussion—1 hour. Medical students only. Discussion of the diseases caused by infectious agents includes their pathogenesis, clinical manifestations, diagnosis, treatment and epidemiology and pathogenesis. Covers the general properties of and diagnostic techniques for bacteria, fungi and viruses. (P/F grading only; deferred grading only, pending completion of sequence).—II, III, (II, III) Luckhart, Mudri

497. Tutoring in Medical Microbiology (1-5)
Tutoring—3-15 hours. Prerequisite: appropriate preparation in subject matter and consent of instructor. Assist instructor by tutoring medical students in one of the departmental courses that is a component of the required curriculum of the School of Medicine. (H/P/F grading only)

498. Group Study in Medical Microbiology and Immunology (1-5)
Prerequisite: medical students with consent of instructor. Directed reading and discussion and/or laboratory investigation on selected topics. (Sections 1, 2, 4, 5; S/U grading only)

299. Research (1-12)
Prerequisite: consent of instructor; open to graduate students. Laboratory investigation contributing to the dissertation for a graduate degree. (S/U grading only)
Course descriptions are given under the individual course offerings. For Public Health Sciences courses, see the Public Health Sciences (SPH), on page 417.

**Units Required for Master of Public Health**

Core courses ....................................... 40
Add-on-course selective ....................... 6
Elective units ...................................... 10
Total units required for the degree ........ 56

**Core Coursework**

**Biostatistics**
Preventive Veterinary Medicine 402........... 5
Preventive Veterinary Medicine 403........... 3
Public Health Sciences 210..................... 2

**Epidemiology**
Epidemiology 205A............................... 4

**Environmental Health Science**
Public Health Sciences 262..................... 3

**Health Services Administration**
Public Health Sciences 273..................... 3

**Medical Pharmacology and Toxicology (PHA)**

**Lower Division**

92. Internship in Pharmacology (1-12)
Internship—3-36 hours; final report. Prerequisite: lower division student with good academic standing; approval of project prior to period of internship. Supervised work experience in pharmacology and related fields. (P/NP grading only.)

99. Special Study for Undergraduates (1-5)
Prerequisite: lower division standing. (P/NP grading only.)

**Upper Division**

192. Internship in Pharmacology (1-12)
Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project prior to period of internship. Supervised work experience in pharmacology and related fields. (P/NP grading only.)

198. Directed Group Study (1-5)
Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)
Prerequisite: consent of instructor. (P/NP grading only.)—I, II, III, IV, (II, III, IV) Despa

**Graduate**

205. Problem Solving in Pharmacology (1)
Lecture/discussion—1 hour. Restricted to Graduate Students in Pharmacology and Toxicology, Chemistry and Clinical Research Graduate Groups; other students may be accepted upon consultation with instructor. May be repeated 12 times for credit. Course changes subjects every quarter; each course is unique and can be taken as often as desirable; certain students (Trainees of the Training Program in Pharmacological Sciences) must take course for at least three years. —I, II, III, (II, III, III) Hell

207. Drug Discovery and Development (3)
Lecture/discussion—2 hours; extensive writing—1 hour. Prerequisite: course 201, an equivalent course in general pharmacology, or knowledge of basic pharmacology. Intended for graduate students in Pharmacology and Toxicology, Chemistry and Clinical Research Graduate Groups; other students, including undergraduates, may be accepted with consent of instructors. Survey of the process by which a drug is discovered, developed and made available to the public. Topics include drug discovery, design and optimization, safety testing, clinical evaluation, regulatory issues, intellectual property, formulation, and the global pharmaceutical industry. May be repeated for credit. —II. (II.) Horuk, Rogawski, Wulff

208. Advanced Cardiac Physiology and Pharmacology (3)
Lecture—2 hours; lecture/discussion—1 hour. Prerequisite: Pharmacology and Toxicology 201, Pharmacology and Toxicology 202, an equivalent course in general pharmacology or physiology (example, Biomedical Engineering 204), or knowledge of basic pharmacology/physiology. Open to graduate students from the Pharmacology and Toxicology, Molecular, Cellular and Integrated Physiology, Biomedical Engineering and Clinical Research Graduate Groups; other students (including undergraduates) may be accepted upon consultation with the instructors. Detailed characterization of the mechanisms involved in cardiac excitation–contraction coupling, altered in heart disease and pharmacological interventions. Topics include cardiac contractile apparatus, action potential, Ca cycling, excitation–transcription coupling, cardiac inotropy, heart failure and arrhythmias. —III. (III.) Bassuyn, Despa, Ripplinger

225. Gene Therapy (3)
Lecture/discussion—3 hours. Prerequisite: Genetics 201C/Molecular and Cellular Biology 221C or equivalent. Gene therapy from basic concepts to clinical applications. Topics include the human genome and genetic variation, genetic diseases, methods to manipulate gene expression, viral and nonviral delivery vectors, history and progress of gene therapy, case studies, and ethical issues. Offered in alternate years. —II. Anderson, Bauer, Nolita, Segal

250. Functional Genomics: From Bench to Bedside (3)
Lecture/discussion—3 hours. Prerequisite: Genetics 201C/Molecular and Cellular Biology 221C or equivalent. Functional genomics (how genetic variation and epigenomics affect gene expression), with an emphasis on clinical relevance and applications. Topics include genetic variation and human disease, cancer therapeutics, and biomarker discovery. —III. (III.) Diaz, Lozza, Segal

291. Pharmacology Research Seminar Series (1)
Seminar—1 hour; discussion—1 hour. Prerequisite: consent of instructor; upper division or graduate standing. Research seminars on current topics in Pharmacology. May be repeated for credit when topic differs. (S/U grading only.)—I, II, III, (II, III, III) Wulf

298. Group Study (1-5)
Prerequisite: consent of instructor.

299. Research (1-12)
Prerequisite: consent of instructor. (S/U grading only.)

**Professional**

400A. Pharmacology (2)
Lecture—1 hour; discussion/lab—0.3 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; medical students only. Principles in pharmacology, including pharmacokinetics, drug metabolism and the actions, uses and toxicities of the major classes of drugs. (Deferred grading only, pending completion of sequence. P/F grading only.)—II, III, (II, III) Gelli, Wulf

**400B. Pharmacology (1.5)**
Lecture—1 hour; discussion—0.25 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress; medical students only. Principles in pharmacology, including autonomic pharmacology, general anesthetics, neuropharmacology and sedative/hypnotics. (P/F grading only.)—IV. (IV) Diaz

**400C. Pharmacology (1.5)**
Lecture—1 hour; discussion—0.25 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress; medical students only. Topics taught include the treatment of respiratory and cardiovascular disease. Specific topics include: asthma, chronic obstructive pulmonary disease, hypertension, congestive heart failure, and the treatment of arrhythmias. (P/F grading only.)—I, II, (I) Segal

**400D. Pharmacology (2)**
Lecture—3 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress; medical student only. Pharmacology topics covered include central nervous system drugs, drugs, toxicology/poisoning and cancer chemotherapy. Specific topics are: cancer chemotherapy, pain management, the treatment of depression and psychosis, cardiac re flux disease, irritable bowel syndrome, and general toxicology. (P/F grading only.)—II. (II) Segal

445. Introduction to Integrative Medicine (1)
Lecture/discussion—1 hour. Prerequisite: medical student in good standing. Basic principles of alternative medical systems [e.g., traditional Chinese, Ayurvedic, Tibetan], alternative practices (e.g., chiropractic, osteopathy, naturopathy, homeopathy, herbalism, guided imagery/meditation, massage therapy), and mind/body connection are presented as introduction to integrating alternative treatments into traditional medical practice. (H/P/F grading only.)—I, II, III, (II, III, IV)

**490. Seminar in Pharmacology for Medical Students (1)**
Seminar—1 hour. Prerequisite: consent of instructor. Seminar in pharmacology for medical students. [H/P/F grading only.]—I, II, III, IV, (I, II, III, IV)

**497T. Tutoring in Pharmacology (1-5)**
Tutoring—3-15 hours. Prerequisite: advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum of the School of Medicine. (H/P/F grading only.)

**498. Special Study for Medical Students (1)**
Lecture, directed reading, and/or discussion groups—3-15 hours. Prerequisite: consent of instructor. Special study in pharmacology for medical students. (H/P/F grading only.)

**499. Directed Research for Medical Students (1-12)**
Laboratory—3-36 hours. Prerequisite: consent of instructor. Directed research in pharmacology for medical students. (H/P/F grading only.)

**Neurology (NEU)**

**Upper Division**

199. Individual Special Study and Research (1-4)
Prerequisite: consent of instructor. Individual special study in neurophysiology and biomedical engineering is offered to qualified students. Studies on psychophysics, single-unit electrophysiology and instrumentation are offered in Davis. (P/NP grading only.)

298. Group Study (1-5)
Prerequisite: consent of instructor. For graduate students desiring to explore particular topics in depth. Lectures and conferences may be involved. (S/U grading only.)
Professional

451. Neurosurgical Critical Care Clerkship (3)
Clinical activity—full time (2 weeks). Prerequisite: third- or fourth-year medical student who has satisfactorily completed course 460; consent of instructor. Students participate in the care of neurosurgical patients admitted through the Neurosurgery Emergency Room. (H/P/F grading only.)—I, II, III, IV.

455. Child Neurology (6)
Clinical activity—full time (4 weeks). Prerequisite: satisfactory completion of Internal Medicine 430, Obstetrics and Gynecology 430, Pediatrics 430 and consent of instructor. Student exposed to children with disorders of the nervous system, both in outpatient and inpatient services. Cases presented to a member of the full-time faculty who will discuss clinical findings, differential diagnosis, management and therapy. This course satisfies the fourth year neurosurgery requirement. (H/P/F grading only.)—I, II, III, IV, I, II, III, IV.

460. Clinical Neurosurgery (6-18)
Clinical activity—full time (4-12 weeks). Prerequisite: fourth-year medical student having completed a neurosurgical clerkship. Clerkship in neurosurgery to be arranged at another institution with accredited residency program in neurosurgery under proper supervision. (H/P/F grading only.)—I, II, III, IV, I, II, III, IV.

464. Externship (4-12)
Clinical activity—full time (4-12 weeks). Prerequisite: fourth-year medical student having completed a neurosurgical clerkship. Clerkship in a variety of chronic and acute neurological diseases. Students will function as acting intern on neurosurgical service. Admission and follow-up of patients. Neurological history, examination, and diagnostic procedures are emphasized. Students will participate in surgical procedures and are required to attend all pediatric neurosurgery conferences. (H/P/F grading only.)—I, II, III, IV, I, II, III, IV. Pang

465. Child Neurosurgery (6-12)
Clinical activity—full time (4 weeks). Prerequisite: consent of instructor. (P/NP grading only.)—I, II, III, IV, I, II, III, IV.

499NE. Group Study in Neurology (1-6)
Clinical activity—full time (4 weeks). Prerequisite: completion of four-week Neurology selective and consent of instructor. Extension of basic Neurology clerkship. Designed for students with special interest in medical disorders of nervous system. By arrangement with department, student may serve as an acting intern. Principles of neurological differential diagnosis and therapeutics emphasized. (H/P/F grading only.)—I, II, III, IV, I, II, III, IV.

499. Research (1-12)
Prerequisite: consent of instructor. (P/NP grading only.)—I, II, III, IV, I, II, III, IV.

Graduate

200. Genetics of Reproduction (3)
Lecture/discussion—3 hours. Introduction to genetics of mammalian reproduction for domestic species, species used in research, and the human. Mendelian and non-Mendelian modes of inheritance. Research paper. Offered in alternate years.—II. (II.)

290. Current Topics in Research (1)
Seminar—1 hour. Prerequisite: graduate standing and consent of instructor. Selected topics in reproductive biology. (S/U grading only.)—I, II, III, IV, I, II, III, IV. (II., IV.)

298. Group Study (1-5)
Prerequisite: consent of instructor; consent of instructor. (P/NP grading only.)

299. Research (1-12)
Prerequisite: consent of instructor. (S/U grading only.)

Professional

410. Obstetrics and Gynecology Clerkship (12)
Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Obstetrics, gyneocolgic and gynecological oncology experience in the delivery room, operating room, and clinics and wards at UCSF Fresno. Rounds, conferences, interactive student presentations and seminars ongoing. (H/P/F grading only.)—I, II, III, IV, I, II, III, IV.

430. SJVP OBGYN Clerkship at UCSF (12)
Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Obstetrics, gynecologic and gynecologic oncology experience in the delivery room, operating room, clinics and wards at UCSF Fresno. Rounds, conferences, interactive student presentations and seminars ongoing. (H/P/F grading only.)—I, II, III, IV, I, II, III, IV.

439D. Directed Clinical Studies in OB/GYN (1-12)
Clinical activity—40 hours. Prerequisite: consent of instructor. Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence. May be repeated for credit. (P/F grading only.)—I, II, III, IV, I, II, III, IV.

439R. Directed Studies in OB/GYN (1-12)
Clinical activity—30 hours; independent study—10 hours. Prerequisite: consent of instructor. Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and soil remediation. Students directed by the Committee on Student Progress and approved by the course IOR. May be repeated for credit. (P/F grading only.)—I, II, III, IV, I, II, III, IV.

460. Away Clinical Elective in OB/GYN (1-12)
Clinical activity—30 hours. Prerequisite: third- or fourth-year medical student; course 430 or the equivalent; consent of instructor. Active participation in inpatient and/or outpatient care. Special topics and specified conferences; student-faculty member infor- mal conferences. May be repeated for credit. (H/P/F grading only.)—I, II, III, IV, I, II, III, IV.
465. Away Acting Internship in OB/GYN (3-18)
Clinical activity—40 hours. Prerequisite: satisfactory completion of course 430 and other third-year core clerkships; consent of instructor. Work at the level of a sub intern in Inpatient and/or Outpatient settings. Students are expected to provide direct patient management. (H/P/F grading only.)—I, II, III, IV (I, II, III, IV)

470. Gynecologic Oncology Acting Internship (3-18)
Clinical activity—40 hours. Prerequisite: satisfactory completion of course 430 and the third-year core clerkships; consent of instructor. Four week elective primarily involves direct inpatient management of patients on the UC Davis Oncology service. Students will be acting at the level of a sub-intern and will work under the supervision of house staff, fellows, and attendings. May be repeated up to 99 units for credit. (H/P/F grading only.)—I, II, IV, (I, II, III, IV)

471. Ambulatory Gynecology and Obstetrics Elective (3-18)
Clinical activity—35 hours. Prerequisite: third or fourth-year Medical Student who has successfully completed course 430; consent of instructor. Conduct examinations, present patients and discuss treatment regimens at the following ambulatory clinics: General Gynecology & Gynecologic New and Return Obstetrics (including Post-Partum), High Risk Obstetrics, Pre-Operative Clinic, and other sub-specialty clinics as assigned. (H/P/F grading only.)—I, II, III, IV, (I, II, III, IV)

472. Family Planning and Reproductive Health (1-6)
Clinical activity—30 hours; seminar—5 hours. Prerequisite: course 430; consent of instructor. Elective that will focus on the Gynecologic Subspeciality of Family Planning. Counseling and provision of contraceptive methods, experience with pelvic ultrasounds, management of spontaneous, inevitable and induced abortion and postabortion care by both surgical and medical techniques are included. May be repeated for credit. (H/P/F grading only.)—I, II, III, IV, (I, II, III, IV)

475. Labor & Delivery Acting Internship (3-18)
Clinical activity—40 hours. Prerequisite: satisfactory completion of course 430 and the third-year core clerkships; consent of instructor. Four week elective primarily involves direct inpatient management of women on the UCD MAC Unit. Students will be acting at the level of a sub-intern and will work under the supervision of house staff, fellows, and attendings. May be repeated for credit. (H/P/F grading only.)—I, II, III, IV, (I, II, III, IV)

493. Gender Specific Medicine SSM (6)
Lecture—5 hours; laboratory/rotation—10 hours; laboratory—16 hours; clinical activity—4 hours. Prerequisite: consent of instructor; restricted to UC Davis School of Medicine students only. Specialized Studies Module, a four week course on the topic. Basic Science Principles Related to Gender Specific Medicine. (Same course as Cardiology 493.) (H/P/F grading only.)—I, II, III, IV, (I, II, III, IV)

494. Shifa Clinic (6)
Clinical activity—8 hours. Prerequisite: medical student in good standing; restricted to medical student only. Interaction with patients from multiple ethnic and cultural backgrounds under the direct supervision of a physician/preceptor. Women’s health issues and primary care issues in a culturally diverse mixed population. May be repeated up to three times for credit. (P/N grading only.)—I, II, III, IV, (I, II, III, IV)

494A. Shifa Clinic (1)
Clinical activity—8 hours. Prerequisite: Medical student in good standing; consent of instructor. Interaction with patients from multiple ethnic and cultural backgrounds under the direct supervision of a physician/preceptor. Women’s health issues and primary care issues in a culturally diverse mixed population. (H/P/F grading only; deferred grading only, pending completion of sequence.)—II, IV (Yasmeen)

494C. Shifa Clinic (1)
Clinical activity—8 hours. Prerequisite: Medical student in good standing; consent of instructor. Interaction with patients from multiple ethnic and cultural backgrounds under the direct supervision of a physician/preceptor. Women’s health issues and primary care issues in a culturally diverse mixed population. (H/P/F grading only; deferred grading only, pending completion of sequence.)—II, III, IV (Yasmeen)

498. Group Study (1-5)
Prerequisite: consent of instructor. Explore particular topics in-depth in Obstetrics and Gynecology. Extensive contact with and oversight by instructor. (H/P/F grading only.)—I, II, III, IV, (I, II, III, IV)

499. Research in Obstetrics and Gynecology (2-12)
Clinical activity. Prerequisite: consent of instructor; fourth-year medical student. Research in Obstetrics and Gynecology arranged with instructor. May be repeated eight times for credit. (H/P/F grading only.)

Ophthalmology (OPT)
Upper Division

192. Research Internship (1-12)
Internship—3-36 hours. Prerequisite: upper division approval of project prior to period of internship by respective Supervised work experience in ophthalmology research. Research staff in Ophthalmology have programs in cell biology, electron microscopy, biochemistry, immunology and visual psychophysics. (H/P/F grading only.)

199. Special Study for Advanced Undergraduates (1-5)
Prerequisite: consent of instructor. (P/N grading only.)

Graduate

299. Basic Research in Visual Science (1-12)
Prerequisite: consent of instructor. (S/U grading only.)

Professional

442. Introduction to Ophthalmology (3)
Clinical activity—40 hours. Prerequisite: third- or fourth-year Medical Student and consent of instructor; consent of advisor; completion of third-year clerkships in Medicine and Surgery; consult Course Coordinator. Ocular disease diagnosis and management relevant to the clinical practice of future primary care physicians and others. (H/P/F grading only.)—I, II, III, IV, (I, II, III, IV)

465. Advanced Subspeciality Ophthalmology (3-6)
Clinical activity—40 hours. Prerequisite: Medical students who have completed Internal Medicine 430 in third or fourth year; consent of instructor. Participation in disciplines of neuro-ophthalmology/pediatric ophthalmology, diseases of the cornea and external eye, glaucoma and retina. (H/P/F grading only.)—I, II, III, IV, (I, II, III, IV)

498. Group Study (1-3)
Prerequisite: medical students with consent of instructor. Directed reading and discussion. (H/P/F grading only.)

499. Research in Ophthalmology (1-12)
To be arranged—3-36 hours. Prerequisite: medical students with consent of instructor. Individual research on selected topics in optics and visual physiology, cornea and external disease. (H/P/F grading only.)

Orthopaedic Surgery (OSU)
Lower Division

99. Special Studies for Undergraduates (1-4)
Prerequisite: lower division standing and consent of instructor. (P/N grading only.)

Upper Division

199. Special Study for Advanced Undergraduates (1-5)
Prerequisite: upper division standing; consent of instructor. (P/N grading only.)

Professional

421. The Musculoskeletal System (2.5)
Lecture/discussion—4 hours; discussion—2 hours. Prerequisite: consent of committee on student progress. Medical student only. Basic and clinical science of orthopaedic surgery and rheumatology. (P/N grading only.)—I, II, III, IV, (I, II, III, IV)

428. Ambulatory and Emergency Room Orthopaedics (3-6)
Clinical activity—full time [2-4 weeks]. Prerequisite: 4th-year medical student in good academic standing and consent of instructor. Introduction to general orthopaedic problems and trauma and their management in an outpatient environment, including the emergency room. Student will conduct orthopaedic examinations, present patients to staff rotations through trauma, hand, pediatrics, adult and foot clinics. Orthopaedic physical examination and interpretation of x-rays. Limited enrollment. (H/P/F grading only.)—I, II, III, IV, (I, II, III, IV)

462. Community Preceptorship (3-6)
Clinical activity—full time [2-4 weeks]. Prerequisite: fourth-year medical student in good academic standing with consent of instructor. Acquaints student with private practice of orthopaedics in the community setting. Opportunity to observe and assist private practitioners in office, emergency room, operating room and inpatient environment. Student must provide own transportation. (H/P/F grading only.)—I, II, III, IV, (I, II, III, IV)

Bovill, Yoo

464. Acting Internship (6)
Clinical activity—full time [4 weeks]. Prerequisite: fourth-year medical student in good academic standing and consent of instructor. Advanced Orthopedic rotation on an approved institution. Topics may include Trauma, Sports, Spine, Pediatrics, Joint and/or Foot/Ankle. Students are expected to perform at the level of an intern. (H/P/F grading only.)—I, II, III, IV, (I, II, III, IV)

466. Externship in Advanced Orthopaedics (3-6)
Clinical activity—40 hours. Prerequisite: fourth-year medical student in good academic standing and consent of instructor. Advanced Orthopaedic rotation on an approved institution. Topics may include Trauma, Sports, Spine, Pediatrics, Joint and/or Foot/Ankle. Students are expected to perform at the level of an intern. (H/P/F grading only.)—I, II, III, IV, (I, II, III, IV)

480. Insights in Orthopaedic Surgery (1-3)
Clinical activity—3-9 hours. Prerequisite: first- and second-year medical students in good academic standing; consent of instructor. Exposure to aims, methods and procedures in orthopaedic surgery via attendance at grand rounds, patient care conferences, and group discussions. (H/P/F grading only.)—I, II, III, IV, (I, II, III, IV)

481. History of Medicine for Medical Students (1.5)
Lecture/discussion—2.5 hours (for six weeks). Prerequisite: third or fourth-year students in the School of Medicine or second-year students with consent of instructor. Overview of the history of medicine throughout the world to introduce medical students to landmark accomplishments and key figures in the development of health care and to provide an
409. Orthopedics Research (1-12)

Clinical activity—3 hours to full time (to be arranged with individual faculty). Prerequisite: third- or fourth-year medical student in good academic standing; consent of instructor. Laboratory or clinical investigation on selected topics. May be repeated for credit. (H/P/F grading only.)

Otolaryngology (OTO)

Lower Division

192. Internship in Otolaryngology (1-12)

Internship—3 to 36 hours. Prerequisite: upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in otolaryngology and related fields. Final project report. (P/NP grading only.)

199. Special Study in Otolaryngology for Advanced Undergraduates (1-5)

Prerequisite: advanced undergraduate with consent of instructor. (P/NP grading only.)—I, II, III, IV.

Graduate

290C. Research Conference in Otolaryngology (1-3)

Lecture—1 hour. Prerequisite: graduate students; medical students; advanced undergraduates with consent of instructor. Presentation and discussion of faculty and student research in otolaryngology and related fields. (P/NP grading only.)—I, II, III, IV.

291. Principles of Speech, Hearing and Equilibrium (3)

Lecture/discussion—3 hours. Prerequisite: graduate students; medical students; advanced undergraduates with consent of instructor. Presentations by faculty and guest lecturers on anatomy, physiology, and behaviors involved in speech production, hearing, and equilibrium. Each student will be expected to make one class presentation.—(I, II, III, IV.)

299. Individual Study in Otolaryngology for Advanced Graduate Students (1-12)

Prerequisite: advanced graduate student with consent of instructor. (S/U grading only.)

Professional

403. Basic Principles of Reconstructive Surgery (1-5)

Clinical activity—30 hours. Prerequisite: consent by Committee on Student Evaluation and Promotion. Provide fundamental knowledge of otolaryngologic diagnosis and principles; develop facility with basic ENT instruments, provide an understanding of treatment for ear, nose and throat problems and provide knowledge of what patients should be referred for otolaryngologic care. (H/P/F grading only.)—I, II, III, IV, (I, II, III, IV) Diaz

404. Otolaryngology Required Clerkship (1-5)

Clinical activity—full time. Prerequisite: third- and fourth-year medical students with consent of instructor; open to graduate students. Approved for graduate degree credit. Total involvement in clinical activities of the department. (H/P/F grading only.)—I, II, III, IV, (I, II, III, IV) Div.

409. Journal Seminar (1)

Lecture/discussion—10 hours total (course given three times per quarter). Prerequisite: fourth-year medical students with consent of instructor; open to graduate students. Approved for graduate degree credit. Monthly review of current otolaryngologic and related literature and recent advances. (H/P/F grading only.)—I, II, III, IV, (I, II, III, IV)

403A. Special Study in Otolaryngology (1-3)

Lecture/discussion—1-2 hours; laboratory—1-4 hours. Prerequisite: consent of instructor. Introduction to basic research in Otolaryngology. Lectures, discussion and laboratory study of sensory and motor systems. (H/P/F grading only.)

409. Research (1-12)

Prerequisite: medical students with consent of instructor; open to graduate students. Approved for graduate degree credit. Participation in ongoing projects. (H/P/F grading only.)

Pathology (PMD)

Upper Division

192. Internship in Human Pathology (1-12)

Internship—3-36 hours; final project report. Prerequisite: upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in pathology and related fields. (P/NP grading only.)

199. Special Study in Pathology for Advanced Undergraduates (1-5)

Prerequisite: advanced undergraduates and consent of instructor. (P/NP grading only.)

Graduate

290C. Research Group Conferences (1)

Lecture—1 hour. Prerequisite: graduate level standing. Seminar. Topics on animal models of human disease and infectious diseases. May be repeated for credit. (S/U grading only.)—I, II, III, IV, (I, II, III, IV)

298. Advanced Group Study (1-5)

Prerequisite: consent of instructor.

299. Research (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

Professional

405. Brain Cutting Conference (1-4)

Lecture—1 hour; discussion—2 hours. Prerequisite: third and fourth-year medical student and consent of instructor. Restricted to Medical students only. Anatomic pathology with an emphasis on autopsy and surgical pathology with application to clinical practice. Specimen grossing, frozen sections, microscopic sign-out and conferences. Exposure to cytopathology, hemopathology, and clinical pathology is available. (H/P/F grading only.)—I, II, III, IV, (I, II, III, IV) Bish

475. Anatomical Pathology Acting Internship (1-3)

Clinical activity—40 hours. Prerequisite: fourth-year Medical Students with consent of instructor. Restricted to Medical Students only. Anatomical pathology with the activities of both anatomic (first two weeks) and clinical pathology (second two weeks). May be repeated for credit. (H/P/F grading only.)—I, II, III, IV, (I, II, III, IV) Bish
493. Interdisciplinary Study of Gastrointestinal Cancer (6)
Lecture—3 hours; clinical activity—12 hours; laboratory—20 hours.
Prerequisite: consent of instructor. In-depth study of gastrointestinal, hepatic and pancreatic cancer.
Emphasis on an integration of basic science and clinical medicine. Participating departments include pathology, surgical oncology, medical oncology, gastrointestinal, radiology and radiotherapy.
[Socsci course 493D.] (H/P/F grading only)—I, II, III, IV.
494F. SJVP Pediatric Clerkship at UCSF (12)
Clinical activity—45 hours. Prerequisite: approval by SOM Committee on Student Progress. Restricted to medical students during clinical clerkship providing students with the opportunity to learn fundamentals of caring for the pediatric patient by participating in nursery, ambulatory and inpatient services at UCSF. Round, conferences, student presentations ongoing. (H/P/F grading only)—I, II, III, IV.
430F. SJVP Pediatric Clerkship at UCSF (12)
Clinical activity—45 hours. Prerequisite: approval by SOM Committee on Student Progress. Restricted to medical students during clinical clerkship providing students with the opportunity to learn fundamentals of caring for the pediatric patient. Inpatient and outpatient experience in diagnosis and management of pediatric patients. Laboratory experience and participation in clinical investigation may be arranged. (H/P/F grading only)—I, II, III, IV. Consultation.
430D. SJVP Pediatric Clerkship at UCSF (12)
Clinical activity—45 hours. Prerequisite: approval by SOM Committee on Student Progress. Restricted to medical students in their first year during clinical clerkship providing students with the opportunity to learn fundamentals of caring for the pediatric patient. Inpatient and outpatient experience in diagnosis and management of pediatric patients. Laboratory experience and participation in clinical investigation may be arranged. (H/P/F grading only)—I, II, III, IV. Consultation.
430C. SJVP Pediatric Clerkship at UCSF (12)
Clinical activity—45 hours. Prerequisite: approval by SOM Committee on Student Progress. Restricted to medical students during clinical clerkship providing students with the opportunity to learn fundamentals of caring for the pediatric patient. Inpatient and outpatient experience in diagnosis and management of pediatric patients. Laboratory experience and participation in clinical investigation may be arranged. (H/P/F grading only)—I, II, III, IV. Consultation.
430B. SJVP Pediatric Clerkship at UCSF (12)
Clinical activity—45 hours. Prerequisite: approval by SOM Committee on Student Progress. Restricted to medical students during clinical clerkship providing students with the opportunity to learn fundamentals of caring for the pediatric patient. Inpatient and outpatient experience in diagnosis and management of pediatric patients. Laboratory experience and participation in clinical investigation may be arranged. (H/P/F grading only)—I, II, III, IV. Consultation.
430A. SJVP Pediatric Clerkship at UCSF (12)
Clinical activity—45 hours. Prerequisite: approval by SOM Committee on Student Progress. Restricted to medical students during clinical clerkship providing students with the opportunity to learn fundamentals of caring for the pediatric patient. Inpatient and outpatient experience in diagnosis and management of pediatric patients. Laboratory experience and participation in clinical investigation may be arranged. (H/P/F grading only)—I, II, III, IV. Consultation.

439F. Pediatrics (6-18)
Clinical activity—full time (2 to 12 weeks). Prerequisite: satisfactory completion of course 430; consent of instructor. Inpatient and outpatient experience in diagnosis and management of pediatric patients with pulmonary diseases. These will include but will not be limited to cystic fibrosis, asthma, and other common pulmonary diseases as well as congenital abnormalities. (P/F grading only)—I, II, III, IV.
460A. Acting Internship: General Inpatient Pediatric Clerkship (6-18)
Clinical activity—full time (2 to 12 weeks). Prerequisite: completion of course 430 with grade of B or better; letter of recommendation from Pediatrics faculty member. The Ward Acting Intern functions in a manner similar to that of a pediatric intern. The Acting Intern takes the regular sequence and is expected to take night call. The Acting Intern can expect to manage between six and ten patients at a time. Limited enrollment. (H/P/F grading only)—I, II, III, IV.
460B. Acting Internship: Outpatient Pediatrics (3-18)
Clinical activity—full time (2 to 12 weeks). Prerequisite: completion of course 430 with grade of B or better; letter of recommendation from Pediatrics faculty member. Supervised experience in pediatric care on outpatient service at UCSD. Student functions as “Acting Intern” with appropriate supervision by residents and attending faculty. Limited enrollment. (H/P/F grading only)—I, II, III, IV.
461. Pediatric Inpatient AI in Hematology/Oncology (3-18)
Clinical activity—37.5 hours; lecture—7.5 hours. Prerequisite: satisfactory completion of course 430; consent of instructor. Inpatient and outpatient experience in diagnosis and management of oncologic and hematologic disorders in children. Limited enrollment. (H/P/F grading only)—I, II, III, IV.
462. Elective in Pediatric Endocrinology (3-18)
Clinical activity—full time (2 to 12 weeks). Prerequisite: completion of second-year study or the equivalent; consent of instructor. Inpatient and outpatient experience in diagnosis and management of endocrine disorders in children. Laboratory experience and participation in clinical investigation may be arranged. Limited enrollment. (H/P/F grading only)—I, II, III, IV.
463. Medical and Mental Health Evaluation of Children at Risk for Malnutrition (3-9)
Clinical activity—30 hours; discussion—4 hours. Elective for fourth-year medical students covers basic areas of knowledge needed for child abuse prevention and consultation. Rotation includes legal cases, abuse exams, child and parent interactive therapy and visits to community organizations. May be repeated for credit. (P/F grading only)—I, II, III, IV.
464. Acting Internship in Neonatology (6-18)
Clinical activity—full time (4 to 12 weeks). Prerequisite: completion of course 430 with grade of B or better; letter of recommendation from Pediatrics faculty member. Diagnostic and therapeutic aspect of the medical management of neonates. Student is expected to take night call. Limited enrollment. (H/P/F grading only)—I, II, III, IV.
465. Pediatric Specialty Clinic Elective (3-18)
Clinical activity—full time (2 to 12 weeks). Prerequisite: satisfactory completion of course 430; consent of instructor. Inpatient and outpatient experience in diagnosis and management of neurologic disorders in children. Laboratory experience and participation in clinical investigation may be arranged. (H/P/F grading only)—I, II, III, IV. Limited enrollment. (H/P/F grading only)—I, II, III, IV.

466. Elective in Pediatric Oncology (3-18)
Clinical activity—full time (2 to 12 weeks). Prerequisite: satisfactory completion of course 430; consent of instructor. Inpatient and outpatient experience in diagnosis and management of pediatric patients with pulmonary diseases. These will include but will not be limited to cystic fibrosis, asthma, and other common pulmonary diseases as well as congenital abnormalities. (H/P/F grading only)—I, II, III, IV.
467. Elective in Pediatric Nephrology (3-18)
Clinical activity—full time (2 to 12 weeks). Prerequisite: satisfactory completion of course 430; consent of instructor. Inpatient and outpatient experience in diagnosis and management of renal disorders in children. Laboratory experience and participation in clinical investigation may be arranged. Limited enrollment. (H/P/F grading only)—I, II, III, IV.
468. Elective in Pediatric Infectious Disease (3-18)
Clinical activity—full time (2 to 12 weeks). Prerequisite: satisfactory completion of course 430; consent of instructor. Inpatient and outpatient experience in diagnosis and treatment of infectious disease of infants and children. Laboratory and clinical investigation may be arranged. Limited enrollment. (H/P/F grading only)—I, II, III, IV.
470. Elective in Pediatric Gastroenterology (3-18)
Clinical activity—full time (2 to 12 weeks). Prerequisite: satisfactory completion of course 430, Internal Medicine 430, Obstetrics and Gynecology 430, and Pediatrics 430 and consent of instructor. Inpatient and outpatient experience in diagnosis and management of neurological disorders in children. Students will also participate in other pediatric subspecialty clinics which serve children with neurologic disorders. This course does not satisfy the fourth year neurology requirement. Limited enrollment. (H/P/F grading only)—I, II, III, IV.
471. Elective in Pediatric Gastroenterology (3-18)
Clinical activity—full time (2 to 12 weeks). Prerequisite: satisfactory completion of course 430; consent of instructor. Inpatient and outpatient experience in diagnosis and management of pediatric patients with pulmonary diseases. These will include but will not be limited to cystic fibrosis, asthma, and other common pulmonary diseases as well as congenital abnormalities. (P/F grading only)—I, II, III, IV.
472. Clinical Rotation in Adolescent Medicine (3-9)
Clinical activity—39 hours; lecture—1 hour. Prerequisite: fourth year Medical Student; consent of instructor. Under supervision, students will care for patients in the UCD clinic and at a number of community-based sites. Emphasis on the socially-mediated problems that face adolescents, including
416 Medicine, School of

substance abuse, STD’s, pregnancy, depression and suicide. One hour of lecture each week. (H/P/F grading only.) I, II, III, IV. Wilkins

473. Away Acting Internship in Pediatrics (6-18)
Clinical activity—40 hours; lecture—6 hours. Prerequisite: satisfactory completion of Pediatrics Clerkship; must work at the level of a sub intern in Inpatient and/or Outpatient settings. Expectation is to provide direct patient management. (H/P/F grading only.) I, II, III, IV. Butani

476. Acting Internship in Pediatric Intensive Care (6-18)
Clinical activity—full time (4 to 12 weeks). Prerequisite: completion of course 430 with grade of A or consent of instructor of record; letter of recommendation from Pediatrics faculty member. Evaluation and support of critically ill infants and children. In general, student expected to take night call every third night during rotation. Limited enrollment. (H/P/F grading only.) I, II, III, IV. Davis

493. Ethical, Legal and Social Issues in Clinical Genetics (6)
Seminar—12 hours; clinical activity—18 hours; tutorial/—8 hours; independent study—2 hours. Prerequisite: consent of instructor. Restricted to UC Davis School of Medicine students only. Develop advanced knowledge, communication skills and attitudes necessary to provide compassionate, knowledgeable and patient care to patients who may be at increased risk for illness. Seminar covers ethical and legal principles, epidemiology, and genetics. (H/P/F grading only.)—II. (II) Rich, Wilkes

493B. Living with Intellectual & Developmental Disability in the Community (1-6)
Clinical activity—4 hours; lecture—10 hours; fieldwork/—4 hours; seminar—4 hours. Prerequisite: consent of instructor. In-depth experience with Intellectual & Developmental Disability across the lifespan. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV) Hansen

498. Directed Group Study (1-5)
Variable—3-15 hours. Explore in-depth various topics in Pediatrics. Extensive contact with and oversight by instructor. May be repeated for credit. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV)

499. Research Topics in Pediatrics (1-18)
Prerequisite: Student in Medical School with consent of instructor. Individual research project in pediatric subspecialty areas [cardiology, endocrinology, hematology, metabolism, newborn physiology and others], in depth and as approved with faculty member. Independent research by student will be emphasized and long-term projects are possible. (H/P/F grading only.)

Physical Medicine and Rehabilitation (PMR)

Upper Division

100. Research Approaches to Disability and Rehabilitation (2)
Lecture/discussion—2 hours. Discussion and evaluation of research approaches to medical rehabilitation, community participation and quality of life of disabled persons, with a focus on the progressive disabilities associated with neuromuscular diseases. Intent is to encourage interest in professions that serve this disability community and increase awareness of rehabilitation goals. —II.

198. Directed Group Study (1-5)
Prerequisite: advanced standing and consent of instructor. (P/NP grading only.)

199. Special Studies for Advanced Undergraduates (1-5)
Prerequisite: advanced standing and consent of instructor. (P/NP grading only.)

Graduate

299. Research (1-12)
Prerequisite: consent of instructor. (S/U grading only.)

Professional

440. Rehabilitation Medicine Clerkship (3)
Clinical activity—36 hours; lecture/discussion—4 hours. Prerequisite: consent of instructor; completion of Internal Medicine 430. Rehabilitation and comprehensive care of physical, cognitive and psychological disability. Emphasis on patient rehabilitation. (H/P/F grading only.)—I, II, III, IV. Davis

461. Rehabilitation Medicine (6)
Clinical activity—36 hours; lecture/discussion—4 hours. Prerequisite: consent of instructor; completion of Internal Medicine 430. Prerequisite: four-week rotation designed to be an overview of PM&R practice for students interested in residency training in the specialty. Emphasis on evaluation and therapeutic management of spinal disorders, sports injuries, neuromuscular disease, and rehabilitation. (H/P/F grading only.)—I, II, III, IV. Davis

462. Rehabilitation Medicine Clinical Elective (5-18)
Clinical activity—full time. Prerequisite: Internal Medicine 430, Surgery 430; completion of third year in Medical School. Emphasis on evaluation of patients with neuromuscular diseases. Scheduling and academic modules: participating in evaluation and therapeutic management of patients with neuromuscular disease. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV) Davis

493. Applied Musculoskeletal Anatomy: Sports & Spine SSR (6)
Lecture—5 hours; lecture/laboratory—10 hours; laboratory—16 hours; seminar—4 hours. Prerequisite: consent of instructor; restricted to UC Davis School of Medicine students only. This four week module will cover the anatomy and biomechanics of the musculoskeletal system as well as its associated pathology. The student will be instructed on appropriate musculoskeletal exam techniques and apply what they have learned in the lab. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV) Shin

498. Advanced Group Study (1-5)
Prerequisite: consent of instructor. Study and experience in medical management of patients in areas of physical medicine and rehabilitation. (H/P/F grading only.)

499. Research for Medical Students (1-12)
Prerequisite: consent of instructor. Research on any of a variety of topics in physical medicine and rehabilitation. (H/P/F grading only.)

Psychiatry (PSY)

Lower Division

92. Willow Clinic (1-2)
Clinical activity—2-6 hours; seminar—1-2 hours. Open to lower division undergraduate students. Students run clinic for undergraduate students interested in learning about psychiatric care needs of homeless population. May be repeated for credit. (P/NP grading only.)—I, II, III, IV. (I, II, III, IV) Han, McCarron

Upper Division

192. Willow Clinic (1-2)
Clinical activity—2-6 hours; seminar—1-2 hours; lecture—1-2 hours. Prerequisite: consent of instructor; UC Davis enrollment; upper-division standing. Students run clinic for upper division undergraduate students interested in learning about and meeting the unique health care needs of homeless population. May be repeated for credit. (P/NP grading only.)—I, II, III, IV. (I, II, III, IV) Han, McCarron

198. Directed Group Study (1-5)
Prerequisite: advanced standing and consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)
Prerequisite: advanced standing and consent of instructor. (P/NP grading only.)

Graduate

298. Directed Group Study For Graduate Students (1-5)
Prerequisite: graduate standing and consent of instructor.

299. Special Study for Graduate Students (1-12)
Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

Professional

403. Fundamentals of Clinical Psychiatry (3)
Clinical activity—1 hour; lecture—3 hours. Prerequisite: approval of SOM Committee on Student Progress prior to selection of medical student only. Psychiatric interviewing. Mental Status Exam and diagnosis. Major child and adult disorders, including substance abuse and dependence. Weekly student interviews of psychiatric patients in small group format. (P/F grading only.)—I. (II) Hah, Newman

412. Psychology Grand Rounds (1)
Lecture—1 hour. Prerequisite: medical students or staff or other qualified mental health professionals with consent of instructor. Weekly interview of psychiatric patients at UC Davis for presentation of selected clinical cases, presentation of lecture and research reports. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV) Scher

413. Outpatient Psychiatry Clerkship (4)
Clinical activity—36 hours; conference—2 hours; lecture—2 hours. Prerequisite: course 430 and/or consent of instructor. Experience in clinical management/treatment of adult outpatients with psychiatric and substance abuse disorders; crisis management/intervention, evaluation/development of diagnosis and treatment plan; emphasis on outpatient psychopharmacology/brief psychotherapy; observation of group therapy. Individual supervision by faculty/residents. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV) Ton

414. Psychosomatic Medicine Clerkship (3-12)
Clinical activity—32 hours; discussion—8 hours. Prerequisite: Psychiatry Clerkship or consent of instructor; medical students only. A large university hospital service in which the student functions as a member of the team in evaluation and psychiatric liaison with other medical specialties. Intensive supervision from staff and psychiatric residents. May be repeated two times for credit. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV) Hilty, Ton

415. Telemedicine Clinical Elective (3-9)
Clinical activity—20 hours. Prerequisite: MS 4 with consent of instructor. Fourth year medical student elective in Telemedicine focusing on psychiatric issues. Align with University, School and Center for Health and Technology mission of rural outreach and public health, particularly in primary care. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV) Hilty, Ton

416. Child Psychiatry Clerkship (6)
Clinical activity—36 hours; lecture/discussion—2 hours; conference—2 hours. Prerequisite: course 430 and/or consent of instructor. Didactic and clinical inpatient, outpatient, and consultation-liaison experiences with children, adolescents, and families. Clinical observations, diagnostic assessment, and treatment will be undertaken with close supervision. Literature review and case conferences presented on a regular basis. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV) Ton

417. Jail Psychiatry Clerkship (6)
Clinical activity—28 hours; conference—8 hours; lecture—4 hours. Prerequisite: course 430 and/or consent of course coordinator. Students gain experience under close faculty supervision, assessing acute and chronic mentally ill inmates in both inpatient and clinic settings. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV) Ton

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2015-2016 offering in parentheses
Pre-Fall 2011 General Education (GE): ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; DivDom=Diversity; Wrt=W=Writing Experience
Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SE=Science and Engineering; SS=Social Sciences; ACGH=American Cultures; DD=Diversity; OL=Oral Skills; SL=Quantitative; SL=Scientific; VL=Visual; WC=World Cultures; WRT=Writing Experience
418. Off-Campus Clinical Experience (3-9)
Clinical activity—20-40 hours. Prerequisite: fourth-year medical students; consent of instructor. Clinical or research elective in off-campus medical school or mental approval of instructor and individual in charge of off-campus setting. May be repeated for credit. [H/P/F grading only]—I, II, III, IV, [I, II, III, IV].

420. Acting Internship in Psychiatry (62)
Clinical activity—40 hours. Prerequisite: course 430 and/or consent of course coordinator. Acting intern positions with current supervision with emphasis on biological psychiatry, psychopharmacology and psychodynamic aspects appropriate to diagnostic and long-term patient management. [H/P/F grading only]—I, II, III, IV, [I, II, III, IV].

421. Combined Medicine-Psychiatry Clerkship (3-6)
Clinical activity—32 hours, discussion—8 hours. Prerequisite: Psychiatry Clerkship or consent of instructor; medical students only. Students will rotate through the county Primary Care Clinic under the supervision of dual-boarded Psychiatry and Internal Medicine/Family Practice faculty to provide medical care to uninsured patients as primary care for psychiatric patients. May be repeated for credit two times. (H/P/F grading only) I, II, III, [I, II, III, IV].

422. Readings in Psychiatry (1-3)
Readings/dissertation—3–9 hours. Independent reading of a selected topic in psychiatry. Supervision and discussion with a psychiatric faculty member. (H/P/F grading only). I, II, III, IV, [I, II, III, IV].

423. Willow Clinic (12)
Prerequisite: open to medical students in all four years of medical school. Student run clinic for medical students interested in learning about and meeting the unique health care needs for the homeless population. May be repeated for credit. (H/P/F grading only). I, II, III, IV, [I, II, III, IV].

424. Functional Genomics (2)
Lecture—1 hour, discussion—1 hour. Prerequisite: graduate standing or consent of the instructor. The theory, methods and principles of functional genomics with emphasis on the relationship to molecular mechanisms involved in development and disease of the nervous system. (H/P/F grading only). I, II, [I, II].

430. Psychiatry Clinical Clerkship (12)
Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Assigned to clinical settings, students build upon skills in preclinical years; emphasis on diagnosis, therapeutic and interpersonal skills. Areas of focus include patient management, interviewing skills, mental status exam, differential diagnosis, basic psychophysiology. Time is spent in direct patient care situations under the guidance of faculty. Ongoing patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only). I, II, III, IV, [I, II, III, IV].

430A. SJVP Longitudinal Psychiatry Clerkship (12)
Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 4 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. Ongoing patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only). I, II, III, IV, [I, II, III, IV].

430B. SJVP Longitudinal Psychiatry Clerkship at UCSF (B) (6)
Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. Ongoing patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only). I, II, III, IV, [I, II, III, IV].

430FC. SJVP Longitudinal Psychiatry Clerkship at UCSF (C) (2)
Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. Ongoing patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only). I, II, III, IV, [I, II, III, IV].

430TA. TeachMS Longitudinal Psychiatry Clerkship (3)
Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Promotions; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Medicine for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. Ongoing patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only). I, II, III, IV, [I, II, III, IV].

430TB. TeachMS Longitudinal Psychiatry Clerkship (B) (6)
Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Promotions; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Medicine for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. Ongoing patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only). I, II, III, IV, [I, II, III, IV].

430TC. TeachMS Longitudinal Psychiatry Clerkship (C) (2)
Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Promotions; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Medicine for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. Ongoing patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only). I, II, III, IV, [I, II, III, IV].

439D. Directed Clinical Studies in Psychiatry (1-24)
Clinical activity—40 hours. Prerequisite: consent of instructor. Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR. May be repeated for credit. (P/F grading only). I, II, III, IV, [I, II, III, IV].

439R. Directed Studies in Psychiatry (1-12)
Clinical activity—30 hours; independent study—10 hours. Prerequisite: instructor. Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation having a leaving of absence. May be repeated for credit. (P/F grading only). I, II, III, IV, [I, II, III, IV].

480. Insights in Psychiatry (1-3)
Clinical activity—3–9 hours. Prerequisite: first- or second-year medical students; good academic standing; consent of instructor. On individual basis, student provided with an opportunity for gaining insight into various clinical activities in the practice of psychiatry. (H/P/F grading only). I, II, III, IV, [I, II, III, IV].

488. Acting Internship in Inpatient Psychiatry, Away Rotation (6)
Clinical activity—40 hours. Prerequisite: Psychiatry Clerkship and/or consent of course coordinator. Inpatient acting internship at approved non-UCDHS affiliated training program that provides experience and preparation for ambulatory medical care. Students perform as an intern, with a smaller number of patients, greater supervision, and responsibility for the ongoing care of assigned patients. (H/P/F grading only). I, II, III, IV, [I, II, III, IV].

489. Acting Internship in Ambulatory Psychiatry, Away Rotation (6)
Clinical activity—40 hours. Prerequisite: Psychiatry Clerkship and/or consent of course coordinator. Outpatient acting internship at approved non-UCDHS affiliated training program that provides experience and preparation for ambulatory medical care. Students perform as an intern, with a smaller number of patients, greater supervision, and responsibility for the ongoing care of assigned patients. (H/P/F grading only). I, II, III, IV, [I, II, III, IV].

493. Culture, Medicine and Society (6)
Seminar—12 hours; clinical activity—16 hours; independent study—8 hours; discussion—4 hours. Prerequisite: consent of instructor; UC Davis School of Medicine students only. Students will learn about the epidemiological significance of health disparities and barriers to access to health care. The course will cover: (1) Epidemiology/Health Disparities; (2) Society and Medicine; (3) Cinemedia; (4) Reflection/Integration. (H/P/F grading only). I, II, III, IV.

498. Directed Group Study (1-5)
Prerequisite: consent of instructor; approved for graduate degree credit. Medical students desiring to explore particular topics in depth. (H/P/F grading only for graduate or medical students.)

499. Research (1-12)
Prerequisite: consent of instructor. Approved for graduate degree credit. Individual research on selected topics or research projects. (H/P/F grading only for graduate or medical students.)

Public Health Sciences (SPH)

Lower Division

92. Internship in Community Health (1-12)
Internship—3–36 hours. Prerequisite: lower division standing; consent of instructor. Students apply theory and concepts learned in the classroom through field work in a community health agency. (P/NP grading only.)

Upper Division

101. Perspectives in Community Health (3)
Lecture—3 hours. Prerequisite: undergraduate standing. Covers comprehensively the responsibilities, obligations, roles and professional activities of various health care disciplines in the community. Prerequisite: students with perspectives on preventive medicine in society. (I, II, III).

132. Health Issues Confronting Asian Americans and Pacific Islanders (4)
Lecture—discussion—4 hours. Prerequisites: course 130; research topics. Issues confronting Asian Americans and Pacific Islanders. (Same course as Asian American Studies 132.) GE credit: SocSci; SS. I, II, III, IV.

160. General Health Education and Promotion (5)
Lecture—4 hours; discussion—1 hour. Restricted to students in the internship program for the Health Education Program only. Topics include addiction, substance abuse prevention, nutrition, stress management, physical fitness, body image, reproductive anatomy and physiology, contraceptive options, safer sex, sexual health, healthy relationship skills, and other general wellness/health promotion topics. Practice in peer counseling and outreach presentations. Limited enrollment. (P/NP grading only). I, II, IV. Ferguson

161. Campus Alcohol/Drug Abuse Prevention Program Peer Educator Training (4)
Lecture/discussion—3 hours; practice—1 hour. Prerequisites: course 160 (may be taken concurrently); consent of instructor. Provides training in campus and community substance abuse prevention and educational intervention. Addition and other physiological responses to alcohol and other drugs. Harm-reduction strategies for individuals and target groups.
162. Health Advocates Peer Educator Training (4)
Lecture/discussion—3 hours; practice—1 hour. Prerequisite: course 160 [may be taken concurrently]; consent of instructor. Preparation for internship in campus and community health promotion and risk reduction. Nutrition, stress management, physical fitness, body image and disordered eating, skin cancer prevention, mental wellness/Health promotion topics. (P/NP grading only.)—II, III.

175W. Health Policy and Health Politics (4)
Seminar—3 hours; extensive writing or discussion—1 hour. Restricted to students attending UC Washington Center program. Following the model of a Congressional subcommittee, identification of four salient health policy issues for study, research, and development of policy models to address them. [Same Course as UC Davis Washington Center 175.] GE credit: SocSci, Wrt | ACCH, OL, SS, WE. —III, (III.) Wintermute

190C. Research Conference in Community and International Health (1)
Discussion—1 hour. Prerequisite: consent of instructor. Weekly conference on research problems, progress, and techniques in community and International Health. Critical discussion of recent journal articles. May be repeated for credit. (P/NP grading only.)—I, II, III, (I, II, III.)

192. Internship in Community Health Practice (1-12)
Internship—3.36 hours. Prerequisite: upper division and graduate students; consent of instructor. The student, through fieldwork in a community health agency, learns to apply theory and concepts learned in the classroom. (P/NP grading only.)

199. Research in Community and International Health (1-5)
Prerequisite: undergraduate standing and consent of instructor. Study and experience for undergraduate students in any number of areas in community and international health. (P/NP grading only.)

200. Internship in Public Health (3)
Lecture—3 hours; laboratory/discussion—2 hours. Prerequisite: graduate standing or consent of instructor. Provides an overview of public health. Covers the history of public health in the U.S.; defines its major functions and constituencies; and, introduces fundamental concepts of epidemiology, biostatistics, behavioral sciences, environmental health, infectious diseases, and reducing health disparities. May be repeated one time for credit.—IV, (IV.) Garcia

203. Learning and Teaching in Public Health Contexts (2)
Lecture/discussion—2 hours. Prerequisite: graduate standing or consent of instructor. Aimed at current and future public health professionals interested in learning more about the educational potential for interactions with community members and other health professionals—all stakeholders in improving the health of communities.—III, (III.) Cassedy, Zie-gahn

210. Public Health Informatics (2)
Lecture—2 hours; laboratory—2 hours. Restricted to upper division or graduate standing. Collection, verification, validation, and analysis of data related to populations; infrastructure, functions, and tools used to
generate public health knowledge supporting public health policies and practice development/dissemination. (S/U grading only.)—I, II.

211. Infectious Diseases and Global Health (3)
Lecture—2 hours; discussion—1 hour. Infectious disease epidemiology and prevention, with emphasis on human and veterinary diseases of global health importance. Major global health epidemics and challenges of infectious diseases, by mode of transmission.—II, (II.) DiKeimer, Sandrock

212. Migration and Health (3)
Lecture/discussion—3 hours. Prerequisite: graduate standing. Principles of migration and health. Topics will include demographics, public health immigration programs, health care delivery, occupational health, and effects of international migration on the health in communities of origin, transit and destination. Guest presentations by outside experts. Offered in alternate years.—III, (III.) Schneider

222. Social & Behavioral Aspects of Public Health (3)
Lecture/discussion—3 hours. Prerequisite: consent of instructor required; graduate standing, Statistics 102 and 106. Theories and strategies of health behavior change at the individual, group, community, and environmental levels. Examples include: transteoretical model, social networks, and social marketing. Theories are applied to solve common public health problems (cancer, smoking, and HIV/AIDS).—II, (II.) De Vogli

232. Health Communication (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Health communication theories and research traditions. Topics include consumer health information seeking; physi- cian-patient interaction; information, social marketing, “edutainment,” and media advocacy campaigns; social networks and coping; media influences on health; and new communication technologies in health promotion and healthcare delivery. [Same course as Communication 232.] Offered in alternate years.—IV, (IV.) Yang

244. Introduction to Medical Statistics (4)
Lecture/discussion—6 hours; laboratory/discussion—3 hours. Introduction to statistical methods and software in clinical, laboratory and population medicine. Graphical and tabular presentation of data, probability, binomial, Poisson, normal, t, F, and Chi-square distributions, elementary nonparametric methods, simple linear regression and correlation, life tables. Only one credit for students who have completed Statistics 100 or Preventive Veterinary Medicine 402.—IV, (IV.) Yang

245. Statistical Analysis of Laboratory Data (3)
Lecture—3 hours; laboratory/discussion—1 hour. Prerequisite: course 244 and 247; consent of instructor. Priority given to K30 training program in School of Medicine. Analysis of data and design of experiments for laboratory settings with an emphasis on gene expression arrays and other high-throughput biological assay technologies. Offered in alternate years.—III, (III.) Roeke

246. Biostatistics for Clinical Research (4)
Lecture—3 hours; laboratory/discussion—1 hour. Prerequisite: courses 244 and 247. Emphasizes critical biostatistics for clinical research and targets biomedical audience. Students will develop understanding and proficiency in the analysis of clinical studies and learn to develop collaborations with biostatisticians. May be repeated for credit.—II, (II.) Qi

247. Biostatistics for Epidemiology (4)
Lecture—2 hours; laboratory—1 hour. Prerequisite: courses 246. Introduction to the principles and methods of statistical inference for categorical data and survival data in epidemiological studies. The major topics include contingency table methods, logistic regression, Kaplan-Meier and log-rank methods, and Cox regression.—I, (I.) Kim

252. Social Epidemiology (2)
Lecture/discussion—2 hours. Prerequisite: Epidemiology 205A; consent of instructor. Social determinants of health; psychosocial and psychological pathways; health and social inequality; gender and racial/ethnic disparities in health; social support, social cohesion and health; social determinants in behavioral risk factors; social ecological approaches to health intervention; interventions addressing social determinants. [Same Course as Epidemiology 252.]—III, (III.) Gibson

255. Human Reproductive Epidemiology (3)
Lecture—3 hours. Prerequisite: Preventive Veterinary Medicine 405, 406, Physics 220, Physiology 222 or equivalents, or consent of instructor. Human reproductive effects and risk of reproductive disorders, examined from macro- and micro-environmen- tal exposures in community and occupational settings; epidemiologic study designs and analyses. Offered in alternate years.—I, (I.) Hertz-Picciotto

262. Principles of Environmental Health Science (3)
Lecture—3 hours. Prerequisite: consent of instructor required. Principles, approaches and issues related to environmental health. Recognizing, assessing, understanding and controlling the impact of people on their environment and the impact of the environment on the public.—I, (I.) Bennett

264. Public Health Econometrics (2)
Laboratory/discussion—3 hours. Prerequisite: consent of instructor. Principles of demand and supply; elasticity; benefits and costs; least squares regression; stepwise regression; economic and statistical significance; fixed and random effects; longitudinal data; non-linear relations; categorical variables; instrumental variables; attrition bias; tobit regression; two-part cost model. (S/U grading only.)—III, (III.) Leigh

266. Applied Analytic Epidemiology (3)
Lecture—2 hours; laboratory—2 hours. Prerequisite: Preventive Veterinary Medicine 404 or consent of instructor. Principles and applications in analysis of epidemiologic data. Methods of analyzing stratified and matched data, logistic regression and binary and case-control studies, Poisson regression, survival-time methods. [Same course as Population Health and Reproduction 266.]—III, (III.) Schenker

273. Health Services Administration (3)
Laboratory—3 hours. Prerequisite: consent of instructor required. Structure and function of public and pri- vate medical care. Topics include categories and trends in national medical spending, predictors of patient use, causes of death, managed care, HMOs, Medicare, Medicaid, costs of technology, and medi- cal care in other countries. Limited enrollment.—II, (II.) Leigh

290. Topics in Public Health (1)
Seminar. Prerequisite: consent of instructor. Open to students in Master of Public Health program, or permission of instructor. Seminar on key issues and current topics in public health. Course begins in August/SSSI. Students must enroll in August, then Fall and Winter. The course is a series but grades and units are given at end of each quarter. May be repeated four times for credit. (S/U grading only.)—I, II, IV, III, (IV.) Kasa, McCurdy

295. International Health (2)
Lecture/discussion—2 hours. Prerequisite: graduate standing or consent of instructor. Forum for learning health issues and health care systems in other coun- tries. Topics include health care in resource-limited settings, the impact of political strife on health, the health care professional in international settings. (S/U grading only.)—III, (III.) Koga, Schenker

297. Public Health Fieldwork (1-16)
Prerequisite: consent of instructor. Open to Master of Public Health students. Practical fieldwork experi- ence in public health. Placement site will vary based on the interest and experience of each student. May be repeated up to four times for credit. (S/U grading only.)—I, II, IV, (IV.) McCurdy
298. Study in Community and International Health (1-5)
Prerequisite: graduate student in good academic standing; consent of instructor and study. Experience for graduate students in any number of areas in community and international health. (S/U grading only.)—I, II, III, IV

299. Research in Community and International Health (1-12)
Prerequisite: graduate standing; consent of instructor. Student will work with faculty member in areas of research interest, including but not limited to injury control, international health, health policy, occupational and environmental health, health promotion and wellness, women's health, and health demographics. (S/U grading only.)—I, II, III, IV

Professional

402. Introductory Medical Spanish (2)
Lecture—2 hours. Prerequisite: medical student or consent of instructor. The vocabulary needed to conduct a basic history and physical examination in Spanish. (H/P/F grading only.)—III.

461. Clerkship in Community Health Group Practice (3-9)
Clinical activity—full time (2-6 weeks). Prerequisite: third- or fourth-year medical student. Overview of local community health in group practice situations. Students participate in treatment at several clinic sites in Yolo County. Topics include primary care, environmental health, maternal and child health, jail health, and preventive health care for the aged. (S/U grading only.)—I, II, III, IV

465. Community Health Preceptorship (3-18)
Clinical activity—5-40 hours. Prerequisite: fourth-year medical student; consent of instructor. Participate at state or county health department or other public health organization in ongoing investigations into current public health problems, e.g., birth defects, cancer control, diabetes, hypertension, injury control, infectious diseases, aging, Alzheimer's disease, and smoking and tobacco use control. (H/P/F grading only.)—I, II, III, IV

466. Occupational and Environmental Medicine Elective (6-12)
Clinical activity; laboratory. Prerequisite: fourth-year medical student in good academic standing; consent of instructor. Participate in activities of Occupational and Environmental Medicine Unit. Major activity is an epidemiologic research project of the University. Participate in Occupational and Environmental Medicine Clinic at UC Davis Medical Center and other sites, as arranged. Gain experience in occupation and environmental medicine, use of medical literature resources, the worker's compensation system, and toxicological principles. Students may take up to four weeks for six units. (H/P/F grading only.)—I, II, III, IV

470. Clinical Selective in Occupational and Environmental Medicine (3-6)
Clinical activity—9-18 hours. Prerequisite: fourth-year medical student in good academic standing; consent of instructor. Outpatient clinical experience in Occupational and Environmental Medicine at UCDMC and other sites, as arranged. Gain experience in occupational and environmental medicine, use of medical literature resources, the worker's compensation system, and toxicological principles. Students may take up to four weeks for six units. (H/P/F grading only.)—I, II, III, IV

480. Insights in Occupational and Environmental Medicine (1-3)
Clinical activity—3-9 hours. Prerequisite: first or second-year medical student in good academic standing, consent of instructor. Observation and participation in research and clinical activities in occupational and environmental medicine which include conferences, occupational and environmental medicine clinical activities and field visits. Develop and present student individual research projects. (P/F grading only.)—I, II, III, IV

495. International Health (2)
Lecture/discussion—2 hours. Prerequisite: medical student in good academic standing, consent of instructor. Forum for learning about health issues and health care systems in other countries. Topics include health care for refugees, the impact of political strife on health, the health care professional in international settings. (H/P/F grading only.)—III. (Koga, Schenker)

496. Current Issues in Public Health (1-1)
Lecture/discussion—1 hour. Topical issues in public health. Speakers from the local public health community address issues such as disease control programs, access to care. May be repeated up to three times for credit. (P/F grading only.)—III.

498. Study in Public Health Sciences (1-6)
Prerequisite: medical student in good academic standing and consent of instructor. Study and experience for medical students in areas in community and international health. (H/P grading only.)—I, II, III, IV

499. Research in Public Health Sciences (1-9)
Prerequisite: medical students with consent of instructor. Work with faculty member in areas of research interest, including but not limited to injury control, international health, health policy, occupational and environmental health, health promotion and wellness, women's health, and health demographics. (H/P/F grading only.)—I, II, III, IV

Radiation Oncology (RON)

Upper Division

199. Special Study for Advanced Undergraduates; Research in Radiation Biology (1-5)
Prerequisite: undergraduate standing; consent of instructor. Radiation Oncology is a unique discipline combining elements linked to complex physics based dosimetry and treatment planning. Included within this clinical environment is a strong basis in biology that underpins the clinical effectiveness of radiation treatment. (P/NP grading only.)—I, II, III, IV

299. Independent Study and Research (1-12)
Prerequisite: consent of instructor. Advanced-level work with the course instructor. Clinical activity—30 hours. Prerequisite: completion of course 461, or the equivalent, is required. Consent of Group Advisor and Sponsor. Research under supervision of Radiation Oncology faculty. Work must be appropriate to fulfill the requirements for the Ph.D. dissertation. (S/U grading only.)—I, II, III, IV

495. Independent Study and Research in Therapeutic Radiology
Prerequisite: consent of instructor. Advanced-level work with the course instructor. Clinical activity—30 hours. Prerequisite: completion of course 461, or the equivalent, is required. Consent of Group Advisor and Sponsor. Research under supervision of Radiation Oncology faculty. Work must be appropriate to fulfill the requirements for the Ph.D. dissertation. (S/U grading only.)—I, II, III, IV

463. Radiation Oncology Clerkship (3-9)
Clinical activity—30 hours. Prerequisite: completion of Medical Sciences 420, 431, third-year clerkship, consent of instructor required. Introduction to radiation oncology. Students will participate in workup and treatment planning for radiation oncology patients and will be introduced to the concepts involved in clinical radiation oncology, radiation biology, and radiation physics. (H/P/F grading only.)—I, II, III, IV

499. Independent Study and Research in Therapeutic Radiology
Prerequisite: consent of instructor. Advanced-level work with the course instructor. Clinical activity—30 hours. Prerequisite: completion of course 461, or the equivalent, is required. Consent of Group Advisor and Sponsor. Research under supervision of Radiation Oncology faculty. Work must be appropriate to fulfill the requirements for the Ph.D. dissertation. (S/U grading only.)—I, II, III, IV

414. Medical Radiation Biology (3)
Lecture—27 hours total. Prerequisite: consent of instructor. Medical radiation biology; molecular cellular and organ system response to acute and chronic irradiation; radiation carcinogenesis and genetic effects; radiation risk assessment; diagnostic ultrasound and magnetic resonance imaging health effects. Medical/legal considerations of radiation exposure. Offered in alternate years. (H/P/F grading only.)—III. Bushberg

461. Advanced Clinical Clerkship in Diagnostic Radiology (3-6)
Clinical activity—35 hours total; conference—4 hours; discussion/ laboratory—1 hour. Prerequisite: satisfactory completion of second year medical school curriculum and of third-year clerkships in Internal Medicine and General Surgery; consent of instructor. Restricted to eight students per rotation; open to visiting medical students from accredited programs. Work with clinical Radiologists in image interpretation, diagnostic imaging, x-ray production and interaction; image formation; modulation transfer function; fluoroscopy; cine fluoroscopy; stereoscopy; xeroradiography; computerized and geometrical tomography; magnetic resonance and ultrasound. Principles of radiation protection in imaging environment. Offered in alternate years. (H/P/F grading only.)—III.

462. Diagnostic Imaging of Acquired and Congenital Heart Disease (2)
Lecture—5 hours total; conference—5 hours; discussion—5 hours; field work—9 hours; exam—1 hour. Prerequisite: fourth-year medical student in good academic standing and course 461 [may be taken concurrently]. Main emphasis on radiation of acquired and congenital heart disease, but also on magnetic resonance, nuclear medicine, and echocardiography of heart diseases. (H/P/F grading only.)—III

473. Advanced Clinical Clerkship in Neuroradiology (3-6)
Clinical activity—35 hours total; conference—4 hours; independent study—1 hour. Prerequisite: fourth-year medical student with interest in Diagnostic Radiology, Neuroradiology. Neurological Anatomy, Psychiatry, Psychology, or related field; satisfactory completion of course 461, or the equivalent, is strongly encouraged. Restricted to one student per 2-4 week rotation. Students will work with Radiologists in image interpretation of CT, MRI, and fluoroscopy. Opportunity to participate in assessment of Neurointerventional patients, and to observe Neurointerventional procedures. Daily conferences in...
advanced clinical clerkship in pediatric radiology (3-6)
clinical activity—35 hours; conference—4 hours; discussion/laboratory—1 hour. prerequisite: fourth-year medical student with interest in musculoskeletal radiology, orthopedic surgery, sports medicine, pmrn, or related field; satisfactory completion of course 461, or the equivalent, is strongly encouraged. restricted to one student per 2/4 week rotation. work with musculoskeletal radiologists in interpretation of ct, mri, radiography, and fluoroscopy. opportunities for evaluation by students and for image-guided procedures. daily conferences in musculoskeletal imaging, general radiology, health physics, and radiology safety. assigned readings. credit limited to 3 units for 2 weeks, 6 units for 4 weeks. may be repeated for credit.

advanced clinical clerkship in musculoskeletal radiology (msk) (3-6)
clinical activity—35 hours; conference—4 hours; discussion/laboratory—1 hour. prerequisite: fourth-year medical student with interest in musculoskeletal radiology, orthopedic surgery, sports medicine, pmrn, or related field; satisfactory completion of course 461, or the equivalent, is strongly encouraged. restricted to one student per 2/4 week rotation. work with musculoskeletal radiologists in interpretation of ct, mri, radiography, and fluoroscopy. opportunities for evaluation by students and for image-guided procedures. daily conferences in musculoskeletal imaging, general radiology, health physics, and radiology safety. assigned readings. credit limited to 3 units for 2 weeks, 6 units for 4 weeks. may be repeated for credit.

advanced clinical clerkship in vascular/interventional radiology (ir) (3-6)
clinical activity—35 hours; conference—4 hours; discussion/laboratory—1 hour. prerequisite: fourth-year medical student with interest in diagnostic radiology, vascular/interventional radiology, cardiovascular imaging, cardiology, cardiovascular surgery, surgical oncology, general surgery, or related field; satisfactory completion of course 461, or the equivalent, is strongly encouraged. restricted to one student per 2/4 week rotation. work with vascular/interventional radiologists in the evaluation of patients for interventional procedures. there will be opportunities to daily conferences in general radiology, health physics, and radiology safety. assigned readings. credit limited to 3 units for 2 weeks, 6 units for 4 weeks. may be repeated for credit.

advanced clinical clerkship in ultrasound radiology (3-6)
clinical activity—30 hours; conference—5 hours; film viewing—3 hours. prerequisite: fourth-year medical student with interest in obstetrics and gynecology, ob/gyn, or in other medical or surgical subspecialties employing ultrasound in their clinical practice; prior completion of course 461, or the equivalent, is encouraged. restricted to two students per 2/4 week rotation. participation as an active team member on a busy clinical ultrasound service. credit limited to 3 units for 2 weeks, 6 units for 4 weeks. may be repeated for credit.

advanced clinical clerkship in abdominal imaging (3-6)
clinical activity—35 hours; conference—4 hours; discussion/laboratory—1 hour. restricted to two students per 2/4 week rotation. work with clinical radiologists on abdominal and pelvic ct, mr, ultrasound, digital radiography, gastrointestinal and genitourinary procedures, image-guided intervention. offered as a 2-week rotation for third-year medical students and a 2/4-week rotation for fourth-year medical students. credit limited to 3 units for 2 weeks, 6 units for 4 weeks. may be repeated for credit.

specialty externship in radiology (3-16)
clinical activity—25 hours; discussion—10 hours. prerequisite: consent of instructor. externship provides in-depth exposure to one of a variety of subspecialties in radiology. students and a 2/4-week rotation for fourth-year medical students. credit limited to 3 units for 2 weeks, 6 units for 4 weeks. may be repeated for credit.

specialty externship in diagnostic radiology (1-12)
clinical activity—25 hours; discussion—10 hours. prerequisite: consent of instructor. externship provides in-depth exposure to one of a variety of subspecialties in radiology. students and a 2/4-week rotation for fourth-year medical students. credit limited to 3 units for 2 weeks, 6 units for 4 weeks. may be repeated for credit.

specialty externship in diagnostic radiology (1-12)
clinical activity—25 hours; discussion—10 hours. prerequisite: consent of instructor. externship provides in-depth exposure to one of a variety of subspecialties in radiology. students and a 2/4-week rotation for fourth-year medical students. credit limited to 3 units for 2 weeks, 6 units for 4 weeks. may be repeated for credit.

specialty externship in diagnostic radiology (1-12)
clinical activity—25 hours; discussion—10 hours. prerequisite: consent of instructor. externship provides in-depth exposure to one of a variety of subspecialties in radiology. students and a 2/4-week rotation for fourth-year medical students. credit limited to 3 units for 2 weeks, 6 units for 4 weeks. may be repeated for credit.

specialty externship in diagnostic radiology (1-12)
clinical activity—25 hours; discussion—10 hours. prerequisite: consent of instructor. externship provides in-depth exposure to one of a variety of subspecialties in radiology. students and a 2/4-week rotation for fourth-year medical students. credit limited to 3 units for 2 weeks, 6 units for 4 weeks. may be repeated for credit.

specialty externship in diagnostic radiology (1-12)
clinical activity—25 hours; discussion—10 hours. prerequisite: consent of instructor. externship provides in-depth exposure to one of a variety of subspecialties in radiology. students and a 2/4-week rotation for fourth-year medical students. credit limited to 3 units for 2 weeks, 6 units for 4 weeks. may be repeated for credit.

specialty externship in diagnostic radiology (1-12)
clinical activity—25 hours; discussion—10 hours. prerequisite: consent of instructor. externship provides in-depth exposure to one of a variety of subspecialties in radiology. students and a 2/4-week rotation for fourth-year medical students. credit limited to 3 units for 2 weeks, 6 units for 4 weeks. may be repeated for credit.

specialty externship in diagnostic radiology (1-12)
clinical activity—25 hours; discussion—10 hours. prerequisite: consent of instructor. externship provides in-depth exposure to one of a variety of subspecialties in radiology. students and a 2/4-week rotation for fourth-year medical students. credit limited to 3 units for 2 weeks, 6 units for 4 weeks. may be repeated for credit.

specialty externship in diagnostic radiology (1-12)
clinical activity—25 hours; discussion—10 hours. prerequisite: consent of instructor. externship provides in-depth exposure to one of a variety of subspecialties in radiology. students and a 2/4-week rotation for fourth-year medical students. credit limited to 3 units for 2 weeks, 6 units for 4 weeks. may be repeated for credit.
475. Pediatric Surgery (6-9) Clinical activity—full time (4-6 weeks). Prerequisite: fourth-year medical student or third-year medical student with completion of course 430. Care of patients with neonatal congenital surgical problems. Fluid and electrolyte management in infants. General experience with acquired surgical diseases in children. (H/P/F grading only)—I, II, III, IV (I, II, III, IV) Marr

476. Surgical Consult Service (6-9) Clinical activity—full time (4-6 weeks). Prerequisite: fourth-year medical student or third-year medical student with completion of course 430. Students function as acting interns working in parallel with the interns on the service. They consult on all non-trauma patients in the emergency room and on the wards and also participate in the operating room. (H/P/F grading only)—I, II, III, IV (I, II, III, IV) Wisner

477. Clinically Oriented Anatomy (3) Clinical activity—40 hours. Prerequisite: completion of three years of medical school. Analysis of selected regions of the body using cadaver dissection, prosections and interactive CD-ROMs. Anatomical relationships relevant to common surgical procedures. (H/P/F grading only)—II, III, IV (I, II, III, IV) Bold

480. Insights in Surgery (1-3) Clinical activity—3-9 hours. Prerequisite: medical student in good academic standing and consent of instructor. Individualized activities, including ward rounds, sub specialty clinics and conferences, grand rounds, and observation of a variety of surgical procedures. (H/P/F grading only)—I, II, III, IV, (I, II, III, IV) Khatri

481. Interactive Clinical Case Presentation (ICCP) (3) Clinical activity—1 hour. Prerequisite: fourth-year medical students; open for third and fourth year student observers; maximum of 10-15 students in good standing. Case presentation of common clinical scenarios (i.e. chest pain/MI, fever/pneumonia, abdominal/overlay/cecy stiles, etc.) from various discipline held in an auditorium with real patients exposure. Interactive session to review history, physical findings and case management. Students are asked to perform and discuss the presentation and answer questions. Course taught as one session (4 hours) per month for three quarters (July to March). The students who enroll can earn up to three credits and the minimum requirement is attendance at least six sessions. Students can do all nine sessions and work toward an honor. For the written part students will have to pick two of the nine case presentations and write a five page paper and a half hour presentation. "The Current management" of that disease-this can be a literature review and/or review article or a case presentation. (H/P/F grading only)—I, II, III, IV

482. Cardiothoracic Surgery Clerkship (6-9) Clinical activity—full time (4-6 weeks). Prerequisite: fourth-year medical student, or third-year medical student with completion of course 430. Student works as an extern on the Cardiothoracic Surgical Service, participating in perioperative management and critical care management of patients requiring surgery for cancer, endocrine disease and selected general surgical problems. Cases include malignant melanoma, sarcomas, gastrointestinal cancer, head and neck pathology, and metastatic malignancies. Attending rounds daily. Four teaching conferences weekly. (H/P/F grading only)—I, II, III, IV (I, II, III, IV) Bold

483. Gastrointestinal Surgery (3-9) Clinical activity—full time (4-6 weeks). Prerequisite: fourth-year medical student or third-year medical student with completion of course 430, Internal Medicine 430 and Pediatrics 430. Student participates on the GI Surgical Service, working under the immediate supervision of the faculty and surgical housestaff, involving the full spectrum of gastrointestinal diseases performed by the medical student. (H/P/F grading only)—I, II, III, IV (I, II, III, IV) Young

485. Artificial Cardiac Ventricular Assist System (1) Clinical activity—full time. Prerequisite: fourth-year medical student or third-year medical student with completion of course 430, Internal Medicine 430 and Pediatrics 430. Student participates on the vascular surgery service and in the management and operations of arterial and venous system, exclusive of diseases that require cardiopulmonary bypass for treatment. Includes in-hospital care responsibilities with appropriate supervision. (H/P/F grading only)—I, II, III, IV (I, II, III, IV) Dawson

493. Clinically-Oriented Anatomy Special Study Module (6) Lecture—5 hours; lecture/laboratory—10 hours; laboratory—16 hours; clinical activity—4 hours. Prerequisite: consent of instructor and School of Medicine students only. Reviews aspects of the anatomy of the head and thoracic cavity, abdominal, pelvis, extremities, vascular system, peripheral nervous system, and skeletal system. Focus on the understanding of anatomy related to common surgical procedures. (Cell Biology and Human Anatomy 493) (H/P/F grading only)—I, II, III, IV, (I, II, III, IV) Khatri

499H. Fourth-Year Surgical Honors Program (18) Prerequisite: completion of third year of medical school with superior performance on course 430; consent of instructor. To provide intensive and comprehensive training in surgery to students interested in a postgraduate surgical career. Participation in projects to include the formulation and conduct of original research. (P/F grading only)—I, II, III, IV (I, II, III, IV) Khatri, Olson, Ruebner

495. Intensive Introduction to Cardiac Surgery (3) Clinical activity—16 hours; lecture/discussion—4 hours. Prerequisite: consent of instructor. Restricted to Medical student between first and second year. Clinical activity-4 hours, directed reading and discussion and/or laboratory investigation on selected topics. (H/P/F grading only)—I, II, III, IV (I, II, III, IV) I. P. G. Holcroft
Medieval and Early Modern Studies

[College of Letters and Science]

Advisor: Ph.D., Program Director

Program Office: 176 Voorhis Hall

Committee in Charge

Emily Albu, Ph.D. (Classics)
Carlson Arnett, Ph.D. (German/Russian)
Seeta Chaganti, Ph.D. (English)
A. Katie Harris, Ph.D. (History)
Sally McKee, Ph.D. (History)
Baki Tezcan, Ph.D. (History/Religious Studies)

The Major Program

The major in Medieval and Early Modern Studies examines the intellectual, political, and cultural forces that shaped modern European civilization during the period from the end of Ancient Rome (fifth century) to the beginning of the Enlightenment (mid-eighteenth century). An interdisciplinary and interdepartmental program, the major includes studies in history, literature, philosophy, literature, drama, music, national languages, religion, rhetoric, and political theory.

The Program.

The major requires interdisciplinary work, while allowing the student to focus on the early Middle Ages (5th-9th centuries), the High Middle Ages, the Renaissance, or the Baroque. The series of medieval and early modern courses in the program provides the foundation for the major and prepares students for advanced work within the individual disciplines. On the upper-division level, students may choose course work in specific areas of History, Comparative Literature, English, French, German, Italian, Spanish, and Latin, philosophy and religion, arts and language, and cultural and political thought. In addition, each student may elect to complete a senior thesis on a selected aspect of medieval and/or early modern culture.

Career Alternatives.

The major in Medieval and Early Modern Studies is a liberal arts degree providing excellent preparation for the rigors of professional schools as well as careers in law, museology, journalism, and teaching.

Medieval and Early Modern Studies

A.B. Major Requirements:

Preparatory Subject Matter: .......................... 22

Medieval Studies 20A, 20B .......................... 10

Three additional courses from among:

Art History 13B, 140, 141A, 141B, 141C, 141D, 142
History 10A, 10B, 10C, 10D, 10E
History 20A, 20B, 20C

Total Units for the Major: .......................... 66

History 102B, 102D, 103, 104, 105, 106
Italian 101, 102, 111, 112, 113, 114, 115A, 115B, 115C
Latin 101, 102, 103, 104, 105, 106, 108, 109, 110, 111
Latin 115, 116, 118, 120, 121, 125
Medieval Studies 130A, 130B, 131, 139, 190
Music 121*, 124A, 124B
Philosophy 105, 145, 168, 170
Political Science 115, 116, 118A
Religious Studies 102, 115, 130*
Spanish 130, 133N, 134A, 134B, 142*

Total Units for the Major: .......................... 66

Pre-Fall 2011 General Education (GE):

ACGH = American Cultures;
DD = Domestic Diversity;
QL = Quantitative;
SL = Scientific;
Wrt = Writing Experience

Quarter Offered: T-Fall, II-Winter, III-Spring, IV-Summer; 2015-2016 offering in parentheses

Pre-Fall 2011 General Education (GE): ArtHum = Arts and Humanities; SciEng = Science and Engineering; SocSci = Social Sciences; Divw = Diversity Student; Wrt = Writing Experience

Fall 2011 and on Revised General Education (GE): ArtHum = Arts and Humanities; SciEng = Science and Engineering; SocSci = Social Sciences; ACGH = American Cultures; DD = Domestic Diversity; QL = Quantitative; SL = Scientific; Wrt = Writing Experience

Medicine and Epidemiology

See Medicine and Epidemiology (VME), on page 539.
spheres: exploration, medical pathology, daily life, baroque culture. Immersion in source material from 1300-1650. May be repeated for credit. GE credit: ArtHum, Wrt | AH, WC, WE.

131. Cross-Cultural Relations in the Medieval and/or Early Modern World (4) Lecture/discussion—3 hours; extensive writing. Pre-requisite: course 20A or 20B or consent of instructor. Medieval and/or Renaissance aspects of cross-cultural relations between Christians, Jews, and Muslims: Europeans, Africans, and Asians; Old World and New World. Offered irregularly. GE credit: BC, WC, WE.

189. Seminar in Medieval and Early Modern Culture (4) Seminar—3 hours, term paper. Pre-requisite: course 20A or 20B or consent of instructor. Focus on a particular problem or issue in the Medieval or Early Modern period. Seminar topics might include (but not limited to) monasticism, origins of the university, chivalry, exploration, the role of women in the Middle Ages and Early Modern World. Offered in alternate years. GE credit: WE.

190. Senior Thesis (4) Seminar—4 hours. Pre-requisite: senior standing and major in Medieval Studies. Preparation of a research paper dealing with a selected aspect of medieval culture, under supervision of three members of the Committee in Charge. II, III, IV. (II, III, IV.)

197T. Tutoring in Medieval Studies (1-4) Seminar—2 hours. Pre-requisite: courses 20A and 20B, upper division standing; consent of instructor and chairperson of curriculum committee. Tutoring in Medieval Studies 20A and 20B, including leadership in small discussion groups affiliated with the course. May be repeated for credit for a total of 6 units. (P/NP grading only.)

198. Directed Group Study (1-5) (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5) (P/NP grading only.)

Microbiology

See Microbiology and Molecular Genetics, on page 423; Medical Microbiology (MMI), on page 410; Microbiology (A Graduate Group), on page 423; and Pathology, Microbiology, and Immunology (PMI), on page 540.

Meteorology

See Atmospheric Science, on page 173.

Mexican-American (Chicano) Studies

See Chicana/Chicano Studies, on page 192.

A.B. Major Requirements:

Preparatory Subject Matter ..............44-56

Biological Sciences 2A/2B-2C .....14-15
Chemistry 2A-2B .......................10
Chemistry 8A-B or 118A-118B-118C ...........................................6-12
Mathematics 17A-17B or 21A/21B ...................................8
Physics 1A-1B or 2A/2B-2C ..........6-12

Depth Subject Matter ...............36

Biological Sciences 101, 105 (or 102+103) .....................................7-10
Microbiology 104, 104L, 105, 105L ........................................13
Select at least one course from each of the areas of study below.

Areas of Study:

1. Molecular Microbiology: Microbiology 115, 150, 170, 171 ................3
2. Medical Microbiology: Microbiology 162, Medical Microbiology and Immunology 188, Pathology, Microbiology and Immunology 126, 128, 173, 183 ........3-4
3. Electives restricted to Elsewhere ...........6-10

Select from:

Upper division Microbiology courses not used in satisfaction of any other requirement; or Biological Sciences 104, 181, 183; Food Science and Technology 104; Molecular Cellular Biology 120L, 121, 160L, 182; Plant Pathology 120, 130, 148, 150; Plant Sciences 174; Pathology Microbiology and Immunology 126, 127; Soil Science 111

Note: Although a course may be listed in more than one category, that course may satisfy only one requirement in the entire major.

Total Units for the Major ...............80-92

B.S. Major Requirements:

Preparatory Subject Matter ..............55-65

Biological Sciences 2A/2B-2C .....14-15
Chemistry 2A-2B .......................10
Chemistry 8A-B or 118A-118B-118C ...........................................6-12
Mathematics 17A-17B-17C or 21A/21B (21C recommended) ...............8-12
Physics 7A-7B-7C .......................12
Microbiology 91 or 191 .................1

Areas of Study:

1. Molecular Microbiology: Microbiology 115, 150, 170, 171 .................3
2. Medical Microbiology: Microbiology 162, Medical Microbiology and Immunology 188, Pathology, Microbiology and Immunology 126, 128, 173, 183 ........3-4
3. Electives restricted to Elsewhere ...........6-12

Select from:

Upper division Microbiology courses not used in satisfaction of any other requirement; or Biological Sciences 180L, 181, 183; Food Science and Technology 104; Molecular Cellular Biology 120L, 121, 160L, 182; Plant Pathology 120, 130, 148, 150; Plant Sciences 174;
104. General Microbiology (4)
Lecture—4 hours. Prerequisite: Biological Sciences 101, 103 or 105. Designed for students continuing in microbiology or using microorganisms as tools for the study of genetics and biochemistry. Biology of microorganisms, including viruses, archaea, bacteria and eukaryotic microbes. Topics include microbial structure, growth, antibiotics, pathogenesis, immunology, and epidemiology. Only two units of credit for students who have taken course 101. Not open for credit to students who have completed course 102. GE credit: SciEng | QL, SE — I. (I.) Stewart

104L. General Microbiology Laboratory (3)
Lecture—1 hour; laboratory—6 hours. Prerequisite: course 102 or 104 (may be taken concurrently), consent of instructor. Students must complete a petition for consideration of enrollment; petition available on department of Microbiology website. Introduction to prototrophic methods in microbiology. Designed for students continuing in microbiology or using microorganisms as tools for the study of genetics and biochemistry. In combination with course 104, fulfills the microbiology requirement for professional schools. Only two units of credit allowed to students who have completed course 101. Not open to students who have completed course 102L. GE credit: SciEng | SE, WE — II. (I.) Nagy, Nelson

105. Microbial Diversity (3)
Lecture—3 hours. Prerequisite: course 102 or 104; Biological Sciences 103 or 105. Survey of microbial diversity in the three domains of Life: Bacteria, Archaea, and microbial eukaryotes. Emphasizes microbial evolution and phylogeny, physiology and metabolism, global biogeochemical cycles, environmental adaptation and environmental methods for analyzing culture-independent microbial diversity and microbial communities. GE credit: SciEng | SE — II. (II.) Dawson, Parales

105L. Microbial Diversity Laboratory (3)
Lecture—1 hour; laboratory—6 hours. Prerequisite: course 102 or 104; 102L or 104L; 105 (may be taken concurrently); Biological Sciences 103 or 105. Students must complete a petition for consideration of enrollment; petition available on department of Microbiology website. Classical enrichments for the isolation of metabolically diverse microbes; modern molecular methods for the identification of isolates; cultivation independent analysis of microbial communities from environmental samples. GE credit: SciEng | SE, WE — II. (II.) Dawson, Parales

115. Recombinant DNA Cloning and Analysis (3)
Lecture—3 hours. Prerequisite: Biological Sciences 101 or equivalent. Cloning and analysis of recombinant DNA, with emphasis on Escherichia coli host-vector systems. DNA-modifying enzymes; vectors and their use, manipulation and expression of insert DNA; polymerase chain reaction; and sequence annotation. Graduate students see course 215. GE credit: SciEng | SE — I. (I.) Xu

120. Microbial Ecology (3)
Lecture—3 hours. Prerequisite: course 105; Biological Sciences 102 or 105. Interactions between non-pathogenic microorganisms and their environment, emphasizing physiological and metabolic characteristics of various groups and their adaptation to and modification of spatial and temporal heterogeneity. Offered irregularly. GE credit: SciEng | SE — Nelson

140. Bacterial Physiology (3)
Lecture—3 hours. Prerequisite: Biological Sciences 101, 102 or 103 (102 may be taken concurrently), or Biological Sciences 101, 105; Microbiology 102 recommended. Fundamentals of bacterial growth and bacterial responses to environmental stresses. Topics will include carbon and nitrogen regulation, growth rate control, post-growth survival, quorum sensing, and motility and chemotaxis. Not open for credit to students who have completed course 130A. Offered irregularly. GE credit: SciEng | SE
290C. Advanced Research Conference (1-5)
Prerequisite: consent of instructor. (P/NP grading only)—I, II, III, (I, II, III)
Graduate

290B. Advanced Bacteriology (3)
Lecture—3 hours. Prerequisite: course 200A. Intended for first year graduate students in microbiology and closely related fields. Advanced topics in phylology, physiology, and diversity of bacteria. Offered irregularly. Privalsky, Parales

215. Recombinant DNA (3)
Lecture—3 hours. Prerequisite: Biological Sciences 101, 102, 103 or the equivalent. Application of recombinant DNA technology to modern problems in biology, biochemistry, and genetics, emphasizing molecular cloning strategies, choice of vectors, preparation of insert DNA, and selection procedures. —I. (II) Privalsky

262. Advanced General and Molecular Virology (3)
Lecture—3 hours. Prerequisite: graduate standing. Advanced integrated presentation of animal, bacterial, and plant viruses, including their structure, modes of regulation, expression and replication, and effects on host cells and organisms. Offered in alternate years. —II. Luciw

263. Principles of Protein-Nucleic Acid Interactions (3)
Lecture—3 hours. Prerequisite: advanced graduate standing and completion of one year of basic graduate course work in biochemistry, biophysics, chemistry, genetics, microbiology, or molecular biology. Physical basis and molecular principles of DNA-nucleic acid interaction. Topics include nucleic acid recognition by proteins, thermodynamics of protein-nucleic acid stability, and kinetics of binding process for both non-specific and sequence-specific nucleic acid binding proteins. Emphasis on systems that represent paradigms in protein-nucleic acid interactions. Offered irregularly. Offered irregularly.—Kowalczykowski

274. Seminar in Genetic Recombination (1)
Seminar—1 hour. Prerequisite: graduate standing and completion of one year of basic graduate course work in biochemistry, biophysics, chemistry, genetics, microbiology, or molecular biology. Physical basis and molecular principles of DNA-nucleic acid interaction. Topics include nucleic acid recognition by proteins, thermodynamics of protein-nucleic acid stability, and kinetics of binding process for both non-specific and sequence-specific nucleic acid binding proteins. Emphasis on systems that represent paradigms in protein-nucleic acid interactions. Offered irregularly. Offered irregularly.—Kowalczykowski

275. Seminar in DNA Repair and Recombination (1)
Seminar—1 hour. Prerequisite: consent of instructor; graduate standing in microbiology or closely related field. Review and discussion of current research and literature in DNA repair and recombination with presentations by individual students and invited speakers. May be repeated for credit. (S/U grading only)—I, III, (II, III) Heyer

276. Advanced Concepts in DNA Metabolism (3)
Lecture—3 hours. Prerequisite: Molecular and Cellular Biology 221 or Genetics 201C or equivalent course recommended. DNA damage checkpoints, homologous recombination, and meiotic recombination. An advanced treatment of the clinical and current literature to discuss emerging principles and current models in these research areas. Offered in alternate years. —II (Hunter)

290C. Advanced Research Conference (1)
Discussion/conference—1 hour. Prerequisite: graduate standing and consent of instructor. Presentation and critical discussion of staff research activities. Designed for advanced graduate students. May be repeated for credit. (S/U grading only)—I, II, III, (II, III)

291. Selected Topics in Microbiology (1)
Seminar—1 hour. Prerequisite: graduate standing and consent of instructor. Current progress in microbiology and plant and molecular biology. May be repeated for credit. (S/U grading only)—I, II, III, (II, III)

292. Seminar in Bacterial Physiology and Genetics (1)
Seminar—1 hour. Prerequisite: consent of instructor, graduate standing in microbiology or closely related field. Review and discussion of current research and literature in bacterial physiology and genetics, with presentations by individual students. (S/U grading only)—I, II, III, (II, III)

298. Group Study (1-5)
Prerequisite: consent of instructor. (S/U grading only)—I, II, III, (II, III)

299. Research (1-12)
(S/U grading only)—I, II, III, (II, III)
Professional

399. Teaching Asistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only)—I, II, III, (II, III)

Microbiology (A Graduate Group)

Rance B. Lefebvre, Ph.D., Professor (Pathology, Microbiology, and Immunology)
Johan Leveau, Ph.D., Assistant Professor (Plant Pathology)
Su-Ju Lin, Ph.D., Associate Professor (Microbiology)
Bo Liu, Ph.D., Professor (Plant Biology)
Frank Lage, Ph.D., Professor (Civil and Environmental Engineering)
Paul Luciv, Ph.D., Professor (Medical Pathology)
Shirley Luckhart, Ph.D., Professor (Medical Microbiology and Immunology)
Maria Marco, Ph.D., Assistant Professor (Food Science & Technology)
John C. Melker, Ph.D., Professor Emeritus (Microbiology)
Christopher J. Miller, Ph.D., Professor (Pathology, Microbiology, and Immunology)
David A. Mills, Ph.D., Professor (Viticulture and Enology)
Lorena Navarro, Ph.D., Assistant Professor (Microbiology)
Douglas C. Nelson, Ph.D., Professor (Microbiology)
Rebecca E. Parales, Ph.D., Professor (Microbiology)
Niels C. Pedersen, Ph.D., Professor (Medicine and Epidemiology)
Martin L. Privalsky, Ph.D., Professor (Microbiology)
Pamela Ronald, Ph.D., Professor (Plant Pathology)
John R. Roth, Ph.D., Professor (Microbiology)
Michael A. Savageau, Ph.D., Professor (Biomedical Engineering)
Barbara L. Shacklett, Ph.D., Associate Professor (Medical Microbiology and Immunology)
Mitchell H. Singer, Ph.D., Professor (Microbiology)
Jay V. Salnick, M.D., Ph.D., Professor (Internal Medicine)
Jeffrey L. Stott, Ph.D., Professor (Pathology, Microbiology, and Immunology)
Dawn Summer, Ph.D., Professor (Earth and Planetary Sciences)
Michael Svyanten, Ph.D., Professor (Medical Microbiology and Immunology)
Ilias Tagkopoulos, Ph.D., Assistant Professor (Computer Science)
George Thompson, M.D., Assistant Professor (Medical Microbiology & Immunology)
Jose V. Torres, Ph.D., Professor (Medical Microbiology and Immunology)
Renee Tsolis, Ph.D., Associate Professor (Medical Microbiology and Immunology)
Bart Weimer, Ph.D., Professor (Population Health & Reproduction)
Stefan Wurzitz, Ph.D., Professor (Civil and Environmental Engineering)
Lileng Xu, Ph.D., Assistant Professor (Microbiology)
Tilahun Yilma, Ph.D., Professor (Pathology, Microbiology, and Immunology)
Glenn M. Young, Ph.D., Associate Professor (Food Science and Technology)
Harry Zhou, Ph.D., Associate Professor (Animal Science)

Affiliated Faculty

Kathryn DeReimer, Ph.D., M.P.H., Adjunct Associate Professor (Medical Microbiology & Immunology)
Patsy S. C. Leung, Ph.D., Adjunct Professor (Internal Medicine)
Woutrina Miller, Ph.D., Assistant Adjunct Professor (VM: Pathology, Microbiology, and Immunology)
Ellen E. Sparger, Ph.D., Associate Adjunct Professor (VM: Medicine and Epidemiology)

Graduate Study. The Graduate Group in Microbiology offers study and research leading to the M.S. and Ph.D. degrees. Strong preference is given to doctoral applicants. The group offers study in modern molecular approaches to microbiological problems. Areas of research span fundamental, applied, and pathogenic microbiology, including bacterial and viral pathogenesis, eukaryotic microbiology, microbial genomics and genetics, microbial physiology and development, microbial ecology and environmental microbiology, cancer biology, and bioengineering and bioremediation. Sudipta Sen, Ph.D. [History]

The Major Program
A study of the Middle East and South Asia as a whole requires students to explore a unique set of issues at both historical and contemporary importance. In order to guide students in comparative analysis, faculty help majors deepen their inquiries through coursework on antique, medieval, and early modern empires and political systems. Given the dynamism of modern cultural contexts, majors are invited to concentrate their studies on a wide range of variables including the evolution of states along with new understandings of citizenship, the rise and development of nationalist movements, political conflicts informed by religious majorities, the nuclearization of India and Pakistan, the growth of information societies and computer industries, the production of oil and its social and cultural legacies, labor migrations, urbanization, the emergence of sizeable middle classes, transnational literary movements using sophisticated media technologies, the expansion and intrusion of global security regimes into everyday life, and peace initiatives that shape struggles for justice across the world. Our program’s focus on both the Middle East and South Asia is a pioneering achievement in the United States rivalled by only four other colleges or universities.

By the end of their studies, majors will have acquired an in-depth understanding of the common historical experiences shared by people in these regions, and of the legacies of culture, social exchange, power and empowerment across diverse settings. Students are also required to complete at least two years of training in a language appropriate to their area of expertise.

The major in Middle East/South Asia Studies at UC Davis offers a unique opportunity to study exchanges, complementarities, and correspondences in such fields as history, political economy, culture, literature and film, religion, family structures, gender relations, media, anthropology, law, internationals relations, development, diasporas, and urbanism. Students who complete our major will be well suited to embark on careers in non-governmental organizations, journalism and media industries, education and research, governmental service and diplomacy.

Programs, Internships, and Career Alternatives. Many internship opportunities are available for the Middle East/South Asia Studies major and minor, consult with your advisor.

Middle East/South Asia Studies Abroad Program. University of California Education Abroad Program. More information can be found at http://eap.ucop.edu/ and http://summer-abroad.ucdavis.edu/.

Minor Adviser. Consult the Middle East/South Asia Studies Program in 1272 Social Science & Humanities 530-754-4926 or the Middle East/South Asia Studies website at http://mesa.ucdavis.edu/.

Courses in Middle East/South Asia Studies (MSA)

Lower Division
92. Internship in Middle East/South Asia Studies (3-15) Internship. Prerequisite: consent of instructor. Work experience on and off campus in all subject areas offered as part of the ME/SA Studies program. Internship supervised by a member of the ME/SA faculty. May be repeated for credit up to 15 units. (P/NP grading only) — I, II, III, IV, (II, III, IV)

98. Directed Group Study (1-5) Prerequisite: consent of instructor (P/NP grading only).

99. Special Study for Undergraduates (1-5) Prerequisite: consent of instructor (P/NP grading only).

Upper Division
100. Middle East and South Asia: Comparative Perspectives (4) Lecture — 3 hours, extensive writing. Ethnographic and historical points of integration and divergence in various aspects of the Middle East and South Asia in precolonial, colonial, and postcolonial societies.
Military Science

(College of Letters and Science)

Reserve Officers’ Training Corps (ROTC), Army

Patrick Rose, U. Col., Chairperson of the Department

Department Office: 125 Hickey Gymnasium 530-752-5211

Faculty

Major Aimee Myrick, Assistant Professor
U. Col. Patrick Rose, Professor

Program of Study

The Military Science Department offers hands-on training in management and leadership. The program stresses the following: the ability to lead, self-discipline, respect, selflessness, honor, integrity, and personal courage. The program also stresses leadership dimensions as taught in the classes. Also stressed are current events, national and international politics, military affairs, ethics training, and human relations with emphasis on eliminating racial and gender discrimination. Management and leadership are taught using the U.S. Army as a model. Military skills (such as drill and ceremony, map reading, and squad tactics) are taught to the extent necessary to create an environment where students can enter leadership positions and apply theories taught in the classroom. Students learn by doing. The program assists students in all academic fields to prepare for positions of leadership in military or civilian careers.

The department offers two program tracks: (1) a purely academic track; (2) a pre-commissioning track for those desiring a commission in the U.S. Army. The academic track entails no obligation to the military and is open to all students. Students pursuing the academic track do not wear a uniform or otherwise participate in extra-curricular activities designed as part of the pre-commissioning process. Activities for all students include a range of sports and clubs (a club designed for adventure activities such as rappelling, white-water rafting, orienteering, and patrolling) and intramural sports teams.

Students who desire a commission in the U.S. Army participate in both the academic portion of the program and the leadership laboratories and extra-curricular activities designed to enhance their leadership and technical skills. They wear uniforms to leadership laboratories and classes and become ROTC cadets. Students may be cadets in the lower division courses without incurring a military obligation. Students participating in the upper division pre-commissioning programs or a military obligation. See below for details. Extra-curricular activities for cadets include an intercollegiate sports team (Ranger Challenge), the university color guard, a military honor society, and opportunities to participate in field training exercises.

Department Programs

Students are enrolled in Military Science under one of two programs.

Four-Year Program

There is no military obligation associated with attendance in lower division courses. Students are enrolled in the basic course (lower division) for the first two years on a voluntary basis. Admission to the advanced course (upper division) is by application from second-year lower division students who meet the academic, physical, and military aptitude requirements. Qualified veterans can enter the advanced course immediately because of their military service experience, upon approval by the Department Chairperson.

Juniors receive $450 subsistence per month, and Seniors $500 per month, after executing a contract agreeing to complete the courses and accept a commission in the U.S. Army upon graduation. During
the course, all Military Science text books, uniforms and equipment are provided without cost. Students are given leadership development experience at the Leader Development and Assessment Course (LDAC) between their third and fourth years of the course. Emphasis is on individual participation, leadership development and the capability to function effectively in positions of significant responsibility.

Two-Year Program

The two-year program is for students, including gradu- ate students, who have not attended lower division Military Science classes. In lieu of lower division courses an applicant attends a six-week summer pro- gram, the Army Training Course (ITC) which is volun- tary and carries no military obligation. Applicants are paid and transportation costs covered. Applica- tions are accepted at anytime prior to the student’s junior year; graduate students are also accepted. All other provisions explained above for the upper divi- sion course apply to the two-year program.

Scholarship Program

The U.S. Army offers four, three, and two-year Active Duty scholarships, two-year Reserve Forces Duty, and two-year Dedicated National Guard schol- arships to students planning to attend or attend UC Davis. The U.S. Army ROTC scholarship package pays tuition. Also included in all scholarships is a flat rate of $1200 per year for textbooks.

The Army Reserve Officers’ Training Corps four-year Active Duty programs are awarded to qualified high school seniors in a national competition each year. A deadline of 10 January is set for sub- mission of the four-year scholarship application. As high school seniors, students compete for the scholar- ship by submitting their complete application at http://www.goarmy.com/rotc/ or contact UC Davis, Department of Military Science at 530-754-6707.

The three-year Active Duty and two-year Reserve Forces Duty scholarships are awarded to college stu- dents who are already attending UC Davis or trans- ferring from a junior college to UC Davis. Students apply for and are awarded these Army scholarships through the Military Science Department.

Leadership Laboratory

During the course of the school year, two hours per week are spent conducting practical exercises. Classes emphasize adventure activities including off-road, defense and patrolling techniques, weapons familiarization, rappelling, rope bridging, obstacle courses, leadership reaction course, and land navi- gation. All cadets are required to attend leadership laboratories for practical leadership experience and to prepare for attendance at LDAC, held at Fort Lewis, Washington.

Academic Credit

College of Agricultural and Environmental Sciences. The Bachelor of Science degree in agri- culture requires the completion of 180 units. Military Science courses are counted in the unit allowance for electives.

College of Biological Sciences. The Bachelor of Science degree requires the completion of 180 units. Military Science courses are counted in the allow- ance for electives.

College of Engineering. Military Science units are acceptable toward the requirements for the Bachelor of Science degree to the extent of the unre- stricted elective units available in the curriculum being followed.

College of Letters and Science. The Bachelor of Arts degree requires the completion of 180 units. Military Science courses are counted in the allow- ance for electives.

School of Veterinary Medicine. The number of Military Science units acceptable toward the Bache- lor of Science degree in Veterinary Medicine is an individual program basis approved by the Dean of the School. Graduates with the D.V.M. degree may apply for direct commission in the United States Army Veterinary Corps.

Aerospace Studies (Air Force)

The Air Force Reserve Officer’s Training Corps (AFROTC) is an educational program providing training in leadership, management, communica- tions and military proficiency on college and univer- sity campuses. It also provides an opportunity to obtain a commission as a second lieutenant in the Air Force and entrance after you complete a bachelor’s or a graduate degree. The skills you acquire will become valuable assets for any subsequent career you choose.

The program is normally four years long, but a flexi- ble design allows students to complete the curriculum in as little as two years. Undergraduate scholarships are available, but are not necessary for participa- tion. Until you accept a scholarship or enter your junior year of the program, you have no obligation to join the Air Force. There are no costs for AFROTC uniforms, books, or classes.

UC Davis students have the option of taking the Air Force program on the UC Berkeley or CSU Sacra- mento campus.

Qualifications

Freshmen/Sophomore applicants must:

• Be full-time college students in good academic standing.

• Have good moral character.

• Be in strong physical condition.

• Be at least 14 years old.

Additionally, Juniors/Seniors/Scholarship recipients must:

• Be United States citizens or in the process of applying for citizenship.

• Be 18 years old (or 17 years old with consent of parent or guardian).

• Pass the Air Force Officer Qualifying Test.

• Pass a medical examination.

• Be under the age of 31 at time of graduation (may be waived).

Scholarships

Opportunities for four-year and three-year under- graduate scholarships are better than ever. Scholar- ships cover the full cost of tuition, books and required fees at the University of California and are available for eligible high school seniors. It also includes $300-$500 monthly stipend during the school year. If you are a junior or senior in high school and plan on attending a college or university in Northern California, you can write, call or visit the local AFROTC detachment for a scholarship appli- cation. Applications are also available from local Air Force recruiters or your high school guidance counselors.

All scholarships are merit-based and consider a vari- ety of factors: cumulative GPA, class standing, SAT/ ACT scores, academic awards/achievements, lead- ership ability, athletic involvement, extracurricular activities, community service and letters of recom- mendation. A personal interview with an Air Force officer is also part of the application process. Prior to activating a scholarship, students must meet AFROTC medical and physical fitness standards. All scholarships must be used at an accredited college or university that offers AFROTC on campus or through cross-registration. The program is available at more than 1,000 universities and colleges nation- wide.

If you are already in college, contact our office directly and apply for enrollment into AFROTC as a cadet. Three- and two-year full tuition scholarships are available for all academic majors, especially sci- entific and technical majors such as engineering, atmospheric science, math, computer science, and physics. GPA Scholarship requirements for non- technical majors are slightly higher. Applicants are pri- marily evaluated on their leadership ability and academic performance.

Challenging Careers

All commissioned officers enter the Air Force as sec- ond lieutenants for a 4-year active duty service com- mitment. Pilots and navigators serve longer committments, based on training requirements. Once on active duty, you’ll be given instant responsibility in one of 32 primary career fields. Opportunities to fly are better than ever. Whether you are piloting the F-22 lighter, supervising 150 aircraft maintainers on the flightline, or caring for sick personnel in the emergency room, you will be regarded knowing that you are making a difference.

Air Force ROTC is offered through the Aerospace Studies departments at California State University Sacramento and U.C. Berkeley. Scholarships (including tuition, book allowance, and stipend) are avail- able for qualified students. Students may enroll and attend one course per semester at the U.C. Berkeley or CSU Sacramento campus at no cost. Topics cov- ered in AFROTC courses include Basic Military knowledge (1-credit), Military History (1-credit), Leadership Training (3-credits), and U.S. National Security Affairs and Preparation for Active Duty (3- credits). Additional components of the AFROTC pro- gram include 2 hours per week of fitness activities, 2 hours per week of Leadership Lab, and a 4-week Summer Field Training between the Sophomore and Junior years. Upon completion of the program and granting of 4-year degree, students will commission as Second Lieutenants in the United States Air Force. To be eligible for AFROTC, applicants should be a full-time student and meet all fitness, GPA testing, and other requirements. Interested students, please contact their department of choice:

For CSU Sacramento: http://www.csus.edu/afrotc/ 916-278-7315; det088@maxwell.af.mil

For U.C. Berkeley: http://airforcrotc.berkeley.edu/ (510) 642-3572; airforce@berkeley.edu

Naval ROTC

Department of Naval Science 152 Hearst Gymnasium, UC Berkeley, CA 94720-3640 (510) 642-3551; http://navyrotc.berkeley.edu

UC Davis students may participate in the Navy and Marine Corps ROTC program at UC Berkeley. The program is 4 years long and includes courses and weekly professional development laboratories (drill) at UC Berkeley. Students normally compete for national scholarships as high school seniors, although interested students may enroll as freshmen or sophomores and compete for scholarships based on successful participation in the program. A student who satisfactorily completes an ROTC program and is awarded a degree from UC Davis receives an active duty commission as a Second Lieutenant in the U.S. Marine Corps or an Ensign in the U.S. Navy.

Navy option students take the following courses:

Freshman year:

• NS 1 Introduction to Naval Science

• NS 2 Sea Power and Maritime Affairs

Sophomore year:

• NS 3 Leadership and Management

• NS 10 Naval Ship System I

Junior year:

• NS 12A Navigation and Naval Operations I

• NS 12B Navigation and Naval Operations II

Senior year:

• NS 401 Naval Ship System II

• NS 412 Leadership and Ethics

In lieu of NS401, NS10, NS12A and NS12B, Marine Corps students participate in shipyard seminars and complete MA154, History of Littoral War- fare and MA20, Evolution of Warfare (or a designated equivalent).

Scholarship students are required to complete a num- ber of other courses at Davis, including one year each of calculus, physics, and English, and one...
Military Science

228. Foundations of Tactical Leadership (2)
Lecture—2 hours. Prerequisite: course 222 or consent of instructor. Leadership of tactical teams in complex operating environment. Self-assessment of leadership style. Basic military skills: terrain analysis, patrolling and operations orders. Dynamics of adaptive leadership in the context of military operations.—II. (II.)

24A. Individual Military Leadership Skills (0.5)
Laboratory—2 hours. Prerequisites: courses 14A, B and C, enrolled in course 22B or consent of instructor. Development and practice of individual leadership skills in extensive supervised leadership labs. Cadets perform basic military skills, improve on troop leading procedures and lead subordinates in tactical situations. Begin with drill and ceremony, land navigation and individual movement techniques. (P/NP grading only)—I. (I.)

24B. Individual Military Leadership Skills (0.5)
Laboratory—2 hours. Prerequisites: courses 14A, B and C, enrolled in course 22B or consent of instructor. Development and practice of personal military leadership skills in extensive supervised leadership labs. Performance of basic military skills, improvement on troop-leading procedures, leadership of subordinates in tactical situations. (P/NP grading only)—II. (II.)

24C. Individual Military Leadership Skills (0.5)
Laboratory—2 hours. Prerequisites: courses 14A, B and C, enrolled in course 21 or consent of instructor. Develop and practice personal military leadership skills in extensive leadership labs. Develop and practice personal military leadership skills through practical application. Small unit military skills, improve on troop leading procedures and lead subordinates in tactical situations. (P/NP grading only)—III. (III.)

Upper Division

131. Military Leadership and Management (2)
Lecture—2 hours. Prerequisite: upper division standing and consent of instructor. Leadership and management in organizational context. Team dynamics, leadership styles, professional ethics, development of a leadership framework. Management skills for planning, decision making, and organizing developed through practical exercises and the development of courses of action, implementation of solutions.—I. (I.)

132A. Advanced Military Operations (2)
Lecture—2 hours. Prerequisite: upper division standing, course 131 or consent of instructor. Military small unit tactical theory as the basis for leadership development. Principles of war, contemporary operating environment, Geneva Law of Land Warfare, military offensive and defensive operations. Emphasis on development of critical thinking, problem solving, and communication skills.—II. (II.)

132B. Applied Leadership (2)
Lecture—2 hours. Prerequisite: upper division standing, course 132A or consent of instructor. Military small unit tactical theory and application as basis for leadership development. Application of leadership styles and skills to complete problem-solving exercises and the development of an adaptable framework applicable to a variety of shifting environments and situations.—III. (III.)

134A. Adaptive Tactical Leadership (0.5)
Laboratory—2 hours. Prerequisite: upper division standing, course 131 or consent of instructor. Small unit tactical operations serve as the basis for enhancement of leadership performance through tactical application. Assessment of leadership attributes, skills, and actions through participation in a variety of leadership roles in problem-solving exercises. (P/NP grading only)—I. (I.)

134B. Adaptive Tactical Leadership (0.5)
Laboratory—2 hours. Prerequisite: upper division standing, course 132A or consent of instructor. Small unit tactical operations served as the basis for enhancement of leadership performance through tactical application. Assessment of leadership attributes, skills, and actions through participation in a variety of leadership roles in problem-solving exercises. (P/NP grading only)—II. (II.)

141. Ethical Leadership (2)
Lecture—2 hours. Prerequisite: upper division standing; consent of instructor. Direct influence of leaders on individual moral development and ethical behavior. The complexities of balancing moral, legal, and ethical obligations while applying fundamental business principles in determining the best possible outcome from competing solutions.—I. (I.)

142. Military Law (2)
Lecture—2 hours. Prerequisite: division standing and course 141, or consent of instructor. The United States Constitution and the Military Justice System. Basic law of war, with an emphasis on issues that might arise on the battlefield or during a national emergency.—II. (II.)

143. U.S. Army Management Systems (2)
Lecture—2 hours. Prerequisite: division standing and course 142 or consent of instructor. Leadership and management, focusing on four management systems: planning, organizing, leading and controlling. Practical methodologies for assessing management decisions while balancing competing ethical, economic, infrastructure and future growth trade-offs.—III. (III.)

144A. Military Training Leadership Skills (0.5)
Laboratory—2 hours. Prerequisite: upper division standing, course 141 or consent of instructor. Enhancement of student leadership performance through practical application. Small unit military tactical operations as the basis for the student exploration and development. (P/NP grading only)—I. (I.)

144B. Military Training Leadership Skills (0.5)
Laboratory—2 hours. Prerequisite: upper division standing, course 142 or consent of instructor. Enhancement of student leadership performance through practical application. Small unit military tactical operations serve as the basis for student exploration and development. (P/NP grading only)—II. (II.)

144C. Military Training Leadership Skills (0.5)
Laboratory—2 hours. Prerequisite: upper division standing, course 143 or consent of instructor. Enhancement of student leadership performance through practical application. Small unit military tactical operations serve as the basis for student exploration and development. (P/NP grading only)—III. (III.)

191. Special Studies in Military Science (2)
Independent study—6 hours. Prerequisite: consent of department chair, and courses 131, 132A, 132B, 141, 142, 143. Intensive examination of one or more special problems in military science. Possible areas of study include leadership dimensions, principles of war, air-land battle imperatives, military strategy, the operational art and professional ethics, may be repeated twice for credit when topic differs. (P/NP grading only.)
Molecular and Cellular Biology

Molecular and Cellular Biology Major Program

The Biochemistry and Molecular Biology Major introduces students to the chemistry of living organisms and the experimental techniques that are used to probe the structures and functions of biologically important molecules. Students who enjoy both chemistry and biology and who are comfortable with quantitative approaches to problem solving will find this major a rewarding field of study.

The Program. The biochemistry and molecular biology program begins with an introduction to the upper division common curriculum that provides an introduction to the principles of biochemistry, genetics, and cell biology. Majors then take a comprehensive and rigorous laboratory course to familiarize them with the most important aspects of biochemical research. Additional upper division courses in biochemistry and molecular biology explore detailed aspects of these subjects. Students are also required to take courses in other biological sciences and a full year of physical chemistry.

Career Alternatives. The biochemistry and molecular biology major program provides a solid scientific basis for careers in research, teaching, or service careers in the life sciences. Positions are open to biochemists in bio-medical, bio-technological, pharmaceutical, agricultural research and chemical industries. Also, university-affiliated research laboratories, hospital laboratories, and government-sponsored research facilities provide employment opportunities. The major provides excellent preparation for advanced study in graduate or professional schools.

B.S. Major Requirements: UNITS

Preparatory Subject Matter: 55-65

Biological Sciences 2A-2B-2C .......................... 14
Chemistry 2A-2B-2C .................................... 15
Mathematics 17A-17B-17C or 21A-21B-21C (21C recommended) .......................... 8-12
Physics 7A-7B-7C ........................................ 12
Chemistry 8A-8B or 118A-118B ........................... 118C .......................... 6-12

Depth Subject Matter: 45-51

Biological Sciences 101, 102, 103, 104 ........................................... 13
Statistics 100 or 130A-130B .............................. 4-8
Molecular and Cellular Biology 140L .......................... 5
Two courses from: Molecular and Cellular Biology 143, 144, or 145 ........................................... 6
Molecular and Cellular Biology 121 ....... 3
Molecular and Cellular Biology 130; or 163 and 164 ........................................... 4-6
Select at least 10 additional units from the following:

Chemistry 107A, 107B .......................... Evolution and Ecology 100, 150
Microbiology 101, 102, 150, 170 .......................... Molecular and Cellular Biology 120L, 123, 124, 138, 143, 145, 146, 150, 158, 160, 162, 163, 164, 178, 182, 191
Neurobiology, Physiology, and Behavior 100, 101, 103, 112, 160, 161 .......................... Pathology, Microbiology, and Immunology 126, 126L, 128
Plant Biology 111, 111D, 113, 113D, 152

Pre-Fall 2011 General Education (GE): Arts and Humanities: Sociology; Social Sciences; Div-Domestic Diversity; Wrt-Writing Experience
Biology Academic Success Center
Master Adviser.

Total Units for the Major .................................. 101-116
ics. Additional upper division courses in biological
tory courses in the principles of genetics and genom-
ics, including gene expression, evolution, development,
genic diseases, sexual determination, develop-
ment, and behavior. GE credit: SciEng | QL, SE, SL—III. (III.) Engbrecht, Kannala

99. Special Study (1-5)
Independent study. (P/NP grading only.) GE credit: SE.

Lower Division

10. Introduction to Human Heredity (4)
Lecture—3 hours; discussion—1 hour. Topics in
erenity and human gene structure and func-
tion, including the genetic basis of human develop-
ment, causes of birth defects, mental retardation,
genic diseases, sexual determination, develop-
ment, and behavior. GE credit: SciEng | QL, SE, SL—III. (III.) Engbrecht, Kannala

99. Special Study (1-5)
Independent study. (P/NP grading only.) GE credit: SE.

Upper Division

120L Molecular Biology and Biochemistry Laboratory (6)
Laboratory—10 hours; lecture—2 hours; labora-
tory/discussion—1 hour. Prerequisite: Biological Sci-
ciences 103 (may be taken concurrently). Restricted
enrollment. Introduction to laboratory methods and
procedures employed in studying molecular biology
and biochemical processes. Designed for students who
need experience in the use of molecular biolo-
gy and biochemical techniques as research and
analytical tools. GE credit: SciEng | QL, SE, SL, VI, WE—II, III, III. (II, III.) McIlvain

121. Advanced Molecular Biology I (3)

Laboratory—3 hours. Prerequisite: Biological Sciences 101 and 102 or 105 or Animal Biology 102 (may be taken concurrently, prior completion recom-
ated). Structure, expression, and regulation of eukaryotic genes. Chromosome structure and repli-
cation; gene structure, transcription, and RNA pro-
cessing; protein synthesis and translation control;
development, immune system, and oncogenes. Not open for credit to students who have completed
Molecular and Cellular Biology 161. GE credit: SciEng | QL, SE, SL—I, II, III, III. (II, III.) Burgess, Gass-
er, Hamner, Powers.

122. Behavior and Analysis of Enzyme and Receptor Systems (3)
Lecture—3 hours. Prerequisite: Biological Sciences 101. Introduction to the principles of enzyme kinetics
and receptor-ligand interactions with emphasis on
metabolic regulation and data analysis. Topics include
simultaneous equilibria, chemical and
steady-state kinetics, allosteric enzymes, multireac-
tant systems, enzyme assays, membrane transport
and computer-assisted simulations and analyses. GE credit: SciEng | QL, SE, SL—I, II, III, III. (II, III.) Fraser, Wilson

124. Macromolecular Structure and Function (4)
Lecture—4 hours. Prerequisite: Biological Sciences 103, Chemistry 18C. An in-depth investigation into protein and nucleic acid structure and thermodynam-
ics and how these properties influence their biologi-
cal functions. Key examples of important functional
classes of these molecules will be examined. Not open for credit to students who have completed
course 122 or Chemistry 108. GE credit: SciEng | SE, SL—I, III, III. (III.) Baldwin

126. Plant Physiology (3)
Lecture—3 hours. Prerequisite: Biological Sciences 103 or 105. The biochemistry of important plant
processes and metabolic pathways. Discussion of
methods used to understand plant processes, includ-
ing use of transgenic plants. [Same course as Plant
Biology 126.] GE credit: SciEng | SE, SL—I, II. (II.) Callis, Tiran

138. Undergraduate Seminar in Biochemistry (1)
Seminar—1 hour. Prerequisite: Biological Sciences 103. Discussion of the historical developments
of modern biochemistry or current major research prob-
lems. May be repeated two times for credit when

140L. Cell Biology Laboratory (5)
Lecture—2 hours; laboratory—6 hours; discussion—
1 hour. Prerequisite: Biological Sciences 104 (may be taken concurrently). Exercises illustrating the prin-
ciples of cell biology with emphasis on light micros-
copy. GE credit: SciEng | QL, QL, SE, SL—VI, VI—II. (II.) Kaplan

142. Advanced Cell Biology: Contractile and Motile Systems (4)
Lecture—3 hours; term paper. Prerequisite: Biologi-
cal Sciences 102, 104 (may be taken concurrently);
Mathematics 168. Advanced cell biology with
emphasis on molecular, biophysical and cellular
properties of contractile and motile systems. GE credit: SciEng | SE.

143. Cell and Molecular Biophysics (3)
Lecture—3 hours. Prerequisite: Biological Sciences 101, 102, 103, 104. Physical chemical principles
by which molecules form living, moving, reproduc-
cing cells. Physical nature of cytoplasm; molecular
structure/bonding in membranes and molecular
assemblies and protein machines. Physical tech-
niques and modeling of cytoskeletal polymer-motor
dynamics and function during intracellular transport,
motility and motility. GE credit: SciEng | QL, SE—I, III. (III.) AlBassam

144. Mechanisms of Cell Division (3)
Lecture—3 hours. Prerequisite: Biological Sciences 101, 102, 104. The molecules and mechanisms that
allow eukaryotic cells to coordinate cell growth,
DNA replication, segregation of chromosomes and
cell division. GE credit: SciEng | SE, WE—II—II. (II.) McIlvain

145. Assembly and Function of Cell Signaling Machinery (3)
Lecture—3 hours. Prerequisite: Biological Sciences 101, 102, 104. Molecular basis of cell signaling,
including positioning of cellular machinery, compo-
ents of various signaling pathways, and down-
stream effects of signaling on cell adhesion, cell
differentiation, and programmed cell death. GE credit: SciEng | SE—III, III. (III.) Erickson

148. Undergraduate Seminar in Cell Biology (2)
Seminar—2 hours. Prerequisite: upper division standing in the biological sciences or a related disci-
pline. Student reports on current topics in cell biol-
yogy with emphasis on integration of concepts,
synthesis, and state-of-the-art research approaches.
Reviews of literature and reports of undergraduate
research may be included. May be repeated for credit. (P/NP grading only.) GE credit: OL, SE.

150. Developmental Biology (4)
Lecture—4 hours. Prerequisite: Biological Sciences 101. Analysis of the mechanistic basis for animal
development with a focus on experimental evidence and
the relevant fundamental experimental strate-
gies. Fertilization and early development, morphe-
genesis and patterning, cell differentiation,
regulation of cell proliferation and tissue growth. GE credit: SciEng | SE, SL—I, II. (II.) Armstrong, Draper, Edwards, Natleze

158. Undergraduate Seminar in Developmental Biology (2)
Seminar—2 hours. Prerequisite: upper division standing in the biological sciences or a related disci-
pline. Student reports on current topics in cell biol-
yogy with emphasis on integration of concepts,
synthesis, and state-of-the-art research approaches.
Reviews of literature and reports of undergraduate
193. Advanced Research (3)
Laboratory—6 hours; discussion—1 hour. Prerequisite: upper division standing, completion of an upper division Molecular Genetics and Genomics Laboratory course and consent of instructor. Research project carried out under the supervision of a faculty sponsor. Discussion and analysis of results and proposed experiments. May include presentation of a seminar to a research group. May be repeated for credit. (P/NP grading only.) GE credit: SE—II, III, IV, V.

194H. Research Honors Project
Independent study—9 hours. Prerequisite: consent of instructor. The independent study honors project. May be repeated two times for credit. (P/NP grading only.) GE credit: SE—II, III, IV, V.

198. Directed Group Study (1-5)
Variable—1-5 hours. Prerequisite: consent of instructor. Pass One restricted to graduate students. Enrolled in number of credits designated by instructor in consultation with the section’s regular courses. GE credit: SE.

Graduate

210. Molecular Genetics and Genomics (3)
Lecture/discussion—3 hours. Prerequisite: Biological Sciences 101 and Molecular & Cellular Biology 121, or equivalent. Pass One restricted to graduate students. Emphasizes molecular genetic and genomic approaches to address fundamental biological questions. Introduces and emphasizes the strengths of prokaryotic and eukaryotic model systems and serves as building block for the BMCDB core courses, which use model systems to develop their themes. May be repeated one time for credit. —I (K.) Engbrecht

211. Macromolecular Structure and Interactions (3)
Lecture—3 hours. Prerequisite: Biological Sciences 102, or the equivalent, or consent of instructor. Pass One restricted to graduate students. Emphasizes structural and quantitative basis for macromolecular structure-function relationships. Investigation of the paradigm form follows function. Review of key elements of protein, nucleic acid, and lipid structural and regulation of specific macromolecular associations by analyzing chemical structure and physical-chemical behavior. No credit for students that have taken course 221A. —I (K.) Engbrecht

212. Cell Biology (3)
Lecture—3 hours. Prerequisite: Biological Sciences 104, or equivalent, or consent of instructor. Pass One restricted to graduate students. Analysis of basic processes governing cell division, migration, and transport. Study of the integration and regulation of cell behavior in response to changes in cellular environment. No credit for students that have taken course 221A. —I (K.) Engbrecht

213. Developmental Biology (3)
Lecture—3 hours. Prerequisite: undergraduate biology course or consent of instructor. Pass One restricted to graduate students. Fundamental principles in embryonic development that guide application of modern cellular and genetic approaches to understand developmental mechanisms. Emphasis on experimental approaches utilized to critically address scientific questions. —I (I.) Erickson

214. Molecular Biology (3)
Lecture—3 hours. Prerequisite: course 211, or equivalent, or consent of instructor. Pass One restricted to graduate students. Development of critical reading skills through study of major paradigms and recent advances in specialized fields of biochemistry, molecular, cell, and developmental biology. Emphasis on active learning and student participation. May be repeated one time for credit if topic differs. —III (I.) Kaplan

220L. Advanced Biochemistry Laboratory (5)
Laboratory—15 hours. Prerequisite: course 210 and 211 (may be taken concurrently) and 120L or the equivalent. Two five-week assignments in BMCDB laboratory researches. Individual research problems with emphasis on the design of paradigm experiments and the development of the techniques that can be applied in the current research. May be repeated two times for credit if topic differs. —III (I.) Kaplan

248. Seminar in Cell Biology (2)
Seminar—2 hours. Prerequisite: consent of instructor. Discussion of recent literature on the physical and chemical aspects of organization and function of living systems, topics of current interest in ultrastructure and function of cells. Organizational and functional properties of the molecular and cellular levels of biological systems. May be repeated for credit. —I

251. Molecular Mechanisms in Early Development (3)
Lecture—3 hours. Prerequisite: graduate standing or consent of instructor. Introductory background in developmental biology and/or cell biology recommended. Analysis of the early events of development including germ cells and other stem cells, gametogenesis, meiosis, imprinting, histone modification, and early somatic tissues. GE credit: SE—II, III, IV, V. (Same course as Biological Sciences 242.)

255. Molecular Mechanisms in Pattern Formation and Development (3)
Lecture—3 hours. Prerequisite: graduate standing or consent of instructor. Introductory background in developmental biology and/or genetics recommended. Genetic and molecular analysis of mechanisms that control animal development after fertilization. Establishment of embryonic axes, cell fate and embryonic patterning, and tissue patterning. Critical reading of current literature in C. elegans, Drosophila, and mouse genetic model systems. Offered in alternate years. —III (I.) Natels, Rose
257. Cell Proliferation and Cancer Genes
(3)
Lecture—1.5 hours; seminar—1.5 hours. Prerequisites: course 221C and 221D or the equivalent. Genetic and molecular alterations underlying the conversion of normal cells to cancers, emphasizing regulated cell division and differentiation and pathways. Critical reading of the current literature and development of experimental approaches.—I (I) Carraway

258. Seminar in Development (2)
Seminar—2 hours. Prerequisite: consent of instructor. Reports and discussion on embryology, morphogenesis, and developmental mechanisms. May be repeated for credit.—II (II) Erickson

259. Literature in Developmental Biology (1)
Seminar—1 hour. Prerequisite: consent of instructor. Critical presentation and analysis of recent journal articles in developmental biology. May be repeated for credit. (S/U grading only)—I, II, III (I, II, III) Erickson

263. Biotechnology Fundamentals and Application (2)
Lecture—2 hours. Prerequisite: Biological Sciences 101, 102 and Microbiology 102 or consent of instructor. Must be a graduate student in good standing and fundamentals of molecular biology and chemical engineering involved in recombinant DNA technology. Topics: principles of rate processes of biological systems, optimization of bioreactors, and issues related to expression and production of recombinant molecules. Participation in student-directed team projects.—II (II) McDonald, Privalsky, Rodriguez, VanderGheynst

283. Biotechnology Internship (7-12)
Internship—2-36 hours. Prerequisite: graduate standing and consent of instructor. Research at a biotechnology company or interdisciplinary cross-college lab for a minimum of 3 months as part of the Designated Emphasis in Biotechnology Program. (S/U grading only)—I, II, III (I, II, III) Dandeker

290C. Research Conference (1)
Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Presentations and critical discussions of faculty and graduate student research in molecular and cellular biology including biochemistry, genetics, and cell biology. May be repeated for credit. (S/U grading only)—I, II, III (I, II, III)

294. Current Progress in Biotechnology
Seminar—1 hour. Prerequisite: graduate standing or consent of instructor. Seminars presented by guest lecturers on subjects of their own research activities. May be repeated for credit. (S/U grading only)—I, II, III (I, II, III)

201C. Research Conference (1)
Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Presentations and critical discussions of faculty and graduate student research in molecular and cellular biology including biochemistry, genetics, and cell biology. May be repeated for credit. (S/U grading only)—I, II, III (I, II, III)

299. Research (1-5)
Variable—1.5 hours. Prerequisite: consent of instructor. (S/U grading only)

300. Professional
Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Practical experience in the methods and problems of teaching biochemistry/
grams of study and research leading to the M.S. and Ph.D. degrees and participates in joint Ph.D./M.D. and Ph.D./D.V.M. programs. The program provides broad training in the fundamental principles of cellular, molecular, and integrative physiology.

Graduate Advisers: Gretchen Casazza, Master Adviser; J. David Furlow, Nipavan Chiamvimonvat, Chao-Yin Chen

Courses in Molecular, Cellular, and Integrative Physiology (MCP)

(Formerly courses in Physiology)

Graduate

200L. Animal Cell Culture Laboratory (4)
Discussion—2 hours; laboratory—6 hours. Prerequisite: courses in undergraduate biochemistry, cell biology, or general physiology, or consent of instructor. Techniques of cell culture, with emphasis on cell physiology and the actions of drugs and toxins on cultured somatic cells. Design, performance and interpretation of experiments with animal cells in vitro. —II. (III.) B. Wilson, R. Wu

210A. Advanced Physiology (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: Physiology Ph.D. program, or consent of instructor. Advanced course on general principles of physiology, surveying homeostasis, cellular and selected topics, and neurophysiology. (Same course as Human Physiology 210A.) —I. (II.) Zheng

210B. Advanced Physiology (6)
Lecture—5 hours; discussion—1 hour. Prerequisite: Physiology 210A; Physiology Ph.D. program, or consent of instructor. Advanced course on general principles of physiology, surveying homeostasis, cellular and selected topics, and neurophysiology. —II. (III.) Stebbins

210C. Advanced Physiology (5)
Lecture—5 hours. Prerequisite: doctoral student in the Molecular, Integrative and Comparative Physiology Graduate program or consent of instructor. Graduate level instruction in the general principles of physiology and the neural and hormonal control of the cardiovascular, renal, respiratory, gastrointesti- nal, sensory, muscular, and endocrine systems. —III. (III.) Navedo, Xiang

210L. Physiology Laboratory Rotations (5)
Laboratory—15 hours. One mandatory rotation and up to two voluntary rotations. Students learn techniques and perform experiments related to particular research problems. At the end of the rotations students give a short talk and hand in a research paper. May be repeated twice for credit. (S/U grading only.)—I, II, III. (I, II, III.) Byrnes, Pao, Krayevsky

216. Neurophysiology Literature (3)
Lecture—1 hour; discussion—2 hours. Lectures covering experimental and theoretical methods in studying cell membrane ion channels and the resulting characterization of the physiological functions and structure/function relationships of some of the most important channel types. Discussion of classical and current original papers. —I. (I.)

219. Muscle Growth and Development (3)
Lecture—2 hours; seminar—1 hour. Prerequisite: Biolog-ical Sciences 103, Biological Sciences 104 or Molecular and Cellular Biology 150, or consent of instructor. Integration of growth and development of skeletal muscle. Biochemistry, neural control mechanisms, circulatory and nutritional factors. Prenatal and neonatal differentiation of fiber types. Experimental and hereditary myopathies. Offered in alternate years. —III. Bodine, Carlson

220. General and Comparative Physiology of Reproduction (3)
Lecture—3 hours. Prerequisite: Neurobiology, Physi-ology, and Behavior 110, 110L; Biological Sciences 101, 110. Basic phenomena of sexual and asexual reproduction and comparisons of processes in a wide variety of animals; gamete formation, structure, and metabolism; fertilization; neuroendocrine mech- anisms in reproductive cycles; behavioral aspects. —III. (III.) Adams, Berger, Conley

222. Mammalian Gametogenesis and Fertilization (3)
Lecture/discussion—3 hours. Prerequisite: Neurobiol-ogy, Physiology, and Behavior 121 or the equivalent. Course will emphasize our current understanding of events in mammalian gamogene-sis and the fertilization process. Published results, conclusions drawn from these results, and their con- tribute to our understanding will be discussed. —III. (III.) Berger

230. Advanced Endocrinology (2)
Lecture—2 hours. Prerequisite: Neuroendocrinology, Physiology, and Behavior 130 or the equivalent, and graduate standing. Focus on timely topic of endo-crine research. Critical review of current literature and discussion of future research strategies in the area. May be repeated for credit when topic differs.

231. Neuroendocrinology (3)
Lecture—3 hours. Prerequisite: Neurobiology, Physi-ology, and Behavior 110 or the equivalent course in systemic physiology, Neurobiology, Physiology, and Behavior 130 or the equivalent course in endocrinol-ogy. Neural-endocrine interactions; neural regu-lation of the endocrine system, especially in relation to reproduction, the role of hormones and growth fac-tors in sexual differentiation of the brain. —II. (III.)

234. Current Topics in Neurotoxicology (3)
Lecture—3 hours. Core course in the following graduate programs: Pharmacology and Toxicology, Agricultural and Environmental Chemistry, Biotechnology, Biochemistry, Cell and Developmental Biology, Immunology, Mole- cular Cellular and Integrative Physiology or Neurosci-ence. Restricted to upper level graduate students must obtain permission from the course coordinator. General principles of neurotoxicology, the cell and molecular mechanisms and health impacts of specific neurotoxicants and the contribu-tion of neurotoxic compounds to complex neurode-velopmental disorders and neurodegenerative diseases. (Same course as Environmental Toxicology 224 and Molecular Sciences 234.) Offered in alternate years. —II. (III.) Pfeifer

242. Biological Rhythms (3)
Lecture—2 hours; lecture/discussion—1 hour. Prerequisite: Neurobiology, Physiology, and Behavior 110 or the equivalent. General aspects and basic mechanisms of biological rhythms; the importance of rhythm desynchrony in the integration of pharmacology and space medicine; telemetry; mathematical method-ods; chronometry; daily, reproductive, and annual periods; shifts and desynchrony; occupational disorders. Offered in alternate years. —I. (II.) Fuller

255. Physiology of the Stress Response (2)
Lecture/discussion—2 hours. Prerequisite: graduate student status. Discussion of Stress, Physiological mechanisms of adaptation to stress, Hormonal control of the systemic stress response; Discussion of current trends in stress physiology and current methods for studying the stress response as part of Animal Biology 255. —III. (III.) Kuetz

261A. Topics in Vision: Eyes and Retinal Mechanisms (2)
Lecture/discussion—2 hours. Prerequisite: graduate standing, Neurobiology, Physiology, and Behavior 100 or 112 or the equivalent. Structure and function of the visual system, with emphasis on the eye and retina, including optics, anatomy, transduction, retinal synapses, adaptive plasticity, and visual processing. (Same course as Neuroscience 261A and Neurobi-ology, Physiology, and Behavior 261A.) (S/U grading only.) —I, II, III. (I, II, III.)

261B. Topics in Vision: Systems, Psychophysics, Computational Models (2)
Lecture/discussion—2 hours. Prerequisite: consent of instructor; course 261A recommended. Functions of the central visual pathways and their underlying mechanisms. Recent findings in aspects of anatomy, psycho-physics, neuroscience, and genetics of the visual system. (Same course as Neuroscience 261B and Neurobi-ology, Physiology, and Behavior 261B.) (S/U grading only.) Offered in alternate years. —II, III. (II, III.)

261C. Topics in Vision: Clinical Vision Science (2)
Lecture/discussion—2 hours. Prerequisite: courses 261A and 261B, or consent of instructor. Causes and mechanism based on visual disorders. Recent research on aspects of anatomy, biochem-istry, electrophysiology, psychophysics, development, and genetics of the visual system related to disease. (Same course as Neuroscience 261C and Neurobi-ology, Physiology, and Behavior 261C.) (S/U grading only.) Offered irregularly. —III. Werner

275. Neurohumoral Regulatory Mechanisms of Thermogenesis (3)
Lecture—2 hours; discussion—1 hour. Prerequisite: Biological Sciences 104 or the equivalent; Biological Sciences 102 or the equivalent; consent of instructor. Designed for graduate and advanced undergraduate students, this course will examine thermogenic systems in homeotherms (primarily mammals) with respect to regulation (hormonal and central nervous control) and effector mechanisms (basis of heat generation at the target cell).

280. Seminar (1)
Seminar—1 hour. Discussion and critical evaluation of advanced topics and current trends in research. (S/U grading only.) —I, II, III, (I, II, III.)

290C. Research Conference in Physiology (1)
Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Presentation and discus-sion of faculty and graduate student research in physiology. May be repeated for credit. (S/U grading only.) —I, II, III, (I, II, III.)

291B. Seminar in Cellular Mechanisms of Adaptation (1)
Discussion—0.5 hour; seminar—0.5 hour. Prerequi-site: Neurobiology, Physiology, and Behavior 100B; Biological Sciences 102B. Designed for graduate and advanced undergraduate students. Review and evaluation of current literature and research in cellular adaptations to the environment. May be repeated for credit when topic differs. (S/U grading only.)

291D. Research Approaches in Physiology (2)
Seminar—2 hours. Prerequisite: graduate standing in Graduate Group in Physiology or consent of instructor. Current research in the field. May include analyses of texts and supporting evidence. May include analyses of texts and supporting evidence. May be repeated for credit. (S/U grading only.)

299. Group Study (1-5)
299. Research (1-12)
(S/U grading only)

Professional

300A-300B. Pedagogical Aspects of Physiology in Higher Education (3-3)
Lecture, discussion, or laboratory, or combination. Prerequisite: meet qualifications for teaching assis-tant in physiology. Participation as a teaching assis-tant for one quarter in a designated physiology course. Instruction in methods of leading discussion groups, laboratory sections, writing and grading quizzes, operation and use of laboratory equipment, and reading and grading laboratory reports. Course meets teaching requirements for Ph.D. program in Physiology. (S/U grading only.) —I, II, III, (I, II, III.)

390. The Teaching of Physiology (1)
Discussion—1 hour. Prerequisite: Teaching Assistant assignment to a physiology lecture course and con- sent of instructor. Practical experience in methods and problems of teaching physiology lecture courses. May include analyses of texts and support-

Academic Federation Award for Excellence in Teaching
Robert Storlina, Lecturer
Amalia Triest, B.A., Lecturer

Faculty Affiliates in Applied Music

Lois Brandwine, M.A., Lecturer (piano)
Ted Brody, B.A., Lecturer (flute)
Scott Choate, Lecturer (tuba)
Bruce Chrisp, M.M., Lecturer (trombone)
Susan Manski, Lecturer (tuba)
Phebe Craig, M.M., Lecturer (harpsichord)
Thomas Derthick, B.M., Lecturer (double bass)
Daniel Flanagan, M.M., Lecturer (soprano)
Jadon Friedholl, M.M., Lecturer (violin)
Christopher Froh, M.M., Lecturer (percussion)
Michael Goldberg, M.A., Lecturer (guitar)
David Granger, M.M., Lecturer (woodwinds)
Sam Griffin, D.M.A., Lecturer (tuba)
Ann Lavin, D.M.A., Lecturer (clarinet)
Scott Macomber, M.M., Lecturer (trumpet)
Zoila Muñoz, M.M., Lecturer (violin)
Jonathan Nadel, M.M., Lecturer (voice)
Peter Nowlen, B.M., Lecturer (French horn)
Michael Seth Orland, A.B., Lecturer (piano)
Laura Reynolds, M.M., Lecturer (oboe)
Ellen Ruth Rose, M.M., Lecturer (viola)
Rita Sahai, M.A., Lecturer (Hindustani vocal music)
Michael Sand, M.M., Lecturer (violin)
Marilyn Swan, B.M., Lecturer (piano)

The Major Program

The Bachelor of Arts degree in music provides both a broad liberal arts education and the skills necessary to explore music through its history, composition, theory, and performance. Students majoring in music may choose from three tracks for the major: (1) composition, (2) music history, theory, and ethnomusicology, or (3) performance. After a core of courses in the lower division, students pursue their chosen track with specialized courses leading to an appropriate senior project.

All majors are expected to complete a substantial project (composition, research presentation, recital) in the senior year (Music 195). Music majors who intend to pursue graduate studies in music are encouraged to satisfy the requirements of one of the honors programs in music.

Study Abroad and the Music major. The department encourages students to pursue a portion of their studies abroad. In close collaboration with their undergraduate advisors, students plan a course of study abroad that complements their coursework at Davis. UC Davis Music majors have completed upper division coursework at a number of foreign institutions in Australia, England, France, Germany, and Italy; Music faculty members lead a summer program in Argentina.

The Program. A fundamental grounding in music theory, music history, and performance during the first two years of study leads to more specialized study of composition, history, or performance during the last two years of undergraduate work.

Career Alternatives. Students who graduate with a B.A. in music from UC Davis have gone on to careers as composers and performers, in academia, and in the concert, media, and computing industries. Others have continued in medicine, law and business.

Total Units for the Major: 44-85

Note: A maximum of 19 units in performance courses (Music 131, 140-150) apply toward the degree; see Unit Credit Guidelines, College of Letters and Science degree requirements section. Faculty of the College of Letters and Science bylaws makes it possible for students to take more than 19 units of performance classes without those additional units counting toward the 225-unit cap on units:

Composition Honors: 43-47
Music 101A, 101B: 6
Music 124A, 124B: 8
Music 103: 3
Music 121 or 122: 4
Music 131 (one year): 6
At least six units selected from: Music 140-150: 6
Two quarters of Music 194H for a total of at least six units resulting in a Senior thesis: 6
Music History, Theory, and Ethnomusicology Honors: 44
Music 124A, 124B: 6
Music 121 or 122 (twice): 8
Music 131 (one year): 6
At least 6 units selected from: Music 140-150: 6
Two quarters of Music 194H for a total of at least six units resulting in a Senior thesis: 6
At least 12 further units selected from: Music 101A, 101B, 102, 108A, 108B, 113, 114, 121, 122, 192, 198, 199: 12

A student becomes eligible for graduation with honors by meeting the minimum GPA and course requirements established by the College of Letters and Science. To qualify for high or highest honors, students must also complete the Music Department honors program with a GPA of 3.500 or above and write a thesis or submit a project that meets the criteria for high or highest honors. Students apply to participate in the department honors program during the latter part of their junior year. Admission to the program is based on GPA, a thesis proposal, examples of previous writing, and the recommendation of a faculty member who is willing to sponsor the student’s project. Students who anticipate seeking admission to the honors program are urged to complete at least one offering of Music 121 or 122 before the end of their junior year. Interested students are urged to consult with faculty in their field early in their junior year.

Major Advisers: C. Reynolds (A-F), A. Triest (G-M), L. San Martin (N-Z)

Quarter Offered: I-Fall, II-Winter, III-Spring, IV-Summer; 2015-2016 offering in parentheses.

Courses in Music (MUS) Lower Division

2A. Keyboard Competence, Part 1 (2)
Performance—2 hours. Prerequisite: course 6A and 16A concurrently; consent of instructor. Training to meet the minimum piano requirements for the major in music. Harmonic progressions, and keyboard skills at the beginning of each quarter. Transfer students should take the Music 6 diagnostic exam during the first class meeting.

Beginning and transfer students are required to take Music 2A-2B-2C (Keyboard Competence) unless they can demonstrate proficiency on the piano through auditions in the Department of Music. Piano instruction is required of all majors and non-majors in the UC Davis Symphony Orchestra, University Chorus, Concert Band and Wind Ensemble, Early Music Ensemble, Baroque Chamber Orchestra, Jazz Band, world music ensembles (Gamelan, Samba School, Hindustani Vocal Ensemble, Korean Drumming Ensemble) and numerous chamber music groups in a close relationship with the Robert and Margrit Mondavi Center for the Performing Arts, where several of the ensembles are resident.

Chamber ensembles perform frequently in the popular recital series. Performance groups have collaborated with the Department of Theatre and Dance in productions of musical theater and opera. Study of instruments and voice with professional performers and teachers is required of all majors. Similar opportunities exist for qualified non-majors.

Faculty and Facilities. The faculty is noted for its achievements in a variety of areas. The music scholars are active in research, writing, and performance; the music of the composers is performed and recorded nationally and internationally. The journal, 19th-Century Music, is housed in the department.

The regular faculty is joined throughout the year by visiting Artists-in-Residence, distinguished performers who give master classes, guest lectures and who work with students informally.

The Empyrean Ensemble, a professional new music ensemble, is in residence at UC Davis, where it presents a series of concerts. Performance groups have collaborated with the Department of Theatre and Dance in productions of musical theater and opera. Study of instruments and voice with professional performers and teachers is required of all majors. Similar opportunities exist for qualified non-majors.

Focus on analysis of music by Chopin, Schumann, Liszt, and Wagner. Works of Debussy, Stravinsky, and Mahler are included. The social, historical, and cultural context of the repertory is emphasized. GE credit: ArtHum | AH—I. (I.) Triest

3A. Introduction to Music Theory, Part 1 (4)
Lecture—1 hour; recitation—3 hours. Fundamentals of music theory, ear-training, harmony, counterpoint, and analysis directed toward the development of listening and writing techniques. Intended for the general student. GE credit: ArtHum | AH—I, II, III. (I, II, III.) Triest

3B. Introduction to Music Theory, Part II (4)
Lecture—1 hour; recitation—3 hours. Prerequisite: completion of course 3A. Harmony, counterpoint, and analysis toward the development of listening and writing techniques. GE credit: ArtHum | AH—I, II, III. (I, II, III.) Triest

6A. Elementary Theory, Part 1 (3)
Lecture—3 hours. Prerequisite: Admission by examination given during first class meeting; concurrent enrollment in course 16A and 2A or demonstration of required proficiency level on diagnostic exam. Development of melodic and harmonic writing skills. Basic analysis training. Intended for the general student. GE credit: ArtHum | AH—I, II, III. (I, II, III.) Triest

6B. Elementary Theory, Part 2 (3)
Lecture—3 hours. Prerequisite: course 6A; concurrent enrollment in course 16C and 2B or demonstration of required proficiency level on diagnostic exam. Continuation of course 6A. GE credit: ArtHum | AH—I, II, III. (I, II, III.) Triest

6C. Elementary Theory, Part 3 (3)
Lecture—3 hours. Prerequisite: course 6B; concurrent enrollment in course 16C and 2C or demonstration of required proficiency level on diagnostic exam. Continuation of courses 6A-B. GE credit: ArtHum | AH—I, II, III. (I, II, III.) Nicholas

7A. Intermediate Theory, Part 1 (3)
Lecture—3 hours. Prerequisite: course 6C; 17B concurrently. Harmony of the Classical era with a focus on analysis of music by Haydn, Mozart, and Beethoven. Composition of pieces in the harmonic language of the Classical era. GE credit: ArtHum | AH—I. (I.) San Martin

7B. Intermediate Theory, Part 2 (3)

7C. Intermediate Theory, Part 3 (3)
Lecture—3 hours. Prerequisite: course 7B; 17C concurrently. The music of the first thirty years of the twentieth century and various analytical tools pertaining to it. Works of Debussy, Stravinsky, Schoenberg, Berg, and others. Composition of small pieces for solo instruments, voice and piano. Intended for Music majors. GE credit: ArtHum | AH—I, II, III. (I, II, III.) San Martin

10. Introduction to Musical Literature (4)
Lecture—3 hours; listening—1 hour. Introduction to composers and major styles of Western music. Lectures, listening sections, and selected readings. For non-majors. GE credit: ArtHum | AH—I, II, III. (I, II, III.) Hess, Levy, Polo, San Martin

11. Musics of the World (4)
Lecture—3 hours; listening section—1 hour. Survey of selected art, folk, and popular music cultures from different regions of the world. Emphasis on understanding relationship of musical style, aesthetic principles, and performance practice to wider cultural contexts. GE credit: ArtHum, Div | AH—I, II, III. (I, II, III.) Lee, Skiller

16A. Elementary Musicianship, Part 1 (2)
Lecture/laboratory—2 hours. Prerequisite: concurrent enrollment in course 6A is required; students must pass a short diagnostic exam, at the beginning of the quarter, in order to be placed in the course. The melodic, rhythmic, and harmonic materials of Western music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. GE credit: ArtHum | AH—I, II. (I, II.) Triest

16B. Elementary Musicianship, Part 2 (2)
Lecture/laboratory—2 hours. Prerequisite: concurrent enrollment in course 6B is required; course 16A or demonstration of required proficiency level on diagnostic exam. The melodic, rhythmic, and harmonic materials of Western music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. GE credit: ArtHum | AH—I, II. (I, II.) Triest

16C. Elementary Musicianship, Part 3 (2)
Lecture/laboratory—2 hours. Prerequisite: concurrent enrollment in course 6C is required; course 16B or demonstration of required proficiency level on diagnostic exam. Performance—2 hours. Prerequisite: course 6C and 16C concurrently; consent of instructor. Training to meet the minimum piano requirements for the major in music. Harmonic progressions, modulations and score reading at the piano. (P/NP grading only.) GE credit: AH—II, III. (II, III.) Triest

17A. Intermediate Musicianship, Part 1 (2)
Lecture/laboratory—2 hours. Prerequisite: course 7A concurrently; successful completion of course 16C or demonstrate required proficiency level on diagnostic exam. The melodic, rhythmic, and harmonic materials of Western music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. GE credit: ArtHum | AH—I, II. (I, II.) Triest

17B. Intermediate Musicianship, Part 2 (2)
Lecture/laboratory—2 hours. Prerequisite: course 7B concurrently; successful completion of course 17A or demonstrate required proficiency level on diagnostic exam. GE credit: ArtHum | AH—I, II. (I, II.) Craig

17C. Intermediate Musicianship, Part 3 (2)
Lecture/laboratory—2 hours. Prerequisite: course 7C concurrently; successful completion of course 17B or demonstrate required proficiency level on diagnostic exam. GE credit: ArtHum | AH—I, II. (I, II.) Craig

Quarter Offered: I—Fall, II—Winter, III—Spring, IV—Summer; 2015-2016 offering in parentheses.
107A. Computer and Electronic Music (3)
Lecture—3 hours; laboratory—1 hour. Prerequisite: consent of instructor. Studies in electronic and computer music composition. The principles and procedures of composition in various electronic media are explored through compositional exercises. Limited enrollment. GE credit: ArtHum | AH—II (I) Nichols

107B. Computer and Electronic Music (3)
Lecture—3 hours; laboratory—1 hour. Prerequisite: course 107A and consent of instructor. Continuation of course 107A. Limited enrollment. GE credit: ArtHum | AH—II (I) Nichols

108A-108B. Orchestration (2-2)
Lecture—2 hours. Prerequisite: 108A—course 7C; 108B—course 108A. Techniques of orchestration from study of basic instrumental techniques to analysis of orchestral scores and scoring for various instrumental combinations. GE credit: ArtHum | AH—III. (III) Ortiz

110A. The Music of a Major Composer: Beethoven (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 10 or 3A-3B. The work of Beethoven will be studied in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: ArtHum, Wrt | AH, VL, WE—III.

110B. The Music of a Major Composer: Stravinsky (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 10 or 3A-3B. The work of Stravinsky will be studied in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: ArtHum, Wrt | AH, VL, WC, WE—II (II) Bauer

110C. The Music of a Major Composer: Bach (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 10 or 3A-3B. The work of Bach will be studied in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: ArtHum, Wrt | AH, VL, WC, WE—II (II) San Martin

110D. The Music of a Major Composer: Mozart (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 10 or 3A-3B. The work of Mozart will be studied in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: ArtHum, Wrt | AH, VL, WC, WE—II (II) Busse Berger

110E. The Music of a Major Composer: Haydn (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 10 or 3A-3B. An overview of American concert music by master composers from Charles Ives to the present. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: ArtHum, Wrt | AH, VL, WC, WE—II (II) San Martin

110F. American Masters (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 10 or 3A-3B. An overview of American concert music by master composers from Charles Ives to the present. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: ArtHum, Wrt | AH, VL, WC, WE—II (II) Levy

110G. Music of a Major Composer—Handel (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 10 or 3A-3B. Work of Handel in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. Offered in alternate years. GE credit: ArtHum, Wrt | AH, VL, WC, WE—III (III) Thomas

113. Introduction to Conducting (2)
Lecture—1 hour; performance—1 hour. Prerequisite: consent of instructor; course 7C. Principles and techniques of conducting as they apply to both choral and instrumental ensembles. Offered irregularly. GE credit ArtHum | AH—II, II. Baldini, Thomas

114. Intermediate Conducting (2)
Lecture—1 hour; performance—1 hour. Prerequisite: course 113. Intermediate conducting with a continued focus on principles as they apply to both choral and instrumental ensembles. GE credit: ArtHum | AH—II. Baldini, Thomas

115. History of Film Music (4)
Lecture—2 hours; film viewing—2 hours. Prerequisite: courses 3A and 3B, or course 10. Film music from silent films to movies of the past decade. How music supports and shapes film narrative and structure. Use of jazz, rock and classical music in film. Offered in alternate years. GE credit: ArtHum, Wrt | AH, VL, WE—II (II) Ortiz

116. Introduction to the Music of The Beatles (4)
Lecture—2 hours; listening—1 hour. Prerequisite: course 3A; course 10; course 11; or consent of instructor. Survey of music of The Beatles, focusing on the songs of Lennon and McCartney. Emphasis on understanding their evolution as musicians, composers and cultural figures. Discussion of their musical influences in wider cultural contexts. GE credit: AH, VL, WC—III (III) Reynolds

121. Topics in Music Scholarship (4)
Seminar—4 hours. Prerequisite: courses 7C and 24C, or consent of instructor. Examination of music as its implications in other musical genres. Taught in alternate years. GE credit: ArtHum | AH, OL—II, III, III, III, III

122. Topics in Analysis and Theory (4)
Seminar—4 hours. Prerequisite: course 7C and course 24C, or consent of instructor. Analysis of works of a composer or musical style selected by the instructor and announced in advance. Consideration of theoretical issues. May be repeated for credit. GE credit: ArtHum | AH, OL—II, III, III, III, III

124A. History of Western Music: Middle Ages to 1600 (3)
Lecture—3 hours. Prerequisite: course 6C and 24C. Historical survey of composers and musical styles from the Middle Ages to the beginning of the 17th century. GE credit: ArtHum, Wrt | AH, VL, WE—II. Berger

124B. History of Western Music: 1600-1750 (3)
Lecture—3 hours. Prerequisite: course 124A. Historical survey of composers and musical styles from the late 1600s to the mid 18th century. GE credit: ArtHum, Wrt | AH, VL, WE—II. Busse Berger

126. American Music (4)
Lecture—3 hours; listening—1 hour. Prerequisite: course 10 or 3A-3B or consent of instructor. Introduction to American music from the late 1800s to the mid 1900s. GE credit: ArtHum, Wrt | AH, VL, WE—II (II) Levy

127. Music from Latin America (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: consent of instructor. Examination of music from Latin America. Characteristic music [i.e., tango, bossa nova, salsa, musica matena and Vietnamese as well as its implications in other musical genres. Taught in Spanish. Not open to students who take Spanish 171 and 171S. [Same course as Spanish 171] Offered in alternate years. GE credit: ArtHum, Div, Wrt | ACGH, AH, DD, WE—II (II) Irvin, Ortiz

129A. Musics of the Americas (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 11 or 3A-3B. Survey of music by Native American music, Hispanic polyphony, New England psalmody, and selected 20th-century composers and styles. Offered in alternate years. GE credit: ArtHum, Div, Wrt | ACGH, AH, DD, WE—II (II) Levy

129B. Music from China (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: consent of instructor. Examination of music from China. GE credit: ArtHum, Wrt | AH, VL, WE.

Quarter Offered: I—Fall, II—Winter, III—Spring, IV—Summer. 2013-2016 offering in parentheses.

Pre-Fall 2011 General Education (GE): ArtHum—Arts and Humanities; SciEng—Science and Engineering; SeSci—Social Sciences; ACGH—American Cultures; DD—Diverse Domestic; OL—Oral Skills; Q—Quantitative; SL—Scientific; VL—Visual; WC—World Cultures; WE—Writing Experience

Fall 2011 and on Revised General Education (GE): AH—Arts and Humanities; SE—Science and Engineering; SS—Social Sciences; ACGH—American Cultures; DD—Diverse Domestic; OL—Oral Skills; Q—Quantitative; SL—Scientific; VL—Visual; WC—World Cultures; WE—Writing Experience
129. Folk Musics of Europe (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 11 or 3A-3B. Survey of folk musics from all of Europe, with emphasis on the role of music in society and on the elements of music (instruments, genre, form, etc.). Introduction to ethnomusicological theory, methods, approaches. Offered irregularly. GE credit: ArtHum, Div W | AH, VI, WC, WE — Lee

Performance instruction—1 hour. Prerequisite: open to Music majors with majors only. Admission by audition and consent of instructor. Individual instruction in (A) Voice (prerequisite of course 1 or the equivalent); (B) Piano; (C) Harpsichord; (D) Organ; (E) Violin; (F) Viola; (G) Cello; (H) Double Bass; (I) Flute; (J) Oboe; (K) Clarinet; (L) Bassoon; (M) French Horn; (N) Trombone; (O) Tuba; (P) Percussion; (Q) Classical Guitar; (R) Recorder. May be repeated for credit. Offered as demand indicates. —I, II, III, (I, II, III)

132. Singing for Actors (1)
Performance instruction—1 hour. Prerequisite: consent of instructor. The elements of basic singing techniques, through selected exercises, vocalises, and songs. May be repeated for credit. (P/NP grading only.) GE credit: AH

140. University Jazz Band (2)
Rehearsal—4 hours. Prerequisite: consent of instructor. Open to students in any major. Rehearsal, study, and performance of jazz band music and full variety of jazz styles. May be repeated for credit. (P/NP grading only.) GE credit: AH —I, II, III, (I, II, III) Griffin

141. University Symphony (2)
Rehearsal—4 hours. Prerequisite: audition subject to audition before first class meeting. Open to all students in the University whose proficiency meets the requirements of concert performance. Sight-reading, rehearsal and performance of music from the orchestral literature. May be repeated for credit. (P/NP grading only.) GE credit: AH —I, II, III, (I, II, III) Baldini

142. University Chamber Singers (2)
Rehearsal—3 hours. Prerequisite: audition subject to audition before first class meeting. Rehearsal and performance of works for small choral group. May be repeated for credit. (P/NP grading only.) GE credit: AH —I, II, III, Thomas

143. University Concert Band (2)
Rehearsal—4 hours. Prerequisite: admission subject to audition before first class meeting. Open to any student in the University whose proficiency meets the requirements of concert performance. Rehearsal and performance of music for band. May be repeated for credit. (P/NP grading only.) GE credit: AH —I, II, III, (I, II, III) Janes

144. University Chorus (2)
Rehearsal—4 hours. Prerequisite: admission subject to audition before first class meeting. Open to any student in the University. Rehearsal and performance of choral music. May be repeated for credit. (P/NP grading only.) GE credit: AH —I, II, III, (I, II, III) Thomas

145. Early Music Ensemble (2)
Rehearsal—4 hours. Prerequisite: admission subject to audition before first class meeting. Rehearsal and performance of Medieval, Renaissance, and Baroque music for vocal ensemble and historical instruments. May be repeated for credit. (P/NP grading only.) GE credit: AH —I, II, III, (I, II, III)

146. Chamber Music Ensemble (1)
Rehearsal—2 hours; student practice—1 hour. Prerequisite: admission subject to audition before first class meeting. Open to any student in the University. Study, rehearsal, and performance of ensemble music for strings, winds, voice, piano, harpsichord, and organ. May be repeated for credit. (P/NP grading only.) GE credit: AH —I, II, III, (I, II, III)

147. University Wind Ensemble (2)
Rehearsal—4 hours. Prerequisite: consent of instructor. Rehearsal, study, and performance of a full variety of wind ensemble music. Students share their work in public performances. May be repeated for credit. (P/NP grading only.) GE credit: AH —I, II, III, (I, II, III) Baldini

148. Hindustani Vocal Ensemble (2)
Rehearsal—2 hours; Basics of Hindustani music through theory and practice. Fundamentals of raga (mode) and tala (rhythm) with special emphasis on improvisation, a central feature of khyal (singing style). Five ragas have been repeated up to six times for credit. (P/NP grading only.) GE credit: AH —I, II, III, (I, II, III) Sahaib

149. Indonesian Gamelan Ensemble (2)
Rehearsal—2 hours. Prerequisite: consent of instructor. Indonesian music practice. Basic instrumental technique and repertory. Focus on the music of Sundanese gamelan (tuned percussion orchestras): salendro and degung. May be repeated for credit. (P/NP grading only.) GE credit: AH —I, II, III, (I, II, III) Spiller

150. Brazilian Samba School (2)
Rehearsal—2 hours. Prerequisite: consent of instructor. Practice of Brazilian music. Basic instrumental technique and repertory. Focus on the music traditions of Rio de Janeiro and Bahia. May be repeated up to six times for credit. (P/NP grading only.) GE credit: AH —I, II, III, (I, II, III) Lee

151. Korean Percussion Ensemble (2)
Rehearsal—2 hours; listening—2 hours; practice—2 hours. Prerequisite: consent of instructor. Class size limited to 20 students. Practice of Korean percussion styles. Basic instrumental practice and repertory. Focus on the percussion traditions of samulnori and basic concepts of p'ungmul. (P/NP grading only) May be repeated six times for credit. GE credit: AH —I, II, III, (I, II, III)

192. Internship in Music (1-4)
Internship—3-12 hours. Prerequisite: consent of instructor and academic advisor or department chairperson. For Music majors. Internship outside the university related to music. May submit a written proposal to an appropriate Music Department instructor. May be repeated up to eight units of credit. (P/NP grading only.) GE credit: AH —I, II, III, IV, (I, II, III, IV) Baldini

194HA-194HB. Special Study for Honors Students (2-4)
Independent study—6-12 hours. Prerequisite: course 7C, 124B. Open only to students who qualify for the honors program and admission to Music Senior Honors Program. Preparation and presentation of a culminating project, under the supervision of an instructor, in one of the creative or scholarly areas of music. (Deferred grading only; pending completion of sequence.) GE credit: ArtHum | AH —I, II, III, (I, II, III)

195. Senior Project (2)
Project—6 hours. Prerequisite: Consent of instructor and undergraduate advisor. Preparation of a senior project in music composition (public presentation of a musical work), in music performance (a public recital), or in music history and theory (public presentation of research results). Restricted to music majors with senior standing. GE credit: ArtHum | AH —I, II, III, (I, II, III)

198. Directed Group Study (1-5)
Prerequisite: consent of instructor. (P/NP grading only.) GE credit: AH

199. Special Study for Advanced Undergraduates (1-5)
(P/NP grading only) GE credit: AH

Graduate
202. Notation (4)
Seminar—3 hours; term paper. Study of musical notation; investigation of techniques for notating Medieval and Renaissance music. —I. Busse Berger

203. Music Composition (4)
Seminar—3 hours; term paper. Technical projects that explore compositional problems, the skill and technique with which to solve them, and free composition. May be repeated for credit. —I, II, III, (I, II, III) Bauer, Ortiz, Rohde, San Martin

204. Advanced Conducting (3)
Tutorial—2 hours; practice. Prerequisite: courses 113 and 114 or equivalent; keyboard skills appropriate to graduate standing. Open to graduate students in conducting. This course covers the technical aspects of conducting and the broader issues in music theory and analysis that conductors must face before leading a rehearsal or performance. May be repeated for credit. —I, II, III, (I, II, III) Baldini, Thomas

207. Advanced Electronic and Computer Music (4)

210A. Proseminar in Music (Theory and Analysis) (4)
Seminar—3 hours; term paper. Voice-leading analyses of tonal music derived from Schenker and pitch-class set theory. Recent work on compositional design, generalizations of the concept of interval, psychologically oriented music theory, and theories of durational structure and timbre. —I. Bauer

210B. Proseminar in Music (Musicology and Criticism) (4)
Seminar—3 hours; term paper. Issues and concepts of music history, including performance practice questions for specific repertoires and periods; principles, aims, and methods of archival study; historical theory, evolution of musical styles, philosophical debates about goals and aims of the discipline in general. —III. Levy

210C. Proseminar in Music (Ethnomusicology) (4)
Seminar—3 hours; term paper. Introduction to ethnomusicology through its intellectual history, theoretical approaches, analytical techniques, and methodologies. —I. (I.) Spiller

212. Ethics of Musical Ethnography (4)
Seminar—3 hours; field course 210C. The role, methodology, perception, and assumptions of the ethnomusicologist in ethno-

The Major Program

Native American Studies provides a multi-disciplinary introduction to the indigenous cultures of North, Central, and South America. It challenges students to consider indigenous issues of cultural diversity, sovereignty, and the indigenous knowledge systems which prepared us for living in a world of constantly increasing social and cultural complexity.

The Program. Students electing a major in Native American Studies may complete Plan I, Plan II, or Plan III. Plan I enables students to concentrate chiefly upon the Native American experience in North America (north of Mexico). Plan II encourages interested students to focus upon Mexico, with some course work integrating Meso-America with North America and South America. Plan III focuses upon South America. with some course work integrating that region with areas to the north.

Career Alternatives. Native American Studies is excellent preparation for a scholarly career or an professional career such as teaching, law, human services, health, tribal administration, social work, and inter-ethnic relations. Graduate schools and agencies in these and related areas are looking for students with broad interdisciplinary preparation and who possess knowledge and sensitivity relating to ethnic issues and cultural diversity.

A.B. Major Requirements: UNITS

Preparatory Subject Matter.................16-24

Native American Studies 1; 10 or 12, 14, 16, 18, 20, 22, 24, 50, 53

Three courses from: African American and African Studies 12, 52, Anthropology 2, 20, 24, Asian American Studies 1, 2, 4, Chicana/o Studies 10, 21, 23, Comparative Literature 25, Community and Regional Development 2, Environmental Science and Policy 10, History 72, Linguistics 1, Religious Studies 90, Technocultural Studies 2, 120, 124-128, 140, 141, 142, 144, 145, 146, 147, 148

One of these courses must be completed by the end of the sophomore year. Students may not repeat these courses for credit.

III. Composition Seminar—3 hours. Analysis and analytical techniques and their application. Techniques of Analysis (4)

Topics in Ethnomusicology (4)

Emphasis on theory and methodology. Offered irregularly. —Spiller

222. Techniques of Analysis (4)

Seminar—3 hours. Analysis and analytical techniques as applied to music of all historical styles and periods. May be repeated for credit. —Ill, III, Levy, Musicology faculty

224. Independent Study (1-12)

(S/U grading only)

225. Native American Studies

Minor Program Requirements:

UNITS

Preparatory Subject Matter.................4

One or two American courses 107, 108, 110, 133, 135, 142, 191

Two courses from: African American and African Studies 12, 52, Anthropology 2, 20, 24, Asian American Studies 1, 2, 4, Chicana/o Studies 10, 21, 23, Comparative Literature 25, Community and Regional Development 2, Environmental Science and Policy 10, History 72, Linguistics 1, Religious Studies 90, Technocultural Studies 2, 120, 124-128, 140, 141, 142, 144, 145, 146, 147, 148

III. Composition Seminar—3 hours. Analysis and analytical techniques and their application. Techniques of Analysis (4)

Topics in Ethnomusicology (4)

Emphasis on theory and methodology. Offered irregularly. —Spiller

222. Techniques of Analysis (4)

Seminar—3 hours. Analysis and analytical techniques as applied to music of all historical styles and periods. May be repeated for credit. —Ill, III, Levy, Musicology faculty

224. Independent Study (1-12)

(S/U grading only)

225. Native American Studies

Minor Program Requirements:

Native American Studies 107 or 108 or 12, 14, 16, 18

One of these courses must be completed by the end of the sophomore year. Students may not repeat these courses for credit.

Areas of Specialization (complete one plan)

Plan I—North American Emphasis...........20

Native American Studies 107 or 108 or 110, 115

One course from: Native American Studies 100, 103, 136, 172, 173, 175, 176, African American and African Studies 12, 52, Anthropology 100, 102, 112, 115, 121, Chicana/o Studies 100, 110, Sociology 100, 102, 160, 162, 170, 178F, 180, 182

One other upper division Native American Studies course, selected in consultation with advisor

Plan II—Mexico-Central America Emphasis.......20

Native American Studies 107, 133 or 138

One course from: Art History 151, Native American Studies 122, 133A, 184 (Study Abroad), 185, Political Science 143B, Sociology 158, Spanish 177

Plan III—South American Emphasis...........20

Two courses from: Native American Studies 107, 110A, 110B, 110C, 110D, 120 (Study Abroad)

Two courses from: African American and African Studies 107A, 158, 160, 162, 175

One course from: Anthropology 103, 144, 175, History 162, 165, Political Science 143A, Sociology 104, Spanish 170, 170S, 171, 171S (Summer Abroad)

One course from History 163B, 164, 167, Political Science 143A

Total Units for the Major....................60-68

Major Adviser. Z. Mendoza

Major Advising. All new and prospective Native American Studies majors must see the Student Affairs Officer individually, once per year, at minimum.

Minor Program Requirements:

The Native American Studies minor provides an introduction to the Native experience in the Americas by means of exposure to course work dealing with some of the major aspects of Indian life, including history, values, politics, literature, and art.

Native American Studies.................24

Four upper division courses, at least one of which is chosen from the following groups:

One other upper division course selected in consultation with advisor.

Study Off Campus. Majors have the option of spending one to three quarters elsewhere in the Americas or on or near a reservation as part of the fulfillment of the Area of Specialization. Each student’s plan must be approved by the student’s adviser and by the chairperson and may fulfill from 12 to 20 of the 28 units required for the emphasis. The courses or field internship taken elsewhere must be focused upon indigenous peoples or indigenous languages and the institution of study shall be located in an area with substantial indigenous population. Students must have upper division standing and, for Plan I, course 107 or the equivalent should have been completed; for Plan II, courses 107 and 133 should have been completed; and for Plan III, courses 107 and 120 should have been completed prior to departure. Several options may be used for receiving academic credit, including course 195. The department strongly encourages students to participate in the UC Education Abroad Program or Short Term Programs Abroad.

Graduate Study. The Department offers a program of study leading to the M.A. and Ph.D. degrees in Native American Studies, as well as a designated emphasis in Native American Studies for graduate students in approved programs. Further information regarding graduate study may be obtained at the Department office and at Graduate Studies.

Graduate Advisers. Elisabeth Rose Middleton

Courses in Native American Studies (NAS)

Lower Division

1. Introduction to Native American Studies (4)

Lecture—3 hours; discussion—1 hour. Introduction to Native American Studies with emphasis upon basic concepts relating to Native American historical and political development. GE credit: SocSci, Div | ACGH, DD, DS, WC, WE, –I, II, III, Crum, Middleton

3.5. Introduction to Native American Literature (4)

Lecture/discussion—4 hours. Prerequisite: completion of Subject A requirement. Intensive focus on analysis of Native American literary texts, with fre-
110A. Native American Ethno-Historical Development (4)
Lecture—4 hours. Prerequisite: course 1 or 10; History 17A recommended. Study of Native American ethno-history in North America before 1770. GE credit: SocSci, Div, Wrt | ACGH, DD, SS, WC, WE. —I. Crum

110B. Native American Ethno-Historical Development (4)
Lecture/discussion—4 hours. Prerequisite: course 1; History 17A-17B recommended. Study of Native American ethno-history in North America, 1770-1890. GE credit: SocSci, Div, Wrt | ACGH, DD, SS, WC, WE. —II. Crum

110C. Native American Ethno-Historical Development (4)
Lecture/discussion—4 hours. Prerequisite: course 1; History 17A-17B recommended. Study of Native American ethno-history in North America after 1890. GE credit: SocSci, Div, Wrt | ACGH, DD, SS, WE. —III. Crum

113. Ethnohistory of Native People of Mexico and Central America (4)
Lecture/discussion—4 hours. Prerequisite: course 1, 10 or 55. Ethnohistorical development of pre-colonial, colonial, post-colonial Mexican and Central American indigenous peoples; the impact of economic and political factors on the process of cultural adaptation. Attention is given to the questions of nation-building, forced assimilation, indigenous resistance, organized political responses. GE credit: SocSci, Div, Wrt.
133A. Ethnoshistory of Native Peoples of Mexico and Central America to 1500 (4)
Lecture/discussion—4 hours; term paper. Prerequisite: course 1 or consent of instructor. Ethnoshistorical development of the indigenous peoples of Mexico and Central America up to and including the second millennium of European contact. Focus is on indigenous written historical records of the Maya, Mixtec, and Nahua peoples. May be repeated one time for credit. This course can be repeated with the student choosing a new topic for the term paper/project and for the PowerPoint presentation. The material is so extensive that more than one exposure to it can be very beneficial to students wanting to focus on ancient Mesoamerican GE credit: ArtHum or SocSci, Div | AH or SS, VL, WC, WE.—II.

133B. Ethnoshistory of Native Peoples of Mexico and Central America to 2000 (4)
Lecture/discussion—4 hours; term paper. Prerequisite: course 1 or 10, or consent of instructor. Ethnoshistory of indigenous peoples of Mexico and Central America from 1500 to contemporary times. Focus on social and cultural dynamics, particularly the role of indigenous people in the process of nation-state building in Mexico and Central America. Offered in alternate years. GE credit: ArtHum or SocSci, Div | Wrt | AH, OL, SS. WE.—II.

134. Race and Sex: Race Mixture and Mixed Peoples (4)
Lecture—4 hours. Prerequisite: one course chosen from course 10, Human Biology 5, 10, 181A, 181C. Race and sexual mixing and reproduction in indigenous peoples. Emphasizes the Americas and upon the sociocultural effects of intermixtures and on the lives of bi- and multiracial peoples. (Same course as Anthropology 134.) GE credit: ArtHum or SocSci, Div | Wrt | AH, OL, SS, WC.—II.

135. Gender Construction in Native Societies (4)
Lecture—4 hours. Prerequisite: one course from course 1, 10, Anthropology 30, Chicana/Chicano Studies 111, African American and African Studies 100 or Asian American Studies 110. The phenomena of racial, ethnic and religious intertwinings and mixing in the examination of indigenous peoples. Emphasizes the Americas and upon the sociocultural forms of intermixtures and on the lives of bi- and multiracial peoples. (Same course as Anthropology 133.) GE credit: ArtHum or SocSci, Div | Wrt | AH, OL, SS, WE.—II.

136. Orientation to Research in Native American Studies (4)
Lecture/discussion—4 hours; term paper. Prerequisite: Native American Studies major or minor, or consent of instructor. Limited enrollment. Introduction to basic research resources pertinent to Native American subjects available in the region, including libraries, archives, museums, etc. Emphasis on learning to use documentary resources or other collections of data. Students will carry out individual projects. GE credit: SocSci | ACGH, DD, SS, WE.—II. Crum

157. Native American Religion and Philosophy (4)
Lecture/discussion—4 hours. Prerequisite: upper division standing; course 1, 5, or 10. Religious and philosophical traditions of Native American/indigenous peoples of the Americas. Offered in alternate years. GE credit: ArtHum | AH, OL, WE.—Hernández-Avila

161. California Indian Environmental Policy (1)
Lecture/discussion—4 hours; term paper. Prerequisite: course 1 or Consent of instructor. California Indian environmental policy issues, with a focus on water, minerals, contamina-
nation, and alliance-building. Issues will be placed within historical and political context, drawing on theories of Native American, environmental justice, and Federal Indian law. Offered in alternate years. GE credit: ACGH, DD, SS, WE.—Middleton

162. California Indian Environmental Policy II (4)
Lecture/discussion—4 hours; term paper. Contemporary California Indian environmental policy issues, with a focus on planning, site protection, and collaborative structures developed within historical and political context, drawing on theories of Native American environmental ethics, environmental justice, and Federal Indian law. Offered in alternate years. GE credit: SocSci | ACGH, DD, SS, WE.—Middleton

180. Native American Women (4)
Lecture/discussion—4 hours. Prerequisite: course 1, 10, or Women's Studies 50. Native American women’s lives and cultural constructions of gender roles, and Native women’s contemporary feminist thought. Utilizes texts from literature, social science, and autobiography/biography. GE credit: ArtHum or SocSci | AH or SS, DD, OL, WE.—II. 181A. Native American Literature (4)
Lecture/discussion—4 hours. Prerequisite: one course from course 5, English 3, Comparative Literature 1, 2, 3. Works of fiction (short story, novel) by contemporary Native American authors, with an emphasis on writers from the United States. Offered in alternate years. GE credit: ArtHum, Wrt | AH, ACGH, AH, DD, OL, WE.—Hernández-Avila

181B. Native American Literature (4)
Lecture/discussion—4 hours. Prerequisite: one course from course 5, English 3, Comparative Literature 1, 2, 3. Works by or about Native Americans including non-fiction novels, biographies and autobiographies. Explore ways Native Americans create and recollect their culture through the creative process in literature. Examine from a critical perspective autobiographies and testimonial literature. Offered in alternate years. GE credit: ArtHum, Wrt | AH, ACGH, AH, DD, OL, WE.—Hernández-Avila

181C. Contemporary Native American Poetry (4)
Lecture—4 hours. Prerequisite: one of the following: course 5, English 3, Comparative Literature 1, 2, 3. Works of poetry by contemporary Native American/indigenous poets, with some attention to traditional cultural poetic expressions. GE credit: ArtHum, Div | Wrt | AH, DD, OL, WE.—Hernández-Avila

184. Contemporary Indigenous Literature of Mexico (4)
Lecture/discussion—4 hours. Prerequisite: course 1 or 10; course 181A or 181C recommended; reading knowledge of Spanish required. Contemporary indigenous literature of Mexico, with a focus on the genres (poetry, fiction, drama, essay); analysis of cultural, historical, and spiritual themes, imagery, styles and perspectives. BIO: the biases of and influences on the Native writers themselves. Offered irregularly. GE credit: ArtHum or SocSci | AH or SS, OL, WC.—IV. Hernández-Avila

185. Native American Literature in Performance (4)
Performance instruction—4 hours. Prerequisite: consent of instructor. Performance of contemporary Native American literature onstage, through adaptation of selected literature as well as the creation of original pieces. Offered in alternate years. May be repeated up to four units for credit GE credit: ArtHum or SocSci | AH or SS, DL, OL, WC.—Hernández-Avila

188. Special Topics in Native American Literary Studies (4)
Lecture/discussion—4 hours; term paper. Prerequisite: upper division standing and one of the following: courses 1, 181A, 181C. Special topics drawn from American literature. May be repeated for credit when topic differs. Offered irregularly. GE credit: ArtHum, Div | Wrt | AH, DD, OL, WE.—II, IV. Hernández-Avila

190. Seminar in Native American Studies (2)
Discussion—2 hours. Prerequisite: senior standing. Seminar of critical issues faced by Native American people. (P/NP grading only)

191. Topics in Native American Studies (4)
Lecture/discussion—4 hours. Prerequisite: upper division standing. Selected topics in Native American Studies related to indigenous perspectives and viewpoints from a historical, cultural, hemispheric perspective. May be repeated for credit when topic differs and/or when offered by a different instructor. Offered irregularly. GE credit: ArtHum or SocSci, Div | AH or SS, DD, OL, WE.—II, III, III. Hernández-Avila

192. Internship (1-12)
Internship—1 hour. Supervised internship in the CN Gorman Museum, community, and institutional settings related to Native American concerns. May be repeated up to 12 units for credit including 192 and other internships taken in other departments and institutions. (P/NP grading only.) GE credit: ArtHum | AH.—I, II, III, IV. Tsininháhninjéh

194HA/194HB. Special Studies for Honors Students (4-4)
Independent study—12 hours. Prerequisite: senior qualifying for honors. Directed reading, research and writing culminating in the completion of a senior honors thesis or project under direction of faculty adviser. (Deferred grading only, pending completion of sequence.)

195. Field Experience in Native American Studies (12)
Field work—36 hours. Prerequisite: senior standing and major in Native American Studies. Completion of upper division major requirements and course 161. Field work with governmental and community groups, under supervision of faculty adviser and sponsor. Knowledge acquired in other courses to be applied in field work. (P/NP grading only)—I, II, III

196. Senior Project in Native American Studies (4)
Discussion—1 hour; independent study—3 hours. Prerequisite: senior standing and major in Native American Studies, course 192 (may be taken concurrently), and consent of instructor. Guided research project that enables student to apply the theory and research principles from major course work. Final product is to be a major senior project or thesis. (P/NP grading only)—I, II, III.

197TC. Community Tutoring in Native American Studies (1-5)
Tutorial—3-15 hours. Prerequisite: consent of major committee; upper division standing with major in Native American Studies. Supervise tutoring in community. (P/NP grading only)—I, II, III.

198. Directed Group Study (1-5)
Prerequisite: upper division standing; consent of instructor. (P/NP grading only)

199. Special Study for Advanced Undergraduates (1-5)
Prerequisite: consent of instructor. (P/NP grading only)

Graduate

200. Basic Concepts in Native American Studies (4)
Seminar—4 hours. Prerequisite: graduate standing and consent of instructor. Analysis of the characteristics of the discipline of Native American Studies. Concentration is on both traditional and contemporary Native American scholarship and thought as well as the theoretical and methodological consequences derived from application of these ideas. Offered in alternate years.—II. Crum, Hernández-Avila, Middleton

202. Advanced Topics in Native American Studies (4)
Seminar—4 hours. Prerequisite: graduate standing. Advanced study of selected topics or themes relevant to the field of Native American studies. Topics will

Quarter Offered: I—Fall, II—Winter, III—Spring, IV—Summer. 2015-2016 offering in parentheses.

Fall 2011 and on Revised General Education (GE): AH | Arts and Humanities; SE | Science and Engineering; SS | Social Sciences; ACGH | American Cultures; DD | Domestic Diversity; OL | Oral Skills; QL | Quantitative; SL | Scientific; VL | Visual; WC | World Cultures; WE | Writing Experience

Native American Studies 441
207. Leadership Skills and Strategies in California Language Documentation & Revitalization (4)
Seminar—3 hours; term paper. Introduction to the indigenous languages of the Americas, with a focus on California; an examination of how contemporary Native American communities document and revitalize their heritage languages. Learn to assist and administer language programs. Offered in alternate years. —Granada

212. Community Development for Sovereignty and Autonomy (4)
Seminar—4 hours. Prerequisite: graduate standing. Examination of “deviance” in Native communities with focus on Native sovereignty in North America. Analysis of the concept of deviance from several different world views. Readings from a range of theories to incorporate varying theoretical perspectives on deviance and social control. Offered in alternate years. —Granda

213. Native Criminality and Deviance (4)
Seminar—4 hours. Prerequisite: graduate standing. Examination of “deviance” in Native communities with focus on Native criminality in North America. Analysis of the concept of deviance from several different world views. Readings from a range of theories to incorporate varying theoretical perspectives on criminality and deviance. Offered in alternate years. —Granada

217. Public Law 83-280: Colonial Termination (4)
Seminar—4 hours. Prerequisite: graduate standing, including school of law students. Examination of the signature law of the Termination Era. Public Law 83-280. Discussions to include termination, societal conformity, political consent, jurisdiction, self-determination & decolonization, and colonial relationship between Native peoples and the United States.—II, III, Crum

220. Colonialism/Racism and Self-Determination (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing. Study of imperial/colonialist systems and their psychosocial impacts upon oppressors and oppressed, of racism as the outgrowth of colonialism, and of nationalism, ethnic conflict and self-determination. Focus on indigenous peoples, but other groups will also be considered. Offered in alternate years. —Granada

224. Performance in the Americas (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing. Ethnomusical and anthropological approaches to study of public performance in the Americas. New ways of looking at music, dance, ritual and other forms of public expressive forms normally called “popular culture.” Not open for credit to students who have completed Music 224. (Former course Music 224.)—Mendoza

233. Visual Sovereignty (4)
Seminar—3 hours; film viewing—2 hours; term paper. Extensive examination of the field of contemporary Native American and Indigenous photography, film and performance through research of artworks, writings by artists, theorists, and material in museum collections. May be repeated two times for credit when topic differs. Offered in alternate years. —Tsinnahjinnie

237. Native American Art Collections and Museums (4)
Seminar—3 hours; term paper. Research and examination of regional Native American art held in museums and other public institutions, as well as privately held collections. Includes onsite viewing and research of museum collections. Offered in alternate years. —Tsinnahjinnie

240. Native American Public Health: Topics and Issues (4)
Seminar—3 hours; term paper. Introduction to Native American public health issues and contributing causal factors (including environmental justice and historical trauma); the dimensions of cultural competency in diagnosis and service provision; the structure of Native health care institutions; and debates in Native treatment modalities.—II. Middle

250. Indigenous Critique of Classic Maya Ethnographies (4)
Seminar—4 hours. Prerequisite: graduate standing or consent of instructor. Construction of the Maya world through ethnographic writing during the present century. Deconstruction of ethnographies about the Mayans considering the modern theories and social, anthropological critiques of modern ethnographies. Offered in alternate years.

280. Ethnohistorical Theory and Method (4)
Seminar—3 hours; term paper. Discussion of the ethnohistorical method; the utilization of diverse types of data, especially documentary sources, to reconstruct socio-cultural history. Particular attention to the applied area of ethnohistory in the solution of contemporary social problems. Offered in alternate years. —Granda

298. Group Study for Graduate Students (1-5)
Prerequisite: graduate standing, consent of instructor. (S/U grading only.)

299. Special Study for Graduate Students (1-12)
Prerequisite: graduate standing, consent of instructor. (S/U grading only.)

Professional

396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III

Natural Sciences

[College of Letters and Science]

Advising Center, 104 Everson Hall

Committee in Charge
Howard W. Day, Ph.D., Chair
(Earth and Planetary Sciences)
Tessa Hill, Ph.D. (Earth and Planetary Sciences)
Susan Keen, Ph.D. (Evolution and Ecology)
J. Richard Pomeroy, Chair
Neil Schore, Ph.D. (Chemistry)
David Webb, Ph.D. (Physics)

The Major Program
Natural Sciences is an interdisciplinary major that provides significant breadth in biology, chemistry, earth sciences, physics and mathematics while offering additional depth in two of the natural sciences. It is especially designed to meet the needs of prospective science teachers, but will also serve students who wish to attain higher work in more than one science. The major is sponsored by the Department of Earth and Planetary Sciences.

The Program. The Natural Sciences curriculum offers an unusually broad training in science and mathematics. All students must complete a one year sequence in a calculus, a course in statistics and one year sequence in chemistry, earth science, life science and physics. Each student will complete depth courses in two of these sciences. Prospective teachers may use these depth courses as preparation for primary and supplementary teaching credentials in science. Students who might wish to prepare for a teaching credential program should consult an advisor at their first opportunity to combine the prerequisites with General Education requirements.

Career Alternatives. Students whose goals include business, journalism, law, or medicine may acquire a broad background in science through this curriculum. The study of natural sciences also prepares a student to meet the subject matter requirements for primary and supplementary science teaching credentials in California. Students who might wish to become a teacher should consult an advisor in the Mathematics and Science Teaching Program [MAST, http://mast.ucdavis.edu] at their first opportunity. MAST advisors can help students combine the prerequisites for a science program with General Education requirements. The program also offers seminars that give participants experience in elementary, middle school, and high school classrooms.

B.S. Major Requirements:

Preparatory Subject Matter.......................... 48-74
Chemistry 2A, 2B, 2C .................................. 15
Biological Sciences 2A, 2B, 2C ................. 15
Geology 2, 3, 3L, 50I, 60 ................................ 13
Mathematics 16A, 16B, 16C or 17A, 17B, 17C or 21A, 21B, 21C .............. 9-12
Physics 7A, 7B, 7C or 9A, 9B, 9C .................. 12-15
Statistics 100 ........................................ 4

Depth Subject Matter.................................. 42
Concentration (chosen from among the four fields of concentration listed below) ...... 27
Supplementary Field; chosen from among the four fields listed below. May not include the same field as the concentration. The same course may not be used to fulfill the requirements for both a Concentration and a Supplementary Field. .... 15

Total Units for the Major .......................... 110-116

Fields of Concentration:

Chemistry ........................................... 27-36
Chemistry 105 ........................................ 4
Chemistry 107A/107B or 110A/110B ........ 110C ........................................ 6-12
Chemistry 118A/118B or 128A/128B- 129A/129B ........................................ 8-10
Chemistry 124A ...................................... 3
One course from Chemistry 100, 104, 118C, 128C ........................................ 3-4
Three units from Chemistry 197, 199 or Education/Geology 181, 183 ........ 3
Earth Science ........................................ 27
One course from Geology 107, 108, 131 ........................................ 1
Three units from Geology 199 or Education/Geology 181, 183 ........ 3
Life Science ........................................... 27-33
Chemistry 8A, 8B or 118A, 118B, 118C ........................................ 6-12
Biological Sciences 101 ................................ 4
Evolution and Ecology 100 or approved electives and Biological Sciences 105 ........................................ 8
Neurobiology, Physiology, and Behavior 101 ........................................ 5
Four units from Biological Sciences 199, Evolution and Ecology 199, Molecular and Cellular Biology 199, or Neurobiology, Physiology, and Behavior 199 or Education/Geology 181, 183 ........ 4

Supplementary Fields:

Chemistry ........................................... 15-17
Chemistry 100 ........................................ 3
Chemistry 104 or 105 ................................ 3
Chemistry 107A ...................................... 3
Chemistry 118A or 128A ......................... 3-4
Chemistry, 124A ...................................... 3
Other Chemistry or related science courses may be substituted with the prior approval of the major adviser.

Earth Science ........................................ 15
Geology 108L, 109L, 109L, 116N ........ 10
Geology 138 or 140 .................................. 4
Approved elective .................................. 1
Other Geology or related science courses may be substituted with the prior approval of the major adviser.

Life Science ........................................... 15
Biological Sciences 101* ......................... 4

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2015-2016 offering in parentheses

Pre-Fall 2011 General Education (GE): Arts and Humanities; Sciences and Engineering, Social Sciences; Div=Dominant Diversity; Wrt=Writing Experience

Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SC=Science and Engineering, SS=Social Sciences; ACH=American Cultures, DD=Dominant Diversity, OL=Oral Skills, QL=Quantitative, SL=Scientific, VL=Visual, WC=World Cultures; Wrt=Writing Experience

Nature and Culture

This major was discontinued effective June 30, 2011.

Courses in Nature and Culture (NAC)

Upper Division

192. Internship in Nature and Culture (1-12)
Internship—3.36 hours. Prerequisite: course 1.
Internship in natural sciences, social sciences, or humanities on or off campus in which students use and improve their interdisciplinary skills and perspectives gained through the Nature and Culture curriculum. Supervised by a faculty member. May be repeated for credit. (P/NP grading only.)

Nematology

Please see the department of Entomology and Nematology, on page 293, for further information.

(College of Agricultural and Environmental Sciences)

Michael Parella, Ph.D., Chairperson of the Department
Edwin Lewis, Ph.D., Vice Chairperson of the Department
Department Office, 367 Briggs; 530-752-0300

Faculty
Edward P. Caswell-Chen, Ph.D., Professor
Howard Ferris, Ph.D., Professor
Edwin Lewis, Professor
Steven A. Nadler, Ph.D., Professor
Beechy B. Werder, Ph.D., Professor

Emeriti Faculty
Bruce A. Jaffe, Ph.D., Professor Emeritus
Harry K. Kaya, Ph.D., Professor (Entomology)

Minor Program Requirements:

UNITS
Nematology .................................................. 18-20
Nematology 100, 110, and Soil Science 100 .................................................. 10
Two or three courses from one of the following areas: .................................................. 8-10
(a) Plant Science: Microbiology 102; Entomology 100, 135, 153, 156, 156L; Evolution and Ecology 112; Plant Pathology 120, 148; Plant Biology 121; Soil Science 111, 112

(b) Entomology: One upper division Entomology course; Evolution and Ecology 112; Microbial Plant Biology 102; Plant Pathology 120, 148; Soil Science 102, 111, 112

Minor Adviser. S. Lawler

Graduate Study. Graduate degrees specializing in Nematology are offered through the Departments of Entomology and Plant Pathology and through various Graduate Groups (Biochemistry, Ecology, Genetics, Plant Protection, and Pest Management). Refer also to the Graduate Studies chapter of this catalog.

Courses in Nematology (NEM)

Related Courses. See Entomology and Nematology, on page 293.

10V. General Biology (4)
Web virtual lecture—3 hours; web electronic discussion—1 hour. Concepts and issues in biology. Emphasis on composition and structure of organisms; regulation and signaling; heredity, evolution and the interaction and interdependence among life forms and their environments. Significant writing is required. Designed for students not specializing in biology. Not open for credit to students who have completed course Biological Sciences 1A, 1B, 2A, 2B, 2C or 10. (Same course as Biological Sciences 10V.) GE credit: SciEng, Writ | SE, SL, WE, — Ill. (III.) Westerdahl

Upper Division

100. General Plant Nematology (4)
Lecture—2 hours; laboratory—6 hours. Prerequisite: Biological Sciences 1B or 10. An introduction to the classification, morphology, biology, and control of the nematodes attacking cultivated crops. GE credit: SciEng | SE— II. (I.) Ferris

110. Introduction to Nematology (2)
Lecture—2 hours. Prerequisite: Biological Sciences 1B or the equivalent or consent of instructor. The relationship of nematodes to human environment. Classification, morphology, ecology, distribution, and importance of nematodes occurring in water and soil as parasites of plants and animals. GE credit: SciEng | SE—II. (I.) Caswell-Chen, Nadler

199. Special Study for Advanced Undergraduates (1-5)
Prerequisite: consent of instructor. (P/NP grading only.)

Graduate

201. Molecular and Physiological Plant Nematology (2)
Lecture—1 hour; discussion—1 hour. Prerequisite: Biological Sciences 101; Plant Pathology 120, course 100 or 110. Molecular biology and physiology of nematodes using Caenorhabditis elegans as a model, but with emphasis on plant-parasitic species. Plant responses to nematodes. Discussion of current literature emphasized. Offered in alternate years.—II. Williamson

203. Ecology of Parasitic Nematodes (2)
Lecture—1 hour; discussion—1 hour. Prerequisite: course 100 or 110 or Entomology 156; Evolution and Ecology 101 or Plant Biology 117. Major concepts in population and community ecology of animal and plant-parasitic nematodes. Current advances in techniques, theory, and basic information about nematode host dynamics, and application to management of nematode diseases. Offered in alternate years.—(III.) Caswell-Chen

204. Management of Plant-Parasitic Nematodes (2)
Lecture—1 hour; laboratory—3 hours. Prerequisite: course 100 or 110. Theory, foundation, principles and practices of nematode management. Techniques and equipment used to manage nematodes and methods used to analyze their effectiveness. Offered in alternate years.—II. Westerdahl

205. Insect Nematology and Biological Control (2)
Lecture—1 hour; discussion—1 hour. Prerequisite: courses 100 and 110, Entomology 100 or 110. The biology of insect-parasitic nematodes, their effect on the host, and their potential as biological control agents of insect and other invertebrate pests. Application of ecological theory in classical and augmentative biological control. Offered in alternate years.—(I.) Kaya, Lewis

206. Nematode Systematics and Evolution (2)
Lecture—1 hour; laboratory—3 hours. Prerequisite: course 100 or 110 or Entomology 156; Evolution and Ecology 100 recommended. Nematode diversity as revealed by morphological and molecular evidence. Laboratory experience focuses on structural features used in taxonomy. Phylogenetic relationships based on morphological and molecular data used to construct patterns of character change among taxa. Offered in alternate years.—(I.) Nadler

210. Molecular Phylogenetic Analysis (3)
Lecture—2 hours; laboratory—3 hours. Theory and practice of inferring phylogenetic trees using molecular sequence data. Practical techniques for obtaining sequence data, advantages and disadvantages of common approaches for inferring trees, statistical methods for comparing alternative hypotheses. (Same course as Evolution and Ecology 210.) Offered in alternate years.—(II.) Nadler

245. Field Nematology (1)
Fieldwork—6 days. Prerequisite: course 100. Six-day demonstration and field study in applied nematology including diagnosis and prediction of nematode field problem strategies for control field demonstration design, and establishment in association with diverse California crops. (S/U grading only.)—I. (I.)

290. Seminar (1)
Seminar—1 hour. (S/U grading only.)—II, III, (II, III.)

299. Advanced Research Conference (1)
Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Planning and results of research programs, proposals, and experiments. Discussion and critical evaluation of original research being conducted by the group. Discussion led by individual research instructors for research group. (S/U grading only.)

298. Group Study (1-5)
(S/U grading only.)

299. Research (1-12)
(S/U grading only.)

Neurobiology, Physiology, and Behavior

Pre-Fall 2011 General Education (GE): AH=Arts and Humanities; SCI=Science and Engineering; SS=Social Sciences; ACGH=American Cultures; DD=Dominant Diversity; Writ=Writing Experience
Pre-Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SCI=Science and Engineering; SS=Social Sciences; ACGH=American Cultures; DD=Dominant Diversity; OL=Oral Skills; QL=Quantitative; SL=Scientific; VL=Visual; WC=World Cultures; Writ=Writing Experience
Exercise biology deals with the mechanisms and adaptive effects of physical activity (and inactivity). We examine consequences of activity from the molecular to the organismal (human ecological) level. We have unique and dedicated faculty for the Bachelor of Arts program, which provides a greater breadth of knowledge in the humanities and social sciences and is more appropriate for those who wish to apply their knowledge within the human community. The Bachelor of Science program is appropriate for students who desire a strong preparation in human biology.

Advising and Career Alternatives. Meet with an Exercise Biology staff advisor in the Biology Academic Success Center (BASC); 1023 Sciences Laboratory Building; 530-752-0410; http://www.biosci.ucdavis.edu/BASC, to learn more about the best course sequences to take to prepare you for careers in basic science or applied exercise physiology, or biomechanics; for graduate study in exercise physiology or biomechanics; or for professional programs in medicine, or physical therapy, athletic training or occupational therapy. Students with further academic or professional interests in medicine and other health sciences, community service, business, sales, communications, education or coaching might find the Bachelor of Arts program attractive. The Bachelor of Science could lead to further graduate study in any field related to human biology as well as careers in medicine and other health sciences (e.g., exercise physiology, biomechanics and biomedical engineering and medical equipment and pharmaceutical development and sales.

A.B. Major Requirements:

- Preparatory Subject Matter .................. 37-40
  - Biological Sciences 2A-2B-2C .............. 14
  - Chemistry 2A, 2B ........................... 10
  - Physics 1A-1B or 7A-7B .................... 6-8
  - Psychology 1 ....................... 4
  - Statistics 13, 32, 100, or 102 .......... 3-4
  - Psychology 41 recommended

Depth Subject Matter .................. 40-45

- Biological Sciences 101 ..................... 4
- Neurobiology, Physiology, and Behavior 101 ............... 5
- Exercise Biology 106 and 106L ......... 7
- Exercise Biology 111, 112, 113, 117 .... 15
- One additional upper division course in Exercise Biology ............ 3-4
- Select one additional course from two of the three content areas listed below: .... 6-10
  - Sociology and Culture option: African American and African Studies 100; Anthropology 101; Communication 165; Community Development 176; Exercise Biology 120; History 178B; Science and Society 105, 120; Science and Technology Studies 150; Sociology 122, 154, 159, 177
  - History and Philosophy option: American 141; History 135A, 135B, 136, 139A, 139B, 185A; Philosophy 108; Science and Technology Studies 131
  - Psychology and Communication option: Agricultural and Resource Economics 112, Communication 134, 136; Exercise Biology 121, 122; Human Development 100C; Psychology 101, 121, 126, 140.

No variable unit courses or Exercise Biology 148, 148L may be used to fulfill these requirements. Consult your adviser regularly.

Total Units for the Major .................. 105-128

Minor Requirements:

- Exercise Biology ............................ 18

At least 15 upper division units in exercise biology from the following courses: Exercise Biology 101, 102, 103, 110, 111, 112, 113, 115, 124, 126, 127, 128
- Exercise Biology or other approved course: An additional three upper division units from either the previous list of Exercise Biology courses or the following courses: Exercise Biology 106; Neurobiology, Physiology, and Behavior 101; Biological Sciences, 101, 104, 105

Master Adviser. Paul Saltzsky for the Exercise Biology Major and Exercise Biology Minor

The Neurobiology, Physiology, and Behavior Major Program

Neurobiology, Physiology, and Behavior is a major that emphasizes the understanding of vital functions common to all animals. All animals perform certain basic functions—they grow, reproduce, move, respond to stimuli, and maintain homeostasis. The physiological mechanisms upon which these functions depend are precisely regulated and highly integrated. Actions of the nervous and endocrine systems determine behavior and the interaction between organisms and their physical and social environments. Students in this major study functional mechanisms; the control, regulation, and integration of these mechanisms; and the behavior that relates to those mechanisms. They do so at the level of the cell, the organism, and the system.

The Program. In the freshman and sophomore years, students majoring in Neurobiology, Physiology, and Behavior build a broad scientific background, taking courses in biology, biochemistry, physics, and mathematics. As juniors or seniors, students can enroll in a variety of Neurobiology, Physiology, and Behavior courses and related upper division courses. Students can participate in a number of advanced laboratory courses or may design an individual, independent project guided by a member of the faculty.

Quarter Offered: Fall, Winter, Spring, Summer; 2015-2016 offering in parentheses

Pre-Fall 2011 General Education (Gen) Courses: AH = Arts and Humanities; SE = Social Sciences; Div = Domestic Diversity; WC = World Cultures; WE = Writing Experience

Fall 2011 and on Revised General Education (Gen): AH = Arts and Humanities; SE = Social Sciences; Div = Domestic Diversity; WC = World Cultures; WE = Writing Experience
Career Alternatives. Completion of the Neurobiology, Physiology, and Behavior major provides the foundation for advanced study leading to careers in high school teaching, college level teaching or research. It also serves as the basis for further training in the health professions, including but not limited to: Pharmacy, medicine, medical technology, physical therapy, pharmacy, nursing, dentistry and optometry. The major is also appropriate for those intending to seek careers in biotechnology or other biologically related industries.

Courses in Exercise Biology (EXB)

Lower Division

10. Exercise and Fitness: Principles and Practice

Lecture—3 hours. Human movement from physiological, psychological, sociological, and historical perspectives. Biology and psychology of exercise across the human lifespan. Not open for credit to students who have completed an upper division Exercise Biology course.

Graduate Study. Information on graduate study in neurosciences, physiology or behavior may be obtained by writing to Graduate Advisor, College of Biological Sciences, Graduate Academic Programs. See also the graduate course offerings listed under Animal Behavior (A Graduate Group), on page 149, Molecular, Cellular, and Integrative Physiology (A Graduate Group), on page 433, Neurosciences, on page 450 and Physiology, on page 471. See also Graduate Studies, on page 111.

Courses in Exercise Biology (EXB)
Neurobiology, Physiology, and Behavior

extensive hands-on experience. [Same course as Cell Biology and Human Anatomy 101L] GE credit: SciEng | SE—II. (III.) Gomes

110. Exercise Metabolism (3)
Lecture—3 hours. Prerequisite: course 101 or Neurobiology, Physiology and Behavior 101. Exercise metabolism, with emphasis on skeletal muscle and cardiovascular responses during activity and inactivity. Basics of bioenergetics, substrate utilization, and cell signaling; mechanisms that regulate these properties, and differences between skeletal muscle and cardiac muscle. GE credit: SciEng | SE—II. (III.) Shaffrath

111. Environmental Effects on Physical Performance (3)
Lecture—2 hours; discussion/laboratory—3 hours. Prerequisite: courses 101 or consent of instructor. The effects of thermal, barometric and gravitational conditions on physiological function and physical performance of humans. Acute and chronic effects, emphasizing physiological adaptations and limitations, will be studied. GE credit: SciEng | QR, SE—II. (III.) Shaffrath

112. Clinical Exercise Physiology (4)
Lecture—3 hours; laboratory/discussion—3 hours. Prerequisite: courses 101 or consent of instructor. Physical activity as a therapeutic modality in normal and diseased populations (cardiovascular, pulmonary, diabetic). Effects of exercise and inactivity in terms of normal physiology, pathophysiology, and therapeutic benefit. Exercise fitness and disease assessment methods. GE credit: SciEng | SE, SL—II. (III.) Harris, Shaffrath

113. Growth and Development in Human Performance (3)
Lecture—3 hours. Prerequisite: Cell Biology and Human Anatomy 101, and Neurobiology, Physiology, and Behavior 101. Development of human performance potential from conception to old age, including influence of exercise, athletic participation, and preventive medicine. Alterations in motor skill patterns, morphology, and body composition, and physiological capacities with aging. GE credit: SciEng | SE

115. Biomechanical Bases of Movement (3)
Lecture—2 hours; laboratory—3 hours to alternate weekly with discussion—1 hour. Prerequisite: course 103 or consent of instructor. Biomechanical bases of human movement investigated; topics include musculo-skeletal mechanics, tissue mechanics, electromyography, and measurement and analysis techniques. Application to clinical, and work environments, including extensive analysis of locomotion. GE credit: SciEng | QR, SE, VL, WE—II. (I) Liets

116. Nutrition for Physically Active Persons (3)
Lecture—3 hours. Prerequisite: course 101, Neurobiology, Physiology, and Behavior 101. The role of nutrition and exercise in modifying metabolism, body composition, performance, and health of humans. GE credit: SciEng | SE

117. Exercise and Aging in Health and Disease (3)
Lecture—2 hours; discussion—1 hour. Prerequisite: course 101 or consent of instructor. Exercise physiology and standard therapy for various diseases associated with aging (e.g., cardiovascular, pulmonary, and renal diseases, diabetes, obesity, lipemias, etc.). Exercise will be considered as a protective and/or therapeutic modality. GE credit: SciEng | SE—II. (III.) Shaffrath

120. Sport in American Society (3)
Lecture—3 hours. Sociological approaches to the study of sport. [II.] Contemporary American culture, including sport interaction with politics, economics, religion, gender, race, media and ethics. Socialization factors involving youth, scholastic, collegiate, and Olympic sport. [Same course as Physical Education 120] GE credit: SocSci, Div | SS—II. (III.) Ditterich

121. Advanced Sport Psychology (3)
Lecture—3 hours. Prerequisite: course 102, Psychol 1 recommended. Advanced study and consideration of major theoretical and practical issues in sport psychology. Emphasis on practical application to sport and human performance. —Salitsky

122. Psychological Effects of Physical Activity (3)
Lecture—3 hours. Prerequisite: Psychology 1; upper division standing. Physical activity is evaluated in terms of its ability to enhance the quality of life. Topics studied include: individual factors (self-concept, type A), special populations (elderly, cardiovascu-lar); and mental health changes (depression, anxie-ty). —Salitsky

124. Physiology of Maximal Human Performance (3)
Lecture—3 hours, practice—4 hours. Prerequisite: course 101 or permission of instructor; Biological Sciences 101, 102, and 103 recommended. Molecular mechanisms underlying adaptation to training. Learning how to exercise to their maximal potential as well as learning how the frequency, intensity and timing of exercise and nutrition affect the molecular signals that underlie performance. GE credit: SciEng | SE—II. (III.) Shaffrath

125. Neuromuscular and Behavioral Aspects of Motor Control (3)
Lecture—2 hours; lecture/discussion—2 hours. Prerequisite: course 101. Factors which affect control of movement from psychological, physiological, behavioral, and mechanical viewpoints. Topics include central vs. peripheral control mechanisms, open and closed loop theories, motor programming, cognition, learning and memory, and effects of bio-chemical and biomechanical influences. GE credit: SciEng | SE—II. (III.) Bodine

126. Tissue Mechanics (3)
Lecture—2 hours; laboratory/discussion—3 hours. Prerequisite: course 103 or Engineering 45 or consent of instructor. Structural and mechanical properties of biological tissues including bone, cartilage, ligaments, tendons, nerves, and skeletal muscle. [Same course as Biomedical Engineering 126.] GE credit: SciEng | QR, SE, SL, WE—II. (III.) Hawkins

148L. Adult Fitness Testing Laboratory (1)
Lecture—3 hours. Prerequisite: courses 148 (concurrently). Testing asymptomatic or pre-existing conditions such as cardiovascular, pulmonary, metabolic and musculoskeletal abnormalities. GE credit: SciEng | SE—II. (III.) Casazza

148L. Adult Fitness Testing Laboratory (1)
Lecture—3 hours. Prerequisite: courses 148 (concurrently). Testing asymptomatic or pre-existing conditions such as cardiovascular, pulmonary, metabolic and musculoskeletal abnormalities. GE credit: SciEng | SE—II. (III.) Casazza

179. Froehlich Research Project (3)
Lecture—2 hours; discussion—1 hour. Prerequisite: courses 101, 102 and 103 (may be taken concurrently); 104L recommended. Lectures by leading authorities and discussion of the latest research in newly emerging areas in exercise biology. Offered every fourth year. GE credit: SciEng | SE—II. (III.)

189. International Perspectives in Exercise Biology (4)
Lecture—4 hours. Prerequisite: course 10 or upper division standing required. Prerequisite: consent of instructor; students will be accepted based upon academic merit, personal experience, and academic discipline in order to provide multidisciplinary perspectives. Comparative case studies/ exercise issues between the US and an international location. Identify political, economic, cultural, technological and environmental issues that impact human exer-cise, physical activity, wellness, and sport from a global perspective. Limited enrollment. Offered irreg-ularly.

190C. Research Conference (1)
Discussion—1 hour. Prerequisite: upper division standing in Exercise Biology or related biological science and consent of instructor. Fulfillment in course 199. Research findings and methods in exercise biology. Presentation and discussion of research by faculty and students. May be repeated for credit. [P/NP grading only.]—I, II, III. (I, II, III.)

192. Exercise Biology Internship (1-12)
Internship—3-36 hours. Prerequisite: consent of instructor, dependent on availability of intern positions. Work experience in the application of physical activity programs to teaching, recreational, clinical or research situations under program faculty supervision. Written report required. May be repeated up to 15 units of credit, including course 99. [P/NP grading only.]—I, II, III. (I, II, III.)

194H. Research Honors (2)
Independent study—6 hours. Prerequisite: senior standing, minimum of 6 units of course 199, 3.500 GPA or greater in major courses, consent of honors theses advisor. Preparation and completion of individual honors research project in Exercise Biology, under the guidance of an Exercise Biology faculty adviser, culminating in written honors thesis. [P/NP grading only.] GE credit: SE—II. (III.)

197T. Tutoring in Exercise Biology (1-5)
Tutorial—3-15 hours. Prerequisite: upper division standing and consent of instructor. Assisting the instructor by tutoring students in exercise biology course-related projects. May be repeated up to 10 units of credit including courses 97T, 97TC and 197T. No tutorial units will be counted towards the Exercise Biology major. [P/NP grading only.]—I, II, III. (I, II, III.)

197TC. Tutoring Exercise Biology in the Community (1-5)
Tutorial—3-15 hours. Prerequisite: consent of instructor and chairperson. Tutoring in the community in exercise biology related projects. May be repeated up to 10 units of credit including courses 97T, 97TC, 197T. [P/NP grading only.]—I, II, III. (I, II, III.)

198. Directed Group Study (1-5)
Prerequisite: consent of instructor and chairperson. [P/NP grading only.] GE credit: SE—II. (III.)

199. Special Study for Advanced Undergraduates (1-5)
Prerequisite: consent of chairperson. [P/NP grading only.]—I, II, III. (I, II, III.)

Courses in Neurobiology, Physiology, and Behavior (NPB)

Lower Division

10. Elementary Human Physiology (3)
Lecture—3 hours. Introduction to physiology for non-science majors. Includes basic cell physiology and survey of major organ systems and how they function in homeostasis and human health. Not open for credit to students who have completed course 101. GE credit: SciEng | SE—II. (III.) Bautista, Mogilner

12. The Human Brain and Disease (3)
Lecture—3 hours. Normal function and diseases of the human brain and nervous system. Diseases discussed include Parkinson’s, Alzheimer’s, leprosy, amnesia and schizophrenia. Intended for non-science majors. Not open for credit to students who have completed courses 100, 101, 112, or Psychology 121. GE credit: SciEng. [I. (I) Cheng, Recan-za]

14. Illusions: Fooling the Brain (3)
Lecture—3 hours. Introduction to perceptual processing in the human nervous system; illusions. GE credit: SciEng | QR, SE, SL—II. (III.) Ditterich
15. The Biology and Physiology of Aging (4)
Lecture—3 hours; discussion—1 hour. Broad examination of age-associated changes in body functions. Includes basic cell physiology, a survey of major organ systems and the age-induced alterations in system function. System age-associated diseases will also be examined. Not open for credit to students who have completed course 15V. GE credit: SciEng | SE.

15V. The Biology and Physiology of Aging (4)

68. Biology of Drug Addiction and Abuse (3)
Lecture—3 hours. Broad examination of addictive substances and their use/abuse. Topics include historical perspective, physiological effects, etiology, neurobiology of addiction and the impact of drugs on cognitive function and behavior. Intended for non-science majors. Not open for credit to students who have completed course 168. GE credit: SciEng. (III.) Bautista.

90A. Lower Division Seminar: Issues in Body Weight Regulation (2)
Seminar—2 hours. Prerequisite: lower division standing. Discussion of critical examination of issues in body weight regulation through shared readings, discussions, written assignments, debates and oral presentations. Limited enrollment.—C. Warden.

90B. Human Color Perception (2)
Seminar—2 hours, term paper. Prerequisite: lower division standing. The neural determinants of color appearance, and why we see the world in the way we do. Discussions center around demonstrations of color phenomena and what they tell us about the human brain. Limited enrollment.—Werner.

90C. Current Issues in Animal Behavior (2)
Seminar—2 hours. Prerequisite: lower division standing. The mechanisms and outcomes of sexual selection (male choice and mate competition). Theory, current models and evidence that supports or refutes the models. Limited enrollment.—II. (II.) Hedrick.

90D. Lower Division Seminar: Current Issues in Reproductive Endocrinology (2)
Seminar—2 hours. Prerequisite: lower division standing. The integrative roles of reproductive hormones in mammalian reproduction and health. Current theory and models regarding hormone function and use in reproductive health and contraception, and evidence that supports or refutes the models. Offered irregularly.

90E. Biology of Aging (2)

90F. Visual Impairment and Blindness: A World Wide Problem (2)
Seminar—2 hours. Prerequisite: lower division standing. Examination of various abnormalities of the eye and the important geographic and cultural factors that influence the epidemiology of those abnormalities. Offered irregularly.

91C. Research Conference (1)
Discussion—1 hour. Prerequisite: Lower division standing in Neurobiology, Physiology, and Behavior related biological science and consent of instructor; concurrent enrollment in course 99. Research findings and methods in neurobiology; physiology, and/or behavior. Presentation and discussion of research by faculty and students. (P/NP grading only)—II, III, IV.

92. Internship (1-12)
Internship—3-36 hours. Prerequisite: lower division standing; consent of instructor. Work experience off and on campus in all subject areas offered in the Department of Neurobiology, Physiology, and Behavior. Internships supervised by a member of the faculty. May be repeated for credit. (P/NP grading only)—I, II, III, IV.

98. Directed Group Study (1-5)
Prerequisite: lower division standing and consent of instructor. (P/NP grading only)—I, II, III, IV.

99. Special Study for Undergraduates (1-5)
Prerequisite: lower division standing and consent of instructor. (P/NP grading only)—I, II, III, IV.

Upper Division

100. Neurobiology (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 1AB or 2ABC, Physics 9 ABC or 7ABC. Brains and nervous systems, neurons and neural circuits. Coordination of movement. Development of nervous systems. Vision, hearing, and feature extraction by the central nervous system. The cell biology of plasticity and memory. Not open for credit to students who have completed course 112, 160, 161 or 162, or Neuroscience 221 or 222. GE credit: VL—I, II, III, IV. (I, II, III, IV.) Carstens, Cheng, Miller, Sutter, Zito.

100L. Neurobiology Laboratory (3)
Lecture—1 hour; laboratory—3 hours; extensive writing or discussion. Prerequisite: course 100 (may be taken concurrently). Experimental basis of neurobiology principles. Course 100. Topics include neurophysiology, sensory systems, motor systems, cellular neuroscience, cognitive neuroscience, and quantitative data analysis and modeling techniques. GE credit: SciEng | SE—II. (II.) Goldmann, Suter.

101. Systemic Physiology (5)
Lecture—5 hours. Prerequisite: Biological Sciences 1A, or 2A and Chemistry 2B, Physics 18 or 7C strongly recommended. Systemic physiology with emphasis on aspects of human physiology. Functions of major organ systems and the structure of those systems described as a basis for understanding the functions. GE credit: SciEng | SE—II. (II, III, IV.) Bautista, Debello, Fuller, Furrow, Gomes, Ishida, Liets, Urey, Weidner.

101L. Systemic Physiology Laboratory (3)
Laboratory—3 hours; discussion—2 hours; term paper. Prerequisite: course 101. Selected experiments to illustrate functional characteristics of organ systems discussed in course 101. (I, II, III, IV.) Bautista, Liets.

102. Animal Behavior (3)
Lecture—3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C, or 2A, 2B, 2C. Basic principles of behavioral organization in vertebrate and invertebrate animals. Underlying physiological and ethological mechanisms. The evolution of behavior, with special emphasis on behavior under natural conditions. Not open for credit to students who have completed course 155. (Former course 155.) GE credit: SL—II, III. (II, III.) Britten, Hahn, Nevitt.

102G. Quantitative Topics in Animal Behavior (3)
Lecture—1.5 hours; extensive problem solving—1.5 hours. Prerequisite: Mathematics 16B; course 102 (may be taken concurrently). Study of the quantitative concepts and exemplar models used in animal behavior. Offered irregularly. GE credit: SciEng—II. (II.) Hahn.

103. Cellular Physiology/Neurobiology (3)
Lecture—3 hours. Prerequisite: Biological Sciences 103 or 105, and 104; Physics 7C recommended. Cellular physiology with emphasis on membrane transport processes of neurobiology. Fundamental physical-chemical and biological mechanisms of membrane transport will be considered in relation to cytoplasmic homeostasis, communication between cells, and the cellular mechanisms of sensory and motor transduction. Not open for credit to students who have completed course 100B (Former course 100B.) Offered irregularly.

104L. Cellular Physiology/Neurobiology Laboratory (4)
Lecture—1 hour; laboratory—3 hours; discussion—1 hour; term paper or discussion. Prerequisite: courses 101 and 101L. Biological Sciences 103 or 105. Experiments in the physical and chemical processes of cells and tissues. GE credit: Wrt—II. (II.) Horwitz.

105. Introduction to Computer Models (4)
Lecture—3 hours; lecture/laboratory—1 hour. Prerequisite: Mathematics 16C or the equivalent, Physics 7C, Chemistry 2C, or course 100 or 101. Introduction to the ideas, mathematical techniques and computer tools required for developing models of cellular processes in physiology and neurobiology. Applications include cellular, ion channel, action potentials, Ca2+ oscillations, respiration, and muscle contraction. Offered irregularly.

106. Experiments in Neurobiology, Physiology, and Behavior: Design and Execution (3)
Lecture—7.5 hours; discussion—0.5 hours. Prerequisite: course 100 or 101 or 102, and 199 and consent of instructor. Design and execution of experiments in neurobiology, physiology, and/or behavior. Students choose criteria and designs in consultation with the sponsoring faculty member. May be repeated one time for credit to complete the project, with consent of instructor. An additional repeat is permitted for a different project under the guidance of another faculty member. (P/NP grading only.) GE credit: OL, QL, VL, WE—II, III, IV. (I, II, III, IV.) Rosenquist.

107. Cell Signaling in Health and Disease (3)
Lecture—3 hours. Prerequisite: Biological Sciences 102 or 105. Basics of cell signaling pathways, their disruption in disease, and their current utility and future potential as therapeutic targets. Emphasis on signaling pathways specific to nervous, endocrine and immune systems, and those fundamental to all cells. GE credit: SL—II. (II.) Trimmer.

111C. Advanced Systemic Physiology Laboratory (3)
Lecture—1 hour; laboratory—6 hours. Prerequisite: courses 101, 101L, Statistics 13; course 112, 113, or 114 recommended. Interfacing physiological recording equipment with computer systems; data acquisition and analysis using the microcomputer; data interpretation within the framework of physiological and/or behavioral concepts. Offered irregularly. GE credit: QL, VL, WE.

111L. Advanced Systemic Physiology Laboratory (4)
Lecture—1 hour; discussion—2 hours; laboratory—6 hours. Term paper. Prerequisite: courses 101 and 101L. Selected comprehensive experiments in the autonomic nervous system and the cardiovascular, respiratory, and neuromuscular systems. Emphasis on conceptual and methodological approaches in demonstrating the physiology of organ systems. GE credit: Wrt—II. (II.) Liets.

112. Neuroscience (3)
Lecture—3 hours. Prerequisite: course 100 or 101. Presentation of concepts in neuroscience including sensory systems, motor systems, and higher neural integration. Emphasis on mammalian nervous system. Offered irregularly. GE credit: SL.
113. Cardiovascular, Respiratory, and Renal Physiology (4)
Lecture—3 hours. Prerequisite: course 101; Biological Sciences 105 or 103 recommended. An intense and advanced presentation of concepts in cardiovascular, respiratory, and renal physiology including discussions of base balance.

114. Comparative Physiology I (3)
Lecture—3 hours. Prerequisite: course 101; Biological Sciences 105 or 103 recommended. Gastrointestinal Physiology (3) cardiovascular, respiratory, and renal physiology try 8B, Physics 7B and 7C recommended. An introduction to the fundamental relationships between hormones and various behaviors engaged in by the organism during its lifetime. Role of hormones in behavioral homeostasis, social behavior, reproductive behavior, parental behavior, adaptation to stress. (Same course as Physiology 123.)—II. (Ill.) Bale, Furlow, Hahn, Trainer, Wingfield

115. Avian Physiology (3)
Lecture—3 hours. Prerequisite: Biological Sciences 18, or 2A and Chemistry 2B; course 101 strongly recommended. Physiology of the various systems of birds with emphasis on digestion, respiration, excretion, and endocrine systems. —II. (III.) Hahn, Klaising

121. Biology of Reproduction (4)
Lecture—4 hours. Prerequisite: course 101. Physiological mechanisms related to reproduction, breeding efficiency with special reference to domestic animals. GE credit: QL, SL.—II. (II.) Berger

121L. Physiology of Reproduction Laboratory (1)
Laboratory—3 hours. Prerequisite: course 121 recommended. Experiments on the reproductive systems of domestic animals including male and female gametes. (P/NP grading only.)—II. (II.) Berger

122. Developmental Endocrinology (3)
Lecture—3 hours. Prerequisite: course 101. Hormonal control of development, maturation and senescence from the cellular to the organismal level, with emphasis on the human. Prenatal and neonatal life, childhood, adolescence, adulthood and pregnancy, as well as the endocrinology of aging. Offered irregularly.

123. Comparative Vertebrate Organology (4)
Lecture—3 hours; laboratory—3 hours. Prerequisite: Biological Science 1A or 1B and 2A and 2B. Functional anatomy of major organ systems in vertebrates. Each system examined from cellular to gross level in fish, birds, and mammals. Emphasis on how differentiated cell types are integrated into tissues and organs to perform diverse physiological functions. (Same course as Anatomic Physiology and Cell Biology 100—II. Banner)

124. Comparative Neuroanatomy (4)
Lecture—3 hours; laboratory—2 hours. Prerequisite: Psychology 101, or course 100 or 101. Overview of the neuroanatomy of the nervous system in a variety of mammalian and non-mammalian vertebrates. Examine changes or modifications to neural structures as a result of morphological or behavioral specializations. (Same course as Psychology 124.) GE credit: SL.—II. (II.) Krubitzer, Recanzone

125. Comparative Physiology: Neurointegrative Mechanisms (3)
Lecture—3 hours. Prerequisite: course 101. Comparisons of physiological functions in the animal kingdom: neuromotor systems of integration including aspects of phylogenetic development at both neuronal and systemic levels. Offered irregularly.

126. Comparative Physiology: Sensory Systems (3)
Lecture—3 hours. Prerequisite: course 100 or 101. Basic physiological mechanisms involved in sensory systems. Comparative approach to considerations of mechanisms of audition, olfaction, touch, echolocation, equilibration, chemical senses (olfaction, taste, pheromones), photosensitive systems (vision, infrared detection, UV detection), electroreception, and pain. Emphasis on receptors. Offered irregularly.

127. Comparative Physiology: Circulation (3)
Lecture—3 hours. Prerequisite: course 101. Comparisons of physiological functions in the animal kingdom: circulation. Comparative approach to cardiovascular function in vertebrates and invertebrates. Offered irregularly. GE credit: VL, VQ.

128. Comparative Physiology: Endocrinology (3)
Lecture—3 hours. Prerequisite: course 101. Comparisons of physiological functions in the animal kingdom: animal hormones and their functions. —II. (II.) Furlow, Chase

129. Comparative Physiology: Respiration (3)
Lecture—3 hours. Prerequisite: course 101. Comparisons of physiological functions in the animal kingdom: respiration.

130. Physiology of the Endocrine Glands (4)
Lecture—4 hours. Prerequisite: course 101. Advanced presentation of concepts in endocrinology with emphasis on the role of hormones in reproduc tion, metabolism, and disease. GE credit: VQ. —I. (I.) Adams

132. Nature vs. Nurture: Physiological Interactions Among Genes, Nutrients and Health (3)
Lecture—3 hours. Prerequisite: Biological Sciences 1A or 2A or consent of the instructor. Biochemical, physiological, genetic, and nutritional causes of important medical conditions such as obesity, anorexia, heart disease and diabetes. One unit of credit allowed to students who have completed course 131. GE credit: SciEng.—I. (I.) Pinney, Ward

139. Frontiers in Physiology (3)
Lecture—2 hours; discussion—1 hour. Prerequisites: courses 100 and 101; 102 (may be taken concurrently). Lectures by leading authorities and discussion of the latest research in newly emerging areas in physiological science. Offered every fourth year. Offered irregularly. GE credit: SciEng | QL, SE.

140. Principles of Environmental Physiology (3)
Lecture—3 hours. Prerequisite: course 101; Biological Sciences 102 recommended. Physiological aspects of interactions of organisms and environment: cellular, system, and organismal levels. Emphasis on regulatory responses/mechanisms to thermal, pressure, gravity and light environmental variables. Not open for credit to students who have completed course 148. (Former course 148.) GE credit: WE.—II. Fuller

141. Physiological Adaptation of Marine Organisms (3)
Lecture—2 hours; laboratory—3 hours. Prerequisite: upper division standing; consent of the instructor; residence at Bodega Marine Laboratory required. Students must submit application available at http://www.bml.ucdavis.edu. Physiology adaptation to the environment among organisms in marine and estuarine habitats. GE credit: QL, VQ, WE.—III. (III.) Chang, Cheng, Cher

141P. Physiological Adaptation of Marine Organisms/Advanced Laboratory Topics (5)
Laboratory—12 hours; discussion—1 hour. Prerequisite: course 102 or Psychology 101. Laboratory course at Bodega Marine Laboratory required. Students must submit application available at http://www.bml.ucdavis.edu. Training in scientific research from hypothesis to publication, including use of BML library research. Research related to a topic covered in course 141. GE credit: VQ, WE.—II. (II.) Fuller

150. Advanced Animal Behavior (4)
Lecture—3 hours; laboratory—3 hours. Prerequisite: course 102 or Psychology 101. Advanced integrative survey of biological principles of behavioral organization, emphasizing historical roots, current research directions, conceptual issues and controversies. Laboratory exercises on the description and analysis of the behavior of captive and free-living animals. (Same course as Psychology 122.) Offered irregularly.—Hahn

152. Hormones and Behavior (3)
Lecture—3 hours. Prerequisite: course 101, and either course 102 or Psychology 101. Endocrine physiology with an emphasis on the principles of behavioral homeostasis. Fundamental relationships between hormones and various behaviors engaged in by the organism during its lifetime. Role of hormones in behavioral homeostasis, social behavior, reproductive behavior, parental behavior, adaptation to stress. (Same course as Psychology 123.)—III. (III.) Bale, Furlow, Hahn, Trainer, Wingfield

159. Frontiers in Behavior (3)
Lecture—2 hours; discussion—1 hour. Prerequisite: courses 100, 101, 102. Lectures by leading authorities and discussion of the latest research in newly emerging areas in behavioral biology. Offered every fourth year. Offered irregularly. GE credit: SciEng | QL, SE.

160. Molecular and Cellular Neurobiology (3)
Lecture—1.5 hours; discussion—1.5 hours. Prerequisite: course 100, Biological Sciences 101 and consent of instructor. Selected topics in neurobiology. Topics include channel biophysics, action potential propagation, intracellular signal transduction pathways, synaptic physiology and quantal analysis, cellular mechanisms of synaptic plasticity, and neuropeptide regulation of synaptic efficacy. (Same course as Neuroscience 160.) GE credit: VQ.

160L. Advanced Cellular Neurobiology Laboratory (4)
Laboratory—12 hours. Prerequisite: course 160, Physics 7C recommended. Students will learn to record neural activity, to interpret their recordings, and to label neurons with antibodies against neuron transmitters.

161. Developmental Neurobiology (3)
Lecture—3 hours. Prerequisite: course 100 or 101. Issues, theoretical concepts, and methodologies in development neurobiology. Topics include prenatal and postnatal differentiation of neurons, and plasticity in the mature and aging brain. Integration of neurochemical, structural, physiological and behavioral perspectives. GE credit: SciEng | QL, VQ.—II. (II.) McAllister, Zito

162. Neural Mechanisms of Behavior (3)
Lecture—3 hours. Prerequisite: course 100 or 101. The relationship between brain and behavior: Identification and analysis of the relevant neural circuits involved. Examples of systems considered are birdsong, locomotion, echolocation.—III. (III.) Britton

163. Systems Neuroscience (3)
Lecture—3 hours. Prerequisite: course 100 or equivalent basic neuroscience training with consent of instructor. Concepts and theories in systems neuroscience: e.g., measuring and manipulating neural activity, structure of neocortex, sensory processing, motor control, short-term and long-term storage of information, neural codes, neural mechanisms underlying cognitive functions. GE credit: SE.—III. (III.) Ditrich

164. Mammalian Vision (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: courses 101, 112, or Psychology 101. Structure and function of the mammalian visual system, from the formation of images on the retina through visually guided behavior and perception. Emphasis on biological mechanisms underlying vision.—II. (II.) Britton, Werner

165. Neurobiology of Speech Perception (3)
Lecture—3 hours. Prerequisite: courses 100 or 101, or consent of instructor. Interdisciplinary approach to speech perception with emphasis on mechanisms, neuro-physiologically and behavior. Topics include auditory processing in time and space, intelligibility in noisy environments, visual speech, evolution of vocal communication, models of speech perception, development and hearing impairment. CE credit.—III. (III.) Miller
166. Math Tools for Neuroscience (4)
Lecture—4 hours. Prerequisite: course 100 or permission of instructor; Math 16A, B, C, or equivalent; Physics 7C strongly recommended. Introduction to mathematics techniques used in neuroscience. Applications to neuroscience of differential equations, linear systems, Fourier transforms, correlation, convolution, and probability theory. GE credit: QL.—Goldman

167. Computational Neuroscience (5)
Lecture—4 hours; lecture/laboratory—3 hours. Prerequisite: Math 17A, 17B, 17C, or equivalent; Physics 7A, B, C or equivalent strongly recommended; consent of instructor. Mathematical models and data analysis techniques used to describe computations performed by nervous systems. Lecture topics include single neuron biophysics, neural coding, network dynamics, memory, plasticity, and learning. Lab topics include statistical and computational techniques used in MATLAB. Offered in alternate years. GE credit: SciEng | SE, QL.—[I.] Goldman

168. Neurobiology of Addictive Drugs (4)
Lecture/discussion—4 hours. Prerequisite: course 100 or 101 or the equivalent. Neurobiological basis for the effects and mechanisms of action of drugs with addictive potential, including opioids (morphine, heroin), benzodiazepines, cocaine, nicotine, marijuana (cannabinoids), alcohol, caffeine, and mind-altering drugs such as LSD and antidepressants. GE credit: SL, VL.—III. (III.) Liets

169. Frontiers in Neurobiology (3)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 100 or 101 or the equivalent (may be taken concurrently). Lectures by leading authorities and discussion of the latest research in new emerging areas in neuroscience offered every fourth year. Offered irregularly. GE credit: QL.

190C. Research Conference (1)
Discussion—1 hour. Prerequisite: upper division standing in Neurobiology, Physiology, and Behavior or related biological science and consent of instructor; concurrent enrollment in course 199. Research findings and methods in neurobiology, physiology, and/or behavior. Presentation and discussion of research by course 199 and students. May be repeated for credit. (P/NP grading only.)—I, II, III, (II, III, III.)

192. Internship (1-12)
Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in all subject areas offered in neurobiology, physiology, and behavior. May be repeated for credit. (P/NP grading only.)—I, II, III, (II, III, III.)

194HA-194HB-194HC. Neurobiology, Physiology, and Behavior—Honors (1-2)
Laboratory—3-12 hours. Prerequisite: senior standing; minimum 3.50 GPA in courses counted toward major; approval by the Master Adviser. Honors project in Neurobiology, Physiology, and Behavior. Laboratory research on a specific question. The project is developed with the sponsoring faculty member and approved by the student’s Honors Thesis Committee. Honors thesis to be submitted upon completion of the project. (P/NP grading only.)—I, II, III, (II, III, III.)

197T. Tutoring in Neurobiology, Physiology, and Behavior (1-5)
Discussion—2-6 hours. Prerequisite: upper division standing and consent of instructor. Assisting the instructor by tutoring students in one of the Department’s regular courses. May be repeated for credit. (P/NP grading only.)—I, II, III, (II, III, III.)

199. Directed Group Study (1-5)
(P/NP grading only.)—I, II, III, (II, III, III.)

199S. Special Study for Advanced Undergraduates (1-5)
(P/NP grading only.)—I, II, III, (II, III, III.)

Graduate
211. Advanced Topics in Neuroimaging (2)
Seminar—2 hours; discussion—1 hour. Prerequisite: Psychology 210 or consent of instructor. Restricted to 16 students. Critical presentation and discussion of the most influential advanced issues in neuroimaging, emphasizing fMRI design and analysis and the integration of fMRI with EEG/MEG. (Same course as Neuroscience 211 and Psychology 211.) (S/U grading only.)—II. (III.) Miller

212. Light and Fluorescence Microscopy (2)
Lecture—2 hours. Prerequisite: consent of instructor. Restricted to maximum 16 students. Theory and practical application of light and fluorescence microscopy in the biological sciences. (S/U grading only.)—II. (III.) Zito

217. Advanced Avian Physiology (1)
Project—1 hour. Prerequisite: graduate standing and concurrent enrollment in course 117; consent of instructor. Study in depth of a topic in avian physiology through development of a lecture with associated instructional materials such as lesson plan, readings, and presentation aids. (III.) Millam

222. Systems Neuroscience (5)
Lecture—4 hours; discussion—1 hour. Prerequisite: graduate standing or consent of instructor. Integration and information-processing aspects of nervous system organization. Topics include sensory systems, motor function, sensorimotor integration, the limbic system, and the neurogenetics of learning and memory. (Same course as Neuroscience 222.)—II. (III.) DeBello, Ditterich, Usrey

245. Computational Models of Cellular Signaling (3)
Lecture—3 hours. Prerequisite: consent of instructor. Computational and mathematical techniques in modeling of regulatory and signaling phenomena in neurobiology and cell physiology, focusing on linear and nonlinear ordinary differential equation models. Applications include ion channel kinetics, electrical activity, signal transduction, calcium oscillations, and simple neural circuits. Offered irregularly.

247. Topics in Functional Neurogenomics (2)
Lecture—1 hour; discussion—1 hour. Prerequisite: graduate standing or consent of instructor. The theory, methods and principles of functional neurogenomics with emphasis on the relationship to molecular mechanisms involved in development and disease of the nervous system. (Same course as Neuroscience 247.)

261A. Topics in Vision: Eyes and Retinal Mechanisms (2)
Lecture/discussion—2 hours. Prerequisite: graduate standing, course 100 or 112 or the equivalent. Structure and function of the visual system, with emphasis on the relationship to anatomy, transduction, retinal synapses, adaptation, and parallel processing. (Same course as Neuroscience 261A and Molecular, Cellular, and Integrative Physiology 261A.) (S/U grading only.)

261B. Topics in Vision: Systems, Psychophysics, Computational Models (2)
Lecture/discussion—2 hours. Prerequisite: consent of instructor, course 261A recommended. Functions of the central visual pathways and their underlying mechanisms. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system. (Same course as Psychology and Behavior 261B and Molecular, Cellular, and Integrative Physiology 261B.) Offered in alternate years. (II.) Britten

261C. Topics in Vision: Clinical Vision Science (2)
Lecture/discussion—2 hours. Prerequisite: courses 261A and 261B or consent of instructor. Causes and mechanistic bases of major blinding diseases. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system related to disease. (Same course as Neuroscience 261C and Molecular, Cellular, and Integrative Physiology 261C.) Offered irregularly. (S/U grading only.)—III. Werner

263. Modeling in Systems Neuroscience (4)
Lecture—3 hours; lecture/laboratory—1 hour. Prerequisite: consent of instructor. Modeling as a tool in systems neuroscience. Mathematical techniques will be introduced and used to explore advanced topics in echolocation, sound localization, electrophysiology, communications, and motor systems. Other topics include transforms, modeling assumptions, scales and hierarchy. Offered in alternate years.

267. Computational Neuroscience (5)
Lecture—4 hours; lecture/laboratory—3 hours. Prerequisite: one course in general neuroscience at the level of course 100, one year college-level calculus at level of Math 1A, B, C, or equivalent; at the level of Physics 7A, B, C, strongly recommended; students from other departments should contact the instructor. Mathematical models and data analysis techniques used to describe computations performed by nervous systems. Lecture topics include single-neuron biophysics, neural coding, network dynamics, memory, plasticity, and learning. Lab topics include programming mathematical models and data analysis techniques in MATLAB. Offered in alternate years. (Same course as Neuroscience 267.)—(I.) Goldman

270. How to Write a Fundable Grant Proposal (3)
Lecture/discussion—3 hours. Prerequisite: graduate standing in a life science and consent of instructor. Familiarization with the skills required to craft a successful grant proposal submitted to extramural agencies such as NIH and NSF.

285. Literature in Visual Neuroscience (2)
Seminar—2 hours. Literature in Visual Neuroscience. (Same course as Neuroscience 285.) May be repeated for credit. (S/U grading only.)—I, II, III, (II, III, III.)

287A. Topics in Theoretical Neuroscience (2)
Seminar—2 hours. Prerequisite: consent of instructor. In-depth exploration of topics in theoretical neuroscience. Topics vary each year. Fall quarter (287A): foundational material from books and review articles. Spring quarter (287B): continuation of year’s topics through readings of seminal articles from the primary literature. Offered in alternate years. May be repeated for credit. (Same course as Neuroscience 287A.)—I. Ditterich, Goldman

287B. Topics in Theoretical Neuroscience (2)
Seminar—2 hours. Prerequisite: consent of instructor. In-depth exploration of topics in theoretical neuroscience. Topics vary each year. Fall quarter (287A): foundational material from books and review articles. Spring quarter (287B): continuation of year’s topics through readings of seminal articles from the primary literature. May be repeated for credit. (Same course as Neuroscience 287B.)—I. Ditterich, Goldman

291. Auditory Neuroscience (1)
Seminar—0.5 hours; discussion—0.5 hours. Prerequisite: course 100 or 112 or Neuroscience 222 or the equivalent. Exploration of various important aspects of auditory physiology, and psychophysics through review of original literature. New topic each quarter. May be repeated for credit with consent of instructor. (S/U grading only.)—I, II, III, (II, III) Kecskeméti, Suther

Quarter Offered: I=Fall; II=Winter; III=Spring; IV=Summer; 2015-2016 offering in parentheses.

Courses in Neuroscience (NSC)

Upper Division
160. Molecular and Cellular Neurobiology (3)
Lecture—1.5 hours; discussion—1.5 hours. Prerequisite: Neurobiology, Physiology, and Behavior 100, Biological Sciences 101 and consent of instructor. Selected topics in neurobiology. Topics include channel biophysics, action potential propagation, intra-cellular signal transduction pathways, synaptic physiology and quantal analysis, cellular mechanisms of synaptic plasticity, and neurotransmission of synaptic circuitry. (Same course as Neuroscience, Physiology, and Behavior 160.) CE credit: V—III. (III.) Burns, Mulloney

Graduate

200LA. Laboratory Methods in Neurobiology (6)
Laboratory—18 hours. Prerequisite: graduate standing in the Neuroscience Graduate Group. Individual research in the laboratory of a faculty member. Research problems emphasize the use of contemporary methods and good experimental design. May be repeated three times for credit. (S/U grading only)—I, II, III. (I, II, III.)

200LB. Laboratory Methods in Neurobiology (3)
Laboratory—9 hours. Prerequisite: graduate standing in the Neuroscience Graduate Group. Individual research in the laboratory of a faculty member. Research problems emphasize the use of contemporary methods and good experimental design. May be repeated for credit. (S/U grading only)—I, II, III. (I, II, III.)

201. Neuroanatomy (3)
Lecture—2 hours; laboratory/discussion—1 hour. Prerequisite: consent of instructor. Mix of lectures, demonstrations, and dissections, emphasizing functional significance of neuroanatomy from a biological perspective, with comparisons between human and non-human brains. Emphasis placed on functional anatomy of the nervous system, integrated with cellular, molecular, cognitive, and developmental concepts. Limited enrollment.—I. (I.)

211. Advanced Topics in Neuroimaging (2)
Seminar—2 hours. Prerequisite: Psychology 210 or consent of instructor. Restricted to 15 students. Critical presentation and discussion of the most influential advanced topics in neuroimaging, emphasizing fMRI design/analysis and the integration of fMRI with EEG/MEG. (Same course as Psychology 211 and Psychology 211.) CE credit: S/U grading only.—I, II, III. (III.) Miller

220. How to Give a Scientific Seminar (3)
Lecture/discussion—3 hours. Prerequisite: consent of instructor. Presentation of effective seminars. Student presentations of selected neuroscience topics in seminar format. Must be taken in two consecutive quarters. Offered in alternate years.—I, II, III. (III.)

221. Cellular Neurophysiology (4)
Lecture—4.5 hours. Prerequisite: graduate standing or consent of instructor. Physiological aspects of cellular and subcellular organization of the nervous system. Neuronal cell biology, the structure and function of ion channels, electrical excitability, signaling cascades, sensory transduction and, mechanisms of synaptic transmission, and the cellular basis of learning and memory.—I. (I.)
222. Systems Neuroscience (5)
Lecture—4 hours; discussion—1 hour. Prerequisite: graduate standing or consent of instructor. Integrative and functional aspects of nervous system organization. Topics include sensory systems, motor function, sensorimotor integration, the limbic system, and the neurobiology of learning and memory. [Same course as Neurobiology, Physiology, and Behavior 222.]—II. [III.] DeBello, Ditterich, Usrey

223. Cognitive Neuroscience (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: graduate student standing in Psychology or Neuroscience or consent of instructor. Graduate core course for neuroscience. Neurobiological bases of higher mental function including attention, memory, language. One of three in a three-quarter sequence. [Same course as Psychology 261.]—II. III. Swaab

224A. Molecular and Developmental Neurobiology (2)
Lecture/discussion—2 hours. Prerequisite: consent of instructor. Key issues in developmental and molecular neurobiology. Discussion emphasis on critical evaluation of the experiments and methods described in research papers. Readings of seminal, primary research papers, reviews, and book chapters. Reading materials will be distributed one week in advance. —II. [III.] Cheng, Diaz

224B. Molecular and Developmental Neurobiology (2)
Lecture/discussion—2 hours. Prerequisite: course 224A or consent of instructor. Continuation of course 224A. Key issues in developmental and molecular neurobiology, focusing on developmental topics. Discussion emphasis on critical evaluation of experimental approaches described in associated literature. —II. Cheng, Diaz

225. Translational Research in the Neurobiology of Disease (2)
Lecture—1 hour; discussion—1 hour. Prerequisite: Past or concurrent enrollment in Neuroscience courses 221, 222, 223, or permission of instructor; restricted to current graduate student enrollment or permission of instructor. This course will provide an overview of the diagnostic, pathophysiological, and neurological disorders from both the clinical and fundamental science perspectives. Offered in alternate years. —II. McAllister

226. Molecular and Developmental Neurobiology (4)
Lecture/discussion—4 hours. Prerequisite: consent of instructor. Introduction to molecular and developmental neurobiology. Topics range from neurotoxicity to development of sensory systems and include current molecular methods and their application in developmental neuroscience. —II. [III.] McAllister

243. Topics in Cellular and Behavioral Neurobiology (1)
Discussion—1 hour; seminar—1 hour. Prerequisite: consent of instructor. An advanced examination of several current problems in neurobiology. Topics will vary in different years; may be repeated for credit. [S/U grading only.]

247. Topics in Functional Neurogenomics (2)
Lecture—1 hour; discussion—1 hour. Prerequisite: graduate standing or consent of instructor. The theory, methods, and principles of functional neurogenomics. Emphasis on the relationship to molecular mechanisms involved in development and disease of the nervous system. [Same course as Neurobiology, Physiology, and Behavior 247.]—II. Choudary

250. Biology of Neurogia (2)
Lecture/discussion—1.5 hours. Prerequisite: consent of instructor. The properties and functions of nonneuronal cells in the mammalian central nervous system with relevance to neuronal development, physiology and injury response. Offered in alternate years. [Same course as Cell Biology and Human Anatomy 250.]—S/U grading only.

261A. Topics in Vision: Eyes and Retinal Mechanisms (2)
Lecture/discussion—2 hours. Prerequisite: graduate standing, Neurobiology, Physiology, and Behavior 100 or 112 or the equivalent. Structure and function of the visual system, with emphasis on the eye and retina, including optics, anatomy, transduction, retinal synapses, adaptation, and parallel processing. [Same course as Neurobiology, Physiology, and Behavior 261A and Molecular, Cellular, and Integrative Physiology 261A.]—S/U grading only. Offered in alternate years. —II. Britten

261B. Topics in Vision: Systems Psychophysics, Computational Models (2)
Lecture/discussion—2 hours. Prerequisite: consent of instructor, course 261A recommended. Functions of the central visual pathways and their underlying mechanisms. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system. [Same course as Neurobiology, Physiology, and Behavior 261B and Molecular, Cellular, and Integrative Physiology 261B.]—S/U grading only. Offered in alternate years. —III. Werner

267. Computational Neurosciences (5)
Lecture—4 hours; lecture/laboratory—3 hours. Prerequisite: one course in general neuroscience at the level of course 100; one year college-level Calculus at level of Math 16A, B, C; one year Physics at the level of Physics 7A, B, C; strongly recommended, students from other departments should contact the instructor. Mathematical models and data analysis techniques used to describe computations performed by nervous systems. Lecture topics include single-neuron biophysics, neural coding, network dynamics, memory, plasticity, and learning. Lab topics include programming mathematical models and data analysis techniques in MATLAB. Offered in alternate years. [Same course as Neurobiology, Physiology & Behavior 267]—I. Goldman

283. Neurobiological Literature (1)
Seminar—1 hour. Prerequisite: consent of instructor. Critical presentation and analysis of recent journal articles in neurobiology. May be repeated for credit. [S/U grading only.]-II, III, [I, II, III]

284. Development of Sensory Systems (1)
Seminar—1 hour. Prerequisite: consent of instructor. Presentation and discussion of recent literature on the development of sensory systems. May be repeated for credit. [S/U grading only.]—II, III, [I, II, III]

285. Literature in Visual Neuroscience (2)
Seminar—2 hours. Critical presentation and discussion of current literature in neuroscience. [Same course as Neurobiology, Physiology, and Behavior 285.] May be repeated for credit if topic differs. [S/U grading only.]—II, III, [I, II, III] Usrey, Britten

287A. Topics in Theoretical Neuroscience (2)
Seminar—2 hours. Prerequisite: consent of instructor. In-depth exploration of topics in theoretical neuroscience. Topic varies each year. Fall quarter (287A): foundational material from books and review articles. Spring quarter (287B): continuation of year’s topic through readings of seminal articles from the primary literature. May be repeated for credit. [Same course as Neurobiology, Physiology & Behavior 287A.]—I. (II) Ditterich, Goldman

287B. Topics in Theoretical Neuroscience (2)
Seminar—2 hours. Prerequisite: consent of instructor. In-depth exploration of topics in theoretical neuroscience. Topic varies each year. Fall quarter (287A): foundational material from books and review articles. Spring quarter (287B): continuation of year’s topic through readings of seminal articles from the primary literature. May be repeated for credit. [Same course as Neurobiology, Physiology & Behavior 287B.]—S/U grading only. —III. (III.) Ditterich, Goldman

289. Topics in Molecular and Developmental Neurobiology (2)
Seminar—2 hours. Analysis and discussion of seminal and current research papers in molecular and developmental neurobiology. Different topics will be covered each quarter. In the past topics have included, “Synaptic vesicle dynamics,” “Neuronal polarity,” and “Glutamate receptors.” May be repeated ten times for credit when topic differs. [S/U grading only.]-II, III, [I, II, III]

290C. Research Conference in Neuroscience (1)
Seminar—2 hours. Prerequisite: Neurobiology, Physiology, and Behavior 100 or 112 or equivalent or consent of instructor. Examination of research articles on cortical plasticity and changes in perception. Examples drawn from the somatosensory, visual, auditory, and motor cortex. [Same course as Neurobiology, Physiology, and Behavior 292.] Offered in alternate years. [S/U grading only.]—I, II, III

298. Group Study (1-5)
[S/U grading only.]

299. Research (1-12)
[S/U grading only.]

Mission Statement
The Betty Irene Moore School of Nursing at UC Davis cultivates academic excellence through
Health care and leadership at various levels, e.g., Health-Care Leadership graduate program or consent of instructor. Foundation for analyzing research, health, and systems data to answer clinical, systems, or policy questions. Use and examine multiple sources of data and information as a basis for planned change and transformation in health care. —II. (II.)

205. Research Design in Nursing and Health Care (4)
Lecture/discussion—4 hours. Prerequisite: current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Major types of quantitative and qualitative research design and their application to nursing and health-care research. Implications of choosing alternative research designs and critical analysis of philosophical underpinnings and validity, sampling, instruments to measure health concepts. —II. (II.)

206. Community Connections (2-5)
Prerequisite: current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Open to NSHSL MS students only. Community-based learning and experiences including community participation, assessment, data collection and analysis. Multiple approaches to community health improvement projects, collabora-
tive leadership practice, all with the guidance of community members and Nursing faculty. May be repeated for credit. —I, II, III. (I, II, III.)

210Y. Applied Health Informatics (4)
Lecture/discussion—1 hour; web virtual lecture—3 hours. Open to current student in NSHSL graduate program or consent of instructor. Within this conceptual framework of the Foundation of Knowledge model, this course integrates nursing science, information science, computer science and cognitive science to acquire, process, generate and disseminate knowledge. —I, II, III. (I, II, III.)

290. Master’s Seminar (2)
Discussion—2 hours. Prerequisite: current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Open to NSHSL MS students only or by consent of course instructor of record. Subject varies from quarter to quarter. Current knowledge and issues relevant to one of two fields of emphasis: population health or health systems. May be repeated 10 times for credit. —I, II, III. (I, II, III.)

291. Doctoral Seminar (2)
Discussion—2 hours. Prerequisite: current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Focus on the theory, research and knowledge relevant to one of two fields of emphasis: population health or health systems. Emphasis placed on reading, cri-
tique and synthesis of cutting-edge research in nursing and health care. May be repeated 10 times for credit. —I, II, III. (I, II, III.)

291D. Dissertation Research and Writing (1-12)
May be repeated for credit. Offered irregularly. —I, II, III. (I, II, III.)

299. Research and Writing (1-12)
Extensive writing or discussion—3-36 hours. Prereq-
usite: consent of instructor. Students in the Nursing Science and Health-Care Leadership graduate program may conduct research and writing under the supervision of a faculty member. May be repeated for credit. (S/U grading only.) —I, II, III. (I, II, III.)

299D. Dissertation Research and Writing (1-12)
Extensive writing or discussion—3-36 hours. Prereq-
usite: consent of instructor. Students in the Nursing Science and Health-Care Leadership graduate program conduct dissertation research and writing under the supervision of a faculty member. May be repeated for credit. (S/U grading only.) —I, II, III. (I, II, III.)

Professional
301. Methods for Teaching Nursing and Health Sciences: Use of Simulation (4)
Lecture/discussion—4 hours. Prerequisite: current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Best practices in simulation, system-based curriculum models and instructional design. Experience in planning student-centered learning activities that are engaging, effective and aligning desired student performance. Use of distance technologies, case-based teaching, clinical teaching, role of clinical teacher. Offered in alternate years. —I.

302. Methods for Teaching Nursing and Health Sciences: Curriculum and Instruction (4)
Lecture/discussion—4 hours. Prerequisite: current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Best practices in curriculum development and system-based curriculum models and instructional design. Experience in planning student-centered learning activities that are engaging, effective and aligning desired student performance. Use of distance technologies, case-based teaching, clinical teaching, role of clinical teacher. Offered in alternate years. —I.

303. Methods for Teaching Nursing and Health Sciences: Assessment/Evaluation of Learning (4)
Lecture/discussion—4 hours. Prerequisite: current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Application of approaches, processes, and tools for assessing adult learning, especially those that assess the student’s ability to apply knowledge/skills in practical situations. Other topics include: design of performance evaluation tasks, instructional rubrics, use of portfolios, grading, and reporting. Offered in alternate years. —III.

Professional
400. Basic Clinical Skills (1-4)
Lecture/laboratory—1-4 hours. Open to Graduate Students. Essential conceptual, technical, and physical skills necessary for patient care. Prepares the student for effective communication in establishing the therapeutic provider-patient relationship. —I, II, III. (I, II, III, IV.)

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2015-2016 offering in parentheses
Pre-Fall 2011 General Education (GE): ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Dom=Domestic Diversity; Writ=Writing Experience
Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SE=Science and Engineering; SS=Social Sciences; ASC=American Cultures; DD=Domestic Diversity; OL=Oral Skills; QL=Quantitative; SL=Scientific; VL=Visual; WC=World Cultures; WE=Writing Experience
401. Basic Clinical Skills (1-4)
Lecture/laboratory—1–4 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content—II, III, IV, (I, II, III, IV)

401A. Advanced Clinical Skills (1-4)
Lecture/laboratory—1–4 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content—II, III, IV, (I, II, III, IV)

401B. Advanced Clinical Skills (1-4)
Lecture/laboratory—1–4 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related specified systems—II, III, IV, (I, II, III, IV)

401C. Advanced Clinical Skills (1-4)
Lecture/laboratory—1–4 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related specified systems—II, III, IV, (I, II, III, IV)

401D. Advanced Clinical Skills (1-4)
Lecture/laboratory—1–4 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related specified systems—II, III, IV, (I, II, III, IV)

401E. Advanced Clinical Skills (1-4)
Lecture/laboratory—1–4 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related specified systems—II, III, IV, (I, II, III, IV)

402. Supervised Clinical Hours (1-3)
Clinical activity—36 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Students are placed in clinical settings and/or clinical simulation laboratories to observe and practice the integration of clinical skills with direct supervision by faculty.—I, II, III, IV, (I, II, III, IV)

403. Supervised Clinical Practice—Primary Health Care (1-16)
Clinical activity—48 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Each of the required primary care rotations is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements.—II, III, IV, (I, II, III, IV)

404. Supervised Clinical Practice—Primary Health Care (1-16)
Clinical activity—48 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Each of the required primary care rotations is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements.—II, III, IV, (I, II, III, IV)

405C. Supervised Clinical Practice—Primary Health Care (1-16)
Clinical activity—48 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Each of the required primary care rotations is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements.—I, II, III, IV, (I, II, III, IV)

405D. Supervised Clinical Practice—Primary Health Care (1-16)
Clinical activity—48 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Each of the required primary care rotations is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements.—I, II, III, IV, (I, II, III, IV)

450. Supervised Clinical Practice—Primary Health Care (1-16)
Clinical activity—48 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate inpatient per accreditation requirements.—I, II, III, IV, (I, II, III, IV)

451. Supervised Clinical Practice—Pediatrics (1-16)
Clinical activity—48 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related specified systems.—I, II, III, IV, (I, II, III, IV)

452. Supervised Clinical Practice—Women’s Health (1-16)
Clinical activity—48 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate community-based pediatri sne provider per accreditation requirements.—II, III, IV, (I, II, III, IV)

453. Supervised Clinical Practice—Mental Health (1-16)
Clinical activity—48 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate community-based psychiatric, psychiatric/mental health provider per accreditation requirements.—II, III, IV, (I, II, III, IV)

454. Supervised Clinical Practice—Emergency Medicine (1-16)
Clinical activity—48 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate Emergency Medicine provider per accreditation requirements.—II, III, IV, (I, II, III, IV)

455. Supervised Clinical Practice—Inpatient Surgery (1-16)
Clinical activity—48 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate surgical provider per accreditation requirements.—II, III, IV, (I, II, III, IV)

456. Supervised Clinical Practice—Inpatient Medicine (1-16)
Clinical activity—48 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate inpatient per accreditation requirements.—I, II, III, IV, (I, II, III, IV)

459. Supervised Clinical Practice—Other Specialties (1-16)
Clinical activity—48 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate community-based primary care provider per accreditation requirements.—I, II, III, IV, (I, II, III, IV)

470. Health Care Ethics (3-9)
Lecture/discussion—2 hours, laboratory/discussion—1 hour. Prerequisite: consent of instructor. Guided independent study of issues in biomedical ethics, with discussion relevant to the personal involvement of student interests and needs. Participation in ethics rounds. (Same course as General Medicine 470. S/U grading only.)—I, II, III, IV, (I, II, III, IV)

471. Supervised Clinical Practice—Geriatrics (1-16)
Clinical activity—48 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Rural health rotations focus on providing care in medically underserved rural sites. Students will experience care across the continuum in ambulatory, inpatient, and community based settings.—I, II, III, IV, (I, II, III, IV)

475. Supervised Clinical Practice—Acute Care Health (1-16)
Clinical activity—48 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. A two to four week rotation focuses on providing acute care in inpatient settings. Students will work directly with specific inpatient units.—I, II, III, IV, (I, II, III, IV)

480. Supervised Clinical Practice—Rural Health (1-16)
Clinical activity—48 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Rural health rotations focus on providing care in medically underserved rural sites. Students will experience care across the continuum in ambulatory, inpatient, and community based settings. —I, II, III, IV, (I, II, III, IV)

485. Supervised Clinical Practice—Inpatient Surgery (1-16)
Clinical activity—48 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate surgical provider per accreditation requirements.—II, III, IV, (I, II, III, IV)

493A. Improving Quality in Health Care (3)
Lecture—8 hours; discussion/laboratory—10 hours; project—10 hours. Prerequisite: consent on instructor. Working in interdisciplinary teams, will explore the theory and practical methods being employed to make improvement in health care systems while providing an opportunity for interprofessional educational experience. (Same course as Medical Sciences 493QA. S/U grading only, pending completion of sequence.)—I.

493B. Improving Quality in Health Care (3)
Lecture—9 hours; discussion/laboratory—10 hours; project—10 hours. Prerequisite: consent on instructor. Working in interdisciplinary teams, will explore the theory and practical methods being employed to make improvement in health care systems while providing an opportunity for interprofessional educational experience. (Same course as Medical Sciences 493QA. S/U grading only, pending completion of sequence.)—I.

Major Programs. See the majors in Clinical Nutrition, on page 203 and Nutrition Science, on page 458.

Minor Program Requirements: The Department of Nutrition offers four minor programs open to students majoring in other disciplines who wish to complement their study programs with a concentration in the area of food and nutrition.

Note: If the student’s major program requires the same course in biochemistry and physiology, only one of the courses may duplicate credit toward the minor. Each program below lists replacement courses to fulfill the minimum unit requirement.

Community Nutrition .......................... 20

Preparation. Plan in advance to include the required course prerequisites.

Nutrition 111A and 111B .......................... 5
Nutrition 118, 192 (2 units) ....................... 6
Nutrition 120AN or 120BN ....................... 4
Neurobiology, Physiology, and Behavior 101 .................................................. 5
Replacement courses; see note above:

Nutrition 114, 116A-116B, 116AL-116BL

Food Service Management ..................... 25

Preparation. Plan in advance to include the required course prerequisites.

Food Science and Technology 100A-100B, 101A-101B ... 12
Food Service Management 120, 120L, 122, 123 ........................................... 9
Agricultural and Resource Economics 112 ....................................................... 4
Replacement courses; see note above:

Nutrition 10, 111A, 111B, 114, 116A-116B, 120AN, or 120BN, Economics 1A-1B

Nutrition and Food ................................. 22

Preparation. Plan in advance to include the required course prerequisites.

Nutrition 111A and 111B .......................... 5
Nutrition 120AN or 120BN ....................... 4
Food Science and Technology 100A, 100B ....................................................... 8
Neurobiology, Physiology, and Behavior 101 .................................................. 5
Replacement courses; see note above:

Nutrition 114, 116A-116B, 116AL-116BL

Nutrition Science ................................. 20

Preparation. Plan in advance to include the required course prerequisites.

Animal Biology 102 and 103, Biological Sciences 102 and 103 and Nutrition 111A and 111B ......................... 11-15
Neurobiology, Physiology, and Behavior 101 .................................................. 5
Replacement courses; see note above:

Nutrition 114, 115, 116A-116B, 117, 120AN or 120BN, 122, 123, 124, 201, 204.

Minor Adviser. 3202 Meyer Hall 530-752-2512

Graduate Study. Programs of study leading to the M.S. and Ph.D. degrees are available in Nutrition. For information on graduate study contact the Nutrition Graduate Group.

Courses in Nutrition (NUT)

Lower Division
11. Current Topics and Controversies in Nutrition (3) Discussion—1 hour; term paper. Exploration of current applications and controversies in nutrition. Students read scientific journal articles and write summaries, as well as give brief oral presentations. Topics change to reflect current interests and issues. GE credit: SciEng, Wrt I | OL, SE, WE—II, III. (II, III) Applicable
99. Individual Study for Undergraduates (1-5) Prerequisite: consent of instructor. (P/NP grading only.) GE credit: SE

Upper Division
104. Environmental & Nutritional Factors in Cellular Regulation and Nutritional Toxicants (4) Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 101; Biological Sciences 103 or Animal Biology 101. Cellular regulation from nutritional/toxicological perspective. Emphasis: role of biofactors on modulation of signal transduction pathways, role of specific organelles in organization/ regulation of metabolic transformations, major cofactor functions, principles of pharmacology/toxicology important to understanding nutrient/toxicant metabolism. (Same course as Environmental Toxicology 104.) GE credit: SciEng | SE, SL—II, III. (II, III) Applicable

111AV. Introduction to Nutrition and Metabolism (3) Web virtual lecture—3 hours. Prerequisite: Chemistry 88, Biochemistry 1A or 1B or the equivalent. Introduction to metabolism of protein, fat, and carbohydrate; the biological role of vitamins and minerals; nutrient requirements during the life cycle; assessment of dietary intake and nutritional status. Not open for credit to students who have completed course 101. E credit: SciEng | SE—II, III. (II, III) McDonald

111B. Recommendations and Standards for Human Nutrition (2) Lecture—2 hours. Prerequisite: Chemistry 88, Biochemistry, Physiology, and Behavior 101 or the equivalent. Critical analysis of the development of nutritional recommendations for humans. Topics include history of modern recommendations, development of the Recommended Dietary Allowance (RDA) and other food guides; the Dietary Reference Intakes (DRI); administrative structure of regulatory agencies pertinent to nutrition recommendations; introduction to scientific methods used to determine the recommendations; food labeling laws; nutrition...
Nutrition

112. Nutritional Assessment: Dietary, Anthropometric, and Clinical Measures (3)
Lecture—2 hours; laboratory—3 hours. Prerequisite: Animal Biology 102 and course 101, course 111 (may be taken concurrently). Statistics 13. Methods of human nutritional assessment, including dietary, anthropometric, biochemical and hemato-
logical techniques, and physical examination. Princi-
ples of nutrition, accuracy, and interpretation of results for individuals and populations. GE credit: SciEng | QL, SE—III. (II.) Stewart

114. Developmental Nutrition (4)
Lecture—4 hours. Prerequisite: Animal Biology 102 and 103 or course 101, course 111. Role of nutri-
tional factors in embryonic and postnatal develop-
ment. GE credit: SciEng, Wrt | SE—II. (II.) DePeters

115. Animal Nutrition (4)
Lecture—3 hours; laboratory—3 hours. Prerequisite: Chemistry 88. Comparative differences among ani-
mals in digestion and metabolism of nutrients. Nutri-
ent composition of feeds, digestive systems, digestion, absorption, feeding strategies. GE credit: SciEng; SciEng | QL, SE, VL, WE—II. (II.) DePeters

116A. Clinical Nutrition (3)
Lecture—3 hours. Prerequisites: courses 111, 112 and Neurobiology, Physiology, and Behavior 101 or the equivalent. Biochemical and physiological bases for therapeutic diets. Problems in planning diets for normal and pathologic conditions. GE credit: SciEng | SE—II. (I.) Steinberg

116AL. Clinical Nutrition Practicum (3)
Lecture—1 hour; laboratory—3 hours; discussion—1 hour. Prerequisite: course 116A (may be taken concurrently). Fundamental principles of planning and evaluating therapeutic diets and patient education for pathological conditions covered in 116A. GE credit: SciEng; SciEng | SE—II. (I.) Frank

116B. Clinical Nutrition (3)
Lecture—3 hours; discussion—1 hour. Prerequisites: courses 111, 112 and Neurobiology, Physiology, and Behavior 101 or the equivalent. Biochemical and physiological bases for therapeutic diets. Prob-
lems in planning diets for normal and pathological conditions. GE credit: SciEng | SE—II. (II.) Zivotic

116BL. Clinical Nutrition Practicum (3)
Lecture—1 hour; laboratory—3 hours; discussion—1 hour. Prerequisite: courses 116A and 116B (may be taken concurrently). Fundamental principles of planning and evaluating therapeutic diets and patient education for pathological conditions covered in 116A. GE credit: SciEng | SE—II. (II.) Steinberg

117. Experimental Nutrition (6)
Lecture—3 hours; laboratory—6 hours; extensive writing. Prerequisites: courses 111, Biological Sci-
ces 102 and 103, and a laboratory course in nutrition or biochemistry. Methods of assessing nutritional status. Application of chemical, microbiologi-
cal, chromatographic and enzymatic techniques to current problems in nutrition. GE credit: SciEng, Wrt | SE—II. (II.) Galikwad

118. Community Nutrition (4)
Lecture—4 hours. Prerequisite: course 101 or 111, and 116A. Nutrition problems in contemporary communities and of selected target groups in the United States and in developing countries. Nutrition programs and policy, principles of nutrition educa-
tion. GE credit: SciEng | SE, SL—II. (II.) Heining

119A. International Community-Based Nutritional Aids (1-2) (P/NP grading only.)
Lecture/discussion—1 hour. Prerequisite: course 112 (may be taken concurrently) and consent of instructor. Issues and problems related to community-
based nutritional assessment in a low-income coun-
try, or in low-income countries, ethical issues in human investigation; survey design, data collection techniques, and data analy-
sis; preparation for international travel; cross-cultural communication, health, and safety while living abroad.

119B. International Community-Based Nutritional Assessment (6)
Lecture—2 hours; fieldwork—12 hours. Prerequi-
tive: course 119A and consent of instructor. A six-
week summer program in Peru. Investigation of a community-based nutritional assessment survey, including development of the survey instrument, selection of the study sample, collection and verifica-
tion of data, preparation of the results; the project will be carried out by paired par-
ticipation of students and faculty members of UC Davis and the collaborating foreign institution.

120AN. Nutritional Anthropology (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 or Geography 2 recommended. Nutritional anthropology from historical and contemporary per-
spectives; the anthropological approach to food and diet; field methods that explore food patterns and their nutritional implications. GE credit: SciEng or SocSci, Div | SE, SS—IV. (IV.) Kurtz

120BN. Nutritional Geography (4)
Lecture—3 hours; laboratory—3 hours. Prerequisite: Geography 2 recommended. Nutritional geography from historical and contemporary per-
spectives; the geographical approach to food and diet; cultural and environmental factors that influence dietary practices; food-related landscapes and patterns. GE credit: SciEng or SocSci, Div | SE, SS.

122. Ruminant Nutrition and Digestive Physiology (4)
Lecture—3 hours; laboratory—3 hours. Prerequisite: upper division standing; Animal Biology 103 or con-
sent of instructor; Neurobiology, Physiology, and Behavior 101, Biological Sciences 1C, and Mathe-
matics 16B recommended. Study of nutrient utiliza-
tion as influenced by the unique aspects of digestion and fermentation in ruminants, both domestic and wild. Laboratories include comparative anatomy, feed evaluation, digestion kinetics using fistulated cows, computer modeling, and microbial exercises. GE credit: SciEng | QL, SE—III. (III.) Fadel

123. Comparative Animal Nutrition (3)
Lecture—3 hours. Prerequisite: Animal Biology 103. Restricted to upper division or graduate students. Comparative nutrition of animals, including labora-
tory, companion, zoo, and wild animals. Digestion and metabolic adaptations required for animal spe-
cies to consume vegetative material from grasses and leaves to nectar to insects and meat. Relation of nutrition to metabolic adaptations and physiological states, including growth, reproduction, and dis-
eases. GE credit: SciEng | SE—II. (II.) Klassen

123L. Comparative Animal Nutrition Laboratory (1)
Laboratory—3 hours. Prerequisite: Animal Biology 103, course 123 (may be taken concurrently). Labo-
atory exercises related to various reports on establish-
ment of nutritional requirements and formulation of complete diets for laboratory, companion, zoo and wild animals.—III. (III.) Klassen

124. Nutrition and Feeding of Finfishes (3)
Lecture—3 hours. Prerequisite: Biological Sciences 103 and Wildlife, Fish, and Conservation Biology 121. Principles of nutrition and feeding of fishes under commercial situations; implication of fish nutri-
tion to the conservation of endangered species. GE credit: SciEng | QL, SE, SL

127. Environmental Stress and Development in Marine Organisms (10)
Lecture—4 hours; laboratory—12 hours; discus-

sion—2 hours. Prerequisite: Biological Toxicology 101 or Biological Sciences 102 or 104 or the equivalent; Environmental Toxicology 114A or course 114 recommended. Course taught at Bodega Marine Laboratory. Effects of environmental and nutritional stress, including pollutants, on developmental and function in embryos and larvae of marine organisms. Emphasis on advanced experimental methods. (Same course as Environmental Toxicology 127.) GE credit: SciEng | QL, QL, SE, SL, WE—IV. (IV.) Cherr

129. Journalistic Practicum in Nutrition (3)
Lecture—2 hours; discussion—1 hour. Prerequisite: course 111; a course in written or oral expression or consent of instructor. Critical analysis and discussion of current, controversial issues in nutrition; the use of journalistic techniques to interpret scientific findings for the lay public. Students will be required to write several articles for completion of course may be repeated one time for credit. GE credit: SciEng | OL, QL, SE, SL, WE

130. Experiments in Nutrition: Design and Execution (2)
Laboratory—6 hours. Prerequisite: consent of instruc-
tor; course 101, 110, 111, or 114 recommended. Experiments in current nutritional problems. Experi-
mental design: students choose project and, inde-
dependently or in groups of two-three, design a proto-

col, complete the project, and report findings. May be repeated for credit up to six times (three times per instructor) with consent of instructor. GE credit: SciEng | SE—I, II, III, IV, (I, II, III) Zidenberg-Cherr

190. Proseminar in Nutrition (1)
Seminar—1 hour. Prerequisite: senior standing; course 111. Discussion of human nutrition problems. Each term will involve a different emphasis among experimental, clinical, and socio-cultural con-

munity, national and international scope. May be repeated two times for credit with consent of instruc-
tor. GE credit: SciEng | QL, VL, SE, SS—II. (II.) Zidenberg-Cherr

190C. Nutrition Research Conference (1)
Discussion—1 hour. Prerequisite: upper division standing in Nutrition or related biological science; consent of instructor. Introduction to research find-
ngs and methods in nutrition. Presentation and dis-
cussion of research by faculty and students. May be repeated for credit. (P/NP grading only.) GE credit: SE—I, II, III, IV, (I, II, III)

192. Internship (1-12)
Internship—3-36 hours. Prerequisite: one upper divi-
sion course in nutrition and consent of instructor. Work experience on or off campus in practical appli-

cation of nutrition, supervised by a faculty member. (P/NP grading only.)

197. Tutoring in Nutrition (1-2)
Discussion/laboratory—3 or 6 hours. Prerequisite: Nutrition Science, Clinical Nutrition or related major. Completion of course 101. Tutoring of stu-

dents in nutrition courses, participation in class-
groups or laboratory sections, weekly conference with instructor in charge of course: written evalua-
tions. May be repeated if tutoring a different course. (P/NP grading only.)

198. Directed Group Study (1-5) (P/NP grading only)

199. Special Study for Advanced Undergraduates (1-5) (P/NP grading only) GE credit: SE.

Graduate

201. Vitamin and Cofactor Metabolism (3)
Lecture—2 hours; discussion—1 hour. Prerequisite: one upper division nutritional biochemistry and phys-

iology course. Review of studies and relationships involving the metabolic functions of vitamins. Com-

parative nutritional aspects and the metabolism and chemistry of vitamins and vitamin-like compounds.

202. Advanced Nutritional Energetics (2)
Lecture—2 hours. Prerequisite: Animal Biology 102, 103, Neurobiology, Physiology, and Behavior 101 or the equivalent. History of nutritional energetics. Examination of energy transformations associated with food utilization. Energy expenditures at cellular, tis-

sue, and animal levels as affected by diet and physi-

ological state. Current and future feeding systems.
203. Advanced Protein and Amino Acid Nutrition (3)
Lecture—2 hours; discussion—1 hour. Prerequisite: one upper division nutrition biochemistry and physiology course. Nutritional function of protein and amino acids, including studies of the influence of dietary protein on digestion and absorption, metabolism, resistance to disease, and food intake. Study of dietary requirements and interrelationships among amino acids.

204. Mineral Metabolism (2)
Lecture—2 hours. Prerequisite: upper division nutrition or biochemistry and physiology courses. Studies of metabolic functions and nutritional interrelationships involving minerals.

219A. International Nutrition (3)
Lecture—3 hours. Prerequisite: graduate standing; undergraduates only admitted with consent of instructor after completion of course 1111 AVE. Epidemiology, etiology, and consequences of undernutrition, with particular focus on the nutritional problems of children and women in low-income populations. Offered in alternate years.—II. Dewey

219B. International Nutrition (3)
Lecture—3 hours. Prerequisite: course 219A. Intervention programs to prevent or ameliorate nutritional problems in low-income populations. Planning, implementing, and evaluating nutrition intervention programs. Offered in alternate years.—III. Dewey

230. Experiments in Nutrition: Design and Execution (2)
Laboratory—6 hours. Prerequisite: consent of instructor; courses 201, 202, 203, 204, or the equivalent recommended. Student selected projects to enhance laboratory skills; independently, or in groups of two-three students, design and carry out the experiment, analyze the results and report the findings. May be repeated for credit up to six times (limit of three times per instructor) with consent of instructor.—I, II, III. (I, II, III)

250. Metabolic Homeostasis (3)
Lecture—2 hours; discussion—1.5 hours. Prerequisite: passing the Nutrition Graduate Group Preliminary Examination or consent of instructor. Preference given to students with advanced standing in the Nutrition Graduate Group. Regulatory mechanisms of carbohydrate, lipid, and protein homeostasis; mechanisms of metabolic enzyme regulation and of the metabolic hormones: homeostatic mechanisms and interactions; fuel-fuel interactions; nutrition energy balance.

251. Nutrition and Immunity (2)
Lecture/discussion—2 hours. Prerequisite: Pathology, Microbiology and Immunology 126, Medical Microbiology 107 or the equivalent. Animal Biology 102. Cellular and molecular mechanisms underlying interactions of nutrition and immune function, including modulation of immunocompetence by diet and effects of immune responses on nutritional needs. Lectures and discussion explore implications for resistance to infection, autimmunity and cancer. Offered in alternate years.—II. (I) Klasing, Erickson, Stephenson

252. Nutrition and Development (3)
Lecture—3 hours. Prerequisite: courses 201, 202, 203, 204. Relationship of nutrition to prenatal and early postnatal development.—I. (I, II) Koen, Oteiza

253. Control of Food Intake (3)
Lecture—2 hours; discussion—1 hour; 2 or 3 laboratory demonstrations per quarter. Prerequisite: course 201 or 202 or consent of instructor. Comprehensive study of the biochemical, nutritional, behavioral, and physiological mechanisms controlling food intake. Subject matter will be approached through lectures, laboratory demonstration and discussions where students and staff will critically evaluate the literature. Offered in alternate years.

254. Applications of Systems Analysis in Nutrition (3)
Lecture—2 hours; discussion—1 hour. Prerequisite: courses 201, 202, 203, 204 or the equivalent. Quantitative aspects of digestion and metabolism; principles of systems analysis. Evolution of models of energy metabolism as applied in current feeding systems and evaluation of mechanistic models used analytically in support of nutritional research. Offered in alternate years.

257. Selected Topics in Nutritional and Hormonal Control of Nitrogen Metabolism (2)
Lecture—2 hours. Prerequisite: courses 201 through 204, Physiological Sciences 205 A-B, or the equivalent. Quantitative and qualitative aspects of nitrogen metabolism, biochemistry of dietary intake, hormones and diet-hormone interactions which affect nitrogen metabolism, including protein synthesis-degradation, amino acid synthesis-catabolism, nitrogen transpendence on current literature. Offered in alternate years.

258. Field Research Methods in International Nutrition (3)
Lecture/discussion—3 hours. Prerequisite: graduate standing or consent of instructor. Topics related to implementation of nutrition field research in less-developed countries, including ethics; relationships with local governments, community, and scientific entities; data collection techniques and quality assurance; field logistics; research budgets; and other administrative and personal issues. Offered in alternate years.—II. Dewey

259. Nutrition and Aging (2)
Lecture—2 hours; discussion—1 hour. Prerequisite: courses 201, 202, 203 and 204. Interaction between nutrition and aging. Topics include physiological/biochemical basis of aging, age-related changes affecting nutritional requirements, mortality rate, assessment of nutritional status in the elderly, and relationship between developmental nutrition and the rate of aging. Offered in alternate years.

260. Nutrition During Pregnancy (6)
Lecture—5 hours; term paper. Prerequisite: acceptance into the Master’s Degree program of Advanced Studies in Maternal and Child Nutrition. Overview of the anatomical, physiological and biochemical changes that occur during pregnancy and early development. Discussion and evaluation of nutritional/lifestyle factors associated with pregnancy outcomes and nutrition programs/interventions for pregnant women.—I. (I) Heining

261. Lactation and Infant Nutrition (6)
Lecture—5 hours; discussion—1 hour. Prerequisite: course 260. Overview of the physiological and biochemical processes underlying human lactation and nutritional needs of infant. Development of skills in assessment, nutrition counseling, education and support of new mothers and their families.—II. (II) Heining

262. Child and Adolescent Nutrition (6)
Lecture—5 hours; discussion—1 hour. Prerequisite: course 261. Relationships among nutrition, growth, and development during childhood and adolescence. Nutritional assessment for normal and high-risk groups; psychological and economic factors contributing to nutritional status. Nutritional needs and interventions for special groups, including obese children/adolescents, athletes, and eating disorders.—III. (III) Heining

Lecture—3 hours; term paper. Prerequisite: graduate standing; restricted to students enrolled in the MAS program and graduate students by consent of instructor. Application of epidemiological principles to the study of maternal and child nutrition. Topics include quantitative and qualitative study procedures, including study design, data collection, and related analytical techniques.—I. (I) Heining

264A. Current Topics in Maternal and Child Nutrition: Principles of Adult Education (2)
Seminar—2 hours. Prerequisite: graduate standing; restricted to students enrolled in the MAS program and graduate students by consent of instructor. Current scientific literature related to Maternal and Child Nutrition. Topics include epidemiology, evidence-based practice, breastfeeding promotion, and nutritional assessment of populations.—II. Heining

264B. Current Topics in Maternal and Child Nutrition: Epidemiology and Evidence-Based Practice (2)
Seminar—2 hours. Prerequisite: graduate standing; restricted to students enrolled in the MAS program and graduate students by consent of instructor. Current scientific literature related to Maternal and Child Nutrition. Topics include epidemiology, evidence-based practice, breastfeeding promotion, and nutritional assessment of populations.—II. Heining

264C. Current Topics in Maternal and Child Nutrition: Public Policy Development and Implementation (2)
Seminar—2 hours. Prerequisite: graduate standing; restricted to students enrolled in the MAS program and graduate students by consent of instructor. Current scientific literature related to Maternal and Child Nutrition. Topics include nutrition surveillance and monitoring, as well as public policy development and implementation.—III. Heining

270. Scientific Ethics in Biomedical Studies: Emphasis on Nutrition (3)
Lecture—1 hour; discussion—1 hour; term paper. Scientific ethics in biomedical studies, especially nutrition. Discussion and case study presentations on scientific integrity, fraud, misconduct, conflict of interest, human and animal protection issues. Not open for credit to students who have completed course 4928.—Steinberg

290. Beginning Nutrition Seminar (2)
Lecture/discussion—1 hour; seminar—1 hour. Prerequisite: first year graduate standing or consent of instructor. Application of epidemiological principles to research on topics in nutrition with emphasis on literature review and evaluation in this field. Students give oral presentations on relevant topics.—II, III

290C. Research Conference (1)
Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Major professors lead research discussions with their graduate students. Research papers are reviewed and presentation formulas presented and evaluated. Format will combine seminar and discussion style. (SU/grading only)—I, II, III. (I, II, III)

291. Advanced Nutrition Seminar (1)
Seminar—1 hour. Prerequisite: second-year graduate standing. Advanced topics in nutrition research. Multiple sections may be taken concurrently for credit. May be repeated for credit. (SU/grading only)—I, II, III. (I, II, III)

293A. Current Topics in Obesity, Food Intake and Energy Balance (3)
Lecture—1 hour; seminar—1 hour; discussion—1 hour. Prerequisite: graduate standing or course 129. Undergraduates with upper division standing with at least one writing course may enroll with consent of instructor. Current research and its evaluation. Principles of experimental design and scientific background for given article. Articles summarized for posting on Internet for use by healthcare professionals. May be repeated for credit with consent of instructor

293B. Current Topics in Obesity, Food Intake and Energy Balance with Special Topics (3)
Lecture—1 hour; seminar—1 hour; discussion—1 hour. Prerequisite: graduate standing or course 129. Undergraduates with upper division standing with at least one writing course may enroll with consent of instructor. A continuation of course 293A, with additional special topics. May be repeated for credit up to 3 times with consent of instructor.

294A. Current Topics in Developmental Nutrition (2)
Seminar—2 hours. Prerequisite: course 114 or 252 or consent of instructor. Effects of nutrition on embryology, morphogenesis, and developmental mechanisms. May be repeated for credit when topic differs.—I. (I)
297T. Supervised Teaching in Nutrition (1-3) teaching under faculty supervision—3/9 hours. Prerequisite: graduate standing in nutrition or consent of instructor. Practical experience in teaching nutrition at the university level; curriculum design and evaluation; preparation and presentation of material. Assistance in laboratories, discussion sections, and evaluation of student work. (S/U grading only.)

298. Group Study (1-5) (S/U grading only)

Professional

492A. Professionalism: An Academic Perspective (2) Lecture/discussion—2 hours. Prerequisite: graduate standing. For graduate students in their initial quarter of residence. Professionalism topics are presented and examples drawn from both the biological and social sciences.

492C. Grant Writing (3) Lecture—1.5 hours, discussion—1.5 hours. Prerequisite: graduate standing. Preparation of grants for governmental agencies (particularly NIH and USDA) and private foundations. Students will write a research grant or fellowship application. May be repeated once for credit with consent of instructor. Offered in alternate years.

Nutritional Biology (A Graduate Group)

Sheri Zidenberg-Cherr, Ph.D., Chairperson of the Group
Graduate Group Office. 1249 Meyer Hall

Faculty

Lars Berglund, Ph.D., Professor (Endocrinology)
Kenneth H. Brown, M.D., Professor (Nutrition)
C. Christopher Carter, Ph.D., Professor (Animal Science)
Andrew J. Clifford, Ph.D., Professor (Nutrition)
Douglas E. Conkin, Ph.D., Associate Professor (Animal Science)
Edward J. DePeters, Ph.D., Professor (Animal Science)
Kathryn G. Dewey, Ph.D., Professor (Nutrition)
Kent L. Erickson, Ph.D., Professor (Cell Biology and Human Anatomy)
James G. Fadel, Ph.D., Professor (Animal Science)
Andrea J. Fassett, D.V.M., Ph.D., Associate Professor (Molecular Biosciences)
J. Bruce German, Ph.D., Professor (Food Science and Technology)
M. Eric Gershwin, M.D., Professor (Internal Medicine)
Ralph Green, M.D., Professor (Pathology)
Jean-Xavier Guinard, Ph.D., Professor (Food Science and Technology)
Fawaz G. Hajj, Ph.D., Assistant Professor (Nutrition)
Silas S. O. Hung, Ph.D., Professor (Animal Science)
Thomas Jue, Ph.D., Professor (Biological Chemistry)
Sidika E. Kasim-Karakas, M.D., Professor (Internal Medicine)
George A. Kayser, M.D., Ph.D., Professor (Internal Medicine)
Carl L. Keen, Ph.D., Distinguished Professor (Nutrition, Internal Medicine)
Kirk C. Klausing, Ph.D., Professor (Animal Science)
Jennifer A. Larsen, Ph.D., Assistant Professor of Clinical Nutrition (Molecular Biosciences)
Sa I. Lönnerdal, Ph.D., Professor (Nutrition, Internal Medicine)

Stanley L. Marks, B.V.Sc., Ph.D. Associate Professor (Medicine and Epidemiology)
Roger B. McDonal, Ph.D., Associate Professor (Nutrition)
Alyson Mitchell, Ph.D., Professor (Food Science and Technology)
Patricia Oteiza, Ph.D., Associate Professor (Nutrition, Environmental Toxicology)
Anthony F. Phillips, M.D., Professor (Pediaitrics)
Jon I. Ramsey, Ph.D., Associate Professor (Molecular Biosciences)
Helen E. Raybould, Ph.D., Professor (Anatomy, Physiology and Cell Biology)
John C. Rutherford, Ph.D., Professor (Endocrinology)
Dorothy W. Gietzen, Ph.D., Professor Emeritus (Nutrition)
José Santos, Ph.D., Associate Professor (WVTRC)
Francene M. Steinberg, Ph.D., R.D., Professor (Nutrition)
Charles Stebbins, Ph.D., Professor (Cardiovascular Medicine)
Judith S. Stern, Sc.D., R.D., Distinguished Professor (Nutrition)
Christine F. Stewart, Ph.D., Assistant Professor (Nutrition)
Natalie Torok, Ph.D., Associate Professor (Gastroenterology & Hepatology)
Craig H. Warden, Ph.D., Associate Professor (Neurobiology, Physiology, and Behavior)
Vincent A. Ziboh, Ph.D., Professor (Dermatology, Biological Chemistry)
Angela M. Zivkovic, Ph.D., Assistant Professor (Nutrition)

Emeriti Faculty

Harry W. Colvin, Jr., Ph.D., Professor Emeritus
Robert E. Feney, Ph.D., Professor Emeritus
Richard A. Freedland, Ph.D., Professor Emeritus
William N. Garrett, Ph.D., Professor Emeritus
Dorothy W. Gietzen, Ph.D., Professor Emeritus
C. Richard Grau, Ph.D., Professor Emeritus
Louis Grivetti, Ph.D., Professor Emeritus

Graduate Study. The Graduate Group in Nutritional Biology offers programs of study and research leading to the M.S. and Ph.D. degrees. The great diversity of research interests represented by the faculty members allows students to choose from a wide variety of themes: nutritional biochemistry, animal nutrition, nutrition and development, nutrient bioavailability, human/clinical nutrition, nutrition and behavior, nutritional energetics, community nutrition, community health, maternal and child nutrition, nutrition and endocrinology, international nutrition, obesity/body composition, physiology of digestion, nutrition and chronic disease, culture and nutrition, nutrition and gene expression, nutrition and aging, food preferences, nutrition and immunity, diet and exercise, dietary assessment, protein and lipid metabolism, food intake regulation, nutrition education.

Graduate Advisers. Consult the Nutritional Biology Graduate Group office.

Courses in Nutritional Biology (NUB)

Graduate

210A. Advanced Nutrition I: Nutrition and Metabolism, Macronutrients (5) Lecture—4 hours; discussion—1 hour. Prerequisite: admission to the Nutritional Biology Graduate Group or consent of instructor. Class size limited to 30 students. Advanced general biochemistry, concepts in animal nutrition, nutrition and development, nutrient bioavailability, human/clinical nutrition, nutrition and behavior, nutritional energetics, community nutrition, community health, maternal and child nutrition, nutrition and endocrinology, international nutrition, obesity/body composition, physiology of digestion, nutrition and chronic disease, culture and nutrition, nutrition and gene expression, nutrition and aging, food preferences, nutrition and immunity, diet and exercise, dietary assessment, protein and lipid metabolism, food intake regulation, nutrition education. —I (II) Cheira

210C. Advanced Nutrition III: Nutrition in Health and Disease (5) Lecture—4 hours; discussion—1 hour. Prerequisite: admission to the Nutritional Biology Graduate Group or consent of instructor. Class size limited to 30 students. Integration of biochemical, physiological, and genetic aspects of nutrition in the context of clinical and epidemiological observations related to health and disease, including obesity and diabetes, cancer, vascular and neurodegenerative diseases, osteoporosis, and birth defects. Review and consideration of governmental. —II (III) Miller

290C. Research Group Conference (1) Discussion—1 hour. Prerequisite: graduate standing. Weekly conference on research problems, progress and techniques in animal sciences. May be repeated for credit. (S/U grading only)—I, II, III. (I, II, III)

299. Directed Group Study (1-5) Prerequisite: graduate standing in Nutritional Biology Graduate Group, or consent of instructor. May be repeated three times for credit when topics differs and consent of instructor. —I, II, III. (I, II, III)

299. Research (1-12) Prerequisite: consent of instructor. May be repeated for credit. (S/U grading only)—I, II, III. (I, II, III)
Nutrition Science

(College of Agricultural and Environmental Sciences)

Faculty
See the Department of Nutrition, on page 454.

The Major Program
The study of nutrition encompasses all aspects of the consumption and utilization of food and its constituents. Key areas of study include: the biochemical reactions important to the utilization of nutrients and food constituents; the impact of diet on health and disease; and, nutrition-related policy and public health issues. The nutrition science major includes two options for studying these areas: nutritional biology and nutrition in public health.

The Program. Nutrition as it is taught on the Davis campus is a biological science and requires a complete background in chemistry and biology, along with calculus and physics (nutritional biology option) or economics (nutrition in public health option). These courses are generally completed during the first two years, and along with biochemistry, must be completed before most nutrition classes can be taken. During their junior and senior years, students in the nutritional biology option take additional course work in biochemistry, physiology, and toxicology. Students in the nutrition in public health option take additional course work in social and health-related sciences.

Career Alternatives. Both options are excellent preparation for professional or graduate training in medicine, public health, or other health sciences. The nutritional biology option also provides preparation for technical work in nutrition in the animal, food and pharmaceutical industries. The nutrition in public health option prepares students for jobs in administrative, teaching, or public health/public service positions.

B.S. Major Requirements:

Preparatory Subject Matter .......... 63-66
Biological Sciences 2A, 2B & 2C .........15
Chemistry 2A-2B-2C and 8A-8B, or 118A-
118B, or 128A-128B and 129A ........21-23
Nutrition 10 .....................................3
Plant Sciences 120 ......................... 4
Sociology 46A or Psychology 41 ..........4
The remaining preparatory subject matter is based on which major option you choose.
Nutritional Biology option:
Anthropology 2 or Psychology 1 or
Sociology 1 or 3 ......................... 4-5
Mathematics 16A-16B .................... 6
Physics 1A-1B ............................... 6
Nutrition in Public Health option:
Anthropology 2 or Sociology 1 or 3 . 4-5
Economics 1A-1B .......................... 8
Psychology 1 ..................................4

Depth Subject Matter ................. 76-85
Biological Sciences 101 ...................4
Food Science and Technology 100A and
100B .............................................8
Microbiology 101 ......................... 5
Neurobiology, Physiology, and Behavior
101, 101L, 102, 103 ........................ 8
Nutrition 111AV, 111B, 112, 116A ..........8
The remaining depth subject matter is based on which major option you choose when completing your preparatory courses.
Nutritional Biology option:
Biological Sciences 102, 103 .............6
Molecular and Cellular Biology 120-L ....6
Neurobiology, Physiology, and Behavior
114, 115 .......................................3
Nutrition 104, 117 ..........................10
Nutrition Restricted Electives ..........15-20

Selection of courses must be made in consultation with a faculty advisor prior to or upon reaching the 120 unit level: Exercise Biology 110; Nutrition 99, 105, 114, 115, 116B, 118, 120AN, 120BN, 122, 123, 124, 127, 130, 190, 192, 199

Nutrition in Public Health option:
Animal Biology 102, 103 ..................10
Exercise Biology 110 ..................... 3
Nutrition 118 .................................4
Nutrition Restricted Electives ..........15-20
Selection of courses must be made in consultation with a faculty advisor prior to or upon reaching the 120 unit level: Food Service Management 120, 122, Nutrition 99, 104, 105, 114, 116B, 117, 120AN, 120BN, 129, 130, 190, 192, 199

Restricted Electives .......................8-12
Choose one of the following areas to complete the restricted elective units in: Agricultural and Health Policy:
Agricultural Economics 15, 120, Public Health Sciences 175W, or Political Science 109
Cultural Diversity & Community Change:
African American and African Studies 100, American Studies 55, Agricultural and Resource Economics 112, Communication 136, Community & Regional Development 2, 152, 176, International Agricultural Development 10, 103, Science and Society 130, or Sociology 181
Community Health and Education:
Communication 165, Education 110, 120, 153, Psychology 126, 130 or Sociology 154

B.S. Major Requirements:

Preparatory Subject Matter .......... 63-66

Total Units for the Degree .......... 139-151

Major Adviser. B. L. Liengner

Advising Center for the major is located in 3202 Meyer Hall 530-752-2512.

Dietetics Internship. To fulfill the academic requirements for an internship in Dietetics, students are strongly advised to declare the Clinical Nutrition option no later than the first quarter of the junior year for selection of courses.

Graduate Study. The Department of Nutrition offers programs of study and research leading to the M.S. and Ph.D. degrees in Nutrition. For information on graduate study contact the graduate adviser. See Graduate Studies, on page 171.

Obstetrics and Gynecology

See Medicine, School of, on page 396.

Organizational Studies

See Sociology, on page 304.

Oceanography

(College of Letters and Science)

Oceanography is the study of the earth’s oceans, investigating connections between geological, biological, chemical and physical processes in the marine realm, and the interactions between the Earth’s ocean/atmosphere system. The interdisciplinary minor in oceanography is for students with backgrounds in any of these fields, as well as those interested in marine policy and conservation. The curriculum reflects the integrative nature of oceanography, with core courses covering the major disciplines in oceanography and elective courses that allow students to cater the minor to their interests. The oceanography minor includes courses taught at the Davis campus and courses offered at Bodega Marine Laboratory. The minor is sponsored by the Department of Earth and Planetary Sciences in 2119 Earth and Physical Sciences Building.

Minor Program Requirements:

Oceanography ........................................ 22-24
Geology 150A/Environmental Science and Policy 150A .................. 4
Geology 150B/Environmental Science and Policy 150B .................. 3
Geology 150C/Environmental Science and Policy 150C .................. 4
Environmental Science and Policy 152 ....... 3
An electives sequence, with one course from group (a) and one to two additional electives from either groups (a) or (b) ........................................ 8-10
(a) Geology 116N/Environmental Science and Policy 116N, Atmospheric Science 158, Wildlife, Fish, and Conservation Biology 120, 157, Environmental Toxicology 120, Evolution and Ecology 112, 115;
(b) Atmospheric Science 121A, 121B, Geology 108, 109, 152, Evolution and Ecology 106, 114, Environmental Science and Policy 124, Environmental Toxicology 127

Note. Courses Geology 150C/Environmental Science and Policy 150C, Environmental Science and Policy 124, 152, Environmental Toxicology 127, and Evolution and Ecology 106 and 114 are taught at Bodega Marine Laboratory.

Minor Adviser. T.M. Hill (Geology), 3115 Earth and Physical Sciences Building 530-752-0179

Ophthalmology

See Medicine, School of, on page 396.

Quarter Offered: I-II-Fall; II-Winter; III-Spring; IV-Summer; 2015-2016 offering in parentheses.

Pre-Fall 2011 General Education (GE): AHC=Arts and Humanities; SCIEng=Science and Engineering; Sosci=Social Sciences; Div=Domestic Diversity; Writ=Writing Experience

Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SE=Science and Engineering; SS=Social Sciences; ACHG=American Cultures, DD=Domestic Diversity, OL=Oral Skills, GL= Quantitative, SL=Scientific, VL=Visual, WC=World Cultures; Writ=Writing Experience
Orthopaedic Surgery

Performance Studies (A Graduate Group)

Maxine Craig, Chairperson of the Group
Marian Bilheimer, Graduate Coordinator

Arts Group Graduate Office, 216B Art Building; 530-754-6973; mbilheimer@ucdavis.edu
http://performancesstudies.ucdavis.edu/

Faculty: Executive: Maxine Craig (Women and Gender Studies), Joseph Dumit (Science and Technology Studies, Anthropology), Peter Lichtenfels (Theatre and Dance), Halifu Osumare (African American and African Studies)

There are over 45 affiliated faculty in departments throughout HAVCS and other faculty, all of whom offer courses relevant to the discipline.

Graduate Study. The Ph.D. in Performance Studies is a four-year program. In the first two years of study, students develop an understanding of performance by drawing from a range of regular course offerings in the field to identify, explore, and define a field or fields of research. Students are required to complete four core courses out of five in performance studies, and one colloquium course. Each individual program is then built from seminar and/or practice as research courses, as well as independent or group studies, development of one or more of the four strands of the program: Comparative Medias, Embodiments, Cultures/Ecologies, and History/Text. A wide range of affiliated faculty offer courses throughout the HAVCS faculty, and Designated Emphases are available in Studies in Performance and Practice, African American and African Studies, Critical Theory, Feminist Theory and Research, Native American Studies, and Writing, Rhetoric and Composition Studies. Students are required to complete a minimum of 60 units before taking the qualifying examination. No more than 12 units may be taken at a graduate level unless specifically approved by the Ph.D. graduate program adviser.

Main Program Adviser: Lynette Hunter (Theatre and Dance)

Graduate Advisers: Emily Albu (Spanish & Classics), Susan Avila (Design), Seeta Chaganti (English), Maxine Craig (Women and Gender Studies), Halifu Osumare (African American and African Studies), Kriss Ravetto (Cinema and Technocultural Studies), Henry Spiller (Music), Archana Venkatesan (Comparative Literature, Religious Studies), Hegnar Watenauphaug (Art, Art History)

Courses in Performance Studies (PFS)

Graduate

200. Methods and Materials in Theatre Research (4)
Seminar—3 hours; term paper. Essential research tools in theatre and related fields; bibliographies, primary sources; methods of evaluating and presenting evidence; delineating research areas in the field. I. (I)

259. Topics in Contemporary Theatre and Performance (4)
Seminar—3 hours; term paper. Special topics designed to study in depth aspects of contemporary performance including performance analysis, cultural and historical context, modes of production, theoretical and political entailments, and issues of spectatorship; e.g., "Brecht and After," "British Theatre," "Race and Gender in Performance." May be repeated five times for credit—II, III, III, III, III.

265A. Performance Studies: Modes of Production (4)
Seminar—3 hours; term paper. Introduction to the literature of performance production in a variety of media: theatre, dance, film, video, computer-based, looking at cultural, aesthetic, rhetorical and political theory. May be repeated three times for credit when topic differs. Offered in alternate years.

265B. Performance Studies: Signification and the Body (4)
Seminar—3 hours; term paper. Introduction to analysis of the body in performance, drawing on theoretical models from several fields. May be repeated three times for credit when topic differs. Offered in alternate years.

265C. Performance Studies: Performance and Society (4)
Seminar—3 hours; term paper. Introduction to the role of performance (broadly defined), in everyday life, sociopolitical negotiation, identity, social movements, the media, and the state. May be repeated three times for credit when topic differs. Offered in alternate years.

265D. Performance Studies: Theory, History, Criticism (4)
Seminar—3 hours; term paper. Introduction to the theory, history and criticism, informing performance studies. May be repeated three times for credit when topic differs. Offered in alternate years.

270A. Individually Guided Research in Performance Studies (4)
Discussion—1 hour; independent study; extensive writing. Prerequisite: course 200; one from course 265A, B, C, or D; consent of instructor. Restricted to students in the Graduate Group PhD in Performance Studies. Individually guided research, under the supervision of a faculty member, on a Performance Studies topic related to the student’s proposed dissertation project to produce a dissertation prospectus.

270B. Individually Guided Research in Performance Studies (4)
Discussion—1 hour; independent study; extensive writing. Prerequisite: course 200; one of courses 265A, B, C, or D; consent of instructor. Restricted to students in the Graduate Group PhD in Performance Studies. Individually guided research, under the supervision of a faculty member, on a Performance Studies topic related to the student’s proposed dissertation project to produce a dissertation prospectus.

270C. Individually Guided Research in Performance Studies (4)
Discussion/labatory—2 hours; fieldwork; term paper. Prerequisite: course 200; one of courses 265A, B, C, or D; consent of instructor. Restricted to students in the Graduate Group PhD in Performance Studies. Individually guided research, under the supervision of a faculty member, on a Performance Studies topic related to the student’s proposed dissertation project to produce a dissertation prospectus.

290. Colloquia in Performance Studies (4)
Lecture-discussion—2 hours; discussion/labatory—1 hour; term paper. Prerequisite: registration in Performance Studies Graduate Group and prior to Qualifying Examination. Designed to provide cohort identity and faculty exchange. Opportunity to present papers, hear guest lecturers, and see faculty presentations, gather for organizational and administrative new, exchange of information and make announcements. Course must be taken every year that a Performance Studies graduate is registered, prior to taking the Qualifying Examination. May be repeated four times for credit. Limited to four units per year. (S/U grading only.)—II, III.

298. Group Study (1-5)
Independent study—1-5 hours. Prerequisite: consent of instructor. I, II, III, IV, V.

299. Individual Study (1-12)
Prerequisite: consent of instructor. (S/U grading only.)—I, II, III, IV, V.

299D. Dissertation Research (1-12)
Prerequisite: consent of advisor, graduate student. (S/U grading only.)—I, II, III, IV, V.

Professional

459. Approaches to Theatre and Dance (4)
Seminar—3 hours; term paper; project. Prerequisite: consent of instructor; advanced graduate students. Work on approaches to theatre, dance, film/video, design and performance, with a focus on methodology and professional development. May be repeated five times for credit. Offered irregularly.

Pharmacology and Toxicology

See Medical Pharmacology and Toxicology (PHA), on page 411; Molecular Biosciences (VMB), on
Pharmacology and Toxicology (A Graduate Group)

203. Principles of Pharmacology and Toxicology III (4)
Lecture—4 hours. Prerequisite: courses 201 and 202. Integrated physiological systems, cardiovascular and nervous systems and how drugs and toxicants act to perturb function. —III. (III.) Berman, Gelli

230. Advanced Topics in Pharmacology and Toxicology (1-3)
Lecture/discussion/seminar—1 hour each (course format can vary at option of instructor). Prerequisite: course 201 and consent of instructor. In-depth coverage of selected topics for graduate students in Pharmacology-Toxicology and related disciplines: topics determined by instructor in charge for each quarter. —I, II, III, (II, III, III)

277. Life and Death Decisions at the Cellular Level (2)
Lecture—2 hours. Prerequisite: undergraduate or graduate introductory course in cell biology (such as Biological Sciences 104), and general biochemistry (Molecular and Cellular Biology 121 or 122) required; restricted to graduate standing or consent of instructor. Fundamental concepts in cell signaling; signaling pathways as related to cell death and a variety of human diseases including cancer, Alzheimer’s, and Parkinson’s. —III. (III.) Goldkorn

290. Seminar (1)
Current topics in pharmacology and toxicology. (S/U grading only.)—I, II, III. (II, II, III)

290C. Advanced Research Conference (1)
Lecture/discussion. Provide credit for participation in and attendance at research conferences. May be repeated three times for credit. (S/U grading only.)—I, II, III, (II, II, III, III, III)

299. Research (1-12)
(S/U grading only.)

Philosophy

[College of Letters and Science]
David Copp, Ph.D., Chairperson of the Department
Department Office. 1240 Social Sciences and Humanities Building 530-752-0703, http://philosophy.ucdavis.edu

Faculty
Aldo Antonelli, Ph.D., Professor
David Copp, Ph.D., Distinguished Professor Cody Gilmore, Ph.D., Associate Professor James R. Grice, Ph.D., Professor Elaine M. Landry, Ph.D., Professor George J. Matthey II, Ph.D., Senior Lecturer Robert May, Ph.D., Professor Roberta Millstein, Ph.D., Professor Bernard Maloney, Ph.D., Associate Professor Marina A. L. Oshana, Ph.D., Professor Adam Sennett, Ph.D., Associate Professor Jan Szafi, Ph.D., Professor

Emeriti Faculty
William H. Bossart, Ph.D., Professor Emeritus Gerald Drwing, Ph.D., Distinguished Professor Emeritus

201. Principles of Pharmacology and Toxicology I (5)
Lecture—3 hours. Prerequisite: Biological Sciences 102 and Neurobiology, Physiology, and Behavior 101. First of three courses presenting fundamental principles of pharmacology and toxicology. Introducory overview of basic concepts in pharmacology and toxicology, followed by in-depth blocks on fate processes of chemicals in the body, fate processes in tissues and selective responses, selective toxicity employed therapeutically.—I. (I.) Puschner, Knirsch

202. Principles of Pharmacology and Toxicology II (4)
Lecture—4 hours. Prerequisite: course 201. The second of three courses presenting fundamental principles of pharmacology and toxicology. Principles of pharmacodynamics and mechanisms of drug/toxicant actions.—II. (II.) Angelastlo, Eiserich

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2015-2016 offering in parentheses
Pre-Fall 2011 General Education (GE): ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Domestic Diversity; Writ=Writing Experience
Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SE=Science and Engineering; SS=Social Sciences;
ACGH=American Cultures, DD=Domestic Diversity, OL=Oral Skills, QL=Quantitative, SL=Scientific, VL=Visual, WC=World Cultures; Writ=Writing Experience
Graduate Advisers. Obtained by writing to the Graduate Adviser. Ph.D. degrees. Detailed information may be obtained in the Department office. Discussions. Information can be obtained in the Department Activities. The Philosophy department sponsors a lecture series with well-known philosophers who present papers in their fields of expertise. The department also organizes ongoing focus groups and department workshops. Undergraduate students are welcome to attend and join these discussions. Information can be obtained in the Department office.

Graduate Study. The Department of Philosophy offers programs of study leading to the M.A. and Ph.D. degrees. Detailed information may be obtained by writing to the Graduate Adviser.

Graduate Adviser. Cody Gilmore

Courses in Philosophy (PHI)

Lower Division

1. Introduction to Philosophy (4)
   Lecture—3 hours; discussion—1 hour. Problems of philosophy through major writings from various periods. Problems are drawn from political, aesthetic, religious, metaphysical, and epistemological concerns of philosophy. GE credit: ArtHum, Writ | AH, WE, —I, II, III, (I, II, III.)

2. Critical Reasoning (4)
   Lecture—3 hours; discussion—1 hour. Criteria of good reasoning in everyday life and in science. Topics to be covered may include basic principles of deduction and induction; fallacies in reasoning; techniques and aids to reasoning; principles of scientific investigation; aids to clarity. Not open to students who have completed course 6. GE credit: Writ | WE.

7. Philosophical Perspectives on Sexuality (3)
   Lecture—3 hours. Philosophical issues related to sexuality, including, but not limited to, ethical and social issues regarding sexual practice, orientation, classification and identity. GE credit: ArtHum | AH, —II.

11. Asian Philosophy (4)
   Lecture—3 hours; discussion—1 hour. Survey of the main philosophical systems of south and east Asia: Hinduism, Buddhism, Confucianism, and Taoism. Topics include the nature of reality, including God, the universe and the self, human knowledge, and the proper conduct of human life. Offered in alternate years. GE credit: ArtHum, Div, Writ | AH, WC, WE, —I, II, III.

12. Introduction to Symbolic Logic (4)
   Lecture—3 hours; discussion—1 hour. Syntax and semantics of the symbolic language sentence logic. Syntax and semantics of the symbolic language sentence logic. Translation between sentence logic and English. Truth table interpretation of sentence logic. Proof techniques. Application of truth tables and proof techniques to arguments in English. Not open to students who have taken course 112, 113, 134, or 135 and passed with a grade of C or better. GE credit: AH, —I, II, III, (I, II, III.)

13. Minds, Brains, and Computers (4)
   Lecture—3 hours; discussion—1 hour. Contemporary theories of the nature of the mind. The mind as a brain process and as a computer process. Ways in which neuroscience, artificial intelligence and psychology seek to understand mind. GE credit: SciEng or SocSci, Writ | SE, SL, SS, WE. —Molyneux

13G. Minds, Brains, and Computers Discussion (1)
   Discussion—1 hour. Restricted to concurrent enrollment in course 13. Small group discussion and preparation of short papers for course 13. GE credit: WE. —Molyneux

14. Ethical and Social Problems in Contemporary Society (4)
   Lecture—3 hours; discussion—1 hour. Philosophical issues and positions involved in contemporary moral and social problems. Possible topics include civil disobedience and revolution, racial and sex discrimination, environmental protection, technology and human values, sexual morality, freedom in society. GE credit: ArtHum, Div, Writ | AH, WE.

15. Bioethics (4)
   Lecture—3 hours; discussion—1 hour. Critical analysis of normative issues raised by contemporary medical medicine and biology. Possible topics include euthanasia, abortion, reproductive technologies, genetic engineering, practitioner/patient relationships, allocation of medical resources, experimentation on human subjects. GE credit: ArtHum, Writ | AH, WE.

16. Philosophical Foundations of American Democracy (4)
   Lecture—2 hours; discussion—1 hour. The philosophical underpinnings of democratic government and the tension between the goals of providing security and of preserving democracy and civil liberties. Illustration of the tension through focus on issues related to war and terrorism. GE credit: ACGH, AH, WE. —I. Copp

17. Language, Thought, and World (4)
   Lecture—3 hours; discussion—1 hour. Puzzles in the philosophy of language, such as what language is, how language conveys thoughts, whether we each speak our own private language, and what we can learn about the world by studying language. GE credit: SocSci, Writ | SS, WE. —May

21. History of Philosophy: Ancient (4)
   Lecture—3 hours; discussion—1 hour. Survey of Greek philosophy with special attention to the Pre-Socratics, Plato, and Aristotle. GE credit: ArtHum, Writ | AH, WE, —I, II, III, (I, II, III.)

22. History of Philosophy: Early Modern (4)
   Lecture—3 hours; discussion—1 hour. Survey of major figures in philosophy of the seventeenth and eighteenth centuries, with emphasis on Descartes, Hume, and Kant. GE credit: ArtHum, Writ | WC, WE. —II. (II) Mattey

24. Introduction to Ethics (4)
   Lecture—3 hours; discussion—1 hour. Reading of historical and contemporary philosophical works in ethics. Topics include the nature of morality, the justification of major ethical theories, such as consequentialist, deontological, and virtue theories. GE credit: ArtHum, Writ | AH, WE. —II.

30. Introduction to Philosophy of Science (4)
   Lecture—3 hours; discussion—1 hour. Basic problems in the philosophy of science, common to the physical, biological, and social sciences. Analysis of explanation, confirmation theory, observational and theoretical terms, the nature of theories, operationalism and behaviorism, realism, reduction. Not open to credit to students who have taken course 104. GE credit: ArtHum or SciEng, Writ | AH or SE, SL, WE. —Landry, Millstein

31. Approaching Scientific Reasoning (4)
   Lecture—3 hours; discussion—1 hour. Introduction to scientific hypotheses and the kinds of reasoning used to justify such hypotheses. Emphasis on adequate justification, criteria, and strategies for distinguishing scientific from pseudoscientific theories. Concrete historical and contemporary cases. GE credit: ArtHum or SciEng | AH or SE, SL, WE. —Griesemer

32. Understanding Scientific Change (4)
   Lecture—3 hours; discussion—1 hour. Concepts of scientific change in historical and philosophical perspective. Survey of models of growth of knowledge, 17th century to present. Relationship between logic of theories and theory choice. Kuhn’s revolution model. Examples from various sciences. GE credit: ArtHum or SciEng, Writ | AH or SE, WE. —Griesemer

38. Introduction to Philosophy of Biology (4)
   Lecture—3 hours; discussion—1 hour. Non-technical introduction to philosophical, social, and scientific ideas, methods and technologies in contemporary biological fields such as evolution, genetics, molecular biology, ecology, behavior. Philosophical considerations of determinism, reductionism, explanation, theory, modeling, observation, experimentation. Evaluation of scientific explanations of human nature. GE credit: ArtHum, Writ | AH or SE, SL, WE. —Griesemer, Millstein

98. Directed Group Study (1-5)
   Prerequisite: consent of instructor. (P/NP grading only)

99. Special Study for Undergraduates (1-5)
   Prerequisite: consent of instructor. (P/NP grading only)

Upper Division

101. Metaphysics (4)
   Lecture—3 hours; discussion—1 hour. Prerequisite: one course in philosophy recommended. Theories of being. Such topics as reality, universals, space, time, causality, becoming, body, experience, persons, freedom, and determinism. Views of the nature and method of metaphysics. Anti-metaphysical arguments. GE credit: ArtHum, Writ | AH, WE. —Gilmore

102. Theory of Knowledge (4)
   Lecture—3 hours; extensive writing or discussion. Prerequisite: one course in philosophy. Analysis of the concept of knowledge. The relation between knowledge, belief and truth. Development of foundational, coherentist and externalist theories of justified belief. Examination of skepticism. GE credit: ArtHum, Writ | AH, WE. —Mattey

103. Philosophy of Mind (4)
   Lecture/discussion—3 hours, term paper. The relation between mind and body, our knowledge of other minds, and the explanation of mental acts. Discussion of such concepts as action, intention, and causation. GE credit: ArtHum, Writ | AH, WE. —Molyneux

104. The Evolution of Mind (4)
   Lecture/discussion—3 hours, term paper. Prerequisite: one previous Philosophy course or instructor permission. The interpretation of human thought and behavior through the lens of evolutionary theory. Topics include the nature/nurture debate concerning
cognitive and other mental capacities and traits, and the interaction between evolution, learning and development. GE credit: SocSci | SS, WE.

105. Philosophy of Religion (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: one course in philosophy recommended. Logical, metaphysical, epistemological, and existential aspects of selected religious concepts and problems. GE credit: ArtHum, Writ | AH, WE. — Gilmore, Szaif

107. Philosophy of the Physical Sciences (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: one course in philosophy recommended. Nature of scientific methodology and confirmation of scientific hypotheses; nature of scientific laws, theories, explanations, and models. Problems of causality, determinism, induction, and probability; the structure of scientific revolutions. GE credit: ArtHum, SciEng, Writ | AH; or SE, SL, WE. — Griesser, Millstein

109. Philosophy of the Social Sciences (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: one course in philosophy recommended. The nature of the social sciences, their subject matter and methods. Similarities to and differences from natural and life sciences. Predicting and explaining human behavior. Behavioral reduction, holism, and individualism. Related moral issues. The social sciences and philosophy. GE credit: ArtHum or SocSci, Writ | AH or SS, WE.

111. Philosophy of Space and Time (4)
Lecture/discussion—3 hours; term paper. Prerequisite: one course in philosophy recommended. Philosophical problems of space and time. The philosophical implications of space-time theories, such as those of Newton and Einstein. Topics may include the nature of geometry, conventionalism, absolutist versus relationalist views of space and time, philosophical implications of relativity theory. GE credit: AH, WE — Gilmore

112. Intermediate Symbolic Logic (4)
Lecture/discussion—4 hours. Prerequisite: course 12 or consent of instructor. Predicate logic syntax and semantics. Transcription between predicate logic and English. Identity, functions, and definite descriptions. Introduction to concepts of metalogic. GE credit: AH. — II. (LL) Landry, Matthey

113. Metalogic (4)
Lecture/discussion—4 hours. Prerequisite: course 112, Mathematics 108, or the equivalent. The meta-logic of classical propositional and first-order predicate logic. Consistency, soundness and completeness of both propositional and predicate logic. The Löwenheim-Skolem theorem for predicate logic. Undecidability of predicate logic. GE credit: AH. — III. Antonelli

114. History of Ethics (4)
Lecture/discussion—4 hours. Prerequisite: one philosophy course. Study of some classic texts from the history of philosophy examining the ethical problems of the agent’s reasons. GE credit: ArtHum, Writ | AH, WE. — Matthey, Oshana

115. Problems in Normative Ethics (4)
Lecture/discussion—3 hours; term paper. Prerequisite: one course in philosophy. Moral philosophy studied through examining ethical problems and the moral principles and common sense intuitions that bear on them. Problems discussed may include: animal rights, fetal rights, euthanasia, justice and health care, war, nuclear deterrence, world hunger, environmental protection. GE credit: ArtHum, Writ | AH, WE. — Matthey, Oshana

116. Ethical Theories (4)
Lecture/discussion—3 hours, term paper. Prerequisite: one course in philosophy; one course in ethics recommended. Study of fundamental concepts and problems in ethics through an examination of classical and contemporary philosophical theories of ethics. Among the theories that may be discussed are utilitarianism, virtue theory, theories of natural rights, Kantian ethics, freedom, and contractualism. GE credit: AH, WE. — Copp

117. Foundations of Ethics (4)
Lecture/discussion—3 hours; term paper. Prerequisite: one of courses 114, 115, 116, 101, or 137. Advanced investigation of questions about the nature and foundations of morality. Among the topics that may be discussed are moral realism and anti-realism, cognitivism and non-cognitivism, types of relativism, moral linguistic and normative language and normative belief. GE credit: AH, WE. — Copp

118. Political Philosophy (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: one course in philosophy. Intensive examination of some central concepts of political thought such as the state, sovereignty, rights, obligations, freedom, law, authority, and responsibility. GE credit: SocSci, Div, Writ | AH, WE. — Oshana

119. Philosophy of Law (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: one course in philosophy or consent of instructor. Philosophical theories of the nature of law, legal obligation, the relation of law and morals. Problems for law involving the implications of expression, privacy, rights, discrimination and fairness, responsibility, and punishment. GE credit: SocSci, Div, Writ | AH, WE. — Oshana

120. Environmental Ethics (4)
Lecture/discussion—3 hours; term paper. Prerequisite: one course in philosophy recommended. Nature of art, of artistic creation, of the work of art, and of aesthetic experience; nature and validity of criticism; relations of art to its environment. GE credit: ArtHum, Writ | AH, WE. — Millstein

123. Aesthetics (4)
Lecture/discussion—3 hours; term paper. Prerequisite: one course in philosophy recommended. Study of fundamental concepts and positions concerning the nature of formal beauty and the aesthetic function. GE credit: SocSci, Div, Writ | AH, WE. — Oshana

125. Theory of Action (4)
Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: one course in Philosophy. Survey of prominent contemporary approaches to leading problems in action theory. Problems include issues about the nature of intentional action and the conceptual character of explanations of actions in terms of the agent’s reasons. GE credit: ArtHum, Writ | AH, WE. — Antonelli

128. Rationality (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: at least one course in philosophy. Philosophical issues and problems concerning rationality in its various forms. Focus is on theoretical and practical reasoning and conditions for rational belief, choice, and action. Possible additional topics include rationality and human limitations, paradoxes of rationality; varieties of irrationality; rationality and objectivity. GE credit: AH. — Antonelli

129. Knowledge and the A Priori (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: one course in philosophy. Self-identified intuition, the innateability and indefeasibility of a priori methods. Analytic, formalist and Kantian accounts of how knowledge can be acquired through reasoning and intuition alone, without recourse to empirical methods. Offered in alternate years. GE credit: AH, WE. — Szaif

131. Philosophy of Logic and Mathematics (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 12 or one course for credit in mathematics. Nature of formal systems and mathematical theories. Selected topics include logical and semantical paradoxes; foundations of mathematics; set theory, type theory, and intuitionistic theory; philosophy of geometry; philosophical implications of Gödel’s incompleteness results. GE credit: AH, WE. — Landry

134. Modal Logic (4)
Lecture/discussion—4 hours. Prerequisite: course 112 or Mathematics 108 or the equivalent. Survey of the main systems of modal logic, including Lewis systems S4 and S5. "Possible worlds" semantics and formal proofs. Applications to epistemology, ethics, or temporality. GE credit: AH. — Antonelli

135. Alternative Logics (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 12, Mathematics 108, or the equivalent. Alternatives to standard truth-functional logic, including many-valued logics, intuitionist logics, relevance logics, and non-monotonic logics. GE credit: AH. — Antonelli

136. Formal Epistemology (4)
Lecture/discussion—4 hours. Prerequisite: course 12. Formal (mathematical) approaches to belief revision, knowledge and deduction, multi-agent epistemic logic, Bayesian confirmation, Bayes nets, epistemic and probabilistic paradoxes. Offered irregularly. GE credit: AH. — I. Molyneux

137A. Philosophy of Language: Theory of Reference (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: one course in philosophy or linguistics. Survey of issues and views concerning reference, or how words refer to things. Topics include names and descriptions, the Fregean reference, the puzzle of non-referring terms, causal theories of reference, and possibility and necessity. Only two units of credit for students who have completed course 137. GE credit: AH, WE. — May, Sennet

137B. Philosophy of Language: Truth and Meaning (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: one course in philosophy or linguistics. Comparative treatment of theories about the relationship between truth and meaning. Topics include: the identification of meaning with truth conditions, the nature of propositional attitude, theories of linguistic understanding, the roles of mind and world in determining meaning. Only two units of credit for students who have completed course 137. GE credit: AH, WE. — May, Sennet

137C. Philosophy of Language: Semantics and Pragmatics (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: one course in philosophy or linguistics. Philosophical issues and theories concerning the meaning and use of language. Topics include the distinction between meaning and implication, the roles of context and convention in language use, speaker meaning versus linguistic meaning and speech act theory. Only two units of credit for students who have completed course 137. GE credit: AH, WE. — May, Sennet

141. Socrates and the Socratic Dialogue (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 21 recommended, or one course in philosophy, or consent of instructor. The philosophy of Socrates as found in the Socratic dialogues of Plato. Topics include the Socratic method, epistemological foundation, and moral purpose; Socratic eutamism and Socratic virtue theory; the paradoxes of Socratic intellectualism. GE credit: AH. WE — Szaif
143. Hellenistic Philosophy (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 21 or other course in philosophy. Consideration of central issues such as meaning/ reference, analytic/ synthetic, reductionism, formal and ordinary language, essential properties, ontological commitment, possible worlds, and influential works by philosophers such as Russell, Moore, Wittgenstein, Austin, Carnap, Quine, Putnam, Kripke, and Frassen. GE credit: AH, WE.—Mattey

145. Medieval Philosophy (4)
Lecture/discussion—4 hours. Prerequisite: course 21 or other course in ancient philosophy. Major philosophers in the Christian, Islamic, and Jewish traditions. Offered in alternate years. GE credit: AH, WE.—Szalai

151. Nineteenth Century European Philosophy (4)
Lecture/discussion—4 hours. Prerequisite: course 22N. Survey of the main movements in nineteenth century philosophy on the European continent. Idealism in Schopenhauer and Hegel, dialectical materialism in Marx, irrationalism in Kierkegaard, Nietzsche and Dostoevsky. Offered irregularly. GE credit: ArtHist | AH, WE.—Mattey

156. Contemporary Analytic Philosophy (4)
Lecture/discussion—3 hours; term paper. Prerequisite: one course in philosophy. Consideration of central issues such as meaning/reference, analytic/synthetic, reductionism, formal and ordinary language, essential properties, ontological commitment, possible worlds, influential works by philosophers such as Russell, Moore, Wittgenstein, Austin, Carnap, Quine, Putnam, Kripke, and Frassen. GE credit: AH, WE.—Antonelli

157. Twentieth Century European Philosophy (4)
Lecture/discussion—4 hours. Prerequisite: one course in Philosophy. Survey of the main movements in twentieth century philosophy on the European continent, including phenomenology, existentialism, post-structuralism, and post-modernism. Philosophers covered are Husserl, Heidegger, Sartre, Foucault, Derrida. GE credit: ArtHist | AH, WE.—Mattey

160. Pre-Socratics (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 21. Study of the metaphysical views of such pre-Socratic figures as the Milesians, the Pythagoreans, Heraclitus, Parmenides, Empedocles, Anaxagoras, and the atomists. GE credit: AH, WE.—Szalai

161. Plato (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 21. Examines Plato’s most important contributions to metaphysics, epistemology, psychology, cosmology, ethics and political philosophy. Dialogues will be selected from Plato’s middle and later writings. GE credit: AH, WE.—Szalai

162. Aristotle (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 21. An overview of Aristotle’s most central and influential writings. Topics selected from fields such as metaphysics, physics, ethics, logic, and psychology. GE credit: AH, WE.—Szalai

168. Descartes (4)
Lecture/discussion—4 hours. Prerequisite: course 22N. The philosophical writings of René Descartes. Topics include the refutation of skepticism, the nature and existence of substances, the existence of God, and the foundations of science. Offered irregularly. GE credit: AH, WE.—Mattey

170. Leibniz (4)
Lecture/discussion—4 hours. Prerequisite: course 22N. Survey of the philosophical writings of Gottfried Wilhelm Leibniz. Topics include Leibniz’s logic, the existence of God, human freedom, substance, and the relation between science and metaphysics. Offered irregularly. GE credit: AH, WE.—Mattey

172. Locke and Berkeley (4)
Lecture/discussion—4 hours. Prerequisite: course 22N. Principal metaphysical works of John Locke and George Berkeley. Topics include abstract ideas, existence of matter, primary and secondary qualities, essence, substance, existence of God, and the nature of scientific knowledge. May be repeated for credit. GE credit: AH, WE.—Mattey

174. Hume (4)
Lecture/discussion—4 hours. Prerequisite: course 22N. David Hume’s Treatise of Human Nature and related writings. Topics include empiricism, space, causality, belief, skepticism, the passions, and morality. Offered irregularly. GE credit: AH, WE.—Mattey

175. Kant (4)
Lecture/discussion—4 hours. Prerequisite: course 22N. Immanuel Kant’s Critique of Pure Reason and related writings. Topics include the nature of human cognition, space and time, a priori concepts, substance, causality, and the existence of God. Offered irregularly. GE credit: AH, WE.—Mattey

178. Frege (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: one course in philosophy or permission of instructor. Development of Gottlob Frege’s views about language and logic. Formulation of his grand mathematical idea known as logicism and how it led to the philosophy of language. GE credit: AH, WE.—Mattey

189A. Special Topics in Philosophy (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: one course in the area of the special topic. Special topics in (A) History of Philosophy. May be repeated up to eight units of credit. Offered irregularly. GE credit: AH.

189B. Special Topics in Philosophy (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: one course in the area of the special topic. Special topics in (B) Metaphysics. May be repeated up to eight units of credit. Offered irregularly. GE credit: AH.

189C. Special Topics in Philosophy (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: one course in the area of the special topic. Special topics in (C) Theory of Knowledge May be repeated up to eight units of credit. Offered irregularly. GE credit: AH.

189D. Special Topics in Philosophy (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: one course in the area of the special topic. Special topics in (D) Ethics. May be repeated up to eight units of credit. Offered irregularly. GE credit: AH.

189E. Special Topics in Philosophy (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: one course in the area of the special topic. Special topics in (E) Political Philosophy. May be repeated up to eight units of credit. Offered irregularly. GE credit: AH.

189F. Special Topics in Philosophy (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: one course in the area of the special topic. Special topics in (F) Philosophy of Law. May be repeated up to eight units of credit. Offered irregularly. GE credit: AH.

189G. Special Topics in Philosophy (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: one course in the area of the special topic. Special topics in (G) Aesthetics. May be repeated up to eight units of credit. Offered irregularly. GE credit: AH.

189H. Special Topics in Philosophy (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: one course in the area of the special topic. Special topics in (H) Philosophy of Mind. May be repeated up to eight units of credit. Offered irregularly. GE credit: AH.

189I. Special Topics in Philosophy (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: one course in the area of the special topic. Special topics in (J) Philosophy of Language. May be repeated up to eight units of credit. Offered irregularly. GE credit: AH.

194HA-194HB. Honors Research Project (4-4)
Tutoring—3 hours; term paper. Prerequisite: consent of instructor; open to students who are members of the honors program in Philosophy. Completion of honors research project under direction of an instructor. Consult departmental major adviser for list of instructors available in a given quarter.

198. Directed Group Study (1-5)
(P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)
Prerequisite: consent of instructor. (P/NP grading only.)

Graduate

200A. Proseminar I (4)
Seminar—3 hours; term paper. Prerequisite: consent of instructor; open only to students in their first quarter of Philosophy Ph.D. program. Intensive study of core works in a selected area of philosophy. Intensive experience in philosophical writing, discussion, and presentation of written work.—I. (I.)

200B. Proseminar II (4)
Seminar—3 hours; term paper. Prerequisite: consent of instructor; only for students in their first quarter of Philosophy Ph.D. program. Intensive study of core works in a selected area of philosophy. Intensive experience in philosophical writing, discussion, and presentation of written work. Limited enrollment.—I. (I.)

201. Metaphysics (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Topics vary from quarter to quarter and may include the following: What are things? Do names refer to things? If so, how? Do things have essential properties? What is the nature of necessity? May be repeated for credit when topic differs and with consent of instructor.—Gilmore

202. Theory of Knowledge (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Topics vary from quarter to quarter. Sample topics include belief, skepticism, justification, externalism, naturalized epistemology. May be repeated for credit with consent of instructor.—Mattey, Molyneux

203. Philosophy of Mind (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Topics in the philosophy of mind such as the mind-body problem, mental representation, consciousness, intentionality. May be repeated for credit with consent of instructor.—Mattey, Molyneux

203P. Philosophy of Mind Practicum (4)
Practicum—12 hours. Prerequisite: consent of instructor. Specific research conducted and prepared for publication by advanced students in a team setting. Topics include knowledge representation and learning in neural networks, the nature and formal properties of mental representation. May be repeated for credit when topic differs and with consent of instructor. (S/U grading only.)

207. Philosophy of Physics (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing in Philosophy Ph.D. program. Intensive treatment of one or more topics in the philosophy of physics, such as foundations of space-time theories, the interpretation of quantum mechan-
ics, or foundations of statistical mechanics. May be repeated for credit when topic differs and with consent of instructor. —Landry

208. Philosophy of Biology (4) Seminar—3 hours, term paper. Prerequisite: graduate standing or consent of instructor. Intensive treatment of one or more topics in the philosophy of biology. Topics may include: causes, explanation, reductionism in biology, sociobiology and cultural evolution. May be repeated for credit when topic differs and with consent of instructor. —Grierse, Millstein

210. Philosophy of Science (4) Seminar—3 hours, term paper. Prerequisite: graduate standing or consent of instructor. Treatment of one or more general topics of current interest in philosophy of science. Topics may include: scientific method, explanation, theories of confirmation, scientific realism, reduction in physics and biology. May be repeated for credit when topic differs and with consent of instructor. —Grierse, Landry, Millstein

212. Philosophy of Logic and Mathematics (4) Seminar—3 hours, term paper. Prerequisite: course 112 or 113 or Mathematics 108 or 125 or the equivalent. Philosophical issues in logic and math. Topics may include nature of logical and mathematical truth or knowledge, correctness of logical systems, foundations of mathematics, metamathematical and epistemological presuppositions, applications to philosophical problems and formalization of philosophical theories. May be repeated for credit when topic differs and with consent of instructor. —Antonelli, Landry

213. Advanced Logic for Graduate Students (4) Lecture/discussion—3 hours; extensive problem solving. Prerequisite: graduate standing in Philosophy. Enrollment in the Philosophy Ph.D. program. Intensive study of advanced logic, including set theory, metatheory of predicate logic, and modal logic. May be repeated two times for credit when topic differs—1, II, Antonelli, Matvey

214. Ethics (4) Seminar—3 hours, term paper Prerequisite: graduate standing in philosophy or consent of instructor. Topics may include moral and natural law, morality and justice, ethical theory, and topics in moral and political philosophy. Topics vary from quarter to quarter. May be repeated for credit when topic differs and with consent of instructor.—Copp, Oshana

217. Political Philosophy (4) Seminar—3 hours, term paper. Prerequisite: graduate standing or consent of instructor. Advanced studies in political philosophy. Topics vary but may include distributive justice, enforcement of moral laws and social contract theory. May be repeated for credit when topic differs and with consent of instructor.—Copp, Oshana

220. Environmental Ethics (4) Lecture—3 hours, term paper. Prerequisite: graduate standing or consent of instructor. Intensive treatment of one or more topics in environmental ethics, such as biodiversity, sustainability, the composition of the moral community, invasive species, endangered species, applications of ethical theories to contemporary environmental issues.—Millstein

237. Philosophy of Language (4) Seminar—3 hours, term paper. Prerequisite: graduate standing or consent of instructor. Study of philosophical issues raised by language, such as the nature of semantic content, proper semantics for verbs of propositional attitude, feasibility and limitations of formal semantics and pragmatics for natural languages. May be repeated for credit when topic differs and with consent of instructor.—May, Sennet

238. Philosophy of Language Workshop (4) Seminar—3 hours; extensive writing. Discussion of recently published, unpublished and in-progress research on the philosophy of language, including work on the relation of language and mind, and language and logic, and linguistic theory. Open to graduate students only. May be repeated for credit when topic differs.—Landry

261. Plato (4) Seminar—3 hours, term paper. Prerequisite: graduate standing or consent of instructor. Advanced seminar designed for analysis of arguments, doctrines, and texts from Plato’s works. Methods of argumentation and interpretation are especially stressed. Topics vary according to instructor. May be repeated for credit with consent of instructor.—Szaif

262. Aristotle (4) Seminar—3 hours, term paper. Prerequisite: graduate standing or consent of instructor. Advanced seminar designed for analysis of arguments, doctrines, and texts from Aristotle’s works. Methods of argumentation and interpretation are especially stressed. Topics vary according to instructor. May be repeated for credit with consent of instructor.—Szaif

275. Kant (4) Seminar—3 hours, term paper. Prerequisite: graduate standing in philosophy or consent of instructor. Intensive study of a topic in the philosophy of Kant, in such areas as metaphysics, theory of knowledge, ethics. May be repeated for credit with consent of instructor. —Matvey, Szaif

298. Group Study (1-5) (S/U grading only)

396. Teaching Assistant Training Practicum (1-4) Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.—I, II, III, J, I, II, III.)

The Program of Study

The Program in Physical Education facilitates the development and offering of non-major courses related to physical activities and education, fitness and health, athletic training, teacher education, and organized sport. The Program is available as part of a student’s general educational experience to enhance and broaden the understanding and experience of physical activity in the maintenance of lifetime health and fitness.

The basic activities series includes Physical Education 1, fitness, lifetime, and sports skills. The PE I activity courses are instructional in nature, designed to introduce new skills to beginners or to improve existing skills. Physical Education 6 is offered for students participating in intercollegiate athletics. Additional lower division courses include those in special skill areas, such as life-saving and water safety, health and fitness, and athletic training. Upper division courses include advanced classes in coaching, sociology of sports, and a series of courses that meet the mandated requirements for students pursuing teacher preparation and certification.

Teaching Credential Subject Representative. W.J. Weidner

Class and Recreational Use of Facilities. The instructional fee payable by all students participating in intercollegiate athletics. The registration entitles students to the use of the gymnasium, pool, showers, lockers, tennis courts, and athletic fields. Equipment for games and sports is available for classes. Lockers must be turned in on the last day of class, i.e., before the final examination period. Fines are imposed for each formal transaction necessitated by failure of the student to comply with the regulations of the program.

Courses in Physical Education (PHE)

Lower Division

1. Physical Activities (0.5)

Laboratory—2 hours. Sections in: (a) sports skills, rules and strategy; (b) physical fitness and personal health; (c) recreation; (d) aerobic dance. May be repeated along with course 6 for a combined total of 6 units. (P/NF grading only.)—I, II, III, J, II, III.

6. Preparation and Participation in ICA Competition (1)

Discussion/labouratory—10:20 hours. Prerequisite: consent of instructor (coach). Preparation and participation in Intercollegiate Athletics. Development of fundamental and advanced individual and team skills. Development of knowledge of rules and strategy.
Advanced sports competition and Conference and NCAA levels. May be repeated along with course 1 for a combined total of 6 units. (P/NP grading only)—I, II, III. (I, II, III)

7. Professional Physical Education Activities: Men and Women (1)
Lecture—1 hour, or laboratory—2 hours. Fundamental skills for a coaching competitive athletics classroom teaching and coaching, and classroom teaching and officiating. May be repeated for a total of six units. —I, II, III. (I, II, III)

8. Student-Athlete Life Skills (1)
Lecture—1 hour. Prerequisite: consent of instructor. Open to intercollegiate student-athletes. Balancing academic and athletic demands. Academic, psychological, and social-cultural issues which influence success as a college student-athlete. (P/NP grading only)—I, II, III.

15. Administration of Intramural Sports (2)
Lecture—2 hours. Planning and administering intramural sports programs at the high school and college level.

25. Theory of Lifesaving and Water Safety (2)
Lecture—1 hour; laboratory—2 hours. Prerequisite: swimming and no physical handicap that would render student unable to perform the required skills and ability to pass preliminary swimming test. Provides the student with the knowledge, organization, procedures, and skill development necessary to provide for water safety and save his/her own life or the life of another in an aquatic emergency. (American Red Cross Advanced Lifesaving Certificate awarded upon successful completion of necessary requirements.)—III. (III) Jahn

27. Training Course for Water Safety Instructors (2)
Lecture—1 hour, laboratory—2 hours. Prerequisite: advanced swimming (course 1) or consent of instructor; course 5 and current American Red Cross Water Safety Instructor Certificate. Theoretical knowledge and practical experience necessary for the organization and teaching of swimming and lifesaving classes. (American Red Cross Water Safety Instructor’s Certificate awarded upon successful completion of necessary requirements.)—III. (III) Jahn

40. Drugs and Society (2)
Lecture—2 hours; fieldwork—2 hours total; filmviewing—5 hours total. Pharmacology, methods of use, and effects of use of psychoactive and performance-enhancing drugs. Historical overview of drug use. Identification of “at-risk” and “use” populations. (P/NP grading only)—I, II, III. (IV)

44. Principles of Healthful Living (2)
Lecture—2 hours. Application of scientific and empirical knowledge to personal, family, and community health problems. (P/NP grading only)—I, II, III. (IV)

92. Physical Education Internship (1-5)
Internship—3-15 hours; written project proposal and evaluation. Prerequisite: consent of instructor; enrollment dependent upon availability of intern positions, with priority given to Exercise Biology majors. Work experience in the application of physical activity programs to teaching, recreational, clinical or research situations under department faculty supervision. May be repeated for a total of 12 units (including course 92) but no internship units will be counted toward Exercise Science major. May be repeated one time for credit. (P/NP grading only).

97TC. Tutoring in the Community (1-5)
Tutoring—2-15 hours; discussion—1 hour. Prerequisite: lower division standing and consent of Program Director. Tutoring of students in lower division physical activity courses. Weekly meetings with instructor in charge of courses. Written reports on methods and materials required. May be repeated one time for credit. (P/NP grading only)

977TC. Tutoring in the Community (1-5)
Tutoring—2-15 hours; discussion—1 hour. Prerequisite: lower division standing and consent of Program Director. Tutoring of students in lower division physical activity courses. Weekly meetings with instructor in charge of courses. Written reports on methods and materials required. May be repeated one time for credit. (P/NP grading only)

144. Principles of Health Education (2)
Lecture—2 hours. Prerequisite: course 44 and upper division standing or consent of instructor. Principles of teaching health education in the public schools. (P/NP grading only).

150. Recreation in the Community (3)
Lecture—2 hours; discussion—1 hour; two Saturday field trips—8 hours. The nature and scope of community recreation programs in California emphasizing low income, highly populated areas, and poor rural communities.

192. Physical Education Internship (1-2)
Internship—3-36 hours; written project proposal and evaluation. Prerequisite: upper division standing and consent of instructor; enrollment dependent on availability of intern positions, with priority given to Exercise Science majors. Work experience in the application of physical activity programs to teaching, recreational, clinical or research situations under department faculty supervision. May be repeated for a total of 12 units (including course 92) but no internship units will be counted toward Exercise Science major. (P/NP grading only)—I, II, III. (I, II, III)

197T. Tutoring in Physical Education (1-5)
Tutoring—2-15 hours; discussion—1 hour. Prerequisite: upper division standing and consent of Department Chairperson. Tutoring in the community in physical education related projects under the guidance of the Physical Education faculty. Regular meetings with instructor in charge and written report required. May be repeated one time for credit. (P/NP grading only).

197TC. Tutoring in the Community (1-5)
Tutoring—2-15 hours; discussion—1 hour. Prerequisite: upper division standing and consent of Department Chairperson. Tutoring in the community in physical education related projects under the guidance of the Physical Education faculty. (P/NP grading only)—I, II, III. (I, II, III)

199. Special Study for Advanced Undergraduates (1-5)
Prerequisite: consent of instructor. (P/NP grading only)

Professional

300. The Elementary Physical Education Program (3)
Lecture—1 hour; laboratory—2 hours. Prerequisite: consent of instructor. Restricted to senior standing or credential student. Introduction to principles, theories, materials, and practices of elementary school physical education program. —III. (III)

380. Methods of Teaching Physical Education (3)
Lecture—1 hour; laboratory—6 hours. Prerequisite: course 142 and six units of course 7; or consent of instructor. The methods of teaching group and individual activities for grades K-12; program planning, class management, organization, and evaluation. (P/NP grading only).

Faculty

Academic Senate Distinguished Teaching Award

The Department of Physics offers a Bachelor of Arts in Physics and two Bachelor of Science degree programs: in Physics (which also offers an emphasis in Astrophysics), and in Applied Physics. The A.B. degree provides a broad coverage of classical and modern physics while permitting a broader liberal arts education than is possible with the other two programs. The B.S. degree in either Physics or Applied Physics should be followed by the student who plans to enter physics as a profession, and also provides excellent training for a wide variety of technical career options. The B.S. in Applied Physics provides the student with a solid introduction to a particular applied physics specialty. For the student who plans to enter the job market upon completing a B.S. degree, the applied physics orientation would be an asset. Either B.S. program provides a solid foundation in physics for the student interested in graduate work in either pure or applied physics.

Career Alternatives. Careers in physics and applied physics include research and development, either in universities, government laboratories, or industry; teaching in high schools, junior colleges, and universities; management and administration in industrial laboratories and in government agencies; and in production and sales in industry. A major in physics also provides a strong base for graduate-level work in such interdisciplinary areas as chemical physics, biophysics and medical physics, geophysics and environmental physics, astrophysics and astronomy, computer science, and materials science.

Physics

A.B. Major Requirements:

Preparatory Subject Matter: 41-47

Physics 9A, 9B, 9C, 9D or 9HA, 9HB, 9HC, 9HD, 9HE: 19-25
Mathematics 21A, 21B, 21C, 21D, 22A, 22B: 22

Depth Subject Matter: 35-37

At least one course from: 129A, 130A, 140A, 151, 152, or 153: 4
Physics 102 (1 unit) waived if 104B taken: 0
At least one additional fixed-unit upper division Physics course excluding 160: 3-4

Total Units for the Major: 76-84

B.S. Major Requirements:

Preparatory Subject Matter: 50-56

Physics 9A, 9B, 9C, 9D or 9HA, 9HB, 9HC, 9HD, 9HE: 19-25
Mathematics 21A, 21B, 21C, 21D, 22A, 22B: 22

Depth Subject Matter: 38-40

At least one course from: 129A, 130A, 140A, 151, 152, or 153: 4
Physics 102 (1 unit) waived if 104B taken: 0

Total Units for the Major: 76-84

Applied Physics

B.S. Major Requirements:

Preparatory Subject Matter: 49-56

Physics 9A, 9B, 9C, 9D or 9HA, 9HB, 9HC, 9HD, 9HE: 19-25
Mathematics 21A, 21B, 21C, 21D, 22A, 22B: 22

Dependence on area of concentration:

Chemistry 2A or 2HA (2B-2C or 2HB-2HC highly recommended)

Computer Science Engineering 30 or equivalent programming course:

Total Units for the Major: 76-84

Dependence on area of concentration:

Astronomy 25

Further courses from approved lists within one of the following concentrations chosen in consultation with a major adviser:

Quarter Offered: Fall, Winter, Spring, Summer

Pre-Fall 2011 General Education (GE): FLD=Foreign Language, ART=Arts and Humanities, SCI=Science and Engineering, SS=Social Sciences, COM=Communication, HUM=Humanities

Fall 2011 and on Revised General Education (GE): Arts and Humanities, SCI=Science and Engineering, SS=Social Sciences, WRT=Writing Experience
25. Introduction to Modern Astronomy and Astrophysics (4)

Lecture—3 hours; discussion—2.5 hours. Prerequisite: good facility in high school physics and mathematics (algebra and trigonometry). Description and interpretation of astronomical phenomena using the laws of modern physics and observations by modern astronomical instruments. Gravity, relativity, electromagnetic radiation, atomic and nuclear processes in relation to the structure and evolution of stars, galaxies and the universe. Not open to students who have received credit for course 25, 10G, or 10L. GE credit: SciEng | SE; SL, VL—II. (I.) Fassnacht, Lubin

Courses in Physics (PHY)

Physics 10 is primarily a concept-oriented one-quarter lecture/discussion course requiring relatively little mathematical background.

Physics 1 is a two-quarter sequence requiring some mathematical understanding. Physics I alone or both quarters may be taken. The sequence is not intended to satisfy entrance requirements of a year of physics for professional schools, but will satisfy requirements of 3 or 6 units of physics.

Physics 7 is a one-year (three-quarter) introductory physics course with laboratory intended for students majoring in the biological sciences. It has a calculus prerequisite. If you don’t want a full year of introductory physics, you should take one or two quarters of Physics 1 instead. Read the following information carefully if you are using Physics 7 to complete an introductory course you have already begun.

The sequence of material in Physics 7 is different from that in most traditionally taught introductory physics courses. Physics 7B is most like the first quarter or semester of traditionally taught courses which treat classical mechanics. Physics 7C is most like the last quarter or semester of traditionally taught courses, treats optics, electricity and magnetism, and modern physics. The content and sequence of Physics 7A is unlike that of most other traditionally taught courses.

If you have completed one introductory quarter or semester of a traditionally taught physics course and want to continue with Physics 7, you should first take (and will receive full credit for) Physics 7A. Then, either skip 7B, but self-study the last three weeks of material, or take 7B and receive reduced credit. Finally, take 7C for full credit.

If you have taken two quarters of a year-long introductory physics course and have not had extensive work in optics, electricity, magnetism, and modern physics, you should take Physics 7C. In no case should you take Physics 7B without first taking Physics 7A. All other situations should be discussed directly with an instructor.

Students not intending to take the entire sequence should instead take Physics 1.

Physics 9 is a four-quarter sequence using calculus throughout and including laboratory work as an integral component. The course is primarily for students in the physical sciences and engineering.

Physics 9H is a five-quarter honors physics sequence, which may be taken instead of Physics 9. It is intended primarily for first-year students with a strong interest in physics and with advanced placement in mathematics. Information: Mathematics 21B. Students who plan to major in physics, and also motivated non-majors, should take Physics 9H instead of Physics 9 if they are ready to begin MAT218 in fall quarter.

In course requirements and prerequisites, Physics 9HA-9HE can be substituted for Physics 9A-9D. Students not intending to take the entire sequence should instead take Physics 1.

26. Lower Division

10C. Introduction to Stars, Galaxies, and the Universe (3)

Lecture—3 hours. Non-mathematical introduction to astrophysics of the Universe beyond our solar system using concepts of modern physics. Not open for credit to students who have taken Astronomy 2, the former Astronomy 10, any quarter of Physics 9 or 9H, or any upper-division physics course (other than 137 or 160). GE credit: SciEng | SE; SL, VL—II, III. (I, II, III)

10L. Observational Astronomy Laboratory (1)

Laboratory—2.5 hours. Prerequisite: course 10G or 10S (may be taken concurrently). Introduction to observations of the night sky using small telescopes in the nighttime laboratory. Not open for credit to students who have completed course 2 or 10GE. GE credit: SciEng | SE; SL, VL—II, III. (I, II, III)

10S. Astronomy of the Solar System (1)

Lecture—3 hours. Introduction to naked eye and telescopic observations of objects in the night sky: positions of sun, moon, planets throughout the year. Historical perspective on how our understanding of the solar system evolved to current non-mathematical astronomical understanding of planetary systems. Not open for credit to students who have taken course 2, Physics 9 or 9H, or any upper-division physics course (other than 137 or 160). GE credit: SciEng | SE; SL, VL—II, III. (I, II, III)

1A. Principles of Physics (1)

Lecture—3 hours. Prerequisite: trigonometry or concept of instruction. Mechanics. Introduction to general principles and analytical methods used in physics with emphasis on applications in applied agricultural and biological sciences and in physical education. Not open to students who have received credit for course 1B, or 9A. GE credit: SciEng | SE—II. (I.)

1B. Principles of Physics (3)

Lecture—3 hours. Prerequisite: course 1A or 9A. Continuation of course 1A. Heat, optics, electricity, modern physics. Not open for credit to students who have received credit for course 1B, 7C, 9B, 9C, or 9D. GE credit: SciEng | SE—II. (II.)

7A. General Physics (4)

Lecture—1 hour; discussion/laboratory—5 hours. Prerequisite: completion or concurrent enrollment in Mathematics 168, 178, or 21B. Introduction to general principles and analytical methods used in physics for students majoring in a biological science. Only two units of credit allowed to students who have completed course 7A. GE credit: SciEng | SE—II, III. (I, II, III, IV)

7B. General Physics (4)

Lecture—1 hour; discussion/laboratory—5 hours. Prerequisite: course 7A. Continuation of course 7A. Only two units of credit allowed to students who have completed course 9C or 5C. GE credit: SciEng | SE—II, III. (I, II, III, IV)

9A. Classical Physics (5)

Lecture—3 hours; laboratory—2.5 hours; discussion—1 hour. Prerequisite: Mathematics 21B. Introduction to general principles and analytical methods used in physics for physical science and engineering majors. Classical mechanics. Not open for credit to students who have completed course 1A or 7B. Not open for credit to students who have completed course 9HA. GE credit: SciEng | SE—II, III. (I, II, III)

9B. Classical Physics (5)

Lecture—3 hours; laboratory—2.5 hours; discussion—1 hour. Prerequisite: course 9A. Mathematics 21C, 21D (may be taken concurrently). Continuation of course 9A. Fluid mechanics, thermodynamics, wave phenomena, optics. Only 2 units of credit to students who have completed course 7A. Not open for credit to students who have completed course 9HB, 9HC, or Engineering 105. GE credit: SciEng | SE—II, III. (I, II, III)

9C. Classical Physics (5)

Lecture—3 hours; discussion—1.5 hours. Prerequisite: course 9C and Mathematics 22A; Mathematics 22B recommended (may be taken concurrently). Introduction to physics concepts developed since 1900. Special relativity, quantum mechanics, atoms, molecules, condensed matter, nuclear and particle physics. Not open for credit to students who have completed course 9HB, 9HC, or 9HE. GE credit: SciEng | SE—II, III. (I, II, III)

9D. Modern Physics (4)

Lecture—3 hours; discussion—1.5 hours. Prerequisite: course 9D and Mathematics 22A; Mathematics 22B recommended (may be taken concurrently). Continuation of course 9A and 9B. GE credit: SciEng | SE—II, III. (I, II, III)

9HA. Honors Physics (5)

Lecture—3 hours; discussion/laboratory—4 hours. Prerequisite: Mathematics 21B (may be taken concurrently) or consent of instructor. Classical mechanics. Some material as course 9A in greater depth. For students in physical sciences, mathematics, and engineering. Only 2 units of credit to students who have completed course 7B. Not open for credit to students who have completed course 9HA. GE credit: SciEng | SE—II. (I.)

9HB. Honors Physics (5)

Lecture—3 hours; discussion/laboratory—4 hours. Prerequisite: Physics 9HA or 9A. Mathematics 21C (may be taken concurrently). Special relativity, ther-
ual physics. Continuation of course 9HA. Only 2 units of credit to students who have completed course 2A. Not open to students who have completed course 9B or 9D. GE credit: SciEng | SE.—II. (II.)

9HC. Honors Physics (5)
Lecture—3 hours; discussion/laboratory—4 hours. Prerequisite: courses 9HA and Mathematics 21D. Electricity and magnetism. Continuation of Physics 9HC. Not open for credit to students who have completed course 9C. GE credit: SciEng | SE.—I. (I.)

9HD. Honors Physics (5)
Lecture—3 hours; discussion/laboratory—4 hours. Prerequisite: course 9HD and Mathematics 21D. Electricity and magnetism. Continuation of Physics 9HC. Not open for credit to students who have completed course 9C. GE credit: SciEng | SE.—II. (II.)

9HE. Honors Physics (5)
Lecture—3 hours; discussion/laboratory—4 hours. Prerequisite: course 9HD and Mathematics 228 (may be taken concurrently). Application of quantum mechanics. Not open for credit to students who have completed course 9D. GE credit: SciEng | SE.—II. (II.)

10. Topics in Physics for Nonscientists (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: high school algebra. Emphasis varies: survey of basic principles or a deeper exploration of some particular branch. Past topics included black holes, space time, and relativity; physics of music; history and philosophy; energy and the environment; and natural phenomena. Lecture to back with the Department office for the current emphasis. No units of credit allowed if taken after any other physics course. GE credit: SciEng, Wrt | SE.

12. Visualization in Science (3)
Lecture—3 hours; Class size limited to 20-50 stu-
dents. Production, interpretation, and use of images in physics, astronomy, biology, and chemistry as sci-
entific evidence and for communication of research results. GE credit: VL.—I. (I.)

13. Mathematical Physics (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: Mathematics 16A or 21A. Modern ideas about the unify-
ing ideas of fractal geometry, chaos and complexity. Basic theory and applications with examples from physics, earth sciences, mathematics, population dynamics, ecology, history, economics, biology, computer science, art and architecture. Offered in alternate years. Course as Geology 30G. GE credit: SciEng | GL, SE.—II. (II.)

14. Special Study for Undergraduates (1-5)
Prerequisite: instructor. (May be taken concurrently.) Not open to students who have completed course 104B or 105AL. GE credit: S SciEng | E.—I. (I.)

104A. Introductory Methods of Mathematical Physics (4)
Lecture—3 hours; discussion/laboratory—4 hours. Prerequisite: courses 9B, 9C, 9D and Mathematics 21D, 22A, and 228 with grade C- or better or consent of instructor. Introduction to the mathematics used in upper-division physics. Study of vector spaces, Fourier analysis, partial differential equations.—I. (I.)

104B. Computational Methods of Mathematical Physics (4)
Lecture—3 hours; discussion/laboratory—4 hours. Prerequisite: course 104A with grade C- or better and course 105A or consent of instructor. Introduction to the use of computational techniques to solve the mathematical problems of advanced physics courses, complementing the analytical approaches emphasized in course 104A. GE credit: SciEng | SE.—II. (II.)

104C. Intermediate Methods of Mathematical Physics (4)
Lecture—3 hours; discussion/laboratory—4 hours. Prerequisite: course 104A with grade C- or better or consent of instructor. Applications of complex analysis, conditional probability, moment approximations and other advanced topics. Offered in alternate years.—III. (III.)

105A-105B. Analytical Mechanics (4-4)
Lecture—3 hours; discussion/laboratory—4 hours. Prerequisite: courses 104A, 21A, 22A, and 228 with grade C- or better, or consent of department; course 104A and 105A passed with a grade C- or better, or consent of department required for 105B. Principles and applications of Newtonian mechanics; introduction to Lagrange’s and Hamilton’s equations. GE credit: SciEng | SE.—II. (II.)

105C. Continuum Mechanics (4)
Lecture—3 hours; discussion/laboratory—4 hours. Prerequisite: courses 104A and 105A passed with a grade of C- or better, or consent of department. The continuum hypothesis and limitations, tensors, isotropic constitutive equations, and wave propagation. Applications such as elastic solids, heatflow, aerodynamics, and ocean waves. Offered irregularly. GE credit: SciEng | SE.—III. (III.)

108. Optics (3)
Lecture—3 hours. Prerequisite: course 9 or 7 and Mathematics 21D, 22A, and 228 with grade C- or better, or consent of department. Theory of electro-
sotatics, electromagnetism, Maxwell’s equations, electromagnetic waves. GE credit: SciEng | SE.—II. (II.)

110A. Electricity and Magnetism (4)
Lecture—3 hours. Prerequisite: courses 9B, 9C, 9D and Mathematics 21D, 22A, and 228 with grade C- or better, or consent of department. Theory of electro-
sotatics, electromagnetism, Maxwell’s equations, electromagnetic waves. GE credit: SciEng | SE.—II. (II.)

110B. Electricity and Magnetism (4)
Lecture—3 hours. Prerequisite: courses 104A and 105A with a grade of C- or better or consent of department. Theory of electrostatics, electromag-
netism, Maxwell’s equations, electromagnetic waves. GE credit: SciEng | SE.—III. (III.)

110C. Electricity and Magnetism (4)
Lecture—3 hours. Prerequisite: course 110B with a grade of C- or better, or consent of department. The-
ory of electrostatics, electromagnetism, Maxwell’s equations, electromagnetic waves. GE credit: SciEng | SE.—I. (I.)

112. Thermodynamics and Statistical Mechanics (4)
Lecture—3 hours; discussion/laboratory—4 hours. Prerequisite: course 115A or the equivalent. Introduction to classical and quantum statistical mechanics and their connections with thermodynamics. The theory is developed for the ideal gas model and simple magnet-
netic models and then extended to studies of solids, quantum fluids, and chemical equilibria. GE credit: SciEng | SE.—I. (I.)

115A. Foundation of Quantum Mechanics (4)
Lecture—3 hours; discussion/laboratory—4 hours. Prerequisite: courses 104A and 105A passed with a grade of C- or better, or consent of department. Introduction to the methods of quantum mechanics with applications to atomic, molecular, solid state, nuclear and elementary particle physics. GE credit: SciEng | SE.—III. (III.)

115B. Applications of Quantum Mechanics (4)
Lecture—3 hours; discussion/laboratory—4 hours. Prerequisite: course 115A passed with a grade of C- or better, or consent of department. Angular momentum and spin; hydrogen atom; introduction to pertur-
bation theory; scattering theory. GE credit: SciEng | SE.—I. (I.)

116A. Electronic Instrumentation (4)
Lecture—3 hours; laboratory—3 hours. Prerequisite: courses 9C, 9E and Math 228 or consent of instructor. Experimental and theoretical study of important ana-
log electronic circuits. Linear circuits, transmission lines, input impedance, feedback, amplifiers, oscilla-
tors, noise. GE credit: SciEng | VL.—I. (I.)

116B. Electronic Instrumentation (4)
Lecture—3 hours; laboratory—3 hours. Prerequisite: course 9C or 9HD or consent of instructor. Continua-

116C. Introduction to Computer-Based Experiments in Physics (4)
Lecture—3 hours; laboratory—3 hours. Prerequisite: course 9D or 9HD, 116B, Mathematics 228 or consent of instructor. Introduction to techniques for mak-
ing physical measurements using computer-based instrumentation. GE credit: SciEng | SE, WE.—III. (III.)

127A. Advanced Laboratory in Condensed Matter Physics (4)
Lecture—3 hours; laboratory—3 hours. Prerequisite: courses 9D or 9HD, 9C, 9D and 116B or consent of instruc-
tor. Experimental techniques and measurements in solid-state physics. Student performs three to six experiments depending on difficulty. Individual work is stressed. Thorough write-ups of the experiments are required. GE credit: SciEng | SE, WE.—III. (III.)

127B. Advanced Laboratory in Particle Physics (4)
Lecture—4 hours. Prerequisite: course 104A, 105A, 110B, 115A and 112 (may be taken concur-ently) or consent of the department. Experimental techniques and measurements in nuclear and parti-
cle physics. Students perform three to six experi-
ments depending on difficulty. Individual work is stressed. Thorough write-ups of the experiments are required. GE credit: SciEng | SE, WE.—II. (II.)

123. Signals and Noise in Physics (4)
Lecture—3 hours; project—1 hour. Prerequisite: courses 9A, B, C, D and 104A, or consent of instruc-
tor. Techniques of measurement and analysis designed to avoid systematic error and maximize...
signal/noise ratio. Illustrative examples of optimal filters ranging from condensed matter to cosmology.

Survey of basic nuclear properties and concepts requiring introductory knowledge of quantum mechanics: nuclear models and forces, radioactive decay and nuclear reactions, alpha, beta and gamma decay. GE credit: SciEng | SE.—III. (Ill.) Tyson

129A. Introduction to Nuclear Physics (4)
Lecture—3 hours. Prerequisite: course 115A passed with a grade of C- or better or consent of instructor. Survey of basic nuclear properties and concepts ranging from condensed matter to cosmology. Nuclear reactions, neutrons, fission, fusion, accelerators, introduction to meson and particle physics, nuclear astrophysics, and applications of nuclear physics and techniques to mass spectrometry, nuclear medicine, trace element analysis. Offered irregularly. GE credit: SciEng | SE.

130A-130B. Elementary Particle Physics (4-4)
Lecture—3 hours; extensive problem solving. Prerequisite: course 115A passed with a grade of C- or better or consent of instructor. Properties and classification of elementary particles and their interactions. Experimental techniques. Conservation laws and symmetries. Strong, electromagnetic, and weak interactions. Introduction to Feynman calculus. GE credit: SciEng | SE.—I, II, III. (I, II, III.)

140A-140B. Introduction to Solid State Physics (4-4)
Lecture—3 hours; extensive problem solving. Prerequisite: course 115A or the equivalent passed with a grade of C- or better or consent of instructor. Survey of fundamental ideas in the physics of solids, with selected device applications. Crystal structure, x-ray and neutron diffraction, phonons, single metals, energy bands and Fermi surfaces, semiconductors, optical properties, magnetism, superconductivity. GE credit: SciEng | SE.—II, III. (II, III.)

150. Special Topics in Physics (4)
Lecture—3 hours; project. Prerequisite: courses 9A, B, C, D or 9HA, HB, HC, HD, HE or consent of instructor. Topics vary, covering areas of contemporary research in physics. May be repeated for credit. Offered irregularly. GE credit: SciEng | SE.—I, II, III. (I, II, III.)

151. Stellar Structure and Evolution (4)
Lecture—3 hours; project. Prerequisite: courses 9A, B, C, D or consent of instructor. The chemical composition, structure, energy sources and evolutionary history of stars, will be emphasized on both the observational data and theoretical models, including black holes, neutron stars and white dwarfs and the formation of substellar masses. Offered in alternate years. GE credit: SciEng | SE.—I, II, III. (I, II, III.)

152. Galactic Structure and the Interstellar Medium (4)
Lecture—3 hours; project. Prerequisite: courses 9A, B, C, D and 105A concurrently or consent of instructor. The structure of the Milky Way galaxy, viz. its shape and size, the nature of the interstellar medium, stellar populations, rotation curves, gravitational potentials, and evidence of dark matter. Offered in alternate years. GE credit: SciEng | SE.—I. Boeshaar, Knox

153. Extragalactic Astrophysics (4)
Lecture—3 hours; project. Prerequisite: courses 9A, B, C or 105A or consent of instructor. Structure and evolution of galaxies and clusters of galaxies, including distance and mass determination, galaxy types and environments, active galactic nuclei and quasars, galactic evolution, lensing and dark matter, global cosmological properties. Not open to students who have completed course 127. Offered in alternate years. GE credit: SciEng | SE.—II. Fassnacht

154. Astrophysical Applications of Physics (4)
Lecture—2 hours; project. Prerequisite: course 105AB, 110A; 110B and 115A concurrently; 112 or consent of instructor. Applications of classical and quantum mechanics, thermodynamics, statistical mechanics, and electricity and magnetism to astrophysical systems, including Big Bang, degenerate white dwarf and neutron stars, and solar neutrinos. Not open to students who have completed this course previously as course 198. Offered in alternate years. GE credit: SciEng | SE.—I, II, III, II, III. (I, II, III, II, III.)

155. General Relativity (4)
Lecture—3 hours; project. Prerequisite: course 104A and 105A; 105B and 110A or consent of instructor. Definition of the mathematical framework for the description of the gravitational field, introduction of the dynamical equations of Einstein governing its evolution and review of the key solutions, including black holes and expanding universes. Offered in alternate years. GE credit: SciEng | SE.—II. (II.) Kaloper

156. Introduction to Cosmology (4)
Lecture—3 hours; project. Prerequisite: courses 9A, B, C and 105A concurrently or consent of instructor. Contemporary knowledge of the origin of the universe, including the Big Bang and nucleosynthesis, microwave background radiation, formation of cosmic structure, cosmic inflation, cosmic acceleration. Offered in alternate years. Not open to students who have completed course 126. GE credit: SciEng | SE.—II. Albrecht

157. Astronomy Instrumentation and Data Analysis Lab (4)
Lecture—1 hour. Laboratory—8 hours. Prerequisite: course 104A, 105A, 110A; 115A and 110B may be taken concurrently. Open to Astrophysics Specialization majors; consent of instructor required. Experimental techniques, data acquisition and analysis involving laboratory astrophysics plus stellar, nebular and galactic digital imaging, photometry and/or spectroscopy. Students perform telescope experiments. Individual work stressed. Minimum 10-15 page journal style articles of two experiments are required. Offered in alternate years. GE credit: SciEng | SE, WE.—III. (III.) Boeshaar, Tyson

160. Environmental Physics and Society (3)
Lecture—3 hours. Prerequisite: course 9D or 7C; or course 10 or 1B and Mathematics 16B or the equivalent. Linear vector spaces, operators and spectral analysis, complete sets of functions, complex variables, functional analysis, Green’s functions, calculus of variations, introduction to numerical analysis.—I. (I.)

210. Computational Physics (3)
Lecture—3 hours; independent study.—1 hour. Prerequisite: courses 104A and 104B or the equivalent. Linear vector spaces, operators and spectral analysis, complete sets of functions, complex variables, functional analysis, Green’s functions, calculus of variations, introduction to numerical analysis.—I-II. (I-II)

219A. Statistical Mechanics (4)
Lecture—3 hours; extensive problem solving. Prerequisite: course 213B or the equivalent. Foundations of thermodynamics and classical and quantum statistical mechanics with simple applications to properties of solids, real gases, nuclear matter, etc. and a brief introduction to phase transitions. —I II III (I-II III)

219B. Statistical Mechanics (4)
Lecture—3 hours; extensive problem solving. Prerequisite: course 213B or the equivalent. Introduction to phase transitions and critical phenomena. —I (I)
223A. Group Theoretical Methods of Physics—Condensed Matter (3)
Lecture—3 hours. Prerequisite: courses 215A, 215B [215C is corequisite] or consent of instructor. Theory of groups and their representations with applications in condensed matter. Offered irregularly.

223B. Group Theoretical Methods of Physics—Electricity (5)
Lecture—3 hours. Prerequisite: courses 215A, 215B [215C is corequisite] or consent of instructor. Theory of groups and their representations with applications in elementary particle physics. Offered irregularly.

224A. Nuclear Physics (3)
Lecture—3 hours. Prerequisite: course 215B. Comprehensive study of the nuclear-nucleon interaction including the deuteron, nucleon-nucleon scattering, polarization, determination of real parameters of S-matrix, and related topics. Offered irregularly.

224B. Nuclear Physics (3)
Lecture—3 hours. Prerequisite: course 224A. Study of nuclear models, including shell model, collective model, unified model. Energy level spectra, static moments, and electromagnetic transition rates. Offered irregularly.

224C. Nuclear Physics (3)
Lecture—3 hours. Prerequisite: course 224B. Study of nuclear scattering and reactions including the optical model and direct interactions. Beta decay and an introduction to weak interactions. Offered irregularly.

229A. Advanced Nuclear Theory (3)
Lecture—3 hours. Prerequisite: course 224A. Advanced topics in nuclear theory; theory of quantum-mechanical scattering processes. Exact formal theory and models for two-body scattering. Offered irregularly.

229B. Advanced Nuclear Theory (3)
Lecture—3 hours. Prerequisite: course 229A. Advanced topics in nuclear theory; theory of quantum-mechanical scattering processes. Exact formal theory and models for three-body scattering. Offered irregularly.

230A. Quantum Theory of Fields (3)
Lecture—3 hours. Prerequisite: course 215C. Relativistic quantum mechanics of particles; techniques and applications of second quantization; Feynman diagrams; renormalization. Offered irregularly.

230B. Quantum Theory of Fields (3)
Lecture—3 hours. Prerequisite: course 230A. Continuation of 230A, with selected advanced topics, such as 5x3 matrix theory, dispersion relations, axiomatic formulations. Offered irregularly.

230C. Quantum Theory of Fields (3)
Lecture—3 hours. Prerequisite: course 230A and B, or consent of instructor. Renormalization theory and applications, including dimensional regularization, Ward and dimensional regularization group equations, coupling constant unification, and precision electroweak calculations. May be repeated for credit with consent of instructor. Offered irregularly.

240A. Condensed Matter Physics A (3)
Lecture—3 hours. Prerequisite: course 215C, 219A; course 140AB or equivalent recommended. Topics in condensed matter physics: Crystal structure; one-electron theory; transport and optical properties of semiconductors, phonons, electron-phonon scattering. Offered irregularly.

240B. Condensed Matter Physics B (3)
Lecture—3 hours. Prerequisite: course 240A. Topics in condensed matter physics: transport and optical properties of metals; quantum structures; experimental measurement the Fermi surface and of phonon spectra. Offered irregularly.

240C. Condensed Matter Physics C (3)
Lecture—3 hours. Prerequisite: course 240AB. Review of second quantization. Interacting electron gas, electron-phonon interaction and effects, including instabilities of electronic systems. Topics in the theory of superconductivity and magnetism. Offered irregularly.

241. Advanced Topics in Magnetism (3)
Lecture—3 hours. Prerequisite: courses 240A-240B and 240C-240D, or consent of instructor. Topics chosen from areas of current research interest. Offered irregularly.

242. Advanced Topics in Superconductivity (3)
Lecture—3 hours. Prerequisite: courses 240A-240B and 240C-240D, or consent of instructor. Topics chosen from areas of current research interest. Offered irregularly.

243A-243B. 243C. Surface Physics of Materials (3)
Lecture—3 hours. Prerequisite: courses 140A-140B, 115A-115B or the equivalents; courses 215A, 240A, or the equivalents recommended. Experimental and theoretical fundamentals of surface and interface physics and chemistry, including electronic and magnetic structure, thermodynamics, adsorption kinetics, epitaxial growth, and a discussion of various spectroscopic and structural probes based on photons, electrons, ions, and scanning probes. Offered in alternate years—II, III, IV.

245A. High-Energy Physics (3)
Lecture—3 hours. Prerequisite: course 230A. Phe- nomenology and systematics of strong, electromag- netic, and weak interactions; hadrons and leptons; determination of quantum numbers; quarks and quarkonia; deep inelastic scattering; the quark part- on model; experiments at hadron colliders and elec- tron-positron colliders. Offered irregularly.

245B. High-Energy Physics (3)
Lecture—3 hours. Prerequisite: course 245A. Electro- weak interactions; phenomenology of the Stan- dard Model of SU(2) L x U(1); weak interaction experiments; results of a series of experiments with W and Z vector bosons; Glashow-Weinberg-Salam model and the Higgs boson; introduction to super- symmetry and other speculations. Offered irregularly.

245C. Collider Physics (3)
Lecture—3 hours. Prerequisite: course 245A; course 252B taken previously or concurrently, or consent of instructor. Collider physics. Topics include quark and gluon distribution functions and the compulsion of cross sections; LHC Collider and Inter- national Linear Collider phenomenology; collider and detector characteristics; extracting models from data; software tools for analyzing experimental data. May be repeated for credit with consent of instructor. Offered irregularly.

246A. Supersymmetry: Theory and Phenomenology (3)
Lecture—3 hours. Prerequisite: courses 230A-230B, 245A-245B recommended, or consent of instructor. Construction of supersymmetric models of particle physics; superfields; supersymmetry breaking the minimal supersymmetric standard model; supergrav- ity; Collider phenomenology; Cosmology. Offered irregularly. Offered irregularly.

246B. Advanced Supersymmetry (3)
Lecture—3 hours. Prerequisite: course 246A. Advanced topics in supersymmetry. Topics include holomorphy, the Affleck-Dine-Seiberg superpotential, Seiberg duality for SUSY QCD, dynamical SUSY breaking. Seiberg-Witten theory, superconformal field theories, supergravity, anomaly and gaugino mediation, and the string theory correspondence. Not offered every year—II.

250. Special Topics in Physics (3)
Lecture—3 hours. Prerequisite: consent of instructor. Topic varies. May be repeated for credit. Not offered every quarter—II, III, IV.

252A. Techniques of Experimental Physics (3)
Lecture—3 hours. Introduction to techniques and methods of designing and executing experiments. Problems and experimental data and matter research will be utilized. Offered irregularly.

252B. Techniques of Experimental Physics (3)
Lecture—3 hours. Introduction to techniques and methods of designing and executing experiments. Problems and experimental data and matter research will be utilized. Offered irregularly.

252C. Statistics and Data Analysis for Particle Physics (3)
Lecture—3 hours. Introduction to statistical data anal- ysis methods in particle physics. Theoretical lectures combined with practical computer laboratory work. Offered irregularly.

253. Signals and Noise in Physics (3)
Lecture—3 hours. Techniques for extracting signals from noise, systematic error. Offered irregularly.

Lecture—3 hours. Prerequisite: course 200A or Mathematics 119A/B or Mathematics 219; course 204A or Mathematics 119A/B or Mathematics 219; course 219A or Mathematics 132A/B or Mathematics 235A. Explores intrinsic unpredictable- ness (deterministic chaos) and the emergence of struc- ture in natural complex systems. Using statistical mechanical, information, and computational techniques and the topological theory, the course develops a systematic framework for analyzing dynamical and stochastic processes in terms of their causal architecture. Offered irregularly.

260. Introduction to General Relativity (3)
Lecture—3 hours. Prerequisite: courses 200A, 200B. An introduction to general relativity. Differential geometry and curved spacetime; the Einstein field equations; gravitational fields of stars and black holes; weak fields and gravitational radiation experimental tests; Big Bang cosmology. Offered irregularly.

262. Early Universe Cosmology (3)
Lecture—3 hours. Prerequisite: second year standing in Physics graduate program or consent of instructor. Introduction to early universe cosmology: Big Bang, inflation, primordial nucleosynthesis, dark matter, dark energy, and other topics of current inter- est. Offered irregularly. Offered irregularly.

264. Cosmic Structure Formation (3)
Lecture—3 hours. Prerequisite: course 260. Growth of structure from small density inhomogeneities in the early universe to the diverse structures observable today. Use of observable properties (cosmic micro- wave background, gravitational lensing, peculiar velocities, number density, etc.) to constrain models of structure formation and fundamental physics. Offered irregularly.

265. High-Energy Astrophysics and Radiative Processes (3)
Lecture—3 hours. Prerequisite: graduate standing in physics or consent of instructor. Survey course cover- ing galactic and extragalactic X-ray and gamma-ray astronomy, radiative processes, and techniques of high-energy astrophysics. Offered irregularly.

266. Data Analysis for Astrophysics (3)
Lecture—3 hours. Prerequisite: graduate standing in physics or consent of instructor. Survey course cover- ing measurement and signal analysis techniques for astrophysics and cosmology throughout the electro- magnetic spectrum. Offered in alternate years.

267. Observational Extragalactic Astronomy & Cosmology (3)
Lecture—3 hours. Prerequisite: graduate standing in physics or consent of instructor. Survey course covering current areas of research on extragalactic objects, their physical properties, origin, evolution, and distribution in space. Offered in alternate years.

270. Current Topics in Physics Research (3)
Lecture/discussion—3 hours. Prerequisite: graduate standing in Physics or consent of instructor. Reading and discussion to help physics graduate students develop and maintain familiarity with the current and past literature in their immediate field of research and related areas. May be repeated for credit (S/U grading only). Offered irregularly.
280. Seminar in Ethics for Scientists (2) Seminar—2 hours. Prerequisite: standing in any department of Science or Engineering. Studies in ethical and historical issues in the ethics of science, possibly including issues such as proper authorship, peer review, fraud, plagiarism, responsible collaboration, and conflict of interest. Limited enrollment. (Same course as Chemical Engineering and Materials Science 280 and Chemistry 280.) (S/U grading only)—I, II, III.

283. Careers in Physics (1) Seminar—1.5 hours. Prerequisite: graduate standing in Physics. Seminar for Physics graduate students on an in-depth appreciation of career opportunities with a graduate degree in physics. Professional physicists, mostly from outside academia, will give seminars describing both research and career insights. May be repeated for credit. Offered irregularly. (S/U grading only)—I. (I.)

289. Seminar in Nuclear Physics (1) Seminar—1 hour. Prerequisite: graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in physics. Topics will vary weekly and will cover a broad spectrum of the active fields of physics research at a level accessible to all physics graduate students. May be repeated for credit. (S/U grading only)—I, II, III. (I, II, III.)

291. Seminar in Nuclear Physics (1) Seminar—1 hour. Prerequisite: graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in physics. May be repeated for credit. (S/U grading only)—I, II, III. (I, II, III.)

292A. Seminar in Elementary Particle Physics (1) Seminar—1 hour. Prerequisite: graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in elementary particle physics. May be repeated for credit. (S/U grading only)—I, II, III. (I, II, III.)

292B. High Energy Frontier Initiative And Cosmology Seminar (1) Seminar—1 hour. Prerequisite: Physics graduate students. May be repeated for credit. (S/U grading only)—I, II, III. (I, II, III.)

293. Seminar in Condensed Matter Physics (1) Seminar—1 hour. Prerequisite: graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in condensed matter physics. May be repeated for credit. (S/U grading only)—I, II, III. (I, II, III.)

294. Seminar in Cosmology (1) Seminar—1 hour. Prerequisite: graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in Cosmology. May be repeated for credit. (S/U grading only)—I, II, III. (I, II, III.)

295. Introduction to Departmental Research (1) Seminar—1 hour. Seminar to introduce first- and second-year physics graduate students to the fields of specialty and research of the Physics staff. (S/U grading only)—II, III.

297. Research on the Teaching and Learning of Physics (3) Seminar—3 hours. Prerequisite: graduate standing in Physics or consent of instructor. Discussion and analysis of recent research in how students construct understanding of physics and other science concepts and the implications of this research for instruction. (I, II, III.)

298. Group Study (1-5) Prerequisite: consent of instructor. (S/U grading only.)

299. Research (1-12) (S/U grading only.)

Professional

371. Teaching in an Active-Engagement Physics Discussion/Lab Setting (1) Lecture/discussion—1 hour. Prerequisite: course 90D or equivalent; consent of instructor, open to graduate students only. Analysis of recent research on science/physics teaching and learning and its implications for teaching labs, discussions, and discussion/labs with an emphasis on differences between conventional and active-engagement instructional settings. The appropriate role of the instructor in specific instructional settings. May be repeated twice for credit. I, II, III. (I, II, III.)

390. Methods of Teaching Physics (1) Lecture/discussion—1 hour. Prerequisite: graduate standing in Physics; consent of instructor. Practical experience in methods and problems related to teaching physics laboratories at the university level, including discussion of teaching techniques, analysis of quizzes and laboratory reports and related topics. Required of all Physics Teaching Assistants. May be repeated for credit. (S/U grading only)—I, II, III, IV.

396. Teaching Assistant Training Practicum (1-4) Prerequisite: graduate standing. May be repeated for credit. (S/U grading only)—I, II, III, IV.

Physiology

Steven Theg, Ph.D

Faculty

Faculty includes members of the Departments of Plant Biology, Molecular and Cellular Biology, and Evolution and Ecology in the College of Biological Sciences.

Primary Department Members
Siobhan Brady, Assistant Professor
Anne Britt, Ph.D., Professor
Luca Comai, Ph.D., Professor
Katayoon Dehesh, Ph.D., Professor
S. P. Dinesh-Kumar, Professor
John J. Harada, Ph.D., Professor
Academic Senate Distinguished Teaching Award
Stacey Harmer, Ph.D., Professor
Bo Liu, Ph.D., Professor
William J. Lucas, Ph.D., Professor
Julin Maloof, Ph.D., Professor
Sharman O’Neill, Ph.D., Professor
Neelima Sinha, Ph.D., Professor
Venkatesan Sundaresan, Ph.D., Professor
Steven M. Theg, Ph.D., Professor

Secondary Department Members
Judy Callis, Ph.D., Professor
Academic Senate Distinguished Teaching Award
James A. Doyle, Ph.D., Professor
Marilynn E. Etzler, Ph.D., Professor
Charles S. Gasser, Ph.D., Professor
J. Clark Lagarias, Ph.D., Professor
Marcel Rejmanek, Ph.D., Professor
Raymond L. Rodriguez, Ph.D., Professor

Emeriti Faculty
David E. Bayer, Ph.D., Professor Emeritus
Bruce A. Bonner, Ph.D., Professor Emeritus
Deborah Carrington, Ph.D., Lecturer
Academic Federation Excellence in Teaching Award
Paul A. Castelfranco, Ph.D., Professor Emeritus
Deborah P. Delmer, Ph.D., Professor Emerita
Emmanuel Epstein, Ph.D., Professor Emeritus
Richard H. Falk, Ph.D., Professor Emeritus
Donald W. Kyhos, Ph.D., Professor Emeritus
Norma J. Lang, Ph.D., Professor Emerita
Terence M. Murphy, Ph.D., Professor Emeritus
Thomas L. Rost, Ph.D., Professor Emeritus
Academic Senate Distinguished Teaching Award
Alan J. Steiner, Ph.D., Professor Emeritus
Kenneth Wells, Ph.D., Professor Emeritus
Affiliated Faculty
John L. Bowman, Ph.D., Professor
Andrew Groover, Ph.D., Adjunct Associate Professor
Joel Ledford, Ph.D., Academic Coordinator

The Major Program

As organisms that sequester carbon and convert solar energy to usable forms, plants are the primary source of food on the planet as well as important buffers against climate change. The Plant Biology major focuses on fundamental aspects of how plants function as organisms and interact with their environment. A wide variety of scientific disciplines are integrated within the Plant Biology major, including physiology, cell and molecular biology, development, genetics and genomics.

The Program. The plant biology major consists of a Biosciences core covering the general principles of biology plus four plant-specific classes dealing with advanced aspects of plant biology including physiology, development, and anatomy. Two required electives allow students to tailor the degree to suit their interests. Independent research in a laboratory setting is a requirement, and majors in Plant Biology are guaranteed this opportunity. Because of the value of plants as a model system for research in molecular genetics, cell biology, and biochemistry, Plant Biology makes an excellent minor or second major for student in these fields.

Career Alternatives. A degree in Plant Biology serves as an excellent launching point for a wide range of career options, including domestic and international opportunities in business, research and

**Minor Programs**

**Minor Requirements**

1. Upper division units, including at least one course from each of the following four groups:
   - (a) Anatomy and Morphology: Evolution and Ecology 140; Plant Biology 105, 116
   - (b) Physiology and Development: Plant Pathology 111, 112, 123; Plant Pathology 130
   - (c) Evolution and Ecology: Evolution and Ecology 100; Plant Biology 102, 108, 117, 143
   - (d) Biochemistry and Molecular Genetics: Biotechnological 150; Plant Biology 113, 126, Plant Sciences 152, 154, 171, 172

**Minor Adviser**

Same as for major above.

Honors and Honors Programs

- Students on the honors list may elect to include a maximum of 5 units of 194H in their major programs. Refer to the Academic Information chapter and the appropriate College section for Honors List information.

Graduate Study

Consult the Plant Biology Graduate Group listing.

Courses in Plant Biology (PLB)

**Lower Division**

90X. Plant Science Seminar (1-4)

Prerequisite: consent of instructor. Examination of a special topic in a small group setting. Not open for credit to students who have completed course Plant Sciences 90X. (Former course number Plant Sciences 90X.)

92. Internship (1-12)

Internship—3-36 hours. Prerequisite: consent of instructor. Examination of a special topic in a small group setting. Not open for credit to students who have completed course Plant Sciences 90X. (Former course number Plant Sciences 90X.)

98. Directed Group Study (1-5)

Prerequisite: consent of instructor. Technical and/or professional experience or off campus. Supervised by a member of the Plant Biology faculty. (P/NP grading only.)

99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

**Upper Division**

Questions for subjects numbered 102 through 126, see the Plant Biology Department office in 1002 Life Sciences.

102. California Floristics (5)

105. Developmental Plant Anatomy (5)

Lecture—3 hours; laboratory—6 hours. Prerequisite: Biological Sciences 2C or equivalent preparation in plant biology. Restricted to 50 students; split equally into two lab groups. Structural anatomy of vascular plants. Training in basic tissue sectioning, staining, and use of the compound microscope. GE credit: SciEng—III. (III.) Doyle

108. Systematics and Evolution of Angiosperms (5)

Lecture—3 hours; laboratory—6 hours. Prerequisite: Biological Sciences 1A, 1B, 1C, or 2A, 2B, 2C. Diversity and classification of angiosperms (flowering plants) on a world scale, and current understanding of the origin of angiosperms and evolutionary relationships and trends within them based on morphological and molecular evidence. (Same course as Evolution and Ecology 108.) GE credit: SciEng—III. (III.) Doyle

111. Plant Physiology (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1C, 2A, 2B, and 2C; Chemistry 88 and Physics 7C (e.g., either be taken concurrently). Plant Biology 105 recommended. The plant cell as a functional unit. The processes of absorption, movement, and synthesis of water and minerals. Water loss, translocation, photosynthesis, respiration. (I.) Deheshe, Lucas

112. Plant Growth and Development (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1C, 2A, 2B, and 2C; Chemistry 88 and Physics 7C. Instruction in the mechanisms and control systems that govern plant growth and development and the responses of plants to the environment. Strong emphasis on vegetative development of flowering plants. GE credit: SciEng | QL, SE, SL—II. (II.) Harada, Sundaresan

113. Molecular and Cellular Biology of Plants (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1A and 1C, or 2A, 2B, 2C; 101; Biological Sciences 102 or 105 recommended. Molecular and cellular aspects of the growth and development of plants and their response to external and environmental stresses. Primary focus on processes unique to plants. Experimental approaches will be emphasized. GE credit: QL, SL, VL—III. (III.) Harada

113D. Problems in Molecular and Cellular Biology of Plants (1)

Discussion—1 hour. Prerequisite: course 113 concurrently. Discussion of topics and applications related to principles presented in course 113. Students will be assigned problems each week showing novel applications of the principles described in course 113 and will prepare answers to be delivered orally during the class period. (P/NP grading only.)—(I.) Harada, Sundaresan

116. Plant Morphology and Evolution (5)

Lecture—3 hours; laboratory—6 hours. Prerequisite: introductory plant biology (e.g., Biological Sciences 1C, 2A, 2B, and 2C); plant anatomy recommended (e.g., Plant Biology 105). Introduction to the form, development, and evolution of vascular plants. Emphasis given to the form and development of reproductive structures in ferns and seed-producing plants as a basis for determining evolutionary relationships. GE credit: SciEng—II. (II.) Jernstedt

**Quarter Offered:** I-Fall, II-Winter, III-Spring, IV-Summer
117. Plant Ecology (4)
Lecture—3 hours; fieldwork—3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C, or 2A, 2B, 2C. Plant biology intended to study the interactions between plants, plant populations or vegetation types and their physical and biological environments, with special emphasis on California. Four full-day field trips and brief write-up of class project required. [Same course as Evolution and Ecology 117—II (I)]

119. Population Biology of Invasive Plants and Weeds (3)
Lecture—2 hours; laboratory—3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C, or 2A, 2B, 2C; introductory statistics recommended. Origin and evolution of invasive plant species and weeds, reproduction and dispersal, seed ecology, modeling of population dynamics, interactions between invasive species, native species, and crops, biological control. Laboratories emphasize design of competition experiments and identification of weedy species. [Same course as Evolution and Ecology 119.] GE credit: SciEng | SE—III. (III) Rejmanek

123. Plant-Virus-Vector Interaction (3)
Lecture—3 hours. Prerequisite: Biological Sciences 2A, Biological Sciences 101; course 105, Plant Pathology 120, and Entomology 100 recommended. Analysis of interactions necessary for viruses to infect plants. Interactions among insect vectors and host plants involved in the plant-virus life cycle. Evolutionary aspects of the molecular components in viral infection and modern approaches to the study of viral movements. "Invasive course as Entomology 123 and Plant Pathology 123." Offered in alternate years. GE credit: SE, SL, WE—(I) Lucas, Gillbertson, Ullman

126. Plant Biochemistry (3)
Lecture—3 hours. Prerequisite: Biological Sciences 103 or 105. The biochemistry of important plant processes and metabolic pathways. Discussion of methods used to understand plant processes, including the use of transgenic plants. [Same course as Molecular and Cellular Biology 126.] GE credit: SciEng | SE, SL—II. (II) Callis, Tian

143. Evolution of Crop Plants (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: Plant Sciences 2 or Biological Sciences 1C or 1D. Origins of crops and agriculture, including main methodological approaches, centers of crop biodiversity, dispersal of crops, genetic and physiological differences between crops and their wild progenitors, agriculture practiced by other organisms, and role and ownership of crop biodiversity. GE credit: SciEng or SocSci, Div, Wrt | SE or SS, SL, WE—III. (III) Gepts

148. Introductory Mycology (4)
Lecture—2 hours; laboratory—6 hours. Prerequisite: Biological Sciences 1A, 1B, 1C. Systematics, ecology, evolution, and morphology of fungi. Importance of fungi to humans. [Same course as Plant Pathology 148.] GE credit: SE—(I) MacDonald, Rizzo

189. Experiments in Plant Biology: Design and Execution (3)
Laboratory/discussion—6 hours. Prerequisite: Biological Sciences 1A, 1B, 1C, or 2A, 2B, 2C, or the equivalent courses in Plant Sciences, and consent of the instructor. Provides an opportunity for undergraduate students to formulate experimental approaches to current questions in plant biology and to carry out their proposed experiments. May be repeated for credit for a total of 12 units. (P/NP grading only)—I, II, III, (I, II, III)

190G. Research Conference in Plant Biology (1)
Discussion—1 hour. Prerequisite: upper division standing in Plant Biology or related discipline; consent of instructor. Introduction to research methods in plant biology. Discussion of field or laboratory research projects, survey of appropriate literature, and discussion of research by faculty and students. May be repeated for credit. (P/NP grading only)—I, II, III, (I, II, III)

192. Internship (1-12)
Internship—3.6 hours. Prerequisite: completion of 84 units and consent of instructor. Technical and/or professional experience obtained under the supervision of a member of the Plant Biology Department faculty. May be repeated for credit. (P/NP grading only)

194. Special Study for Honors Students (1-5)
Prerequisite: open only to majors of senior standing on honors list. Independent study of selected topics under the direction of a member or members of the staff. Completion will satisfy the writing of a senior thesis. (P/NP grading only.)

197T. Tutoring in Plant Biology (1-5)
Discussion—2.6 hours. Prerequisite: upper division standing and consent of instructor. Assisting the instructor by tutoring students in one of the Department's regular courses. May be repeated for credit. (P/NP grading only)—I, II, III, (I, II, III)

198. Directed Group Study (1-5)
Prerequisite: consent of instructor. (P/NP grading only)

199. Special Study for Advanced Undergraduates (1-5)
Prerequisite: consent of instructor. (P/NP grading only)

Professional

396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing; consent of instructor. Practical experience in acting as teaching assistant in Plant Biology courses. Learning activity: hands on experience in preparing for and conducting discussions, guiding student laboratory work, and the formulation of questions and topics for examinations. May be repeated for credit. (S/U grading only)—I, II, III, IV (I, II, III, IV)

Quarter Offered: Fall—II; Winter—III; Spring—IV; Summer—IV

Fall 2011 and on Revised General Education (GE): AH—Arts and Humanities; SE—Science and Engineering; SS—Social Sciences; ACH—American Cultures; DD—Domestic Diversity; Wrt—Writing Experience

Plant Biology (A Graduate Group) 473
200C. PBGG Core Course Series—Spring quarter (5)

Lecture—3 hours; discussion—2 hours. Prerequisite: course 200A and 200B. The third of three PBGG core graduate courses. Coverage includes (1) plant water relations, (2) cellular & long distance transport processes, (3) mineral nutrition, (4) environmental impacts on growth & development, (5) stress perception & responses, (6) canopy processes, and (7) plant interactions with other organisms. III. (Ill.) Blumwald, Silk.

203N. Biology of the Plant Cell (4)

Lecture—3 hours. Discussion/laboratory—2 hours. Prerequisite: Plant Biology 111 or Biological Sciences 104, or the equivalent. Recent progresses in plant cell biology. Intracellular mobility in plant cells. Common techniques associated with the progress of plant cell biology. Open to senior undergraduate students in Plant Biology major. Offered in alternate years. (S/U grading only.)

210. Plant Ecophysiology (3)

Lecture—3 hours. Prerequisite: Plant Biology 111, 112, 117. Study of the mechanisms of physiological adaptation of plants to their environment. Offered in alternate years. —I.

212. Physiology of Herbicidal Action (3)

Lecture—3 hours. Prerequisite: Plant Biology 112, 117. Study of the fundamental processes involved in the physiological action of herbicides. Detailed consideration of the fate of herbicides in plants. Offered in alternate years. —I.

214. Higher Plant Cell Walls (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: Plant Biology 112, and a course in biochemistry. Lectures focus on the structure, analysis, synthesis, and development, and metabolism of cell wall polysaccharides. Discussions center on analysis of scientific papers related to lecture topics. Offered in alternate years. —I. Labavitch.

220. Plant Developmental Biology (4)

Lecture—3 hours; discussion—1 hour; term paper. Prerequisite: plant anatomy, physiology, and biochemistry. A survey of the concepts of plant development and organization. Examines plant cells, tissues, and organs with an understanding of the genetic and environmental factors that control development. Offered in alternate years. —Sinha

223. Special Topics in Scientific Method (2)

Discussion—2 hours. Examine the historical and philosophical background of the scientific method. Analyze the rational, perceptual, causal, and social aspects of scientific knowledge. Clarify the roles of reason, experimentation and creativity in scientific research. (S/U grading only.)—I. Bradford

227. Plant Molecular Biology (4)

Lecture/discussion—4 hours. Prerequisite: Molecular and Cellular Biology 121 or 161. Molecular aspects of higher plant biology with emphasis on gene expression. Plant nuclear and organelle genome organization, gene structure, mechanisms of gene regulation, gene transfer, and special topics related to development and response to environmental stimuli. Offered in alternate years. —Britt, Sinha

229. Molecular Biology of Plant Reproduction (3)

Lecture—3 hours. Molecular genetic basis of plant reproduction. Emphasis on understanding developmentally regulated gene expression as it relates to the major changes that occur during plant reproduction and on the genetic control of flowering. Offered in alternate years. —O'Neill

290A. Faculty Seminar (1)

Discussion—1 hour. Discussion of research area of seminar speakers in Plant Biology Graduate Group Seminar Series. Restricted to Plant Biology graduate students (PBGG). May be repeated six times for credit. (S/U grading only.)—I, II, III, (I, II, III).

290B. Seminar (1)

Seminar—1 hour. Seminars presented by visiting scientists on research topics of current interest. (S/U grading only.)—I, II, III, (I, II, III).
Emeriti Faculty

Related Major Programs. See the major in Plant Biology, p. 47.

Graduate Study. The Department of Plant Pathology offers programs of study and research leading to the M.S. and Ph.D. degrees. Information can be obtained from the graduate adviser. See also the Graduate section, page 111.

Graduate Advisers. R.M. Davis, G.L. Coaker, R.M. Bostock

Courses in Plant Pathology (PLP)

Lower Division

10. Edible Mushroom Cultivation (2)
Lecture—1 hour; laboratory/conversation—3 hours. Prerequisite: Biological Sciences 10 or Microbiology 20 recommended. Principles and practices of growing edible mushrooms, including cultivation maintenance, basic mushroom substrate preparation, composting, spawn generation techniques, inoculation methods, harvesting, and pests and pest management. — II. (II) Davis

120. Introduction to Plant Pathology (4)
Lecture—2 hours; laboratory—6 hours. Prerequisite: Biological Sciences 1A, 1B, 1C. Systematics, ecology, evolution, and morphology of fungi. Importance of fungi to humans. (Same course as Plant Biology 146.) GE credit: SciEng, Wrt | SL.—I, III. (I, III.) Cook, Newell-McGloughlin

140. Agricultural Biotechnology and Public Policy (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: high school level biology, including genetics; Biological Sciences 10 recommended. Examination of the development and deployment of agricultural biotechnologies, particularly transgenic crop plants, microorganisms, and animals, with consideration of conventional agriculture, public perceptions of technologies, food safety, environmental impact, public policies and regulations. GE credit: SciEng, Wrt | SL.—III. (III.) Cook, Newell-McGloughlin

184. Introductory Mycology (4)
Lecture—2 hours; laboratory—8 hours. Prerequisite: Biological Sciences 1A, 1B, 1C. Systematics, ecology, evolution, and morphology of fungi. Importance of fungi to humans. (Same course as Plant Biology 146.) GE credit: SciEng, Wrt | SL.—III. (III.) Gordon

185. Advanced Mushroom Taxonomy (2)
Laboratory/discussion—3 hours; fieldwork—1 hour. Prerequisite: course 135 or 148, and Biological Sciences 101 or the equivalent. Microscopic and molecular methods used in the identification of mushroom species; molecular characterization including PCR-amplification of ribosomal nuclear DNA, digestion of the product with restriction enzymes, and DNA sequencing, a one-day field trip is required. Offered in alternate years.— I. Davis

189D. Global Disease Biology Research Discussion (1)
Discussion—1 hour. Prerequisite: junior standing, courses 90, 187, Science and Society 23; course 189 required concurrently. Restricted to Global Disease Biology majors only. Course helps prevent or solve problems the students’ research activity. Independent advising and assistance on research proposal. (P/NP grading only)—I, II, III. (I, II, III.) Kirkpatrick

192. Internship (1-12)
Internship—3-36 hours. Prerequisite: course 120 and consent of instructor. Experience off and on campus, supervised by a member of the faculty. (P/NP grading only.)

198. Directed Group Study (1-5)
P/NP grading only.

199. Special Study for Advanced Undergraduates (1-15)
(P/NP grading only.

Graduate

201A. Impacts, Mechanisms and Control of Plant Disease (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 120, graduate student status in the Plant Pathology Graduate Program, or consent of instructor. A case-studies approach to analysis of plant diseases caused by bacteria, fungi, oomycetes, and viruses, including impacts, etiology, pathogen taxonomy and epidemiology, biotechnological and genetic aspects of pathogen-host interactions, virulence and resistance, and approaches to disease control. —II. (II) Gordon

201B. Impacts, Mechanisms and Control of Plant Disease (5)
Lecture—2 hours; discussion—1 hour. Prerequisite: course 120, course 201A, and graduate student status in the Plant Pathology Graduate Program, or consent of instructor. A case-studies approach to analysis of plant diseases, including emerging dis-

205A. Diseases of Vegetable and Field Crops (3)
Lecture—discussion—3 hours; fieldwork—3 hours. Prerequisite: course 120. Clinical study of diseases of vegetable and field crops with emphasis on etiology, epidemiology, diagnosis, and control. Field trips required. Offered in alternate years.—III. Davis

205B. Diseases of Vegetable and Field Crops—Summer Field Trip (1)
Fieldwork—3 hours. Prerequisites: courses 120 and 205A. Continuation of course 205A—four-day field trip investigating diseases of vegetable and field crops (Deferred grading only, pending completion of sequence. S/U grading only.)—IV. (IV) Davis

206A-206B, Diseases of Fruit, Nut, and Vine Crops (3-1)
Lecture—2 hours, laboratory—6 hours. Prerequisite: course 120; Plant Biology 119. Course 205 may be taken concurrently. Clinical study of fruit, nut, and vine crops diseases with emphasis on etiology, epidemiology, diagnosis, and control. Offered in alternate years. (Deferred grading only, pending completion of sequence.)—III-IV. (III-IV) Kirkpatrick

210. Biochemistry and Molecular Biology of Plant-Pathogen Interactions (4)
Lecture—discussion—4 hours. Prerequisite: Biological Sciences 101, 102, 103, and 104, or the equivalent. Discussion of plant-microbe interactions, focused on the understanding of the interactions, microbial and molecular events that determine the disease state. Offered in alternate years.— I. Bostock, Coaker

217. Molecular Genetics of Fungi (3)
Lecture—2 hours. Prerequisite: standing in a biological science, Biological Sciences 101, 102, Molecular and Cellular Biology 161, Plant Biology 119, courses 130, 215X; Microbiology 215 recommended. Advanced treatment of molecular biology and genetics of filamentous fungi, yeasts, and molds; genomics, gene manipulation. Offered in alternate years. (Same course as Biological Chemistry 217.)—II.

224. Advanced Mycology (4)
Lecture—2 hours; laboratory—6 hours. Prerequisite: course 148 or Plant Biology 148 or consent of instructor. Systematics, ecology, evolution, and behavior of the fungi. Topics include modern techniques and theories on classification of fungal species, concepts, sexual compatibility and vegetative compatibility. Laboratories emphasize various approaches to fungal identification. Offered in alternate years.—III. Epstein, Rizzo

228. Plant Bacteriology (5)
Lecture—2 hours; laboratory—9 hours. Prerequisite: course 120; Microbiology 101 or the equivalent; Biological Sciences 102, 103. Study of bacteria which have a saprophytic, symbiotic, or parasitic association with higher and lower plants. Clinical and molecular methods for identification and classification of these bacteria. Offered in alternate years.—(I.) Kirkpatrick, Gilberston

230. Plant Virology (3)
Lecture—3 hours. Prerequisite: upper division or graduate course in molecular biology or graduate student in plant pathology. Viruses as causal agents of plant disease and as tools for manipulating plants; structures of virus particles; mechanisms of transmission, replication, and propagation in the plant; cytopathology and molecular biology in susceptible and resistant reactions to virus infection; virus disease control. Only 2 units of credit to students who have completed Microbiology 262. Not open for credit to students who have completed course 226. Offered in alternate years.— II. Bruneng, Falke
Plant Physiology

290C. Advanced Research Conference (1) Seminar—1 hour. Prerequisite: course 210 or consent of instructor. Presentation, evaluation, and critical discussions of research activities in the area of advanced research primarily designed for graduate students. (S/U grading only).—I, II, III (II, III).

291. Seminar in Molecular Plant Pathology (1) Seminar—1 hour. Prerequisite: course 210 or consent of instructor. Review and evaluation of current literature and research in biochemistry and molecular biology of plant microbe interactions. May be repeated for credit. (S/U grading only).—I, II, III (II, III). Rizzo

298. Special Group Study (1-5) (S/U grading only)

299. Research (1-12)

Major Programs. See Biotechnology, on page 475; Ecological Management and Restoration, on page 297; Environmental Horticulture and Urban Forestry, on page 297, and Plant Sciences, on page 476.

Related Courses. See the Biotechnology, Environmental Horticulture, Horticulture and Agronomy, and Plant Biology course listings.

Graduate Study. For related graduate study, see the M.S. degree program in International Agricultural Development, and the M.S. and Ph.D. degree programs in the graduate groups of Horticulture and Agronomy, Plant Biology, Ecology, Genetics, Geog- raphy, and Soils and Biochemistry. See also Graduate Studies, on page 111.

The Major Program

The Plant Sciences major is designed for students who are interested in a scientific understanding of how plants grow and develop in managed agricultural ecosystems and how plant products are utilized for food, fiber and environmental enhancement. Advances in science and technology have provided new insights and options for using plants to address the issues associated with providing renewable food, fiber and energy resources for a growing global population while minimizing adverse impacts on the natural environment. Graduates in Plant Sciences are able to apply their skills and knowledge to a diverse range of agricultural and environmental goals or pursue advanced degrees in plant sciences.

The Program. The curriculum provides depth in the biological and physical sciences and a broad understanding of how plants obtain and utilize resources from their environment to sustain their growth and development. The influences of genetics, management systems and environmental inputs on crop development and productivity are emphasized along with the postharvest preservation and marketing of plant products. Students will develop an area of specialization in one of the following areas of concentration: Plant Biology, Plant Pathology, Ecological Management and Restoration, and Environmental Horticulture. Pre-Fall 2011 General Education (GE): Arts and Humanities; Science and Engineering; Social Sciences; American Cultures; Domestic Diversity; Oral Skills; Quantitative; Scientific; Visual; World Cultures; Writing Experience; Fall 2011 and on Revised General Education (GE): Arts and Humanities; Science and Engineering; Social Sciences; American Cultures; Domestic Diversity; Oral Skills; Quantitative; Scientific; Visual; World Cultures; Writing Experience; Quarter Offered: Fall, Winter, Spring, Summer 2011-2012 offering in parentheses.
Plant Breeding and Genetics Option

Agronomy, biotechnology, ecology, environmental sciences, including plant biology, genetics, breeding, horticulture, agriculture, biotechnology, ecology, environmental studies, pest management, education, or business management.

Course Selection

A minimum of 25 upper division units, approved by an advisor or program coordinator, is required for the major. Honors option: Students may fulfill the program requirement through an Honors thesis in their senior year. Students may also pursue an Honors thesis in their senior year.

Graduates from this program are prepared to pursue a wide range of career alternatives. Graduates are qualified to pursue graduate study in plant biology, genetics, breeding, horticulture, agriculture, biotechnology, ecology, environmental studies, pest management, education, or business management.

Career Alternatives

Graduates are qualified to pursue graduate study in plant biology, genetics, breeding, horticulture, agriculture, biotechnology, ecology, environmental studies, pest management, education, or business management. Graduates are also prepared to pursue a wide range of career alternatives. Graduates are qualified to pursue graduate study in plant biology, genetics, breeding, horticulture, agriculture, biotechnology, ecology, environmental studies, pest management, education, or business management. Graduates are also prepared to pursue a wide range of career alternatives. Graduates are qualified to pursue graduate study in plant biology, genetics, breeding, horticulture, agriculture, biotechnology, ecology, environmental studies, pest management, education, or business management.

Areas of Specialization (choose one)

Crop Production Option

Development 170, Agrcultural and Resource Economics 100A, 130, 138, Biotechnology 150, Hydrobiology 175, Postharvest Biology and Technology Option:

Individual Option

It is recommended that students maintain an average grade of at least B- in their major courses. Students are encouraged to explore a variety of career options, including graduate study in plant biology, genetics, breeding, horticulture, agriculture, biotechnology, ecology, environmental studies, pest management, education, or business management. Graduates are also prepared to pursue a wide range of career alternatives. Graduates are qualified to pursue graduate study in plant biology, genetics, breeding, horticulture, agriculture, biotechnology, ecology, environmental studies, pest management, education, or business management. Graduates are also prepared to pursue a wide range of career alternatives. Graduates are qualified to pursue graduate study in plant biology, genetics, breeding, horticulture, agriculture, biotechnology, ecology, environmental studies, pest management, education, or business management.

Total Units for the Major: 118-147

Cultivated Plants (4)

Lecture—3 hours; discussion/lab—3 hours. Prerequisite: high school course in biology and chemistry recommended. A holistic introduction to the underlying ecological and physiological principles of cultivated plants and their response to the environment. Includes concepts behind plant selection, cultivation, and pest management. Laboratories include discussion and interactive demonstrations.

Diverse agricultural systems and practices and their relative sustainability. Laboratories provide direct experiences in the selected agricultural practices and systems. GE credit: SciEng | SE | I, II, III | Van Horn, Williams

5. Plants for Garden, Orchard and Landscape (2)

Lecture—1 hour; laboratory—3 hours. Prerequisite: for non-majors. Hands-on experience with plants cultivated for food, environmental enhancement and personal satisfaction. Topics include vegetable propagation and growth activities, flowers and ornamental plants, and the role of plants in human health and well-being. Not open for credit to students who have completed Plant Biology 1 or Plant Sciences 2. (Former course Plant Biology 1) GE credit: SciEng | SE | I, II, III | Drakakaki, Fischer, Jasieniuk, Tian

6. Power Flowers—Art and Science of Flowers and Their Uses (2)

Lecture/discussion—2 hours. Prerequisite: high school biology. Introduction to the art and science of using and growing flowers to harness the power that is represented by their aesthetic beauty. Handling, production, arranging, breeding and marketing of flowers. Emphasis on potted plants and cutflowers. (P/NP grading only) I, III | Lieb

8. Fruits and Nuts of California and the World (3)

Lecture—4 hours. Field trip seventh week of quarter. Biological and environmental principles of tree crop agriculture emphasizing California production. Topics include temperate and subtropical species, biotechnology and genetic improvement, environmental physics, pest, plant and water management, consumer issues. Not open for credit to students who have completed Plant Sciences 10. (Former course Plant Sciences 10) GE credit: SciEng | I, II, III | Polito

12. Plants and Society (4)

Lecture—3 hours; extensive writing—3 hours. Prerequisite: high school biology. Dependence of human societies on plant and plant products. Plants as resources for food, fiber, health, enjoyment and environmental services. Sustainable uses of plants for food production, raw materials, bioenergy, and environmental conservation. Global population growth and future food supplies. Not open for credit to students who have completed Plant Biology 12. (Former course Science and Society 12) GE credit: SciEng or SocSci, Div, Wrt | SE or SS, WE | I, II, III, IV | Drakakaki, Fischer, Jasieniuk, Tian

14. Introduction to Current Topics in Plant Biology (4)

Discussion—3 hours; term paper. Introduction to scientific methods and current understanding of genetics, metabolism, and cellular structure in plants, with special emphasis on topics related to societal issues, such as herbal medicine and genetically modified organisms. Designed for students not specializing in biology. Not open for credit to students who have completed Plant Biology 11. GE credit: SciEng, Wrt | SE, SL | Van Horn, Williams

21. Application of Computers in Technology (3)

Lecture—2 hours; laboratory/discussion—2 hours. Prerequisite: high school algebra. Concepts of computing and applications using personal computers, spreadsheets, database management, word processing, and communications. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 21. (Former course Agricultural Management and Rangeland Resources 2) GE credit: SciEng | SE | I, II, III, IV | Van Horn, Williams

49. Organic Crop Production Practices (3)

Lecture—1 hour; discussion—1 hour; laboratory—3 hours. Principles and practices of organic production of annual crops. Including organic crops, soil, and pest management, cover cropping, composting, seeding, transplanting, harvesting, and marketing. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 49. (Former course Agricultural Management and Rangeland Resources 49) (P/NP grading only) GE credit: SE | I, II, III, IV | Van Horn

98. Directed Group Study (1-5)

Prerequisite: consent of instructor; primarily for lower division students. (P/NP grading only) I, II, III, IV | I, II, III, IV

Quarter Offered: Autumn, Winter; Pre-Fall 2011 and on Revised General Education (GE): ArtHum—Arts and Humanities; SciEng—Science and Engineering; SocSci—Social Sciences; ACGN—American Cultures; DD—Domestic Diversity; OL—Oral Skills; QL—Quantitative; SL—Scientific; VL—Visual; WC—World Cultures; WE—Writing Experience
100A. Metabolic Processes of Cultivated Plants (3) Lecture—3 hours. Prerequisite: course 2 or Biological Sciences 1C, 2C, or equivalent. Metabolic processes, including water relations, respiration, photosynthesis, enzyme kinetics, immunology, and nitrogen fixation. Quantitative methods, problem solving, and practical applications are emphasized. GE credit: SciEng | SE — III. (III.) Fischer, Zakharov

100AL. Metabolic Processes of Cultivated Plants Laboratory (2) Lecture/discussion—3 hours. Prerequisite: course 100A or the equivalent (may be taken concurrently). Techniques and instruments used to study plant metabolic processes, including water relations, respiration, photosynthesis, enzyme kinetics, immunology, and nitrogen fixation. Quantitative methods, problem solving, and practical applications are emphasized. GE credit: SciEng | SE — III. (III.) Blumwald

100B. Growth and Yield of Cultivated Plants (3) Lecture—3 hours. Prerequisite: course 100A or consent of instructor. Principles of plant interactions with their physical and biological environments and their acquisition of the resources needed for growth and reproduction. An emphasis on how management practices and environmental conditions affect crop productivity and quality. GE credit: SciEng | SE — II. (II.) Bradford, Solovet

100BL. Growth and Yield of Cultivated Plants Laboratory (2) Lecture/discussion—3 hours. Prerequisite: course 100A or may be taken concurrently. Laboratory exercises in plant growth and development and their regulation, including photomorphogenesis, plant growth regulators, plant anatomy, seed germination, fruit ripening and senescence. Includes field trips to illustrate relationships to cropping and marketing systems. GE credit: SciEng | SE — II. (II.) Bradford

100C. Environmental Interactions of Cultivated Plants (3) Lecture—2 hours. Prerequisite: course 100A or consent of instructor. Principles of plant interactions with their physical and biological environments and their acquisition of the resources needed for growth and reproduction. An emphasis on how management practices and environmental conditions affect crop productivity and quality. GE credit: SciEng | SE — III. (III.) Brown

100CL. Environmental Interactions of Cultivated Plants Laboratory (2) Lecture—2 hours. Prerequisite: course 100C or may be taken concurrently. Techniques and instruments used to study plant interactions with their physical and biological environments, including light response, transport, photosynthesis, nitrate availability and utilization, biomass accumulation. Quantitative methods and modeling are emphasized. GE credit: SciEng | SE — III. (III.) Shackel

101. Agriculture and the Environment (3) Lecture—2 hours. Prerequisite: course 2 or consent of instructor. Interaction between agriculture and the environment. Focus on the interaction between agriculture and the environment to address the principles required to move the agriculture and development solutions to complex problems facing society. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 101. Former course 102. GE credit: SciEng | SE — II. (II.) Tate

102. California Flora (5) Lecture—3 hours; laboratory—8 hours. Prerequisite: course 2, Biological Sciences 1C, 2C, or equivalent. Survey of the flora of California, emphasizing recognition of important vascular plant families and genera and use of taxonomic keys for species identification. Current understanding of relationships of plant families. Principles of plant taxonomy and phylogenetic systematics. One Saturday field trip. (Same course as Plant Biology 102.) GE credit. SciEng | SE, VL — III. (III.) Potter

105. Concepts in Pest Management (3) Lecture—2 hours, laboratory/discussion—3 hours. Prerequisite: Biological Sciences 1C or course 2, Chemistry 88B. Introduction to the ecological principles of integrated pest management, biology of different classes of pests, losses they cause, population assessment, evaluation of advantages and disadvantages of different techniques used for pest management, IPM programs. Not open for credit to students who have completed Plant Biology 105. GE credit: SciEng | SE — III. (III.) Aitken, Flint

110A. Principles of Agronomic Crop Production in Temperate and Tropical Systems (3) Lecture—3 hours. Prerequisite: course in general botany or course 2 recommended. Fundamentals of field crop production in temperate and tropical climates. Resource utilization and economic, political and social problems are considered in relation to technical and economic considerations of agricultural production and use. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 105. GE credit: SciEng | SE — I. (I.) Aitken, Flint

110C. Crop Management Systems for Vegetable Production (4) Lecture—2 hours, laboratory—3 hours; discussion—1 hour. Prerequisite: course 2; course 110A recommended. Horticultural principles applied to production and management systems for vegetable crops. Laboratory and discussion lab required. Efficient field management and resource use practices. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 110C. GE credit: SciEng | SE — II. (II.) Mitchell

110L. Principles of Agronomy Laboratory (1) Laboratory—3 hours. Prerequisite: course 110B or may be taken concurrently. Introduction to principles of agronomic crop production. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 110L. GE credit: SciEng | SE — II. (II.) Mitchell

110F. Forage Crop Ecology (3) Lecture—3 hours. Prerequisite: course 2, Biological Sciences 1C, 2C, or consent of instructor. Forages as a world resource in food production. Ecological principles governing the adaptation, establishment, growth and management of perennial and annual forages, including pastures, rangelands and hay; aspects of forage yields, quality, and nutritional value to livestock. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 110F. GE credit: SciEng | SE — III. Teuber

111. Biological Applications in Fruit Tree Management (2) Lecture—4 hours, laboratory—3 hours. Prerequisite: course 2, Biological Sciences 1C, 2C, or equivalent. Physiology, growth, development and environmental requirements of fruit trees and the cultural practices used to maintain them. Emphasis on the application of biological principles in the culture of commercially important temperate zone fruit tree species. Not open for credit to students that have completed Plant Biology 173. Former course Plant Biology 173.) GE credit: SciEng | SE

114. Biological Applications in Fruit Production (2) Lecture—1 hour; laboratory—3 hours. Prerequisite: course 2, Biological Sciences 1C or course 120. Introductory biology and ecosystem principles of fruit production, tree nutrition and orchard management for optimizing cropping. Laboratories emphasize hands-on work with orchard tree systems that are done specifically to produce the crop. Not open for credit to students who have completed Plant Biology 174. Former course Plant Biology 174.) GE credit: SciEng | SE — II. (II.) DeLong

120. Applied Statistics in Agricultural Sciences (4) Lecture—3 hours; discussion/laboratory—3 hours. Prerequisite: upper division standing. Application of statistical methods to design and analysis of experiments for plant, animal, behavioral, nutritional, and consumer sciences. Basic concepts and statistical methods are presented in lectures, laboratories emphasize data processing techniques, problem solving, and interpretation in specialized fields. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 120. Former course Agricultural Management and Rangeland Resources 120. GE credit: SciEng | QL — I. (I.) Laca, Medrano, Teuber

130. Rangelands: Ecology, Conservation and Restoration (3) Lecture—3 hours. Prerequisite: Biological Sciences 1C or equivalent or course 2 recommended. Horticultural principles applied to production and management systems for vegetable crops. Laboratory and discussion lab required. Efficient field management and resource use practices. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 130. GE credit: SciEng | SE — II. (II.) Tate

131. Identification and Ecology of Grasses (2) Lecture—7.5 hours; laboratory—20 hours; discussion—5 hours. Prerequisite: Biological Sciences 1C or course 2, Plant Biology 102 and junior standing recommended. Taxonomy and identification of western grasses. Development of skills in using plant identification keys. Ecology and evolution of grasses in grazing ecosystems. Given the week following spring quarter. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 131. Former course Agricultural Management and Rangeland Resources 131.) Offered in alternate years. GE credit: SciEng | SE, VL

135. Ecology and Community Structure of Grassland and Savannah Herbivores (3) Lecture—3 hours. Prerequisite: Biological Sciences 1A or 1B and course 2, or Biological Sciences 1C, general ecology course (Environmental Science and Policy 100) recommended. Feeding ecology of grassland herbivores and its importance in determining biomass partitioning and productivity. Optimal foraging, interspecific interactions, and primary productivity are considered as factors structuring natural and managed grassland and savannah systems. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 135. Former course Agricultural Management and Rangeland Resources 135.)

140. Culinary and Medicinal Herbs (3) Lecture/discussion—3 hours. Prerequisite: Plant Sciences 2. Culinary and Medicinal Herbs 2. Growth, identification, cultivation and use of common culinary and medicinal herbs; herbal plant families; effects of climate and soil on herb crops; herbal medicine; ecology and geography of herbs; herb garden design; secondary chemistry of active compounds. (Same course as Environmental Science
150. Sustainability and Agroecosystem Management (4)
Lecture—3 hours; laboratory—2 hours. Prerequisite: Soil Science 101, Chemistry 2A, and course 2, Biological Sciences 1C or 2C. Interdisciplinary analysis of agricultural production and food systems with primary emphasis on biophysical processes. Concepts governing the function of temperate and tropical agroecosystems in relation to resource availability, ecological sustainability, and socioeconomic viability. Comparative ecological analyses of agroecosystems. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 150. (Former course Agricultural Management and Rangeland Resources 150.) GE credit: SciEng | OL, SE, SL—III. (III) Six
152. Plant Genetics (4)
Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: Biological Sciences 1A or 2A or consent of instructor. Basic principles of transmission genetics, crossovers, quantitative genetics, and molecular genetics. Practical aspects of genetic crosses and analysis of segregating populations. Not open for credit to students who have completed Plant Biology 152. (Former course Plant Biology 152.) GE credit: SciEng | SE. —II. (II) Beckles

153. Plant, Cell, Tissue and Organ Culture (4)
Lecture—2 hours; discussion—1 hour; laboratory—3 hours. Prerequisite: course 2 or Biological Sciences 1C or 2C. Basic and applied aspects of plant tissue culture including media preparation, micropropagation, organogenesis, somatic embryogenesis, and plant regeneration. Protocols and culture transcription. Not open for credit to students who have completed Plant Biology 153. (Former course Plant Biology 153.) GE credit: SciEng | SE. —II. (II) Cadenasso

154. Introduction to Plant Breeding (4)
Lecture—3 hours; laboratory—3 hours. Prerequisite: course 152, Biological Sciences 101 or consent of instructor. The principles, methods, and applications of plant breeding and genetics to the improvement of crops. Illustration of how plant breeding is a dynamic, multidisciplinary, constantly-evolving science. Laboratory emphasizes hands-on experience in the basics of plant breeding and plant improvement. Not open for credit to students who have completed Plant Biology 154. (Former course Plant Biology 154.) GE credit: SciEng | SE. —II. (II) St. Clair

157. Physiology of Environmental Stresses in Plants (4)
Lecture—2 hours; discussion—2 hours. Prerequisite: course 100C or Plant Biology 111 or 112 or Environmental Horticulture 102 or Viticulture and Enology 110. Stress,Steven L. Sheehy. Molecular, physiological, developmental and morphological characteristics enabling plants to avoid or tolerate environmental stresses; stress acclimation and adaptation processes; responses of wild and cultivated species to drought, flooding, nutrient deficiencies, salinity, toxic ions, extreme temperatures, etc. Not open for credit to students who have completed Plant Biology 157. (Former course Plant Biology 157.) GE credit: SciEng | SE.

158. Mineral Nutrition of Plants (4)
Lecture—3 hours; laboratory—3 hours. Prerequisite: course 100A or Plant Biology 111 or Environmental Horticulture 110 or Evolution and scope of plant nutrition; essential elements; mechanisms of absorption and membrane transporters; translocation and allocation processes; mineral metabolism and toxicities; genetic variation in plant nutrition; applications to management and understanding ecological effects of nutrient availability or deficiency. Not open for credit to students who have completed Plant Biology 158. (Former course Plant Biology 158.) GE credit: SciEng | SE. —III. Brown

160. Agroforestry: Global and Local Perspectives (3)
Lecture—3 hours; discussion—2 hours. Prerequisite: Plant Sciences 2 or Biological Sciences 1C or 2C; Plant Sciences 142 or 150 or Biological Sciences 28 or a general ecology course. Traditional and evolving uses of trees in agricultural ecosystems; their multiple roles in environmental stability and production of food, fuel, and fiber; and socioeconomic barriers to the adoption and implementation of agroforestry practices. Not open for credit to students who have previously taken AgriCulture and Rangeland Resources 160. (Former course AgriCulture and Rangeland Resources 160.) (Same course as International Agricultural Development 160.) Offered in alternate years. GE credit: SciEng | SE. —I. (I) Gradziel

162. Urban Ecology (3)

170A. Fruit and Nut Crop Systems (2)
Lecture—1 hour; laboratory—3 hours. Prerequisite: course 2, Biological Sciences 1C, or consent of instructor. Overview of production and handling systems of major horticultural and nut crops. Current cultural and harvesting problems and concerns associated with commercial fruit growing. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 170A. (Former course Agricultural Management and RangeLand Resources 170A.) Offered in alternate years. GE credit: SciEng | SE. —II. (II) Gradziel

170B. Fruit and Nut Crop Systems (2)
Lecture—1 hour; laboratory—3 hours. Prerequisite: course 2, Biological Sciences 1C, or consent of instructor. Overview of production and handling systems of major horticultural and nut crops. Current cultural and harvesting problems and concerns associated with commercial fruit growing. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 170B. (Former course Agricultural Management and Rangeland Resources 170B.) Offered in alternate years. GE credit: SciEng | SE. —II. (II) Cadondo

171. Principles and Practices of Plant Propagation (4)
Lecture—2 hours; discussion—1 hour; laboratory—3 hours. Prerequisite: course 2, Biological Sciences 1C or 2C. Principles and practices of propagating plants covering anatomical, physiological, and practical aspects. Not open for credit to students who have completed Plant Biology 171. (Former course Plant Biology 171.) GE credit: SciEng | SE. —III. (III) Burger

172. Postharvest Physiology and Technology (4)
Lecture—3 hours; laboratory/discussion—2 hours. Prerequisite: general plant science background (e.g., courses 2, 12); course 196 recommended. Overview of physiological processes related to maturation and senescence of plant products and their responses to postharvest stresses. Targeted approaches and technologies to maintain product quality and limit postharvest disorders. Not open for credit to students who have completed Plant Biology 172. (Former course Plant Biology 172.) GE credit: SciEng | SE. —I. (I) Salweit, Zakharov
173. Molecular and Cellular Aspects of Postharvest Biology (3)
Lecture/discussion—4 hours. Prerequisite: course 2, Biological Sciences 1C or 2C or equivalent. Basic concepts and current knowledge of issues relevant to postharvest biology. Mechanisms of fruit ripening, senescence and ultimate death. Metabolism and functions of phytohormones, carbohydrates, lipids, pigments, flavor compounds, and phytotoxicants at molecular and cellular levels. GE credit: SciEng | SE. 

174. Microbiology and Safety of Fresh Fruits and Vegetables (3)
Lecture—3 hours. Prerequisite: course 2 or Biological Sciences 1C or 2C or equivalent. Overview of microorganisms on fresh produce, pre- and postharvest factors influencing risk of microbial contamination, attachment of microorganisms to produce, multiplication during postharvest handling and storage, and detection. Mock outbreak trial and presentation of science-based forensic diagnosis. GE credit: SciEng | SE. 

176. Introduction to Weed Science (4)
Lecture—2 hours; laboratory/discussion—4 hours. Prerequisite: SE—I. Anderson. Lecture—2 course 2 or Biological Sciences 1C or 2C. Weed biology, ecology, management, environmental control, chemical and mechanical control, herbicides and herbicide resistance. Weed control in managed and natural ecosystems. Legal and regulatory applications. Herbicide safety. Identification of weeds and eradication planning. GE credit: SciEng | SE—III. Zakharchov. 

178. Biology and Management of Aquatic Plants (3)
Lecture—3 hours. Prerequisite: course 2, Biological Sciences 1C or 2C; Chemistry 8C or 118B; course 100C, Plant Biology 111, Environmental Horticulture 102, or Hydrologic Science 122 recommended. Lecture—brief survey of common and invasive fresh water plants and macroalgae, their reproductive modes, physiology, growth (photosynthesis, nutrient utilization), development (meroplanktonic interactions), ecology, modes and impacts of invasion, and management. Two Saturday field trips required. Offered in alternate years. Not open for credit to students who have completed course Plant Biology 178. (Former course Plant Biology 178.) GE credit: SciEng | SE. 

188. Undergraduate Research Proposal (3)
Lecture/discussion—3 hours. Prerequisite: upper division standing. Preparation and review of a scientific proposal. Problem definition, identification of objectives, literature survey, hypothesis generation, design of experiments, data analysis planning, proposal outline and preparation. Same course as Biological Technology 188. GE credit: SciEng, WRT | OL, SE, WE—III. Kliebenstein. 

189L. Laboratory Research in Plant Sciences (2-5)
Laboratory—3-12 hours; discussion—1 hour. Prerequisite: course 188 and consent of instructor. Formulating experimental approaches to current questions in Plant Sciences; presentation of proposed experiments. May be repeated up to 12 units for credit. [P/NP grading only.]—I, II, III, IV (I, II, III). 

190. Seminar on Alternatives in Agriculture (2)
Seminar—2 hours. Prerequisite: upper division standing. Seminar on topics related to alternative theories, practices and systems of agriculture and the relationship of agriculture to the environment and society. Scientific, technological, social, political and economic perspectives. May be repeated for credit. (Former course Agricultural Management and Rangeland Resources 190.) [P/NP grading only.] GE credit: SE—II. [I, II] Van Horn. 

190C. Research Group Conference (1)
Discussion—1 hour. Prerequisite: advanced standing; consent of instructor. Weekly conference on research projects, general class projects, and techniques in the plant sciences. May be repeated for credit. [P/NP grading only.]—I, II, III, IV (I, II, III). 

192. Internship—1-2 hours.
Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience on or off campus in subject areas pertaining to plant and environmental sciences. Internship supervised by a faculty member. [P/NP grading only; deferred grading only, pending completion of thesis.] GE credit: SE. 

196. Postharvest Technology of Horticultural Crops (3)
Lecture/discussion—45 hours; fieldwork—45 hours. Prerequisite: upper division or graduate student standing. Intensive study of postharvest considerations and current challenges in postharvest handling for fruits, nuts, vegetables, and ornamentals in California. Scheduled first two weeks immediately following last day of spring quarter. Not open for credit to students who have completed Plant Biology 196. (Former course Plant Biology 196.) [P/NP grading only.] GE credit: SE. 

197T. Tutoring in Plant Science (1-5)
Discussion—1 hour. Prerequisite: upper division standing, completion of a course or the equivalent, consent of instructor. Leading small voluntary discussion or lab groups affiliated with one of the department's regular courses. May be repeated for up to eight units of credit at cumulative maximum of 18 units. [S/U grading only.] 

198. Directed Group Study—1-5 hours.
Directed study (upper division) oriented toward the student's major area of interest. May be repeated for credit. Not open for credit to students who have completed Plant Biology 178. (Former course Plant Biology 178.) GE credit: SciEng, WRT | OL, SE, WE—III. (I, II) DiTomaso, Fischer. 

199. Special Study for Advanced Undergraduates—1-5 hours.
Prerequisite: consent of instructor. [P/NP grading only.]—I, II, III, IV. GE credit: SciEng | SE. 

Graduate

202. Experimental Design and Analysis (5)
Lecture—3 hours; discussion/laboratory—2 hours. Prerequisite: course 120 or equivalent. Introduction to the research process and statistical methods to plan, conduct and interpret experiments. Not open for credit to students who have completed Agricultural and Environmental Sciences 205. (Former course Agronomy 205.)—II. (I) Dubcovsky. 

206. Applied Multivariate Modeling in Agricultural and Environmental Sciences (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: one of course 120, Statistics 106, 108, course 205 or equivalent. Multivariate linear and nonlinear models. Model selection and parameter estimation. Analysis of manipulative and observational agroecological experiments. Discriminant, principal component, and path analyses. Logistic and biased regression. Bootstrapping. Exercises based on actual research by UCD graduate students. Not open for credit to students who have completed Agricultural and Environmental Sciences 206. (Former course Agronomy 206.)—I. (I) Laca. 

211. Principles and Practices of HPLC (2)
Lecture—1 hour; laboratory—3 hours. Prerequisite: undergraduate physics and chemistry; Biological Sciences 102, 103 recommended. Principles and theory of HPLC involving various modes of separation and detection. Optimization of separation using isocratic and gradient elution. Develop practical knowledge about the use, maintenance and troubleshooting of HPLC equipment, including HPLC columns. Development of new HPLC methods. Not open for credit to students who have completed Agricultural and Environmental Sciences 211. (Former course Agronomy 211.) 

212. Postharvest Biology and Biotechnology of Fruits and Nuts (3)
Lecture—3 hours. Prerequisite: course 172. Review of postharvest biology of fruits and nuts and biotechnological approaches to address postharvest challenges. Morphology, biology and postharvest handling of fruits and nuts are presented along with current research, including biotechnology, and discussion of future research needs and approaches. Offered in alternate years. Not open for credit to students who have completed Pomology 212. (Former course Vice Crops 212.) Offered in alternate years. (III) Salvesen. 

220. Genomics and Biotechnology of Plant Improvement (3)
Lecture—3 hours. Prerequisite: Biological Sciences 101 or the equivalent. Integration of modern biotechnology and classical plant breeding including the impact of structural, comparative and functional genomics on gene discovery, characterization and exploitation. Also covers molecular markers, plant transformation, hybrid production, disease resistance, and novel outcomes. Not open for credit to students who have completed Vegetable Crops 220. (Former course Vegetable Crops 220.) (Same course as Genetics 222.)—I. (I) Neale. 

221. Genomics and Breeding of Vegetable Crops (3)
Lecture—3 hours. Prerequisite: Biological Sciences 101 or equivalent. Preview of genome structure, mapping, gene tagging and development of other genetic resources applied to improvement of major vegetables. For graduate students contemplating a career in modern vegetable breeding and biotechnology. Not open for credit to students who have completed Vegetable Crops 221. (Former course Vegetable Crops 221.) 

222. Advanced Plant Breeding (4)
Lecture—3 hours; laboratory—3 hours. Prerequisite: courses 154 and 205; Genetics 201 or Animal Genetics 107 recommended. Philosophy, methods, and problems in developing improved plant species. Topics include: inbreeding, heterosis, progeny testing, breeding methodology, index selection, germplasm conservation, and indices to measure stress resistance. Laboratories include tours of breeding facilities and calculation and interpretation of quantitative data. Offered in alternate years. (III) Feuerbacher. 

290. Seminar—1-2 hours.
Topics of current interest related to Plant Sciences. (S/U grading only.)—I, II, III. 

290C. Research Conference (1)
Discussion or laboratory—1 hour. Prerequisite: consent of instructor. (S/U grading only.)—I, II, III, IV (I, II, III). 

297T. Tutoring in Plant Science (1-5)
Tutoring—1-5 hours. Prerequisite: graduate standing; consent of instructor; completion of course to be tutored or the equivalent. Designed for graduate students who desire teaching experience but are not teaching assistants. May be repeated for credit for a total of five units. Same course may not be tutored more than once. (S/U grading only.) 

299 Group Study—1-5 hours.
Prerequisite: consent of instructor. (S/U grading only.)—I, II, III, IV (I, II, III, IV)
Political Science

The Department of Political Science offers two major programs: political science and international affairs.

Fields of Concentration

American Politics (4)
American National Government (4)
Comparative Politics (2)
International Relations (7)
International Relations 3 as a prerequisite: Political Science 120, 124, 126, 129, 130-132, 134-137, 139, 190, 196C, International Relations 131
Political Theory (4)
Political Theory as a prerequisite: Political Science 110, 112-117, 118A, 118C, 119, 187, 192D

Total Units for the Major: 72-73

Political Science—Public Service

A.B. Major Requirements:

Preparatory Subject Matter: 20

Political Science 1
Two courses from: Political Science 2, 3, 4, 5 or 7
Statistics 13 (or equivalent)
Political Science 51

Core program: 12

A.CGH—American Cultures; DD—Domestic Diversity; OL—Oral Skills; QL—Quantitative; SL—Scientific; VL—Visual; WC—World Cultures; WE—Writing Experience

Three courses chosen from Political Science 100, 102, 104, 105, 106, 108, 109, 113, 114, 116; Internship, Political Science 192A, 192B, or 192W
Research paper, Political Science 193

Fields of concentration

Select six upper division courses from two or three fields of concentration listed below with at least two courses in each field selected; at least 16 of the units must be in political science; Core Program courses may not be counted toward this requirement.

Total Units for the Major: 64-66

Major Advisers. Consult Department office.

Minor Program Requirements:

Students electing a minor in Political Science may choose one of two plans.

UNITS

Political Science: 24

Six upper division courses: Three courses in one of the fields of concentration and three courses outside of that field.

Public Affairs Internship Program: This program is open to upper division students in any major who want to obtain an internship in the area of government and public service. Information and application forms are available from the Political Science Department in 1273 Social Sciences and Humanities Building.

Graduate Study: The Department of Political Science offers a program of graduate study and research leading to a Ph.D. degree or an M.A./J.D. joint degree. The M.A./J.D. joint degree is only available in conjunction with UC Davis School of Law. Information concerning admission to these programs and requirements for completion are available in the Graduate Program Coordinator office.

Graduate Adviser. Consult Graduate Program Coordinator office.

American History and Institutions. This University requirement may be satisfied by passing any one of the following Political Science courses: 1, 5, 100, 102, 104, 105, 106, 108, 109, 113, 130, 131, 160, 163; see also under University requirements.

Courses in Political Science (POL) Lower Division

1. American National Government (4)
Lecture—3 hours; discussion—1 hour. Survey of American national government, including the constitutional system, political culture, parties, elections, the presidency, Congress, and the courts. GE credit: SocSci, Wrt | ACGH, SS, WE

Pre-Fall 2011 General Education (GE): ArtHum—Arts and Humanities; SciEng—Science and Engineering; SocSci—Social Sciences; ACGH—American Cultures; DD—Domestic Diversity; OL—Oral Skills; QL—Quantitative; SL—Scientific; VL—Visual; WC—World Cultures; WE—Writing Experience
2. Introduction to Comparative Politics (4)  
Lecture—3 hours; discussion—1 hour. Introduction to basic concepts in political analysis and application of them in comparative studies of selected countries. Coverage is given to cultural and other informal dimensions of politics as well as to more formal political analytic approaches and theoretical structures. GE credit: SocSci, Wrt | SS, WC, WE.

3. International Relations (4)  
Lecture—3 hours; discussion—1 hour. International conflict and cooperation, including the Cold War, nuclear weapons, and new techniques for understanding international politics. GE credit: SocSci, Wrt | SS, WC, WE.

4. Basic Concepts in Political Theory (4)  
Lecture—3 hours; discussion—1 hour. Analysis of such concepts as the individual, community, liberty, equality, justice, and natural law as developed in the works of the major political philosophers. GE credit: ArtHum or SocSci, Wrt | AH or SS, WE.

5. Contemporary Problems of the American Political System (4)  
Lecture—3 hours; discussion—1 hour. In-depth treatment of selected problems and issues of American politics, governmental institutions, and policies. GE credit: SocSci, Wrt | ACGH, SS, WE.

6. Contemporary Issues in Law and Politics (4)  
Seminar—4 hours. A seminar which focuses on the political dimensions of American law and institutions. Examines the role of courts in resolving contemporary issues of law and politics, including abortion, capital punishment, and civil rights. Limited enrollment. Open to students having no more than 40.1 units. GE credit: SocSci, Wrt | ACGH, SS, WE.

51. Scientific Study of Politics (4)  
Lecture—3 hours; discussion—1 hour. Introduction to the basic principles of the scientific study of politics. Research design and empirical analysis of data with applications to different methodological approaches and different substantive areas in political science. GE credit: ArtHum or SocSci | AH or SS, QL, SE, WC.

90X. Lower Division Seminar (4)  
Seminar—4 hours. Prerequisite: lower division standing and consent of instructor. Examines fundamental issues and concepts that shape the study and practice of politics. Students will read, discuss and write about some of the most significant texts in political science in order to develop a foundation for the study of politics. Limited enrollment.

99. Special Study for Undergraduates (1-5)  
Prerequisite: consent of instructor. (P/N grading only)

Upper Division

100. Local Government and Politics (4)  
Lecture—3 hours; paper or discussion—1 hour. Prerequisite: course 1 and upper division standing or consent of instructor. Politics and government of local communities in the United States, including cities, counties and special districts. Emphasizes sources and varieties of community conflict, legislative and executive patterns, expertise, decision making and the politics of structure. Observation of local governing bodies. GE credit: SocSci, Wrt | ACGH, SS, WE.

102. Urban Public Policy (4)  
Lecture—3 hours; paper or discussion—1 hour. Prerequisite: course 1, upper division standing in Political Science or consent of instructor. Political and economic relationships among central cities, suburbs, and regional, state, and federal governments. Focuses upon policy areas such as poverty, transportation, housing, and upon who governs and who benefits from the policies in these areas. GE credit: SocSci, Wrt | ACGH, DD, QL, SS, WE.

104. California State Government and Politics (4)  
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 and upper division standing or consent of instructor. The California political system. Political culture, constitution, elections and parties, direct democracy, legislation, executive branch, courts, finances, state-local relations and policy issues. Offered irregularly. GE credit: SocSci, Wrt | ACGH, SS, WE.

105. The Legislative Process (4)  
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1. The legislative process with an emphasis on the United States Congress; legislative organization and procedures, legislative leadership and policy making, legislators and constituents, relations between Congress and other agencies. GE credit: SocSci, Wrt | ACGH, SS, WE.

106. The Presidency (4)  
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1. The American presidencies origins and development; presidential power and influence as manifest in relationships with Congress, courts, parties, and the public in the formulation and administration of foreign and domestic policy; nominations, campaigns, and elections. GE credit: SocSci, Wrt | ACGH, SS, WE.

107. Environmental Politics and Administration (4)  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or consent of instructor. Introduction to the environment as a political issue in the United States and to the development of administrative mechanisms for handling environmental problems. Changing role of Congress, the bureaucracy, and the courts in environmental policy formulation and implementation. GE credit: SocSci, Wrt | ACGH, SS.

108. Policy Making in the Public Sector (4)  
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 and upper division standing or consent of instructor. Theoretical rationale for government activity, program evaluation, PPBS, positive theories of policy making, the quantitative study of policy determinants, implementation, and proposals for improved decision making. Offered irregularly. GE credit: SocSci, Wrt | ACGH, QL, SS, WE.

109. Public Policy and the Governmental Process (4)  
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1. The processes of formulating public policy, including individual and collective decision making, and policy change. GE credit: SocSci, Wrt | ACGH, SS, WE.

110. The State and the Masses (4)  
Lecture—3 hours; term paper or discussion—1 hour. Introduction to game theory. Explanation of the behavior of individuals in strategic interaction. Rational and behavioral approaches. Applications to political science and other fields. GE credit: SocSci, Wrt | QL, SS, WE.

112. Contemporary Democratic Theory (4)  
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 4. Major contemporary attempts to reformulate traditional democratic theory, attempts to replace traditional theory by conceptual models derived from modern social science findings. Offered in alternate years. GE credit: ArtHum or SocSci, Wrt | AH or SS, WE.

113. American Political Thought (4)  
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 4. Origins and nature of American political thought. Principles of American thought as they emerge from the American tradition. GE credit: ArtHum or SocSci, Wrt | ACGH, AH or SS, WE.

114. Quantitative Analysis of Political Data (4)  
Lecture—3 hours; term paper or discussion—1 hour. Logic and methods of analyzing quantitative data. Topics covered include central tendency, probability, correlation, and non-parametric statistics. Particular emphasis will be upon the use of statistics in political science research. Offered in alternate years. GE credit: ArtHum or SocSci, Wrt | AH or SS or SE, QL, VL, WE.

115. Medieval Political Thought (4)  
Lecture—3 hours; term paper. Prerequisite: course 118A. Examination of the medieval political thinking. Emphasis will be upon the thoughts of the major political thinkers of the period, rather than upon political history. GE credit: ArtHum or SocSci, Wrt | AH or SS, WE.

116. Foundations of Political Thought (4)  
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 4. Analysis and evaluation of the seminal works of a major political philosopher or of a major problem in political philosophy. May be repeated one time for credit when topic differs. Offered in alternate years. GE credit: ArtHum or SocSci, Wrt | AH or SS, WE.

117. Topics in the History of Political Thought (4)  
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 4. The political thought of a specific historical period. Topics may include: Ancient Athens, the Italian Renaissance, the Enlightenment, or Nineteenth Century Germany. May be repeated one time for credit. GE credit: SocSci, Wrt | SS, WE.

118A. History of Political Theory: Ancient (4)  
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 4. Critical analyses of classical and medieval political philosophers such as Plato, Aristotle, Cicero and St. Thomas. GE credit: ArtHum or SocSci, Wrt | AH or SS, WE.

118B. History of Political Theory: Early Modern (4)  
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 4. Critical analyses of the works of late modern political philosophers such as Rousseau, Kant, Hegel, Tocqueville, Mill, Marx and Nietzsche. GE credit: ArtHum or SocSci, Wrt | AH or SS, WE.

119. Contemporary Political Thought (4)  
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 4. Contemporary political thought from the end of the nineteenth century to the present. Emphasis upon an individual philosopher, concept, or philosophical movement; e.g., Nietzsche, Continental political thought, Rawls and critics, theories of distributive justice, feminist theory. Offered irregularly. GE credit: ArtHum or SocSci, Wrt | AH or SS, WE.

120. Theories of International Politics (4)  
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 3. Contemporary approaches to the study of international politics, including balance of power, game theory, Marxist-Leninist theory, systems theory, and decision-making analysis. GE credit: SocSci, Wrt | SS, WE.

121. Scientific Study of War (4)  
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 3. Upper division standing or consent of instructor. Major contemporary approaches to the study of international politics, including balance of power, game theory, Marxist-Leninist theory, systems theory, and decision-making analysis. GE credit: SocSci, Wrt | QL, SS, WE.
122. International Law (4)
Lecture—3 hours; term paper or discussion—1 hour.
Prerequisite: course 2. Selected topics in interna-
tional law, territory, sovereignty, immunity, responsi-
bility, the peaceful settlement or nonsettlement of
international disputes. GE credit: SocSci, Wrt | SS,
WE.
123. The Politics of Interdependence (4)
Lecture—3 hours; term paper or discussion—1 hour.
Prerequisite: course 3, upper division standing or
consent of instructor. In the past several decades,
growing economic interdependence has generated
new political relations. Course deals with difficulties in managing complex interde-
pendence and its implication on national policies
and politics. GE credit: SocSci, Wrt | SS, W
124. The Politics of Global Inequality (4)
Lecture—3 hours; term paper or discussion—1 hour.
Prerequisite: course 3, upper division standing;
course 123 recommended. Analysis of current econ-
omic and political international relations resulting
from a long standing division of the global system
into rich and poor regions. GE credit: SocSci, Div,
Wrt | SS, WE.
126. Ethnic Self-Determination and
International Salience (4)
Lecture—3 hours; term paper or discussion—1 hour.
Prerequisite: course 3. Compares the claims of the
state and ethnic peoples in countries undergoing
internal conflicts; e.g., South Africa, Northern Ire-
land. Analyzes the international community in
fostering the peaceful resolution of conflicts.
GE credit: SocSci, Div, Wrt | SS, WC, WE.
129. Special Studies in International Politics
(4)
Lecture—3 hours; term paper. Prerequisite: course 3,
upper division standing. Intensive examination of
one or more special problems in international poli-
tics. May be repeated one time for credit when dif-
dent topic is studied. GE credit: SocSci, Wrt | SS,
WE.—II.
130. Recent U.S. Foreign Policy (4)
Lecture—3 hours; term paper or discussion—1 hour.
Prerequisite: course 3, upper division standing or
consent of instructor. Broad survey of the develop-
ment of U.S. foreign policy in twentieth century with
emphasis on transformation of policy during and
after World War II, and the introduction to analytic
tools and concepts useful for understanding of cur-
rent foreign policy issues. GE credit: SocSci,
Wrt | AGCH, SS, WE.
131. Analysis of U.S. Foreign Policy (4)
Lecture—3 hours; term paper. Prerequisite: course 3,
upper division standing or consent of instructor. Detailed presentation and examination of the formu-
lation of execution of U.S. foreign policy. Survey of
numerous factors influencing policy outcomes and
how such determinants vary according to policy
issue areas. GE credit: SocSci, Wrt | SS, WE.
132. National Security Policy (4)
Lecture—3 hours; term paper or discussion—1 hour.
Prerequisite: course 3, upper division standing.
Development of national security policies since
1945. Analysis of deterrence and assumptions upon
which it is based. Effects of nuclear weapons upon
conduct of war, alliance systems, and the interna-

tional politics of the Middle East as a microcosm of world politics. The Middle East as a regional system. Domestic and International Politics in the Middle East. Changing Political Structures in the Middle East. Superpower involvement in the Middle East. GE credit: SocSci, Wrt | SS, WE.
136. The Arab-Israeli Conflict (4)
Lecture—3 hours; term paper or discussion—1 hour.
Prerequisite: course 3 or International Relations 1.
Restricted to upper division standing. Causes, course,
137. International Relations in Western
Europe (4)
Lecture—3 hours; term paper or discussion—1 hour.
Prerequisite: course 3, upper division standing.
Analysis of European unity, problems of the Atlantic
alliance, Atlantic political economy, East-West rela-
tions, communism in Western Europe and the rela-
tionship between domestic politics and foreign
politics. GE credit: SocSci, Wrt | SS, WC, WE.
140A. Comparative Political Institutions:
Electoral Systems (4)
Lecture—3 hours; term paper or discussion—1 hour.
Prerequisite: course 2. Workings of electoral institu-
tions, focusing on systems used to elect presidents
and assemblies, pass laws, and generally make
decisions. Examples from throughout the world,
including cases from both the advanced industrial
and developing worlds. Offered in alter-
ate years. GE credit: SocSci, Div, Wrt | QL, SS,
WE.
140B. Comparative Political Institutions:
Parties (4)
Lecture—3 hours; term paper or discussion—1 hour.
Prerequisite: course 2 or consent of instructor.
Restricted to upper division standing. The factors
shaping political parties and their role in democratic
representation. Offered in alternate years. GE credit:
SocSci, Div, Wrt | SS, WE.
140C. Comparative Political Institutions:
Legislatures (4)
Lecture—3 hours; term paper or discussion—1 hour.
Prerequisite: course 2 or consent of instructor; upper
division standing. Examination of legislatures from a
comparative perspective. Offered in alternate years.
GE credit: SocSci, Div, Wrt | SS, WE.
140D. When Institutions Fail (4)
Lecture—3 hours; term paper or discussion—1 hour.
Prerequisite: course 2. Pass One open to upper divi-
sion Political Science & International Relations
majors. Examination of factors contributing to the
success and failure of political institutions. Offered in
alternate years. GE credit: QL, SS, WE,—I, III.
140E. Policy-Making Processes (4)
Lecture—3 hours; term paper or discussion—1 hour.
Prerequisite: course 2 or consent of instructor; upper
division standing. Examination of policy-making in the
U.S. and other countries. Offered irregularly. GE
credit: QL, SS, WE.—I, III.
142A. Comparative Development: Political
Development in Modernizing Societies (4)
Lecture—3 hours; term paper or discussion—1 hour.
Prerequisite: course 2 or consent of instructor; upper
division standing. Nature and sequence of political
development; its economic and social concomitants;
role of elites, military, bureaucracy, and party sys-
tems; social stratification and group politics; social mobilization and politics; instability, violence, and the politics of integration. Offered in
alternate years. GE credit: SocSci, Wrt | SS, WC,
WE.
142B. Comparative Development: Politics
and Inequality (4)
Lecture—3 hours; term paper or discussion—1 hour.
Prerequisite: course 2 or consent of instructor; upper
division standing. Linkages between politics and the
distribution of income, wealth, and power. Impacts of
civil rights legislation, the politics of welfare states,
and the effects of political participation on the distri-
bution of goods. Offered in alternate years. GE
credit: SocSci, Wrt | SS, WC, WE.
142C. Comparative Political Development:
Democracy and Democratization (4)
Lecture—3 hours; term paper or discussion—1 hour.
Prerequisite: course 2 or consent of instructor. Pass
One open to upper division Political Science & Inter-
national Relations majors. Examination of conditions
promoting democratization and democratic stability.
Offered irregularly. GE credit: SS, WE,—I, III.
143A. Latin American Politics (4)
Lecture—3 hours; term paper or discussion—1 hour.
Prerequisite: course 2. Issues related to democratic
consolidation in Latin America, with a regional focus
on South America. Topics include transitions to
democracy, the role of the military, political econ-
omics, and political behavior. GE credit: SocSci,
Div, Wrt | SS, WC, WE.
143B. Mexican Politics (4)
Lecture—3 hours; term paper or discussion—1 hour.
Prerequisite: course 2. Introduction to the politics of
temporary Mexico. Focus on rise, fall, and after-
math of Mexico’s one-party dominant system. GE
credit: SocSci, Div, Wrt | SS, WC, WE.
144A. Politics of Post-Communist Countries:
East European Politics (4)
Lecture—3 hours; term paper or discussion—1 hour.
Prerequisite: course 2 or consent of instructor;
restricted to upper division standing. Democratiza-
tion, state-building and economic reform in East European states. GE credit: SocSci, Wrt | SS, WC, WE.
144B. Politics of Post-Communist Countries:
Russia (4)
Lecture—3 hours; term paper or discussion—1 hour.
Prerequisite: course 2 or consent of instructor;
restricted to upper division standing. Democratiza-
tion, state-building and economic reform in East European states. GE credit: SocSci, Wrt | SS, WC, WE.
146A. Politics of Africa: Issues in
Contemporary African Politics (4)
Lecture—3 hours; term paper or discussion—1 hour.
Prerequisite: course 2 or consent of instructor; course
134 recommended; upper division standing. African
politics since the end of the Cold War. Topics include:
Strategic Security Approach, Democratization,
Human Rights, HIV/AIDS, African Peacekeep-
ing, Terrorism, Religious and Ethnic Conflict, Debt
and Stalled Development. Offered in alternate years.
GE credit: SocSci, Div, Wrt | SS, WC, WE.
146B. Politics of Africa: Development
in Africa (4)
Lecture—3 hours; term paper or discussion—1 hour.
Prerequisite: course 2 or consent of instructor; course
134 recommended; upper division standing. Politi-
cal and economic development within Sub-Saharan
Africa. States and institutions, democracy, party sys-
tems, military coups/rule, bureaucracy/corruption,
race/ethnicity, national/regional integrations, trade
unions, economic development strategies, class for-
mation, and women’s roles and ideology. Offered in
alternate years. GE credit: SocSci, Div, Wrt | SS,
WC, WE.
147A. West European Politics (4)
Lecture—3 hours; term paper or discussion—1 hour.
Prerequisite: course 2 or consent of instructor; upper
division standing. The evolution, politics, and con-
temporary problems of Western countries. System
of Western Europe. Offered in alternate years. GE
credit: SocSci, Wrt | SS, WC, WE.
147B. West European Politics: British
Politics (4)
Lecture—3 hours; term paper or discussion—1 hour.
Prerequisite: course 2 or consent of instructor; upper
division standing. The evolution, politics, and con-
temporary problems of Britain’s political system. GE
credit: SocSci, Wrt | SS, WC, WE.
147C. West European Politics: French
Politics (4)
Lecture—3 hours; term paper or discussion—1 hour.
Prerequisite: course 2 or consent of instructor; upper
division standing. The evolution, politics and contem-

Quarter Offered: I-Fall, II-Winter, III-Spring, IV-Summer; 2015-2016 offering in parentheses.

Pre-Fall 2011 General Education (GE): ArtHum—Arts and Humanities; SciEng—Science and Engineering; SocSci—Social Sciences; ACGH—American Cultures; DD—Domestic Diversity; Wrt—Writing Experience

Fall 2011 and on Revised General Education (GE): AH—Arts and Humanities; SE—Science and Engineering; SS—Social Sciences; ACGH—American Cultures; DD—Domestic Diversity; OL—Oral Skills; QL—Quantitative; SL—Scientific; VL—Visual; WC—World Cultures; WE—Writing Experience

Political Science
porary problems of France’s political system. Offered in alternate years. GE credit: SocSci, Wrt | SS, WC, WE.

147D. West European Politics: German Politics (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 2 or consent of instructor; upper division standing. Analysis of the behavior of judges and courts in the political process. Techniques of judicial decision making. Relationships among courts and other decision making bodies. Offered irregularly. GE credit: SocSci, Wrt | SS, WE.

155. Judicial Process and Behavior (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1, upper division standing. Analysis of the nature of judges and courts in the political process. Techniques of judicial decision making. Relationships among courts and other decision making bodies. Offered in alternate years. GE credit: SocSci, Wrt | ACGH, SS, WE.

160. American Political Parties (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1, upper division standing or consent of instructor. Analysis of the structured operations of the party system in the United States; party functions and organizations, nomination processes, campaigns and elections, party trends and reforms. GE credit: SocSci, Wrt | ACGH, DD, QL, WE.

162. Election and Voting Behavior (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1, upper division standing or consent of instructor. Analysis of American elections and partisan behavior; political socialization, political participation, party and individual and group determinants of voting. Offered irregularly. GE credit: SocSci, Wrt | ACGH, DD, SS, WE.

163. Group Politics (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1, upper division standing or consent of instructor. Groups, institutions and individuals, especially in American politics. Historical and analytical treatment of group theories as applied to interest groups (expenditures, access, legislation, science, military); to racial, ethnic and sectional groups; to parties, public and legislative groups, bureaucracies. GE credit: SocSci, Wrt | ACGH, DD, SS, WE.

164. Public Opinion (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: upper division standing and course 1 or 5, or consent of instructor. Nature of public opinion in America as it is supposed to be and as it is; Distribution of opinions among different publics and the significance of that distribution for system stability and institutions. Opinion polling and its problems. GE credit: SocSci, Wrt | ACGH, DD, SS, WE.

165. Mass Media and Politics (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1. Organization of and decision making within the media; media audiences and the effect of the media upon political behavior; the relationship of the government to the media (censorship, secrecy, freedom of the press, government regulation); the media in election campaigns. GE credit: SocSci, Wrt | ACGH, DD, SS, WE.

166. Women in Politics (4)
Lecture—3 hours; discussion—1 hour or seminar—1 hour. Prerequisite: course 1. The role of women in American politics. Historical experiences; contemporary organizations and attitudes; areas of legislative concern; the impact of differences in social class, race, and ethnicity upon the involvement of women in politics. GE credit: SocSci, Wrt | ACGH, DD, SS, WE.

168. Chicano Politics (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1. Political aspects of Chicano life in America; examines the Chicano political role as it has been historically played by different groups in society and the Chicanos responses to his/her political environment. GE credit: SocSci, Wrt | ACGH, DD, SS, WE.

170. Political Psychology (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 51 or consent of instructor; upper division standing. Emphasizes the importance of the scientific literature on political psychology. Introduction to how psychological concepts (personality, attitudes, stereotypes, heuristics, affect, identity, group dynamics) help us understand how we think about politics. GE credit: SocSci, Wrt | SS, WE.

171. The Politics of Energy (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1, upper division standing. Nature and performance of political processes for making energy choices at the international, national and state levels. Interaction of energy policy with other political goals and the ability of governmental institutions to overcome constraints on policy innovation. GE credit: SocSci, Wrt | SS, WE.

172. American Political Development (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1, some background in American politics and institutions. Systematic analysis of contemporary issues in American political development: historical determinants of political change; the timing and character of institutional development; conditions for successful political action. Democratization, cultural change, party formation, state-building, constitutionalism, race relations. GE credit: SocSci, Wrt | ACGH, DD, SS, WE.

146C. Government and Politics in East Asia: Southeast Asia (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 2 or consent of instructor; upper division standing. Evolution of political institutions and political culture in China with emphasis on the post-1949 period. Primary attention to nationalism, modernization and political efficacy. Offered in alternate years. GE credit: SocSci, Wrt | SS, WC, WE.

150. Judicial Politics and Constitutional Interpretation (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 and upper division standing or consent of instructor. Politics of judicial policy making, issues surrounding constitutional interpretation and decision making, prerequisite for courses on the politics of constitutional law. GE credit: SocSci, Wrt | ACGH, DD, SS, WE.

151. The Constitutional Politics of the First Amendment and the Right to Privacy (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: courses 1 and 150 with upper division standing or consent of instructor. The constitutional politics surrounding such issues as the right to free expression, associational rights, the right to free exercise of religion, and the right to privacy. GE credit: SocSci, Wrt | ACGH, DD, SS, WE.

152. The Constitutional Politics of Equality (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: courses 1 and 150 with upper division standing or consent of instructor. Constitutional politics of equality in the American political system; issues surrounding constitutional doctrine and judicial politics; special attention on racial and sexual equality. Offered in alternate years. GE credit: SocSci, Wrt | ACGH, DD, SS, WE.

153. The Constitutional Politics of the Justice System (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 150 with upper division standing or consent of instructor. Constitutional politics of the American criminal justice system. Issues surrounding criminal law and judicial policy making on issues such as search and seizure, arrest, trial, incarceration and other issues of due process. Offered in alternate years. GE credit: SocSci, Wrt | ACGH, DD, SS, WE.

154. Legal Philosophy (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 or 4, upper division standing or consent of instructor. Analysis of the behavior of judges and courts in the political process. Techniques of judicial decision making. Relationships among courts and other decision making bodies. Offered irregularly. GE credit: SocSci, Wrt | SS, WE.

175. Social Policy (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1, upper division standing. The role of women in American politics. Historical experiences; contemporary organizations and attitudes; areas of legislative concern; the impact of differences in social class, race, and ethnicity upon the involvement of women in politics. GE credit: SocSci, Wrt | ACGH, DD, SS, WE.

180. Bureaucracy in Modern Society (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 or 2, upper division standing in Political Science or consent of instructor. Role of bureaucracy in a complex society; the relationship of science to technological development, science and developed countries, and non-democratic, democratic, and democratizing countries. May be repeated once for credit. GE credit: SocSci, Wrt | SS, WE.

183. Administrative Behavior (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 and upper division standing or consent of instructor. The implications for Ameri-
can public administration of evolving concepts about behavior in organizations. Offered irregularly. GE credit: SocSci | GH, SS, WE.

187. Administrative Theory (4) Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 and upper division standing or consent of instructor. Historical and critical analysis of the principal theories of organization and management of public agencies in light of such concepts as decision making, bureaucracy, authority and power, communication and control; examination of role of government bureaucracies in the total society. GE credit: SocSci, Writ | SS, WE.

190. International Relations (4) Lecture—3 hours; term paper or discussion—1 hour. Open to majors in International Relations, or consent of instructor. Analysis and evaluation of substantive issues in contemporary international relations. Readings drawn from current academic and non-academic periodicals. GE credit: SocSci, Writ | SS, WE.

192A. Internship in Public Affairs (5) Prerequisite: enrollment dependent on availability of intern positions with highest priority assigned to students with Political Science—Public Service major; upper division standing. Supervised internship and study in public, governmental, or related organizations. (P/NP grading only.) GE credit: ACGH, SS, WE.

192B. Internship in Public Affairs (5) Prerequisite: concurrent 192A; enrollment dependent on availability of intern positions with highest priority assigned to students with Political Science—Public Service major; upper division standing. Supervised internship and study in public, governmental, or related organizations. (P/NP grading only.) GE credit: ACGH, SS, WE.

193. Research in Practical Politics (2) Research project—6 hours. Prerequisite: courses 192A, 192B; open only to Political Science—Public Service majors; upper division standing. Supervised preparation of an extensive paper relating internship experience to concepts, literature, and theory of political science. GE credit: SocSci | SS, WE.

193W. Washington Center Research Seminar (4) Lecture/discussion—1 hour; independent study—3 hours; tutorial—0.5 hour. Prerequisite: course 192W concurrently. Core academic component of Wash. Program in Washington, DC. can be coordinated with internships. Research draws on resources uniquely available in Washington, DC. Supervised preparation of extensive paper. Open to majors in Wash. Center. GE credit: SocSci, Writ | OL, SS, WE.

194HA-194HB. Special Study for Honors Students (4-4) Seminar—2 hours; independent study—2 hours. Prerequisite: major in Political Science with upper division standing and a GPA of 3.500 in the major. Directed reading, research and writing culminating in preparation of a senior honors thesis under the direction of faculty adviser. (Deferred grading only, pending completion of sequence.) GE credit: SocSci | OL, SS, VL, WE.

195. Special Studies in American Politics (4) Seminar—4 hours. Prerequisite: consent of instructor and upper division standing. Intensive examination of one or more of the problems appropriate to American politics. May be repeated one time for credit when topic differs. GE credit; SocSci | SS, WE.

196A. Seminar in American Politics (4) Seminar—3 hours; term paper. Prerequisite: upper division political science major or consent of instructor. Intensive reading, discussion, research, writing in comparative politics. Topics may include one country or geographical area, political institutions or behavior across countries, political development, or other topics that are more specialized than normal course offerings. May be repeated one time for credit when topic differs. GE credit: SocSci | SS, WE.

196C. Seminar in International Relations (4) Seminar—3 hours; term paper. Prerequisite: upper division political science major or consent of instructor. Intensive reading, discussion, research, writing in international relations including study of international political institutions (UN, E.U., NATO) or interstate relations (war, trade, immigration) and other topics with more specialized content than normal course offerings. May be repeated one time for credit when topic differs. GE credit: SocSci | SS, WE.

196D. Seminar in Political Theory (4) Seminar—3 hours; term paper. Prerequisite: upper division political science major or consent of instructor. Intensive reading, discussion, research, writing in political theory. Topics may include study of a single political thinker, or development of political concepts, or other topics with more specialized content than normal course offerings. May be repeated one time for credit when topic differs. GE credit: SocSci | SS, WE.

196E. Seminar in Research Methods (4) Seminar—3 hours; term paper. Prerequisite: upper division political science major or consent of instructor. Intensive reading, discussion, research, and writing in selected methods such as research design, statistics, game theory. May be repeated one time for credit when topic differs. GE credit: SocSci | OL, SS, VL, WE.

198. Directed Group Study (1-5) Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5) (P/NP grading only.)

Graduate

201. Urban Government and Politics (4) Seminar—4 hours. Survey and analysis of the literature in the field of local government and politics in the United States. Study of political reform, local autonomy, community power, representation, expertise, service delivery, policymaking and political change. Offered in alternate years.

202. American State Government and Politics (4) Seminar—4 hours. Survey and analysis of the literature in the field of state government, politics, and policy. Approaches to the study of the American states as political systems, including their governing institutions and processes and their role in the Federal system. Offered in alternate years.

203A. American Government: The Presidency (4) Seminar—3 hours; term paper. Restricted to graduate students only. Thorough review of the current research on political executives, with particular emphasis on the American presidency. Two principal goals: the development of important and innovative student research programs; and adequate preparation for qualifying examinations.

203B. American Government: Congress (4) Seminar—3 hours; term paper. Restricted to graduate students only. Thorough review of the current research on Congress, with particular emphasis on political representation. Two principal goals: the development of important and innovative student research programs; and adequate preparation for qualifying examinations.

203C. American Government: Courts (4) Seminar—4 hours. Survey and analysis of the literature in the field of American government with a focus on Congress. Emphasis on the development and testing of theories of behavior and processes.

207. Environmental Public Policy (4) Seminar—4 hours. Analysis of the interface between the world of academic reflection about ecological and environmental problems and the world of political action. Evaluation of alternative approaches to policy analysis and recommendation. Individual research, including field research, will parallel discussion of the literature.

208. Policy Analysis (4) Seminar—4 hours. Social science techniques applied to public policy formation and evaluation.

209. The American Political System (4) Seminar—3 hours; term paper. Restricted to graduate students only. Analysis of selected theoretical and empirical issues posed by contemporary research in American government and politics.

210. Research Design in Political Science (4) Seminar—3 hours; discussion/laboratory—1 hour. Prerequisite: graduate standing. Introduction to philosophical and research design for political science. Topics include logic of empirical research, overview of research design approaches for political science.

211. Research Methods in Political Science (4) Seminar—3 hours; term paper. Prerequisite: graduate standing. Pass One open to graduate majors; Pass 2 open to graduate students. Introductory seminar introducing data analysis methods critical to basic empirical investigations in political science.

212. Quantitative Analysis in Political Science (4) Seminar—3 hours; term paper. Prerequisite: course 211. Pass One open to graduate majors; Pass 2 open to graduate students. Introductory statistics course with an emphasis on applications in political science. Topics include descriptive statistics for samples, probability and probability distributions, hypothesis testing, ANOVA, bivariate regression, and introduction to multiple regression.

213. Quantitative Analysis in Political Science II (4) Seminar—3 hours; term paper. Prerequisite: courses 211, 212. Pass One open to graduate majors; Pass 2 open to graduate students. More advanced topics in the use of statistical methods with an emphasis on political applications. Topics include: properties of least squares estimates, problems in multiple regression, and advanced topics (probit analysis, simultaneous models, time-series analysis, etc.).

214A. Research in Political Science (4) Discussion—2 hours; lecture—1 hour; term paper. Prerequisite: course 213. Research seminar sequence required of all Ph.D. students. Design, execution, and defense of an original piece of research in political science, culminating in a paper of publishable quality. (Deferred grading only, pending completion of sequence.)

214B. Research in Political Science (4) Discussion—2 hours; lecture—1 hour; term paper. Prerequisite: courses 212 and 214A; advanced level graduate students in the Department of Political Science only. Research seminar sequence required of all Ph.D. students. Design, execution, and defense of an original piece of research in political science, culminating in a paper of publishable quality. (Deferred grading only, pending completion of sequence.)

215. Introduction to Modeling Political Behavior (4) Seminar—3 hours; term paper. Prerequisite: courses 211, 212. Pass One open to graduate majors; Pass 2 open to graduate students. Introduction to modeling and empirical modeling of political behavior. Students will learn basic game theory and modeling skills. We
216. Qualitative Research Methods (4)
Seminar—3 hours; term paper. Methodology for uti-
lying theoretically-oriented case studies and con-
trolled comparison of a small number of cases to
develop and test theories. Examination of how the
case study method compliments experimental, statis-
tical and deductive modes of research. Offered in
alternate years.
217. Social Choice Theory and Spatial
dependent events: relationship between
Seminar—4 hours. Introduction to social choice the-
ory and formal spatial modeling including Arrow’s
Theorem, the paradox of voting, cycling and agenda
control. Focus on mastering modeling tech-
niques as well as interpretation of classic works.
Offered in alternate years.
218. Topics in Political Theory (4)
Seminar—3 hours; term paper. Topics vary and may be
the work of single to a series of political
Seminar—3 hours; term paper. Survey of the great
works in early modern to contemporary political the-
ory including such writers as Machiavelli, Hobbes,
Locke, Rousseau, Marx, Mill, Nietzsche, and Rawls.
Discussion of various interpretations of these authors.
Offered in alternate years.
219A. Political Theory Sequence (4)
Seminar—3 hours; term paper. Survey of the great
works in early modern to contemporary political the-
ory including such writers as Plato, Aristotle, Cicero, St.
Augustine, Aquinas, Alfarabi and Marsilius. Discus-
sion of various interpretations of these authors.
Offered in alternate years.
219B. Political Theory Sequence (4)
Seminar—3 hours; term paper. Survey of the great
works in early modern to contemporary political the-
ory including such writers as Machiavelli, Hobbes,
Locke, Rousseau, Marx, Mill, Nietzsche, and Rawls.
Discussion of various interpretations of these authors.
Offered in alternate years.
219C. Contemporary Political Theory (4)
Seminar—3 hours; term paper. Survey of important
works in contemporary political theory including
such writers as Nietzsche, Heidegger, Arendt,
Rawls, Nozick, Sandler. May be repeated for credit
if topic differs.
220. Seminar in Political Theory (4)
Seminar—3 hours; term paper. Prerequisite: gradu-
ate standing. Introduction to political theory and cur-
rent debates over its study. Readings from and
interpretations of political theory including the
Federalist Papers and major works by thinkers
such as Machiavelli, Hobbes, Locke, Rousseau, and
Rawls. Other readings addressing issues of textual
interpretation.
223. International Relations (4)
Seminar—3 hours; term paper.
225. The International System (4)
Seminar—3 hours; term paper. Analysis of the inter-
national system by means of theory formulation and
integration; critique of research designs; use of vari-
ous techniques of data generation and analysis.
226. Seminar in International Political
Economy (4)
Seminar—3 hours; term paper. Restricted to gradu-
ate students. Research in international political econ-
omy. Structure of the global economy, as well as
specific international economic relations,
including trade, capital flows, global produc-
tion structures, and migration. Offered in alternate
years.
229. Theories of International Relations (4)
Seminar—3 hours; term paper. Central concepts,
debates, and paradigms in international relations;
overview of research in international security and
international political economy; interstate and intra-
state war; arbitration and conflict resolution; trade
and finance; relationship between domestic and
international politics, norms and institutions. Open
to political science graduate students only unless con-
sent of instructor. Offered in alternate years.
230. American Foreign Policy (4)
Seminar—3 hours, term paper.
231. U.S. Political Culture and Foreign
Relations (4)
Seminar—3 hours; term paper. Relates U.S. political
culture to formulation of foreign policy: Analyzes
American ideological preferences in historical per-
spective, contemporary public opinion, decision
making and implementation. Concludes by examin-
ing linkages between Domestic and foreign policy
and political process. Offered in alternate years.
241. Communist Political Systems (4)
Seminar—4 hours. Prerequisite: course 141 or the
equivalent, or consent of instructor. Systematic analy-
sis of selected topics dealing with the political pro-
cess of communist political systems.
242. Seminar in Comparative Politics (4)
Seminar—3 hours; term paper. Prerequisite: gradu-
ate standing or consent of instructor. Systematic sur-
vey of theories and methods used in the study of
comparative politics.
243. Comparative Institutional Change (4)
Seminar—3 hours; term paper. Restricted to gradu-
ate students. Comparison of institutional changes in
countries of the former Soviet Union and Eastern
Europe during the period of transition to democracy.
Special attention to institutions of mass representa-
tion—electoral and party systems and national legis-
latures. Offered in alternate years.
246. Policymaking in Third-World Societies
(4)
Seminar—3 hours. Prerequisite: graduate standing
or consent of instructor. Included in an analysis of
policy making in the Third World countries there are
such topics as political resources, institutional
resources, decision making, resource allocations,
planning, and budgeting, implementation, and distri-
bution of world resources. Offered in alternate
years.
250. Policy Development and Impact in
U.S. Courts (4)
Seminar—3 hours; term paper. Prerequisite: gradu-
ate standing. Theoretical and empirical review of the
literature regarding courts as policymaking institutions of
government, with emphasis on the formation and imple-
mentation of judicial policy. Differences and
similarities across the judicial, congressional, and
executive branch policy processes. Offered in alter-
ate years.
260. Political Parties (4)
Seminar—3 hours; term paper. Survey of selected
topics in American and comparative parties.
261. Political Behavior (4)
Seminar—3 hours; term paper. Survey of selected
topics in political behavior and public opinion. May
be repeated three times for credit if topic differs.
274. Political Economy (4)
Seminar—3 hours; term paper. Restricted to gradu-
ate students. Politics of economic policy as reflected
in taxation, spending and regulation; impact of
prices, employment, and growth on political
demands; government and economic condi-
tions; electoral politics and the political business
cycle. Offered in alternate years.
279. Political Networks: Methods and
Applications (4)
Seminar—3 hours; term paper. Prerequisite: gradu-
ate standing. Structure of political networks, socio-
matic networks and affiliation networks; general networks
characteristics: density, centralization, polarization,
interdependence; dyadic characteristics: structural and role equivalence; subsets of networks:
cliques, blocks and bloc modeling; characteristics of
individuals in networks: centrality and prestige.
280. Bayesian Methods for Social and
Behavioral Sciences (4)
Seminar—3 hours; term paper. Prerequisite: course
212 or equivalent. Pass One open to graduate majors only; pass 2 open to graduate students.
Methodology seminar introducing Bayesian statisti-
cal approaches to issues and problems in political
science and other social and behavioral sciences.
Offered in alternate years.
281. Statistical Computing Issues in Political
Science (4)
Seminar—3 hours; discussion/laboratory—1 hour.
Prerequisite: course 213 or equivalent; graduate
standing. Methodology seminar introducing comput-
ing issues in empirical models for political science
and other social and behavioral sciences. Offered in
alternate years.
282. Advanced Modeling of Political
Behavior (4)
Seminar—3 hours; term paper. Prerequisite: course
215 or equivalent; graduate standing or consent of
instructor. Applications of formal models in political
science. Review of relevant contributions in other
social sciences. Consideration of advanced tech-
niques in game theory. Rational and behavioral
approaches.
283. Organizational Behavior (4)
Seminar—4 hours. Organizational behavior as it
relates to public sector decision making.
284. Advanced Network Analysis (4)
Seminar—3 hours; term paper. Prerequisite: course
211, 212, 279. Exponential Random Graph Mod-
els (ERGMS) of networks, game theoretic models of
network formation and network dynamics, diffusion
processes, shocks and network collapse, percola-
tion, cross-network spillover processes, social and
political applications of advanced network models.
Offered in alternate years. — Maoz, Zeev
290A. Research in American Government
and Public Policy (4)
Seminar—3 hours; term paper. Restricted to gradu-
ate students. Special research seminar on problems
and issues in the study of American government and
public policy. May be repeated up to 6 times for
credit if topic differs.
290B. Research in Political Theory (4)
Seminar—3 hours; term paper. Restricted to gradu-
ate students only. Special research seminar on problems
and issues in the study of political theory. May
be repeated six times for credit if topic varies.
290C. Research in International Relations
(4)
Seminar—3 hours; term paper. Restricted to gradu-
ate students only. Special research seminar on selec-
t topics and issues in the study of international rela-
tions. May be repeated six times for credit if topic varies.
290D. Research in Judicial Politics (4)
Seminar—4 hours. Prerequisite: graduate standing
in political science or consent of instructor. Contem-
oporary research on judicial politics, judicial institu-
tions, jurisprudence, and judicial behavior.
290E. Research in Political Parties, Politics,
and Political Behavior (4)
Seminar—4 hours. Special research seminar on selec-
t problems and issues in the study of political parties,
politics, and political behavior.
290F. Research in Comparative
Government and Policy (4)
Seminar—3 hours; term paper. Restricted to graduate
students only. Special research seminar on select
problems and issues in the study of comparative gov-
ernment and policy. May be repeated six times for
credit if topic varies.
290G. Research in Methodology (4)
Seminar—3 hours; term paper. Prerequisite: course
212. Special research seminar on selected problems
and issues in methods in political science. May be
repeated three times for credit if topic varies.
297. Internships in Political Science (2)
Seminar—2 hours. Prerequisite: open only to peo-
s who have internships or other positions in gov-
ernmental agencies, political parties, etc. Application
and evaluation of theoretical concepts through work
experience or systematic observation in public and
political agencies. May be repeated for credit. (S/U grading only.)
298. Group Study (1-5)
(S/U grading only.)
299. Research (1-12)  
(S/U grading only.)

299D. Directed Reading (1-12)  
(S/U grading only.)

Professional

390. The Teaching of Political Science (1)  
Seminar—1 hour. Prerequisite: graduate student standing in Political Science. Methods and problems of teaching political science at the undergraduate level. (S/U grading only.)

396. Teaching Assistant Training Practicum  
(1-4)  
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)

Graduate Study. The Graduate Group in Population Biology emphasizes programs of study and research leading to the Ph.D. degree. The Group concentrates on population biology as the broad discipline that blends ecology, evolution, population genetics and systematics into a unified field. The course curriculum ends in the first-year core courses offered by the Group faculty, seminars, and advanced courses in population biology, and related disciplines, chosen in consultation with a guiding committee.

Graduate Adviser. Consult the Population Biology Graduate Group office or website.

Courses in Population Biology (PBG)

Graduate

200A. Principles of Population Biology (5)  
Lecture—3 hours; discussion—2 hours. Prerequisite: course 231 concurrently and consent of instructor. Principles of single-species ecology and evolution. Topics include ecology of individuals, population growth models, structured populations, life history strategies, stochastic populations, basic population genetics theory, deleterious alleles in natural populations, and molecular population genetics. —I. (I)

200B. Principles of Population Biology (5)  
Lecture—3 hours; discussion—2 hours. Prerequisite: course 200A, or consent of instructor. Principles of multi-species communities. Topics include competition, mutualism, metapopulations, food webs and trophic cascades, interactions between simple ecological communities, island biogeography, succession, and large-scale patterns. —II. (II)

200C. Principles of Population Biology (6)  
Lecture—5 hours; discussion—1 hour. Prerequisite: course 200A. Topics include evolutionary quantitative genetics, analysis of hybrid zones, speciation, the fossil record, biogeography, and phylogeny reconstruction. —III.

203. Advanced Evolution (3)  
Lecture—1 hour; discussion—2 hours. Prerequisite: graduate standing. Adaptation and speciation, and biochemical and morphological evolution in plants and animals with emphasis on the appropriateness of different methods of analysis. Offered in alternate years.

206. Ecology of Insect Parasitoids (4)  
Lecture—2 hours; seminar—1 hour. Prerequisite: introductory animal ecology or behavior. Insect parasitoids will be investigated as model systems to address current topics in behavioral, population, and evolutionary ecology. Theory will be synthesized and critical empirical tests of ecological hypotheses or the equivalent, graduate standing, and consent of instructor. (Same course as Entomol. 206.) Offered in alternate years.

207. Plant Population Biology (3)  
Lecture—2 hours; laboratory/discussion—1 hour. Prerequisite: advanced undergraduate ecology course and/or Environmental Science and Policy 100, Evolution and Ecology 101, Entomology 104, Plant Biology 117, and advanced undergraduate course in genetics and/or evolution (e.g., Biological Sciences 101 or Evolution and Ecology 100). Introduction to theoretical and empirical research in plant population biology. Emphasis placed on linking ecological and genetic approaches to plant population biology. (Same course as Ecology 207.) Offered in alternate years. —II. Rice

212. Topics in Invertebrate Evolution (2)  
Seminar—2 hours. Prerequisite: graduate standing or consent of instructor and Evolution and Ecology 112 (Lecture only). Offered in alternate years. —II. Rice

212. Topics in Invertebrate Evolution (2)  
Seminar—2 hours. Prerequisite: graduate standing or consent of instructor and Evolution and Ecology 112 (Lecture only). Offered in alternate years. —II. Rice

220. Spatio-Temporal Ecology (2)  
Lecture/discussion—2 hours. Prerequisite: course 208 or Ecology 204 or Evolution and Ecology 104 or Environmental Science and Policy 121 or consent of instructor. Spatiotemporal ecological theory focusing on population persistence and stability, predator-prey and host-parasitoid interactions, species coexistence and diversity maintenance, including effects of environmental variation, spatial and temporal scale, life-history traits and nonlinear dynamics. Topics vary. (Same course as Ecology 220.) May be repeated for credit up to 12 units. —II. Grossberg

221. Animal Behavior, Ecology and Evolution (3)  
Lecture—3 hours. Prerequisite: Neurobiology, Physiology, and Behavior 102, Evolution and Ecology 104, or the equivalent, graduate standing, and consent of instructor. The interface between animal behavior, ecology and evolution. New developments in behavioral ecology and development and testing of hypotheses in this discipline. (Same course as Animal Behavior 221.)

224. Field Reconnaissance for Population Biologists (2)  
Fieldwork—6 hours. Prerequisite: graduate student in Population Biology, or consent of instructor. Biweekly field trips to acquire students with plant and animal communities, biodiversity, and ecological and evolutionary research opportunities in northern and central California. (May be repeated for credit. S/U grading only.)

225. Terrestrial Field Ecology (4)  
Seminar—1 hour; field work—12 hours. Prerequisite: introductory animal ecology and introductory statistics, or consent of instructor. A field course conducted over spring break and four weekends at Bodega Bay emphasizing student projects. Ecological hypothesis testing, data gathering, analysis, and
written and oral presentation of results will be stressed. (Same course as Ecology/Entomology 225.)—III. (III.) Karban

231. Mathematical Methods in Population Biology (3)
Lecture—3 hours. Prerequisite: Mathematics 16C or 21C or the equivalent. Mathematical methods used in population biology: Linear and nonlinear difference equation and differential equation models are studied, using stability analysis and qualitative methods. Partial differential equation models are introduced. Applications to population biology models are stressed. (Same course as Ecology 231.)—I. (I.) Hastings

233. Computational Methods in Population Biology (3)
Lecture/laboratory—2 hours: discussion/lab—1 hour. Prerequisite: a course in theoretical ecology (e.g., Ecology 231) or an equivalent to Environmental Science and Policy 121 from your undergraduate institution; or consent of instructor; programming experience required. Numerical methods for simulating population dynamics using the computational software package R. Emphasis placed on model formulation and development, theoretical concepts and philosophical principles to guide simulation efforts, model parameterization, and implementing simulations with R. (Same course as Ecology 223.) Offered in alternate years. (S/U grading only)—II. (II.) Basket, Schreiber

250A. Interdisciplinary Approaches to Biological Invasions (4)
Lecture/discussion—4 hours. Prerequisite: graduate standing. An integrative consideration of biological invasions, including an overview of concepts from ecology, ecological theory, evolution, genetics, philosophy, and other areas. Emphasis on potential contributions of each area for interdisciplinary problem solving.—I. (I.)

250B. Interdisciplinary Approaches to Biological Invasions (4)
Lecture/discussion—4 hours. Prerequisite: graduate standing. An integrative consideration of biological invasions, including an overview of concepts from ecology, ecological theory, evolution, genetics, philosophy, and other areas. Emphasis on potential contributions of each area for interdisciplinary problem solving.—II. (II.)

251. Collaborative Project in Biological Invasions (3)
Project—discussion—1 hour. Prerequisite: course 250A, 250B, or equivalent; and consent of instructor. A year-long interdisciplinary collaborative project focusing on biological invasions, resulting in a paper or other suitable product presented at a symposium or the conclusion of the project. May be repeated up to five times. (S/U grading only)—I, II, III, (I, II, III.)

271. Research Conference in Ecology (1)
Seminar—1 hour. Prerequisite: graduate standing. Seminar presented by visiting lecturers, UC Davis faculty and graduate students. May be repeated for credit. (Same course as Ecology 296.) (S/U grading only)—I, II, III, (I, II, III.)

290. Seminar in Geographical Ecology (1)
Seminar—1 hour. Prerequisite: consent of instructor. Seminar presented by visiting lecturers, UC Davis faculty and graduate students. May be repeated for credit. (Same course as Ecology 290.) (S/U grading only)—I, II, III, (I, II, III.)

292. Topics in Ecology and Evolution (1)
Seminar—1 hour. Prerequisite: graduate standing. Seminar presented by visiting lecturers, UC Davis faculty and graduate students. May be repeated for credit. (Same course as Ecology 292.) (S/U grading only)—I, II, III, (I, II, III.)

296. Seminar in Geographical Ecology (2)
Seminar—2 hours. Prerequisite: Evolution and Ecology 100 or 101 or consent of instructor. Recent developments in theoretical and experimental biogeography, historical biogeography and related themes in systematics, the biology of colonizing species, and related topics. (Same course as Geography 214.) (S/U grading only)—I, III, (I, II, III.) Shapiro

298. Group Study (1-5)
Prerequisite: graduate standing and consent of instructor. (S/U grading only)

299. Research (1-12)
Prerequisite: graduate standing and consent of instructor. (S/U grading only)

Population Health and Reproduction

See Veterinary Medicine, School of, on page 539.

Precision Agriculture

[College of Agricultural and Environmental Sciences]
The Department of Biological and Agricultural Engineering offers a minor in Precision Agriculture, the latest farming concept that optimizes fertilizer, pesticide and water use, while minimizing environmental concerns.

Minor Program Requirements:
This minor acquaints students with recent developments and their applications to agriculture, in geographic information systems (GIS), global positioning systems (GPS), variable rate technologies (VRT), crop and soil sensors, and remote sensing. The minor prepares students for challenging positions in site-specific crop management as we enter the “information age” in agriculture. UNITS

Precision Agriculture........................................ 18

Quarter Offered: I—Fall, II—Winter, III—Spring, IV—Summer; 2015-2016 offering in parentheses

Fall 2011 and on Revised General Education (GE): AH—Arts and Humanities; SE—Science and Engineering; SS—Social Sciences; Div—Diversity；Wrt—Writing Experience

Pre-Fall 2011 General Education (GE): ArtHum—Arts and Humanities; SciEng—Science and Engineering; SocSci—Social Sciences; Div—Diversity；Wrt—Writing Experience

ACGH=American Cultures, DD=Diversity, DL=Oral Skills, GL=Quantitative, SL=Scientific, VL=Visual, WC=World Cultures, WE=Writing Experience
The psychology program at UC Davis is broad and includes students and faculty with a variety of interests. The department has developed around five major areas of emphasis: Developmental Psychology, involves the study of changes in behavioral, cognitive, emotional, and social abilities that occur throughout the lifespan. Typical and atypical development are examined using a variety of research methods including behavioral, neuroimaging, and physiological assessments.

Perception, Cognition, and Cognitive Neuroscience (PCCN) involves the study of awareness and thought, and includes such topics as perception, learning, memory, language, and cognition. Biological Psychology covers a broad spectrum of topics including evolutionary, neurobiological, and molecular mechanisms of behavior.

Social-Personality Psychology involves the study of the individual in his or her social environment and includes such topics as personality and individual differences, social perception and prejudice, intergroup relations, the psychology of religion and psychological health and dysfunction.

Quantitative Psychology involves the study of linear and nonlinear models, psychometrics, mixed-effects models, and dynamic models, including experimental design, analysis of variance, regression, multivariate analysis, latent growth models, time series models, and factor analytic models.

The department offers the Bachelor of Arts (B.A.) program for students interested in the liberal arts and the Bachelor of Science (B.S.) program geared for students with an interest in either biology or mathematics. The main objective of both programs is to provide a broad introduction to the scope of contemporary psychology. In addition to completing a number of core courses for their degree, students may take specialty courses on such far-ranging topics as sex differences, genius and creativity, and environmental psychology. The department strongly encourages students to become involved in individual research projects under the direction of faculty members and to participate in our internship program to broaden their experiences and understanding of the field of psychology.

Preparatory Requirements. Before declaring a major in psychology, students must complete the following with a combined grade point average of at least 2.500. All courses must be taken for a letter grade. (Students in the Bachelor of Science, Biology program must complete Biological Sciences 2A, 2B, 2C, 2D, and 2E.)

**Psychology 1, 41** .......................... 8
Statistics 13 or 100 or 102 .......................... 4
Biological Sciences 2A .......................... 5 or 7.8

Career Alternatives. A degree in psychology provides broad intellectual foundations which are useful to the graduate for the development of careers in a variety of areas, including social work, the ministry, teaching, business, and counseling. An undergraduate education in psychology also provides excellent preparation for graduate study. Individuals with degrees in psychology may enter graduate programs to prepare for teaching, research, or clinical/counseling careers in psychology, or may go on to professional schools for training in veterinary and human medicine, law, and many other professions.

A.B. Major Requirements:

</tbody>
</table>

**Depth Subject Matter**

Two courses from the following two groups and one course from the remaining numbered courses:

Group A: Psychology 100 or 103, 130, 131, 132, 135, 136
Group B: Psychology 101, 113, 121, 122, 124, 125, 126, 129, 159
Group C: Psychology 151, 152, 154, 158, 161, 162, 168
Group D: Psychology 140; or Human Development (HDE) 100A or 100B, Psychology 141/HDE 101, Psychology 142/142HDE 102, Psychology 143, 146, 148

Additional units to achieve a total of 40 upper division units in psychology (must include Psychology 103A or both Statistics 13 and 102):

A maximum of 2 approved upper division Human Development units can be credited toward satisfaction of the 40-unit requirement.

**Total Units for the Major**

**Biological Emphasis**

B.S. Major Requirements:

**Depth Subject Matter**

Seven Psychology courses distributed as specified:

Group A: Two courses from: Psychology 100 or 100Y, 130, 131, 132, 133, 136
Group B: Three courses from: Psychology 101, 113, 121, 122/, 123/, 126, 127, 129, 159
Group C: One course from: Psychology 151, 152, 154, 158, 161, 162, 168
Group D: One course from: Psychology 140; or Human Development (HDE) 100A or 100B, Psychology 141/HDE 101, Psychology 142/142HDE 102, Psychology 143, 146, 148

Additional units to achieve a total of 40 upper division units in psychology (must include Psychology 103A or both Statistics 13 and 102):

A maximum of 12 approved upper division Human Development units can be credited toward satisfaction of the 40-unit requirement.

**Total Units for the Major**

**Mathematics Emphasis**

**B.S. Major Requirements:**

</tbody>
</table>

**Depth Subject Matter**

Five Psychology courses, distributed as specified:

Group A: Two courses from: 100, 130, 131, 132, 135, 136
Group B: Two courses from: Psychology 101, 113, 121, 122/, 123/, 126, 127, 129, 159
Group C: One course from: Psychology 151, 152, 154, 158, 161, 162, 168
Group D: One course from: Psychology 140; or Human Development (HDE) 100A or 100B, Psychology 141/HDE 101, Psychology 142/142HDE 102, Psychology 143, 146, 148

**Total Units for the Major**

A maximum of 12 approved upper division Human Development units can be credited toward satisfaction of the 40-unit requirement.

**Total Units for All Majors**

Students who plan to do graduate work in any area of psychology are strongly encouraged to complete Psychology 103A or both Statistics 13 and 102. Psychology 41 is a prerequisite for most upper division courses. Psychology 41 and Statistics 13 or 102 should be completed in the first year.

**Human Development course credit.** Human Development 100A, 100B, 100C, 101, 102, 120, and 121 can be used to toward satisfying the 40-unit requirement.
upper division major requirement to a maximum of 12 units. Students who have completed Human Development 100A or 100B will receive 2 units of credit for Psychology 140.

Minor Program Requirements:

Psychology 1 or the equivalent......... 4 One course from each of the following four groups

Group A: Psychology 100, 130, 131, 132, 135, 136
Group B: Psychology 101, 113, 121, 122, 123, 126, 127, 129, 159
Group C: Psychology 151, 152, 154, 158, 161, 162, 168
Group D: Psychology 140, 141 142, 143, 146, 148

Additional units to achieve a total of 20 upper division units..................................... 4-5 One course selected from: Human Development 100A, 100B, 100C, 101, 102, 120, 121 can be used toward satisfying the minor upper division unit requirement.

Honors and Honors Programs. In order to be eligible for high or highest honors in Psychology, the student must have completed the college criteria for honors and complete a research project involving a mini-mum of six units of course work over at least two quarters which represents an original analysis of data on psychological phenomena. Course 194HA, 194HB or other approved courses can be used to satisfy the unit requirement. This project is to be written in thesis form and approved by the department. The quality of the thesis work will be the primary determinant for designating high or highest honors at graduation.

Graduate Study. The Department offers programs of study and research leading to the Ph.D. degree in psychology. Detailed information regarding graduate study may be obtained at the Department Office or on our website.

Graduate Adviser. See http://gradstudies.ucdavis.edu/programs/program-detail.cfm?id=79

Courses in Psychology (PSY)

Lower Division

1. General Psychology (PSY)

Lecture—4 hours. Introduction emphasizing empirical approaches. Focus on perception, cognition, problem-solving, learning, and behavioral aspects. Only two units allowed to those who have taken course 15 or 16; no credit allowed to those who have taken both courses 15 and 16. GE credit: SS — II, III, I; II, II, III, E; Post, Simonot, Thompson, Traxler

20. Freshman Psychology Seminar (PSY)

Seminar—4 hours. Prerequisites: freshman standing. Instructor will acquaint students with his or her program of research, the development of scientific questions from the literature, and the application of research methods to examine these questions. Critical thinking will be encouraged via expository writing and oral presentations. GE credit: SS — II, III, I; II, II, III; Cross, E. Post

41. Research Methods in Psychology (PSY)

Lecture—3 hours; autotutorial. Prerequisite: course 1 or the equivalent; Statistics 13 or 102 recommended. Introduction to experimental design, interviews, questionnaires, observational research, qualitative approaches, case studies, content analy-sis, sampling, descriptive statistics, and statistical inference. Not open for credit to students who have taken course 41.

90X. Lower Division Seminar (1-2)

Seminar—1-2 hours. Prerequisite: lower division standing and consent of instructor. Limited enrollment. Examination of a special topic in Psychology through shared readings, written assignments, or special activities such as fieldwork or laboratory work. May not be repeated for credit. Offered irregularly.

98. Directed Group Study (1-5)

Primary for lower division students. [P/NP grading only]

99. Special Study for Lower Division Students (1-5)

[P/NP grading only]

Upper Division

100. Introduction to Cognitive Psychology (PSY)

Lecture—4 hours. Prerequisite: courses 1 and 41. Introduction to human information processing, mental representation and transformation, imagery, attention, memory, language processing, concept formation, problem solving, and computer simulation. Not open for credit to those who have completed course 136.—I, II, III, [I, II, III, v] v, Ekstrom, Gibbs, Long, Luck

100Y. Introduction to Cognitive Psychology (PSY)

Web virtual lecture—3 hours; discussion—1 hour; lecture—1 hour. Prerequisite: courses 1, 41; Introduction to human information processing, mental representation and transformation, imagery, attention, memory, language processing, concept formation, problem solving, and computer simulation. Not open for credit to students who have completed former course 136 or current course 100.—I, II, III, I, Luck

101. Introduction to Psychology (PSY)

Lecture—4 hours. Prerequisite: courses 1, 41; Survey and integration of the relationships between behavior and biological processes, including physiology, genetics, development, ecology, and evolution.—I, II, III, I, II, III, Coss, Krubitzer, Schank, Stolzenberg, Trainer

103A. Statistical Analysis of Psychological Data (PSY)

Lecture—4 hours, laboratory—2 hours; term paper. Prerequisite: course 1, 41 and Statistics 13 or 102. Pass Open to Psychology majors. Design and statistical analysis of psychological investigations and the interpretation of quantitative data in psychology. Not open for credit to students who have completed course 103 GE credit: QL—II, II, II, Blazos, Grimm, Widaman

103B. Statistical Analysis of Psychological Data (PSY)

Lecture—4 hours, laboratory—2 hours. Prerequisite: course 103A; Statistics 13 or 102. Pass Open to Psychology majors. Probability theory, sampling distributions, statistical inference, and hypothesis testing using standard parametric and correlational approaches. Simple regression analysis, multiple regression analysis, non-parametric statistics, introduction to multivariate statistics, with applications in psychology. Not open for credit to students who have completed course 103 GE credit: QL—II, II, II, II, Blazos, Ferrer, Grimm, Widaman

104. Applied Biometrics: An Introduction to Measurement Theory (PSY)

Lecture—4 hours. Prerequisite: upper division standing in Psychology, courses 41 and 103, Statistics 13. Examination of the basic principles and applications of classical and modern test theory. Topics include test construction, reliability theory, validity theory, factor analysis and latent trait theory. Offered irregularly. GE credit: QL—Grimm, Wida-man

107. Questionnaire and Survey Research Methods (PSY)

Lecture/discussion—2 hours; laboratory/discussion—2 hours. Prerequisite: consent of instructor; course 1, course 41 or an equivalent course on social or behavioral research methods. Limited enrollment. Introduction to survey and questionnaire research methods with emphasis to ask questions. Social and psychological factors that influence survey response. Practical aspects of fielding survey and questionnaire research. Limited enrollment. Offered irregularly. GE credit: QL —H. Schank

113. Developmental Psychology (PSY)

Lecture—3 hours; laboratory—2 hours. Prerequisite: course 101. The biology of behavioral development; survey and integration of the organismic and environmental processes that regulate the development of behavior.—I, II, III, I, III, Schank

120. Agent-Based Modeling (PSY)

Lecture/laboratory—4 hours. Prerequisite: course 100 or 101. Introduction to agent-based computer simulation and analysis with emphasis on learning how to model animals, including humans, to achieve insight into social and group behavior. Limited enrollment. GE credit: QL —(I) Schank

121. Physiological Psychology (PSY)

Lecture—3 hours; laboratory—3 hours. Prerequisite: courses 1, 41, 101. Pass Open to Psychology majors. Relationship of brain structure and function to behavior, motivation, emotion, language, and learning in humans and other animals. Methodology of physiological psychology and neuroscience. Not open for credit to students who have completed course 108. (Former course 108.)—I, II, III, I, III, III, Bales, Krubitzer

122. Advanced Animal Behavior (PSY)

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 101 or Neurobiology, Physiology, and Behavior 102. Pass Open to Psychology majors. Advanced integrative survey of biological principles of behavioral organization, emphasizing historical roots, current research directions, conceptual issues and controversies. Laboratory exercises on the description and analysis of the behavior of captive and free living animals. (Same course as Neurobiology, Physiology, and Behavior 150.) Not open for credit to students who have completed course 150. (Former course 150.) Offered irregularly.

123. Hormones and Behavior (3)

Lecture—3 hours. Prerequisite: Neuroscience, Physiology, and Behavior 101 and either course 101 or Neurobiology, Physiology, and Behavior 102. Pass Open to Psychology majors. Advanced integrative survey of biological principles of behavioral organization, emphasizing historical roots, current research directions, conceptual issues and controversies. Laboratory exercises on the description and analysis of the behavior of captive and free living animals. (Same course as Neuroscience, Physiology, and Behavior 152.) Not open for credit to students who have completed course 152. (Former course 152.)—II—III, I, III, Bales, Trainer

124. Comparative Neuroanatomy (PSY)

Lecture—3 hours; laboratory—2 hours. Prerequisite: course 101 or Neurobiology, Physiology, and Behavior 100 or 101. Overview of the neuroanat-omy of the nervous system in a variety of mammalian and non-mammal vertebrates. Examine changes or modifications to neural structures as a result of morphological or behavioral specializa-tions. (Same course as Neuroscience, Physiology, and Behavior 124.) GE credit. SL—II, I, II, Krubitzer, Recanzone

125. Behavioral Genetics and Epigenetics (3)

Lecture—3 hours. Prerequisite: course 101. Review of basic principles in genetics and select topics in epigenetics with emphasis on behavior. Use of modern molecular methods to outline complex relationships between genes, environment, and behavior.—I, II, III, I, III, Stolzenberg, Trainer
126. Health Psychology (4) Lecture—4 hours. Prerequisite: course 1, 41, 101. Pass One open to Psychology majors. Psycho- logical factors and health and illness. Topics include stress and coping, personality and health, symptom perception and reporting, heart disease, cancer, and mental health maintenance and promotion. Not open for credit to students who have completed course 160.—II, III. (II, III.) Emmons, Moons

127. Animal Cognition (4) Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 111, 101. Pass One open to Psychology majors. Integrative review of the historical backdrop, theoretical issues, and scientific methods addressing animal cognition in a wide range of species. Emphasis on learning processes, pattern recognition, and the neurobiology of learning and memory. Not open for credit to students who have completed course 134. (Former course 134.) Offered irregularly.—Case

130. Human Learning and Memory (4) Lecture—3 hours; discussion—1 hour. Prerequisite: courses 1, 41, 100, and either Statistics 13 or 102; consent of instructor. Consideration of major theo- ries of information storage and memory with critical examination of relevant experimental data.—I, II, III. (I, II, III.) Ranganath, Yonelinas

131. Perception (4) Lecture—3 hours; independent library work. Prereq- uisite: course 1, 41. Cognitive and neuropsychological processes related to measurable physical energy changes mediated through sensory channels. The perception of objects, space, motion, events.—II. (II.) Geng

132. Social Cognition (4) Lecture—3 hours; term paper. Prerequisite: courses 1, 41, 100; or consent of instructor. Introduction to the cognitive processes involved in language comprehension and production. Topics include the biological foundations of language, speech perception, word recognition, syntax, reading ability, and pragmat- ics. GE credit: WE.—I, II, III. (II, III, III.) Long, Swaab, Trahan

135. Neuroimaging: The Biological Foundations of the Mind (4) Lecture—4 hours; Prerequisite: course 1, 41, or con- sent of instructor; course 101, 121, or 129 recom- mended. Neuroscientific foundations of higher mental processes including attention, memory, lan- guage, higher-level perceptual and motor processes, and consciousness. Emphasis on the neural mecha- nisms which form the substrates of human cognition and consciousness and their neural correlates.—I, II, III. (I, II, III.) Ekstrom, Geng, Janata, Mangun, Ranganath

136. Psychology of Music (4) Lecture/discussion—3 hours; term paper. Prereq- uisite: courses 1, 41, and either 100 or 131 or Music 5C; consent of instructor. Introduction to the mental and neural representations of musical structures and processes involved in perceiving, remembering, and performing music. Music and emotion. GE credit: WE.—II. (III.) Janata

137. Neuropsychology of Learning & Memory (4) Lecture—4 hours. Prerequisite: courses 1, 41, 101. Overview of the neural basis of learning and mem- ory or consent of instructor. Emphasis on research on animal learning and memory with animals. Topics include consolidation, neural plasticity, cellular competition for memory storage, and the role of neurogenesis in learning.—II. (I, II, III.) Wiltgen

140. Developmental Psychology (4) Lecture—4 hours. Prerequisite: courses 1, 41. Pass One open to Psychology majors. Ontogenetic account of human behavior through adolescence with focus on developmental, biological, and cognitive development. Special emphasis is placed on research in early childhood and infancy. GE credit: WE.—II. (III.) Janata

143. Infant Development (4) Lecture—3 hours; extensive writing. Prerequisite: courses 1 and 41. Human development from infancy through childhood. Lecture—4 hours. Prerequisite: course 1. Pass One open to Psychology majors. Theory and research on memory development with focus on infancy and childhood. Not open for credit to students who have completed course 153. (Former course 133.) GE credit: WE.—II. (III.) Gheit, Rivera

146. The Development of Memory (4) Lecture—3 hours; term paper. Prerequisite: courses 1, 41. Pass One open to Psychology majors. Theory and research on memory development with focus on infancy and childhood. Not open for credit to students who have completed course 153. (Former course 133.) GE credit: SocSci, Wrt | WE.—II. (III.) Gheit, Rivera

148. Developmental Disorders (4) Lecture/discussion—3 hours; term paper. Prerequisite: courses 1, 41, and either 140 or 141 or Human Development 100A or 100B. Current scientific knowledge of the influences of biological, cogni- tive, and environmental factors on the emergence of disorders with onset in childhood. Examples include autism spectrum disorders and anxiety and dyscircu- laria. Emphasis placed on understanding these dis- orders, their causes and their treatments.—II, III. (II, II, III.) Rivera

151. Social Psychology (4) Lecture—4 hours. Prerequisite: courses 1, 41. Pass One open to Psychology majors. Behavior of the individual in the group. Examination of basic psy- chological processes in social situations, surveying variables of social dynamics; group dynam- ics, norm-development, attitudes, values, public opinion, status. Not open for credit to students who have completed course 145. (Former course 145.) —II, III. (I, II, III.) Ledgerwood, Moons, Sherman

152. Social Cognition (4) Lecture—4 hours. Prerequisite: courses 1 and 41. Examines how social factors influence how we attend to, encode, and process information and how these mental processes influence judgments and behavior.—II, III. (II, III.) Pickett, Sherman

153. Psychology and Law (4) Prerequisite: courses 1, 41. Pass One open to Psychology majors. Current theoretical and empirical issues in the study of psychology and law. Topics include eyewitness testimony, child abuse, jury deci- sion making, juvenile delinquency and criminality, prediction of violence, insanity defense, and mem- ory for traumatic events. Not open for credit to stu- dents who have completed course 115. (Former course 115.) Offered in alternate years.—II, III, chapman

154. Psychology of Emotion (4) Lecture—4 hours. Prerequisite: course 1, 41. Pass One open to Psychology majors. Introduction to cur- rent theories and research in psychology on emotions and their relationship to health, risk factors, and feelings with special reference to self-knowledge. Not open for credit to students who have completed course 143. (Former course 143.) —II, III, (I, II, III.) Moons, Shaver

155. Environmental Awareness (4) Lecture—4 hours. Prerequisite: course 1. Pass One open to Psychology majors. Interactions of people and the environment. They construct. Research meth- ods for evaluating designing and reviewing current research in environmental psychology. Not open for credit to students who have completed course 144. (Former course 144.) Offered irregularly. GE credit: SciSOC | SS.—Coss

157. Stereotyping, Prejudice, and Stigma (4) Lecture/discussion—4 hours. Prerequisite: course 151. Social psychological underpinnings of stereo- typy, prejudice, and stigmatization. Topics include: origins, maintenance, change, effects on person perception and memory, and the automatic- ity/controllability of stereotyping and prejudice. GE credit: Div.—II. (II.) Sherman

158. Sexual Orientation and Prejudice (4) Lecture/discussion—4 hours. Prerequisite: course 1, 41. Pass One open to Psychology majors. Current scientific knowledge about sexual orientation and prejudice based on sexual orientation. Emphasis on learning the skills necessary for a critical understand- ing of scientific and public policy issues relevant to sexuality. GE credit: SciSOC, Div, Wrt | ACGH, DD, SS, WE.—II. (III.) Herek

159. Gender and Human Reproduction (4) Lecture—4 hours. Prerequisite: course 1 and 41. Pass One open to Psychology majors. Psychology of reproduction. Reproductive events over the course of an individual’s life, including sexual development, mate choice, relationships, and reproduction. Bio- logical and social psychological explanations at the levels of mechanism and evolutionary function. Not open for credit to students who have completed for- mer course 149. (Formally course 149)—II. (III.) Scheib

161. Psychology of the Self (4) Lecture—4 hours. Prerequisite: courses 1 and 41. Psychological theory and research on the self. Topics include: self-knowledge, self-esteem, self-regulation, self-presentation, cognitive and emotional aspects of the self, and the role of the self in shaping social interaction.—I. (I.) Pickett

162. Introduction to Personality Psychology (4) Lecture—3 hours; term paper. Prerequisite: course 1, 41. Pass One open to Psychology majors. General study of the scientific study of personality. Overview of current research and theory in the field of personality psychology. Not open for credit to students who have completed former course 147. GE credit: SocSci, Wrt | SS.—II, III, (II, III.) Robins, Shaver

165. Introduction to Clinical Psychology (4) Lecture—4 hours. Prerequisite: courses 1, 41, 168, and either 140 or 151. Major theoretical formula- tions in the history of clinical psychology, from classi- cal psychoanalysis to contemporary existentialism and behavior modification. A survey, based on lec- tures, films, and tapes, of what clinical psychologists do, including methods of appraisal, professional roles, and approaches to treatment.—II. (III.) Zane

170. Psychology of Religion (4)
Lecture—4 hours. Prerequisite: courses 1 and 41. Major theories, issues, data, and research methodologies of psychology of religion. Religious experience and expression; religious development in childhood, adolescence, and adulthood; conversion; religious issues in physical and mental health, cross-cultural perspectives. GE credit: Div. Wrt | WE.—II. (III) Emmons

175. Genius, Creativity, and Leadership (4)
Lecture—3 hours; term paper. Prerequisite: course 1 and 41 or the equivalent or consent of instructor. The phenomenon of genius is examined from a diversity of theoretical, methodological, and disciplinary perspectives, with an emphasis on outstanding creativity and leadership in art, music, literature, philosophy, science, war, and politics. GE credit: SocSci, Div | SciEng | VL | Writing Experience

180A. Research in Cognitive and Perceptual Psychology (4)
Lecture—2 hours; laboratory—4 hours. Prerequisite: course 41, and four upper division Psychology courses and consent of instructor. Empirical research on selected topics in general experimental psychology (general research design and analysis, perception, cognition, cognitive development, etc.). Specific content will vary from quarter to quarter. May be repeated one time for credit when content differs. Offered irregularly.

180B. Research in Psychology (4)
Lecture—2 hours; laboratory—4 hours. Prerequisite: course 101, three additional upper division courses in Psychology, and consent of instructor. Empirical research on selected topics in psychology (animal learning, physiological and sensory psychology, developmental psychology, computer modeling of neural systems). Content varies. May be repeated one time for credit when content differs. Offered irregularly.

180C. Research in Personality and Social Psychology (4)
Lecture—2 hours; laboratory—4 hours. Prerequisite: course 41, and four upper division Psychology courses and consent of instructor. Empirical research on selected topics in personality and social psychology (personality, social psychology, organizational psychology, etc.). Content will vary from quarter to quarter. May be repeated one time for credit when specific content differs. Offered irregularly.

185. History of Psychology (4)
Lecture—3 hours; term paper. Prerequisite: courses 1, 41, upper division standing or consent of instructor. Past and present in psychology. majors. Development of philosophical thought and research in context of history of philosophy and science. Not open for credit to students who have completed course 120. GE credit: Div, SciEng | VL. Wrt | SocSci | SS, WE.—II. (III) Simonton

190. Seminar in Psychology (4)
Seminar—4 hours. Prerequisite: junior or senior standing, major in psychology or consent of instructor. Intensive treatment of a special topic or problem of psychological interest. May be repeated for credit in different subject area. —I, II, III, (I, II, III)

190X. Upper Division Seminar (1-2)
Seminar—1-2 hours. Prerequisite: upper division standing and consent of instructor. In-depth examination at an upper division level of a special topic in Psychology. Emphasis on student participation in learning. May not be repeated for credit. Limited enrollment.

192. Fieldwork in Psychology (1-6)
Fieldwork—1-6 hours. Prerequisite: upper division standing in psychology and consent of instructor. Supervisor arranged internship off and on campus, in community agencies, and/or research laboratories. Maximum of four units may be used toward satisfaction of upper division major requirement. May be repeated one time for credit. Limited enrollment (P/NP grading only).

194HA-194HB. Special Study for Honors Students (3-3)
Independent study—9 hours. Prerequisite: senior standing in Psychology and qualifications for admission into college honors program, and consent of instructor; at least one course from 180A, 180B, 180C or 199 strongly recommended. Directed research. Supervision and research leading to submission of a Senior Honors thesis under the direction of faculty sponsor. (Deferred grading only; pending completion of sequence.) GE credit: Div | WE.—II. (III) Emmons

197T. Tutoring in Psychology (1-3)
Independent study—9 hours. Prerequisite: upper division standing and consent of instructor. Intended for advanced undergraduate students who will lead discussion sections in Psychology courses. May be repeated for credit for a total of 8 units. (P/NP grading only)

198. Directed Group Study (1-5)
Prerequisite: consent of instructor. (P/NP grading only)

199. Special Study for Advanced Undergraduates (1-5)
(P/NP grading only)

Graduate

200. Proseminar in Psychology (3)
Seminar—2 hours; independent study—1 hour. Prerequisite: graduate standing in Psychology or consent of instructor. Introduces matriculating graduate students to research activities of departmental faculty. (S/U grading only).—I. (I)

201. Research Preceptory (4)
Laboratory—3-4 hours; discussion—3.5 hours. Prerequisite: consent of instructor. May be repeated for credit. (S/U grading only).—I, II, III. (I, II, III)

202. Research Seminar (1)
Seminar—1 hour. Prerequisite: graduate standing in psychology. Presentation of graduate research to program faculty and graduate students. May be repeated for credit. (S/U grading only).—I, II, III. (I, II, III)

204A. Statistical Analysis of Psychological Experiments (5)
Lecture—4 hours; laboratory—2 hours. Prerequisite: Statistics 102 or equivalent; graduate standing in Probability theory, sampling distributions, statistical inference, and hypothesis testing using standard parametric and correlational approaches. Analysis of variance, factorial and repeated measures, and tests of trends. Not open for credit to students who have completed course 206.—I. (I) Ferrer, Widaman

204B. Causal Modeling of Correlational Data (4)
Lecture—4 hours. Prerequisite: course 204A or the equivalent or consent of instructor. Examination of how to make causal inferences from correlational data in the behavioral sciences. Emphasis on testing rival causal models using correlations among observed variables. Beginning with multiple regression analysis, discussion advances to path analysis and related techniques. —II, III. (I, II, III)

204D. Advanced Statistical Inference from Psychological Experiments (5)
Lecture—4 hours; laboratory—2 hours. Prerequisite: course 204A or consent of instructor. Advanced topics in statistical inference, which may include probability theory, sampling distributions, statistical inference and hypothesis testing, nonparametric statistics, Bayesian approaches, and advanced issues in analysis of variance. Not open for credit to students who have completed course 205.—I, II. (III) Blozis

205. Applied Multivariate Analysis of Psychological Data (4)
Lecture—4 hours. Prerequisite: three courses from 204A, 204B, 204C, 204D or the equivalents, or consent of instructor. Review of the major methods of multivariate data analysis for psychological data. Statistical routines using a linear algebra-based computer

putting language. Topics include multivariate analysis of variance, discriminant analysis, canonical analysis, factor analysis, and canonical correlation. Not open for credit to students who have completed course 207B. (Former course 207B.) Offered in alternate years.—II. Ferrer

205B. Factor Analysis (4)
Lecture—4 hours. Prerequisite: graduate standing, course 204A and 204B or the equivalent or consent of instructor. Theory and methods of factor analysis, including exploratory factor analysis, confirmatory factor analysis, and principal component analysis. Offered in alternate years.—II. Widaman

205C. Structural Equation Modeling (4)
Lecture—3 hours; term paper. Prerequisite: graduate standing; course 204A and 204B or the equivalent or consent of instructor. Theory and methods of struc- tural equation modeling, including path analysis, confirmatory factor analysis, multiple-group modeling and latent growth curve modeling. Offered in alternate years.—II. Ferrer, Grimm, Widaman

205D. Multilevel Models (4)
Lecture—4 hours. Prerequisite: course 204A, graduate standing or consent of instructor. Introduction to statistical techniques for the analysis of normal, hierarchically structured data, such as clustered data or repeated-measures data. Topics include hierarchical linear models, latent growth curve models, and how these models handle unbalanced and/or missing data. Offered in alternate years.—II. Grimm

205E. Applied Psychometrics and Measurement Theory (4)
Lecture—4 hours. Prerequisite: course 204A or equivalent; graduate standing in Psychology or consent of instructor. Examination of basic statistical models and applications of classical and modern test theory. Topics include test construction, reliability theory, validity theory, factor analysis, and latent trait theory. Not open for credit to students who have completed course 204 or 204C. Offered in alternate years. —III. Widaman

205F. Item Response Theory (4)
Lecture—3 hours; term paper. Prerequisite: course 204A or the equivalent; graduate standing in Psychology or consent of instructor. Item response theory allows for the creation of precise measurement instruments in psychological testing. Review Classical Test Theory, and then cover basic IRT models through advanced applications. Offered in alternate years. —III. Grimm

206.A. Theoretical Foundations: Research Methods in Psychology (4)
Lecture/discussion—3 hours; term paper. Restricted to graduate student status. Examines the philosophy and research practices underlying experimental psychology. Topics to be covered include philosophy of science/epistemology, research design, sampling bias and bias in research, theory development, validity, the social context of research, and critical thinking about research. Offered irregularly. —III. (III) Pickett, Shaver

206.B. Research Methods in Psychology: Applications in Social-Personality Research (4)
Lecture/discussion—3 hours; term paper. Restricted to graduate student status. Examines the philosophy and research practices underlying experimental psychology. Topics to be covered include philosophy of science/epistemology, research design, sampling bias and bias in research, theory development, validity, the social context of research, and critical thinking about research. Offered irregularly. —III. (III) Pickett, Shaver

207. Survey and Questionnaire Research Methods (4)
Lecture/discussion—4 hours. Prerequisite: completion of a course on social or behavioral research methods, graduate standing. Survey and questionnaire research methods with emphasis on how to ask questions. Cognitive, motivational, and social processes that influence how respondents answer questions; sampling techniques; Internet resources, and practical aspects of fielding survey and questionnaire research. Offered irregularly.—I. Herk

Quarter Offered: Ti-Fall; II-Winter; III-Spring; IV-Summer; 2015-2016 offering in parentheses
Pre-Fall 2011 General Education (GE): ArtHum—Arts and Humanities; SciEng—Science and Engineering; SocSci—Social Sciences; Div—Domestic Diversity; Wrt—Writing Experience
Fall 2011 and on Revised General Education (GE): AHH—Arts and Humanities; SE—Science and Engineering, SS—Social Sciences; ACGH—American Cultures, DD—Domestic Diversity, OL—Oral Skills, QL—Quantitative, SL—Scientific, VL—Visual, WC—World Cultures; WE—Writing Experience
208. Physiological Psychology (4)
Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. A conceptual analysis of the search for neural, neurophysiology, and neurochemistry to an understanding of animal and human behavior.—III. Bales

208A. Fundamentals of Human Electroencephalography (4)
Lecture/discussion—1.5 hours; laboratory—3 hours; extensive problem solving—1.5 hours; project—3 hours. Restricted to 15 students. In-depth introduction and hands-on experience with the event-related potential (ERP) method in the study of attention, executive control, memory, language and social cognitive neuroscience.—II. (III) Luck, Swaab

209A. Introduction to Programming: Matlab (4)
Lecture/laboratory—3 hours. Prerequisite: graduate standing or consent of instructor. The Matlab programming environment as a means of organizing, analyzing, and visualizing scientific data. Basic programming concepts such as variables, loops, conditional branching, and efficient programming techniques will be emphasized. Offered irregularly.

210. Fundamentals of Cognitive Neuroimaging (3)
Lecture/discussion—3 hours. Prerequisite: basic knowledge of inferential statistics and experimental psychology. Introduction to empirical Foundations and methodology of neuroimaging, emphasizing pragmatics of functional magnetic resonance imaging (fMRI) for study cognition. Topics include: MR physiology, the relationship between neural activity and the BOLD signal, cognitive and mental design, and analysis of fMRI data.—Ranganath

211. Advanced Topics in Neuroimaging (2)
Seminar—2 hours. Prerequisite: course 210 or consent of instructor. Restricted to 16 students. Critical presentation and discussion of the most influential advanced issues in neuroimaging, emphasizing MRI design/analysis and the integration of MRI with EEG/MEG. (Same course as Neuroscience 211, Psychology, Physiology, and Behavior 211) S/U grading only.—II. (III) Miller

212A. Developmental Psychology: Cognitive and Perceptual Development (4)
Seminar—4 hours. Prerequisite: graduate standing or consent of instructor, completion of undergraduate or graduate course on developmental psychology or human development. Theories and empirical findings concerning human cognitive and perceptual development. Study of development of perception, memory, concepts (e.g., theory of mind, concepts about number), problem solving, and language from infancy to adolescence.—I. Gheetti, Goodman, Graf Estes, Laplatah, Utz

212B. Developmental Psychology: Social, Emotional, and Personality Development (4)
Seminar—4 hours. Prerequisite: graduate standing or consent of instructor, completion of undergraduate or graduate course on developmental psychology or human development. Theories and empirical findings concerning human social, emotional, and personality development. Development of emotions, moral reasoning and behavior, personality, self-concept, and social cognition from infancy to adolescence (may include adulthood).—Thompson

216 Behavioral Genetics (4)
Lecture—3 hours; laboratory/discussion—1 hours; term paper. Prerequisite: graduate standing. Restricted to 20 students. Review basic principles in genetics and select topics in molecular genetics with emphasis on behavior. Use of modern molecular methods to outline complex relationships between genes, environment, and behavior. Not open for credit to students who have completed course 221.—II. (III) Trainer

218A. Fundamentals of Animal Behavior (5)
Lecture/discussion—4 hours; discussion—1 hour. Prerequisite: consent of instructor; upper-division undergraduate introduction to the biology of behavior, such as course 101, 122, 123, Neurobiology, Physiology, and Behavior 102, 151, 152, Wildlife, Fish, and Conservation Biology 141, Entomology 104, or Animal Science 105. Survey of the phenomena and theory of animal behavior from the perspectives of multiple biological disciplines, including evolution, ecology, genetics, neurobiology, endocrinology, and animal science. (Same course as Animal Behavior 218A).—I. (II) Sih

218B. Fundamentals of Animal Behavior (5)
Lecture/discussion—4 hours; discussion—1 hour. Prerequisite: consent of instructor; course 209A. Survey of the phenomena and theory of animal behavior from the perspectives of multiple biological disciplines, including evolution, ecology, genetics, neurobiology, endocrinology, and animal science. (Same course as Animal Behavior 218B).—II. (III) Sih

220. History of Psychology (4)
Lecture—2 hours; seminar—2 hours. Prerequisite: graduate standing in psychology or consent of instructor. A lecture-seminar on the history of psychology and on the applicability of early psychological theory and research to contemporary investigations. Offered in alternate years.—Simonton

221. Academic Writing in Psychology (4)
Lecture/discussion—3 hours, term paper. Prerequisite: consent of instructor. Class size limited to 10. Strategies for developing and honing academic writing skills and writing productivity, with a particular focus on how to produce a clear and compelling empirical journal article in psychology. May be repeated four times for credit with consent of instructor if student chooses to focus on a substantially different writing project. Offered irregularly.—I. Ledgerwood

230. Cognitive Psychology (4)
Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Analysis of the mental processes by which knowledge is acquired, manipulated, stored, retrieved and used. Offered in alternate years.—I. Long, Mangun

231. Sensation and Perception (4)
Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Analysis of the role of sensory processes and perception in experience and their effects on behavior. Offered in alternate years.—II.

241. Attitudes and Social Influence (4)
Lecture/discussion—3 hours; term paper. Prerequisite: consent of instructor. Survey of theory and research in the field of social influence. Topics include attitude definition and measurement, major theories of attitude formation and change, the interpersonal consequences of those attitudes, and theory and empirical research on a specialized topic in the psychology of language. May be repeated for credit when topic differs. Offered in alternate years.

245. Social Psychology (4)
Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Theory and research in social psychology.—III. (III) Johnson, Pickett, Rabin

247. Personality (4)
Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Theory and research in human personality.—II. (III) Rabin

250. Comparative Psychology (4)
Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. The study of animal behavior in an evolutionary and comparative framework.—II.

251. Topics in Genetic Correlates of Behavior (4)
Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Theory and research in the genetic contributions to animal and human behavior. May be repeated for credit when topic differs. Offered in alternate years.

252. Topics in Psychobiology (4)
Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Critical study in a selected area of psychobiology. May be repeated for credit when content differs. Offered in alternate years.

261. Cognitive Neuroscience (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: graduate student standing in Psychology or Neuroscience or consent of instructor. Graduate core course for neuroscience. Neurobiological bases of sensory, motor, and cognitive functions. Offered in alternate years. (Same course as Neuroscience 223).—II. (III) Ranganath, Swaab

263. Topics in Cognitive Psychology (4)
Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Selected topics in language processing, memory, perception, problem solving, and thinking, with an emphasis on the common underlying cognitive processes. May be repeated for credit when content differs. Offered in alternate years.

264. Topics in Psycholinguistics (4)
Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Discussion of fundamental issues in the psychology of language. May be repeated for credit when content differs. Offered in alternate years.

270. Topics in Personality and Social Psychology (4)
Seminar—4 hours. Prerequisite: graduate standing or consent of instructor. Critical study of a selected area of personality or social psychology. May be repeated for credit when content differs.

272. Topics in Developmental Psychology (4)
Seminar—4 hours. Prerequisite: graduate standing in Psychology or consent of instructor. Selected topics in developmental psychology, including developmental neuroscience, memory development, infant, cognitive development, social development, child maltreatment, children and law, perceptual development, emotional development, children's critical, and adolescence, with emphasis on developmental processes and developmental theory. May be repeated for credit. Offered irregularly.

289A. Current Research in Psychology (2)
Seminar—2 hours. Prerequisite: graduate standing in Psychology or consent of instructor. Contemporary theory and empirical research in specialized topics in psychology. Topics include developmental attachment, developmental neuroscience, social, emotional, sexual orientation and identity. May be repeated for credit if topic differs. (Deferred grading only, pending completion of sequence.)

289B. Current Research in Psychology (2)
Discussion—2 hours. Prerequisite: course 289A; graduate standing in Psychology or consent of instructor. Intensive examination of contemporary theory and empirical research on a specialized topic.
in psychology. Sample topics include developmental attachment, social neuroscience, culture and mental health, electroencephalography and cognitive neurosci-
ence, emotion, implicit cognitive processes, sexual orientation and identity, and attention. May be repeated for credit if content differs. (Deferred grade-
ing only, pending completion of sequence.)

290. Seminar (A) — 4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Seminar devoted to a highly specific research topic in any area of basic psychology. Special topic selected for a quarter will vary depending on interests of instruc-
tors and students.—I, III. (II, III.)

298. Group Study (1-5) (S/U grading only)

299. Research (2-9) (S/U grading only)

299D. Dissertation Research (1-12) Prerequisite: consent of instructor. (S/U grading only.)

Professional

390A-390B. The Teaching of Psychology (6-4) Discussion, lecture, practice. Prerequisite: advanced graduate standing in psychology or a closely related discipline and consent of instructor. Methods and problems of teaching psychology at the undergradu-
ate and graduate levels; curriculum design and eval-
uation. Practical experience in the preparation and presentation of material. (S/U grading only; deferred grading only, pending completion of sequence.)—I, II, III. (II, III.)

396. Teaching Assistant Training Practicum (1-4) Prerequisite: graduate standing. May be repeated for credit. (S/U grading only)—I, II, III. (II, III.)

Quantitative Biology and Bioinformatics

[College of Biological Sciences]
The interdisciplinary minor in Quantitative Biology and Bioinformatics is an integrative program that introduces students to the quantitative and computa-
tional approaches that are redefining all disciplines in the biological sciences, from molecular and cell biology, through genomics and physiology, to ecol-
yogy and evolutionary biology. Students in this minor will learn research tools that apply mathematical and computational methods, increase their insight into the strengths and limitations of quantitative approaches, and develop the interdisciplinary per-
pective that is now the foundation of modern bio-
logical research and training.
The minor in Quantitative Biology and Bioinformatics is open to all undergraduates regardless of major and is sponsored by the College of Biological Sci-
ences.

Minor Program Requirements: UNITS

Quantitative Biology and Bioinformatics ................................. 18-24

Core Courses ................................. 8-12
Programming: Computer Science Engineering 10 or 30 or the

equivalent* ........................................ 4
Quantitative Biology: Biological Sciences 132 or Mathematics 124
Bioinformatics: Computer Science Engineering 124 or 129 ............ 4
Quantitative and Computational
Preparation .................................................. 4

Complete one course from the following: Applied Science Engineering 115; Biomedical Engineering 103; Computer Science Engineering 122, 130;

Mathematics 128A, 128B, 128C, 135A;
Statistics 130A, 131A, 141A

*The program requirement may be satisfied by previous experience and therefore may not entail college course credit. Please see your minor adviser for this determination and its possible impact on your unit requirements for the minor.

Restricted Electives .............................. 6-8 Complete two or more courses from the following list to achieve a total of 18-24 units: Biological Sciences 134, 180L, 181, 183; Biomedical Engineering 102, 117, 140, 141, 151; Biotechnology 150; Computer Science Engineering 165A, 166; Evolution and Ecology 102, 103, 104, 175; Microbiology 105; Molecular and Cellular Biology 123, 143, 182; Neurobiology, Physiology, and Behavior 166, 167; one course from: Environmental Science and Policy 121 or Wildlife, Fish, and Conservation Biology 122

Restrictions. No more than two upper division courses from any single department may be offered in satisfaction of the minor requirements. Only one course used to satisfy a requirement for the minor may be applied toward a student's major.

Minor Adviser. Consult the Biology Academic Success Center (BASC), 1023 Sciences Laboratory Building; 530-752-0410; http://www.biosci.ucdavis.edu/BASC

Allison Coudert, Ph.D., Professor
Mark Elmore, Ph.D., Assistant Professor
Naomi Janowitz, Ph.D., Professor
Meaghan O’Keefe, Ph.D., Assistant Professor
W. Flogg Miller, Ph.D., Associate Professor
Mairaj Syed, Ph.D., Assistant Professor
Baki Tezcan, Ph.D., Associate Professor
Archana Venkatesan, Ph.D., Assistant Professor
Keith Waterpaugh, Ph.D., Associate Professor

Emeriti Faculty
Whalen W. Lai, Ph.D., Professor Emeritus

The Major Program
Religion is a major force in human experience. It has shaped the world’s history, literature, art, culture, politics, ethics, and economics. In addition to offer-
ning courses in all the major religious traditions (Juda-
ism, Christianity, Islam, Hinduism, and Chinese and Japanese religions), the Religious Studies Program has developed cross-cultural courses dealing with religious symbols, myths, and rituals in written texts, art, theater, and film, and the Internet, as well as thematic courses dealing with such topics as religion and the body, the rise of fundamentalism, religion and science, and religion and violence.
The Program. The major introduces students to the academic study of religion. Students can choose from a broad range of courses both in the program itself and in other departments and programs—history, philosophy, psychology, sociology, anthropology, American studies, classics, and medieval studies. In addition to studying religious thought per se, stu-
dents in the major can also study the way religion has shaped human behavior in such matters as fam-
ily life, gender roles, ethnicity, artistic life, concepts of individual freedom, the pursuit of science, and eco-
nomics. For some students, Religious Studies is an appropriate second major and combines well with anything from philosophy to international agricul-
tural development, political science, and the physi-
cal sciences.

Career Alternatives. Because of the program’s focus on developing critical thinking, writing, and reading skills, students who major in Religious Stud-
ies are well prepared to enter a variety of careers, including teaching, the health professions, law, busi-
ess, and government. In an increasingly global society, knowledge of the world’s religious traditions and practices has become an essential part of a stu-
dent’s education.

A.B. Major Requirements: UNITS

Preparatory Subject Matter ...................... 20

(A) One course from the Religious Studies 1 series .................................................. 4
(B) Four courses from other Religious Studies lower division offerings ........................................ 16

Depth Subject Matter .......................... 40

Religious Studies 100 .......................... 4
Nine upper division Religious Studies courses * ........................................................................ 36
* Four of these courses must be upper division courses related to religion that are offered by other departments and taken with the approval of a Religious Studies adviser.

Total Units for the Major ........................ 60

Recommended. A reading knowledge of a for-

ences language is highly recommended.

Course Equivalents. The major advisers have a list of lower and upper division courses that can be substituted for courses suggested above.

Major Advisers. Consult the Program office.

Minor Program Requirements: UNITS

Religious Studies .......................... 20

Lower division course ........................ 4
Upper division courses .......................... 16
Religious Studies 100 (or 70) required. Some substitutions from other departments or programs allowed with consent of adviser.

Minor Advisers. Same as major advisers.

Honors and Honors Program. A student be-
comes eligible for graduation with honors by meeting the minimum GPA and course requirements established by the College of Letters and Science. Upon successful completion of the additional require-
ments of the College of Letters and Science Honors Program, individual students may be recommended
Courses in Religious Studies (RST)

Lower Division

1. Survey of Religion (4)
Lecture—3 hours; discussion—1 hour. Basic concepts introduced through readings of the primary religious scriptures. Discussion of central ideas (creation, history, war, prophecy, suffering, mysticism, asceticism, karma, reincarnation, moksha, etc.); readings from the Bible, Bhagavad Gita, the Koran, selections from Plato and early Buddhist writings.

GE credit: ArtHum, Div, Wrt | ACGH, AH, DD, OL, VL, WE.—II. (II.)

1A. Pilgrimage (4)
Lecture—3 hours; discussion—1 hour. Introduction to comparative religion, focusing on the theme of pilgrimage in different religious traditions. Not open to students who have taken course 3A. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, VL, WE.—II. (II.)

1B. Death and Afterlife (4)
Lecture—3 hours; discussion—1 hour. Introduction to comparative religion, focusing on the theme of death and the afterlife in different religious traditions. Not open to students who have taken course 3B. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, OL, VL, WE.—I, II, III, IV. (I, II, III, IV.)

1C. Sacrifice (4)
Lecture—3 hours; discussion—1 hour. Introduction to comparative religion, focusing on the theme of sacrifice in different religious traditions. Not available to those who have taken course 3C. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, OL, VL, WE.—I, II, III, IV. (I, II, III, IV.)

1D. Conversion (4)
Lecture—3 hours; discussion—1 hour. Introduction to comparative religion, focusing on the theme of conversion in different religious traditions. Not available to those who have taken course 3D. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—I, II, III, IV. (I, II, III, IV.)

1E. Fundamentalism (4)
Lecture—3 hours; discussion—1 hour. Introduction to comparative religion, focusing on the theme of fundamentalism in different religious traditions. Not available to those who have taken course 3E. Offered irregularly. GE credit: ArtHum or SacSci, Div, Wrt | AH or SS, OL, VL, WE.—II, III, IV. (I, II, III, IV.)

1F. Myth, Ritual, and Symbolism (4)
Lecture—3 hours; discussion—1 hour. Myths, rituals and religious symbols found in a variety of religious traditions including examples from ancient and contemporary religious life. Variety of religious phenomena; validity of different approaches to the study of religion. Not open to students who have taken and received unit credit for course 2. GE credit: ArtHum, Div, Wrt | AH, OL, VL, WE.—I, II, III, IV. (I, II, III, IV.)

1H. Religion and Law (4)
Lecture—3 hours; discussion—1 hour. Methods used in the study of religion, focusing on a particular theme in a number of religious traditions. Offered in alternate years. GE credit: ArtHum | AH, OL, VL, WE.—Vidacs

10. Contemporary Ethical Issues (2)
Lecture—2 hours. Presents challenging, contemporary ethical issues from a multicultural perspective. Rotating topics will include Ethical Eating, Capital Punishment, Environmentalism, Poverty, and Animal Rights. May be repeated for credit. GE credit: ArtHum, Wrt | AH, WE.—III. (III.)

10A. Contemporary Ethical Issues (2)
Discussion—1 hour; extensive writing. Prerequisite: consent of instructor.

2. Survey of Religion (4)
Lecture—3 hours; discussion—1 hour. Introduction to the complex and varied ethical, religious, and cultural meanings that food has had across the centuries and globe. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, OL, VL, WE, WC, WE.—Coudert

12. The Emergence of Judaism, Christianity, and Islam (4)
Lecture—3 hours; discussion—1 hour. History of religion in the ancient Near East and Mediterranean, from the Persian period through the rise of Islam. Emphasis on historical and social contexts of the formation of new traditions, in particular Judaism, Christianity, and Islam. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, OL, VL, WE.—I, III. (III.)

15Y. Reading War/Fighting War (4)
Lecture—2 hours; web electronic discussion—1 hour; extensive writing. Introduction to both religious texts and the effects of war through the lens of literature. Course pays particular attention to Christianity in China, India, Africa, the Middle East and Latin America. Offered in alternate years. GE credit: ArtHum | AH, VL, WE.—II, III, IV. (II, III, IV.)

16. Hebrew Scriptures (4)
Lecture—3 hours; term paper or discussion. Selected texts from the Hebrew Scriptures (Genesis II Chronicles) and review of modern scholarship on the texts from a variety of perspectives (historical, literary, sociological, psychological). Course work is based on an English translation and no knowledge of Hebrew is required. GE credit: ArtHum, Div, Wrt | AH, OL, WE.—I, II. (II.)

23. Introduction to Judaism (4)
Lecture/discussion—3 hours; term paper. Introduction to the study of Judaism using examples from the ritual, art and literature. No prior knowledge of either Judaism or the study of religion is necessary. GE credit: ArtHum, Div, Wrt | ACGH, AH, DD, WC, WE.—II. (II.)

30. Religions of South Asia (4)
Lecture—3 hours; discussion—1 hour. Introduction to South Asian religions, including Hinduism, Buddhism, Islam, Jainism and Sikhism. Travels historical developments from Vedics and their ascetic reformulation of Jainavakya, Siddhartha Gautama, and Mahavira into our global present. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, VL, WE.—I, II, III. (II.)

40. New Testament (4)

42. Religion and Science Fiction (4)
Lecture—3 hours; term paper. Representations of actual and fictional religious movements in science fiction and fantasy writing and film. Examination of the characteristics of religion and religiosity in fictional religious movements; the relationship between religion, science, and technology in modern speculative fiction. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, VL, WE.—I, II, III, IV. (II, III, IV.)

53. Christianity (4)
Lecture/discussion—3 hours; term paper or discussion. Major concepts and practices in the Christian tradition. Survey of the history of Christianity and Christian expansion from antiquity to modern times. Course pays particular attention to Christianity in China, India, Africa, the Middle East and Latin America. Offered in alternate years. GE credit: ArtHum | AH, VL, WE.—II, III, IV. (II, III, IV.)

56. The Qur’an and Its Interpretation (4)
Lecture/discussion—3 hours; extensive writing. The Qur’an, its history, its various functions in the lives of Muslims, and its different interpretations. Quranic themes such as God and humankind, nature and revelation, eschatology and Satan. Islam and other religions; women, gender, and sexuality. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WE.—II, III. (II, III.)

67. Modern Hinduism (4)
Lecture—3 hours; term paper. Historical survey of modern Hinduisms from the early nineteenth century to the present. Topics include Ram Mohun Roy, Sir William Jones, and Mahatma Gandhi, nationalism, post-colonialism and diasporic issues. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, VL, WE.—II. Elmore, Venkatesan

68. Hinduism (4)
Lecture—3 hours; writing. Hindu tradition from ancient to modern times. Multiplicity of religious forms within Hinduism with mention of Jainism, Buddhism, and Sikhism and their relation to the mainstream of Hindu religion. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, VL, WE.—II. Elmore, Venkatesan

69. Introduction to Hindu Mythology (4)
Lecture/discussion—3 hours; term paper or discussion—1 hour. Survey of the major narrative traditions within Hinduism, including epic literature and local stories in oral, textual, visual and performative forms. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, VL, WE.—I.

70. Religion and Language (4)
Lecture/discussion—3 hours; term paper or discussion. Basic tool-kit for studying religious discourse in a variety of traditions. Concentration on the sacred and profane, the wondrous and ordinary, and the mystical and reasonable. GE credit: ArtHum, Div, Wrt | AH, VL, WE.—WC. (WC.) Miller

75. Introduction to Chinese Philosophy (4)
Lecture—4 hours. Introduction to Chinese philosophy from classical pre-modern times; emphasis on basic concepts and analytical and logical conduct; the Age of Philosophers, the Han synthesis, the medieval Buddhist contribution. Offered irregularly.
Lecture/discussion—3 hours; term paper. Constructions of gender and sexuality within one or more religious traditions, premodern and modern. Emphasis on the interaction between religious, medical, and ethical definitions of the human body and sexual behavior. Offered every other year. GE credit: AH, WE. — I, II. (I) Chin

110. Mysticism (4)
Lecture—3 hours; term paper. Prerequisite: one lower division Religious Studies course (except 10, 98, or 99). Historical and descriptive analysis of selected key figures and writings and readings of representative mystical texts. Analytic term paper. Offered every three-four years. GE credit: AH, Wrt | AH, OL, VL, WE. — III. (III) Watenpaugh

112. Christian Origins (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 40. Development of Christianity from the end of the first century through the major controversies of the fifth century. Emphasis on the relationship between the religious movement and the Roman Empire, and issues of early Christian identity and diversity. Offered irregularly. GE credit: ArHum, Div, Wrt | AH, VL, WE. — Chin

113. Dead Sea Scrolls, Apocrypha, and Pseudepigrapha (4)
Lecture—3 hours; term paper. Prerequisite: course 21 or 40 or consent of instructor. Survey of the Dead Sea Scrolls, apocryphal and pseudepigraphical writings of Judaism and Christianity and their historical, social, and religious importance. GE credit: ArHum, Wrt | AH, VL, WE. — II. (III) Vidas

115. The Formation of the Rabbinic Tradition (4)
Lecture/discussion—3 hours; term paper. Prerequisite: courses 21, 40, or 125. Study of the classical rabbinic Jewish texts such as the Talmud and of the social and historical contexts of their production in Palestine and Babylonia. Offered in alternate years. GE credit: Wrt | VL, WE. — II. (III) Chin

122. Christian and Jewish Traditions (4)
Lecture—3 hours; term paper. Prerequisite: courses 40 or 45. Christianity in Europe and the Near East from the year 600 to 1450. Focus on the development of Catholic and Orthodox traditions in ritual, art, and thought, with attention to interactions between regional groups, and Christian interaction with Islam. Offered irregularly. GE credit: ArHum, Div, Wrt | AH, VL, WE. — I, II. Chin

126. The Formation of the Rabbinic Tradition (4)
Lecture/discussion—3 hours; term paper. Prerequisite: courses 21, 40, or 125. Study of the classical rabbinic Jewish texts such as the Talmud and of the social and historical contexts of their production in Palestine and Babylonia. Offered in alternate years. GE credit: Wrt | VL, WE. — II. (III) Vidas

130. Topics in Religious Studies (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 1 or courses 21, 40, or consent of instructor. Thematic study of a phenomenon in more than one religious tradition or of the relationship between religion and another cultural phenomenon. Topics may include archaeology and the Bible, women and religion, religion and violence. May be repeated for credit when topic differs. GE credit: Wrt, WE. — II. (III) Chin

132. Topics in Mediterranean Ancient Religion (4)
Lecture/discussion—3 hours; term paper. Prerequisite: courses 21, 40, or consent of instructor. Theorized study of specific sociological, literary or theological theme through the religious traditions of the ancient Mediterranean/Near East: Greek and Roman religions, Judaism, Christianity, Manichaeism, Manichaicism, etc. Topics may include creation, sacrifice, priesthoods, prophecies, holy books, the afterlife. Offered in alternate years. May be repeated twice for credit when topic differs. GE credit: ArHum, Div, Wrt | AH, VL, WE. — III. (III) Watenpaugh

136. Life, Meaning and Identity (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 1 or 2 or upper division standing. Study of the nature and structure of dreams, myths, and ideals. Offered in alternate years. GE credit: AH, WE. — II. (II) Chin

141A. New Testament Literature: Sympotic Gospels (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 40. Life and thought of the early Church as reflected by the Syoptic Tradition—Matthew, Mark, Luke and Acts. Offered every third year to alternate with 141B, 141C. GE credit: ArHum, Wrt | AH, VL, WE. — I. (II) Chin

141B. New Testament Literature: John (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 40. Life and thought of the early Church as reflected by the Johannine Tradition—the Gospel and letters of John. Offered every third year to alternate with 141A, 141C. GE credit: ArHum, Wrt | AH, VL, WE. — III. (II) Chin

141C. New Testament Literature: Paul (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 40. Life and thought of the early Church as reflected by the Pauline tradition—the letters of Paul. Offered every third year to alternate with 141A, 141B. GE credit: ArHum, Wrt | AH, VL, WE. — II. (II) Chin

143. History of the Bible (4)
Lecture—3 hours; term paper. Prerequisite: course 21 or 40. History of the formation of the Christian biblical canon, with emphasis on differences between Christian traditions; survey of translations and adaptations of biblical narrative in Christianity, Judaism, and Islam, as well as in contemporary culture. Offered irregularly. GE credit: ArHum, Div, Wrt | AH, VL, WE. — II, III. (II, III) Chin

150. Religious Ethics (4)
Lecture/discussion—3 hours; term paper or discussion—1 hour. Prerequisite: upper division standing. Comparative and critical study of the modern phenomena of genocide from ethical, religious and historical perspectives. [Same course as Human Rights 131.] Offered in alternate years. GE credit: ArHum or SocSci, Div, Wrt | AH or SS, VL, WE. — I. (II) Watenpaugh

152. The Bible and Film (4)
Lecture—2 hours; term paper; film-viewing—3 hours. Prerequisite: Humanities 10 recommended. Examination of the uses of biblical narratives in film. Topics include dramatic depictions of biblical stories, the tension between science and religion, allegorical treatment of biblical themes, and the problems of religious conviction. — III. Watenpaugh
156. Religion and the Performing Arts in India (4) Lecture—3 hours; term paper. Prerequisite: course 30, 68, or consent of the instructor. Survey of religion and performing arts in India. Emphasis on the influence of colonialism, nationalism, and regionalism on religious and performing arts. Offered in alternate years. GE credit: ArtHum, Div. Writ | AH, WC, WE.—II. Venkatesan

160. Introduction to Islamic Thought (4) Lecture—3 hours; extensive writing. Prerequisite: course 60 recommended. The development of Islamic thought from the first centuries of Islam to the eighteenth century. Theology, philosophy, ethics, Sufism, historiography, politics, law, historical realism, sectarianism, al-Farabi, al-Ghazali, Ibl Rushd, Tusi, Ibn al-Arabi, Rumi, Molla Sadra, Ibn Khaledun, Ibn Abd al-Wahhab. Offered in alternate years. GE credit: ArtHum or SocSci, Div. Writ | AH, WC, WE.—II. Tezcan

161B. Modern Islam: Authority and Tradition in Process (4) Lecture/discussion—3 hours; term paper. Survey of Islamic thought, social organization, politics from eighteenth century through present. Focus on changing conceptions of authority and tradition. Concentration on Middle East and South Asia with sustained treatment of North American engagements with the Islamic world. Offered in alternate years. GE credit: ArtHum or SocSci, Div. Writ | AH or SS, OL, WC, WE.—II. Miller, Watenpaugh

162. Introduction to Islamic Law (4) Lecture—3 hours; extensive writing. Prerequisite: course 60 recommended. The development of Islamic law in the formative centuries of Islam, ca. 600-1000, as well as its adaptation to changing economic, social, and political conditions in subsequent periods. The role of legal theory, the Shari’a, reformist movements, human rights. Offered in alternate years. GE credit: ArtHum or SocSci, Div. Writ | AH, WC, WE.—I, II. Tezcan

163. The Social Life of Islam (4) Lecture—3 hours; term paper. Introduction to culture and social life in Islamic societies. Focus on the plurality of traditions in Muslim faith, reason, and everyday practice. Special attention to Muslim rituals, values, practices, family life, sexuality, and veiling, and youth culture. Offered in alternate years.—II. Miller

165. Islam in Asia (4) Lecture/discussion—3 hours; extensive writing. Islam as a lived religion in the Indian subcontinent, Central Asia, China, and Southeast Asia. Emphasis on primary sources studied comparatively and historically. GE credit: ArtHum, Div. Writ.—III. Miller

167. Israel (4) Seminar—3 hours; term paper. Origins, causes and ethical challenges of conditions in Israel: larger historical, cultural and ethical dimensions of mass violence, war, liberation, neocolonialism, terrorism and resistance.—III. IV. Watenpaugh

170. Buddhism (4) Lecture—3 hours; term paper. Buddhism in its pan-Asian manifestations, from its beginning in India to its development in Sri Lanka and Southeast Asia, Central Asia, China and Japan; teachings and practices, socio-political and cultural impact. Offered in alternate years. GE credit: ArtHum | AH, VL, WC.—III. Elmore

172. Ch’an (Zen) Buddhism (4) Lecture/discussion—3 hours; term paper. Doctrines and methods of the Ch’an Buddhism, both ancient and modern. Review of ritual techniques, including meditation.—II.

175A. Chinese Intellectual Traditions: Daoist Traditions (4) Lecture/discussion—4 hours. Prerequisite: Chinese 11 or a course in Chinese history recommended. English-language survey of key Daoist texts and scholarship. Topics include Daoist concepts of the cosmos, the natural world, scripture, the body, and immortality; Daoist divinities; Daoism and the state. Offered in alternate years. (Same course as Chinese 100A) GE credit: ArtHum, Div. Writ | AH, WC.—II. Halperin

189. Senior Colloquium (4) Seminar—3 hours; term paper. Prerequisite: consent of instructor. Primarily for seniors in Religious Studies. Discussion in depth of a problem in religion which requires the methods of several disciplines and is important in the encounter between religions.—II. (II.)

190. Seminar (4) Seminar—3 hours; term paper. Prerequisite: consent of instructor; required of all Religious Studies majors. Allows majors to integrate their disciplined study of the field. Emphasis on current or contemporary debates about the methods for analyzing and comparing diverse religious traditions.—II.

194HA-194HB. Special Study for Honors Students (1-5) Independent study. Open only to majors of senior standing who qualify for honors program. Guided research, under the direction of a faculty member approved by the Program Director, leading to a senior honors thesis on a religious studies topic. (P/NP grading only.)

198. Directed Group Study (1-5) Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5) (P/NP grading only.)

Graduate

201. Methods and Issues in Religious Studies (4) Seminar—3 hours; term paper. Prerequisite: graduate standing. Focuses on controversies in the study of religious thought. How is religion best defined? Are there methods or a unique to the study of religion? What does the study of religion contribute to the study of society in general? May be repeated two times for credit when topic differs. Offered in alternate years. (III.)

205. Religion and Media (4) Lecture/discussion—3 hours; term paper. Many communities are finding global media technologies useful for religious practice. This course examines how religious revitalization is historically situated. A phenomenological approach will enable students to situate media and religion within the social and material world of practitioners.—IV. (IV.) Miller

210. Religion and Postcoloniality, or Savages, Civilization, and Spirituality (4) Seminar—3 hours; term paper. Prerequisite: graduate standing. This course examines relations between religion and colonialism. Using specific historical situations it explores some of our theorist theological problems. Students acquire a solid understanding of postcolonial theory and the historical tools to critically engage religion in the present.—III. (III.) Elmore

212. Religion and Violence (4) Seminar—3 hours; term paper. Comparative and critical study of the ideological, cultural, and theoretical relationship between forms of violence and religion and religious practice. Offered in alternate years.—II. (II.) Watenpaugh

215. Topics in the History of Christianity (4) Seminar—3 terms; term paper. Prerequisite: graduate standing. Selected topics in the history of Christianity. May cover issues in Christian thought from antiquity, the Middle Ages, the early modern or modern period. May be repeated for credit when topic differs. Offered irregularly.—I, II, III. (I, II, III) Chin, Coudert

299. Directed Research (1-12) (S/U grading only.)

Professional

396. Teaching Assistant Training Practicum (1-4) Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

The Major Program
The Russian major introduces students to a culture rich in art, music, theater, film, language, and literature. The major offers an opportunity to learn skills needed to enter the fields of foreign affairs, world politics, and international trade, or to begin graduate work in literature, history, cultural studies and international relations.

The Program. The major program instructs students in speaking, understanding, reading, and writing the Russian language. The program also acquaints students with the intellectual and cultural contributions of the Russian world through the study of its literature, traditions, and institutions.

Internships and Career Alternatives. Russian majors may participate in internships where they can serve as translators and interpreters for schools and business firms throughout Northern California. Upon graduation, many Russian majors enter the business world or enter graduate programs in Slavic studies and international relations. The program encourages students to supplement their Russian studies with courses in related fields such as international relations, political science, computer science, cultural studies, or economics in order to maximize their career possibilities.

A.B. Major Requirements:

Preparatory Subject Matter.............0-27

Pre-Fall 2011 General Education (GE): ArtHum—Arts and Humanities; SciEng—Science and Engineering; SocSci—Social Sciences; Div—Domestic Diversity; Writ—Writing Experience
Fall 2011 and on Revised General Education (GE): AH—Arts and Humanities; SE—Science and Engineering; SS—Social Sciences; ACHG—American Cultures; DD—Domestic Diversity; OL—Oral Skills; QL—Quantitative; SL—Scientific; VL—Visual; WC—World Cultures; WE—Writing Experience

Quarter Offered: I—Fall, II—Winter, III—Spring, IV—Summer; 2015-2016 offering in parentheses

Russian 101A, 101B, 101C.............36

Units

0-27

Russian 1-6; or the equivalent.............0-27

Depth Subject Matter...................40-47

Russian 101A, 101B, 101C.............12

497

Russian
498 Russian

Russian 102 or 103 or 104 or 105………. 4
Additional upper division units chosen in consultation from the following selection of Literature and Culture courses taught in Russian and English……………….. 20
Russian 122, 124, 126, 127, 129, 130, 133, 139A, 141, 142, 143, 150
The elective upper-division courses in English can be satisfied in part by one or more courses in History, Political Science, Comparative Literature and other departments after consultation with, and prior approval of, the major advisor. The total of 36 upper-division units may include units earned in the Education Abroad Program.

Total Units for the Major………………….. 36-63

Major Adviser, Olga Stucheburkhov

Minor Program Requirements:

UNITS Russian …………………………………. 20
Russian 101A, 101B, 101C………………….. 12
Other upper division Russian courses……….. 8

Honors and Honors Program. The honors program comprises at least one quarter of study under course 194H, which include a research paper. For details consult the major advisor.

Study Abroad. Students who have completed one or two years of Russian language study can participate in the Education Abroad Program (EAP) in Moscow. Many of our students also participate in summer, semester, and year-long programs sponsored by CIEE and ACTR in St. Petersburg and Moscow.

Prerequisite Credit. Credit normally will not be given for a course if that course is the prerequisite for a course already completed.

Courses in Russian (RUS)

Lower Division

Course Placement. Students who have learned Russian at home must consult the department for placement instructions. Students with two years of Russian in high school normally continue in Russian 2; those with three years, Russian 3; those with four years, Russian 4.

1. Elementary Russian (5)
Discussion—5 hours; laboratory—1 hour. Introduction to Russian grammar and development of all language skills in a cultural context with special emphasis on communication. (Students who have successfully completed Russian 2 or 3 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student’s record, no unit credit will be allowed if the P/NP grade is filed.) GE credit: ArtHum | AH, WC.—I. (II.)

1A. Accelerated Intensive Elementary Russian (15)
Lecture/discussion—15 hours. Special 12 week accelerated, intense summer session course that combines the work of courses 1, 2, and 3. Introduction to Russian grammar and development of all language skills in a cultural context with emphasis on communication. Not open to students who have completed course 1, 2, or 3—IV. (IV.) Arnett

2. Elementary Russian (5)
Discussion—5 hours; laboratory—1 hour. Prerequisite: course 1. Continuation of grammar and language skills developed in course 1. GE credit: ArtHum | AH, WC.—I. (II.)

3. Elementary Russian (5)
Discussion—5 hours; laboratory—1 hour. Prerequisite: course 2. Continuation of grammar and language skills developed in course 2. GE credit: ArtHum | AH, WC.—III. (III.)

4. Intermediate Russian (4)
Discussion—4 hours; laboratory—1 hour. Prerequisite: courses 1 and 2. Grammar review and conversational practice. GE credit: ArtHum | AH, WC.—I. (II.)

5. Intermediate Russian (4)
Discussion—4 hours; laboratory—1 hour. Prerequisite: course 4. Grammar review. Introduction to literature. GE credit: ArtHum | AH, WC.—III. (III.)

6. Intermediate Russian (4)
Discussion—4 hours; laboratory—1 hour. Prerequisite: course 5. Grammar review. Intermediate conversation and continued reading of literature. GE credit: ArtHum | AH, WC.—III. (III.)

98. Directed Group Study (1-5)
Discussion—1-5 hours. [P/NP grading only.]

99. Special Study for Undergraduates (1-5)
[P/NP grading only.]

Upper Division

101A. Advanced Russian (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: course 6 or consent of instructor. Topics in Russian grammar. GE credit: ArtHum | AH, WC.—I. (II.)

101B. Advanced Russian (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: course 101A or consent of instructor. Continuation of course 101A. GE credit: ArtHum | AH, WC.—II. (III.)

101C. Advanced Russian (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: course 101B. Continuation of course 101B. Topics in Russian grammar for the advanced student. GE credit: ArtHum | AH, WC.—II. (III.)

102. Russian Composition (4)
Lecture/discussion—3 hours; tutorial—1 hour. Prerequisite: course 6 or consent of instructor. Practice in writing Russian on a different topic each week. Topics include history, geography, politics, and literature of Russia; comparison of Russian and American lifestyles; current events. Conducted in Russian. GE credit: ArtHum | AH, WC.—II. (III.)

103. Literary Translation (4)
Discussion—3 hours. Prerequisite: course 101C. Translation of Russian literary texts into stylistically equivalent idiomatic English. Offered in alternate years. (III.)

105. Advanced Russian Conversation (4)
Recitation—3 hours; practice—1 hour. Prerequisite: course 6. Intensive conversational practice and discussion based on current events and contemporary topics. Offered in alternate years. GE credit: ArtHum | AH, OL.—II.

122. 19th-Century Russian Literature (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 102. Russian literature from the period between 1800 and the end of the 19th century. Includes Pushkin's verse, poetry of the early 1820s; and the mature period. GE credit: ArtHum | AH, WC.—I. (II.)

124. Twentieth-Century Russian Literature (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 101C when offered in Russian; no prerequisite when offered in English. Study of Russian literature (prose, drama, poetry) from the period between 1900 and the end of the 20th century. May include authors like Y. Olesha, M. Bulgakov, D. Kharns, and L. Petrushevskaia. Offered alternately in English or Russian. Not open for credit to students who have taken courses 123 and 128. GE credit: ArtHum | AH, WC.—I, II, III, (II, III.) Kaminker

126. The Russian Theater (4)
Lecture—3 hours; term paper. Prerequisite: course 101C or consent of instructor. The main works of Russian dramatists from Fontane to the present, including Gogol, Turgenev, Tolstoy, Ostrovsky, Chekhov, Blak, Mayakovsky, Kharns. Conducted in Russian. Offered in alternate years. GE credit: ArtHum | AH, WC.—I.

129. Russian Film (4)
Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: completion of Subject A Requirement. History of Russian film; film and social revolution, the cult of Stalin, dissident visions; film and the collapse of the Soviet empire; gender and the nation in Russian film. Course taught in English; films are in Russian with English subtitles. Offered in alternate years. GE credit: ArtHum | AH, WC.—I. (II.)

130. Contemporary Russian Culture (4)
Lecture—3 hours; term paper. Current trends in Russian culture and the relationship between artists and the government. Topics include recent changes in the cultural scene, postmodernism in literature, visual art, film, and theater. Offered in alternate years. GE credit: ArtHum | AH, WC.—I. (II.)

133. Past-Soviet Literature (4)

139. Pushkin (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 101C or consent of instructor. The course covers three major periods of Pushkin’s poetic and dramatic works, his early Lyceum verse, his poetry of the early 1820s, and the mature period. The course also includes Pushkin’s prose fiction, drama, and journalism. GE credit: ArtHum, Wrt | AH, WC.—I. (II.)

140. Dostoevsky (in English) (4)
Lecture—3 hours. Reading and analysis of Dostoevsky’s principal works such as Crime and Punishment, The Idiot, The Brothers Karamazov, and The Diary. Study of social and political views as reflected in Dostoevsky’s works. Offered in alternate years. GE credit: ArtHum, Wrt | AH, WC.—I. (II.)

141. Tolstoy (in English) (4)
Lecture—3 hours. Study of Leo Tolstoy’s literary evolution and moral quest. Readings include his Confessions, a major novel such as War and Peace or Anna Karenina, and representative works of the late 1870s and early 1880s. Offered in alternate years. GE credit: ArtHum, Wrt | AH, WC.—I. (II.)

142. Women in Russian Culture (4)
Lecture/discussion—3 hours; term paper. Prerequisite: any introductory course in literature. Study of the representation of (and by) women in contemporary Russian fiction and film. Exploration of issues such as family dynamics/maternality, sexuality, work, and women’s relationships to the state. Offered in English. Offered in alternate years. GE credit: ArtHum | AH, WC.—I. (II.)

143. Chekhov (in English) (4)
Lecture/discussion—3 hours; extensive writing. Examination of Chekhov’s major plays, such as The Seagull, Uncle Vanya, The Three

Li Tan, Ph.D., Professor (Plant Sciences)

The Program.
Science and Society is an interdisciplinary program administered by the College of Agricultural and Environmental Sciences that offers students throughout the campus the opportunity to discover the connections that link the social, biological, and physical sciences with societal issues and cultural discourses. Course work examines discovery processes in relation to societal values, public policy and ethics, including issues associated with cultural diversity. Whenever possible, opportunities outside the classroom are included as part of the learning experience.

The Science and Society teaching program serves students of all majors and interests. It can allow lower division students who have not yet declared a major a meaningful context for exploring diverse subject matters. The minor for the program includes, in addition to Social Sciences courses, upper division courses from both the College of Agricultural and Environmental Sciences and the College of Letters and Science in the areas of history and philosophy of science, policy and decision making, communication of science, and culture, ethics and applications.

Minor Program Requirements:

UNITS
Science and Society..........................22-27
Science and Society 1, 2, 5, 15, 20, 30.............2-4

One course from each of the four following areas:

History and Philosophy of Science: Community and Regional Development 118, 162, 163; CS 165; History and Philosophy of Science 150, Nature and Culture 100, Philosophy 107, 108, or 109...........................................4
Policy and Society: Science and Society 120, 147, 150, Consumer Science 100, Environmental Science 120, 160, 165, Policy Sciences 175, Sociology 155, or 181.................................3-4

Communication of Science: Agricultural Education 172, Agricultural Management and Rangeland Resources 101, Community and Regional Development 142, Environmental Science and Policy 126, 128, Fiber and Polymer Science 110, International Agricultural Development 104, Plant Biology 151, Plant Pathology 140, or Sociology 144.................3-4

Regional Development 174, Linguistics 163, Political Science 165............3-4

Culture, Ethics and Applications: Agricultural Management and Rangeland Resources 101, Community and Regional Development 142, Environmental Science and Policy 126, 128, Fiber and Polymer Science 110, International Agricultural Development 104, Plant Biology 151, Plant Pathology 140, or Sociology 144.................3-4

Society and Science...........3

Minor Adviser: D. M. Rizzo

Related Courses.

1. Critical Inquiry into Contemporary Issues

Lecture/discussion—3 hours; discussion—1 hour. Contemporary issues, including global population trends, economic and environmental changes, cultural diversity and biodiversity, nutrition and food safety, fiber and textiles, changing consumer cultures. Inquiry processes emphasize ethics, multiple disciplines, and multiple perspectives. GE credit: SciEng or SocSci, Div Wrt | SE or SS, WS—II. (I.) Caswell-Chen

2. Feeding the Planet: Influences on the Global Food Supply

Lecture/discussion—3 hours. Scientific principles and dynamic interrelationships involved in food production, food processing, nutrition, shelf life and marketing from differing viewpoints. Physical, biological and social science issues influencing the availability and safety of the food supply worldwide. GE credit: SciEng or SocSci, Wrt | SE or SS, SL—II. (II.) Bos-tock, Davis

3. Science, Technology and Society

Lecture—4 hours. Impact of developments in science and technology on the interdependent world and how economics, politics, culture and values affect technological development. Not open for credit to students who have completed Introductory course. Applied Behavioral Sciences 18. Offered irregularly. GE credit: SciEng or SocSci, Wrt | SE or SS.

4. Water in Popular Culture

Film viewing—2 hours; discussion—1 hour. Lecture—1 hour. Importance of water in many aspects of society as revealed in the popular depictions in film. GE credit: SciEng or SocSci, Wrt | SE or SS, SL—II. (I.) Pasternak

5. Pathways to Discovery: Science and Society

Lecture/discussion—3 hours. Highlights a current issue and/or controversy found in contemporary society and looks at how this problem impacts and is affected by the physical, social and biological sciences. Course varies. May be repeated two times for credit. Course not offered every year. GE credit: SciEng or SocSci, Wrt | SE or SS.

7. Terrorism and War

Lecture—3 hours; discussion—1 hour; term paper. Exploration of terrorism and war from science and social sciences perspectives. Terrorist cells and networks; biological, chemical, nuclear, and environmental terrorism; intelligence gathering and espionage; military strategy; genocide; epochal wars; clash of civilizations; nation building; and future global scenarios. GE credit: SciEng or SocSci, Div, Wrt | SE or SS, WE—II. (II.) Carey
7V. Terrorism and War (4)
Web Virtual Lecture—3 hours, tutotial—5 hours, web electronic discussion—1 hour, extensive writing—term paper or discussion. Prerequisite: consent of instructor. Terrorism and war from science and social sciences perspectives: terrorism (terrorist cells, WMD’s, religious extremism), warfare (military strategy, genocide), and statecraft (diplomacy, clash of civilizations, epochal wars). GE credit: SocSci, Wrt | SS, WC, WE.—Carey

8. Water Quality at Risk (3)
Lecture—2 hours, discussion—1 hour. Natural and human activities that impact the quality of water. Quality and water contamination. (Same course as Environment- al and Resource Sciences 8.) GE credit: SciEng or SocSci, Wrt | SE or SS, SL, WE.—II. (II.) Hennes

9. Crisis in the Environment (3)
Lecture—3 hours. Explores contemporary environmental issues by examining the causes, effects and solutions to a wide range of environmental problems facing the global ecosystem. Integrated discussion of political, societal and economic linkages with environmental problems. GE credit: SciEng or SocSci, Wrt | SE or SS, WE.—III. (III.) Dahlgren, Houlton

10. Water, Power, Society (3)
Lecture—2 hours, discussion—1 hour. Water resources issues. How water has been used to gain and win power. Water resources development in California as related to current and future sustainability of water quality and quantity. Roles of science and technology in water problems. (Same course as Hydrologic Science 10.) GE credit: SciEng or SocSci, Wrt | SE or SS, SL—III. (III.) Fogg

11. California Geography (3)
Lecture—2 hours, discussion—1 hour, term paper. Introduction to cultural and physical patterns of California and their relationship to natural resources, biomes, geomorphology, and physiography. Focus on diversity of California’s environments and their impacts on and alterations by human activities. Environmental issues in the State. GE credit: SciEng or SocSci, Wrt | SE or SS, WE.—I. (I.) Richards

12. Plants and Society (4)
Lecture—2 hours, extensive writing—3 hours. Prerequisite: high school biology. Dependence of human societies on plant and plant products. Plants as resources for food, fiber, health, enjoyment and environmental services. Sustainable uses of plants for food, beverages, fuels, fiber, cosmetics, and environmental conservation. Global population growth and future food supplies. Not open for credit to students who have completed Plant Biology 12. GE credit: SciEng or SocSci, Wrt | SE or SS, SL—II. (II.) Arnold

13. Disease and Society (3)
Lecture—3 hours. Limited enrollment. Introduction to the concept of disease, the societal and personal impacts of past, present and future diseases, and the science behind disease discoveries, causes, evolution, diagnosis, treatment, prevention. GE credit: SciEng or SocSci | SE or SS, SL.—II. (II.) Leveau

14. AIDS and Society (4)
Lecture—3 hours, limited enrollment—1 hour. Biology of HIV transmission and AIDS and how a biological agent acts on and influences the structure of contemporary society. Includes the psychology of risk and stigma, gender issues, changes in social relationships and public policy, global implications. GE credit: SciEng or SocSci, Div | Wrt | SE or SS—III. (III.) Radke

18. GIS and Society (3)
Lecture—2 hours, laboratory—3 hours; term paper or discussion—0.5 hours. Geographic Information Systems (GIS): concepts, software and a tool for change in society. Evaluate physical, biological and social impact of GIS in the context of case studies such as land, water and community planning. GE credit: SciEng or SocSci, Wrt | QL, SE or SS, SL, VL—III. (III.) Wallender

20. Genetics and Society (4)
Lecture—3 hours, discussion—1 hour. Not open for credit to students who have completed course 140. Basic concepts and methods of biotechnology, the process of scientific discovery and the public perception of the process; present and future impact of genetics on society. GE credit: SciEng or SocSci, Wrt | QL, SE or SS, SL, WE.—I. (I.), II. (II.) Coaker, Cook, Epstein, Ronald

25. Global Climate Change: Convergence of Biological, Geophysical, & Social Sciences (3)

25V. Global Climate Change: Convergence of Biological, Geophysical, & Social Sciences (3)
Web virtual lecture; web electronic discussion—2 hours, autotutorial—5 hours, extensive writing—2 hours. Causes of global climate change and the biological, geophysical, and social consequences of such change. Methods used by different scientists for predicting future events of global affairs. Decision making under uncertainty. Students cannot take both course 025 and 025V for credit. GE credit: SciEng or SocSci | SE or SS, DD, OI, QL, SL, VL, WC, WE.—I. (I.), II. (II.), III. (III.)

30. Mushrooms, Molds, and Society (3)
Lecture/discussion—3 hours. Fungi as organisms with which humans interact daily, societal issues arising from these interactions. Fungi in medicine, religion, agriculture, and industry, as well as cultural perceptions of fungi. GE credit: SciEng or SocSci, Wrt | SE or SS—II. (II.), II. (II.) Gilchrist, Gordon, Rizza

40. Photography: Bridging Art and Science (3)
Lecture/discussion—2 hours, studio—2 hours. Photography is used to explore the common ground between art and science. Photographic processes, creativity and aesthetics, chaos and order, principles of space, time and light. Photographic interpretation and documentation of materials, and documentation of environment. GE credit: ArtHum or SciEng or SocSci, Div, Wrt | AH or SE or SS, SL, VL, WE—III. (III.) Nathan

42. Earth, Water, Science, Song (3)
Lecture—2 hours, studio—3 hours. Fusion of water and soil science with performing arts. Creative media, computer, and visual arts to communicate scientific concepts and facts through exercises in song writing and poetry. Design, discuss and conduct public performances related to the functioning of the natural world. GE credit: ArtHum or SciEng | AH or SE, SL, VL—III. (III.) Silk

70A. Genetic Engineering in Medicine, Agriculture, and Law (5)
Lecture—5 hours. Historical and scientific study of the impact of genetic engineering in medicine, agriculture, and law, including examination of social, ethical, and legal issues raised. Offered in a distance-learning format. Not open to students who have taken Biological Sciences 2A or equivalent, or course 20. Concurrent enrollment in a two unit seminar course, Plant Biology 98, is required. GE credit: SciEng or SocSci | SE or SS, SL—II. (II.) Harada

90A. Issues in Environmental and Resource Sciences (2)
Seminar—2 hours; two Saturday field trips. Prerequi- site: two years of lower division students. Discussion of historical and current issues in environmental and resource sciences. Lectures, reading and field trips will provide background for selected topics.—I., II. (II.)

90B. Observing and Writing in Biology (2)
Seminar—1 hour; laboratory—1 hour; term paper. Students will observe the interactions between micro- scopic organisms, conduct simple laboratory experi- ments, describe and analyze observations, and discuss scientific observations and writing.

90C. Herbal Medicine: Relevance for the 21st Century (2)
Seminar—2 hours. Medicinal usage of plants from botanical, historical, and cultural perspectives. Broad contexts of holistic and scientific paradigms for understanding herbal medicine. Saturday field trip to teach herb identification.—II. (II.)

90D. Saving Endangered Plant Species: Problems and Prospects (2)
Seminar—2 hours. Endangered plant species illustrate the value of conservation biology. Topics include societal issues and plant germplasm conser- vation, comparisons to animal conservation issues, and the economics of and justification for preserving endangered plants.—I. (I.) Parfitt

90E. Biotechnology—a New Era, a New Challenge (2)
Seminar—2 hours. Animal biotechnology and its applications. Discussion topics include potential soci- etal impacts of various technologies, factors shaping public opinion, and ethical and moral questions aris- ing from new biotechnology applications.—I. (I.) Murray

90F. Food Distribution in a Hungry World (2)
Seminar—2 hours. The biological, technological, environmental, and socioeconomic factors related to food distribution systems at local, regional, national, and international levels. The potential for increasing world food supply by reducing losses between har- vesting and consumption.—I. (I.)

90G. Science, Society, and the Environment (2)
Seminar—2 hours. Contemporary environmental issues, scientific approaches to addressing these issues, and accompanying societal and ethical con- siderations.—II. (II.) Wilson

90X. Lower Division Seminar (1-4)
Seminar—1-4 hours. Prerequisite: lower division standing and consent of instructor. Examination of a special topic in Science and or Engineering; required readings, discussions, written assignments, or special activities such as fieldwork, laboratory work, etc. May be repeated for credit. Limited enrollment—I. (I.), II. (II.), III. (III.)

91A. Explorations in Science and Society: Cultures and Identities (2)
Seminar—1 hour, extensive writing or discussion—1 hour. Prerequisite: participation in the summer Spe- cialized Transfer Enrichment Program (STEP) or con- sent of instructor; course 1 concurrently. Exploration of linkages among identity and culture, multi-disci- plinary inquiry, and agricultural and environmental science issues.—I. (I.)

91B. Explorations in Science and Society: Leadership and Collaboration (2)
Seminar—1 hour, extensive writing or discussion—1 hour. Prerequisite: course 91A or consent of instruc- tor. Extends understanding of culture and identity to issues of leadership, collaboration, and social action in science and society. Includes a mandatory two and half day retreat.—II. (II.)

91C. Explorations in Science and Society: Engagement (2)
Seminar—1 hour; internship—3 hours. Prerequisite: course 91B or consent of instructor. Explorations of the concept of engagement in science and society from philosophical and practical perspectives. Expla-
rational of the concept of engagement based on lectures, self-reflection, discussions and three hours of K-12 school internships per week. (III, III)

92. Internship in Science and Society (1-12)
Internship—3-36 hours. Prerequisite: lower division standing and consent of instructor. Supervised internship on and off campus, in the community, or in institutional settings. (P/NP grading only.)

97. Tutoring in Science and Society (2-3)
Discussion/lecture—6.9 hours. Prerequisite: lower division standing; completion of course being tutored; consent of instructor. Tutoring in undergraduate Science and Society courses. Assisting with leading discussion groups under supervision of instructor(s) and teaching assistants. Acting as liaison between the students and course instructor(s) to facilitate completion of the course. May not be repeated. (P/NP grading only)

98. Directed Group Study (1-5)
Prerequisite: consent of instructor. (P/NP grading only)

99. Special Study for Undergraduates (1-5)
Discussion—3-15 hours. Prerequisite: lower division standing and consent of instructor. (P/NP grading only)

Upper Division

110. Applications of Evolution in Medicine, Human Behavior, and Agriculture (4)
Lecture—2 hours; discussion—1 hour; term paper. Prerequisite: Biological Sciences 2A, 2B, and 2C. Class limited to 150 students. Applications of evolutionary biology in medicine, human behavior, and agriculture. Examination of the imprint of evolution on the human life cycle from conception to death. GE credit: SciEng or SocSci, Wrt | SE or SS.—II. Wilt; III. (III) Rosenheim

120. Science and Contemporary Societal Issues (3)
Lecture/discussion—3 hours. Prerequisite: upper division standing. Study of a contemporary societal issue/problem emphasizing critical thinking with information drawn from several disciplines. Multiple instructors illustrate the necessity of an interdisciplinary and cooperative approach in solving important issues. Topic will vary. May be repeated one time for credit. Course not offered every year. GE credit: SciEng or SocSci, Wrt | SE or SS.—III. (III)

121. Global Poverty: Critical Thinking and Taking Action (4)
Lecture—3 hours; discussion—1 hour. Social science and engineering analysis of causes and effects of world poverty and of policies to reduce it via economic growth, aid, and community-level interventions, e.g., in potable water, sanitation, lighting, small scale energy, irrigation, health and micronutrient. GE credit: SocSci | SS, WC.—II. (II) Jarvis, Kornbluh

130. Contemporary Leadership (4)
Lecture—3 hours; seminar—1 hour. Prerequisite: consent of instructor. Leadership, including issues, skills, and practices as they relate to individuals, organizations, diverse social settings and communities. Written and verbal communications, personality styles for collaborative work, and ethics. Limited enrollment. GE credit: OL—II, III. (II, III) King

125S. Biodiversity and Society in South Africa (4)
Lecture/discussion—3 hours; term paper or discussion—2 hours; fieldwork—2 hours. Prerequisite: acceptance into the quarter abroad program “Biodiversity & Conservation in South Africa” and attendance in South Africa. Biodiversity in social context of South Africa: race, politics and conservation; use of indigenous plants and animals, weeds, water issues, nature conservation and other field trips. Offered irregularly. GE credit: SciEng or SocSci, Div, Wrt | SE or SS.—II. Cranston, Gullan

140. Genetics and Social Issues (4)
Lecture/discussion—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 1A, 1B, 1C. Social issues arising from the development and use of modern methods of biotechnology. Presentation, evaluation, and critical discussions of the present and future impact of genetechnocultures on society. Not open for credit to students who have completed course 20. GE credit: SocSci, Wrt.—II. (II) Epstein

190X. Science & Society Seminar (1-4)
Seminar—1-4 hours. Prerequisite: upper division standing and consent of instructor. In-depth examination at an upper division level of a special topic in Science and Society. Emphasis upon student participation in learning. Emphasis upon student participation in learning. May be repeated for credit. Limited enrollment. (P/NP grading only)—I, II, III. (II, III)

192. Internship in Science and Society (1-12)
Internship—3-36 hours. Prerequisite: upper division standing and consent of instructor. Supervised internship on or off campus, in the community, or in institutional settings. (P/NP grading only)

197. Tutoring in Science and Society (1-5)
Tutoring—3-15 hours. Prerequisite: upper division standing; completion of course being tutored or the equivalent. Tutoring of students in Science and Society courses. Assistance with discussion groups and laboratory sections under supervision of instructor. May be repeated for credit. GE credit: SciEng or SocSci, Div, Wrt.—II. (II, III)

198. Directed Group Study (1-5)
Prerequisite: consent of instructor. (P/NP grading only)

199. Special Study in Science and Society (1-5)
Prerequisite: upper division standing and consent of instructor. (P/NP grading only)

Graduate

298. Group Study (1-5)
Prerequisite: consent of instructor. May be repeated for credit when topic differs. (S/U grading only)

299. Graduate Research (1-12)
Prerequisite: graduate student and consent of instructor. May be repeated for credit. (S/U grading only)

Professional

390. Teaching Methods in Science and Society (1)
Discussion—1 hour. Prerequisite: graduate level and consent of instructor. Practical experience in methods and problems related to teaching Science and Society courses. Designed for credit if tutoring another Science and Society course. (P/NP grading only)

Daniel Stolzenberg, Ph.D. (History)
Madhavi Sunder, J.D. (School of Law)

The Major Program

The Science and Technology Studies (STS) major is designed to facilitate the analysis and synthesis of science, technology, and medicine in a way that actively creates connections between the varieties of perspectives and concerns in the humanities and the sciences. The STS major takes science, technology, medicine, and their social, political, economic, and cultural contexts as its objects of study. As such, the STS major draws on the research programs of faculty in a wide range of departments, including American Studies, Anthropology, Art and Visual Arts, Environmental Science and Policy, History, Philosophy, Political Science, Science and Technology Studies, and Sociology. Students in STS pursue a broader understanding of science than is available within traditional science majors and is also suitable for students in the social sciences interested in interpreting science, technology and medicine as part of society and culture.

The Program

Graduation with a degree in Science and Technology Studies requires completion of introductory courses in the social sciences and humanities, in the natural sciences, and introductory, laboratory and seminar courses in STS. Upper division work includes twenty units from each of two different, complementing areas of concentration ("modules") and twelve units (plus prerequisites) providing depth, concentration and field work opportunities in the sciences. The modules are: (1) Cultural Studies of Science and Technology; (2) Ethics, Values, and Science Policy; (3) History and Philosophy of Science; IV. Medicine, Science, Society, and Culture. Courses in the modules require careful selection to make the best use of the STS major. Prerequisites for courses in the sciences can be extensive and require substantial advance planning. Students are encouraged to take advantage of faculty and staff advising to plan their course of study.

Career Alternatives

The STS major will create an opportunity to analyze science and allied practices from historical, philosophical, sociological, political, anthropological, and cultural perspectives. STS prepares students for careers that must address the broader social, cultural and political ramifications of science, technology, and medicine such as law, journalism, public policy, economics, government, and science education. Careers that students of STS from many universities nationwide have pursued, in addition to academic careers in STS, include employment in: systems engineering, web design, science museums, non-profit health organizations, government service, libraries, law, medicine, veterinary medicine, dentistry, nursing, teaching, public health administration, media companies, management consultant practice, and the Peace Corps.

A.B. Major Requirements

Preparatory Subject Matter ............ 16
Science and Technology Studies 1 ............. 4
Science and Technology Studies 20 ....... 4
Eight units selected from American Studies 1A, 1E, 5; Environmental Studies 1; Humanities 3; Philosophy 30, 31, 32; Science and Society 1, 2, 5; Science and Technology Studies 32; Lower-division science courses from the Approved Science Electives list below........... 8

Depth Subject Matter ...............44-46
Twelve units each from two of the following modules: .... 4
(1) Cultural Studies of Science and Technology; American Studies 101G, 158; Cinema and Technocultural Studies 151; ACHN—American Cultures, DD—Domestic Diversity, DL—Diverse Literatures, DL—Domestic Diversity, Div—Domestic Diversity; Wrt—Writing Experience
Pre-Fall 2011 General Education (GE): ACHN—Arts and Humanities; SciEng—Science and Engineering; SocSci—Social Sciences; Div—Domestic Diversity; Wrt—Writing Experience
Fall 2011 and on Revised General Education (GE): AH—Arts and Humanities; SE—Science and Engineering; SS—Social Sciences; ACHN—American Cultures; DD—Domestic Diversity; OL—Oral Skills;QL—Quantitative, SL—Scientific, VL—Visual, WC—World Cultures, WE—Writing Experience

Quarter Offered: I-Fall, II-Winter, III-Spring, IV-Summer, 2015-2016 offering in parentheses
Courses in Science and Technology Studies (STS)

Lower Division

1. Introduction to Science, Technology, and Medicine Studies (4)
   Lecture—3 hours; discussion—1 hour. History, philoso-
   phy, sociology, politics, and cultural studies of science,
   technology, medicine. Emphasis on history and its
   impact on the development of science. GE credit: SocSci
   or SciEng. Wrt | SS, WE. —Carroll

   Lecture/discussion—3 hours; extensive writing. Pre-
   requisite: course 1 recommended. Methodological issues
   concerning the historical, philosophical, scientific,
   logical, ethical, and political analysis of science, tech-
   nology, and medicine. Illustrated with case studies to
   demonstrate different methods of analysis. GE credit:
   SciEng or SocSci, Wrt | SS, WE. —Carroll

32. Drugs, Science and Culture (4)
   Lecture—3 hours; discussion—1 hour. Drugs, politi-
   cs, science, and society in a cultural context. Emphasis
   on roles of science, government and the media in
   shifting attitudes toward alcohol, mari-
   juana, prozac and other pharmaceuticals, drug
   laws, war on drugs and global trade in sugar,
   opium, cocaine. [Same course as Anthropology 32.] GE
   credit: SciEng, Div, Wrt | SS, VL, —Dumit

92. Internship (1-12)
   Internship—3.36 hours. Prerequisite: consent of
   instructor. Work experience off and on campus in all
   subject areas offered in the program in Science &
   Technology Studies under the supervision of a mem-
   ber of the faculty. May be repeated up to 12 units for
   credit. (P/NP grading only.) GE credit: SS.

99. Special Study for Undergraduates (1-5)
   Prerequisite: consent of instructor (P/NP grading
   only.) GE credit: SS.

Upper Division

108. Intellectual Property in Science (4)
   Lecture/discussion—4 hours. Prerequisite: course 1,
   or other Social Science or Humanities writing course.
   Historical and conceptual framework for con-
   temporary debates about intellectual property and
   science. Topics include US patent system and copy-
   right law, intellectual property and industrial
   policy, credit in academic and industrial science,
   role of IP in global knowledge. GE credit: SocSci,
   Wrt | ACGH, SS.

109. Visualization in Science (4)
   Lecture—3 hours; extensive writing or discussion—1
   hour. Prerequisite: course 1 or 20 or Anthropology
   2. Anthropological approaches to scientific visual-
   ization techniques, informatics, simulations. Exam-
   ining the difficulty of understanding the work involved in
   producing them, critical assessment of their power and
   limits, espe-
   cially when visualized in a reduced socio-
   nomic context. Offered in alternate years. [Same course
   as Anthropology 109.] GE credit: SocSci, Wrt | SS,
   VL, WE. —Dumit

120. Religion, Magic and Science (4)
   Lecture—3 hours; extensive writing. Religion, magic,
   and science from the Middle Ages to the present. Ac-
   knowledged the Native American roots to the present.
   (Same course as Anthropology 121.) GE credit: SocSci,
   Div, Wrt | ACGH, DD, SS.

121. Special Topics in Medical Anthropology (4)
   Lecture/discussion—4 hours. Prerequisite: course 1 or
   Anthropology 2. Introduction to medical anthropo-
   logical topics. Topics include anthropological analy-
   sis of bio-medicine, psychiatry, systems of knowl-
   edge and healing, the body, emotions, and clinical
   encounters in a cross-cultural perspective. [Same course
   as Anthropology 121.] GE credit: SocSci, Div,
   Wrt | SS, WE.

129. Health and Medicine in a Global Context (4)
   Lecture/discussion—4 hours; term paper. Prerequi-
   site: course 1 or Anthropology 2. Recent works in
   medical anthropology and medical studies of
   medicine dealing with global health issues such as
   AIDS, pandemics, clinical trials, cultural differences
   in illnesses, diabetes, organ trafficking, medical tech-
   nology and delivery, illusory narratives, and oth-
   ers. [Same course as Anthropology 129.] GE credit:
   SocSci, Div, Wrt | SS. —Dumit

130A. From Natural History to the History of Nature (4)
   Lecture/discussion—3 hours; term paper. Prerequi-
   site: History 135A recommended. Evolution and
descent of natural history as a discipline from Aristo-
   tile to Linnaeus. Considers ancient views of nature
   and human nature and the development of modern
   science and technology. GE credit: ArtHum or SciEng,
   Wrt | AH or SE, WE.

130B. History of Modern Biology (4)
   Lecture/discussion—3 hours; term paper. Prerequi-
   site: course 130A recommended. Development of modern
   biological thought from pre-Darwinian roots to the
   present. Considers emerging scientific specialties and
   consolidation of biological theory around evolutionary
   ideas. History of allied fields such as genetics, paleon-
   tology, embryology, ecol-
   ogy, systems and molecular biology. GE credit:
   ArtHum or SciEng, Wrt | AH or SE, WE.

131. Darwin (4)
   Lecture—3 hours; term paper. Prerequisite: upper
   division standing or consent of instructor. Students
   will explore the life and works of Charles Darwin.
   Students will trace the development of evolutionary
   thinking before and after the Origin of Species to
   appreciate its place in Victorian society and in the corpus
   of Darwin’s thought. GE credit: ArtHum or SciEng,
   Wrt | AH or SE, WE. —Griesemer

151. Media Theory (5)
   Lecture—2 hours; discussion—1 hour; film view-
   ing—3 hours; extensive writing. Critical and theoret-
   ical approaches to the emergence of new
   technologies since the invention of photography.
   Examine various approaches to media (formalist, semiotic, structuralist, Frankfurt School, cybernetics,
   visual and gamer theory). (Same course as Cinema
   and Technocultural Studies 150.) GE credit: AH
   or SS, OL, VL, WE.

150. Gender and Science (4)
   Lecture/discussion—3 hours; term paper. An inter-
   disciplinary approach to the relations between gen-
   der and science. Topics include the biological and
   cultural construction of sexual difference, the role
   of women as practitioners of science, and feminist
   approaches to science. GE credit: SocSci, Div,
   Wrt | ACGH, DD, SS.

   Lecture—3 hours; extensive writing or discussion—1
   hour. Historical, aesthetic, and critical approaches to
   how information technologies produced ghost effects
   or a sense of terror in response to new media like
   the photograph, gramophone, film, typewriter, com-
   puter, Turing Machine. Focus on technological
   media transforms sense perception. Offered in alternate
   years. [Same course as Technocultural Studies
   160.] GE credit: ArtHum or SocSci | ACGH, AH or SS,
   VL, WE. —Rawito-Bogdan

161. Time: Measurement and Mechanism (4)
   Lecture/discussion—3 hours; term paper. Prerequi-
   site: course 1. Cultural concepts of time; units and
   instruments of time measures; historical differen-
   ces in the social organization of time; time measurement in pre-20th century science. GE credit:
   SocSci, Wrt | SS, WE.
162. Surveillance Technologies and Social Media (4)
Lecture—3 hours; film viewing—3 hours; term paper. Preerequisite: Technocultural Studies 1 or course 20. Study of the ubiquitous presence of CCTV, face recognition software, global tracking systems, biosensors, and data mining practices that have made surveillance part of our daily life. Exploration of the boundary between security and control, information and spying. [Same course as Cinema & Technocultural Studies 162.] Offered in alternate years. GE credit: AGGH, AH or SS, OL, VL, WE—Ravotto

163. History of Communication Technologies (4)
Lecture/discussion—3 hours; term paper. History of communication technologies from the late Middle Ages to the 20th century. Questions of technology, knowledge, power and culture. Particular attention to questions about information and truth. Offered in alternate years. GE credit: SacSci SS, WE.

164. Writing Science (4)
Lecture/discussion—3 hours; extensive writing. Pre-requisite: English 3 or course 1, or equivalent. Texts and writing practices in the production of scientific knowledge. Surveys the literary structure of scientific arguments; history of scientific genres; rhetoric and semiotics in scientific culture; graphical systems in the experimental laboratory; narratives of science, including science fiction. [Same course as English 164.] Offered in alternate years. GE credit: ArtHum, Wrt | AH, SL, WE—Milburn

165. Built Environments (4)
Lecture—3 hours; extensive writing. Built environments, which are designed to support forms of life. Their role as carriers of cultural memory and in turning knowledge of nature into social assets. Historical constellations of knowledge, social order, and power. Offered in alternate years. GE credit: SocSci, Wrt | SS.

173. Science Fiction (4)
Lecture/discussion—3 hours; extensive writing. Pre-requisite: course 3 or Science and Technology Studies 1, or equivalent. The literary modes and methods of science fiction. Representative texts, authors, and themes of the genre—e.g., time travel, alternative universes, and utopias. Relations of science fiction to science, philosophy, and culture. [Same course as English 173.] GE credit: ArtHum, Wrt | AH, WE.

175. Laboratory Studies Lab (4)
Lecture/discussion—4 hours. Pre-requisite: upper division standing or consent of instructor. Hands-on training in Science and Technology Studies fieldwork, interviewing, archival research and data analysis. Review of laboratory studies literature, informed consent procedures, ethics, and care of the data. Individual and group projects possible. GE credit: SocSci SS, WE.

176. Sociology of Knowledge, Science, and Scientific Knowledge (4)
Lecture—3 hours; term paper or discussion—1 hour. Pre-requisite: upper division standing preferred. Social, cultural, and historical dimensions of knowledge, especially scientific knowledge. Problems, methods, and theory in sociology of scientific knowledge: laboratory and historical case studies. Scientific and technical knowledge in institutional and organizational contexts. [Same course as Sociology 176.] GE credit: SocSci SS, WE—Carroll

180. Topics in History and Philosophy of Science (4)
Seminar—3 hours; term paper. Pre-requisite: course in History and Philosophy of Science or other course work relevant to topic. In depth treatment of selected topics in the history and philosophy of science. Possible topics include history of modern physics, history of molecular biology, science and society, science and power, scientific explanation, technology and culture, theory testing. May be repeated for credit with consent of instructor.

190. Seminar in Science, Technology and Medicine Studies (4)
Lecture/discussion—3 hours; term paper. Prerequisite: open to junior and senior Science and Technology Studies majors only. Intensive reading, discussion, research and writing by small groups in selected topics of science, technology, and medicine studies scholarship. Emphasis on individual research projects.

192. Internship (1-12)
Internship—3-36 hours. Prerequisite: consent of instructor. Work experience off and on campus in all subject areas offered in the program in Science & Technology Studies under the supervision of a member of the faculty. May be repeated three times for up to 12 units for credit. [P/NP grading only.]

198. Directed Group Study (1-5)
Prerequisite: consent of instructor. [P/NP grading only.]

199. Special Study for Advanced Undergraduates (1-5)
Prerequisite: consent of instructor. [P/NP grading only.]

Graduate

250. History and Philosophy of Science (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Interdisciplinary seminar in the history and philosophy of science. Focuses on issues such as historiography, methodology, and the conceptual foundations of science. May be repeated for credit with consent of instructor.

298. Group Study (1-5)
Prerequisite: consent of instructor. [S/U grading only.]

299. Research (1-12)
Prerequisite: consent of instructor. [S/U grading only.]

Professional

396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated for credit. [S/U grading only.]

Sexuality Studies

[College of Letters and Science]
http://wgs.ucdavis.edu/sexualitystudies

The interdisciplinary minor in Sexuality Studies offers students a unique opportunity to study the human-made aspects of sexual identities, desires, and practices, which differ across cultures and historical moments, and into biology or anatomy. The minor in Sexuality Studies core and elective courses have sexuality at their center. Additional courses invite students to integrate their study of sexuality with issues of gender; race and ethnicity; class; politics and activism; literature and popular culture; law; and other domains. The minor is sponsored by the Program in Women and Gender Studies.

Minor Program Requirements:

Sexuality Studies ........................................ 18-20

One Core Course: Various

Two Elective courses from the following:
- Anthropology 139 BN, English 180, Epidemiology and Preventative Medicine

163, History 184, Human Development (College of Letters and Science), Sociology 15, Women and Gender Studies 7, 7B

Two Elective courses from Field B [below] or seminars/individual study by petition to achieve a total of 18-20 units.

American Studies 115, Asian American Studies 112, Chicano/a Studies 160, English 166, German 145, History 132, Political Science 152, Sociology 120, Women and Gender Studies 140, Women and Gender Studies 179

Restrictions.

(A) Students may take no more than one lower division course to satisfy requirements for the minor.

(B) To satisfy the interdisciplinary component of the minor, students must either split their coursework roughly equally between two programs/departments or take coursework in at least three programs/departments.

(C) Students may petition the minor adviser to accept Special Topics courses and Capstone/Senior Seminars as additional courses, as long as their course of study follows the minor’s lower-division restriction and interdisciplinary requirements.

(D) Students may petition the minor adviser to accept up to four units of registered individual study, group study or internship towards the minor program, as long as their course of study follows the minor’s lower-division restriction and interdisciplinary requirements.

Advising.
Program in Women and Gender Studies, 2222 Hart Hall 530-752-6429

Social and Ethnic Relations

[College of Letters and Science]

The interdisciplinary minor in Social and Ethnic Relations explores the racial, ethnic, class and gender aspects of human relations in the modern world. Students study human societies and cultures from a multi-ethnic perspective and across established academic departmental lines. The minor is jointly sponsored by African American and African Studies, Asian American Studies, Native American Studies, and Women and Gender Studies.

Minor Program Requirements:

Social and Ethnic Relations.......................... 24

Select one course from each of the following six groups to total 24 units:

(A) African American and African Studies 100, Anthropology/Native American Studies 134, Women’s Studies 102

(B) African American and African Studies 123, 133, 145A

(C) Asian American Studies 1, 2, 100, 110, 130

(D) Chicana/o Studies 130, 132

(E) Native American Studies 1, 10, 115, 119, 130A, 130B, 130C, 157, 180

(F) Women’s Studies 103, 104, 180

Restrictions. (A) Courses applied toward the satisfaction of a major may not also be offered in satisfaction of the minor. (B) No more than four units (one course) may be lower division.

Advising. Contact the Program in Women and Gender Studies in 2222 Hart Hall 530-752-4686.

Contact the Program in Asian American Studies, 3131 Hart Hall, ethnicstudies@ucdavis.edu.

Kenneth Thompson, Ph.D., Professor Emeritus

The Program of Study
The Program in Social Sciences promotes the development of innovative curricular initiatives across the social sciences, including offering broadly conceived, integrative undergraduate-level and graduate-level courses. Faculty affiliated with the program are often engaged in interdepartmental teaching and research.

Social Theory and Comparative History (STH)

Graduate

250. Research in Social Theory and Comparative History (4)
Seminar—3 hours, term paper. Prerequisite: admission to Social Theory and Comparative History Designated Emphasis. Theoretically informed research in comparative history. Students read exemplary works and learn to frame their own research projects. Presentations include Center for History, Society, and Culture faculty and visitors discussing current research. —III. (I.)

290. Advanced Topics in Social Theory and Comparative History (4)
Seminar—2 hours, term paper. Prerequisite: admission to Social Theory and Comparative History Designated Emphasis. Theoretically informed research in comparative history. Students read exemplary works and learn to frame their own research projects. Presentations include Center for History, Society, and Culture faculty and visitors discussing current research. —II, III. (I.)

295. Advanced Group Research in Social Theory and Comparative History (1)
Discussion—1 hour. Prerequisite: consent of instructor and History 204 or Sociology 242A. Interdisciplinary study of particular substantive problems in social science, including comparative history. Topics vary. —II, III. (I., II, III.)

296. Theory and Society Journal Editorial Workshop
Workshop—1 hour, independent study—3 hours. Reading and offering workshop critiques of papers submitted for publication. Reading and discussion of other relevant work in history and the social sciences. May be repeated for credit up to 36 units or with consent of instructor. (S/U grading only)—I, II, III. (I., II, III.)

The Major Programs
Sociology is the study of human society in all its manifestations. Its aim is to discover the process and structure of human interaction, to identify the main forces that sustain or weaken social groups, and to determine the conditions that transform social life. Sociology, like any science, is a disciplined, integrative perspective, but incorporates a multidisciplinary field of study. The major introduces students to a range of theories and methods that social scientists use in the analysis of organizations.

Career Opportunities. In the Sociology major, the General option is for students desiring a solid liberal arts education as well as those interested in graduate work in the social sciences. Options in Law and Society and Social Services prepare students for careers in such areas as law, corrections, social work, or counseling. The Comparative Studies and World Development emphasis prepares students for graduate training leading to careers in international fields. Majors in Sociology–Organizational Studies will be prepared for a variety of career options, particularly in the field of management. The major specifically meets entry requirements for programs of professional training leading to a Master’s degree in public or private management, and may also lead to further study in any of the disciplinary areas incorporated in the major.

Sociology

A.B. Degree Requirements:
General emphasis:

Preparatory Subject Matter............ 29-30
Sociology 1, 46A, and 46B............. 14
Sociology 3, 4, 5, 11, 25, 30A, or 30B... 13
Anthropology 2 or 20................. 4
Select from History 4A, 4B, 6, 7A, 7B, 7C, 7, 9, 9B, 10C, 15, 17A, 17B............... 4
Select from Philosophy 5, 14, 24, 25... 4

Depth Subject Matter................. 44
(A) Sociology 100....................... 4
(B) Select one course from each of the following four categories:

1. Individual, Culture and Society: Sociology 125, 126, 135
2. Stratification and Social Differentiation: Sociology 130, 132, 140
3. Organizations and Institutions: Sociology 118, 131, 146, 180A
4. Social Dynamics: Sociology 104, 141, 143A, 170
(C) Select three upper division courses from one of the following clusters, not counting courses taken to fulfill requirement B: 12

(2) Stratification and Social Differentiation: Sociology 118, 128, 129, 130, 132, 133, 134, 140, 145A, 145B, 171, 172, 185, 188, and not more than one of the following courses: African American and African Studies 123; Asian American Studies 100; Chicana/o Studies 110; or Native American Studies 115
(3) Organizations and Institutions: Sociology 118, 124, 131, 133, 139, 144, 146, 149, 150, 151, 154, 155, 159, 160, 180A, 180B, 181, 182, 183, 185
(4) Social Dynamics: Sociology 104, 123, 125, 138, 141, 143A, 145A, 145B, 147, 148, 156, 157, 158, 170
(D) Student-initiated Thematic Cluster—developed with a faculty advisor and approved by the Sociology Undergraduate Curriculum Committee
(E) One additional elective upper division Sociology course not already used to fulfill requirement C

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer. 2015-2016 offering in parentheses.

Pre-Fall 2011 General Education (GE): ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; DivD=Diverse Domesticity; Wri=Writing Experience

Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SE=Science and Engineering; SS=Social Sciences; ACH=American Cultures; DD=Diverse Domesticity; OL=Oral Skills; QL=Quantitative; SL= Scientific; VL=Visual; WC=World Cultures; Wri=Writing Experience

Major Advisers. Consult the Departmental Advising office in 1282 Social Sciences and Humanities
Building.

Minor Program Requirements:
UNITS
Sociology..............................................20
Choose any five upper division courses in
Sociology, except the following: SOC190X,
191, 192/193, 194H, 195, 197T, 198,
199
Minor Advisers. Consult the departmental Advising office in 1282 Social Sciences and Humanities
Building.
Honors Program. An Honors Program is available to Sociology and Sociology-Organizational
Studies majors who have demonstrated excellence in
their field of study. To be eligible for the program,
students must have a grade-point average of 3.500
in the major and the recommendation of a faculty
sponsor familiar with their work. In addition to meeting the standard major requirements, students are
encouraged to take a 199 course with their sponsor
in the spring of their third year, prior to the seminar
courses. Honors students write an honors thesis and
take two quarters (8 units) of Honors coursework
(SOC194H). Successful completion of the Honors
Program, when combined with College GPA requirements, enables the student to graduate with High or
Highest Honors. Students should apply for the program before they begin their fourth year.
Graduate Study. The Department offers programs
of study and research leading to the M.A. and Ph.D.
degrees in sociology. Further information regarding
graduate study may be obtained at the Department
office or on our website.
Graduate students in Sociology have the opportunity
to pursue designated emphases in Critical Theory,
Social Theory and Comparative History, Native
American Studies, Economy, Justice and Society, or
Feminist Theory and Research. See these headings
for further details on these interdisciplinary programs.
Graduate Advisers. Consult the Graduate Program Coordinator in 327 Young Hall.

Courses in Sociology (SOC)
Lower Division
1. Introduction to Sociology (5)
Lecture—4 hours; discussion—1 hour. Principles and
basic concepts of sociology. The study of groups,
culture, collective behavior, classes and caste, community and ecology, role, status, and personality. GE
credit: SocSci | ACGH, DD, SS.)
2. Self and Society (4)
Lecture—3 hours; discussion—1 hour. Principles and
basic concepts of sociological social psychology.
Includes the study of the character of the self, identity, roles, socialization, identity change, emotion
and social interaction. GE credit: SocSci,
Wrt | ACGH, DD, SS.
3. Social Problems (4)
Lecture—3 hours; discussion—1 hour. General
sociological consideration of contemporary social
problems in relation to sociocultural change and programs for improvement. GE credit: SocSci,
Wrt | ACGH, DD, SS.
4. Immigration and Opportunity (4)
Lecture—3 hours; discussion—1 hour or term paper.
Social and demographic analysis of immigration:
motives and experiences of immigrants; immigration
and social mobility; immigration, assimilation, and
social change; multicultural societies. Detailed study
of immigration into the U.S., with comparative studies of Europe, Australia, and other host countries.
GE credit: SocSci, Div, Wrt | ACGH, DD, SS, WC.

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2015-2016 offering in parentheses
Pre-Fall 2011 General Education (GE): ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Domestic Diversity; Wrt=Writing Experience
Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SE=Science and Engineering; SS=Social Sciences;
ACGH=American Cultures; DD=Domestic Diversity; OL=Oral Skills; QL=Quantitative; SL=Scientific; VL=Visual; WC=World Cultures; WE=Writing Experience


5. Global Social Change: An Introduction to Macrosociology (4)
Lecture—3 hours; discussion—1 hour. An introduction to change and stability in the world, including the United States. Examine population and change, technological change and economic development, power and status, culture and identity. GE credit: SocSci, Div, Wrt | AGCH, SS, WC.

11. Sociology of Labor and Employment (4)
Lecture—3 hours; discussion—1 hour. Labor and employment issues in the United States with some use of historical and comparative materials. Topics will include strategies pursued by employers and employees, labor market discrimination, and the role of social policies in shaping labor markets. GE credit: SocSci, Div, Wrt | SS.

25. Sociology of Popular Culture (4)
Lecture—3 hours; discussion—1 hour. Social mechanisms that shape modern popular culture. High, folk, and mass culture: historical emergence of popular culture. Mass media, commercialization, ideology, and cultural consumption. Methods and means for analyzing cultural expressions in pop music, street art, film, television, and advertising. GE credit: SocSci, Wrt | SS.

30A. Intercultural Relations in Multicultural Societies (3)
Lecture—1.5 hours; discussion—1.5 hours. Macrostructural analysis of contemporary multicultural societies, immigration and assimilation in comparative perspective, social construction of racial and ethnic group identities; ethnicity and gender; group conflict and cooperation; controversies surrounding multiculturalism. First course in a two-course Multicultural Immersion Program. GE credit: SocSci, Div | AGCH, DD, SS.

30B. Intercultural Relations in Multicultural Societies (3)
Lecture—1.5 hours; discussion—1.5 hours. Prerequisite: course 30A or consent of instructor. Social psychological analysis of personal experiences in a multicultural society, conforming to or rejecting group identity or stereotypes; managing and reducing conflict; cross-cultural communication; promises and problems of diversity at UC Davis. Second course in a two-course Multicultural Immersion Program. GE credit: SocSci, Div | AGCH, DD, SS.

46A. Introduction to Social Research (4)
Lecture—3 hours; discussion—1 hour; term paper. Examination of the methodological problems of social research. Selection and definition of problems of investigation, data-gathering techniques, and sampling. GE credit: SocSci | SS.

46B. Introduction to Social Research (5)
Lecture—4 hours; discussion—1 hour. Data-analysis techniques, measurement, scaling, multivariate analysis, and quantitative measures of association. GE credit: SocSci | QL, SS, Wrt | II.

90X. Lower Division Seminar (1-2)
Seminar—1.2 hours. Prerequisite: lower division standing and consent of instructor. Examination of a special topic in sociology through shared readings, discussions, written assignments, or special activities such as fieldwork, laboratory work, etc. May not be repeated for credit. Limited enrollment. GE credit: SocSci | SS.

98. Directed Group Study (1-5)
Prerequisite: consent of instructor. Primarily intended for lower division students. [P/NP grading only]

99. Special Study for Undergraduates (1-5)
Prerequisite: consent of instructor. [P/NP grading only]

Upper Division

100. Origins of Modern Sociological Theory (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1; consent of instructor; restricted to upper division standing. The origins of modern sociological thought. Special emphasis on three major theorists from the classical tradition of nineteenth century European social thought: Karl Marx, Max Weber, and Emile Durkheim. GE credit: SocSci | SS, Sl, QL.

102. Society and Culture of California (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: introductory course in Sociology recommended. California’s distinctive sociocultural context; sociological analysis of social problems concerning diversity, environment, cities. GE credit: SocSci | AGCH, DD, SS.

103. Evaluation Research Methods (4)
Lecture—3 hours; discussion—1 hour; term paper; project. Prerequisite: course 46A and 46B, or Statistics 13 or the equivalent. Surveys applications of research methods to the evaluation of social programs, primarily emphasizing methodological issues, e.g., research design; collection; use of evaluation research are also discussed and placed in theoretical context. Participation in an evaluation project. GE credit: SocSci | SL, SS.

104. The Political Economy of International Migration (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: upper division standing. Analysis of worldwide migration patterns, and social scientific theories of international and transnational migration. Focus in economical, political, and social impact of immigration and potential for international and regional cooperation. (Same course as International Relations 104A.) GE credit: SocSci, Div | AGCH, DD, SS.

106. Intermediate Social Statistics (5)
Lecture—4 hours; discussion—1 hour. Prerequisite: course 46B or Statistics 13 or the equivalent. Intermediate level course in statistical analysis of social data, emphasis on logic and use of statistical measure, procedures, and mathematical models especially relevant to sociological analysis. GE credit: SocSci | QL, SS.

118. Political Sociology (4)
Lecture—3 hours; discussion—1 hour; term paper; project. Relation of social cleavages and social cohesion to the functioning of political institutions; the social bases of local and national power structures; social stratification and social movement; analysis of concepts of alienation, revolution, ideology, ruling class, and elite. GE credit: SocSci | SS.

120. Deviance (4)
Lecture—3 hours; term paper or discussion. Social structural sources, institutional practices and microprocesses associated with deviant, evil, disease, immorality, disability, racial and class differences, citizenship, and the body. Special emphasis on expert knowledge and the production and management of social difference. GE credit: SocSci, Wrt | SS.

122. Sociology of Adolescence (4)
Lecture—3 hours; discussion—1 hour or term paper or research project. Chronological age and social status, analysis of social processes bearing upon the socialization of children and adolescents. The emergence of “youth cultures.” Generational succession as a cultural problem. GE credit: SocSci, Wrt | SS.

124. Education and Inequality in the U S (4)
Lecture—3 hours; term paper or discussion—1 hour. Functions of schooling in contemporary U.S. society. Racial, ethnic, social class, and gender inequalities in student outcomes. Consideration of classic and current controversies in the field of education and education policy. GE credit: SocSci | SS.

124. Sociology of Education (4)
Lecture—3 hours; discussion—1 hour; term paper; project. Education and the social structure. Class size, curriculum, and economics of scale. Relations between families and schools in socialization; familial ascription and educational achievement. Education and industrialization. Organizational and occupational structures of schools. Discussion of selected controversies. GE credit: SocSci | SS.

126. Social Interaction (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 2. Everyday interaction in natural settings, ethnographic approaches to the understanding of social meanings, situations, personal identity and human relationships. Particular attention to the work of Erving Goffman, and to studies of face-to-face interaction as a ground for the development of self and community. GE credit: SocSci, Wrt | SS.

127. Sociology of Death (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 or the equivalent or consent of instructor. Overview of ethnocultural, structural, and historical aspects of death and dying, to death occupations, and to death rituals in various cultures. GE credit: SocSci, Wrt | SS.

128. Interracial Interpersonal Dynamics (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: one course from courses 1, 2, 3, African American Studies 10, Asian American Studies 1, 2, Chicano Studies 10, Native American Studies 1, 2. Analysis of the influences of cultural differences and racial stratification on interpersonal interaction in multicultural settings (e.g., work, education, political action) and intimate settings (e.g., friendship, love, marriage, family). Minority/majority relationships. GE credit: SocSci, Wrt | SS.

129. Sociology of Black Experience in America (4)
Lecture—3 hours; discussion—1 hour; term paper; project. Survey of historical and contemporary theoretical sociological perspectives on the Black experience in the United States. Emphasis on Black sociological perspectives and mainstream perspectives of specific sociologists. GE credit: SocSci, Div | AGCH, DD, SS.

130. Race Relations (4)
Lecture—3 hours; term paper or discussion—1 hour. Functions of the social definitions of race and racial groups. Analysis of racial conflict, oppression, and other forms of ethnic stratification. Models of ethnic interaction and social change. Emphasis on race relations within the U.S. GE credit: SocSci, Div | AGCH, DD, SS.

131. The Family (4)
Lecture—3 hours; discussion—1 hour. Contempora- family life in historical and cross-cultural perspective. How different family forms arise, their significance today and prospects for future family change. Attention to power relations within and beyond the family and to the social implications of family transformation. GE credit: SocSci, Div, Wrt | AGCH, DD, SS.

132. The Sociology of Gender (4)
Lecture—3 hours; discussion—1 hour. Analysis of biological, psychological, and structural conditions underlying the status and roles of men and women in contemporary society, focusing on a his- torical and comparative perspective. GE credit: SocSci, Div | AGCH, DD, SS.

133. Sexual Stratification and Politics (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 132 or the equivalent or consent of instructor. Analysis of origins, dynamics, and social implica- tions of sexual stratification. Examination of classical and contemporary theorists such as Engels, Freud, J.S. Mill, de Beauvoir, Juliet Mitchell, D. Dinnerstein. Attention to selected issues in sexual movements for and against sexual equality. GE credit: SocSci, Div | SS.

134. Sociology of Racial Ethnic Families (4)
Lecture—3 hours; discussion—1 hour or term paper. Asian American, Black, Chicano, and Native Ameri- can family life in comparative perspective. Family structure and gender roles are considered in relation to sociohistorical dynamics. Offered in alter- nate years. GE credit: SocSci, Div, Wrt | AGCH, DD, SS.

135. Social Relationships (4)
Lecture—3 hours; discussion—1 hour or term paper. Prerequisite: course 1, 2, or 3, and upper division standing. Social and cultural factors influencing friendships and intimate relationships. Topics include...
relationship development, relationship maintenance, and relationship loss. GE credit: Div, SocSci, Wrt | SS.

137. African American Society and Culture 1790-1990 (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1. Political and social transfor-
mations of the African community between 1790 and 1990, as seen through film, literature, and music. Topics include: Black consciousness, Afro-Slave culture, The Harlem Renaissance, and contemporary Hip Hop. GE credit: SocSci | ACGH, DD, SS.

138. Economic Sociology (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: Economics 1A or 1B and upper division standing in the social sciences. Overview of the rapidly growing field of economic sociology. Focus on variations in the ways that markets are organized. The relationship between individual and collective rationality will also be emphasized. GE credit: SocSci | ACGH, SS, WC.

139. Corporations and Society (4)
Lecture—3 hours; discussion—1 hour; term paper. Prerequisite: course 1 or 2 or 3, and upper division standing. The study of the history and power of the modern corporation; corporate organization; poli-
tics, the state, and the corporation; labor unions and the labor process; competition, regulation and inter-
nationalization of the international and conglomer-
tor; corporate and mass markets; and consumerism. GE credit: SocSci | ACGH, SS.

140. Social Stratification (4)
Lecture—3 hours; discussion—1 hour or term paper or research project. Factors that contribute to social stratification. Social mobility and its consequences for social structure. GE credit: SocSci | ACGH, DD, SS.

141. Industrialization and Social Change (4)
Lecture—3 hours; discussion—1 hour or term paper or research project. Selected technological and social factors. Preconditions of economic development and industrialization. Social, political, and cul-
tural issues at various levels of economic development. Major historical differences and major current trends. Emphasis either on highly industrial- ized countries or on less developed countries. GE credit: SocSci, Wrt | SS.

143A. Urban Society (4)
Lecture—3 hours; discussion—1 hour or term paper or research project (instructor’s option). Prerequisite: course 1 or the equivalent. Theories of city origins. Analysis of the historic process of urbanization and of varying city types. Comparison of American and European experiences of urbanization, counterurbaniza-
tion, and neighborhood change. Consideration of competing theories of urban growth and change and competing visions of the urban future. Offered in alternate years. GE credit: SocSci | SS.

143B. Sociology of City Life (4)
Lecture—3 hours; discussion—1 hour or term paper or research project (instructor’s option). Prerequisite: course 1 or the equivalent; course 143A recommended. Critical 
capital conditions of the term “community”. Analy-
ysis of the organization of primary ties in the city, of the culture of urban public life and of the learning of city skills. Offered in alternate years. GE credit: SocSci, Wrt | SS.

144. Agriculture and Society (4)
Lecture—3 hours; discussion—1 hour or term paper or research project. Prerequisite: advanced standing in the social sciences or one year of course work in agricultural and environmental sciences. Development of agriculture as a major enterprise in modern society with the concomitant reduction in the labor force and family farms. Analysis of issues including mechanization, migration, corporate farming, and public resource policy. Offered in alternate years. GE credit: SocSci | SS.

145A. Sociology of Third World Development (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 1; upper division standing. Introduction to theories and contemporary issues in the sociology of development. Topics such as urbanization, rural/
grarian change, class, status groups, international division of labor, sectoral shifts, international capital, informal economy, gender, and political processes are analyzed within a comparative-historical frame-
work. GE credit: SocSci, Div, Wrt | SS, WC.

145B. Gender, Environment, Rural Development in the Third World (4)
Seminar—4 hours. Prerequisite: course 1; upper division standing. Political-economic analysis of women and work during the process of socioeco-

148. Collective Behavior (4)
Lecture—3 hours; discussion—1 hour or term paper or project (instructor’s option). Prerequisite: course 1 or the equivalent. Study of behavior of human crowds and masses in extraordinary circumstances, including crowds and mass actions, collective pro-
tests, riots, revolutionary situations, ecstatic and revivalist gatherings, crazes, fads, and fashions. GE credit: SocSci | SS.

149. Religion and American Society (4)
Lecture—3 hours; class project. Historical, contem-
porary survey of religious traditions and organiza-
tions and their relationship to U.S. social and cultural patterns. Religion, religious pluralism, minority and diverse communities, religious migration, U.S. religion as a social institution, and religion, politics, and social stratification. Offered in alternate years. GE credit: SocSci | DD, SS, WC.

150. Criminology (4)
Lecture—3 hours; discussion—1 hour or term paper or research project. Sociological analysis of criminal behavior in relation to social structure and the crimi-

151. The State in the Modern System (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 150 and upper division standing. Sociological analysis of the different compo-
ents of the criminal justice system including the environment and interpretation of criminal laws, the contemporary roles and functions of the police, crim-

152. Juvenile Delinquency (4)
Lecture—3 hours; discussion—1 hour or term paper or research project. Study of juvenile delinquency in relation to the family, peer groups, community, and institutional structures. Consideration of the delinquency of official agencies of control. GE credit: SocSci | SS.

153. The Sociology of Childhood (4)
Lecture—3 hours; term paper. Prerequisite: upper division standing. Contemporary childhood in historical, cross-cultural, and global perspectives. Examination in understanding of the nature of childhood and “best interests of the child” by class, race, gen-

154. Sociology of Health Care (4)
Lecture—3 hours; discussion—1 hour or term paper or research project. Overview of sociological research in medicine and health care, with emphasis on the organization and social psycholog-

155. Sociology of Law (4)
Lecture—3 hours; discussion—1 hour or term paper or research project. Law considered as social control, relation of legal institutions to effecting judicial decision making and administration of justice. Lawyers as an occupational group. Legal reform. GE credit: SocSci | SS.

157. Social Conflict (4)
Lecture—3 hours; discussion—1 hour or term paper or project. Analysis of the causes, dynamics, and regu-

159. Sociology of Work and Employment (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: Sociology 145B or research project. Analysis of the ways that markets are organized. Contemporary women’s social movements in Latin America, focusing on Honduras, El Salvador, Brazil, and Nicaragua. Examination of exploitation and oppression in Latin America. GE credit: Div, SS, Wrt | DD, SS, WC.

160. Sociology of the Environment (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: Sociology 145B or research project. Sociology strongly recommended. Production, consumption, and urban expansion. Basic social logics surround-

161. The Civil Justice System (4)
Lecture—3 hours; term paper. Prerequisite: course 155; upper division standing. Pass One open to upper division and graduate Sociology & Sociology Organizational Studies majors. Empirical studies of the different aspects of the civil justice system in the United States and Global Society including the litigation, juries, civil rights, and international laws relating to crime, the environment, and human rights. —II.

171. Sociology of Violence and Inequality (4)
Lecture/discussion—4 hours. Prerequisite: upper-

172. Ideology of Class, Race and Gender (4)
Lecture—4 hours. Examination of popular belief sys-

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2015-2016 offering in parentheses.
Pre-Fall 2011 General Education (GE): AH—Arts and Humanities; SC—Science and Engineering; SE—Social Sciences; AGCH—American Cultures; DD—Diverse Diversity; Wrt—Writing Experience
Fall 2011 and on Revised General Education (GE): AH—Arts and Humanities; SE—Science and Engineering; SS—Social Sciences; ACGH—American Cultures; DD—Diverse Diversity; OL—Oral Skills, QL—Quantitative, SL—Scientific, VL—Visual, WC—World Cultures, WE—Writing Experience

Sociology 507

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2015-2016 offering in parentheses.
Pre-Fall 2011 General Education (GE): AH—Arts and Humanities; SC—Science and Engineering; SE—Social Sciences; AGCH—American Cultures; DD—Diverse Diversity; Wrt—Writing Experience
Fall 2011 and on Revised General Education (GE): AH—Arts and Humanities; SE—Science and Engineering; SS—Social Sciences; ACGH—American Cultures; DD—Diverse Diversity; OL—Oral Skills, QL—Quantitative, SL—Scientific, VL—Visual, WC—World Cultures, WE—Writing Experience

Sociology 507
174. American Jewish Identities and Communities (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 or 2. Examines the historical development and contemporary trends in Jewish American identity and community. GE credit: SocSci | SS.

175. Mass Communication (4)
Lecture—3 hours; term paper. Prerequisite: course 1 or 2. Examines the relationship between the media and social structures. History of media—state relations. Media as reflector and shaper of values. Emphasis on current European and Marxist and pluralist theories rather than on content analysis. Offered in alternate years. GE credit: SocSci | SS.

176. Sociology of Knowledge, Science, and Scientific Knowledge (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: upper division standing preferred. Social, cultural, and historical dimensions of knowledge, especially scientific knowledge. Problems, methods, and theory in sociology of scientific knowledge. Laboratories and historical case studies. Scientific and technical knowledge in institutional and organizational contexts. [Same course as Science and Technology Studies 176.] GE credit: SocSci | SS.

180A. Complex Organizations (4)
Lecture—3 hours; discussion—1 hour or term paper or research project. Prerequisite: course 1; Economics 1A and 1B recommended. Develops a sociological approach to organizations. Deals with the issues of organizational decision making, design, and survival. Emphasis on relations between organizations and the effects of those relations in both the public and private sectors. GE credit: SocSci | SS.

180B. Complex Organizations (4)
Lecture—3 hours; discussion—1 hour or term paper or research project. Prerequisite: course 180A or consent of instructor. Builds on concepts and skills developed in course 180A. GE credit: SocSci | SS.

181. Social Change Organizations (4)
Lecture—3 hours; discussion—1 hour or term paper. Prerequisite: course 1. Analysis of organizations with social change and improvement goals and programs. Phylogenies and cyclic patterns of social change. Social change organizations and grassroots citizen groups. Topics treated include for-profit and nonprofit. GE credit: SocSci | SS.

182. Experimental and Utopian Communities (4)
Lecture—3 hours; discussion—1 hour. The social structure of intentional, experimental or Utopian settlements and communal movements, including comparison with other small settlement forms: villages, neighborhoods, monasteries, encampments and nonsite settlements. Geographically based on occupancy, ethnicity, and religion.

183. Comparative Organizations (4)
Lecture/discussion—3 hours; term paper. Prerequisite: course 180A or 180B; upper division standing. Examination of formal and political organizations of major industrial nations. Discussion of historical, cultural, social, and political influences on industrial patterns and practices; alternative theoretical models for explaining organizational development. Societies may include Sweden, Japan, Germany, Taiwan, and South Korea. Offered in alternate years. GE credit: SocSci, ACGH, SS, WC.

185. Sociology of Social Welfare (4)
Lecture—3 hours; discussion—1 hour or term paper or research project. Sociological analysis of the evolution and current organization of welfare functions in modern societies. GE credit: SocSci | SS.

188. Social Stratification in China (4)
Lecture—3 hours; term paper. Prerequisite: upper division standing. Social and political systems and patterns of stratification in China since 1949. Offered in alternate years. GE credit: SocSci | SS.

189. Social Science Writing (4)
Lecture—3 hours; discussion—1 hour or term paper. Prerequisite: course 46A, upper division standing, and 12 units of social science. Improved analytic writing and methods for reporting social science research to a wider public. Sociological analysis of the conditions of good and bad writing. GE credit: SocSci | SS.

190X. Seminar in Sociological Analysis (4)
Seminar—3 hours; term paper. Prerequisite: upper division standing and course 100 (former course 165A). In-depth examination at an upper division level of a special topic in Sociology.emphasis on student participation in learning. May not be repeated for credit. (Limited enrollment.)

191. Workshop in Contemporary Sociological Theory (4)
Lecture—2 hours; workshop—1 hour; term paper. Prerequisite: course 100 (former 165A) and senior standing. Workshop sociological theory that allows students to explore the uses of theory in empirical inquiry on problems of interest to students. Contemporary theory considered in relation to classical sociological writings, sociological problems, and social change. Emphasis on student participation in learning. May not be repeated for credit. (Limited enrollment.)

192. Internship and Research Practicum (2-6)
Internship—6-18 hours. Prerequisite: course 46A, upper division standing, approval of proposed internship and course 193 concurrently or consent of instructor. Supervised internship and study in an agency, organization, or institution; application of sociological concepts to the work experience. May be repeated for credit with consent of instructor. Maximum of 4 units may be counted toward the major. (P/NP grading only.)

193. Workshop in Field Research (2)
Lecture/discussion—2 hours. Prerequisite: course 46A, course 192 or 199 concurrently for two-four units, senior standing. Overview of the process of collecting, recording, analyzing, and reporting qualitative social data. Emphasis on application of principles; each participant completes an original research project. Not open for credit to students who have completed course 194HA. GE credit: SocSci | SS, WE.

194H. Special Study for Honors Students (1-5)
Prerequisite: senior standing and admission to the Honors Program. Independent study of a sociological problem involving the writing of an Honors thesis. [P/NP grading only, deferred grading only, pending completion of sequence.] GE credit: SocSci | SS.

194HB. Special Study for Honors Students (4)
Seminar—3 hours; term paper. Prerequisite: senior standing and admission to the Honors Program. Directed reading, research and writing culminating in the preparation of a Senior Honors Thesis under the direction of faculty adviser. (Deferred grading only, pending completion of sequence.) GE credit: SocSci | SS.

195. Special Topics in Sociological Analysis (4)
Seminar—3 hours; term paper. Prerequisite: upper division standing and consent of instructor. In-depth examination of topics in sociology. Emphasis on student research and writing. May be repeated for credit when topic differs. GE credit: SocSci | SS.

197T. Tutoring in Sociology (1-4)
Tutorial—3-12 hours. Prerequisite: upper division standing, completion of appropriate course with distinction. Activities vary depending on the nature of the course assignment. May include (but not limited to) tutoring on course material, advising on projects and papers, and leading discussion groups. (P/NP grading only.)

198. Directed Group Study (1-5)
Prerequisite: consent of instructor. [P/NP grading only.]

199. Special Study for Advanced Undergraduates (1-5)
Prerequisite: open to seniors only. (P/NP grading only.)

Graduate

201. Social Research (4)
Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative survey of sociological inquiry, taught as a practicum. Philosophy of social science; values and research; research agendas and research problem formulations; research process; explanations. Interpretation; study design, concept formation, measure, sampling, data acquisition, inference; rhetoric and presentation of findings.

206. Quantitative Analysis in Sociology (4)
Lecture—4 hours. Prerequisite: course 106. Survey of the statistical models and methods that serve as a foundation for quantitative analysis in sociology, with an emphasis on multivariate regression analysis, as well as measurement theory and time series analysis. (S/U grading only)—II. (III.)

207A. Methods of Quantitative Research (4)
Lecture—3 hours; term paper. Prerequisite: course 106 or the equivalent. Principles of study design, examination of measurement, survey research methods and multivariate analysis. Course will stress actual practice of techniques. Students will carry out quantitative data analysis using packaged computer programs. (I—I.)

208. Topics in Advanced Quantitative Methods in Social Science (4)
Seminar—3 hours; term paper. Prerequisite: course 206 or the equivalent and graduate standing; major graduate student. Analysis of the logic and application of an advanced statistical model, the particular model chosen may vary. Emphasis on the model’s assumptions, its strengths and weaknesses, its application for social science inquiry, and the relationship between methods and social theory. May be repeated up to 12 units for credit. Offered in alternate years.

215. Economy, Polity, and Society (4)
Seminar—3 hours; paper. Prerequisite: consent of instructor. Open to graduate students in sociology and related disciplines. Course introduces students to topics and selected issues in the related fields of economic and political sociology and political economy.

220. Deviance, Law, and Social Control (4)
Seminar—3 hours; projects. Prerequisite: course 120 or consent of instructor. Report and discussions of literature on selected forms of deviance in relation to law and formal social control, agency contacts and exploratory research projects.

224. Sociology of Education (4)
Seminar—3 hours; term paper. Prerequisite: course 206 or the equivalent recommended. Overview of sociological theories accounting for the form, role, and evolution of educational systems. Emphasis on empirical research on education and social stratification and application to educational policy. Topics include tracking, racial/ethnic achievement inequalities, school organization, and the immigrant experience.

225. Cultural Sociology (4)
Seminar—3 hours, term paper. Explores the varied ways in which culture is thought about in the social sciences and the research questions that follow from
contrasting viewpoints. The approach is historically informed and focused on changing cultural forms in relation to industrialization and post-modernism. Offered in alternate years.

226. Sociological Social Psychology (4) Seminar—3 hours; seminar paper—1 hour. Prerequisite: graduate standing or consent of instructor. Advanced study of approaches, methods, issues and topical concerns of sociological social psychology. Analysis of current and representative historical and contemporary works.

227. Sociology of Reproduction (4) Lecture—3 hours; seminar paper—1 hour. Recent social science scholarship in such areas as teenage pregnancy, family planning, abortion, adoption, AIDS, and new reproductive technologies; focus on the current situation in the United States. Offered in alternate years.

230. Ethnic (Race) Relations (4) Lecture—3 hours; term paper. Advanced study of the determinants of ethnic groupings and their interrelationships. Major theme will be the patterns of ethnic stratification and causes of ethnic conflict. Specific focus upon dominance and resistance to dominance. Influence of social science research.

233. Gender, Culture, and Local/Global Transformation (4) Seminar—3 hours; term paper. Focus on critical approach to women and development; analyze local transformations with global connections within specific cultural settings. Course covers theory, methodological issues, and relationship between theory and practice. Offered in alternate years.

234. Gender, Family, and Society (4) Seminar—3 hours; seminar paper. Prerequisite: graduate standing or consent of instructor. The major theoretical traditions and concerns in family sociology and gender. Analysis of selected classical and contemporary works representative of functionalist, Marxist, psychoanalytic, feminist, and critical theoretical approaches to these subjects (e.g., Engels, Parsons, Freud, Horkheimer, Goode, Lasch, Mitchell). Emphasis on macro and historical questions.

242A. Comparative Methods in Historical Sociology (4-4) Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative approaches to major historical phenomena such as nationalism, revolution, feudalism, and capitalism; the relevance of psychological and sociological theories to historical interpretation; the verification of hypotheses; the meaning of analogy, correspondence and causality.

243. Urban Society (4) Seminar—3 hours; term paper. Broad overview of the issues and concerns of the field of urban sociology. Special emphasis on the human experience of urban living in contemporary, cross-cultural or historical settings.

245. Developing Societies (4) Seminar—3 hours; term paper or project. Prerequisite: graduate student status or familiarity with problems of developing societies. Analysis of social and economic problems of developing societies from the standpoint of theory and research on modernization and underdevelopment. Nature of third world dependency and its consequences in the global political economy. Offered in alternate years.

248. Social Movements (4) Seminar—3 hours; term paper. Analysis of current issues and contributions to the study of collective behavior and social movements; particular focus upon the strategies and tactics of social movements.

254. Sociological Issues in Health Care (4) Seminar—3 hours; term paper. Prerequisite: open to graduate or professional students. Sociological perspectives and contributions to health care issues. Students select topics for supervised research. The course will have a theme (described in advance) each time it is offered. Paper on research will be required. (S/U grading only.)

255. Sociology of Law (4) Seminar—4 hours. Prerequisite: consent of instructor. Analysis of the nature of the legal process and its impact on social behavior. Will discuss (1) nature and functions of law, (2) the organization and administration of law, and (3) the capacity of law to affect social behavior.

265A. Classical Sociological Theory (4) Lecture—3 hours; discussion—1 hour. Introduces graduate students to the work of the main classical thinkers in the tradition of social theory, such as Marx, Durkheim, Weber, Simmel, Freud, G.H. Mead, and Parsons, locating them within the historical, cultural, and philosophical milieu in which their ideas originated.

265B. Theory in Contemporary Sociology (4) Lecture—3 hours; discussion—1 hour. Prerequisite: course 265A. Explores the uses of theories in contemporary sociology by tracing their connections with classical sociological writings and their relations to broader theoretical concerns of contemporary social thought, with particular emphasis on relevance to the current historical, cultural and social milieu.

270. Social Demography (4) Seminar—4 hours. Prerequisite: course 170 or consent of instructor. How social institutions affect and are affected by the level and variation of mortality, migration, and fertility. Special emphasis on the determinants of anti-fertility attitudes and behavior, on less-developed countries, and on contemporary empirical studies.

280. Organizations and Institutions (4) Seminar—4 hours. Theory of formal organizations and bureaucracy. Methods of research in organizational and institutional studies. Historical and comparative analysis of political, religious, educational, military, and economic structure.

290. Seminar (4) Seminar—3 hours; term paper. (S/U grading only.)

292A. Field Research (4-4) Seminar—3 hours; field trips. Prerequisite: graduate standing in Sociology or consent of instructor. The process of collecting, analyzing and reporting qualitative social data. Techniques of intensive interviewing, participant-observation and document analysis; generating, developing, and evaluating analytic frameworks; recording, storing, retrieving, and writing up qualitative data. Emphasis on application of principles; each participant completes a fieldwork project.

293. Proseminar in Sociology (2) Seminar—2 hours. Prerequisite: first-year Sociology graduate students. Open to graduate students with the consent of instructor. Introduction to graduate training in sociology. A seminar designed to introduce students entering graduate work in the department to its ongoing research activities. (S/U grading only.)

295. Special Topics Seminar. (4) Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Research topics in Sociology. Specific topic will vary according to faculty interest and student demand. May be repeated for credit when topic differs.—II, III, (I, II, III.)

298. Group Study (1-5) Prerequisite: consent of instructor. (S/U grading only.)

299. Individual Study (1-12) (S/U grading only.)

Professional

390A. The Teaching of Sociology (2) Lecture—1 hour; discussion—1 hour. Prerequisite: graduate standing; required for first-time teaching assistants. Practical instruction in teaching methods for qualitative and quantitative courses. Pedagogical issues involved in critical sociological analysis. (S/U grading only.)—II, (I.)

390B. The Teaching of Sociology (2) Lecture—1 hour; discussion—1 hour. Prerequisite: graduate standing. Practical instruction in devising course syllabi, lectures and assignments for Associate-Teachers and others interested in college teaching. Discussion of pedagogical methods of teaching qualitative and quantitative courses. (S/U grading only.)—II, (I.)

396. Teaching Assistant Training Practicum (1-4) Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III, (I, II, III.)

Professional

466. Research Paper Workshop (2) Workshop—1.5 hours; discussion—0.5 hours. Prerequisite: Master of Arts or senior standing. Workshop to assist advanced graduate students in the preparation of an original research paper. Students present their research papers and discuss issues in theory, research design, data, empirical inference, and verbal and written presentation of a professional research paper. (S/U grading only.)

Soils and Biogeochemistry

(4) Lecture—3 hours; laboratory/discussion—2 hours. Prerequisite: introductory courses in ecology/botany and soils recommended; undergraduates accepted with consent of instructor. Multidisciplinary analysis of energy and nutrient transfers within terrestrial ecosystems. Examination of processes and interactions between the atmosphere, biosphere, lithosphere and hydrosphere. Laboratory section uses biogeochemical simulation models to examine case studies. (Same course as Ecol 219)—III. (III.) Houlton

2020. Pedology (3) Lecture—3 hours. Prerequisite: consent of instructor; course 120 recommended. Topics selected from studies of soil-forming processes, soil-geomorphic relations, mineral weathering, new developments in soil classification, and development of pedologic theory. Topics vary from year to year. May be repeated one time for credit. Offered in alternate years. —III. (III.)

222. Global Carbon Cycle (3) Lecture—3 hours. Prerequisite: Chemistry 8A, 8B, Mathematics 16A, 16B, course 100 or the equivalent. Global carbon cycle from Phanerozoic epoch to modern times. Examination of long- and short-term carbon cycles. Transfer of carbon among ocean, land and life with emphasis on humic substance formation, methods of characterization, reactions with organic and soil carbon stabilization. Offered in alternate years. —II. (II.) Horwath

290. Special Topics in Soil Science (1-4) Seminar—1–4 hours. Prerequisite: graduate standing. Seminars and critical review of problems, issues, and research in soil science. May be repeated for credit. (S/U grading only)—I, II, III, IV. (I, II, III, IV.)

298. Group Study (1-5) Prerequisite: consent of instructor. May be repeated for credit when topic differs. (S/U grading only)—I, II, III, IV. (I, II, III, IV.)

The Major Program

The Spanish major program assures proficiency in all four language skills: understanding, reading, and writing—acquaints students with the intellectual and cultural contributions of the Spanish-speaking world through a study of its language, literature, and cultural productions.

The Program. The department’s lower division program gives students a solid foundation in the Spanish language, either through the traditional elementary and intermediate language series or through an accelerated three-course sequence of Spanish for native speakers. Linguistics introduces students to a systematic study of language in general and serves as an introduction to upper division courses in Spanish linguistics. At the upper division level, students receive a broad introduction to basic concepts and the practice of literary and cultural criticism and to the four areas of study represented in the department’s curriculum: Spanish linguistics, Spanish literature and culture, Latin-American literature and culture, and Latino literatures and cultures in the United States. Students are encouraged to work closely with the department’s academic advisers in designing a program of studies tailored to their individual needs and interests. Many students combine the Spanish major with another major in the humanities or social sciences.

Student Learning Outcomes. Educational Objectives:

- Linguistics. Demonstrate knowledge of the Spanish-speaking world’s linguistic diversity through the comprehension of Spanish in a variety of situations, discursive modes and historical, regional or social variations. Demonstrates analytical, interpretative, and critical thinking skills: Spanish 111N, 113, 115/S, 116, 117, 118, 180.
- Literature. Demonstrate analytic, interpretative and critical thinking skills with respect to literary texts from Latin America, Spain, the United States and other countries in which there is a literary production in Spanish; Spanish 100/S, 130, 131N, 134A/B, 142 (Spain); 150N, 151, 157, 159/S (Latin America); 174, 175, 176, 177 (United States).
- Culture. Demonstrate cultural awareness with respect to the diversity of cultural products and manifestations produced in the Spanish-speaking world (Latin America, Spain, the United States and other countries in which there is a cultural production in Spanish; Spanish 100/S, 141/S, 170/S, 174.
- Film and Art. Demonstrate analytic interpretative and critical thinking skills with respect to linguistics, literature and cultural studies.

Career Alternatives. The program, alone or in combination with other major programs, may lead to advanced study of the language or literature and culture of Spain and Spanish America, and to careers not only in teaching, but also in other professions such as library science, law, medicine, and in government, social service, business, or international relations.

A.B. Major Requirements:

Preparatory Subject Matter..................................4-37

Spanish 1, 2, 3, 4, 21 or 21S, 22 or 22S, 23 or 23S, 24 or 24S..................................................0-33
or Spanish 31, 32, 33..............................................0-15

Linguistics 1....................................................4

In consultation with a departmental adviser and with the consent of the department chairperson, Linguistics 1 may be taken concurrently with upper division courses.

Depth Subject Matter..................................45-48

One course in each of the following five areas: ..................................................4-19

Spanish 100, 100S, 140, 141, 141S, 170, or 170S ..................................................4
Spanish 111N, 115, or 116...........................................3-4
Spanish 130, 131N, 134A or 142 ...........................................4
Spanish 150N, 151, 157, 159 or 159S .................................4
Spanish 117, 174, 176, or 177 ...........................................4
Students planning to take Spanish 110 should do so at the beginning of the upper division sequence or concurrently with Spanish 100, 100S, 141, 141S, 170 or 170S.

Seven elective courses to be chosen in consultation with the student’s major adviser..................................................26-28

Students may, with the approval of their adviser, take up to two electives outside the Spanish department in such programs as: African American and African Studies: African American and African Studies 107A, 180

Anthropology: Anthropology 144

Art History: Art History 151

Comparative Literature: Comparative Literature 152

Education: Education 151, 152

Linguistics: Linguistics 166

Native American Studies: Native American Studies 120, 133A/B, 184

A maximum of six units of course 199 may be counted toward the major.

Course 199 cannot be used to replace regular departmental courses.

Total Units for the Major..................................49-85

Major Advisers. Student Affairs Officer/Undergraduate Academic Coordinator, Laura Barrera, jlbarrera@ucdavis.edu.

Advising. Given the great flexibility in the Spanish major, it is important that students design their programs in close consultation with their major adviser. This is especially important for students who intend...

Courses in Portuguese (POR)

Lower Division

1. Elementary Portuguese (5)
   Lecture/discussion—5 hours; laboratory—1 hour.
   Introduction to Portuguese grammar and development of all language skills in a cultural context with special emphasis on communication. Students who have successfully completed Portuguese 2 or 3 in the 10th or higher grade of high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be awarded to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed. GE credit: WC.—I. (I)

2. Intermediate Portuguese (5)
   Lecture/discussion—5 hours; laboratory—1 hour.
   Prerequisite: course 1. Continuation of course 1 in the areas of grammar and development of all basic language skills in a cultural context with special emphasis on communication. GE credit: WC.—II. (II)

3. Elementary Portuguese (5)
   Lecture/discussion—5 hours; laboratory—1 hour.
   Prerequisite: course 1. Review and develop the grammar, vocabulary, and composition acquired in first year Portuguese through exercises and reading of modern texts. GE credit: WC.—I Bernucci, Newcomb

22. Intermediate Portuguese (5)
   Lecture/discussion—5 hours; laboratory—1 hour.
   Prerequisite: course 21. Continuation of course 21. Focus on more difficult grammar concepts and further composition practice. Development of all language skills through exercises and reading of modern texts. GE credit: WC.—I Bernucci

23. Portuguese Composition I (4)
   Lecture—3 hours; extensive writing. Prerequisite: course 22. Development of writing skills by way of reading, discussion, and analysis of authentic materials, literary texts, and videos. Selective review of grammar. Class activities include composition, journals, letters, individual and group projects. GE credit: WC, WE.—III. (III)

31. Intermediate Portuguese for Spanish Speakers (4)
   Lecture/discussion—3 hours, laboratory—1 hour.
   Prerequisite: course 2 or the equivalent, or consent of instructor. Development of linguistic and learning skills required for Spanish-speaking students in upper-division courses in Portuguese.—I. (I)

98. Directed Group Study (1-5)
   Prerequisite: consent of instructor and Department Chairperson. Directed group study primarily for lower division students.—I. (I)

Upper Division

100. Principles of Luso-Brazilian Literature and Criticism (4)
   Lecture—3 hours, term paper. Prerequisite: course 3 or Spanish 24, 24S or 33. Principles of literary criticism applied to the study of fiction, poetry, and essays of major literary writers of the Luso-Brazilian world. GE credit: ArtHist | AH, WC, WE.—I (I)

111. The Structure of Portuguese: Sounds and Words (3)
   Lecture/discussion—3 hours. Prerequisite: course 22 or 23. Linguistic description of sound patterns of Portuguese and how those sounds can be used to form larger units, such as morphemes and words. Theoretical and practical comparisons with English and with other Romance languages. GE credit: AH, WC.—II. (II)

132. Portuguese Literature: Medieval and Renaissance (4)
   Lecture/discussion—3 hours; term paper. Prerequisite: course 22 or 31. Overview of the origins of the Portuguese literature, spanning from the 13th C to the 16th C. Studies of lyrical and epic poetry, drama, and travel narratives. GE credit: AH, WC.—II. (II)

134. Luis de Camões (4)
   Lecture/discussion—3 hours; term paper. Prerequisite: course 22 or 31. Overview of the origins of the Portuguese literature, spanning from the 13th C to the 16th C. Studies of lyrical and epic poetry, drama, and travel narratives. GE credit: AH, WC.—II. (II)

141. Introduction to Luso-Brazilian Culture (4)
   Lecture/discussion—3 hours; extensive writing. Prerequisite: course 23. Introduction to history, geography, and culture of Portugal and Brazil. Art, history of ideas, and everyday culture; introduction to critical reading and textual analysis. Taught in Portuguese. GE credit: ArtHist, Div. Wrt | AH, WC.—I. (I)

159. Special Topics in Luso-Brazilian Literature and Culture (4)
   Lecture—3 hours; term paper. Prerequisite: course 3 or Spanish 24, 24S or 33. Special Topics in Luso-Brazilian Literature and Culture. May be repeated one time for credit. GE credit: ArtHist | AH, WC, WE.—I, II, III. (I, II, III)

161. Luso-Brazilian Literature and Culture (4)
   Lecture/discussion—3 hours; term paper. Prerequisite: first year Portuguese or the equivalent. Colonial Brazilian literature survey. Readings include 16th-18th centuries manuscripts and books of cultural importance in a society dominated by censorship and with no printing presses. Study of the role Literary Academies played in the so called "culture of manuscripts." GE credit: ArtHist | AH, WC, WE.—I, II, III Bernucci, Newcomb

162. Introduction to Brazilian Literature (4)
   Lecture/discussion—3 hours; term paper. Prerequisite: first year Portuguese or the equivalent. Narrative and poetic texts of the 19th and 20th centuries in Brazil. In-depth and comparative study of Romantic and [Neo]Naturalist movements as a forum for discussion about literary tradition and modernity in Latin America. GE credit: ArtHist | AH, WE.—I. (I) Bernucci, Newcomb

163. 20th C Masters in Brazilian Literature (4)
   Lecture/discussion—3 hours; term paper. Prerequisite: first year Portuguese or the equivalent. Overview of modern Brazilian literature from early 20th C. The poetry by João Cabral de Melo Neto and the Concretists (1960s), including European avant-garde movements and literary and cultural manifestations leading to a revolutionary body of literature. GE credit: ArtHist | AH, WC, WE.—I, II, III Bernucci, Newcomb

198. Directed Group Study (1-5)
   Prerequisite: consent of instructor and Department Chairperson. (P/NP grading only) GE credit: AH, WC, WE.—I, II, III Bernucci

199. Special Study for Advanced Undergraduates (1-5)
   Independent study with professor for advanced undergraduate students, or honor thesis students. (P/NP grading only) Offered irregularly. GE credit: AH, WC, WE.—I, II, III Bernucci

Spanish and Portuguese

to use their major as preparation for graduate study, for those who are planning a teaching career, and for those who wish to take advantage of our Education Abroad Program options.

Minor Program Requirements:

Spanish................................. 23-24
   One course in each of the following five areas:
   Spanish 100, 100S, 141, 141S, 170, or 170S........ 4
   Spanish 111N, 115, or 116 .................. 3-4
   Spanish 130, 131N, 134A, or 142 ......... 4
   Spanish 150N, 151, 157, 159 or 159S........ 4
   Spanish 117, 174, 176, or 177......... 4
   One upper division elective in Spanish ......................... 4
   Consult a departmental advisor if any of these courses are to be taken abroad.

Honors Program. Candidates for high or highest honors in Spanish must write a senior thesis under the direction of a faculty member. For this purpose, honors candidates must enroll in at least six units of Spanish 194H distributed over two quarters. Normally, a student will undertake the honors project during the first two quarters of the senior year; other arrangements must be authorized by the department chair. Only students who, at the end of their junior year (135 units), have attained a cumulative GPA of 3.500 in courses required for the major will be eligible for the honors program. The requirements for earning high and highest honors in Spanish are in addition to the regular requirements for the major in Spanish.

Education Abroad Program Options. The department encourages majors to consider study in a Spanish-speaking country with our Education Abroad Program (EAP). It is now possible for our students to complete significant portions of the Spanish major and minor or the lower (Preparatory Subject Matter) and upper division levels through newly introduced options.

UC Davis Quarter Abroad. The Quarter Abroad Program offers programs in Mendoza, Argentina (fall quarter) and in Madrid, Spain (spring quarter). These programs aim at providing students with opportunities to increase their knowledge of the Spanish language and cultures by experiencing the life-threatening challenges of living and studying abroad.

Students may earn 15-22 UC Davis units toward the Spanish major, minor, or foreign language requirement. Each program may offer an upper division course taught by the UC Davis Program Director focusing on history, culture and society.

For more information, contact C. Colombi or C. Martinez-Carazo or see http://studyabroad.ucdavis.edu/programs/quarterabroad/.

Teaching Credential Subject Representative. C. Colombi; see the Teaching Credential/M.A. Program on page 115.

Graduate Study. The Department offers courses leading to the M.A. degree in Spanish to students who have completed with distinction the A.B. degree in Spanish, or the equivalent. Candidates will be recommended for admission to graduate studies in Spanish provided they meet the requirements of the Graduate Chairman and the Department of Spanish. The Department also offers programs of study and research leading to the Ph.D. degree. Detailed information may be obtained by writing to the Chairperson or the Graduate Director of the Spanish Department.

Graduate Adviser, Mandy Bachman, mbachman@ucdavis.edu.

Prerequisite Credit. Credit normally will not be given for a course if that course is the prerequisite of a course already successfully completed. Exceptions can be made by the Department Chairperson only.

Quarter Offered: Fall, Winter, Spring, Summer; 2015-16 offering in parentheses

Pre-Fall 2011 General Education (GE): ArtHist—Arts and Humanities; SciEng—Science and Engineering; SocSci—Social Sciences; Div—Domestic Diversity; Wrt—Writing Experience

Fall 2011 and on Revised General Education (GE): AH—Arts and Humanities; SE—Science and Engineering; SS—Social Sciences; ACHG—American Cultures; DD—Domestic Diversity; OL—Oral Skills; QL—Quantitative; SL—Scientific; VL—Visual; WC—World Cultures; Wrt—Writing Experience
Courses in Spanish (SPA)

Course placement. Students with two years of high school Spanish normally take Spanish 2, those with three years take Spanish 3, and those with four years take Spanish 21. It is recommended that transfer students who have successfully completed a two-year sequence at the junior college level continue their study by taking Spanish 24, 24S, 100, 100S, 141, 141S, 170, or 170S. Consult a departmental adviser.

Lower Division

1. Elementary Spanish (5)
Lecture/discussion—5 hours; laboratory—1 hour. Introduction to Spanish grammar and development of all language skills in a cultural context with special emphasis on communication. Not open for credit to students who have completed course 1S. Students who have successfully completed Spanish 2 or 3 in the 10th or higher grade of high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student’s P/NP option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed. GE credit: WC.—I, II, III, IV.

2. Elementary Spanish (5)
Lecture/discussion—5 hours; laboratory—1 hour. Introduction to Spanish grammar and development of all language skills in a cultural context with special emphasis on communication. Offered in a Spanishspeaking country under the supervision of a UC Davis faculty/lecturer. Not open for credit to students who have completed course 1, 2S, 2, 2S, 3 or 3S. GE credit: WC.—IV. (Ivori) López-Burton

25. Elementary Spanish (5)
Lecture/discussion—5 hours; laboratory—1 hour. Continuation of course 2, 2S, 2V, or 2Y. Continuation of course 2, 2S, 2V or 2Y. Online format combining synchronous chatting with technologically based materials. Not open to students who have taken course 3, 3S, 3Y, or higher. GE credit: WC.—II, IV, IV, IV. Blake

3. Elementary Spanish (5)
Lecture/discussion—5 hours; laboratory—1 hour. Prerequisite: course 2 or 2S. Completion of grammar and continuation of all language skills using cultural texts. Not open for credit to students who have completed course 3S. GE credit: WC.—III.

35. Elementary Spanish (5)
Lecture/discussion—5 hours; laboratory—1 hour. Prerequisite: course 2 or 2S. Completion of grammar and continuation of all language skills using cultural texts. Offered in a Spanishspeaking country under the supervision of UC Davis faculty. Not open for credit to students who have completed course 3. GE credit: WC.—III.

3Y. Elementary Spanish (5)
Lecture—3 hours; web electronic discussion—2 hours. Prerequisite: course 2, 2S, 2V, or 2Y. Continuation of course 2, 2S, 2V or 2Y. Online format combining synchronous chatting with technologically based materials. Not open to students who have completed courses 3 or 3S. GE credit: WC.—II, II, III, IV. (Ii, Ii, Iii, Iv) Blake

3V. Elementary Spanish (5)
Lecture—3 hours; web electronic discussion—2 hours. Prerequisite: course 2, 2S, 2V, or 2Y. Continuation of course 2, 2S, 2V or 2Y. Online format combining synchronous chatting with technologically based materials. Not open to students who have completed courses 3 or 3S. GE credit: WC.—II, II, III, IV. (Ii, Ii, Iii, Iv)

8. Elementary Spanish Conversation (2)
Discussion—3 hours. Prerequisite: course 3; course 21 (concurrently) recommended. Designed to develop oral communication skills. Emphasis on increasing vocabulary, improving listening comprehension, pronunciation, accuracy and grammar. Practice of everyday situations. Not open to native speakers or to other division students. GE credit: OL, WC.—II, III, III. (Ii, Iii, Iii)

21. Intermediate Spanish (5)
Lecture/discussion—5 hours; laboratory—1 hour. Continuation of course 21, 21S, or 21V in the areas of grammar and basic language skills. Not open for credit to students who have completed course 21S. GE credit: WC.—II, III, III. (Ii, Iii, Iii)

215. Intermediate Spanish (5)
Lecture/discussion—5 hours; laboratory—1 hour. Prerequisite: course 21 or 21S. Review and develop the grammar, vocabulary and composition acquired in the first year through exercises and reading of modern texts. Students transferring from other institutions are recommended to start the second year program at this point. Not open for credit to students who have completed course 215. GE credit: WC.—II, III, III. (Ii, Iii, Iii)

22. Intermediate Spanish (5)
Lecture/discussion—5 hours; laboratory—1 hour. Prerequisite: course 21 or 21S. Continuation of course 21 and 21S. Focus on more difficult grammar and composition. Development of all language skills through exercises and reading of modern texts. Not open for credit to students who have completed course 21S. GE credit: WC.—II, III, III. (Ii, Iii, Iii)

22S. Intermediate Spanish (5)
Lecture/discussion—3 hours; laboratory—1 hour. Prerequisite: course 21 or 21S. Continuation of course 21 and 21S. Focus on more difficult grammar concepts and further practice on composition. Development of all language skills through exercises and reading of modern texts. Offered in a Spanishspeaking country under the supervision of UC Davis faculty. Not open for credit to students who have completed course 222. GE credit: WC.—III, IV. (Iii, Iv)

21V. Intermediate Spanish (5)
Lecture/discussion—3 hours; web electronic discussion—2 hours. Prerequisite: course 21 or 21S. Continuation of course 21, 21S, or 21V in the areas of grammar and basic language skills. Offered in a Spanishspeaking country under the supervision of UC Davis faculty. Not open for credit to students who have completed courses 221 or 222. Offered irregularly. GE credit: WC.—II, II, III, IV. (Ii, Ii, Iii, Iv) Blake, Bradley

23. Spanish Composition I (4)
Lecture—3 hours; extensive writing. Prerequisite: course 22 or 222. Development of writing skills by way of reading, discussion, and analysis of authentic materials, literary texts, and videos. Selective reading of grammar. Composition, journals, individual and group projects. Not open for credit to students who have completed 223. GE credit: WC, WE.—II, III, III. (Ii, Iii, Iii)

225. Spanish Composition I (4)
Lecture—3 hours; extensive writing. Prerequisite: course 22. Development of advanced level writing skills, with emphasis on how to write argumentative prose, essays, and research papers. Introduction to the analysis of literary genres. Compositions, journals, individual and group projects. Not open for credit to students who have completed course 225. GE credit: WC, WE.—II, III, IV. (Ii, Iii, Iv)

24. Spanish Composition II (4)
Lecture—3 hours; extensive writing. Prerequisite: course 22 or 222. Development of advanced level writing skills, with particular emphasis on how to write argumentative prose, essays, and research papers. Introduction to the analysis of literary genres. Compositions, journals, individual and group projects. Course is taught in a Spanishspeaking country. Not open for credit to students who have completed course 224. GE credit: WC, WE.—II, III, IV. (Ii, Iii, Iv)

24S. Spanish Composition II (4)
Lecture—3 hours; extensive writing. Prerequisite: course 22. Development of advanced level writing skills, with particular emphasis on how to write oral communication skills at a more advanced level. Practice in more complex situations. Former course 9. GE credit: OL, WC.—I. (I.)

31. Intermediate Spanish for Native Speakers I (5)
Lecture/discussion—3 hours; tutorial—1 hour; frequent writing assignments. Prerequisite: course 3 or the equivalent, or consent of instructor. First course of a three-quarter series designed to provide bilingual students whose native language is Spanish with the linguistic and learning skills required for successfully completing upper division courses in Spanish. Intensive review of grammar and composition. GE credit: OL, WC, WE.—I. (I.)

32. Intermediate Spanish for Native Speakers II (5)
Lecture/discussion—3 hours; tutorial—1 hour; frequent writing assignments. Prerequisite: course 31 or consent of instructor. Continuation of intensive review of grammar and composition. Development of all language skills through reading of modern...
100. Principles of Hispanic Literature and Criticism (4)
Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 24 or 24S or 33. Prerequisites of literary criticism applied to the study of fiction, drama, poetry, and essay of major literary writers of the Hispanic world. Not open for credit to students who have completed course 100S. GE credit: ArtHum | AH, OL, WC, WE.—II, III. (II, III.)

105S. Principles of Hispanic Literature and Criticism (4)
Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 24 or 24S or 33. Principles of literary criticism applied to the study of fiction, drama, poetry, and essay of major literary writers of the Hispanic world. Offered in a Spanish speaking country under the supervision of a UC Davis faculty/lecturer. Not open for credit to students who have completed course 100. GE credit: ArtHum | AH, OL, WC, WE.—II, III, II, III, III.

110. Advanced Spanish Composition (4)
Lecture—3 hours; frequent writing assignments. Prerequisite: course 24 or 33. Practice in expository writing with emphasis on clarity and idiomatic expression. Practical application and review of selected grammar topics. (Part of former courses 110A and 110B.) GE credit: WE.—II, II, III, II, II, III.

111N. The Structure of Spanish: Sounds and Words (3)
Lecture—3 hours. Prerequisite: Linguistics 1 and course 24 or 33, or consent of instructor. A linguistic description of the sound patterns of Spanish and how those sounds can be used to form larger units, such as morphemes and words. Theoretical and practical comparisons with English and with other Romance languages. (Former course 132.) GE credit: ScoSci | SS.—II, III, II, II, II, III.

112N. The Structure of Spanish: Words and Phrases (3)
Lecture—3 hours. Prerequisite: course 111N. A study of Spanish word and phrase structure, with special emphasis on the constituent structure of noun and verb phrases. Theoretical and practical comparisons with English and with the Romance languages. (Former course 131.) GE credit: ScoSci | SS.—II, II, III, II, III.

113. Spanish Pronunciation (4)
Lecture—3 hours; term paper. Prerequisite: Linguistics 1 and course 24 or 33. The sound structure of modern Spanish; theoretical analysis of selection problems in pronunciation. Strongly recommended for prospective teachers of Spanish. GE credit: ScoSci | SS.—II, III, III.

114N. Contrastive Analysis of English and Spanish (4)
Lecture—3 hours; extensive writing. Prerequisite: Linguistics 1 and course 24 or 33, or consent of instructor; courses 111N and 112N recommended. Contrastive analysis of English and Spanish, error analysis, introduction to structuralist and transformational linguistics. Individual and group conferences. (Former course 137.) GE credit: ScoSci | SS.—II, III, III.

115. History of the Spanish Language (4)
Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 24 or 24S or 33 and Linguistics 1 or consent of instructor. The Spanish language from its roots in spoken Latin to modernity. Emphasis on the close relationship between historical events and language change, and the role that literature plays in language standardization. Not open for credit to students who have completed course 115S. GE credit: ArtHum or ScoSci | AH or SS.—II, III, III, III, III.

116. Applied Spanish Linguistics (4)
Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: Linguistics 1 and course 24, 24S or 33, or consent of instructor. Exploration of the major theoretical and practical issues concerning learning Spanish as a second language. For students interested in teaching Spanish as a career. Not open to students who have taken course 116S. Offered irregularly. GE credit: ScoSci | SS.—I, II, III, II, II, II, II, II, III.

116S. Applied Spanish Linguistics (4)
Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: Linguistics 1 and course 24, 24S or 33, or consent of instructor. Exploration of the major theoretical and practical issues concerning learning Spanish as a second language. Not open for credit to students who have taken course 116S. Offered irregularly. GE credit: ScoSci | SS.—I, II, III, II, II, II, III.

117. Teaching Spanish as a Native Tongue in the U.S.: Praxis and Theory (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: Linguistics 1; course 24, 24S or 33 or consent of instructor. Designed for students interested in teaching Spanish to native speakers. Focus on cultural diversity of the Spanish speaking population in the United States; applied language teaching methodologies in the context of teaching Spanish to native speakers at different levels. Offered in alternate years. GE credit: OL.—II, II, III, III.

118. Topics in Spanish Linguistics (4)
Lecture—3 hours; term paper. Prerequisite: courses 111 and 112. A study of specialized topics in Spanish linguistics, for example, language and use, text and context; language and society; bilingualism; Spanish dialectology; syntax and semantics. May be repeated one time for credit when topics differ. GE credit: ScoSci | SS.—II, III, III.

123. Creative Writing in Spanish (4)
Discussion—4 hours. Prerequisite: course 24 or 33, or consent of instructor. Intensive writing of poetry or fiction in Spanish or in a bilingual (Spanish/English) format. Students will write both in prescribed forms and in experimental forms of their own choosing. Offered in alternate years. GE credit: WE.—II, III.

130. Survey of Spanish Literature to 1700 (4)
Lecture—3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Survey of Spanish literature from its origins in spoken Latin to modernity. Emphasis on the role of literature in shaping the political and cultural development of Spain, the role of literature in promoting national identity, and the role that literature plays in language standardization. GE credit: ArtHum | AH, WC.—I, II, III, III.

131N. Survey of Spanish Literature: 1700 to Present (4)
Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Survey of modern Spanish literature, providing an overview of the field of literary movements in Spanish literature, emphasizing the role of literature in promoting national identity, and the role that literature plays in shaping the political and cultural development of Spain, the role of literature in promoting national identity, and the role that literature plays in language standardization. GE credit: ArtHum | AH, WC.—II, III, III.

132. Golden Age Drama and Performance (4)
Lecture—1.5 hours; performance instruction—1.5 hours. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Focus on performance art. Close reading of plays and related aspects of seventeenth-century theater: the plays as a whole, the actors, the director, the sets and costumes. Final project is performance of a play. May be repeated twice for credit. GE credit: ArtHum | AH, WC, WE.—II, III.

133N. Golden Age Literature of Spain (4)
Lecture—3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Critical interpretation of Don Quijote Part One by Cervantes. Offered in alternate years. GE credit: ArtHum | AH, WC, WE.—II, III, III.

134A. Don Quijote I (4)
Lecture—3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Critical interpretation of Don Quijote Part One by Cervantes. Focus on key elements within the socio-cultural context of Golden Age Spain. Don Quijote as prototype for the modern novel. Offered in alternate years. GE credit: ArtHum | AH, WC, WE.—II, III.

134B. Don Quijote II (4)
Lecture—3 hours; term paper. Prerequisite: course 134A. Critical interpretation of Don Quijote Part Two by Cervantes. Focus on key elements within the socio-cultural context of Golden Age Spain. Don Quijote as prototype for the modern novel. Offered in alternate years. GE credit: ArtHum | AH, WC, WE.—II, III.

135N. Spanish Romanticism (4)
Lecture—3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Romanticism as a philosophical concept, and as a literary movement in Spain, with emphasis on the distinctive, specific “romantic” qualities and its literary expression in five leading authors of the early nineteenth century. (Former course 154.) GE credit: ArtHum | AH, WC.—II, III.

136N. The Spanish Novel of the 19th Century (4)
Lecture—3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Literary realism in Spain, focusing on two distinct authors: Emilia Pardo Bazán and Benito Pérez Galdós. GE credit: ArtHum | AH, WC.—II, III.
147. Anglos, Latinos, and the Spanish Black Legend: The Origins and Educational Implications of Prejudice (4) Lecture—3 hours; field work; term paper. Prerequisite: upper-division standing or consent of instructor. Examination of Anti-Hispanic prejudice in the United States focusing on the “Black Legend,” a 16th Century and subsequent myth underlying the doctrine of “Manifest Destiny.” Exploration of the Legend’s presence in contemporary American society through interviews and analysis of school textbooks. (Same course as Education 147.) Credit: ArtHum, Div. W | ACGH, AH, DD, WE.—González

148. Cinema in the Spanish-Speaking World in Translation (4) Lecture—3 hours; film viewing—3 hours. Prerequisite: course 24 or 24S or 33. Analysis of the culture of the Spanish-speaking world through film in translation. Emphasis on the cultural information illustrated by the films; no prior knowledge of cinematography required. Films with subtitles. Offered in a Spanish speaking country, in Spanish, under the supervision of UC Davis faculty. Credit to students who have completed course 148. GE credit: ArtHum, Div | AH, VI, LC.—III (III) Martínez-Carazo

1485. Cinema in the Spanish-Speaking World in Translation (4) Lecture—3 hours; film viewing—3 hours. Prerequisite: course 24 or 24S or 33. Analysis of the culture of the Spanish-speaking world through film in translation. Emphasis on the cultural information illustrated by the films; no prior knowledge of cinematography required. Films with subtitles. Offered in a Spanish speaking country, in Spanish, under the supervision of UC Davis faculty. Credit to students who have completed course 148. GE credit: ArtHum, Div | AH, VI, LC.—III (III) Martínez-Carazo

149. Latin-American Literature in Translation (4) Lecture/discussion—3 hours; term paper. Prerequisite: English 3 or the equivalent. Reading, lectures and discussions in English of works by Borges, Cortázar, Fuentes, García Márquez, Paz and others. May be repeated two times for credit. Offered in alternate years. GE credit: ArtHum | AH, WC.—II (II) Egan, Peluffo

150N. Survey of Latin American Literature to 1900 (4) Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Latin American literature from 1530 to 1900. Emphasis on the cultural information illustrated by the films; no prior knowledge of cinematography required. Films with subtitles. Offered in a Spanish speaking country, in Spanish, under the supervision of UC Davis faculty. Credit to students who have completed course 148. GE credit: ArtHum, Div | AH, VI, LC.—III (III) Martínez-Carazo

151. Survey of Latin American Literature from 1900 to Present (4) Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Latin American literature from 1900 to the present. Readings include fiction, poetry, drama, essays, memoirs, etc. GE credit: ArtHum | AH, WC.—II (II) Bejel, Bermucci, Egan

151N. Survey of Spanish-American Literature 1900 to Present (4) Lecture—3 hours; discussion—1 hour. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Latin American literature from 1900 to the present. Readings include fiction, poetry, drama, essays, memoirs, etc. GE credit: ArtHum | AH, WC.—II (II) Bejel, Bermucci, Egan

152. Special Topics in Spanish Cultural and Literary Studies (4) Lecture—3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Special topics in the study of Spanish literature and culture. May be repeated two times for credit. GE credit: ArtHum | AH, OL, WC, 170—II, III, IV (III) Alls- ent, Arnieead, González, Martín, Martínez-Carazo

153. Spanish Art (4) Lecture—3 hours; term paper or discussion—1 hour. Spanish art and the different historical, sociological and political manifestations that frame it. History of art, including Paleolithic, Roman, Visigothic, Romanesque, Gothic, Renaissance, Baroque, Neoclassical and Contemporary art. GE credit: ArtHum | AH, VI, LC.—IV (IV) Martínez-Carazo

154. Topics in Spanish Cultural Studies (4) Lecture—3 hours; project. Prerequisite: course 24, 24S, or 33. Study of specific historical tendencies in Spanish culture(s) from the Romans to the present. Sources may include literature, film, art, journalism, and performance. Approaches to material may address issues of aesthetics, politics, identity, and globalization. May be repeated one time for credit. GE credit: ArtHum | AH, WC.—II (II) González, Martínez-Carazo

155. Mexican Novel (4) Lecture—3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Evolution of the Mexican novel from the 19th century to the present. Emphasis on significant contemporary works. Offered in alternate years. GE credit: ArtHum | AH, WC.—III (III) Bermucci, Egan

156. Latin American Literature of the Turn of the 20th Century (4) Lecture—3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Modernism as an authentic expression of Latin American literature and its influence on 20th-century poetry and prose. In depth analysis of the works of Darío and other major writers of the era. Offered in alternate years. GE credit: ArtHum | AH, WC.—III (III) Egan, Peluffo

157. Great Works of Latin American Literature/Culture (4) Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Study of major works of Latin American literature and culture and their cultural milieu. May include novels, poetry, film, etc. Works may be analyzed in terms of style, influence, cultural significance, political importance, and/or commercial success. Offered in alternate years. GE credit: ArtHum | AH, WC.—II (II) Bejel, Bermucci, Egan, Irwin, Lazzara, Peluffo

158. Latin American Poetry: From Vanguardism to Surrealism and Beyond (4) Lecture—3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Study of vanguardism, surrealism, and more recent movements of Latin American poetry. An in-depth analysis of the works of such major poets as Neruda, Vallejo, and Paz. Offered in alternate years. GE credit: ArtHum | AH, WC.—II (II) Bejel, Bermucci, Egan

159. Special Topics in Latin American Literature and Culture (4) Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Special topics in the study of Latin American literature and culture. May be repeated two times for credit when topic differs. Offered in alternate years. GE credit: ArtHum | AH, WC.—II (II), III, IV (II, III, IV) Bejel, Bermucci, Egan, Irwin, Lazzara, Peluffo

160. Latin American Women Writers in Translation (4) Lecture—discussion—3 hours; term paper. Prerequisite: upper-division standing or consent of instructor. Latin American women writers from the 19th and 20th centuries. Recent theoretical approaches to literary and cultural studies. Discussion in English of works by Matto de Turner, Avellaneda, Stam, Ocampo, Agustini, Mistral, Castellanos, and others. Offered in alternate years. GE credit: ArtHum, Div. W | AH, WC.—III (III) Lazzara, Peluffo

161. Introduction to Latin American Culture (4) Lecture—3 hours; term paper. Prerequisite: course 24, 24S or 33. Introduction to history, geography and culture of Latin America. Discussions in English of works by Matto de Turner, Avellaneda, Stam, Ocampo, Agustini, Mistral, Castellanos, and others. Offered in alternate years. GE credit: ArtHum | AH, WC.—III (III) Lazzara, Peluffo

162. Implications of Anti-Hispanic Prejudice (4) Lecture—3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Study of the roots and consequences of anti-Hispanic prejudice. Offered in alternate years. GE credit: ArtHum | AH, WC, WE.—III (III) Altisent
1705. Introduction to Latin American Culture (4) Lecture—3 hours; project. Prerequisite: course 24, 24S, or 33. Introduction to history, geography, and culture of Latin America. Multiple genres of cultural production and representation, with a focus on cultural diversity and regional difference. Introduction to critical reading and textual analysis. Not open for credit for students who have completed course 170. GE credit: ArtHum, Div | AH, VI, WC, WE.—III. (III.) Alarcón, Lazzara, Peluffo

171. Music from Latin America (4) Lecture—3 hours; discussion—1 hour. Prerequisite: consent of instructor. Examination of music from Latin America. Characteristic music (i.e. tango, bossa nova, salsa, motaola, musica andina) as well as its implications in other musical genres. Taught in Spanish. Not open to students who have taken course 171S or Music 127. (Same course as Music 127) May be repeated one time for credit when content differs. Offered in alternate years. GE credit: ArtHum | AH, WC.—II. Irwin, Ortiz

172. Mexican Culture (4) Lecture—3 hours; term paper or discussion—1 hour or term paper. Prerequisite: course 24, 24S or 33. Study of Mexican culture through a diversity of cultural expressions, including elite, popular and mass media culture. Focus on national icons and archetypes, multiculturalism. May be repeated once for credit. GE credit: ArtHum, Div | AH, VI, WC.—III. (III.) Egan, Irwin

173. Cinema and Latin American Culture (4) Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: course 24, 24S, or 33. Understanding Latin American Cinema. History and critical analysis of Latin American film. Focus on a national cinematic tradition. Comparative experiences in different parts of Latin America and/or a particular era. Conducted entirely in Spanish. May be repeated one time for credit. GE credit: ArtHum, Div | AH, VI, WC.—Irwin

174. Chicano Culture (4) Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 24 or 33. An interdisciplinary survey of Chicano culture. Topics include literature, art, folklore, oral tradition, music, politics, as well as everyday cultural phenomena. Conducted in Spanish. (Former course 124.) GE credit: ArtHum, Div | AGCH, AH, DD.—II. (II.) Alarcón

175. Topics in Spanish American Cultural Studies (4) Lecture—3 hours; project—1 hour. Prerequisite: course 24, 24S, or 33. Specific historical tendencies and issues in Latin American culture(s) from pre-Columbian times to present. Studies of literature, film, art, journalism and performance. Focus on issues of aesthetic, political, and globalization. May be repeated once for credit if content differs. GE credit: ArtHum, Div | AH, VI, WC, WE.—III. (III.) Bejel, Irwin, Lazzara, Peluffo

176. Literature in Spanish Written in the United States (4) Lecture—3 hours; term paper. Prerequisite: course 24 or 33. Survey of the literary and cultural contributions of the main Spanish-speaking populations present in the U.S. (i.e. Chicanos, Puerto Ricans, Cubans, Americans, Central Americans, and others). GE credit: ArtHum, Div | AGCH, AH, DD.—III. (III.) Alarcón

177. California and Latin America (4) Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 24, 24S or 33. Interdisciplinary survey on the relationship between California and Latin America (1500s-present). Latin American representation in California, L.A. Chicano, and California representations of Latin America, as well as borders texts, with a special focus on Mexican-American perspectives. Conducted in Spanish. GE credit: AGCH, DD.—Irwin

180. Senior Seminar in Spanish Linguistics (4) Seminar—3 hours; term paper. Prerequisite: senior standing; a major in Spanish or consent of instructor. Group study of a special topic drawn from Spanish linguistics. Limited enrollment. May be repeated one time for credit. GE credit: ArtHum, Div | AH or SS, OL, WE.—I. (I.) Blake, Bradley, Colombi

181. Senior Seminar in Spanish Literature/Culture (4) Seminar—3 hours; term paper—1 hour. Prerequisite: senior standing; a major in Spanish or consent of instructor. Group study of a special topic drawn from Spanish literature or cultural studies. Independent research project. May be repeated one time for credit if content differs. Limited enrollment. GE credit: ArtHum | AH, OL, WE.—II. (II.) Aliscens, González, Martín, Martínez-Corazo

182. Senior Seminar in Latin American Literature/Culture (4) Seminar—3 hours; term paper—1 hour. Prerequisite: senior standing; a major in Spanish or consent of instructor. Group study of a special topic drawn from Latin American literature or cultural studies. Independent research project. May be repeated one time for credit if content differs. GE credit: ArtHum, Div | AH, OL, WC, WE.—III. (III.) Bejel, Egan, Irwin, Lazzara, Peluffo

1921. Internship in Spanish (1-12) Independent study—3-36 hours. Prerequisite: course 23; junior standing or consent of instructor. Internship in Spanish. Limited to 8 units. Units will not count toward the Spanish major. (P/NP grading only)

194H. Special Study for Honors Students (1-5) Independent Study—3-15 hours. Prerequisite: senior standing and qualification for the Spanish honors program. Guided research, under the direction of a faculty member, leading to a senior honors thesis on a topic in Spanish literature, civilization, or language studies. May be repeated for up to 8 units of credit. (P/NP grading only; GE credit: AH, WC, WE)

197T. Tutoring in Spanish (1-4) Tutorial—1-4 hours. Prerequisite: upper division standing and permission of the chair. Tutoring in undergraduate courses including leadership in small voluntary discussion groups affiliated with departmental courses. May be repeated for credit for a total of 6 units. (P/NP grading only)

197TC. Tutoring in the Community (2-4) Tutorial—2-4 hours. Prerequisite: upper division standing and permission of the chair. Tutoring in public schools under the guidance of a regular teacher and supervision by a departmental faculty member. May be repeated for credit for a total of 6 units. (P/NP grading only)

199. Directed Research Study (1-5) Prerequisite: consent of instructor and Department Chairperson. (P/NP grading only) GE credit: AH, WC, WE

199 Special Study for Advanced Undergraduates May be repeated for up to 6 units of credit (P/NP grading only). GE credit: AH, WC, WE

Graduate

201. Literary Theory I (4) Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Basic theories and practical approaches to modern and contemporary Hispanic literature. Formalism, poststructuralism, socio-cultural discourses, and ideologies. (Offered in alternate years) I (II.) Bejel

202. Literary Theory II (4) Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Major contemporary critical theories including recent, innovative approaches to Hispanic literature and culture. Readings from Semiotics and Deconstructionism to Psychological and Sociological approaches. Emphasis on Postmodern and Neo-colonial discourse. (Offered in alternate years) I (II.) Bejel

203. Research Methodologies (1) Seminar—2 hours. Introduction to the range of scholarly research methodologies currently being realized in Spanish linguistics, literary and cultural studies: archival research, textual analysis, discourse analysis, statistics for linguistics, et c. introduction to scholarly writing (MLA style) and scholarly publishing. (S/U grading only). (II.) Bejel, Bernucci, Blake, Carazo, Colombi, Egan, Irwin, Martín, Martínez-Lazzara, Newcomb, Peluffo

205. Spanish Phonology (4) Seminar—3 hours; term paper. Prerequisite: some knowledge of phonetics is required and consent of instructor. Linguistics 109 and 139 highly recommended. Analyzes the sound patterns of Spanish from both linear and nonlinear perspectives. Students will develop a clear understanding of what phonology and the nature of Spanish phonology, as defined by modern linguistic analysis. (II.)

206. Spanish Syntax (4) Seminar—3 hours; term paper. Prerequisite: Linguistics 140 and 165. An examination of Spanish word order within the framework of general linguistic theory. The student will investigate how to write a grammar of Spanish with particular attention to the structure of noun and verb clauses. (I.) Blake

207. History of the Spanish Language (4) Seminar—3 hours; term paper. Prerequisite: Latin 1. (Former course 202A.) I, II, III, IV. (III.) Blake

208. Old Spanish Texts (4) Seminar—3 hours; term paper. Prerequisite: course 207. An in-depth linguistic examination of Old Spanish texts from the 12th to the 15th centuries, with particular attention to the significance of orthographic changes. (II.) Blake

211. Hispanic Dialectology (4) Seminar—3 hours; term paper. Prerequisite: course 220 or consent of instructor. Descriptive and historical study of the distinctive features of Peninsular and American Spanish dialects. (Former course 221.)—I, II, III, IV

212. Applied Linguistics (4) Seminar—3 hours; term paper. Prerequisite: graduate standing and courses 215 and 216 recommended. Focuses on the relevant linguistic aspects of teaching Spanish. Designed for graduate students who have an interest in second-language learning and teaching. (II.) Colombi, Blake

215. Special Topics in Hispanic Linguistics (4) Seminar—3 hours; term paper. Prerequisite: consent of instructor, courses 205 and 206 recommended. Specialized topics in Hispanic linguistics (e. g., pragmatics, sociolinguistics, topics in syntax, semantics, or diachronic studies). May be repeated for credit when topic differs. (II.)

222. Critical Approaches to Spanish Literature I: Prose and Essay (4) Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Critical approaches to Spanish narrative and essay. May be repeated two times for credit when topic differs. Offered in alternate years. (II.) Aliscens, Martin

223. Critical Approaches to Spanish Literature II: Poetry and Drama (4) Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Critical approaches to Spanish poetry and drama. May be repeated two times for credit when topic differs. Offered in alternate years. (II.) Aliscens, Martin

224. Studies of a Major Writer, Period, or Genre in Spanish Literature (4) Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Artistic development of a major Spanish writer and his/her...
intellectual and literary milieu or study of a special topic, period, or genre. May be repeated for credit with consent of instructor.—(III.)

220. Catalan Language and Culture (4)
Lecture/discussion—3 hours; laboratory—1 hour. Prerequisite: good command of Spanish, Portuguese, French or Italian and graduate level of study in these other languages. Open to advanced undergraduate students, with notions of Catalan, can be admitted with consent of instructor; designed for graduate students. Foundation for the acquisition of Catalan as a resource and for elementary writing level skills for students of Spanish (Iberianists or Hispanicists), with the capacity to interpret educated written language. Emphasis on weekly review of grammar and all language skills. Offered irregularly.—I. Altisent

231. Interamerican Studies (4)
Seminar—3 hours; term paper. Survey of methodological investigations of research for transnational or comparative projects in the geographical context of the Americas. Focus on particular problems of language, discipline, national definitions, and global hierarchies of knowledge that complicate such projects. Readings of interamerican cultural texts. Offered in alternate years.—(II.) Irwin

252. Medieval Spanish Literature: Prose (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. An exploration of the major genres of medieval Spanish prose from its origins to 1450.—I. (I.)

253. Medieval Spanish Literature: Epic (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Medieval Spanish epic literature; major theoretical perspectives on the genesis, diffusion, and character of the Medieval epic. Relationship of epic to ballad literature.—II. (II.)

254. Medieval Hispanic Lyric (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Analysis of the most representative lyric poetry in the various Peninsula languages and in provencal, troubadour poetry, Ahd, villancicos, cantigas de amigo, and courtly lyric.—III. (III.)

255. Spanish Literature of the Early Renaissance (4)
Seminar—3 hours; term paper. Spanish literature, 1450-1550, with emphasis on La Celestina. (Former course 229.)—I. (I.) Martin

256. Spanish Literature of the Renaissance and Golden Age: Poetry (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Exegetical critical study of the main currents of Renaissance and Baroque Spanish poetry through its language structures, styles ("Culturismo-Conceptismo"), rhetorical devices, myths, and themes (love, death, time).—I. (I.) Martin

257. Spanish Literature of the Renaissance and Golden Age: Drama (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. An exploration of major 16th and 17th century literary and cultural developments through the study of selected dramas.—I. (I.) Martin

258. Spanish Literature of the Renaissance and Golden Age: Prose (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. The origins and development of the Spanish novel during the Renaissance and the Spanish Golden Age.—I. (I.) Martin

259. Cervantes and the Novel (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. The narrative works of Miguel de Cervantes with special emphasis on Don Quijote.—I. (I.) Martin

260. Modern Spanish Literature (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Topics of Spanish literature, from 1700-1920.—I. (I.)
A.B. Major Requirements:

Preparatory Subject Matter .......... 19-23
Mathematics 16A, 16B, 16C, or 17A, 17B, 17C; or 21A, 21B, 21C .......... 9-12
Mathematics 22A ................................ 3
Computer Science Engineering 30 or
Computer Science Engineering 40 (or the equivalent) .................. 4
Statistics 32 .................................. 4

Depth Subject Matter ................. 45-48
Statistics 106, 108, 138 or the equivalent ........................................ 12
Statistics 130A, 130B ....................... 8
Statistics 137 or 141 .......................... 4
Three courses from Statistics 104, 135, 137, 141, 142, 144, 145 .......... 12
Related elective courses ................. 9-12
Three upper division courses approved by major adviser; they should follow a coherent sequence in one single discipline in the social sciences where statistical methods and models are applied and should cover the quantitative aspects of the discipline.

Total Units for the Major ............... 64-71

B.S. Major Requirements:

General Statistics option UNITS

Preparatory Subject Matter .......... 30-32
Mathematics 21A, 21B, 21C, 21D ............ 16
Mathematics 22A, or 67 ................... 3-4
Mathematics 25 ................................ 4
Computer Science Engineering 30 or
Computer Science Engineering 40 (or the equivalent) .................. 4
Any one introductory statistics course except Statistics 10 ..................... 3-4

Depth Subject Matter ................. 51-52
Statistics 131A, 131B ....................... 8
Three courses from Statistics 104, 135, 137, 141, 142, 144, 145 .......... 12
Mathematics 125A, 108 or 125B, and 167 ........................................ 12
Related electives ......................... 3-4
One upper division course approved by major adviser; it should be in mathematics, computer science or in quantitative aspects of a substantive discipline.

Total Units for the Major ............... 81-84

Applied Statistics option

Preparatory Subject Matter .......... 26-31
Mathematics 22A ................................ 3
Computer Science Engineering 30 or
Computer Science Engineering 40 (or the equivalent) .................. 4
Two introductory courses serving as the prerequisites to upper division courses in a chosen discipline to which statistics is applied .................. 7-8
Any one introductory statistics course except Statistics 10 ..................... 3-4

Depth Subject Matter ................. 51-56
Statistics 130A, 130B ....................... 8
Three courses selected from Statistics 104, 135, 137, 142, 144, 145 .......... 12
Five upper division elective courses outside of Statistics ........................... 15-20
Electives are chosen with and must be approved by the major adviser. Electives should follow a coherent sequence in one single discipline where statistical methods and models are applied: at least three of them should cover the quantitative aspects of the discipline.

Total Units for the Major ............... 77-87

Computational Statistics option Preparatory Subject Matter .......... 30-31
Mathematics 21A, 21B, 21C, 21D ............ 16
Mathematics 22A ................................ 3
Computer Science Engineering 30 or
Computer Science Engineering 40 (or the equivalent) .................. 4
Any one introductory statistics course except Statistics 10 ..................... 3-4

Depth Subject Matter ................. 52
Statistics 106, 108, 141 ..................... 12
Statistics 131A, 131B ....................... 8
Two courses from Statistics 104, 135, 137, 138, 142, 144, 145 .......... 16
Programming, Data Management & Data Technologies: Computer Science Engineering 130 or 145, and 165A or 166 ........ 8
Two courses on Scientific Computational Algorithm and Visualization from: Computer Science Engineering 122A, 129, 140A, 138, 139, 163 .......................... 16

Total Units for the Major ............... 82-83

Major Adviser: A. Aue

Students are encouraged to meet with an adviser to plan a program as early as possible. Sometimes before or during the first quarter of the junior year, students planning to major in Statistics should consult with a faculty adviser to plan the remainder of their undergraduate programs.

Minor Program Requirements: The Department offers a minor program in Statistics that consists of five upper division level courses focusing on the fundamentals of mathematical statistics and of the most widely used applied statistical methods.

Minor Program Requirements:

Students must complete five upper division level courses focusing on the fundamentals of mathematical statistics and of the most widely used applied statistical methods. The Department offers such courses in the following disciplines: Mathematics, Computer Science, and Economics.

Statistics 106, 108, and 130A-130B or 131A:131B .................... 16
One course from: Statistics 104, 135, 137, 138, 141, 142, 144, 145 .... 4
Preparation: Statistics 13 or 22 or 100 or 102 .......................... 8

Graduate Study. The Graduate Program in Statistics offers study and research leading to the M.S. and Ph.D. degrees in Statistics, including a Ph.D. in Statistics with an emphasis in Biostatistics. Detailed information concerning these degree programs, as well as information on admissions and on financial support, is available from the Department of Statistics.

Graduate Adviser: D. Paul

Statistical Consulting. The Department provides a consulting service for researchers on campus. For more information, call the Statistical Laboratory office 530-752-6096.

Integrated B.S./M.S. Degree Program

The Department offers undergraduate majors a path into the Statistics M.S. program through the Integrated Degree Program (I.D.P.). This program is intended for students who seek to be employed as statisticians in government or industry. The minimum
major GPA requirement is 3.200 at the end of the junior year, although students with demonstrated excellence, at the discretion of the academic work (with a major GPA of 3.500 or above) are most likely to be admitted. Students with a major GPA of 3.500 or above may waive the GRE requirement in the M.S. application. Before moving into the graduate phase, I.D.P. students must satisfy all requirements of the B.S. degree.

To apply for the I.D.P., undergraduate students must submit the Statistics I.D.P. form along with supporting documentation during the last quarter of their junior year. In addition, applicants must submit an application to the M.S. program during the senior year prior to the deadline of May 31st. Before applying to the I.D.P., students are strongly advised to consult with both the undergraduate and graduate advisers.

Once a student enters the graduate phase of the I.D.P., they follow the course requirements for the Master’s degree (36 units, 18 of which are graduate level). A maximum of 12 units taken in the undergraduate phase can be transferred to the M.S. program. Students have not been allowed to satisfy any requirements of the B.S. degree.

Courses in Statistics (STA)

Lower Division

10. Statistical Thinking (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: two years of high school algebra. Statistics and probability in daily life. Examines principles of collecting, presenting and interpreting data in order to critically assess results reported in the media. Emphasizes understanding polls, unemployment rates, health studies; understanding probability, risk and odds. GE credit: SciEng | QL, SE.—I, II, III.

12. Introduction to Discrete Probability (4)
Lecture—3 hours; laboratory—1 hour. Prerequisite: two years of high school algebra. Random experiments; countable sample spaces; elementary probability axioms; counting formulas; conditional probability; Bayes theorem; expectation; gambling problems; binomial, hypergeometric, Poisson, geometric, negative binomial and multinomial models; limiting distributions; Markov chains. Applications not used to be satisfied any requirements of the B.S. degree.

Upper Division

100. Applied Statistics for Biological Sciences (4)
Lecture—3 hours; laboratory—1 hour. Prerequisite: Mathematics 16B or the equivalent. Descriptive statistics, probability, sampling distributions, estimation, hypothesis testing, contingency tables, ANOVA, regression; implementation of statistical methods using computer package. Only two units credit allowed to students who have taken courses 13, 32 or 103. Not open for credit to students who have taken course 102. GE credit: SciEng | QL, SL.—I, II, III.

90X. Seminar (1-2)
Seminar—1 to 2 hours. Prerequisite: high school algebra and consent of instructor. Examination of a special topic in a small group setting.

98. Directed Group Study (1-5)
Prerequisite: consent of instructor. (P/NP grading only)

99. Special Study for Undergraduates (1-5)
Prerequisite: consent of instructor. (P/NP grading only)

120. Probability and Random Variables for Engineers (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: Mathematics 21A, B, C. And D. Basic concepts of probability theory with applications to electrical engineering, discrete and continuous random variables, conditional probability, combinatorics, bivariate distributions, transformation of variables, large numbers, central limit theorem, and approximations. No credit for students who have completed course 131A or Civil and Environmental Engineering 114. GE credit: SciEng | QL, SE.—I, II, III.

130A. Mathematical Statistics: Brief Course (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: Mathematics 16B. Basic probability, densities and distributions, mean, variance, covariance, Chebyshev’s inequality, some special distributions, sampling distributions, central limit theorem and law of large numbers, point estimation, some methods of estimation, interval estimation, confidence intervals for certain quantities, computing sample sizes. Only 2 units of credit allowed to students who have taken course 131A. GE credit: SciEng | QL, SE.—I (I).

130B. Mathematical Statistics: Brief Course (4)

131A. Introduction to Probability Theory (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 131A. Probability and random variables, discrete and continuous random variables, random processes, moment generating functions, laws of large numbers and the central limit theorem. Not open for credit to students who have completed Mathematics 135A. GE credit: SciEng | QL, SE.—I, II, III.

131B. Introduction to Mathematical Statistics (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 131B, or consent of the instructor. Sampling, methods of estimation, sampling distributions, confidence intervals, testing hypotheses, linear regression, analysis of variance, elements of large sample theory and nonparametric inference. GE credit: SciEng | QL, SE.—II, III.

131C. Introduction to Mathematical Statistics (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 131C, or consent of the instructor. Sampling, methods of estimation, sampling distributions, confidence intervals, testing hypotheses, linear regression, analysis of variance, elements of large sample theory and nonparametric inference. GE credit: SciEng | QL, SE.—II, III.

133. Mathematical Statistics for Economists (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 103 and Mathematics 168, or the equivalents; no credit will be given to students majoring in Statistics, Probability, or Civil and Environmental Engineering 114. Multiple continuous random variables (binomial, normal, t, chi-square); expectation and variance of a random variable; bivariate random variables (bivariate normal); sampling distributions, central limit theorem, estimation, maximum likelihood principle; basics of hypotheses testing [one-sample]. GE credit: SciEng | QL, SE.

135. Multivariate Data Analysis (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 130B, and preferably course 131B. Multivariate normal distribution; Mahalanobis distance; sampling distributions of the mean vector and covariance matrix; Hotelling’s T²; simultaneous inferential...
expectation. Topics selected from martingales, Markov chains, ergodic theory. (Same course as Mathematics 235A.)—II, III. (III.)

237A-237B. Time Series Analysis (4-4)
Lecture—3 hours; term paper. Prerequisite: course 131B or the equivalent; course 237A is a prerequisite for course 237B. Advanced topics in time series analysis. Models for experimental data, measures of dependence, large-sample theory, statistical estimation and inference. Univariate and multivariate spectral analysis, regression, ARIMA models, state-space models, Kalman filtering.
Offered in alternate years. —II, III.

238. Theory of Multivariate Analysis (4)
Lecture—3 hours; term paper. Prerequisite: courses 131B and 135. Multivariate normal and Wishart distributions, Hotelling’s T-squared, simultaneous inference, likelihood ratio and union intersection tests, Bayesian methods, discriminant analysis, principal component and factor analysis, multivariate clustering, multivariate regression, analysis of variance, application to data. Offered in alternate years. —II.

240A-240B. Nonparametric Inference (4-4)
Lecture—3 hours; term paper. Prerequisite: course 231C, courses 235A-235B-235C recommended. Topics in asymptotic theory of statistics chosen from weak convergence, contiguity, empirical processes, Edgeworth expansion, and semiparametric inference. Offered in alternate years. (III.)

241. Asymptotic Theory of Statistics (4)
Lecture—3 hours; term paper. Prerequisite: course 231C; courses 235A-235B-235C desirable. Topics in asymptotic theory of statistics chosen from weak convergence, contiguity, empirical processes, Edgeworth expansion, and semiparametric inference. Offered in alternate years. (III.)

242. Introduction to Statistical Programming (4)
Lecture—3 hours; laboratory—1 hour. Prerequisite: courses 130A and 130B or equivalent. Essentials of statistical computing using a general-purpose statistical language. Topics include algorithms; design, debugging and efficiency; object-oriented concepts; model specification and fitting; statistical visualization; data and text processing; databases; computer systems and platforms; comparison of scientific programming languages. Offered in alternate years. —II.

243. Computational Statistics (4)
Lecture—3 hours; laboratory—1 hour. Prerequisite: courses 130A and 130B or equivalent, and Mathematics 167 or Mathematics 67 or equivalent. Numerical analysis; random number generation; computer experiments and resampling techniques (bootstrap, cross validation); numerical optimization; matrix decompositions and linear algebra computations; algorithms (Markov chains, Monte Carlo, expectation-maximization); algorithm design and efficiency; parallel and distributed computing. Offered in alternate years. —II.

250. Topics in Applied and Computational Statistics (4)
Lecture—3 hours; lecture/discussion—1 hour. Prerequisites: course 131A; course 232A recommended, not required. Resampling, nonparametric and semiparametric models, incomplete data analysis, diagnostics, multivariate and time series analysis, applied Bayesian methods, sequential analysis and quality control, categorical data analysis, spatial and image analysis, computational biology, functional data analysis, models for correlated data learning theory. May be repeated for credit with consent of graduate adviser. Offered irregularly. —I, II, III.

251. Topics in Statistical Methods and Models (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 231B or the equivalent. Topics may include Bayesian analysis, nonparametric and semiparametric regression, sequential analysis, bootstrap, statistical methods in high dimensions, reliability, spatial processes, inference for stochastic process, stochastic methods in finance, empirical processes, change-point problems, asymptotics for parametric, nonparametric and semiparametric models, nonlinear time series, robustness. May be repeated for credit with consent of instructor. Offered irregularly. —II.

252. Advanced Topics in Biostatistics (4)
Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: course 222, 223. Biostatistical methods and models selected from the following: genetics, bioinformatics and genomics; longitudinal or functional data; clinical trials and experimental design; animal and human; science and engineering; nutrition and toxicology; survival analysis; observational studies and epidemiology; computer-intensive or Bayesian methods in biostatistics. May be repeated for credit with consent of adviser when topic differs. (Same course as Biostatistics 252.) Offered in alternate years. —III.

280. Orientation to Statistical Research (2)
Seminar—2 hours. Prerequisite: consent of instructor. Guided orientation to original statistical research papers, and oral presentations in class of such papers by students under the supervision of a faculty member. May be repeated one time for credit. (S/U grading only.)—II.

290. Seminar in Statistics (1-6)
Prerequisite: consent of instructor. Seminar on advanced topics in probability and statistics. (S/U grading only.)—I, II, III. (I, II, III.)

292. Graduate Group in Statistics Seminar (1-2)
Seminar—1-2 hours. Prerequisite: graduate standing. Advanced study in various fields of statistics with emphasis in advanced topics presented, by members of the Graduate Group in Statistics and other guest speakers. (S/U grading only.)—II, III. (I, II, III.)

299. Individual Study (1-12)
Prerequisite: consent of instructor. (S/U grading only.)

299D. Dissertation Research (1-12)
Prerequisite: advancement to candidacy for Ph.D., consent of instructor. (S/U grading only.)

300. Professional (1-4)

300A. Methods of Teaching Statistics (2)
Lecture/discussion—1 hour; laboratory—1 hour. Prerequisite: graduate standing. Practical experience in methods/problems of teaching statistics at university undergraduate level. Lecturing techniques, analysis of tests and supporting material, preparation and grading of examinations, and use of statistical software. Emphasis on practical training. May be repeated for credit. (S/U grading only.)—I, II, III.

365. Teaching Assistant Training Practicum (1-4)
Prerequisite: consent of instructor; graduate standing. (S/U grading only.)—I, II, III, IV, V, VI, VII. (I, II, III.)

369. Methods in Statistical Consulting (3)
Lecture—3 hours; discussion—1 hour. Introduction to consulting, in-class consulting as a group, statistical consulting with clients, and in-class discussion of consulting problems. Clients are drawn from a pool of University students. Must be enrolled in the graduate program in Statistics or Biostatistics. May be repeated for credit with consent of graduate adviser. Offered irregularly. (S/U grading only.)—I, II, III, IV, V, VI, VII. (I, II, III.)

390. Methods of Teaching Statistics (2)
Lecture/discussion—1 hour; laboratory—1 hour. Prerequisite: graduate standing. Practical experience in methods/problems of teaching statistics at university undergraduate level. Lecturing techniques, analysis of tests and supporting material, preparation and grading of examinations, and use of statistical software. Emphasis on practical training. May be repeated for credit. (S/U grading only.)—I, II.

396. Teaching Assistant Training Practicum (1-4)
Prerequisite: consent of instructor; graduate standing. (S/U grading only.)—I, II, III, IV, V, VI, VII. (I, II, III.)

399. Individual Study (1-12)
Prerequisite: consent of instructor. (S/U grading only.)

399D. Dissertation Research (1-12)
Prerequisite: advancement to candidacy for Ph.D., consent of instructor. (S/U grading only.)

400. Methods in Statistical Consulting (3)
Lecture—3 hours; discussion—1 hour. Introduction to consulting, in-class consulting as a group, statistical consulting with clients, and in-class discussion of consulting problems. Clients are drawn from a pool of University students. Must be enrolled in the graduate program in Statistics or Biostatistics. May be repeated for credit with consent of graduate adviser. Offered irregularly. (S/U grading only.)—I, II, III, IV, V, VI, VII.

401. Methods in Statistical Consulting (3)
Lecture—3 hours; discussion—1 hour. Introduction to consulting, in-class consulting as a group, statistical consulting with clients, and in-class discussion of consulting problems. Clients are drawn from a pool of University students. Must be enrolled in the graduate program in Statistics or Biostatistics. May be repeated for credit with consent of graduate adviser. Offered irregularly. (S/U grading only.)—I, II, III, IV, V, VI, VII.

Graduate Study. The Graduate Program in Statistics offers programs of study and research leading to the M.S. and Ph.D. degrees. The M.S. gives students a strong foundation in the theory of statistics as well as substantial familiarity with the most widely used statistical methods. Facility in computer programming is essential for some of the course work. The supervised statistical consulting required of M.S. students has proven to be a valuable educational experience. The Ph.D. program combines advanced course work in statistics and probability with the opportunity for indepth study in an applied field. For detailed information contact the Chairperson of the Program or the Graduate Adviser.

Preparation. Preparation for the graduate program requires a year of calculus, a course in linear algebra, facility with a programming language and upper division coursework in mathematics and/or statistics. For admission to the Ph.D. program, coursework requirements for the M.S. degree, and at least one semester/two quarters of advanced calculus must be completed.

Graduate Study. The Graduate Group in the Study of Religion offers students classical training in the literatures of particular religious traditions, and they are encouraged to understand these traditions at the intersection of contemporary thematic and regional phenomena. Students have the opportunity to concentrate primarily on one of three regional specializations: American religious cultures, Mediterranean religions, and Asian religions. An additional regional specialization typically serves as a secondary area of competence. Students further shape their scholarship through intensive engagement in one of the following thematic specializations: Values, Ethics, and Human Rights; Modernity, Science, and Secularism; Visual Culture, Media, and Technology; Language, Rhetoric, and Performance; Body and Praxis; Theory and Method. This curriculum guides students through a rigorous course of study, providing the breadth and depth necessary to produce exciting, rigorous scholarship at forefront of the field of Religious Studies. Graduate Group training prepares students for careers in academia as well as in the government and the private sector.

Preparation. Admission to the Graduate Group requires a Bachelor's degree in a discipline relevant to the study of religion, as well as preparation in at least one language relevant to the intended area of primary research. The group requires three letters of recommendation and a sample of recent written work. The general GRE is also required.

Graduate Adviser. Contact the Group office.

Courses in Study of Religion (REL)
Graduate

200A. Historical Roots of the Study of Religion (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Consideration of the historical and philosophical formation of religion as a concept. Treats the emergence of religion as a category of analysis and understanding from the Reformation through the Enlightenment.—I—(I) Chin, Coudert, Elmore, Janowitz

200B. Foundational Theories of Religion (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Survey of classical 19th and 20th century approaches to the study of religion.—II—(II) Chin, Coudert, Elmore, Janowitz

200C. Contemporary Approaches to the Study of Religion (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Consideration of major themes, issues and methods in the contemporary study of religion. Perspectives from diverse cultural settings employed to consider modern historical, philosophical, and social contexts that inform understandings of religion.—III—(III) Chin, Elmore, Janowitz

200D. Field Profile Seminar I and II (1-2)
Project. Prerequisite: graduate standing or consent of instructor. Individually guided research to survey the field of study, under the supervision of a faculty member. Four units total over two or more quarters are required by the end of the second year. May be repeated for credit.—I—(I) III—(III) III—(III)

210A. Special Topics in American Religious Cultures (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative, interpretive study of the treatment of specific topics in American religious cultures. May be repeated for credit when topic differs.—I—(I) III—(III) III—(III) III—(III)

210B. Special Topics in Asian Religious Cultures (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative, interpretive study of the treatment of specific topics in Asian religious cultures. May be repeated for credit when topic differs.—I—(I) III—(III) III—(III)

210C. Special Topics in Mediterranean Religious Cultures (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative, interpretive study of the treatment of specific topics in Mediterranean religious cultures. May be repeated for credit when topic differs.—I—(I) III—(III) III—(III) III—(III)

210D. Dissertation Writing (1-12)
Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative, interpretive study of the treatment of religion through specific topics and themes relating to values, ethics, and human rights. May be repeated for credit when topic differs.—I—(I) III—(III) III—(III) III—(III)

230A. Thematic Topics—Body and Praxis (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative, interpretive study of the treatment of religion through specific topics and themes relating to the body and praxis. May be repeated for credit when topic differs.—I—(I) III—(III) III—(III)

230B. Thematic Topics—Language, Rhetoric, and Performance (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative, interpretive study of the treatment of religion through specific topics and themes relating to language, rhetoric, and performance. May be repeated for credit when topic differs.—I—(I) III—(III) III—(III)

230C. Thematic Topics—Modernity, Science, and Secularism (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative, interpretive study of the treatment of religion through specific topics and themes relating to modernity, science, and secularism. May be repeated for credit when topic differs.—I—(I) III—(III) III—(III) III—(III)

230D. Thematic Topics—Theory and Method (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative, interpretive study of the treatment of religion through specific topics and themes relating to theory and method. May be repeated for credit when topic differs.—I—(I) III—(III) III—(III) III—(III)

230E. Thematic Topics—Values, Ethics, and Human Rights (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative, interpretive study of the treatment of religion through specific topics and themes relating to values, ethics, and human rights. May be repeated for credit when topic differs.—I—(I) III—(III) III—(III) III—(III)

231E. History, Theory and Criticism of Human Rights (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Restricted to graduate students. Introduces the advanced study of Human Rights and the theoretical and practical elaboration of the international Human Rights system. Seminar will engage with criticism of Human Rights and develop research and teaching within disciplinary and interdisciplinary frameworks. (Same course as Human Rights 200A)—II—(II) Watenpaugh

298. Group Study (1-5)
Prerequisite: graduate standing or consent of instructor. May be repeated for credit. (S/U grading only.)—I—(I) III—(III) III—(III)

299. Research (1-12)
Prerequisite: graduate standing or consent of instructor. (S/U grading only.)—I—(I) III—(III) III—(III) III—(III)

299D. Dissertation Writing (1-12)
Prerequisite: advanced candidacy for the Ph.D. program, consent of instructor. May be repeated for credit. (S/U grading only.)—I—(I) III—(III) III—(III)

Surgical and Radiological Sciences

See Veterinary Medicine, School of, on page 539.
Sustainable Agriculture and Food Systems

The Major Program

The Sustainable Agriculture and Food Systems (SAFS) major serves students interested in improving the sustainability and food systems of society. This major prepares graduates to understand the interdisciplinary and systems-based aspects of sustainability and provides them with the knowledge, leadership skills and experiences required to excel in agricultural and food systems professions.

The Program

This program is designed to develop students’ competencies for addressing the environmental, social, and economic challenges and opportunities associated with agricultural and food systems sustainability. The program emphasizes an experiential learning approach to sustainability education, allowing students to explore three tracks within the major. Students in the Agriculture and Ecology track focus on crop and animal production systems, ecology, and practices that mitigate negative impacts while producing environmental and social benefits. Students in the Food and Society track focus on issues related to the social, cultural, political and community development aspects of agriculture and food systems. The Internship track focuses on issues related to agricultural and resource economics, policy and management. The program provides students with practical experiences through courses with on- and off-campus field work and through internship placements at sites related to students’ interests and focus of study.

Internships and Career Alternatives

Sustainable Agriculture and Food Systems students are required to complete an internship in the field before graduation. Internships have been arranged with local, county, and state agricultural agencies, production farms and commercial processors and retailers, domestic and international non-governmental organizations, and rural and urban community development agencies. Graduates are prepared to pursue a broad range of careers related to agricultural production and food system management, rural and urban community services, education and development and to apply their skills and environmental science, as well as careers in agricultural, environmental, and economic policy and analysis. Positions may be in private industry, government and public service agencies and in the non-profit sector nationally and internationally. The major also prepares students for graduate studies in a wide range of fields related to agriculture and food systems.

B.S. Major Requirements:

**English Composition Requirement** .......................... 4-8
See College requirement, must include Communications 1.

**Internship Requirement** .......................... 12
Students must complete at least 12 units of internship, eight of which must be completed off campus.

**Applied Production** .......................... 6-9
Select 1 course from: Animal Science 49A, Animal Science 49B | 2-3
Select 1 course from: Applied Biological Systems Technology 49, 52, 101, 142 | 2-3

**Track I: Agriculture and Ecology**

Focuses on crop and animal production systems, ecology, and practices that mitigate negative impacts while producing environmental and social benefits.

**Track I Adviser:** William Horwath, Ph.D.

**Preparatory Subject Matter** .......................... 60-61
Mathematics 16A, 16B | 6
Plant Sciences 120 or Statistics 100 | 4
Chemistry 2A, 2B | 10
Physics 1A, 1B | 3
Biological Sciences 2A, 2B, 10 | 10
Plant Sciences 2 | 2
Animal Sciences 1 or 2 | 4
Food Science 1, 2 | 4
Economics 1A | 4

**Track II: Food and Society**

Focuses on issues related to the social, cultural, political and community development aspects of agriculture and food systems.

**Track II Adviser:** Ryan Galt, Ph.D.

**Preparatory Subject Matter** .......................... 57-64
Philosophy 3 or 31 | 4
Chemistry 2 or 3 | 4
Select one course from: Philosophy 150, 142 | 4
Sociology 468 or Statistics 13 | 4
Select at least one course from: Community and Regional Development, Applied Biological Systems Technology 180, Landscape Architecture 150, Statistics 103, Sociology 106 | 3-6

**Track III: Economics and Policy**

Focuses on issues related to agricultural and resource economics, policy and management.

**Track III Adviser:** Tom Tomich, Ph.D.

**Preparatory Subject Matter** .......................... 60-64
Mathematics 16A, 16B | 6
Sociology 468 or Statistics 13 | 4
Select 1 course from: Agricultural and Resource Economics 106, Statistics 103, Sociology 106 | 4
Chemistry 2A | 5
Biological Sciences 2A or 10 | 5
Plant Sciences 2 | 4
Select 1 course from: Evolution and Ecology 2, Biological Sciences 28, Environmental Science and Policy 1, 30, Wildlife, Fish, and Conservation Biology 10, 11 | 3-5
Food Science 1 | 3
Soil Science 10 | 3
Economics 1A, 1B | 4
Political Science 4 | 4
Select 1 course from: Anthropology 2, Sociology 1, Sociology 3, Community and Regional Development | 4-5
Select 1 course from: Philosophy 14, 15, 24 | 4

**Depth Subject Matter** .......................... 43-44
Select one course from: Agricultural and Resource Economics 112 or 150 | 4
Select 1 course from: Agricultural and Resource Economics 147, 176 | 4
Environmental Science and Policy 160, 161, 169, 172, 179 | 3-4
Choose 12 units from: Anthropology 101, 102, Community and Regional Development 142, 152, Sociology 139, 144, 145A, 145B | 12
Select 1 course from: American Studies 101C, 155, History 172 or Philosophy 109 | 4
Additional upper-division restricted electives chosen in consultation with the track faculty advisor | 20

**Total units for the major** .......................... 140-163

**Major Adviser:** Tom Tomich (Human Ecology)

**Program Office:** 143 Robbins Hall, 530-752-9195; http://asi.ucdavis.edu

**Committee in Charge:**

R. Sexton, Ph.D.
(AGH)
A. Oberbauer, Ph.D. (Animal Science)
M. Pantalio, M.L.A.
(Entomology and Nematology)
S. Handy, Ph.D.
(Environmental Science & Policy)
M. Hubanks, M.L.A.
(Human Ecology)
D. Campbell, Ph.D. (Human Ecology)
R. Southard, Ph.D.
(Land, Air & Water Resources)
D. Rizzo, Ph.D. (Plant Pathology)
C. Kessel, Ph.D. (Plant Sciences)

**Internship Requirement** .......................... 12
Students must complete at least 12 units of internship, eight of which must be completed off campus.

**Applied Production** .......................... 6-9
Select 1 course from: Animal Science 49A, Animal Science 49B | 2-3

Select 8 units from: Anthropology 101, 102, Community and Regional Development 142, 152, Sociology 139, 144, 145A, 145B | 8
Additional upper-division restricted electives chosen in consultation with an advisor | 20
Courses in Sustainable Agriculture and Food Systems (SAF)

Lower Division

92. Internship (1-12)

Internship—3-36 hours. Prerequisite: consent of instructor. Restricted to Sustainable Agriculture and Food Systems majors or with consent of instructor. Lower-division internship for students enrolled in the Sustainable Agriculture and Food Systems program of study. Enrollment for non-majors by consent of instructor. May be repeated up to 12 units for credit with consent of instructor. (P/NP grading only)—I, II, III. (I, II, III) Galt, Horwath, Tomich, Van Horn

98. Directed Group Study (1-5)

Prerequisite: consent of instructor. Restricted to Sustainable Agriculture and Food Systems major or with consent of instructor. Group study on focused topics in Sustainable Agriculture and Food Systems. Varies according to instructor. Course plan is adapted to student need and interest in conjunction with the expertise of the instructor. Offered irregularly. (P/NP grading only)—I, II, III. (I, II, III)

99. Special Study for Undergraduates (1-5)

Independent study—3-15 hours. Prerequisite: consent of instructor. Under faculty supervision, students pursue a special or individualized course of study related to Sustainable Agriculture and Food Systems. May be repeated for credit. (P/NP grading only)—I, II, III. (I, II, III)

Upper Division

192. Internship (1-12)

Internship—3-36 hours. Prerequisite: upper-division standing or consent of instructor. Restricted to Sustainable Agriculture and Food Systems majors or with consent of instructor. Upper-division internship for students enrolled in the Sustainable Agriculture and Food Systems Program of Study. Enrollment for non-majors by consent of instructor. May be repeated up to 12 units for credit. (P/NP grading only)—I, II, III. (I, II, III) Galt, Horwath, Tomich, Van Horn

197T. Tutoring in Sustainable Agriculture and Food Systems (SA&FS) (1-15 hours)

Tutorial—3-15 hours. Prerequisite: upper division standing; consent of instructor. Undergraduate assistant the instructor by tutoring students in regularly scheduled courses that fulfill S&A&S major requirements. May be repeated for credit. Offered irregularly. (P/NP grading only)—I, II, III. (I, II, III)

197C. S&A&S Tutoring in the Community (1-5)

Tutorial—3-15 hours. Prerequisite: upper division standing; consent of instructor. Undergraduate assist the instructor by tutoring community in settings related to Sustainable Agriculture and Food Systems. May be repeated for credit. Offered irregularly. (P/NP grading only)—I, II, III. (I, II, III)

198. Directed Group Study (1-5)

Prerequisite: upper division standing; consent of instructor. Restricted to Sustainable Agriculture and Food Systems majors or with consent of instructor. Group study on focused topics in Sustainable Agriculture and Food Systems. Varies according to instructor. Course plan is adapted to student need and interest in conjunction with the expertise of the instructor. May be repeated for credit. Offered irregularly. (P/NP grading only)—I, II, III. (I, II, III)

199. Special Study for Advanced Undergraduates (1-5)

Independent study—3-15 hours. Prerequisite: upper division standing; consent of instructor. Under faculty supervision, advanced students pursue a special or individualized course of study related to Sustainable Agriculture and Food Systems. May be repeated for credit. (P/NP grading only)—I, II, III. (I, II, III)

Sustainable Environmental Design

[College of Agriculture and Environmental Sciences] [Department of Human Ecology]

Patsy Eubanks Owens, M.L.A., Professor

Michael Rios, Ph.D., Associate Professor

Sheryl-Ann Simpson, M.L.A., Assistant Professor

Stephen Wheeler, Ph.D., Associate Professor

The Major Program

The Sustainable Environmental Design major is intended to build student understanding and skills related to creation of sustainable communities and landscapes. Coursework emphasizes urban and environmental design, sustainable development theory and practice, green building, local government planning and decision-making, community dynamics and organizations, and written, graphic, and oral presentation of sustainability strategies.

The Program

The Sustainable Environmental Design major is particularly suited for students who are interested in the physical form and design of communities and related public and private processes. It is focused on the physical environment of communities and the process of designing, planning for, and regulating the built landscape and the place-making considerations involved in creating sustainable communities.

Career Alternatives

Graduates will choose to pursue work in government, community organizations, education, or the private sector. They will also be well-positioned to pursue graduate education in urban and regional planning, landscape architecture, architecture, public policy, public administration, law, real estate, and related fields.

B.S. Major Requirements:

Preparatory Subject Matter ............... 63

UNITS

English Writing/Oral Communication ..... 6

Biological Sciences 2A, 2B .................. 9

One course each in Statistics, Economics, Political Science, Physical Sciences, and Sociology ............................................. 23

Landscape Architecture 1, 2, 3, 21, 30, 50 ........................................ 70

Depth Subject Matter ..................... 21

Landscape Architecture 140, 141, 142, 14 Environmental Science and Policy 171 ..... 4

Landscape Architecture 190 (three quarters) .............................. 3

Restricted Electives ....................... 20-25

Select 20 units of upper division courses chosen from courses related to community sustainability ...................................... 20

Internship: Recommended .................. 5

Total units for the major .................. 104-109

Graduate Study. The Graduate Group in Textiles offers a program of study and research leading to the M.S. degree. Students in the program use an interdisciplinary approach emphasizing the physical and behavioral science aspects of textiles. Research areas include chemical, physical, biochemical, and mechanical properties of fibers and polymers as well

The Major Program
The textiles and clothing major emphasizes the connections among (a) the physical characteristics of textile products, (b) human perceptions of and behavior toward these products, and (c) global economic trends affecting the textile/apparel marketplace. An integrative knowledge base links textile products with people and processes, to focus on the production, distribution, and consumer use of textiles and apparel; see also Fiber and Polymer Science, on page 311.

The Program.
The textiles and clothing majors offer two options: textile science and marketing/economics. The Textile Science option provides students with a broad knowledge base in both the social and physical sciences. This base includes production, end-use applications and care of textiles and apparel, physical and chemical properties of textiles, and social-psychological and economic aspects of textiles and clothing. The Marketing/Economics option emphasizes social science and business-course work, while also providing students with an awareness of the physical nature of textile products.

Internships and Career Alternatives.
Textiles and clothing majors can pursue internships and careers in apparel production and merchandising, retail management, international marketing, textile testing and conservation, and textiles journalism. The majority of textiles and clothing graduates accept entry-level management and technical positions within the textile and apparel industry or in related fields; e.g., merchandising and marketing, production, research and development, technical service and design. Students may also pursue graduate study in textiles, business, and other areas depending on their specific selections of restricted elective course work.

Questions pertaining to the following courses should be directed to the instructor or to the Division of Textiles and Clothing. See also courses in Fiber and Polymer Science, on page 311.

**Lower Division**

6. **Introduction to Textiles (4)**
Lecture—3 hours; laboratory—3 hours. Introduction to the structure and properties of textiles. Consumer use and fabric characteristics are emphasized. GE credit: SciEng | SE, St., VL—II. (8) Sun

7. **Style and Cultural Studies (4)**
Lecture/discussion—3 hours; discussion/lab/orb—1 hour. The multiple and overlapping influences of gender, sexuality, ethnicity, and class on the constructions of identity and community are explored through the study of styles of apparel and culture and everyday life. Continuity and change in clothing and appearance styles are interpreted. GE credit: ArtHum or SocSci, Div; Wrt | AH or St, VL, WC—II. (III) Kaiser

8. **The Textile and Apparel Industries (4)**
Lecture—4 hours. Textile and apparel industries including fashion theory, production, distribution, and consumption of textile goods. GE credit: SocSci, Div | St, SS.

92. **Internship in Textiles and Clothing (1-12)**
Internship—3-36 hours. Prerequisite: consent of instructor. Work experience off campus in a textiles or clothing-related area. Supervision by a member of the Textiles and Clothing faculty. (P/NP grading only.)

98. **Directed Group Study (1-5)**
Prerequisite: consent of instructor. (P/NP grading only.)

99. **Special Study for Lower Division Students (1-5)**
(P/NP grading only.)

**Upper Division**

107. **Social and Psychological Aspects of Clothing (4)**
Lecture—3 hours; discussion—1 hour. Prerequisite: Sociology 2. Social and cognitive factors influencing management and perception of personal appearance in everyday life. Concepts and methods appropriate to the study of meaning of clothing in social and cultural contexts. GE credit: SocSci, Div; Wrt | VL, SS, VL, VE—II. (III) Sun

162. **Textile Fabrics (3)**
Lecture—3 hours. Prerequisite: course 6. Properties of fabrics as related to serviceability, comfort, and appearance. GE credit: SciEng | SE, VL—III. (III) Pan

162T. **Textile Fabrics Laboratory (1)**
Laboratory—3 hours. Prerequisite: course 162 may be taken concurrently. Laboratory methods and procedures employed in studying properties of textile fabrics as related to serviceability, comfort, and appearance. GE credit: SciEng | QL, SE, VL, WE—II. (III) Pan

163. **Textile Coloration and Finishing (3)**
Lecture—3 hours. Prerequisite: course 6, Fiber and Polymer Science 110, or Chemistry 1B. Basic principles of textile dyeing, printing, and finishing; color theory; structure, properties, and application of dyes and finishes; factors affecting application and fastness; maintenance of dyed and finished textiles. GE credit: SciEng | SE, VL—III. (III) Sun

Quarter Offered: I—Fall, II—Winter, III—Spring, IV—Summer; 2015-2016 offering in parentheses.

Fall 2011 and on Revised General Education (GE): ArtHum—Arts and Humanities; SciEng—Science and Engineering; SocSci—Social Sciences; ACGH—American Cultures; DD—Domestic Diversity; OL—Oral Skills; QL—Quantitative; SL—Scientific; VL—Visual; WC—World Cultures, WE—Writing Experience
163L. Textile Coloration and Finishing Laboratory (1)
Laboratory—3 hours. Prerequisite: course 163 (may be taken concurrently). Demonstrates various aspects of dyeing, printing, and finishing of textile substrates including the effect of fiber and finish type, and physical and chemical variables on dyeing and finishing processes and on the properties of the resultant textile. GE credit: SciEng | QL, SE, SL, WE. —III. (III.) Sun

164. Principles of Apparel Production (3)
Lecture—3 hours. Prerequisite: course 6 or 8. Overview of technology, processes, and research in apparel manufacturing industries including study of government statistics, material utilization and fabrication, mechanization, management, and production engineering. GE credit: SocSci | QL, SS, VL.

165. Textile Processes (3)
Lecture/discussion—3 hours. Prerequisite: course 6. Physical processes involved in the production of textiles from the individual fiber to the finished fabric. Includes spinning, knitting, weaving, finishing, dyeing, and hand and aesthetic properties, clothing comfort, and material and assembly technology. GE credit: SciEng | SE, difficult to read.

171L. Clothing Materials Science (4)
Lecture—3 hours; laboratory/discussion—3 hours. Prerequisite: course 6, 8, and senior standing. The properties, characterization, and performance evaluation of clothing materials and structures for specific functional and aesthetic applications. Principles and methods related to wetting and transport properties, fabric hand and aesthetic properties, clothing comfort, and material and assembly technology. GE credit: SciEng | SE, VL.—II. (II.) Hsieh

173. Principles of Fashion Marketing (3)
Lecture—3 hours. Prerequisite: course 8, Economics 1A, Agricultural and Resource Economics 113 or 136. Study of basic elements of fashion marketing including philosophy and objectives, organization, merchandising, pricing, promotion and personnel. Offered in alternate years. GE credit: SocSci | SS, VL.—II. (II.)

174. Introduction to World Trade in Textiles and Clothing (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 8. Structure of the global fiber/textile/apparel complex and its distribution patterns with an overview of political, economic and technological factors that are changing these industries and their markets. GE credit: SocSci, Div | SS, WC.—II. (II.)

180A-180B. Introduction to Research in Textiles (2-3)
Laboratory—6 hours. Prerequisite: senior standing with textile-related major, and consent of instructor. Senior thesis on independent problems. Research begun in course 180A will be continued and completed in course 180B. (Deferred grading only; pending completion of sequence.) GE credit: SocSci | SS, WE.—I, II, III, (I, I, II.)

192. Internship in Textiles and Clothing (1-12)
Laboratory—3.36 hours. Prerequisite: consent of instructor. Work–learn experience off campus in a textiles or clothing-related area. Supervision by a member of the Textiles and Clothing faculty. (P/NP grading only.)

197T. Tutoring in Textiles and Clothing (1-5)
Discussion/laboratory—3.15 hours. Prerequisite: upper division textiles-related major and consent of instructor. Tutoring of students in Textiles and Clothing courses. Assistance with discussion groups and laboratory sections under supervision of instructor. May be repeated for credit if tutoring another textiles course. (P/NP grading only.)

198. Directed Group Study (1-5)
(P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)
(P/NP grading only.)

Graduate

230. Behavioral Science Concepts in Textiles (3)
Lecture—3 hours. Prerequisite: course 107, upper division graduate or division course in statistics (e.g., Agricul-tural Management and Rangeland Resources 120) and one in a behavioral science (e.g., Psychol-ogy 145). Examination of theories and research con-cerning relationships between current and human behavior with emphasis on research techniques, including methods of measuring clothing variables. Offered in alternate years. —Kaiser

290. Seminar (1)
Seminar—1 hour. Review of selected topics of current interest in textiles. (S/U grading only)—II, (I, II)

290C. Research Conference (1)
Discussion—1 hour. Prerequisite: graduate standing, consent of instructor. Individual faculty members meet with their graduate students. Critical presentations of original research are made by graduate students. Research activities are planned. Discussions are led by major professors for their research groups. (S/U grading only)—II, (II, III, (I, III, III)

293. Recent Advances in Textiles (3)
Lecture—3 hours. Prerequisite: two upper division courses in Textiles and Clothing or consent of instructor. Critical reading and evaluation on selected topics of current interest in textiles. Multidisciplinary aspects of the topics selected will be stressed. May be repeated for credit. —(II.)

298. Group Study (1-5)
(S/U grading only)

Professional

396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only)—II, III, (I, III, III)

The Dramatic Art Major Program

The A.B. degree in Dramatic Art provides students with an appreciation for and understanding of performance and its role in culture and society. The program offers a strong foundation in all aspects of drama, theatre (acting, performance, and production). Students build significant skills in specific areas (including acting, directing, choreography, design, playwrighting and devising, production skills and management) as well as achieving a broad knowledge of theatre and dance.

Productions and Facilities. Each year’s schedule includes opportunities to work with professional directors and choreographers in three Granada Artists-in-Residence productions; the Main Stage Dance/Theatre Festival; the UC Davis Film Festival; projects generated through the Institute for Exploration in Theatre, Dance and Performance; and work shops and performance projects developed by M.F.A and Ph.D. students. These productions are staged in our prosenium (Main), thrust (Wyatt), black box (Arena), performance studio (Nelson Hall) and intimate laboratory theatre (Lab A), as well as in the Mondavi Center’s Vanderhoef Studio Theatre and Jackson Hall. These productions are part of the academic program of the department and serve an important purpose in the study of theatre and dance. Participation is open to all students.

A.B. with Honors Major Requirements:

Preparatory Subject Matter ............................................. 24
Choose four units from: Dramatic Art 21A, 40A, 40B, 42A, 42B ................................. 4
Dramatic Art 28, 55, 56A, 56B, 56C ........ 20

Depth Subject Matter ................................................... 42
Two courses from: Dramatic Art 142, 150, 155, 155A, 156, 156B, 156C, 156D, 158, 159 ................................. 8
Choice 6 units from at least 2 of Dramatic Art 145, 180A, 180B, 180C ......................................... 6
Dramatic Art 180D ........................................ 4
One course from: Dramatic Art 180E, 180F, 180G ..................................................... 2
Dramatic Art 195 ........................................ 2

Total Units for the Major ................................................ 66

Quarter Offered: I-Fall, II-Winter, III-Spring, IV-Summer, 2015-2016 offering in parentheses
Pre-Fall 2011 General Education (GE): ArtHum—Arts and Humanities; SciEng—Science and Engineering; SocSci—Social Sciences; Div=Domestic Diversity; Writ=Writing Experience
Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SE=Science and Engineering; SS=Social Sciences; ACHG=American Cultures, DD=Dominant Diversity, OL=Oral Skills, QL=Quantitative, SL=Scientific, VL=Visual, WC=World Cultures, WRI=Writing Experience
Theatre and Dance

28. Entertainment Engineering and Management: Stagecraft to Stage (4)
Lecture/discussion—4 hours. Introduction to technical production and management in theatre and dance. Topics include stage management, theatrical mechanics, backstage protocols, scenic construction, properties, lighting, basic scripts, casting, shop use and construction, basic make-up, sound equipment, graphics and robotics for theatre. GE credit: ArtHum | AH — I, II, III, IV

30. Theatre Laboratory (1-5)
Prerequisite: course 25 or consent of instructor. Projects in acting, production, and design of stage and costume, and consideration of the nature of performance and technology. GE credit: AH, VL — I, II, III, IV

40A. Beginning Modern Dance (2)
Laboratory/discussion—4 hours. Prerequisite: course 14 or consent of instructor. Fundamentals of modern dance focusing primarily on the development of techniques and creative problem solving. Basic anatomy, dance terminology and general overview of modern dance history. May be repeated for credit up to 11 units. GE credit: AH — I, II, III, IV

40B. Intermediate Modern Dance (2)
Laboratory/discussion—4 hours. Prerequisite: course 40A. Open to students who have completed 14 and 40A, unless consent of instructor. Modern dance techniques. Basic anatomy, dance terminology and general overview of modern dance history. May be repeated for credit up to 11 units. GE credit: AH — I, II, III, IV

41A. Beginning Jazz Dance (2)
Laboratory/discussion—4 hours. Prerequisite: course 14 or consent of instructor. Fundamentals of jazz dance; includes warm-ups, dance techniques and combinations. Basic anatomy, dance terminology and general overview of jazz dance history. May be repeated one time for credit with consent of instructor.

41B. Intermediate Jazz Dance (2)
Laboratory/discussion—4 hours. Prerequisite: course 41A. Warm-ups, dance techniques and combinations at the intermediate level. Basic anatomy, dance terminology and general overview of jazz styles of historically significant jazz choreographers and leading contemporary jazz choreographers. May be repeated one time for credit with consent of instructor.

42A. Beginning Ballet (2)
Laboratory/discussion—4 hours. Prerequisite: course 14 or consent of instructor. Fundamentals of basic anatomy focusing on the development of technique through proper alignment, quality, and rhythm. Basic anatomy, ballet terminology, and dance history. May be repeated for credit with consent of instructor. GE credit: AH, VL

42B. Intermediate Ballet (2)
Laboratory/discussion—4 hours. Prerequisite: courses 14 and 42A or consent of instructor. Barre and center work at the intermediate level. Development and refinement of technique through proper alignment, rhythm and qualitative understanding. Anatomy, ballet terminology, and dance history. May be repeated for credit with consent of instructor. GE credit: AH, VL

43A. Contact Improvisation Dance (2)
Lecture—2 hours; laboratory—2 hours. Course 14 or consent of instructor. A form of dance that focuses on the exploration of the shared space created by two dancers. Basic anatomy, dance terminology and general overview of jazz styles of historically significant jazz choreographers and leading contemporary jazz choreographers. May be repeated one time for credit with consent of instructor.
developing relaxed readiness and personal expression. May be repeated two times for credit. Offered irregularly. GE credit: AH, VL.

43B. Intermediate Contact Improvisation (2) Lecture/laboratory—4 hours. Prerequisite: course 43A. Building on the fundamentals. Reviewing basics, extended improvising skillfully working with partners of different sizes and abilities, advanced lifting, advanced safety practices, embarking risk and disorientation, subtle nuances of communication. May be repeated two times for credit. GE credit: ArtHum | AH, VL.—I, II, III, IV. (I, II, III, IV.)

44A. Beginning Hip Hop Dance (2) Laboratory/discussion—4 hours. Fundamentals of Hip Hop dance focusing on developing a fluid movement vocabulary, facility in body isolations, intricate rhythmic patterning, quick shifts of weight and mastering dance combinations. Discussions on Hip Hop dance history, styles and terminology. May be repeated one time for credit.

44B. Intermediate Hip Hop Dance (2) Laboratory/discussion—4 hours. Prerequisite: course 44A or consent of instructor. Expansion of Hip Hop dance vocabulary by focusing on mastering body isolations and intricate rhythmic techniques, complex dance combinations, movements across the floor sequences. May be repeated one time for credit.

55. Contemporary Local, National and Global Theatre, Dance and Performance (4) Lecture/discussion—4 hours. Introduction to contemporary theatre, dance and performance in local, national and international settings. Training in critical approaches to and aesthetic appreciation of these forms. Emphasis varies based on instructor. GE credit: ArtHum | AH, DD, VL, WC.—I, II, III, II, III, III.

56B. History of Theatre and Dance II: Romance, Revenge and Rebellion (4) Lecture/discussion—4 hours. Exploration of aesthetic movements in various disciplines of theatre and dance from 1550 to 1850. Examination of genres, styles, techniques, rhythm and rebellion using European, North and South American, and Asian examples. GE credit: ArtHum | AH, VL, WC.—I, II, III, I, II, III, III.

92. Internship in Dramatic Art (1-12) Prerequisite: consent of instructor and department chairperson; limited to students (less than 84 units completed). Internship outside the Department of Theatre and Dance enabling students to practice their skills. May be repeated for credit up to 12 units. (P/NP grading only.)—I, II, III, IV, V, VI, VII, VIII, IX.

98. Directed Group Study (1-5) Primarily for lower division students. (P/NP grading only)

99. Special Study for Undergraduates (1-5) (P/NP grading only)

Upper Division

111. Advanced Presentation Skills (2) Lecture/laboratory—4 hours. Class size limited to 20 students. Development of clear oral and physical communication skills, presentation style and clarity for students whose command of English is at a competent to fluent level. GE credit: OL.

114. Theatre on Film (4) Lecture/discussion—3 hours; film viewing—2 hours; term paper. Prerequisite: consent of instructor; graduate standing; course 1, 14, 15. Study of six-eight plays on film, using mixed casts and raising issues of diversity. Focus: sociohistorical context for production and reception, interpretation and analysis of topics (gender, ethnicity, age, politics, philosophy), and film's, screenwriting, design, and acting/directing for film. GE credit: ArtHum or SocSci, Div, Wrt | VL.

115. Advanced Study of Major Film Makers (4) Lecture/discussion—3 hours; film viewing—2 hours. Prerequisite: course 15. Analysis of the contribution of some outstanding film creators. Study of diverse aesthetic theories of the directors and their application to selected films. GE credit: VL.

116. Design on Screen (4) Lecture/discussion—3 hours; film viewing—3 hours. Analysis of the contribution of outstanding designers for cinema, television and filmed entertainment. Study of diverse aesthetic theories of production design and art direction, costume design, or cinema-tography. Introductory principles and practice, history. May be repeated two times for credit when topic differs. (Same course as Cinema and Agricultural Studies 116.) Offered irregularly. GE credit: ArtHum | AH, VL—Lacovelli, Morgan

120. Intermediate Acting/Gateway: The Actor's Toolkit (4) Lecture/laboratory—6 hours. Prerequisite: course 21A or consent of instructor. Limited enrollment. Implementation of acting tools derived predominantly from Stanislavsky's "system". Gateway into the Advanced Acting courses. GE credit: OL, VL—Leavy, Merlin

121A. Advanced Acting: Scene Study and Script Analysis (4) Lecture/laboratory—6 hours. Prerequisite: course 120 and consent of instructor. Limited enrollment. In-depth study, analysis and performance of texts from different eras, genres and styles. Implementation of tools to undertake independent preparation of character, text, and performance. May be repeated up to eight units for credit. Since acting requires repetition to habituate the body and imagination to new practices, this course may be taken twice. Monologues and scenes must be undertaken in the repetition. Offered in alternate years. GE credit: OL, VL.

121C. Advanced Acting: Character and Style (4) Lecture/laboratory—6 hours. Prerequisite: course 120 and consent of instructor. Limited enrollment. Study of psychophysical techniques to create characters with an emphasis on non-realistic styles. May be repeated up to eight units for credit. Since acting requires repetition to habituate the body and imagination to new practices, this course may be taken twice. New scripts and scenes must be undertaken in the repetition. Offered in alternate years. GE credit: ArtHum | OL, VL.

122A. Advanced Acting: Devising and Collaboration (4) Lecture/laboratory—6 hours. Prerequisite: course 120, consent of instructor. Study and practice of various devising techniques, to collaborate, to enhance/devising, to produce a series of short etudes and dramatic scenes/short plays. May be repeated up to eight units for credit. Since acting requires repetition to habituate the body and imagination to new practices, this course may be taken twice. New scripts and scenes must be undertaken in the repetition. Offered in alternate years. GE credit: ArtHum, OL.

122B. Advanced Acting: Shakespeare and His Contemporaries (4) Lecture/laboratory—6 hours. Prerequisite: course 120 and consent of instructor. Limited enrollment. Study and performance of various plays (Shakespearian and others) in terms of their historical context, significant themes (gender, ethnicity, age, politics, philosophy), and acting/directing for film. GE credit: ArtHum or SocSci, Div, Wrt | VL.

122C. Advanced Acting: Special Topics in Acting (4) Lecture/laboratory—6 hours. Prerequisite: course 120 and/or consent of instructor. Dramatic Arts majors. Restricted to Dramatic Arts majors; limited enrollment. Intensive study and practical experience of a specialized area (for example, World Theatre, Social Theatre, Physical Theatre, Musical Theatre, The Ancient Greeks, etc.) May be repeated up to eight units for credit. Offered irregularly. GE credit: AH, OL, VL.

124A. Principles of Theatrical Design: Scenery (4) Lecture/discussion—4 hours. Prerequisite: course 24 or consent of instructor. Scene design processes, working drawings, sketching techniques, scale models, methods and materials of scenery construction. GE credit: ArtHum | AH, VL—lacovelli

124B. Principles of Theatrical Design: Scenery (4) Lecture/discussion—4 hours. Prerequisite: course 24 or consent of instructor. Analysis of plays in terms of scenic design, elements of design, execution of designs, working together in collaborative projects. GE credit: ArtHum | AH, VL—lacovelli

124C. Principles of Theatrical Design: Lighting (4) Lecture/discussion—4 hours. Prerequisite: course 24 or consent of instructor. Theories of lighting the stage, equipment and control systems, execution of lighting plots. GE credit: ArtHum | AH, VL—Munn

124D. Principles of Theatrical Design: Costume (4) Lecture/discussion—4 hours. Prerequisite: course 24 or consent of instructor. Source materials for theatrical costuming, selecting fabrics, elements of design, analysis of plays in terms of costume design, execution of designs for modern settings and techniques. GE credit: ArtHum | AH, OL, VL—Morgan

124E. Costume Design for Film (4) Lecture/discussion—4 hours. Prerequisite: for Dramatic Art majors; course 24 or 124D or consent of instructor. Theory and practice of the art and business of film costume design. Script analysis, costume research, developing design concepts, budgeting, and current production practices and methods. Exe.
cution of designs for period and contemporary films. Viewing of current films. 

141. Introduction to the Fundamentals of Movement (4)
Lecture/discussion—4 hours. Introduction to fundamentals of movement that combines intellectual and kinesthetic understanding of the body's skeletal and muscular systems. Explorations based on theories of various body mind specialists including Laban, Feldenkrais, Bartenieff and Sweigard as well as the eastern discipline of Yoga. GE credit: VL.

142. History of Modern Dance (5)
Lecture—3 hours; laboratory—3 hours; extensive writing. The Modern Dance tradition in the U.S., focusing on the development of group choreography, focusing on the development of group choreography. GE credit: VL.

143. Dance and Movement Studio (1-4)
Lecture/discussion—2-8 hours. Prerequisite: course 14 or consent of instructor. Special studies in dance and movement such as African, Balinese, Baroque, Chinese, European, and stage combat. May be repeated up to eight units for credit. GE credit: AH, VL—I, II, III, IV, V, VI, VII, VIII.

144. Introduction to Traditional Chinese Physical Culture (4)
Lecture/discussion—4 hours. Traditional Chinese WuShu practices, explored through practical work in dance laboratory conditions. Integration of practice with conceptual analysis; contemporary social, educational and artistic applications. GE credit: VL.

145. Directed Choreography Projects (4)
Lecture/laboratory—6 hours. Prerequisite: courses 140A, 140B, 140C or consent of instructor. Conceptualization, creation, casting, rehearsing, and presentation of a series of choreographed pieces, with students integrating elements of stagecraft and directing the on-stage rehearsals. GE credit: VL.

146. Professional Track Modern Dance I (3)
Lecture/discussion—6 hours. Laboratory—discussion—6 hours. Prerequisite: courses 408 and 146A; consent of instructor. Continuation of course 146A. Body and space relationships in solos, duets and group work, stylistic variations of Graham technique; works of Paul Taylor. May be repeated two times for credit.—Grenke.

146C. Professional Track Modern Dance III (3)
Lecture/discussion—6 hours. Prerequisite: courses 408, 146A, and 146B; consent of instructor. Continuation of course 146C. Integration of the on-stage theatrical device, sustaining movement and non-movement, phrasing, musicality. May be repeated two times for credit. —Grenke.

150. American Theatre and Dance (4)
Lecture—4 hours. The history of the theatre from Colonial times to the present. Readings of selected plays. Offered in alternate years. GE credit: ArtHum, Div, Wrt | ACGH, AH, DD, VL, WE.

151. Australian Performance and Culture (4)

154. Asian Theatre and Drama: Contexts and Forms (4)
Lecture/discussion—4 hours. Prerequisite: upper division standing. Selection of Asian theatre and performance forms in their cultural and artistic contexts; myth, ritual and the theatre; performance training, visual presentation of the text; political theatre; inter-cultural performance. The fusion of Asian and Western traditions. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WC, WE.

155. Representing Race in Performance (4)
Lecture—4 hours. Representation and performance of race” in American culture featuring different sub-headings such as “African American Theatre” or “Asian-Americans on Stage.” May be repeated one time for credit when topic differs. GE credit: ArtHum, Div | AH, DD, WE.

155A. African American Dance and Culture in the United States, Brazil and the Caribbean (4)
Lecture/discussion—4 hours. Comparative study of the African American dance forms in the U.S., Brazil, Haiti, Cuba, Jamaica, Barbados, and Trinidad. Examination of ritual, folk, and popular dance forms and the socio/historical factors that have influenced these forms. (Same course as African American Studies 155A.) Offered in alternate years. GE credit: ArtHum | AH, VL, WC.

155B. Ancient and Contemporary Greek Theatre and Dance (4)
Discussion/laboratory—10 hours; performance instruction—10 hours; seminar—13 hours. Origins of early theatres and the first actors, playwrights and dancers and their powerful influence on western performance and thought up to present day. Offered in Greece. GE credit: ArtHum | AH. —IV. (IV.)

156A. Performance Analysis (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 1, 2, or consent of instructor. Performance on the stage, in the street, in everyday life, ritual, and in politics. Satire, irony, creative protest and performance. Social movements, the state, and performance as tactical intervention. GE credit: ArtHum, Div, Wrt | AH, WC, WE.

156B. Theatre in History and Place: Local, National and Global Conditions for Production (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 1, 2 or consent of instructor. Performance on the stage, in the street, in everyday life, ritual, and in politics. Satire, irony, creative protest and performance. Social movements, the state, and performance as tactical intervention. GE credit: ArtHum, Div, Wrt | AH, WC, WE.
156C. Modern Aesthetic Movements in Performance (4) Laboratory/discussion—3 hours; discussion—1 hour. Prerequisite: course 1, course 20 or consent of instructor. Important movements in performance, especially theater and dance, from realism to the present. Primary emphasis on Western traditions though others may be studied. GE credit: AH, Div, Div, Wrt | AH, WE.—I, II, III, (I, II, III).

156D. Theatre History through Shakespeare (4) Lecture—4 hours; extensive writing. Shakespeare's plays, theatre history and theatre today. European contexts from 1590/2004 and international theatre from 20th century. Stagecraft, different media [print, stage, film], social/political environments, design, and cultural change (gender, sexuality and ethnicity). May be repeated one time for credit. AH, Div, Div, Wrt | AH, OT, WC, WE.—II, IV (I, IV).

158. Performance Studies Undergraduate Seminar (4) Seminar—4 hours. Prerequisite: course 156A, B, or C, or consent of instructor. Focused inquiry into a particular genre, period, movement, artist, or theme in performance. Philosophical and aesthetic approaches as well as historical and cultural performance contexts. In-depth research projects in relationship to the subject of inquiry. May be repeated for credit. GE credit: Wrt.

159. Contemporary Experimental Performance, Theatre and Drama (4) Lecture/discussion—3 hours; extensive writing. Examination and evaluation of the "New Theatre," its experimental and innovative nature since the 1960s. Dance, film, stage, performance, performance art and public acts of a performative nature. May be repeated three times for credit when topic differs. GE credit: AH, DD, VL, WC.—I, II, III.

159S. Contemporary Experimental Performance, Theatre and Drama (4) Lecture/discussion—4 hours. Examination and evaluation of the "New Theatre"—its experimental and innovative nature since the 1960s. Dance, film, stage, performance, performance art and public acts of a performative nature. This course is offered in Sydney, Australia. Not open for credit to students who have completed course 156D. GE credit: AH, DD, VL, WC.—I, II, III.

160A-160B. Principles of Playwriting (4-4) Lecture/seminar—4 hours. Prerequisite: two courses in Dramatic Art or related courses in other departments; course 160A prerequisite for 160B or consent of instructor. Analysis of dramatic structure; preparation of scenarios; the composition of plays. GE credit: WE.

170. Media Theatre (4) Lecture—1 hour; rehearsal—2 hours; performance instruction—1 hour. Prerequisite: upper division standing in Dramatic Art, Art Studio, Design, Technological Studies, Film Studies, Computer Science, or Engineering: Computer Science, or consent of instructor. New media and application of the in theatre setting. May be repeated for credit. GE credit: AH, VL.

174. Acting for Camera (4) Lecture/laboratory—6 hours. Prerequisite: consent of instructor. Analysis and practice of acting skills required for camera work and digital media. May be repeated eight times for credit when different instructor is assigned. (Same course as Cinema & Technological Studies 174.)—III. (III) Anderson, Merlin.

180. Theatre Laboratory (1-5) Prerequisite: upper division standing or course 25, or consent of instructor. Projects in acting, production, scene design, costume, lighting, directing, and playwriting. Participation in departmental productions. May be repeated for credit.—I, II, III, (I, II, III).

180A. Theatre Laboratory: Performance (1-5) Rehearsal—12 hours. Prerequisite: consent of instructor. Limited enrollment. Rehearsal and performance of a production directed or choreographed by visiting Granada Artists-in-Residence and/or faculty, and/or the UG Edge Festival. May be repeated for credit. Since each production involves different scripts, directions, logistics, rehearsal techniques, and performance processes, it is possible for students to appear in a variety of productions in the course of their education. Admission by petition.—I, II, III, (I, II, III).

180B. Theatre Laboratory: Design (1-4) Prerequisite: course 24, 25, 124A, 124B, 124C, 124D and/or 130 or consent of instructor. Limited enrollment. Design-related participation in theatre and dance productions. Study and execution of design concepts. May be repeated for credit. Because each theatrical piece is conceived and produced afresh with new source material, scripts, and production style the challenges and assignments for the designers will be new each and every time they design a show. GE credit: AH, VL.—I, II, III, (I, II, III).

180C. Theatre Laboratory: Management, Directing, other Production Team (1-5) Prerequisite: consent of instructor. Participation in theatre and dance production management, direction, choreography, dramaturgy, writing or other production related role; research, creation and implementation of production concept in collaboration with the director and other members of the production team. May be repeated for credit. Because each theatrical piece is conceived and produced afresh with new source material, scripts, and production style the challenges and assignments for the designers will be new each and every time they design a show. GE credit: AH, VL.—I, II, III, (I, II, III).

180D. Theatre Laboratory: Crew (2-4) Laboratory—6-12 hours. Prerequisite: consent of instructor. Participation in theatre and dance productions as backstage running crew which will involve scheduling, rehearsal, and execution of performance. May be repeated for credit.—I, II, III, (I, II, III).

180E. Theatre Laboratory: Scenic (1-4) Laboratory—3 hours. Prerequisite: consent of instructor. Practicing experience working on scenery and properties for theatre and dance department productions. Study and execution of basic scenery and prop engineering, construction, painting, rigging, scenic techniques, materials, tools, and equipment use. Safety training requirement. May be repeated for credit.—I, II, III, (I, II, III).

180F. Theatre Laboratory: Costume (1-4) Laboratory—3-12 hours. Prerequisite: consent of instructor. Practicing experience working on costumes for theatre and dance department productions. Study and execution of basic costume construction techniques and materials, tools, and equipment use. Skills development, professional etiquette. Safety training requirement. May be repeated for credit.—I, II, III, (I, II, III).

181. Directed Group Study (1-5) May be repeated for credit. GE credit: Wrt.

192. Internships in Theatre and Dance (1-12) Internship—3-36 hours. Theatre production experience arising from differences in the type and style of plays selected from Greece to the present. May be repeated for credit.

192S. Internships in Theatre and Dance (1-12) Internship—3-36 hours. Theatre production experience arising from differences in the type and style of plays selected from Greece to the present. May be repeated for credit. GE credit: WE.

194HA-194HB. Special Study for Honors Students (3-3) Independent study—9 hours. Prerequisite: qualification for Letters and Science Honors Program and admission to Dramatic Art Senior Honors Program. Preparation and presentation of a culminating project and the supervision of an instructor, in one of the creative or scholarly areas of Dramatic Art. (Deferred grading only, pending completion of sequence.)

195. Senior Capstone Experience (2) Project; lecture/discussion—1 hour. Open to Dramatic Art Majors who have completed 135 or more units. Capstone experience for majors. Examination, reflection and synthesis on development. Discussion of professional development and transferrable skills. Individual project and development of portfolio. (P/N grading only.) GE credit: AH, VL.—I, II, III, (I, II, III).

197L. Tutoring in Dramatic Art (1-5) Lecture—1 hour. Prerequisite: upper division or graduate standing with major in dramatic art; consent of department chairperson. Leading of small voluntary groups affiliated with one of the department’s regular courses. May be repeated for credit. (P/N grading only.)

198. Directed Group Study (1-5) May be repeated for credit. GE credit: Wrt.

199. Special Study for Advanced Undergraduates (1-5) Prerequisite: consent of instructor. (P/N grading only.)

Graduate

200. Methods and Materials in Theatre Research (4) Seminar—3 hours; term paper. Essential research tools in theatre and related fields; bibliographies, primary sources, methods of evaluating and presenting evidence, delineating research areas in the field.

211. Advanced Voice and Speech (3) Lecture—2 hours; laboratory—2 hours. Prerequisite: advanced senior undergraduate Acting major or graduate student. Open only to Dramatic Arts Students and Ph.D. students with an emphasis in Performance and Theatre. Review a progression of exercises to free, develop and strengthen the voice, first as a human instrument, and then as an actor’s instrument using various texts such as Shakespeare, Ibsen and contemporary plays. Required for the M.F.A. degree in Acting. May be repeated twice for credit.

212. Advanced Stage Movement (3) Laboratory—6 hours. Prerequisite: graduate standing in the MFA Program. The application of modes of exploration, breath placement, and the use of imagery as well as laboratory movement system as a method of analysis in classic and modern plays. Open to advanced undergraduates by consent of instructor. May be repeated for credit.

214. Special Problems in Advanced Acting (4) Seminar—2 hours; laboratory—4 hours. Prerequisite: consent of instructor. Advanced acting problems arising from differences in the type and style of plays selected from Greece to the present. May be repeated for credit.

Quarter Offered: T-Fall, II-Winter, III-Spring, IV-Summer; 2015-2016 offering in parentheses.

Pre-Fall 2011 General Education (GE): AH=Arts and Humanities; SCI=Science and Engineering; SOC=Sociocultural; Div=Dominant Diversity; Wrt=Writing Experience

Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SCI=Science and Engineering; SOC=Sociocultural; Div=Dominant Diversity; Wrt=Writing Experience
224A. Seminar in Theatrical Design: Ancient Worlds—Early 17th Century (4)
Seminar—2 hours; project—2 hours. Prerequisite: graduate standing; group study while focusing primarily on one discipline: scenic, costume or lighting design. Periods covered: Greek, Medieval, Renais-
sance, Baroque, and Rococo, early 17th century. Projects focus on a variety of media, theatre, dance, film, video, computer-based, looking at cultural, aesthetic, rhetor-
al and political theory. Offered in alternate years. May be repeated three times for credit when topic differs.

224B. Seminar in Theatrical Design: Mid 17th Century to Present (4)
Seminar—2 hours; project—2 hours. Prerequisite: graduate standing; course 224A and consent of instructor. Group study focusing primarily on one discipline: scenic, costume or lighting design. Periods covered: Cavalier, Restoration 17th century opera and ballet, 19th century drama. Design projects include script analysis, research of period style, fashion, character development, developing design concepts, presentation skills.

224C. Seminar in Theatrical Design: the 20th Century (4)
Seminar—2 hours; project—2 hours. Prerequisite: graduate standing; course 224A and 224B or consent of instructor. Group study focused on contemporary design concepts for new works and classics: Shakespeare, modern dance, concept plays and musicals. Script and character analysis for design in performance, research, design projects.

224D. Seminar in Theatrical Design: Contemporary Concepts (4)
Seminar—2 hours; project—2 hours. Prerequisite: graduate standing; course 224A, 224B, 224C, and 224D or consent of instructor. Group study focusing primarily on one discipline: scenic, costume or lighting design. Emphasis on contemporary design concepts for new works and classics. Projects related to form a whole in space and time, as well as methods of sequencing used by each discipline to produce artistic products. May be repeated one time for credit.

224E. Seminar in Theatrical Design: Advanced Concepts (4)
Seminar—2 hours; project—2 hours. Prerequisite: graduate standing; courses 224A, 224B, 224C, and 224D or consent of instructor. Group study focusing primarily on one discipline: scenic, costume or lighting design. Emphasis on special issues in contemporary design concepts for new works and classics. Script and character analysis for design in performance, research, design projects.

225. Performance Design Studio: Techniques and Media (2)
Studio—2 hours. Prerequisite: graduate standing; must be taken concurrently with course 224 series. Exploration and development of techniques and skills in the performance design process. Drafting, model building, drawing, painting and rendering, costume drawing, color theory, lighting techniques, design portfolio preparation and presentation. May be repeated up to five times for credit.

228. Seminar in Directing Theory: Non-Realism (4)
Seminar—3 hours; term paper. Modern directing theory as it applies to non-realistic theatre; development of directoral concepts for production of selected non-realistic plays—Greek to the present. May be repeated two times for credit. —I, II, III, (I, II, III)

229. Special Problems in Directing (4)
Seminar—2 hours; laboratory—2 hours; rehearsal—4 hours. Prerequisite: consent of instructor. Projects in directing scenes selected from plays from ancient Greece to the present. May be repeated two times for credit. —I, II, III, (I, II, III)

230. Advanced Problems in Choreography and Performance (2)
Laboratory/discussion—2 hours. Prerequisite: consent of instructor. Focuses contemporary issues of choreography and performance in depth and how these issues pertain to performance work. Focus will include contemporary thought on representation, legibility, new forms, and cultural attitudes. May be repeated six times for credit. —I, II, III, (I, II, III)

244. Critical Approaches to Traditional Systems of Body Movement (4)
Discussion/laboratory—6 hours; project—term paper. Introduction to traditional systems for body movement; development of different approaches to them, and experiments in how they inform training and practice in theatre, dance, and performance. May be repeated five times for credit. Offered irregularly.

250. Modern Theatre (4)
Seminar—3 hours; term paper. The theatre of Europe and America, 1860-1940, with emphasis on the relationship of the dramas of the period to the historical circumstances under which they were pro-
duced.

251. Scoring and Scripting in Performance (4)
Lecture—3 hours; laboratory—3 hours. Prerequisite: graduate standing. The process of weaving together various performance elements brought into play by the artists in their respective disciplines. The "script" is the thread from which the artists’ "scores" will layer and transform the "script" into performance for specific time, place, spectators.

252. Performance: Concepts of Space, Place, and Time (4)
Lecture—3 hours; laboratory—3 hours. Prerequisite: graduate standing. Exploration of the concepts of creating performance spaces, establishing a sense of place, and communicating the concept of time explored through collaborative interaction. Research includes traditional principles, site-specific spaces and consider-
ation of various tools from music and movement.

253. Approaches to Collaboration (4)
Lecture—3 hours; laboratory—3 hours. Prerequisite: graduate standing. Historical and contemporary the-
ories of constructing stage identities. Discussion and project collaborations based on theories. Questions of identity related to ethnicity, gender or sexual ori-
tentation.

255. Composition in the Arts (4)
Lecture—3 hours; laboratory—3 hours. Prerequisite: graduate standing. Examination of various approaches to collaboration among artists in differ-
ent media and their influence on the creative pro-
cess. —I

257. Interdisciplinary Seminar in Theatre, Performance, and Practice. Instruction is ofored a variety of disci-

260. Topics in Contemporary Theatre and Performance (4)
Seminar—3 hours; term paper; project. Prerequisite: admission to any graduate program in the Universi-
ty. Preference will be given to students enrolled in the Designated Emphasis in Studies in Performance and Practice. Instruction is offered a variety of disci-

265A. Performance Studies: Modes of Production (4)
Seminar—3 hours; term paper; project. Introduces students to the literature of performance production in a variety of media: theatre, dance, film, video, computer-based, looking at cultural, aesthetic, rhetor-
al and political theory. Offered in alternate years. May be repeated three times for credit when topic differs.

265B. Performance Studies: Signification and the Body (4)
Seminar—3 hours; term paper; project. Introduces students to analysis of the body in performance, drawing on theoretical models from several fields. Offered in alternate years. May be repeated three times for credit when topic differs.

265C. Performance Studies: Performance and Society (4)
Seminar—3 hours; term paper; project. Introduces students to the role of performance (broadly defined), in everyday life, sociopolitical negotiation, identity, social movements, the media, and the state. Offered in alternate years. May be repeated three times for credit when topic differs.

280. Theatre Laboratory (1-12)
Advanced practice in acting, designing, directing, playwriting, and technical theatre. May be repeated for credit. —I, II, III, (I, II, III)

299. Group Study (1-5)
Prerequisite: consent of instructor.

299D. Dissertation Research (1-12)
(S/U grading only.)

Professional

396. Teaching Assistant Training Practicum (1-12)
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III, (I, II, III)

412. Stage Makeup (1)
Lecture/laboratory—2 hours. Prerequisite: consent of instructor. Approved for graduate degree credit. Lectures, demonstrations, and practical work in aspects of theatrical makeup.

Transportation Technology and Policy (A Graduate Group)

John Harvey, Ph.D., Chairperson of the Group

Group Office. 1605 Tilia, Suite 100
530-752-0247; http://www.its.ucdavis.edu

Faculty
Ralph C. Aldridge, III, Ph.D., Professor
Mechanical and Aerospace Engineering

Quarter Offered: I-Fall, II-Winter, III-Spring, IV-Summer; 2015-2016 offering in parentheses.

Pre-Fall 2011 General Education (GE): AH—Arts and Humanities; Div—Diversity; SS—Social Sciences; VL—Visual; WC—World Cultures; Div+—Diversity Co-Principled Major

Fall 2011 and on Revised General Education (GE): AH—Arts and Humanities; Div+—Diversity; SS—Social Sciences; VL—Visual; WC—World Cultures; Div+—Diversity Co-Principled Major

AGCH—American Cultures; DD—Diversity; Div—Diversity; HUM—Humanities; Sci—Science and Engineering; SocSci—Social Sciences; W—Writing Experience
Transportation Technology and Policy (A Graduate Group)

Christopher Yang, Ph.D., Research Scientist
(Institute of Transportation Studies)
Sonia Yeh, Ph.D., Research Scientist
(Institute of Transportation Studies)

Graduate Study. The Graduate Group in Transportation Technology and Policy offers the M.S. (Plan I—thesis; and Plan II—exam), and Ph. D. degrees in two areas of specialization: Transportation Technology; and Transportation Planning and Policy. The technology track is for students trained in engineering and the physical sciences and interested in systems-level planning, analysis, management and design of advanced technologies (emphasizing vehicle propulsion and “intelligent transportation system” technologies) focusing on energy and environmental issues. The planning and policy track is aimed at students from a wider range of disciplines interested in the broader public policy issues concerning transportation systems. The curriculum for both tracks includes coursework in mechanical, environmental engineering, economics, policy sciences, statistics, travel behavior, management, technology assessment and environmental studies.

Preparation. Applicants will normally be expected to have completed two courses in calculus, one course in linear algebra, and one course each in calculus-level statistics and microeconomics. Additionally, students entering the technology track will need either to have an appropriate technical background or make up a relatively large number of prerequisite courses in order to be able to take the approved courses in that track.

Program of Study. Students will have the option of following either the technology or policy/management track. M.S. students complete 6 core courses plus electives. Ph.D. students take 7 courses from the same core, 3 additional courses from their chosen track, and pass two comprehensive oral exams. Master’s degrees require a minimum of 36 quarter units and doctoral degrees require a minimum of 54 quarter units. M.S. Plan I students may replace up to 6 units from the core with research (course 299) units. At least two thirds of all credits must be at the graduate level.

Graduate Advisers. YueYue Fan and Alissa Kendall

Curriculum

Core Courses. Students in each track are required to take courses in a common set of core competencies, as well as (for Ph.D. students) some courses in the other track.

Knowledge areas core courses: M.S. and Ph.D. students take Transportation Technology (TTP 210), Transportation Policy (ECI 252 or TTP 220), and Transportation Systems (ECI 251).

Skill areas core courses: M.S. and Ph.D. students take one in the area of Research Design from the following: Survey Research Methods (TTP 200), Research Methods in Environmental Policy (ESP 278), Survey and Questionnaire Research Methods (FY 207), Design and Analysis of Engineering Experiments (ECE 265), Experimental Design and Analysis (PSY 205), Engineering Experimentation and Uncertainty Analysis (MAE 207), or Statistical Methods for Research (STA 205).

Natural Resource Economics (ARE 175)

Environmental Economics (ARE 176)

Microeconomic Analysis (ARE 204)

Economic Analysis of Resource and Environmental Policies (ARE 275)

Environmental Technology (ARE 276), or Infrastructure Economics (ECI 268), Energy Economics (125).

Technology Courses. Approved courses in this area include the following; additional courses may be added upon approval by the Chairperson:

Applied Biological Systems Technology 180, 181N, 182

Atmospheric Science 116, 270

Applied Science 116, 220A, 220B

Biological Systems Engineering 216

Civil and Environmental Engineering 143, 149, 161, 162, 179, 242, 244, 250, 253, 256, 257, 269

Computer Science Engineering 168

Environmental and Resource Sciences 131, 186

Electrical and Computer Engineering 207

Geography, 200CN

Landscape Architecture 150

Mechanical Engineering 134, 161, 163, 188, 216, 217, 218, 226, 234, 236, 258, 269

Other Courses. Approved courses in this area include the following; additional courses may be added upon approval by the Chairperson:

Agricultural and Resource Economics 100B, 125X, 132, 144, 145, 175, 176, 204, 275, 276

Anthropology 104N, 127, 211, 222

Civil and Environmental Engineering, 165, 244A, 252, 258, 266

Civil and Environmental Engineering/Environmental Science and Policy 163, 289A

Communication 170

Community and Regional Development 162, 171, 240, 245

Eco 213

Economics 101, 2000

Education 222

Engineering 250

Environmental Horticulture 110

Environmental Science and Policy 163, 167, 169A, 171, 179

Geography 155

History 172

Landscape Architecture 180C, 180L, 180M, 181M, 201, 205, 220

Management 240, 251, 293

Political Science 175, 187, 208, 279

Psychology 155

Sociology 141, 143A, 143B, 160

Transportation Technology and Policy 200, 210, 220, 281, 282, 289A

ACGH = American Cultures; All = All; Arts and Humanities; AT = Arts and Technology; Div = Divisional; SciEng = Science and Engineering; SocSci = Social Sciences; Wrt = Writing Experience

Fall 2011 and on Revised General Education (GE): AH = Arts and Humanities; SE = Science and Engineering; SS = Social Sciences; Div = Divisional; SciEng = Science and Engineering; Wrt = Writing Experience
Transportation Technology and Policy 200

Courses in Transportation Technology and Policy (TTP)

Graduate

200. Transportation Survey Methods (4)
Lecture
Prerequisite: Statistics 13; Civil and Environmental Engineering 251 recommended. Description of types of surveys commonly used in transportation demand modeling, including travel and activity diaries, attitudinal, panel, computer, and stated-response surveys. Discussion of sampling, experimental design, and survey design issues. Analysis methods, including factor, discriminant and cluster analysis. Not open for credit to students who have taken Civil and Environmental Engineering 255. [Same course as Geography 287.]—II. (Ill.)

210. Fundamentals of Transportation Technology (4)
Lecture—4 hours. Prerequisite: consent of instructor; Mathematics 21A, 21B, 22A; graduate or junior/senior undergraduate as a technical elective. Limited enrollment. Not open for credit to students who have completed Transportation Technology and Policy; and Fundamentals of Transportation Technology 289. (Former course Transportation Technology and Policy; Fundamentals of Transportation Technology 289) —II. (II.)

220. Transportation Planning and Policy (4)
Lecture/discussion—4 hours. Limited enrollment. Transportation planning process at the regional level, including the role of federal policy in shaping regional transportation planning, tools and techniques used in regional transportation planning, issues facing regional transportation planning agencies, pros and cons of potential solutions and strategies. Students having taken this course previously as course 289 cannot repeat it for credit; having taken other course 289 offerings does not preclude taking this course for credit. [Same course as Geography 236]. Offered in alternate years.—II. (III) Handy

281. ITS Transportation Seminar Series (1)
Seminar—1.5 hours. Transportation seminars by guest speakers, on varied topics. May be repeated for credit. [S/U grading only]—I, II, III. (I, II, III) Handy, Spering

282. Transportation Orientation Seminar (1)
Seminar—1 hour. Ten weeks of seminars, introducing various topics in transportation research and education, focusing on topics of particular interest at UC Davis. May be repeated for credit. [S/U grading only]—I, II, III. (I, II, III) Handy

283. Professionalism, Leadership, and Ethics (1)
Seminar—2 hours. Speakers from industry, government, academia, and NGOs will lead discussions about succeeding and performing in the professional world. They will address leadership, ethics, and other workplace issues. May be repeated for credit. [S/U grading only]—III. (III) Handy

289A. Selected Topics in Transportation Technology and Policy (1-5)
Lecture and/or laboratory. Prerequisite: consent of instructor. Directed group study of special topics with instruction carried out through lecture or laboratory, or a combination of both. May be repeated for credit.—I, II, III. (I, II, III)

289B. Selected Topics in Transportation Technology and Policy (1-5)
Lecture and/or laboratory. Prerequisite: consent of instructor. Directed group study of special topics with instruction carried out lecture or laboratory, or a combination of both. May be repeated for credit. [S/U grading only]—I, II, III.

290C. Graduate Research Group Conference (1)
Discussion—1 hour. Prerequisite: consent of instructor. Research problems, progress, and techniques in transportation. May be repeated for credit. [S/U grading only]—I, II, III. (I, II, III)

292. Internship in Transportation Technology and Policy (1-5)
Prerequisite: second year standing; approval of project prior to period of internship. Supervised work experience in transportation studies. May be repeated for credit if topic differs. [S/U grading only]—I, II, III. (I, II, III)

298. Group Study (1-5)
Discussion—1.5 hours. Prerequisite: consent of instructor. [S/U grading only]

299. Research (1-12)
Discussion—1 hours. Prerequisite: consent of instructor. [S/U grading only]

Professional

396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated for credit. [S/U grading only]—I, II, III. (I, II, III)

UC Davis Study Abroad

Ailiki Dragona, Ph.D., Fadi Fathallah, Ph.D., Faculty Directors
UC Davis Study Abroad
207 Third Street, Suite 130
530-297-4633; Fax 530-297-4695;
studyabroad@ucdavis.edu;
http://studyabroad.ucdavis.edu/

The opportunity to study abroad is one of the richest educational experiences a student can have. When students return from study abroad in places like Italy or Hong Kong, they describe their time abroad as an experience that changed their lives. Students who study abroad to see the world, to study their academic interests in a global context, to learn a language, to prepare for a job in the global economy and to add distinction to an application for graduate or professional school.

UC Davis Study Abroad can help students decide which program is best for them, whether to study abroad for a summer, quarter, semester or full year and when to go abroad (freshman through senior years). UC Davis Study Abroad Coordinators also participate in freshman seminars, offer financial aid workshops and can advise on programs that have internship opportunities. UC Davis Study Abroad also administers the Global and International Studies (GIS) minor, which is sponsored by the Humanities Program in the College of Letters and Science.

UC Davis Study Abroad is home to UC Davis Summer Abroad, UC Davis Seminars Abroad and the University of California Education Abroad Program (UCEAP). UC Davis Study Abroad also provides advising for students interested in non-Uc Davis programs and administers the Non-UC Study Abroad leave program. Finally, UC Davis Study Abroad advises and provides student services for international UCEAP students.

UC Education Abroad Program (UCEAP)

Fadi Fathallah, Ph.D., Faculty Director
UC Davis Study Abroad
207 Third Street, Suite 120
530-297-4633; Fax 530-297-4695;
http://studyabroad.ucdavis.edu/programs/uceap/

The UC Education Abroad Program (UCEAP) is one of the premier programs for students in the nation. UCEAP offers international study programs in association with nearly 140 host universities and institutions in some 32 countries around the world. Participating students remain registered at UC while studying abroad and receive full academic credit for their work. UCEAP students maintain their financial aid and scholarship eligibility while abroad. UCEAP has study abroad opportunities for undergraduates at all class levels as well as for qualified graduate students who have completed at least one full year of graduate work and have the support of their graduate program and graduate adviser. UCEAP offers semester, quarter, and summer programs for all majors. Over 50% of the programs are offered in English, while several programs allow students to learn a language while experiencing the culture first hand. Some programs include the possibility of internships or field research. In most cases, students attend courses taught by the faculty of the host institution.

UC faculty members serve as directors at most Study Centers abroad, providing in-country academic advising to students during their program. Full UC credit is granted for courses satisfactorily completed, and courses and grades are recorded on official UC transcripts. With careful planning, most UCEAP students make normal progress toward their UC degrees, even those students who study abroad for a full year. With approval of their major or college advisers, students may earn credit towards their major, minor and general education requirements.

Graduation Requirements

II prospective applicants, particularly students who intend to study abroad during their senior year, should carefully plan their course program for Davis and abroad in order to satisfy university, college, and major/minor requirements for their degree.

Although units and grade points earned while studying abroad through UCEAP are incorporated into the University transcript and GPA, departments and minors retain the right to determine which UCEAP courses will be accepted in satisfaction of major and minor requirements.

All degree candidates must meet the University residence requirement. Recognizing the special value of study abroad, the faculty have approved two exceptions to the usual residence requirement for students participating in the Education Abroad Program:

1. Students planning to graduate immediately upon completion of their UCEAP program may satisfy the University residence requirement by completing at least 35 of their final 45 units on the Davis campus preceding entry into the EAP.

2. Students who have not finished all of their degree requirements following completion of their UCEAP program may satisfy the University residence requirement by completing at least 35 units, including at least 12 units after returning from UCEAP, on the Davis campus within the final 90 units earned towards their degree. With this option, as many as 55 units taken abroad may be applied toward the unit requirement for graduation.

Students must consult with their college Dean's office early during the UCEAP planning process for information on the university residence requirement.

Students must satisfy GE requirements while on UCEAP, but should consult with the Education Abroad Center UC Davis Study Abroad and their college Dean's office prior to departure for information on the certification process.

Students may participate in UCEAP provided that (1) they will not exceed 225 units prior to their departure and (2) that all their degree requirements have been fulfilled either before they leave campus or during their time on UCEAP study abroad program. Participants may only return to campus from UCEAP to complete any outstanding degree requirements provided that they can do so within 225 units.

Participants in programs that conclude in May or June who satisfy all degree requirements while
abroad and expect to graduate upon completion of the year abroad should file for candidacy to receive their degree in time for the June commencement ceremony, however, their graduation date will be in September. Participants in programs that conclude in November or December should file for candidacy to receive their degree in March. Such returning students may be eligible to participate in the June commencement ceremony.

UC Davis Summer Abroad

Aliki Dragona, Ph.D., Faculty Director
207 Third Street, Suite 120
530-297-4633; Fax 530-297-4695;
http://studys abroad.ucdavis.edu/programs

UC Davis Summer Abroad offers a number of faculty-led programs abroad, including UC Davis Quarter Abroad, UC Davis Summer Abroad, and UC Davis Seminars Abroad. These programs enable students to study abroad in small program cohorts taught by UC Davis faculty in over 30 countries around the world. Programs are specifically tailored to UC Davis disciplines and provide unique opportunities for study, field or lab work, research, internship and language learning in intimate and engaging environments.

UC Davis Seminars Abroad

Aliki Dragona, Ph.D., Faculty Director
207 Third Street, Suite 120
530-297-4633; Fax 530-297-4695;
http://studys abroad.ucdavis.edu/programs

Students earn 2-6 UC Davis quarter units through one or more courses taught abroad. These short courses are taught by UC Davis faculty and may be offered as stand-alone programs abroad, or as an international component to a course taught during a regular term on campus. A heavy focus on field trips, onsite projects and group activities enhance classroom instruction. Students many be able to apply earned units toward their major, minor, or general education requirements. Programs are typically offered in September, June, or during the winter break.

Courses in Education Abroad Program (EAP)

100X. International Education Seminar (1) Seminar—1 hour. Prerequisite: open to all EAP or UC Davis study abroad students. Seminar examines the academic, cultural, and personal issues of study abroad, including academic programs abroad, country-specific history and culture, cross-cultural experiences, culture shock, racial and gender issues. May be repeated for credit. (P/NP grading only)—I, II, III, IV.

110X. International Education Seminar (1) Seminar—1 hour. Prerequisite: open to all EAP or UC Davis study abroad students. Seminar examines the academic, cultural, and personal issues of study abroad, including academic programs abroad, country-specific history and culture, cross-cultural experiences, culture shock, racial and gender issues. May be repeated for credit. (P/NP grading only)—I, II, III, IV.

120X. International Education Seminar (1) Seminar—1 hour. Prerequisite: open to all EAP or UC Davis study abroad students. Seminar examines the academic, cultural, and personal issues of study abroad, including academic programs abroad, country-specific history and culture, cross-cultural experiences, culture shock, racial and gender issues. May be repeated for credit. (P/NP grading only)—I, II, III, IV.

180X. Education Abroad: Special Topics (1-12) Lecture/discussion—3-12 hours; laboratory/discussion—3 hours. Prerequisite: minimum GPA requirement for each study abroad program as specified in the written agreement between UC Davis and the host institution; permission courses may also apply. Students who participate in approved international programs take this course up to 12 units while studying abroad. May be repeated for credit; credit limited to UC and Dean’s Office to determine how they fulfill UC Davis requirements. Offered irregularly— I, II, III, IV.

190X. International Education Seminar (1) Seminar—1 hour. Prerequisite: open to upper division students for UC Davis study abroad and international internship programs. Seminar examines the academic, cultural, and personal issues of study abroad, including academic programs abroad, country-specific history and culture, cross-cultural experiences, culture shock, racial and gender issues. May be repeated for credit. (P/NP grading only)—I, II, III, IV.

200X. Internship—3-12 hours. Prerequisite: participation in academic internship. Students are required to complete an academic internship. Students must complete the assignment, students take advantage of internships provided by UC Davis and regularly make arrangements for academic internships, often including guest speakers, observations of congressional committees and federal agencies, and other relevant Washington experiences.

Courses are taught by UCDC faculty appointed by the various UC campuses, or visiting faculty from the Washington area. Financial aid eligibility and awards as determined by the home campus is maintained while enrolled in the program, and the aid package can be adjusted to reflect the additional costs of the program.

Summer Component (10 weeks). UCDC also offers a 10-week Summer Program with a credit or non-credit option. The credit option allows students to enroll in courses in addition to working at an internship. Students pay the summer sessions rate per credit. UC Davis’ Washington Center (UCDC) offers the program, and the aid package can be adjusted to reflect the additional costs of the program.
University Graduation Requirements

- All prospective applicants should carefully plan their course programs in order to satisfy university, college, and major/minor requirements for their degree.
- Although units and grade points earned at UCDC are incorporated into the University transcript and GPA calculations, departments and programs retain the right to determine which UCDC courses will be accepted in satisfaction of major and minor requirements.
- All degree candidates must meet the University residence requirement. Students should consult with their college Dean’s office early during the UCDC planning process for information on the university residence requirement, particularly students who intend to study abroad or participate in UCDC during their senior year.

Recognizing the special value of UCDC, the faculty has approved exceptions to the usual residence requirement for students participating in the Washington Program:

- Students planning to graduate immediately upon completion of participation in UCDC may satisfy the University residence requirement by completing at least 35 of their final 45 units on the Davis campus immediately preceding entry into UCDC.
- Students who have not finished all of their degree requirements following completion of their participation in the UCDC program may satisfy the University residence requirement by completing at least 35 units, including at least 12 units after returning from UCDC, on the Davis campus within the final 90 units earned toward the degree.

Students who will not meet the residency requirements outlined may petition their Dean’s office requesting an exception to policy.

- Students may satisfy GE requirements while at UCDC by consulting with their college Dean’s office prior to departure for information on the certification process.
- Students with a large number of units may participate in the UCDC program provided that (1) they will not exceed 225 units prior to their departure and (2) that all their degree requirements have been fulfilled either before they leave campus or during their time at UCDC. Participants may only return to campus from UCDC to complete any outstanding degree requirements provided that they can do so within the 225 unit restriction.

Courses in UC Washington Center (WAS)

Optional elective courses listed at http://www.ucdc.edu/academic/courses.

Upper Division

175. Health Policy and Health Politics (4)
Seminar—3 hours; extensive writing or discussion—1 hour. Restricted to students attending UC Washington Center program. Following the model of a Congressional subcommittee, identification of four salient health policy issues for study, research, and development of model policies to address them. (Same course as Public Health Sciences 175W.) GE credit: SocSci, Writ I, II, SS, WE.

187. Gun Violence (4)
Lecture/discussion—4 hours. Gun violence, viewed from the perspectives of criminology and public health. Topics include personal and societal contributing factors and development of potential solutions. Offered in alternate years.

192. Internship in the UC Davis Washington Center Program (7)
Internship—28 hours. Prerequisite: Junior or senior standing, admission in the UC Davis Washington Center undergraduate program, course 193 concurrently. Internship in Washington, DC with associated, supervised work experience under the auspices of the Davis Honors Challenge. May be repeated for credit for a total of 12 units. (P/NP grading only.)

193. Washington Center Research Seminar (4)
Lecture/discussion—1 hour; independent study—3 hours; tutorial—0.5 hour. Prerequisite: course 192 concurrently. Core academic component of Washington Program. Topics coordinated with internships. Research draws on resources uniquely available in Washington, DC. Supervised preparation of extensive paper. (Same course as Political Science 192W.) GE credit: SocSci, Writ I, OL, SS, WE.

University Honors Program

(formerly Honors Challenge and Integrated Studies Honors Program)

Ari Kelman, Ph.D.; Program Director
Lolita Nelson-Adkins, Program Manager

Faculty

Includes members from various departments across colleges.

The Program of Study

The honors program consists of a designed to enhance the undergraduate experience of highly motivated students in all academic pathways. The University Honors Program (UHP) is an interdisciplinary, campus-wide honors program for top students interested in enhancing their education through special courses, close contact with faculty, and dynamic interaction with academic peers.

General Education Honor honors courses, seminars, and special study opportunities constitute the course offerings of the University Honors Program. First-year and second-year students in the UHP take part General Education honors courses during their first and second year. Upper division and transfer students complete a variety of research projects and serve learning opportunities. All students who successfully complete the program participate in the University Honors Program. Issues and research projects and provide experience with group dynamics and collaborative exploration of problems. Course enrollment is generally limited to 25 students.

Updated program information is available at the UHP website. A complete list of these courses, with course registration numbers, is made available to admitted students through the UHP office.

Only University Honors Program students may register for the courses in the University Honors Program (HNR)

Courses in Davis Honors Challenge (HNR)

Lower Division

90X. Honors Discussion Section (1)
Discussion—1 hour. Prerequisite: open only to students in the Davis Honors Challenge. Examination of special topics in selected lower division courses through additional readings, discussions, term papers, collaborative work, or special activities, including projects, field and laboratory experiences, computer simulations, creative works. May be repeated for credit.

92. Internship (1-12)
Internship—3.36 hours. Prerequisite: open only to students in the Davis Honors Challenge. Supervised work experience under the auspices of the Davis Honors Challenge. May be repeated for credit for a total of 12 units. (P/NP grading only.)

94. Honors Seminar (4)
Seminar—4 hours. Open to students in the Davis Honors Challenge. Collaborative, multidisciplinary exploration of complex topics in the social sciences. Focus on critical thinking and analytical interpretation, on oral and written communication, and on the use of electronic media in gathering information. May be repeated for credit. GE credit: Writ I, II, III, IV, SS, WE.

98. Directed Group Study (1-5)
Discussion—1-5 hours. Prerequisite: open only to students in the Davis Honors Challenge. May be repeated for credit. (P/NP grading only.)

99. Special Study for Undergraduates (1-5)
Independent study—1-5 hours. Prerequisite: student in the Davis Honors Challenge. May be repeated for credit. (P/NP grading only.)

Upper Division

190X. Honors Contract (1)
Independent study or discussion—3 hours. Prerequisite: open only to students in the Davis Honors Challenge. In-depth examination of material in an upper division course as defined in an Honors Contract Proposal submitted by the student. Contract must be approved by the instructor and the Honors Council of the Academic Senate. May be repeated for credit.

192. Internship (1-12)
Internship—3.36 hours. Prerequisite: open only to students in the Davis Honors Challenge. Supervised work experience under the auspices of the Davis Honors Challenge. May be repeated for credit for a total of 12 units. (P/NP grading only.)

194. Honors Seminar (3)
Seminar—3 hours. Open only to students in the Davis Honors Challenge. Team-based work on actual problems drawn from the public or private sector. Focus on critical thinking and analytical interpretation, oral and written communication skills, and development of practical solutions to real-world problems. GE credit: Writ I, II, III, IV.

195. Honors Thesis/Honors Project (1-3)
Independent Study—3.9 hours. Prerequisite: Open only to students in the Davis Honors Challenge. Guided independent study of a selected topic leading to the presentation of an honors thesis/honors project. May be repeated for credit up to 9 units.

198. Directed Group Study (1-5)
Discussion—1-5 hours. Prerequisite: open only to students in the Davis Honors Challenge. May be repeated for credit. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)
Independent study—1-5 hours. Prerequisite: open only to students in the Davis Honors Challenge. May be repeated for credit. (P/NP grading only.)

Courses in Integrated Studies (IST)

Lower Division

8. Colloquium (1)
Discussion—1 hour. Lectures, films, and readings on the interaction between the arts and sciences. May be repeated for credit. (P/NP grading only.)

8A. Special Topics in Natural Science and Mathematics (4)
Lecture—3 hours; discussion—1 hour. Group study of a special topic in natural sciences and mathematics. Course varies with topic approved by the instructor. Limited enrollment. May be repeated for credit. GE credit: SciEng, Writ I, SE, SL, I, II, III, IV.

Quarter Offered: I-Fall, II-Winter, III-Spring, IV-Summer; Fall 2015-Spring 2016 offering in parenthesis.

Pre-Fall 2011 General Education (GE): ArtHum-Arts and Humanities; SciEng-Science and Engineering; SocSci-Social Sciences; ACGH-American Culture; DD-Domestic Diversity; Writ-Writing Experience

Fall 2011 and on Revised General Education (GE): AH-Arts and Humanities; SE-Science and Engineering; SS-Social Sciences; ACGH-American Culture; DD-Domestic Diversity; OL-Oral Skills; QL-Quantitative; SL-Scientific; VL-Visual; WC-World Cultures; Writ-Writing Experience
University Honors Program

8B. Special Topics in Humanities (4)
Lecture—3 hours; discussion—1 hour. Group study of a special topic in humanities. Course varies with topic offered. Limited enrollment. May be repeated for credit. GE credit: ArtHum, Wrt | AH. —I, II, III (I, II, III)

8C. Special Topics in the Social Sciences (4)

9. Seminar (1)
Lecture—1 hour. Preparation of a research report. Normally taken with course 8. May be repeated for credit. (P/NP grading only.) —I, II, III (I, II, III)

90. Seminar (1)
Seminar—1 hour. Prerequisite: course 9, consent of instructor; completion of 45 units with a minimum GPA of 3.250. Interrelation between the arts and sciences, focusing on a special topic. Limited to sophomores who participated in the Integrated Studies Honors Program during their freshman year and transfer students by consent of instructor. (P/NP grading only.) —I, II, III (I, II, III)

94. Seminar (1)
Seminar—1 hour. Prerequisite: course 9, consent of instructor and completion of 45 units with a minimum GPA of 3.500. Restricted to sophomores who participated in the Integrated Studies Honors Program during their freshman year and other students by consent of instructor. The nature of research at the undergraduate level. (P/NP grading only.)

Upper Division

190. Topics in Integrated Studies (1)
Seminar—1 hour. Prerequisite: course 9. Discussion of the integration of the arts and sciences, focusing on a special topic. May be repeated three times for credit when topic differs. (P/NP grading only.)

194HA. Special Study for Honors Students (4)
Independent study—3 hours; seminar—1 hour. Prerequisite: course 9, consent of instructor and completion of 45 units with a minimum GPA of 3.500. A program of research culminating in the writing of a junior honors thesis under the direction of a faculty adviser. May be repeated one time for credit. (Deferred grading only, pending completion of sequence.) —I, II, III (I, II, III)

194HB. Special Study for Honors Students (4)
Independent study—3 hours; seminar—1 hour. Prerequisite: course 9, consent of instructor and completion of 90 units with a minimum GPA of 3.500. A program of research culminating in the writing of a senior honors thesis under the direction of a faculty adviser. May be repeated one time for credit. (Deferred grading only, pending completion of sequence.) —I, II, III (I, II, III)

197T. Tutoring in Integrated Studies (1-4)
Tutorial—1 hour. Prerequisite: consent of Director of Integrated Studies Honors Program. Tutoring in Integrated Studies courses, usually in small discussion groups. Weekly discussions with the instructor on the subject matter of the course being tutored and on the art and craft of teaching. May be repeated eight times for credit. (P/NP grading only.) —I, II, III (I, II, III)

Academic Foundation Excellence in Teaching Award

The Program
The University Writing Program [UWP] offers writing courses and seeks to improve writing instruction across campus through a variety of programs. The UWP coordinates first year, intermediate, and advanced writing courses that satisfy college composition requirements and offers courses in writing across the curriculum, writing in specific disciplines, and writing in the professions. The Professional Writing Minor serves students from all majors who are planning careers as professional writers or editors, as well as those whose academic and professional careers demand advanced writing skills. The Program offers graduate courses in the teaching of writing and in composition theory, history, and research.

The Designated Emphasis in Writing, Rhetoric, and Composition Studies offers Ph.D. students in affiliated programs the opportunity to prepare for leadership roles in writing research, teaching, and program administration. The UWP also administers the English Composition Examination, an alternative way to satisfy the advanced writing requirement. The UWP publishes an annual anthology of exemplary student writing, Prized Writing, and a journal for writing instructors, Writing on the Edge. The Writing in the Disciplines Workshop Program presents workshops on teaching writing for faculty and TAs and workshops on writing for students. The Writing Ambassadors Program trains advanced undergraduates and places them as interns in K-12 classrooms to improve writing instruction.

Minor Program Requirements:

UNITS

Professional Writing ............................. 20

One course from each of the following four groups:

Group B: University Writing Program 104A, 104B, 104C, 104D, 104E, 104F, 104G, 104H, 104I, 110, 111A, 111B, 111C

Group C: Anthropology 110, 120, Classics 110, Communication 101, 105, 152, Design 145, 149, English 105, English/Linguistics/ UWP 106, English/Science and Technology Studies 164, History 101, Philosophy 137A, 137B, 137C, Technocultural Studies 191, University Writing Program 100, 112A, 120, 121

Group D: University Writing Program 192 (or equivalent)

Additional units to achieve a total of 20 upper division units .............................................. 4

One additional course from Groups A, B, or C above.

Note: At least twelve units must be from University Writing Program courses.

Courses in University Writing Program (UWP)

Lower Division

1. Expository Writing (4)
Lecture/discussion—4 hours. Prerequisite: completion of Entry-Level Writing Requirement. Composition, the essay, paragraph structure, diction, and related topics. Frequent writing assignments. GE credit: ArtHum, Wrt | AH, WE. —I, II, III, IV (I, II, III, IV)

1V. Expository Writing (4)
Web virtual lecture—2 hours; web electronic discussion—2 hours. Prerequisite: completion of Entry-Level Writing Requirement. Composition, the essay, paragraph structure, diction, and related topics. Frequent writing assignments. Not open to students who have taken course 1 or 1V. GE credit: ArtHum, Wrt | AH, WE. —I, II, III, IV (I, II, III, IV)

1. Expository Writing (4)
Lecture/discussion—2 hours; web electronic discussion—2 hours. Prerequisite: completion of Entry-Level Writing Requirement. Composition, the essay, paragraph structure, diction, and related topics. Frequent writing assignments. Not open to students who have taken course 1 or 1V. GE credit: ArtHum, Wrt | AH, WE. —I, II, III, IV (I, II, III, IV)

10. Introduction to Professional Writing Studies (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or the equivalent. Introduction to writing as an object of study and to theories and research in the field. Survey of how writing is created, disseminated, and used in public, private, and academic contexts. GE credit: ArtHum | AH, WE. —I (I)
11. Popular Science and Technology Writing (4)
Lecture/discussion—2 hours; discussion—1 hour. Positioning of science and technology in society as reflected and constructed in popular texts. Topics include genre theory, demarcation, rhetorical figures, and critical thinking. GE credit: ArtHum | AH, WE.—II. (II.)

10. Introduction to discipline of professional writing.

100. Genre Theory and Professional Writing (4)
Lecture/discussion—4 hours. Prerequisite: course 1 or English 3 or the equivalent. Style, language, and structure in the essay. Analyzing style, developing a voice in writing, revising sentences, developing effective paragraphs and arguments, and writing with emphasis on clear and precise content. GE credit: ArtHum, Wrt | AH, WE.—I, II, III. (II, III.)

19. Writing Research Papers (4)
Lecture/discussion—4 hours. Prerequisite: course 1 or English 3 or the equivalent. Critical reading, analysis, documentation, and writing research-based assignments. Focus on research and development of effective arguments. Reading and writing assignments may focus on a single theme. GE credit: ArtHum, Wrt | AH, WE.—I, II, III. (II, III.)

21. Introduction to Reading and Writing in Non-Native Speakers (5)
Lecture/discussion—5 hours. Prerequisite: admission by placement examination only. Provides undergraduate students whose native language is not English with intensive work in reading and writing organized, coherent, and grammatically correct paragraphs and short academic essays. (P/NP grading only.)

22. Intermediate Reading and Writing for Non-Native Speakers (4)
Lecture/discussion—4 hours. Prerequisite: admission by placement examination, successful completion of course 21, or by consent of instructor. Provides undergraduate students whose native language is not English with experience in writing essays in recognized rhetorical modes. Students will also read to develop fluency and critical thinking and will study grammar needed for academic writing. (P/NP grading only.—I, II, III, (I, II, III.)

23. Advanced Reading and Composition for Non-Native Speakers (4)
Lecture/discussion—4 hours. Prerequisite: admission by placement examination, successful completion of course 22, or by consent of instructor. Provides undergraduate students whose native language is not English with experience in writing persuasive essays and related rhetorical passages. Students will also read for tone, style, context, and assumptions and will study advanced grammar needed for persuasive essays. (P/NP grading only.—I, II, III, (I, II, III.)

92. Internship in Writing (1-12)
Internship—3-36 hours. Prerequisite: course 1 or English 3. Internships in fields where students can practice their skills. May be repeated for credit for a total of 12 units. (P/NP grading only.)

98. Directed Group Study (1-5)
Prerequisite: course 1 or English 3 or the equivalent; consent of instructor. May be repeated two times for credit. (P/NP grading only.) GE credit: AH, WE.

99. Special Study for Undergraduates (1-5)
Prerequisite: course 1 or English 3 or the equivalent; consent of instructor. (P/NP grading only.) GE credit: AH, WE.

Upper Division

100. Genre Theory and Professional Writing (4)
Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 1 or the equivalent; course 10. Introduction to discipline of professional writing. Examination of writing as a social practice, using genre theory as a conceptual framework. Analysis of how genres function rhetorically in specific contexts and how social systems both shape and are shaped by genres. GE credit: AH, WE.—II. (II.)

101. Advanced Composition (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors or to students concurrently enrolled in an upper division course in a specific academic discipline or interdisciplinary field. Advanced instruction in writing in that discipline and practice in effective styles of communication. May be repeated one time for credit if taken in conjunction with a different upper-division course. GE credit: ArtHum, Wrt | AH, WE.—I, II, III, IV. (II, III, IV.)

102A. Writing in the Disciplines: Special Topics (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors or to students concurrently enrolled in an upper division course in a specific academic discipline or interdisciplinary field. Advanced instruction in writing in that discipline and practice in effective styles of communication. May be repeated one time for credit if taken in conjunction with a different upper-division course. GE credit: ArtHum, Wrt | AH, WE.—I, II, III, IV. (II, III, IV.)

102B. Writing in the Disciplines: Biology (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors in a biological science or to students concurrently enrolled in an upper division biological science course. Advanced instruction in writing in biology. GE credit: ArtHum, Wrt | AH, WE.—I, II, III, (II, III.)

102C. Writing in the Disciplines: History (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors in history or to students concurrently enrolled in an upper division course accepted for the history major. Advanced instruction in writing in history. GE credit: ArtHum, Wrt | AH, WE.—II. (II.)

102D. Writing in the Disciplines: International Relations (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors in international relations or to students concurrently enrolled in an upper division course accepted for the major. Advanced instruction in writing in international relations. GE credit: ArtHum, Wrt | AH, WE.—II. (II.)

102E. Writing in the Disciplines: Engineering (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors in engineering and to students enrolled in an upper division engineering or computer science course for the major. Advanced instruction in writing in engineering. GE credit: ArtHum, Wrt | AH, WE.—I, II, III. (I, II, III.)

102F. Writing in the Disciplines: Food Science and Technology (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors in food science and technology and to students concurrently enrolled in an upper division course in food science and technology. GE credit: ArtHum, Wrt | AH, WE.—II. (II.)

102G. Writing in the Disciplines: Environmental Studies (4)
Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to students with upper division coursework with an environmental focus. Advanced instruction in writing and practice in effective styles of communication in the fields of environmental study, policy, or advocacy. Not open for credit to students who have completed course 102A in the same academic field. GE credit: ArtHum, Wrt | AH, WE.—II. (I)
Departmental Courses

Anatomy, Physiology and Cell Biology (APC)

Lower Division

92. Internship (1-12)
Internship—3-36 hours. Prerequisite: lower division standing; consent of instructor. Internship experience off and on campus in all subject areas offered in the Department of Anatomy, Physiology & Cell Biology. Internships are supervised by a member of the faculty. Offered irregularly. (P/NP grading only.)

99. Special Study for Undergraduates (1-5)
Prerequisite: consent of instructor. (P/NP grading only)

Upper Division

100. Comparative Vertebrate Organology (4)
Lecture—2 hours; laboratory—2 hours. Prerequisite: Biological Science 1A and 1B or 2A and 2B. Functional anatomy of major organ systems in vertebrates. Each system examined from cellular to gross level in fish, birds, and mammals. Emphasis on how differentiated cell types are integrated into tissues and organs to perform diverse physiological functions. (Same course as Neurobiology, Physiology, and Behavior 123.)—II. (II.) Genetos

192. Internship (1-15)
Internship—3-45 hours. Prerequisite: upper division standing, approval of internship. Internship experience off and on campus in all subject areas offered in the Department of Anatomy, Physiology and Cell Biology. Internships are supervised by a member of the faculty. May be repeated for credit if topic differs. (P/NP grading only.)

198. Directed Group Study (1-5)
Prerequisite: consent of instructor. (P/NP grading only)

199. Special Study for Advanced Undergraduates (1-5)
Prerequisite: consent of instructor. (P/NP grading only)

Graduate

286. Basics of Microscopy and Cellular Imaging (2)
Lecture—1 hour; laboratory—2 hours. Prerequisite: graduate standing. Practical applications of basic microscope techniques used to image cells and tissues with the goal of using these techniques to generate publication-quality images. Principles of light, epifluorescent, confocal and electron microscopy, their applications and limitations. Restricted enrollment. Offered in alternate years.—II. Van Winkle

290. Seminar (1)
Seminar—1 hour. Discussion and critical evaluation of advanced topics and current trends in research. (P/NP grading only.)—I, II, III. (I, II, III.)

291. Topics in Biology of Respiratory System (1)
Seminar—1 hour. Prerequisite: graduate standing; consent of instructor. Topics concerning structure and function of respiratory system. Possible topics include: lung growth, pulmonary reaction to toxins, pulmonary inflammation, lung metabolism, biology of lung cells, tracheobronchial epithelium, nasal cavity structure and function. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.) Pinkerton, Wu

298. Group Study (1-5)
Laboratory—6-15 hours. Prerequisite: consent of instructor.

299. Research (1-12)
Laboratory—6-36 hours. Prerequisite: consent of instructor. (S/U grading only.)
Molecular Biosciences (VMB)

Lower Division

92. Internship (1-12)
Internship—3-36 hours. Prerequisite: lower division standing and consent of instructor. Work experience off and on campus in all subject areas offered in the Department of Molecular Biosciences. Internships supervised by a member of the faculty. (P/NP grading only.)

101Y. Principles of Pharmacology and Toxicology (1)
Lecture—1 hour; web virtual lecture—1 hour; web electronic discussion—0.5 hour; autotutorial—5 hours. Prerequisite: upper division standing in a science major; Chemistry through organic chemistry, general biology, or consent from instructor; good standing with university; computing capability using MS Word, Excel, and PowerPoint; menu driven software programs, SmartSite; computer, or ready access to a computer, with broadband Internet access. Restricted to upper division undergraduate students in good standing with school and fulfill course prerequisites. Hybrid course provides training in core concepts of pharmacological and toxicological sciences. Develop higher-order problem solving and critical thinking skills. GE credit: OL, SE, SL—III. (III.) Puchner

Upper Division

192. Internship (1-12)
Internship—3-36 hours. Prerequisite: completion of 84 units and consent from the course coordinator. General principles of neurotoxicology, the cell and molecular mechanisms and health impacts of specific neurotoxics and the contribution of neurotoxic concepts to complex neurodevelopmental disorders and neurodegenerative diseases. (Same course as Environmental Toxicology 234 and Molecular, Cellular, and Integrative Physiology 234.)—II, III. (III.) O’Connor

253. Metabolism of Toxicants and Drugs (2)
Lecture—2 hours. Prerequisite: Pharmacology and Toxicology 201, 202, 203, general biochemistry or consent of instructor. Significance/chemical pathways of toxicants and drug metabolism, enzymology and molecular aspects of P450 and flavin monooxygenases, hydroxides and phase 2 transferases and experimental approaches for metabolism studies. Offered in alternate years.——II.

254. Toxicology of the Respiratory System (3)
Lecture—3 hours; discussion. Prerequisite: Pharmacology and Toxicology 201, 202, 203, or consent of instructor. Survey of structure and function of the respiratory system, the pathophysiology of major lung diseases, the interactions of toxicants with the lung and response of this organ to injury. Offered in alternate years.——II.

255. Pharmacokinetics and Biopharmaceuticals (2)
Lecture—16 sessions; discussion—4 sessions. In-depth study of pharmacokinetics, including the fundamentals of pharmacokinetics, how to design a pharmacokinetic study and how to use both compartmental and non-compartmental analysis to interpret the data. Offered in alternate years.——II. (III.) Knysz

290. Seminar (1)
Seminar—1 hour. Prerequisite: course in topics in nutrition, pharmacology/toxicology, and biochemistry. May be repeated for credit. (S/U grading only.)—I, II, III, (I, II, III.)

297T. Tutoring in Graduate Molecular Biosciences (1-5)
Prerequisite: graduate or professional student standing and consent of instructor. Assist in preparation and teaching of courses in Nutrition, Pharmacology and Toxicology, or other courses offered by the department under direct supervision of the instructor. Designed for graduate or professional students who desire teaching experience in graduate courses. May be repeated up to 5 units of credit. (S/U grading only.)—I, II, III, (I, II, III.)

298. Group Study (1-5)
(S/U grading only.)

299. Research (1-12)
(S/U grading only.)

Professional

397T. Tutoring in Molecular Biosciences (1-5)
Discussion—1.5 hours. Prerequisite: graduate or professional standing and consent of instructor. Experience in professional curriculum for graduate or professional students, not teaching assistants, under direct supervision of instructor. May be repeated up to 5 units of credit (S/U grading only.)—I, II, III, (I, II, III.)

Pathology, Microbiology, and Immunology (PMI)

Lower Division

99. Special Study for Undergraduates (1-5)
(P/NP grading only.)

Graduate

234. Current Topics in Neurotoxicology (3)
Lecture—3 hours. Prerequisite: core courses in one of the following graduate programs: Pharmacology and Toxicology, Agricultural and Environmental Chemistry, Biochemistry and Molecular Biology, Cell and Developmental Biology, Immunology, Molecular Cellular and Integrative Physiology or Neuroscience. Restricted to upper level undergraduate students. Work experience off and on campus in all subject areas offered in the Department of Molecular Biosciences. Internships supervised by a member of the faculty. (P/NP grading only.)

99. Special Study for Advanced Undergraduates (1-5)
(P/NP grading only.)

Graduate

234. Current Topics in Neurotoxicology (3)
Lecture—3 hours. Prerequisite: core courses in one of the following graduate programs: Pharmacology and Toxicology, Agricultural and Environmental Chemistry, Biochemistry and Molecular Biology, Cell and Developmental Biology, Immunology, Molecular Cellular and Integrative Physiology or Neuroscience. Restricted to upper level undergraduate students. Work experience off and on campus in all subject areas offered in the Department of Molecular Biosciences. Internships supervised by a member of the faculty. (P/NP grading only.)

254. Toxicology of the Respiratory System (3)
Lecture—3 hours; discussion. Prerequisite: Pharmacology and Toxicology 201, 202, 203, or consent of instructor. Survey of structure and function of the respiratory system, the pathophysiology of major lung diseases, the interactions of toxicants with the lung and response of this organ to injury. Offered in alternate years.——II.

255. Pharmacokinetics and Biopharmaceuticals (2)
Lecture—16 sessions; discussion—4 sessions. In-depth study of pharmacokinetics, including the fundamentals of pharmacokinetics, how to design a pharmacokinetic study and how to use both compartmental and non-compartmental analysis to interpret the data. Offered in alternate years.——II. (III.) Knysz

290. Seminar (1)
Seminar—1 hour. Prerequisite: course in topics in nutrition, pharmacology/toxicology, and biochemistry. May be repeated for credit. (S/U grading only.)—I, II, III, (I, II, III.)

129Y. One Health: Human, Animal & Environmental Interfaces (3)
Lecture/discussion—3 hours; web electronic discussion. Class size limited to upper division undergraduate students in good standing with the school and who fulfill the course prerequisites below. Enrollment limited to 100 students per term. Introduction to fundamental, challenges, and opportunities in One Health using local and global health case studies. Animal, human, and environmental health problems, among tools and transdisciplinary approaches, will be introduced to foster innovative thinking that addresses complex issues. GE credit: SciEng or SocSci | OL, SE or SS, SL—III. (III.) Miller, Papa, Georgiou

198. Directed Group Study (1-5)
Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)
(P/NP grading only.)
210. Epidemiological Approaches to Waterborne Zoonotic Pathogens (1)
Lecture—2 hours. Prerequisite: Waterborne zoonotic diseases remain a significant cause of human illness. Review key waterborne pathogens; their biology, fate and transport in aquatic systems; on-farm management practices for reducing microbial contamination of California’s fresh and marine aquatic resources from livestock production systems. (S/U grading only.)—II. (III.) Atwill

212. Epidemiology of the Zoonoses (4)
Lecture—35 sessions; discussion—5 sessions. Prerequisite: graduate standing or third-year standing in the School of Veterinary Medicine or consent of instructor. Epidemiological, biological and ecological features of some major infections shared by humans and other animals. Wildlife and domestic animals zoonoses of major health and economic significance are presented to illustrate how knowledge of zoonoses epidemiology is essential for implementing control measures. (P/NP grading only.)—I, II, III, (II, III.) Byrne

241. Advanced Topics in Canine Genetics and Genomics (2)
Discussion—2 hours. Prerequisite: Genetics 201A, 201C (or equivalents, with consent of instructor). In-depth study of topics in canine genomics and genetics. Topics will vary annually, but can include positional cloning, whole genome association, complex traits and linkage disequilibrium. Students will lead discussions on assigned readings. May be repeated for credit when topic differs. Limited enrollment. Offered in alternate years.—(III.) Bannasch

Lecture—2 hours; discussion—0.5 hours; laboratory—0.5 hours. Prerequisite: undergraduate genetics and ecology/conservation biology courses recommended. Introduction to the field of applied ecological genetics to include applications in conservation ecology, population genetics, population biology, wildlife health and disease ecology. Limited enrollment. (Same course as Ecology 242.)—I. (II.) Ernest

266. Applied Analytic Epidemiology (3)
Lecture—2 hours; laboratory—2 hours. Prerequisite: Preventive Veterinary Medicine 404 or consent of instructor. Principles and applications in analysis of epidemiologic data. Methods of analyzing stratified and matched case-control regression for cohort and case-control studies, Poisson regression, survival-time methods. (Same course as Master of Public Health 266.)—III. (III.) Kass

277. Mathematical Models in Epidemiology (3)
Lecture/discussion—2 hours; laboratory—2 hours. Prerequisite: Preventive Veterinary Medicine 403 and Epidemiology 405; consent of instructor; although not required, students are encouraged to refresh their knowledge of high school calculus and differential equations. Class size limited to 30 students. Theory of epidemics and mathematical modeling concepts for infectious diseases to include discrete and continuous time models, their use to explore disease dynamics and investigate prevention and control strategies for human and veterinary infectious diseases. (Same course as Epidemiology 277.)—III. (III.) Aly

298. Group Study (1-5)
Prerequisite: consent of instructor.

299. Research (1-12)
Prerequisite: consent of instructor. (S/U grading only.)
The Major Program

The Viticulture and Enology major provides an interdisciplinary education in the biological and physical principles underlying grape and wine production as well as practical knowledge of grape growing (viticulture) and wine making (enology). This program provides the knowledge base for problem-solving and decision-making in commercial grape and wine production.

Preparatory Requirements. Before transferring into the Viticulture and Enology major, students must complete the following courses with a grade of C or better and with a combined grade point average of at least 2.500 at the University of California (at least 3.000 for similar courses taken at community college) for these and all other preparatory courses. In addition, students’ overall UC GPA must be 2.250 or higher. All courses must be taken for a letter grade.

Preparatory Subject Matter

<table>
<thead>
<tr>
<th>Subject Matter</th>
<th>UNITS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Biological Sciences 1A or 2A</td>
<td>4-5</td>
</tr>
<tr>
<td>Chemistry 2A, 2B, 2C, 8A</td>
<td>17</td>
</tr>
<tr>
<td>Mathematics 16A</td>
<td>3</td>
</tr>
<tr>
<td>Physical Science</td>
<td>4</td>
</tr>
</tbody>
</table>

Recommendations. Completion of UC Davis equivalents of the following preparatory courses for the major are not required for entry but are highly recommended. Failure to complete these will delay entry into the major and division courses and may delay graduation. Some courses may be available at UC Davis during Summer Session:

<table>
<thead>
<tr>

<td>4-5</td>
</tr>
<tr>
<td>Biological Sciences 102</td>
<td>3</td>
</tr>
</tbody>
</table>

The Program. The curriculum builds upon a foundation of biology, chemistry, biochemistry, and mathematics with specialized courses related to grape and wine production. To complete the program, students may choose to place particular emphasis on viticulture, enology, or economics. Credit may also be earned for foreign language study and internships.

Career Alternatives. Graduates are qualified for a variety of vineyard and winery positions, including production manager, quality control, and research. Additionally, they may work in related fields such as pest management, nursery production, and analytical services.

Total Units for the Major

120-133

Major Adviser. M. Matthews

Related Major Programs.

Graduate Study. Several graduate groups offer programs of study leading to advanced degrees in the fields of viticulture and enology. For the M.S. or Ph.D. degree, see Agricultural and Environmental Engineering, Chemical Engineering and Materials Science, the Graduate Group in Plant Biology, or the Graduate Group in Horticulture and Agronomy.

Courses in Viticulture and Enology (VEN)

Lower Division

2. Introduction to Viticulture (2)

Lecture—2 hours. Fundamental principles of biology and culture of the grapevine, taxonomy, morphology, physiology, distribution, domestication, utilization, propagation, production systems, harvesting, and storage and processing of grapes. Successful completion of the course should prepare students for upper division courses in viticulture. GE credit: SE.—I. (I.) Cantu

3. Introduction to Winemaking (3)

Lecture—3 hours. Overview of the history of wine, viticulture, fermentation, viticulture operations, the physiology of wine consumption, wines produced in California and other major wine-producing regions and the sensory evaluation of wine. GE credit: SE.—III. (I.) Hymanson, Adams

90X. Lower Division Seminar (2)

Seminar—1 hour; term paper (required/discussion).

Prerequisite. Lower division standing and consent of instructor. Introduction to current issues surrounding wine and health as they relate to diet, nutrition, and toxicology. May not be repeated for credit. GE credit: Wrt.

99. Special Study for Undergraduates (1-5)

(P/NP grading only.)

Upper Division

101A. Viticultural Practices (3)

Lecture—1.5 hours; discussion/lab—3.5 hours. Prerequisite: course 2. Identification, cultivation, and use of the major wine, table, raisin, and rootstock cultivars. Includes practices specific to the fall such as fruit contracts, maturity sampling, harvesting, cover crops, and soil-pests. One field trip required. GE credit: SE.—I. (I.) Walker

101B. Viticultural Practices (3)

Lecture—1.5 hours; discussion/lab—3.5 hours. Prerequisite: course 2. Theory, principles, and practices of pruning and grapevine propagation. Plant materials and the current propagation practices and control and weed identification, wood diseases, and frost protection. One field trip required. GE credit: SE.—II. (II.) Walker

101C. Viticultural Practices (3)

Lecture—1.5 hours; discussion/lab—3.5 hours. Prerequisite: course 2. Field oriented experience in the principles and practices of grapevine production, including vineyard establishment, vine training, trellising, canopy management practices, irrigation and water management, and methods of crop adjustment for improvement of fruit quality. One field trip required. GE credit: ScEng | SE.—III. (III.) Smart

110. Grapevine Growth and Physiology (3)

Lecture—3 hours. Prerequisite: course 2. Botanical aspects including morphology and domestication will precede lectures covering flower development and energy budget concepts. Impact of physiological variables such as photosynthesis translocation, mineral nutrition, and water relations on fruit ripening and composition will be covered. GE credit: ScEng | OL, SE, WE

112. Chemical Evaluation of Wines of the World (1)

Laboratory/discussion—3 hours. Prerequisite: course 111 (must be taken concurrently), course 125 with a grade of C or better. Critical analysis of wines produced in different parts of the world with emphasis on the relationship between sensory properties of the wines and factors associated with their place of origin. (P/NP grading only.) GE credit: SE

113. Raisin and Table Grape Production (2)

Lecture—2 hours; Prerequisites: 3. Overview of the raisin and table grape industries in California and other production areas of the world. Cultural practices associated with raisin and table grape production will also be discussed. GE credit: ScEng | SE

118. Grapevine Pests, Diseases, and Disorders (3)

Lecture—3 hours. Prerequisite: course 2. Various pests and diseases of vineyards throughout California. Pest/disease identification and control methods (to include sampling techniques) also will be discussed. Integrated management approach to pest control methods will be emphasized. GE credit: ScEng | SE.—I. (I.) Cantu

Pre-Fall 2011 General Education (GE): ArtHum—Arts and Humanities; SciEng—Science and Engineering; SocSci—Social Sciences; Div—Diversity; DomDiv—Domestic Diversity; Wrt—Writing Experience

Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SE=Science and Engineering; SS=Social Sciences; AGCM=American Cultures; DD=Domestic Diversity, OL=Oral Skills; QL=Quantitative, SL=Scientific, VL=Visual, WC=World Cultures; WE=Writing Experience
123. Analysis of Musts and Wines (2)
Lecture—2 hours. Prerequisite: Chemistry 2C and 88 or equivalent; Agricultural Management and Range-land Resources 21, or consent of instructor. Students enrolled in the lecture portion of the course will be required to enroll in 1 unit of course 199/299. Fundamental principles of analytical chemistry as they relate to specific methods used in winemaking. GE credit: SciEng | SE—II. (I) Waterhouse

123L. Analysis of Musts & Wines Laboratory (2)
Lab—3 hours; independent study—2 hours. Prereq-uisites: Chemistry 2C and 88, or equivalent; Agra-cultural Management and Rangeland Resources 21, and course 123 (course 123 may be taken concur-rently). Fundamental principles of analytical chemis try as they relate to specific methods used in winemaking. Laboratory exercises demonstrating various chemical, physical and biochemical meth-ods. Data will be analyzed and results interpreted in weekly lab reports; includes student-designed inde-pendent project and written report. Enrollment restricted to upper division and graduate students in Viticulture & Enology; others by approval of instruc- tor. GE credit: SciEng, Wrt | QL, SE, VL, WE—II. (I) Waterhouse

124. Wine Production (2)
Lecture—2 hours. Prerequisite: course 3, 123 (may be taken concurrently). Principles and practices of making standard types of wines, with special reference to grape varieties used and methods of vinification. SciEng | GE credit: SE—WE—II. (I) Bisset

124L. Wine Production Laboratory (3)
Laboratory—3 hours; independent study—3 hours; term paper. Prerequisite: course 124 (may be taken concurrently). Restricted to undergraduate students in fermentation science, viticulture and enology, bio-technology, microbiology, food science and applied plant biology or graduate students in food science, agricultural and environmental chemistry and horti-culture. Current technologies used in production of California table wines; analysis and monitoring of impact of fermentation variables on microbial perfor-mance and product quality; student-designed inde-pendent research project. GE credit: SciEng | QL, SE, WE—II. (I) Bisset

125. Wine Types and Sensory Evaluation (2)
Lecture—2 hours. Prerequisite: course 124; Plant Sciences 120 or Statistics 106. Open to upper division and graduate students in Viticulture & Enology; others by approval of instructor. Principles of sensory evaluation and application to wines. Factors influ-encting wine flavor, data from sensory analysis of model solu-tions. GE credit: SciEng | QL, SE—III. (III) Heymann

125L. Sensory Evaluation of Wine Laboratory (2)
Laboratory—2 hours; term paper. Prerequisite: course 125 (may be taken concurrently). Restricted to upper division majors in fermentation science or viticulture and enology or graduate students in food science. Sensory evaluation of wines and model systems. Analysis of discrimination tests, ranking, descriptive analysis and time-intensity analysis. Data analyzed by appropriate statistical tests and results interpreted in extensive weekly lab reports. GE credit: SciEng | QL, SE, VL—II. (I) Heymann

126. Wine Stability (3)
Lecture—2 hours; discussion—1 hour. Prerequisite: course 124. Restricted to students in viticulture and enology, fermentation science, applied plant biology majors, or graduate students in food science, micro-biology, horticulture, and agriculture and agronomy. Principles of equilibria and rates of physical and chemical reactions in wines; treatment of unstable components in wines by absorption, ion exchange, refrigeration, filtration, and membrane processes; and protein, polysaccharide, tannate, oxidative, and color stabilities. GE credit: SciEng | SE—II. (II) Boulton

126L. Wine Stability Laboratory (2)
Laboratory—3 hours; independent study—3 hours. Prerequisite: course 126 (may be taken concurrently). Restricted to upper division fermentation sci-ence, viticulture and enology majors, or graduate students in food science, agricultural and environ-mental chemistry, microbiology or by consent of instructor. Principles of the principles of equili-bria and rates of physical and chemical reactions to wine stability. GE credit: SciEng | SE, WE—II. (II) Boulton

128. Wine Microbiology (2)
Lecture—2 hours. Prerequisite: courses 123 and 124; Microbiology 102 and 102L, or Food Science and Technology 104 and 104L; courses 125 and 126 recommended. Nature, development, physiology, biochemistry and control of yeasts and bacteria involved in the making, aging and spoilage of wine. GE credit: SciEng | SE—II. (II) Mills

128L. Wine Microbiology Laboratory (2)
Laboratory—6 hours. Prerequisite: course 123, 124, and 128 (may be taken concurrently). Microbiology 102L or Food Science and Technology 104 and 104L; course 125 and 126 recommended. Restricted to upper division students in fermentation science, viticulture and enology or graduate students in food science. Nature, development, physiology, biochemistry and control of yeasts and bacteria involved in the making, aging and spoilage of wine. GE credit: SciEng | SE, WE—II. (II) Mills

135. Wine Technology and Winery Systems (3)
Lecture—3 hours; discussion/laboratory—2 hours. Prerequisite: course 124. Process technologies and process systems for modern commercial wineries. Lectures, demonstrations, problem solving sessions, and possible field trips. Includes grape preparation and fermentation equipment; post-fermentation processing equipment; wine utility, cleaning systems, and waste treatment. GE credit: SciEng | QL, SE—II. (III) Block

140. Distilled Beverage Technology (3)
Lecture—3 hours. Prerequisite: Chemistry 88; Food Science and Technology 110A. Distillation principles and practices, production technology of brandy, whiskey, rum, vodka, gin, and other distilled bever-ages; characteristics of raw materials, fermentation, distillation, and aging. Offered in alternate years. GE credit: SciEng | QL, SE, WE—III. (III) Heymann

181. Readings in Enology (1)
Discussion—1 hour. Prerequisite: course 3. Critical evaluation of selected monographs in enology. Dis-cussion led by the students. May be repeated three times for credit. (P/NP grading only.) GE credit: SE—III. (III) Matthews

190X. Winemaking Seminar (1)
Seminar—1 hour; discussion—1 hour. Prerequisite: course 3. Open to Viticulture and Enology majors and graduate students. Outside speakers on a spe-cific winemaking topic chosen for the quarter. Dis-cussion with the speaker hosted by the faculty member(s). May be repeated for credit up to 3 times. (P/NP grading only.) GE credit: SE—III. (III)

192. Internship (1-12)
Internship—3-36 hours. Prerequisite: completion of 94 units. Work experience related to Fermentation Science (Enology) or Plant Science (Viticulture) majors. Internships must be approved and super-vised by a member of the department or major fac-ulty, but are arranged by the student. (P/NP grading only.) GE credit: SE—II. (II)

199. Special Study for Advanced Undergraduates (1-5)
(P/NP grading only.) GE credit: SE—Graduate

200. Introduction to Scientific Methods (2)
Lecture/discussion—1 hour; term paper. Prerequisite: graduate standing or consent of instructor. Procedures involved in scientific research. Topics include conducting literature review, formulating hypotheses, and analyzing and reporting results. Annotated bibliography and written and oral research proposals.

210. Grape Development and Composition (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 102 and 103, or 105. Anatomy, physiology and biochemistry of grape development, with emphasis on the development of grape composition relevant to winemaking. Offered in alternate years.—III. Adams, Polito

213. Flavor Chemistry of Foods and Beverages (3)
Lecture/discussion—3 hours. Prerequisite: Chemistry 88, course 123, course 123L or Food Science and Technology 103 or consent of instructors. Students will become familiar with basic principles of flavor chemistry, analysis, and formation in fresh and pro-cessed foods. Students will be required to read and critically evaluate flavor chemistry literature. [Same course as Food Science and Technology 213].—III. (III) Ebeler, Heymann

215. Sensometrics (3)
Lecture—3 hours. Prerequisite: Food Science and Technology 117 or the equivalent, course 125 and 125L, or Food Science and Technology 103 or 107B. Experimental design and statistical analysis, including multivariate analysis, for both sensory and instrumental data in enology and food-related studies.—I. (I) Smart

216. Sustainable Vineyard Development (5)
Lecture/discussion—3 hours; fieldwork—3 hours; term paper. Prerequisite: course 101A, 101B, 101C, and one of courses 115 and 118 or consent of instructor; course 110, Soil Science 100, Atmospheric Science 133 and Agricultural and Resource Economics 140 recommended. Application of plant, meteorological, soil, water, GIS, and economic sci-ences to sustainable vineyard development. Prepara-tion of a comprehensive study to determine the viticultural and economic feasibility of a given site for raisin, table, or wine grape production.—I. (I) Smart

217. Field and GIS Evaluation of Soils (3)
Lecture/laboratory—4 hours; fieldwork—3 hours. Prerequisite: Plant Sciences 120, 205 or 206, Soil Science 100, 105, or 107; course 101C. Applied Biotechnology 180 are recommended; consent of Instructor. Principles and practices used to evaluate agricultural soils in the field, including soil pits, soil cores, electrical conductivity meters, ground pene-trating radar, geomorphology and surface terrain analysis. Use of geographic information sciences, soil databases, digital elevation models and geosta-tistics. Offered in alternate years.—II. (II) Smart

219. Natural Products of Wine (3)
Lecture—3 hours. Prerequisite: courses 123 and 124, or natural products background and consent of instructor. Structure, occurrence, and changes due to winemaking to the natural products found in wine. Chemicals with a sensory impact will be emphasized, including flavonoids and other pheno-lides, terpenes and norisoprenoids, pyrazines, oak volatiles and other wine constituents.—I. (I) Waterhouse

223. Instrumental Analysis of Must and Wine (4)
Lecture—2 hours; laboratory—3 hours; discussion—1 hour. Prerequisite: courses 123 or 124, and Microbiology 102 or 102L, or Food Science and Technology 103 required. Biological Sciences 102 and 103 or Biological Sciences 105, Chemistry 107B or Chemistry 115 recommended. Open to upper division students in Viticulture & Enology, Food Science and Technology; students in Food Sci-ence, Ag & Environmental Chemistry and Viticulture & Enology graduate groups. Theory and practice of instrumental analysis of wine and vineyard grape on the principles of analytical techniques (e.g., CE, GC, HPLC, Mass Spectrometry) and factors deter-mining correct choice of instrumental method.—II. (II) Ebeler
224. Advances in the Science of Winemaking (3)
Lecture—2 hours. Prerequisite: course 125, 126 and graduate standing or consent of instructor. Selected topics in the science and technology of winemaking. Topics drawn from current research of participating faculty. Critical analysis of the technical content of published material.—III, (II, I).

225. Advanced Sensory Analysis of Wines (3)
Lecture/discussion—2 hours; laboratory—4 hours. Prerequisite: courses 124 and 125 (or Food Science and Technology 107) and Agricultural Management and Rangeland Resources 120 or the equivalent. Sensory descriptive analysis experiments will be designed and conducted using standard sensory science methods. Data will be analyzed by analyses of variance, principal component analyses and generalized Procrustes analysis to evaluate the judge's performance and interpret the significance of the results.—II, Heymann.

235. Winery Design (4)
Lecture—2 hours; discussion—1 hour; independent study. Prerequisite: course 124, 135 or consent of instructor. Design of wineries. Includes process calculations, equipment selection, process layout and building choice and siting. Project scheduling, capital costs, and ten-year cash flow analysis for the winery. One field trip required. Offered in alternate years.—II, Boulton.

270. Critical Evaluation of Scientific Literature (2)
Discussion—2 hours. Prerequisite: consent of instructor. Contemporary research topics in biological sciences. Discussion of recent research articles in a special topic area. Intended to develop skills in critical evaluation of scientific publications. May be repeated for credit. (S/U grading only)—II, III, (II, III, III, Bissun)

290. Seminar (1)
Seminar—1 hour. Prerequisite: consent of instructor. (S/U grading only)—II, III, (II, III, III)

290C. Advanced Research Conference (1)
Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Planning and results of research programs, proposals, and experiments. Discussion and critical evaluation of original research being conducted by the group. Discussion led by individual research instructors for research group. May be repeated for credit. (S/U grading only)—II, III, (II, III, III)

291. Advanced Viticulture (2)
Lecture/discussion—2 hours. Prerequisite: course 110, 110C, 124, 125, 125C, 125L, 126, 126L, 128, 1281; consent of instructor. Restricted to Viticulture & Enology Graduate Group graduate students. Work experience related to Fermentation Science (Enology) or Plant Science (Viticulture) majors. Internships must be planned and supervised by a graduate group faculty member or students major professor, but are arranged by the student. May be repeated 12 units for credit. Offered in alternate years.—II, (II, I, III)

297T. Tutoring in Viticulture and Enology (1-5)
Prerequisite: graduate standing and consent of instructor. Designed for graduate students who desire teaching experience, but are not teaching assistants. Student contact primarily in laboratory or discussion sections, and under direction of a faculty member. (S/U grading only)

298. Group Study (1-5)
(S/U grading only)

299. Research (1-12)
(S/U grading only)

Professional
396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only)—II, III, (II, III)

Viticulture and Enology (A Graduate Group)

David A. Mills, Ph.D., Chairperson of the Group
Group Office, 1204 EMI South
530-752-1852; Fax 530-758-032; http://vengg.ucdavis.edu

Faculty
Douglas O. Adams, Ph.D., Professor (Viticulture and Enology)
Charles W. Bamforth, Ph.D., Professor (Food Science and Technology)
Linda F. Bissun, Ph.D., Professor (Viticulture and Enology)
David E. Black, Ph.D., Professor (Viticulture and Enology, Chemical Engineering)
Academic Senate Distinguished Teaching Award
Roger B. Boulton, Ph.D., Professor (Viticulture and Enology, Chemical Engineering)
Dario Cantu, Ph.D, Assistant Professor (Viticulture and Enology)
Susan E. Ebeler, Ph.D., Professor (Viticulture and Enology)
Jean-Xavier Quinard, Ph.D., Professor (Food Science and Technology)
Hildegard Heymann, Ph.D., Professor (Viticulture and Enology)
Maria Marco, Ph.D, Assistant Professor (Food Science and Technology)
Mark A. Matthews, Ph.D, Professor (Viticulture and Enology)
David A. Mills, Ph.D., Professor (Viticulture and Enology, Food Science and Technology)
Kenneth A. Shackel, Ph.D., Professor (Plant Sciences)
David R. Smart, Ph.D., Associate Professor (Viticulture and Enology)
Li Tian, Ph.D., Assistant Professor (Plant Sciences)
M. Andrew Walker, Ph.D., Professor (Viticulture and Enology)
Andrew L. Waterhouse, Ph.D., Professor (Viticulture and Enology)
Gary E. Williams, Ph.D., Professor (Viticulture and Enology)

Affiliated Faculty
Matthew W. Fidelibus, Ph.D., Associate Specialist in Cooperative Extension (Viticulture and Enology)
W. Douglas, Gubler, Ph.D., Specialist in Cooperative Extension (Plant Pathology)
Andrew J. McElrone, Ph.D. Assistant Adjunct Professor (Viticulture and Enology)
Anita Oberholster, Ph.D., Assistant Specialist in Cooperative Extension (Viticulture and Enology)
Keri I. Steenwerth, Ph.D., Assistant Adjunct Professor (Viticulture and Enology)

Graduate Study
The M.S. program offers advanced studies in viticulture and enology, ranging from the genetics, physiology and biochemistry of grapevines to the chemistry, microbiology and sensory science of wines and the chemical engineering of winemaking. Applications must be submitted online by January 15. Ph.D. studies are not offered by the Graduate Program in Viticulture and Enology.

Preparation
Applicants to the program are required to have a level of competence equivalent to that of a strong science undergraduate program.

This includes coursework in biology, general chemistry, organic chemistry, calculus, statistics (analysis of variance), biochemistry, microbiology, and economics.

Specific requirements are outlined in detail and may be obtained by visiting http://vengg.ucdavis.edu.

Graduate Advisers. H. Heymann, A.J. McElrone

War–Peace Studies

[College of Letters and Science]
The interdisciplinary minor in War–Peace Studies examines the causes and dynamics of intra- and international wars and efforts to prevent and settle such conflicts. Students in the minor are encouraged to participate in the educational activities of the Davis Program of the UC Institute on Global Conflict and Cooperation (IGCC). The minor is sponsored by the International Relations Program.

Minor Program Requirements:

UNITS
War–Peace Studies................................. 19-20
One or two courses from each of the following areas:
Approaches: Anthropology 123AN, 126B, Comparative Literature 157, Philosophy 115, 116, Political Science 121, 123, 124, 132, 176, Sociology 157, Women’s Studies 102
Northern and Western Regions: History 134A, 139C, 142A, 143, 144A, 144B, 145, 1708, 171B, 1748, Native American Studies 1308, Political Science 130, 131
Southern and Eastern Regions: Anthropology 142, 143A, 143B, 144, History 165, 191F, 194C, Native American Studies 120, Political Science 142A
Restriction. No more than two courses from a single department may be offered in satisfaction of the minor requirements.

Advising, International Relations Program 530754-8098

Water Science

See Hydrologic Sciences (A Graduate Group), on page 347; Hydrology, on page 348; and Soil and Water Science, on page 511.

Wildlife, Fish, and Conservation Biology

[College of Agricultural and Environmental Sciences]
John M. Eade, Ph.D., Chairperson of the Department
Department Office, 1088 Academic Surge

Faculty
Louis W. Botsford, Ph.D., Professor
Tim Caro, Ph.D., Professor
John M. Eade, Ph.D., Professor
Nann A. Fangue, Ph.D., Assistant Professor
Douglas A. Kelt, Ph.D., Professor
A. Peter Klimley, Ph.D., Adjunct Professor
Peter B. Mayle, Ph.D., Professor

Quarter Offered: I=Winter, II=Spring, III=Summer, IV=Summer; 2013-2016 offering in parentheses
Pre-Fall 2011 General Education (GE): AH=Arts and Humanities; SCI=Science and Engineering; SS=Social Sciences; Div=Domestic Diversity; Wrt=Writing Experience
Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SCI=Science and Engineering; SS=Social Sciences; Div=Domestic Diversity; Wrt=Writing Experience
Preparatory Subject Matter..............49-50

The Major Program
The Wildlife, Fish, and Conservation Biology major deals with the relationships between the require-
ments of wildlife and the needs of people. Under-
standing these relationships is vital for the
maintenance of ecological diversity, recreational
activities, and conservation biology emphasizing vertebrate
life, Fish, and Conservation Biology must consult the
Adviser.

Career Alternatives. The major prepares stu-
dents to excel in diverse fields of environmental and
biology, including veterinary and wildlife health sciences. The
breadth of course requirements, when combined
with electives also make this an excellent prepara-
tory major for secondary school teaching. Certifica-
tion by professional societies such as The Wildlife
Society, American Fisheries Society, or the Ecologi-
cal Society of America, or preparation for graduate studies may also be achieved by careful planning of
 electives with a faculty adviser careful planning of
 electives with a faculty adviser.

Areas of Specialization
(1) Conservation Biology: Complete Wildlife, Fish, and Conservation Biology 153 & 155L.
(2) Environmental Science and Policy 161, 170, or 171.
(3) Wildlife, Fish, and Conservation Biology 152, 155, or 157.
(4) Animal Science 103, 170, 171A, 172, or 173.
(5) Veterinary Medicine 170.
(6) Fish Biology: Complete Wildlife, Fish, and Conservation Biology 120 & 120L.
(7) Wildlife, Fish, and Conservation Biology 151.
(8) Plant Sciences 131, 144, 145, or 148.
(9) Environmental Science and Policy 116N, 150C, 151, 151L, 161, Evolution and
Ecology 115, Environmental Science and Management 100, Hydrology 143,
Wildlife, Fish, and Conservation Biology 152.
(10) Animal Science 118, Environmental Science and Policy 116N, 150C, 151, 151L, Evolution and
Ecology 115, Environmental Science and Management 100, Hydrology 143,
Wildlife, Fish, and Conservation Biology 152.
(11) Animal Science 118, Environmental Science and Policy 116N, 150C, 151, 151L, Evolution and
Ecology 115, Environmental Science and Management 100, Hydrology 143,
Wildlife, Fish, and Conservation Biology 152.
(12) Animal Science 118, Environmental Science and Policy 116N, 150C, 151, 151L, Evolution and
Ecology 115, Environmental Science and Management 100, Hydrology 143,
Wildlife, Fish, and Conservation Biology 152.
(13) Animal Science 118, Environmental Science and Policy 116N, 150C, 151, 151L, Evolution and
Ecology 115, Environmental Science and Management 100, Hydrology 143,
Wildlife, Fish, and Conservation Biology 152.

Restricted Electives...........................15-24
Choose one from the five Areas of Specialization shown below. Students must maintain a C average (2.0 GPA) and pass all course work in their chosen specialization.

Areas of Specialization
(1) Conservation Biology: Complete Wildlife, Fish, and Conservation Biology 153 & 155L.
(2) Environmental Science and Policy 161, 170, or 171.
(3) Wildlife, Fish, and Conservation Biology 152, 155, or 157.
(4) Animal Science 103, 170, 171A, 172, or 173.
(5) Veterinary Medicine 170.
(6) Fish Biology: Complete Wildlife, Fish, and Conservation Biology 120 & 120L.
(7) Wildlife, Fish, and Conservation Biology 151.
(8) Plant Sciences 131, 144, 145, or 148.
(9) Environmental Science and Policy 116N, 150C, 151, 151L, Evolution and
Ecology 115, Environmental Science and Management 100, Hydrology 143,
Wildlife, Fish, and Conservation Biology 152.
(10) Animal Science 118, Environmental Science and Policy 116N, 150C, 151, 151L, Evolution and
Ecology 115, Environmental Science and Management 100, Hydrology 143,
Wildlife, Fish, and Conservation Biology 152.
(11) Animal Science 118, Environmental Science and Policy 116N, 150C, 151, 151L, Evolution and
Ecology 115, Environmental Science and Management 100, Hydrology 143,
Wildlife, Fish, and Conservation Biology 152.
(12) Animal Science 118, Environmental Science and Policy 116N, 150C, 151, 151L, Evolution and
Ecology 115, Environmental Science and Management 100, Hydrology 143,
Wildlife, Fish, and Conservation Biology 152.

Restricted Electives...........................15-24
Choose one from the five Areas of Specialization shown below. Students must maintain a C average (2.0 GPA) and pass all course work in their chosen specialization.

Areas of Specialization
(1) Conservation Biology: Complete Wildlife, Fish, and Conservation Biology 153 & 155L.
(2) Environmental Science and Policy 161, 170, or 171.
(3) Wildlife, Fish, and Conservation Biology 152, 155, or 157.
(4) Animal Science 103, 170, 171A, 172, or 173.
(5) Veterinary Medicine 170.
(6) Fish Biology: Complete Wildlife, Fish, and Conservation Biology 120 & 120L.
(7) Wildlife, Fish, and Conservation Biology 151.
(8) Plant Sciences 131, 144, 145, or 148.
(9) Environmental Science and Policy 116N, 150C, 151, 151L, Evolution and
Ecology 115, Environmental Science and Management 100, Hydrology 143,
Wildlife, Fish, and Conservation Biology 152.
(10) Animal Science 118, Environmental Science and Policy 116N, 150C, 151, 151L, Evolution and
Ecology 115, Environmental Science and Management 100, Hydrology 143,
Wildlife, Fish, and Conservation Biology 152.
(11) Animal Science 118, Environmental Science and Policy 116N, 150C, 151, 151L, Evolution and
Ecology 115, Environmental Science and Management 100, Hydrology 143,
Wildlife, Fish, and Conservation Biology 152.
(12) Animal Science 118, Environmental Science and Policy 116N, 150C, 151, 151L, Evolution and
Ecology 115, Environmental Science and Management 100, Hydrology 143,
Wildlife, Fish, and Conservation Biology 152.

Minor Program Requirements:
The minor in Wildlife, Fish, and Conservation Biology is for students interested in basic training and understanding of the ecology and conservation of wild terrestrial and aquatic vertebrates, emphasizing birds, mammals, and fish, but with relevance and application to all life forms.

UNITs
Wildlife, Fish, and Conservation Biology

Courses in Wildlife, Fish, and Conservation Biology (WFC)

Lower Division

10. Wildlife Ecology and Conservation (4)

11. Introduction to Conservation Biology (3)
Lecture—3 hours. Introduction to conservation biology and to the biological issues and controversies surrounding loss of species and habitats for students with no background in biological sciences. Offered in alternate years. GE credit: SciEng, Writ | SE, SL, WE—III. Caro

50. Natural History of California’s Wild Vertebrae (3)
Lecture—2 hours; discussion—1 hour. Examination of the natural history of California’s wild vertebrates (fish, amphibians, reptiles, birds, and mammals), including their biogeography, systematics, ecology, and conservation status. GE credit: SciEng. Writ | SE, SL, WE—II. (II.) Townsend

92. Internship (1-6)
Internship—3–18 hours. Prerequisite: lower division standing and instructor’s approval. Work experience off and on campus in all subject areas offered in the department. Internships supervised by a member of the faculty. (P/NP grading only.)

99. Special Study for Undergraduates (1-5)
Special study for undergraduates. (P/NP grading only.)—I, II, III. (I, II, III.)

Upper Division

100. Field Methods in Wildlife, Fish, and Conservation Biology (4)
Lecture—2 hours; laboratory—3 hours; fieldwork—3 hours. Prerequisites: Evolution and Ecology 101 or Environmental Science and Policy 100 and consent of instructor. Introduction to field methods for monitoring and studying wild vertebrates and their habitats, with an emphasis on ecology and conservation. Required weekend field trips. GE credit: SciEng | SE—III. (III.) Eadie, Kelt, Todd, Van Vuren

101. Field Research in Wildlife Ecology (2)
Lecture/discussion—2 hours. Prerequisite: Consent of instructor and one upper division course in each of ecology, statistics, and ornithology. Morphological, physiological, and behavioral adaptations of mammals. Morphological, physiological, reproductive, and behavioral adaptations of mammals to their environment.—III. (III.) Kelt

110. Biology and Conservation of Wild Mammals (3)
Lecture—6 hours. Prerequisite: course 110 may be taken concurrently; consent of instructor. Laboratory exercises in the morphology, systematics, species identification, adaptations of wild mammals to different habitats. Limited enrollment.—III. (III.) Kelt

111. Biology and Conservation of Wild Birds (3)
Lecture—3 hours. Prerequisites: Biological Sciences 1A, 1B, 1C, or Biological Sciences 2A, 2B, 2C; Evolution and Ecology 101 or Environmental Science and Policy 100 or equivalent course. Phylogeny, distribution, migration, population dynamics, behavior and physiological ecology of wild birds. Emphasis on adaptations to environments, species interactions, management, and conservation. GE credit: SciEng | SE—II. (II.) Eadie

111L Laboratory in Biology and Conservation of Wild Birds (3)
Laboratory—6 hours; fieldwork—3 hours. Prerequisite: course 111 may be taken concurrently; consent of instructor. Laboratory exercises in bird species identification, anatomy, molt, age and sex, specialized adaptations, behavior, research, with emphasis on conservation of wild birds. Several weekend field trips, stock days, and independent bird study are required. Limited enrollment.—I. (I.) Eadie

120. Biology and Conservation of Fishes (3)
Lecture—3 hours. Prerequisites: Biological Sciences 2A, 2B, 2C. Evolution and conservation of marine and freshwater fishes.—I. (I.) Moyle

120L. Laboratory in Biology and Conservation of Fishes (2)
Laboratory—3 hours. Prerequisite: course 120 may be taken concurrently. Limited enrollment. Morphology, taxonomy, conservation, and identification of marine and freshwater fishes with emphasis on California species.—I. (I.) Moyle

121. Physiology of Fishes (4)
Lecture—3 hours; laboratory—3 hours. Prerequisites: upper division courses in nutrition and physiology or consent of instructor. Comparative physiology, growth, reproduction, behavior, and energy relations of fishes. Offered irregularly. GE credit: SciEng, Writ | SE, WE.—II. (II.)

122. Population Dynamics and Estimation (4)
Lecture—3 hours; laboratory—3 hours. Prerequisites: Mathematics 16A-16B; Statistics 13 or the equivalent; an upper division course in ecology. Description of bird, mammal and fish population dynamics, modeling philosophy, techniques for estimation of animal abundance (e.g., mark-recapture, chaining, ratio, etc.), mathematical models of populations (e.g., Leslie matrix, logistic, dynamic pool, stock-recruitment), case histories.—III. (III.) Sotsford

102L Field Studies in Fish Biology: Laboratory (6)
Fieldwork—15 hours; laboratory—12 hours; discussion/lab—3 hours. Prerequisites: course 102, upper division course in each of ecology, aquatic biology, fish biology, and statistics, and consent of instructor. Field investigations of fish biology emphasized including interpretative literature and methods and individual research projects on ecology, behavior, physiology or population biology of fishes at the field site in relation to their habitats. Offered irregularly. (Deferred grading only pending completion of projects.) GE credit: SciEng, Writ | SE, WE—III. Moyle

110L Laboratory in Biology and Conservation of Wild Mammals (3)
Laboratory—6 hours. Prerequisite: course 110 may be taken concurrently; consent of instructor. Laboratory exercises in the morphology, systematics, species identification, adaptations of wild mammals to different habitats. Limited enrollment.—III. (III.) Kelt

111L Laboratory in Biology and Conservation of Wild Birds (3)
Laboratory—6 hours; fieldwork—3 hours. Prerequisite: course 111 may be taken concurrently; consent of instructor. Laboratory exercises in bird species identification, anatomy, molt, age and sex, specialized adaptations, behavior, research, with emphasis on conservation of wild birds. Several weekend field trips, stock days, and independent bird study are required. Limited enrollment.—I. (I.) Eadie

120. Biology and Conservation of Fishes (3)
Lecture—3 hours. Prerequisites: Biological Sciences 2A, 2B, 2C. Evolution and conservation of marine and freshwater fishes.—I. (I.) Moyle

120L. Laboratory in Biology and Conservation of Fishes (2)
Laboratory—3 hours. Prerequisite: course 120 may be taken concurrently. Limited enrollment. Morphology, taxonomy, conservation, and identification of marine and freshwater fishes with emphasis on California species.—I. (I.) Moyle

121. Physiology of Fishes (4)
Lecture—3 hours; laboratory—3 hours. Prerequisites: upper division courses in nutrition and physiology or consent of instructor. Comparative physiology, growth, reproduction, behavior, and energy relations of fishes. Offered irregularly. GE credit: SciEng, Writ | SE, WE.—II. (II.)

122. Population Dynamics and Estimation (4)
Lecture—3 hours; laboratory—3 hours. Prerequisites: Mathematics 16A-16B; Statistics 13 or the equivalent; an upper division course in ecology. Description of bird, mammal and fish population dynamics, modeling philosophy, techniques for estimation of animal abundance (e.g., mark-recapture, chaining, ratio, etc.), mathematical models of populations (e.g., Leslie matrix, logistic, dynamic pool, stock-recruitment), case histories.—III. (III.) Sotsford

130. Physiological Ecology of Wildlife (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: Evolution and Ecology 101 or Environmental Science and Policy 100 or equivalent course. Field Principles of ecological physiology, emphasizing vertebrates. Ecological, evolutionary, and behavioral perspectives on physiological mechanisms used by animals to adapt to their environment, including consideration of climate-change and other threats to biodiversity. Tropical, temperate, and polar ecosystems are highlighted. GE credit: SciEng | SE—II. (II.) Fangue

134L. Herpetology Laboratory (3)
Laboratory—6 hours. Prerequisite: Biological Sciences 2A, 2B, 2C; Evolution and Ecology 101 or Environmental Science and Policy 100 or equivalent upper division course recommended; course 134 concurrently; consent of instructor. Diagnostic characteristics and functional attributes of amphibians and reptiles, emphasizing ecological, biogeographic, and phylogenetic evidence of evolutionary relationships with common species of reptiles and amphibians in the Davis area. Offered in alternate years.—III. Todd

136. Ecology of Waterfowl and Game Birds (4)
Lecture—3 hours; laboratory—3 hours; fieldwork—1 hour. Prerequisite: course 111, 111L or the equivalent, or consent of instructor. Detailed examination of distribution, behavior, population dynamics, and management of waterfowl and upland game birds. Offered in alternate years.—II. Eadie

141. Behavioral Ecology (4)
Lecture—3 hours; film viewing—1 hour. Prerequisite: Evolution and Ecology 101 or Environmental Science and Policy 100 or equivalent course. Basic theories underlying the functional and evolutionary significance of behavior, and the role of ecological constraints. Supporting empirical evidence taken mainly from studies of wild vertebrates. Offered in alternate years. GE credit: SciEng | SE—II. (II.) Caro

150. Urban Wildlife Ecology (3)
Lecture—3 hours. Prerequisite: Biological Sciences 2A, 2B, 2C, or the equivalent. Introduction to the behavior, ecology, and evolution of species that occur in urban environments. Effects of urbanization on disease, fitness, and dynamics of animal populations. Conservation and conflict management efforts in urban settings. Offered in alternate years.—II. Townsend

151. Wildlife Ecology (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 2A, 2B, 2C or equivalent. Ecology of wild vertebrates, including habitat selection, spatial organization, demography, population dynamics, competition, predation, herbivory, energetics, and community dynamics, set in the context of human-caused degradation of environments in North America.—I. (I.) Van Vuren

152. Ecology of Human—Wildlife Conflicts (3)
Lecture—3 hours. Prerequisite: Biological Sciences 2A, 2B, 2C, or the equivalent. Introduction to the behavior, ecology, and evolution of species that occur in urban environments. Effects of urbanization on disease, fitness, and dynamics of animal populations. Conservation and conflict management efforts in urban settings. Offered in alternate years.—II. Todd

153. Wildlife Ecotoxicology (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: introductory courses in organic chemistry, ecology, and physiology, or consent of instructor. Ecological approaches to managing wild vertebrates that come into conflict with agriculture, public health, or the conservation of biodiversity. Offered in alternate years.—II. Van Vuren
Seminar—1 hour. Prerequisite: upper division stand-

154. Conservation Biology (4) Lecture—3 hours; term paper [will be one or more book reviews]. Prerequisite: Evolution and Ecology 101 or Environmental Science and Policy 100 or the equivalent. An introduction to conservation biology and background to the biological issues and contro-
versies surrounding loss of species and habitats. GE credit: SciEng | SE, WE. —I. (F) Todd

155. Habitat Conservation and Restoration (3) Lecture—3 hours. Prerequisite: Evolution and Eco-

155L. Habitat Conservation and Restoration Laboratory (2) Fieldwork—3 hours; laboratory—3 hours. Prerequisite: Evolution and Ecology 101 or Environmental Science and Policy 100 or equivalent course; course 154 and Environmental Horticulture 160 recommended. Analysis of the characteristics of wildlife and fish habitats, the con-

156. Plant Geography (4) Lecture—3 hours; laboratory—3 hours; term paper. Field trips will be substituted for some in-lab activi-

157. Coastal Ecosystems (4) Lecture—3 hours; laboratory/fieldwork—3 hours. Prerequisite: Environmental Studies 100 or Evolution and Ecology 101; course work in organismal bi-

158. Infectious Disease in Ecology and Conservation (3) Lecture—3 hours. Prerequisite: Evolution and Eco-

192. Internship (1-12) Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in all subject areas offered in the department. Internships supervised by a member of the faculty. (P/NP grading only.)

193. Field and Laboratory Research (3) Laboratory–4 hours; discussion—1 hour. Prerequisite: course 110L, 111L, or 120L, 121 or 130; Evo-

197T. Tutoring in Wildlife and Fisheries (1-5) Prerequisite: major in Wildlife, Fish, and Conserva-

198. Directed Group Study (1-5) (P/NP grading only)

199. Special Study for Advanced Undergraduates (1-5) (P/NP grading only)

Graduate

222. Advanced Population Dynamics (3) Lecture—3 hours. Prerequisite: graduate standing; advanced course in ecology [e.g., Evolution and Ecology 101], population dynamics [e.g., course 122], and one year of calculus; familiarity with matrix algebra and partial differential equations recom-

223. Conservation Biology and Animal Behavior (3) Lecture—1.5 hours; discussion—1.5 hours. Prerequisite: Ecology 208 or Animal Behavior 221. Influ-

290. Seminar (1-3) Seminar—1-3 hours. Prerequisite: consent of instruc-

291. Seminar in Aquatic Ecology (2) Seminar—2 hours. Prerequisite: graduate standing in biology. Presentation and analysis of assigned topics in aquatic ecology and conservation. Offered in alternate years. (S/U grading only.)—I, III

292. Physiology of Fishes Seminar (1) Seminar—1 hour. Prerequisite: graduate standing and at least two hours in physiology; consent of instructor. Seminar devoted to current topics concern-

294. Behavioral Ecology of Predators and Prey (3) Seminar—2 hours. Prerequisite: graduate standing. Presentation and analysis of research papers on social and foraging behavior of predatory animals, antipredator strategies of prey species, co-evolution of predators and prey, and ecology of predator prey interactions. May be repeated twice for credit. (Same course as Animal Behavior 294.) Offered in alternate years. —II. Caro

295. Seminar in Wildlife Ecotoxicology (3) Seminar—2 hours; term paper. Prerequisite: gradu-

Women and Gender Studies

[College of Letters and Science] Maxine Craig, Ph.D., Program Director

Program Office. 1101 Hart Hall 530-752-6429; http://wms.ucdavis.edu/

Committee in Charge

Elizabeth Constable, Ph.D. (Women and Gender Studies)
Maxine Craig, Ph.D. (Women and Gender Studies)
Wendy Ho, Ph.D. (Asian American Studies, Women and Gender Studies)
Suad Joseph, Ph.D. (Anthropology, Women and Gender Studies)
Susan Kaiser, Ph.D. (Textiles and Clothing, Women and Gender Studies)
Anna K. Kuhn, Ph.D., Emerita (Women and Gender Studies)
Amina Mama, Ph.D. (Women and Gender Studies)
Kimberly D. Netles-Barcelón, Ph.D. (Women and Gender Studies)

Faculty

Elizabeth Constable, Ph.D., Associate Professor (Women and Gender Studies)
Maxine Craig, Ph.D., Associate Professor (Women and Gender Studies)
Women's Studies is an interdisciplinary major founded on the principle that the social production of gender is inseparable from that of race, sexuality, class, national identity and other categories of difference. Our curriculum places feminist concerns within a comparative context, while respecting the need for geographic and historical specificity. These frameworks inform our teaching, our research, our institutional and community practices, and the way we bring to our classroom. Women and Gender Studies offers a wide range of courses that use the lens of gender to examine colonialism and post-colonialism, globalization, history, sexuality, queer theory, literature, popular culture, feminist video production, area studies, film, fashion and food. The Women and Gender Studies Program offers both an undergraduate major and minor. We also work collaboratively with other units on campus to sponsor two undergraduate minors, Sexuality Studies and Social and Ethnic Relations, and an undergraduate concentration in transnational production and consumption.

The Program. One of the most exciting and challenging aspects of the Women and Gender Studies Program is that students, in consultation with the peer and faculty advisers, can pursue their particular academic interests as they design their course of study accordingly. In devising their major plan, students will draw on courses offered in African American and African Studies, American Studies, Anthropology, Asian American Studies, Chicano/o Studies, Comparative Literature, English, French, German and Italian Studies, History, Linguistics, Native American Studies, Political Science, Psychology, Sociology, Spanish, Textile and Clothing, and other related disciplines.

In addition to offering a broad array of courses that deal with gender, class, race, ethnicity, and sexuality, the Women and Gender Studies Program affords interested students the opportunity to earn internship credit and conduct independent research as well as take advantage of the Honors Thesis option. Students design a program of study in consultation with an adviser that is in accordance with their individual career goals. Many Women and Gender Studies majors find it advantageous to pursue a double major, or to minor in another field of study. Upon successful completion of the degree requirements, students majoring in the program will graduate with a Bachelor of Arts Women’s Studies.

Career Alternatives. A degree in Women’s Studies opens many possibilities for future employment. The major introduces students to relevant social issues, fosters critical thinking, and encourages social advocacy.

Pre-professional students will discover that a major in Women’s Studies offers useful preparatory training for medical or law school. It is particularly suitable for those interested in specializing in social policy, international development, social justice or gender-related work in a wide range of institutions and contexts. Students who plan to do practical work in counseling, clinical psychology, social services, education, media criticism, and also find Women’s Studies provides a strong foundation. Those who wish to pursue graduate level research in such fields as anthropology, comparative literature, cultural studies, economics, education, ethnic studies, English, film studies, history, languages and literatures, performance studies, philosophy, political science, and sociology will also benefit from a strong undergraduate background in critical theory, social analysis, history, feminist social theory, and a sound understanding of cultural representation and narratives of difference.

Increasingly, media and cultural institutions, corporations, and personnel firms are hiring specialists in women and gender studies trained in understanding the complex cultural shifts and demands arising from diverse communities. State and federal agencies need people who have special understanding of the problems that diverse groups of women face in society, institutions, and corporations. Educational institutions across the spectrum need specialists to develop and administers women and gender studies programs, multi-cultural community centers and other organizations designed specifically to deal with gender, social diversity and inequality, and a growing range of old and new social challenges arising in the context of globalization.

Some of our alumni have developed careers other than those described above. Talking to your Women and Gender Studies faculty and peer advisor can give you even more ideas about possible future careers. Doing internships related to your course work allows you to test your skills in a hands-on practice and service in the community.

Women’s Studies

A.B. Major Requirements:

Preparatory Subject Matter............... 20
Two courses from: Women’s Studies 20, 50, 60, 70, 71, 72, 74, 76, 78, 80, 82, 84, 86, 88, 90, 92, 94, 96, 98, 100, 102, 104, 106, 108, 110, 112, 114, 116, 118, 120, 122, 124, 126, 128, 130, 132, 134, 136

Depth Subject Matter............... 44
Women’s Studies 103, 104, 190 and one additional upper division Women’s Studies course .................................................. 16
Cross-Cultural Requirement............... 16
Choose four courses (at least one from each category). Courses in this requirement may not duplicate those used to meet other Women’s Studies major requirements. The list that follows represents a partial list of options; other courses may be included with the consent of the Women’s Studies Adviser.

Gender-based courses .................. 12

Choose one of two tracks: Disciplinary or Thematic. Courses used to meet this requirement may not duplicate those used to meet other Women’s Studies major requirements.

Disciplinary track

Choose three courses from one of the following focus groups:

Anthropology: Anthropology 129, 130, 131, 134, 139, 148B, 158, Women’s Studies 102, 182, 184

Italian 141, Native American Studies 180.

Literature and Language focus: Comparative Literature 135, 138, 159, English 185A, 185B, French 133, German 129, Italian 141, Linguistics 163, Russian 142, Women’s Studies 129.

Sociology and Psychology focus:

Thematic track

In consultation with a Women’s Studies adviser, choose three courses that form a thematic cluster (for example, women and Race in the United States; The Cultural Representations of Gender; Gender and Public Policy; Gender and Global Issues; Gender and Anti-Semitism; Gender and Autobiography; Gender, Theory and Representation; Sexualities; and Gender Science). Other clusters may be developed in consultation with a Women’s Studies adviser.

Total units for the major .................. 64

Major Adviser. All Women’s Studies majors and minors must consult with a faculty adviser, individually, at least once each academic year.

Minor Program Requirements:

Women’s Studies

Women’s Studies 20, 50, 60, 70 or 80 ... 4

Choose one from: African American and African Studies 123, Anthropology 139, Asian American Studies 112, Chicano/o Studies, 111, 122, 131, Native American Studies 114, Sociology 134, 172, Women’s Studies 160, 180 ...

Choose one from: Anthropology 148B, Comparative Literature 135, 138, 159, English 185A, 185B, German 102G, 102H, 148A, 148B, Women’s Studies 102, 182, 184 ...

Additional Electives from approved list of upper division cross-listed and Women’s Studies courses ...

Note: With prior consultation with an adviser, other upper division courses may be accepted toward the minor program. Under no circumstances may more than one lower division course be offered in satisfaction of requirements for the minor.

Minor Adviser. All Women’s Studies majors and minors must consult with a faculty adviser, individually, at least once each academic year.

Graduate Study. The Women and Gender Studies Program offers a designated emphasis in Feminist Theory and Research for students enrolled in the Ph.D. programs of twelve other affiliated departments.

Courses in Women’s Studies (WMS)
Lecture/discussion—4 hours; term paper. Prerequisite: course 50 or consent of instructor. Class size limited to 60 students. Critical introduction on the history of Western science, scientific institutions and the changing role of science in relation to inequalities of class, race, gender, and global struggles for freedom and justice. Offered irregularly. GE credit: ArtHum or SocSci, Div | AH or SS, DD, WC, WE.—III. (III.) Craig, Kaiser, Mama

158. Contemporary Masculinities (4)
Lecture/discussion—4 hours. Prerequisite: one course specified for the Women’s Studies major. A multicultural study of contemporary trends in masculinity and the economic, social and political forces that have shaped them. Topics may include men’s movements, ethnic nationalism, masculinities, representations of masculinity and images of masculinity in popular culture. GE credit: ArtHum or SocSci, Div | ACGH, AH or SS, DD, WE.—III. (III.) Craig, Ho, Mama

160. Women, ‘Race’ and Sexuality in Postcolonial Cinema (4)
Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: course 20 or 50. Class size limited to 90 students. Feminist analysis of race, sexuality and class in the representations of women in commercial and/or independent films. Offered in alternate years. GE credit: ArtHum, Div | Wrt, AH, VL, WC, WE.—III. (III.) Kaiser, Mama

162. Feminist Film Theory and Criticism (4)
Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: one course from the Women’s Studies major and Humanities 10 or consent of instructor. Historical overview of and contemporary issues in feminist film theory, including representation, spectatorship, and cultural production. Film stars, women filmmakers, and the intersections of gender, race, sexuality, and class in films and their audiences. Offered in alternate years. GE credit: ArtHum, Div | ACGH, AH, DD, VL, WC, WE.—III. Constable

164. Topics in Gender and Cinematic Representation (4)
Lecture/discussion—3 hours; laboratory—3 hours; fieldwork—6 hours. Prerequisite: one course from the Women’s Studies major and Humanities 10 or consent of instructor. Examination of a specific topic within the broad rubric of gender and cinema. Possible topics include Latinas in Hollywood; gender, nation, cinema; and gender and film genre. Topics vary. May be repeated two times for credit when topic differs. Offered in alternate years. GE credit: ArtHum, Div | AH, VL, WC, WE.—III. Kaiser

165. Feminist Media Production (6)
Lecture/discussion—3 hours; laboratory—3 hours; fieldwork—6 hours. Prerequisite: one course in Women and Gender Studies or consent of instructor. Basic media production and community service. Video, audio and photography instruction; feminist community documentary; video ethnography; video journals, alternative representations of fashion and women’s bodies. Fundamentals of camera and microphone operation, interviewing techniques, and editing. May be repeated two times for credit when topic differs. Offered irregularly. GE credit: ArtHum or SocSci, Div | ACGH, AH or SS, DD, VL.—III. (III.) Kaiser

170. Queer Studies (4)
Lecture/discussion—4 hours. Prerequisite: course 20, or 50, or 70, or consent of instructor. Study of queer sexualities, identities, and cultures. Alternative sexualities as historical, social, and cultural constructions in intersections with race, gender, class, nationality. Interdisciplinary exploration of sexual orientation and the regulation of sexuality through history, theory and expressive cultural forms. Offered irregularly. GE credit: ArtHum or SocSci, Div | Wrt | ACGH, AH or SS, DD, WE.—Constable

175. Gender and Exceptional Race (4)
Lecture/discussion—4 hours. Prerequisite: course 50, 60, or consent of the instructor. Exploration of the co-construction of “race” and gender in comparative national historical contexts and contemporary lived experience. Study of intersections of race and identity politics, and the social construction of women’s experience. GE credit: ArtHum or SocSci, Div | ACGH, AH or SS, DD, WC, WE.—III. (III.) Craig, Mama

104. Feminist Approaches to Inquiry (4)
Lecture/discussion—4 hours. Prerequisite: one course specified for the Women’s Studies major. Feminist applications and transformations of traditional disciplinary issues and methodologies in feminist interdisciplinary work. GE credit: ArtHum or SocSci | ACGH, AH or SS, DD, WE.—II. (II.) Nettles-Barcelón

137. Feminist Interpretations of Contemporary Western Thought (4)
Lecture/discussion—4 hours. Prerequisite: one course in Women’s Studies, or consent of instructor. Introduction to deciphering, demystifying, and interpreting poststructuralist, postmodern, and postcolonial thought from a feminist perspective: applications to gender, race, sexuality, and class. Offered irregularly. GE credit: ArtHum or SocSci, Div | Wrt | ACGH, AH or SS, DD, WE.—Constable

130. Feminism and the Politics of Family Change (4)
Lecture/discussion—4 hours. Prerequisite: any Women’s Studies course or Sociology 131 or 132. Examination of contemporary conflicts over family values and the changing family from a feminist perspective. Offered in alternate years. GE credit: ArtHum or SocSci, Div | ACGH, AH or SS, DD, WE.—II. (II.)

136. Topics in Gender, Production, Consumption (4)
Lecture/discussion—3 hours; term paper. Construction of gender through production and consumption of goods and services. Transnational movement of peoples and goods and services. GE credit: ArtHum or SocSci, Div | ACGH, AH or SS, DD, WE.—II. (II.) Nicole

90X. Lower Division Seminar (2)
Seminar—2 hours. Examination of a special topic in Women’s Studies through shared readings, discussions, and written assignments. Offered in alternate years.—Constable, Kaiser, Nettles-Barcelón

91. Research Seminar in the Transnational Production and Consumption of Fashion (1-3)
Seminar—1-2 hours. Preparation for a research conference. May be repeated for credit when topic varies.—II. (II.) Kaiser

98. Directed Group Study (1-5)
Prerequisite: consent of instructor. (P/NP grading only)—Constable, Ho, Kaiser, Nettles-Barcelón, Swain

99. Special Study for Undergraduates (1-5)
Prerequisite: consent of instructor. (P/NP grading only)—Constable, Craig, Ho, Joseph, Kaiser, Nettles-Barcelón, Swain

102. Gender and Post Colonialism (4)
Lecture/discussion—4 hours; term paper. Prerequisite: course 50, 60. Explores changing configurations of race, gender, sexuality, class and implications for governmentality in one or more colonial or postcolonial regimes in one or more societies. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, DD, WC, WE.—I. Mama

103. Introduction to Feminist Theory (4)
Lecture/discussion—4 hours. Prerequisite: one course specified for the Women’s Studies major. Introduction to the emergence of feminist theory and to key concepts in feminist theorizing. Examination of past and current debates over sexuality, race,

148. Science, Gender, and Social Justice (4)
Lecture/discussion—4 hours, term paper. Prerequisite: course 50 or consent of instructor. Course limited to 60 students. Critical reading and discussion on the history of Western science, scientific institutions and the changing role of science in relation to inequalities of class, race, gender, and global struggles for freedom and justice. Offered irregularly. GE credit: ArtHum or SocSci, Div | AH or SS, DD, WC, WE.—III. (III.) Craig, Kaiser, Mama

25. Gender and Global Cinema (4)
Lecture—3 hours; film viewing—3 hours. The role gender plays in film history/culture in various geographical contexts and in aspects of contemporary globalization. Films from nations such as China, Columbia, India, Iran, Korea, New Zealand, and the U.S. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.—II. (II.) Constable

549

Women and Gender Studies

Quarter Offered: I-Fall, II-Winter, III-Spring, IV-Summer; 2015-2016 offering in parentheses: Pre-Fall 2011 General Education (GE): ArtHum—Arts and Humanities; SciEng—Science and Engineering; SocSci—Social Sciences; ACGH—American Cultures, DD—Domestic Diversity; OL—Oral Skills; QL—Quantitative; SL—Scientific; VL—Visual; WC—World Cultures; WE—Writing Experience

Fall 2011 and on Revised General Education (GE): AH—Arts and Humanities; SE—Science and Engineering; SS—Social Sciences; ACGH—American Cultures; DD—Domestic Diversity; OL—Oral Skills; QL—Quantitative; SL—Scientific; VL—Visual; WC—World Cultures; WE—Writing Experience

Lecture and discussion—4 hours. In-depth examination of movements for sexual liberation and the regulation of the body. GE credit: ArtHum or SocSci, Div | ACGH, AH or SS, DD, WE.—I. (I.) Constable

Prerequisite: consent of instructor. Critical introduction to major traditions of social thinking in the West from a feminist perspective. Offered irregularly. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE.—Craig

Theory and History of Sexualities (4)
Lecture/discussion—4 hours. Key issues in the social construction of the subject. May be repeated for credit when topic differs. Limited enrollment.—Constable, Ho, Kaiser, Nettles-Barcelón

90X. Lower Division Seminar (2)
Seminar—2 hours. Examination of a special topic in Women’s Studies through shared readings, discussions, and written assignments. Offered in alternate years.—Constable, Kaiser, Nettles-Barcelón

91. Research Seminar in the Transnational Production and Consumption of Fashion (1-3)
Seminar—1-2 hours. Preparation for a research conference. May be repeated for credit when topic varies.—II. (II.) Kaiser

98. Directed Group Study (1-5)
Prerequisite: consent of instructor. (P/NP grading only)—Constable, Ho, Kaiser, Nettles-Barcelón, Swain

99. Special Study for Undergraduates (1-5)
Prerequisite: consent of instructor. (P/NP grading only)—Constable, Craig, Ho, Joseph, Kaiser, Nettles-Barcelón, Swain

Upper Division

102. Gender and Post Colonialism (4)
Lecture/discussion—4 hours; term paper. Prerequisite: course 50, 60. Explores changing configurations of race, gender, sexuality, class and implications for governmentality in one or more colonial or postcolonial regimes in one or more societies. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, DD, WC, WE.—I. Mama

103. Introduction to Feminist Theory (4)
Lecture/discussion—4 hours. Prerequisite: one course specified for the Women’s Studies major. Introduction to the emergence of feminist theory and to key concepts in feminist theorizing. Examination of past and current debates over sexuality, race,
gender in identities and how institutions, labor migration, social movements and consumption shape racialized gendered identities. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE. — III. (III.) Ho, Nettles

178A-G. Women Writers and the Transnational Imaginary (4)
Lecture/discussion—4 hours. Prerequisite: one course in Women’s Studies, or consent of instructor. Writings by women from diverse regions and cultures, understood in their cultural, socioeconomic, and historical contexts, with each course offering a focus on women’s writing in specific geographic/national locations and their diasporas: (A) The Arab World; (B) Asia; (C) The Caribbean; (D) Africa; (E) Diasporic Women Writers in Europe. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, WC, WE. — Constable, Ho, Mama, Nettles-Barcelón

178F. Transnationalism and Writing by Women of Color (4)
Lecture/discussion—4 hours. Prerequisite: one course in Women’s Studies, or consent of instructor. Writings by women of color in a transnational framework, understood in their cultural, socioeconomic, and historical contexts. The intersection among gender, writing, nationalism, and transnationalism, with focus on women’s writing in specific geographic/national locations and their diasporas: (F) Topics on Women’s Writings of Coloniality. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, WC, WE. — Constable, Ho, Nettles-Barcelón

179. Gender and Literature (4)
Lecture/discussion—4 hours. Prerequisite: one course in Women’s Studies, or consent of instructor. Role of literature, especially novels, in constructing, challenging, and transforming normative genders in society. Transhistorical and transnational focus on gender in its intersections with race, class, sexuality, and politics. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, WC, WE. — Constable, Ho

180. Women of Color Writing in the United States (4)
Lecture/discussion—4 hours. Prerequisite: course 20 or 50. Literature, especially novels, written by contemporary women of color in the United States, understood in their socioeconomic, cultural and historical contexts. GE credit: ArtHum, Div | ACGH, AH, DD, WE. — II. (II.) Ho, Mama

182. Globalization, Gender and Culture (4)
Lecture/discussion—4 hours. Prerequisite: course 50; consent of instructor. Critical gender analysis of globalization in the process of interconnected cultural, social and economic transformations affected by gender, nation, class and race/ethnicity. Critical self-reflection and social observation skills. Offered in alternate years: ArtHum or SocSci, Div, Wrt | AH or SS, OL, WC, WE. — III. Mama

184. Gender in the Arab World (4)
Lecture/discussion—4 hours. Prerequisite: course 50. Examination of the history, culture, and social/political dynamics of gender relations and gendering in the Arab world. GE credit: SocSci, Div, Wrt | SS, WC, WE. — II. (II.)

185. Women and Islamic Discourses (4)
Lecture/discussion—4 hours. Prerequisite: course 50 or comparable course. Introduction to the debates/discourses about women and Islam. Transformations in debates/discourses in colonial and postcolonial periods in the Middle East & South Asia. Comparative study of debates/discourses on family, work, low, sexuality, religion, comportment, human rights, feminist and religious movements. Offered irregularly. (Same course as Middle East/South Asia Studies 150.) GE credit: ArtHum or SocSci | AH or SS, WC.

187. Gender and Social Policy (4)
Lecture/discussion—3 hours; term paper. Prerequisite: upper division standing and a course in Women’s Studies in the creation of social policies, especially with respect to issues brought into the policy arena by contemporary feminism. Offered in alternate years. GE credit: SocSci, Div | ACGH, DD, SS, WE. — III. (III.) Craig, Nettles-Barcelón

189. Special Topics in Critical Gender Studies (4)
Lecture/discussion—4 hours. Prerequisite: one course specified for the Women’s Studies major. In-depth examination of a woman’s studies topic related to the research interests of the instructor. May be repeated one time for credit when topic differs. Offered irregularly. GE credit: ArtHum or SocSci | AH or SS, WE. — I.

190. Senior Seminar (4)
Seminar—4 hours. Prerequisite: senior standing in Women’s Studies. Capstone course for senior Women’s Studies majors. Supervised internship and study in positions/institutional settings dealing with gender-related problems or issues, as for example, a women’s center, affirmative action office, advertising agency, or social welfare agency. Final written report on internship experience. (P/NP grading only.)—Constable, Craig, Ho, Kaiser, Nettles-Barcelón, Swain

191. Capstone Seminar: Women’s Studies (4-12)
Seminar—4 hours. Prerequisite: course 104 or Textiles and Clothing 107, and course 194A, course 199, or Textiles and Clothing 199, or consent of instructor. Revision, consolidation, and preparation of senior research or creative project. Creating a multipage Med web site for publishing research and creative projects. GE credit: ArtHum or SocSci, Wrt | ACGH, AH or SS, DD, WE. — III. (III.) Kaiser

192. Internship in Women’s Studies (1-12)
Internship—3-36 hours; written report. Prerequisite: completion of a minimum of 84 units and consent of instructor; enrollment dependent on availability of intern positions with priority to Women’s Studies majors. Supervised internship and study in positions/institutional settings dealing with gender-related problems or issues, as for example, a women’s center, affirmative action office, advertising agency, or social welfare agency. Final written report on internship experience. (P/NP grading only.)—Constable, Craig, Ho, Kaiser, Nettles-Barcelón, Swain

193. Feminist Leadership Seminar (2)
Seminar—2 hours. Prerequisite: course 50, 192. Use feminist methods to critically reflect on the ethical, methodological and strategic aspects of an organization, project, campaign, movement or other social change initiative. May be repeated for credit. Offered irregularly. (P/NP grading only.) GE credit: ArtHum or SocSci | ACGH, AH or SS, DD, WE. — II. (II.)

194HA-194HB. Senior Honors Project in Women’s Studies (4-6)
Independent study—12 hours. Prerequisite: senior standing, Women’s Studies major, and advisor’s approval. In consultation with an advisor, students complete a major research paper or significant creative project on a Women’s Studies topic. (Deferred grading only, pending completion of sequence.) GE credit: ArtHum or SocSci | AH or SS, WE. — Constable, Craig, Ho, Joseph, Kaiser, Mama, Nettles-Barcelón

195. Thematic Seminar in Critical Gender and Women’s Studies (4)
Seminar—4 hours. Prerequisite: course 50, 60. Limited enrollment. Group study of a topic, issue or area in feminist theory and research involving intensive reading and writing. May be repeated for credit. Offered irregularly. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE.

197. Tutoring in Women’s Studies (1-4)
Tutoring—3-12 hours. Prerequisite: upper division standing and consent of director. Leading small, voluntary discussion groups affiliated with a Women’s Studies course. May be repeated for credit for a total of 8 units. (P/NP grading only.)

198. Directed Group Study (1-5)
Prerequisite: upper division standing; consent of instructor. (P/NP grading only.)—Constable, Joseph, Kaiser, Kaplan, Kuhn, Mena, Nettles-Barcelón, Swain

199. Special Study for Advanced Undergraduates (1-5)
Prerequisite: upper division standing; consent of instructor. (P/NP grading only.)—Constable, Joseph, Kaiser, Kaplan, Kuhn, Mena, Nettles-Barcelón, Swain

Graduate
200A. Current Issues in Feminist Theory (4)
Seminar—4 hours. Current issues in feminist theory; techniques employed to build feminist theory in various fields. — I. (I.) Ho

200B. Problems in Feminist Research (4)
Seminar—4 hours. Prerequisite: course 200A with a grade of B+ or better. Application of feminist theoretical perspectives to interdisciplinary investigation of a problem or question chosen by the instructor(s). May be repeated for credit when subject area differs. — II. (II.) Mama

201. Special Topics in Feminist Theory and Research (4)
Lecture/discussion—4 hours. Explores in depth a topic in feminist theory and research related to the research interests of the instructor. May be repeated for credit when topic differs. Limited enrollment.— (III.) Constable, Craig, Ho, Kaiser, Mama, Nettles-Barcelón, Swain

250. Cultural Study of Masculinities (4)
Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Interdisciplinary approaches to understanding the social and cultural construction of masculinities; attention to the effects of biology, gender, race, class, sexual and national identities; criticism of oral, printed, visual, and mass mediated texts, and of social relations and structures. (Same course as American Studies 250.)—Craig, Ho

299. Special Study for Graduate Students (1-12)
(S/U grading only.) — Constable, Craig, Ho, Joseph, Kaiser, Nettles-Barcelón, Swain

299D. Dissertation Research and Writing (4)
Prerequisite: courses 200A and 200B; fulfillment of course requirements for the DE in Feminist Theory and Research, advancement to candidacy. (S/U grading only.)—Constable, Ho, Joseph, Kaiser, Kaplan, Kuhn, Mena, Nettles-Barcelón, Swain

Professional
396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III, (II, III.) Constable, Craig, Ho, Joseph, Kaiser, Mena, Nettles-Barcelón, Swain

* This course may not be used to satisfy a college or university composition requirement and GE writing experience simultaneously.

† Also assigned to another area of topical breadth.

# Credit for writing experience allowed if co-course taken concurrently (see writing experience list).
### FORMER GENERAL EDUCATION COURSES; PRE-FALL 2011

The following section pertains to students who matriculated to UC Davis prior to Fall 2011. Students who matriculated for the first time in Fall 2011 or later should refer to the New General Education Courses; Fall 2011 and On, on page 352.

For the most up-to-date General Education courses, use the class search tool at [http://classes.ucdavis.edu/](http://classes.ucdavis.edu/).

#### TOPICAL BREATH

These courses provide GE credit for topical breadth. Many of these courses also satisfy the GE requirement for social-cultural diversity (indicated by D) and/or provide GE credit for writing experience (indicated by W). Complete lists of the courses that satisfy the social-cultural diversity requirement and the courses that provide writing experience credit follow this list.

*This course may not be used to satisfy a college or university composition requirement and GE writing experience simultaneously.
† Also assigned to another area of topical breadth.
# Credit for writing experience allowed if co-course taken concurrently (see writing experience list).
SOCIAL-CULTURAL DIVERSITY

These courses satisfy the GE requirement for social-cultural diversity. Many of these courses also provide GE credit for topical breadth or writing experience. Refer to the topical breadth and writing experience course lists to determine if any additional GE credit applies.

* This course may not be used to satisfy a college or university composition requirement and GE writing experience simultaneously.  
† Credit for writing experience allowed if co-course taken concurrently [see writing experience list].
These courses satisfy the GE requirement for writing experience. Many of these courses also provide GE credit for topical breadth or social-cultural diversity. Refer to the topical breadth and social-cultural diversity course lists to determine if any additional GE credit applies.

**WRITING EXPERIENCE**

This course may not be used to satisfy a college or university composition requirement and GE writing experience simultaneously.

GENERAL EDUCATION THEME OPTIONS

The following section only pertains to students who matriculated to UC Davis prior to Fall 2011.

General Education theme options are sets of GE courses sharing a common intellectual theme. These GE theme options are not a separate element of the GE requirement, but a way of selecting your GE courses so that you may benefit from a coherent focus of study while completing the GE requirement. Completion of a theme satisfies the GE requirement for students with majors assigned to the GE topical breadth area of Arts and Humanities. Students with majors assigned to the topical breadth area of either Science and Engineering or Social Science will need to complete additional GE courses in Arts and Humanities to satisfy the campus GE requirement.

Global Population and Environmental Issues

For centuries, there have been concerns and predictions about population growth and its potential effects on the environment and the quality of life. Perspectives on population and environmental issues often vary based on such factors as gender, social class, culture, nation, race/ethnicity, and religion. In this group of courses, students will learn about the complex interplay among environmental, economic, and ethical issues through the study of global population patterns. They will learn how science addresses the use of natural resources by humans, along with the fundamentals of environmental impacts such as global warming. This option group of courses explores diverse perspectives on global population and environmental issues by examining biological, physical, and social processes that influence the everyday lives of people around the world.

Topics might include the social, economic, and environmental challenges of population growth; and the ethics and dilemmas of natural resource use.

Biodiversity and Cultural Diversity

The nations with the greatest biodiversity often have tremendous ethnic and cultural diversity. This option examines diversity in many interrelated contexts: biological diversity and the impact of contemporary humans; values and cultural practices in regard to production and consumption; the clothes people wear; creation and use of social spaces; and the preservation of genetic resources for food, fiber, and pharmaceuticals.

Topics might include conservation biology; integration of human and natural systems; cultural expression through clothing and appearance; and discussion of what are cultural and social rights.

Food and Fiber

This option focuses on food and fiber systems, from their plant, animal, or synthetic sources to their ultimate use by humans for health, safety, communication, and pleasure. Understanding these systems enables students to see the connections between the food and clothes that are part of our everyday lives and the scientific, social, and cultural issues that make them so significant to society as a whole.

Topics might include food and clothing safety, quality, and availability; media and consumer perceptions; and cultural histories, values, and meanings.

Changing Agriculture

Changing demographics, environmental issues, and social-political trends in California all play a role in public perceptions and policies related to our food and fiber systems, natural resources, and community values. These perceptions, policies, and values need to be critically examined in the context of larger global economic trends and environmental health and safety. In this group of courses, students can explore a range of challenging issues related to the complex interplay between rural and urban needs and values.

Topics might include holistic approaches to agriculture; international migration and agricultural development; and how plants and animals influence the course of history.

RESIDENCE FOR TUITION INFORMATION

Policy Governing Residence

The determination of residence for tuition purposes at the University of California is governed by the UC Residence Policy and Guidelines. Under the UC Residency Policy, adult citizens and certain classes of aliens can establish residence for tuition purposes. There are particular rules that apply to the residence classification of minors and that establish exemptions. The UC Residence Policy establishes the Residence Determination Date for each term as the day instruction begins at the last of the University of California campuses to open for the quarter, and for schools on the semester system, the day instruction begins for the semester. All of the UC requirements for residency must be met prior to the Residence Determination Date for classification as a resident. Documentary evidence may be required and all relevant indications will be considered in determining residence classifications.

You are cautioned that this summary is not a complete explanation of the regulations regarding residence. Please note that changes may be made in the residence requirements between the publication of this statement and the relevant residence determination date.

Office of the General Counsel

Requirements for Resident Classification, Rules Applying to Minors and Exemptions from Nonresident Supplemental Tuition can be found published as the “UC Residency Policy and Guidelines” available at Office of the General Counsel website under Educational Affairs and Campus Services.

Read the full text of UC Residency Policy-Residency Guidelines for Purposes of Tuition and Fees at http://www.ucop.edu/general-counsel/.

Nonresident Supplemental Tuition Fee for Nonresident Students

If you have not met all of the UC requirements for residency prior to the Residence Determination Date each term in which you propose to attend the University, you must pay Nonresident Supplemental Tuition in addition to all other fees.

Resident Determination Process

California residence for tuition purposes is determined for each student under the UC Residence Policy and Guidelines based on information provided to a campus Residence Deputy on the Statement of Legal Residence. Additional information and documentation in support of your claim of resident status for tuition purposes may be requested as needed. Applicants and students are responsible for submitting ALL RELEVANT DOCUMENTATION AND INFORMATION to the campus Residence Deputy in support of their in-state residency request. Information or documents requested but not made available to the Residence Deputy will NOT be considered or reviewed on appeal.

Incorrect Classification

If you were incorrectly classified as a resident, you are subject to reclassification and to payment of all Nonresident Supplemental Tuition not paid. If you concealed information or furnished false information and were classified incorrectly as a result, you are also subject to University discipline. Resident students who become nonresidents must immediately notify the campus Residence Deputy.

Appeals

Any student, following a final decision on their residence classification by the Residence Deputy may apply for an appeal with the Office of the General Counsel within 30 days of notification of the Residence Deputy's final decision.

All inquiries regarding the appeal process should be addressed to the Office of the General Counsel at Residency.Appeal@ucop.edu.

Petitions for Classification to Resident Status

Nonresident students may apply for a change of classification to resident status once all the requirements have been met. Petitions for Classification to Resident Status from continuing UC Davis students classified as nonresident for tuition purposes in a prior quarter must be filed during the filing period and no later than the published deadline for the term they wish to classify as a Resident. Deadline exceptions will only be made in the cases of a documented medical illness, death in the immediate family, or an administrative error on the part of the university. Petition supporting documents will not be accepted after the 10th day of instruction unless an extension has been granted by a Residence Deputy.

Inquiries

Inquiries regarding residence requirements, determination, classification and recognized exceptions should be directed to Residence Deputy, Office of the University Registrar, One Shields Avenue, Davis, California 95616 or residedeputy@ucdavis.edu.

Inquiries regarding the UC Residence Policy and Guidelines or appeals, should be directed to Office of the General Counsel at Residency.Appeal@ucop.edu.

RESIDENCE DEPUTIES ARE THE ONLY AUTHORIZED UNIVERSITY PERSONNEL TO PROVIDE INFORMATION REGARDING RESIDENCE REQUIREMENTS.
UNIVERSITY POLICY ON NONDISCRIMINATION, SEXUAL HARASSMENT/SEXUAL ASSAULT, DISABILITY ACCOMMODATIONS, STUDENT RECORDS AND PRIVACY

Nondiscrimination. The University of California, in accordance with applicable Federal and State law and University policy, does not discriminate on the basis of race, color, national origin, religion, sex, gender identity, pregnancy (including pregnancy, childbirth, and medical conditions related to pregnancy or childbirth), physical or mental disability, age, medical condition (cancer-related or genetic characteristics), ancestry, marital status, citizenship, sexual orientation, or service in the uniformed services (includes membership, application for membership, performance of service, application for service, or obligation for service in the uniformed services) status as a Vietnam-era veteran or special disabled veteran. The University also prohibits sexual harassment, including sexual assault. This nondiscrimination policy covers admission, access, and treatment in University programs and activities.

Discrimination, Harassment, or Arbitrary Treatment. If students have questions about student-related nondiscrimination policies or concerns about possible discrimination, harassment, or arbitrary treatment, they may contact Student Judicial Affairs for information and assistance 530-752-1128. Additional resources for students include the UC Davis Chief Compliance Officer (ADA and Title IX Officer) 530-752-9466 or the dean's office for their college. Graduate students may also contact the Office of Graduate Studies 530-752-0650 or the Graduate Students Association 530-752-6108. Students are encouraged to seek assistance as soon as possible, as time limits may apply to grievance processes.

Campus policies provide for a prompt and effective response to student complaints. This response may include early resolution procedures or, as appropriate, an administrative review or investigation. The student will be informed of the results of the review.

Sexual Harassment/Sexual Assault. Sexual harassment and sexual assault are prohibited by law and by university policy and will not be condoned. Campus policy (PPM Section 380-12 at http://manuals.ucdavis.edu/ppm/380/380-12.pdf) describes campus procedures for responding to reports of sexual harassment and sexual assault. Under this policy, sexual assault is considered an extreme form of sexual harassment. UC Davis' response to reports of sexual harassment and sexual assault may include interim actions, early resolution, and formal investigation procedures. If a complaint of sexual harassment or sexual assault is substantiated, the campus will take appropriate remedial action, including discipline. The Harassment and Discrimination Assistance and Prevention Program 530-752-9255 works with students to resolve complaints of sexual harassment, including sexual assault; and provides referrals to other campus resources. Students may report sexual harassment to deans, supervisors, managers, the Campus Sexual Harassment Officer and other campus officials, including Student Judicial Affairs, Student Housing, and the Chief Compliance Officer (Title IX Officer). With the exception of certain confidential resources, University officials receiving a report of sexual harassment or sexual assault must immediately consult with the Sexual Harassment Officer. Students may seek confidential advice and support from Counseling and Psychological Services 530-752-0871, the Campus Violence Prevention Program 530-752-3299, the Lesbian, Gay, Bi-Sexual, and Transgender, Queer, Intersex Asexual Resource Center 530-752-2432, and the Women's Resources and Research Center 530-752-3372. Consultation with these resources will not lead to an official report unless additional action is taken by the individual seeking advice.

Accommodations for Students with Disabilities. Students with documented disabilities may be entitled to reasonable accommodations to gain access to the University's academic programs. More information about academic accommodations can be obtained by contacting the Student Disability Center 530-752-3184 or http://sdc.ucdavis.edu. Questions or concerns about accommodations that are not related to academic programs should be directed to the UC Davis Compliance Director (ADA Officer) 530-752-9466. For complaints of alleged discrimination on the basis of disability under PPM Section 280-05, contact Student Judicial Affairs 530-752-1128 or the UC Davis Compliance Director.

Disclosures from Student Records. Students have the right to review records that relate to themselves in their capacity as students and to request corrections of records believed to be inaccurate. Most disclosures from student records to outside parties require prior consent from the student.

Under the Family Educational Rights and Privacy Act of 1974 and University and campus policies, UC Davis students have the following rights:

A. To review their own student records within 45 days after the student submits a written request for access to the University Registrar or other department in possession of the records. That office will make arrangements for access and notify the student when and where the records may be reviewed. If the records requested are in a different office, the request will be redirected and the student notified. The campus maintains several types of student records in various locations. Questions about how to obtain records should be referred to Student Judicial Affairs at 530-752-1128.

B. To request amendment of their own student records if they believe the records are inaccurate or misleading, students should submit a written request to the office that maintains the records specifying the portion of the record the student wants changed and why it is believed to be inaccurate or misleading. That office has 45 days to determine whether the record should be changed and notify the student of the decision. If a student wishes to contest this decision, the student should contact Student Judicial Affairs.

C. To restrict the disclosure of personally identifiable information contained in student records, except when law and policy permit disclosure without consent. Examples of circumstances in which the student’s consent is not required for disclosure of student records include the following:

- Disclosure of “directory” or “public” information including the student’s name; local and/or permanent address(es), email addresses and telephone number(s); dates of attendance; major field(s) of study [major, minor, concentration, specialization, and similar designations]; grade level; enrollment status [undergraduate/graduate, full time or
part time, number of enrolled course units) degrees and honors received; most recent previous educational institution attended; participation in officially recognized activities, including Intercollegiate Athletics (ICA), and the name, weight and height of participants on ICA teams.

- To prevent disclosures of telephone numbers and/or addresses, students must submit a Directory Confidential Update Form to the Office of the University Registrar. To prevent disclosure of their email address, students must follow instructions at https://computingaccounts.ucdavis.edu/, and select the Change your directory information option.

- Students may designate all information about themselves as confidential and withhold it from public disclosure by filing a request with the Office of the University Registrar in 12 Mrak Hall. If all information is designated confidential, UC Davis cannot respond to requests for verification of student status or degrees, make public any honors, or include the student's name in the commencement program without the student's specific written consent.

- Disclosure to campus officials (for example faculty, staff, student employees, or those under contract with the University) having a legitimate educational interest in the records. Legitimate educational interest means the information is relevant and necessary to a task or determination that is (a) an employment responsibility or an assigned subject matter for the inquirer and/or related to (b) the inquirer's participation in the student's education; (c) the discipline of a student; or (d) providing a service or benefit related to a student or student's family (such as health care, counseling, job placement, or financial aid).

- Disclosure of appropriate student records, including academic records, disciplinary records, and other student records, to other educational institutions in which a student seeks or intends to enroll, or is currently enrolled, so long as the disclosure is for purposes related to the student's enrollment or transfer.

Contact Student Judicial Affairs 530-752-1128 for questions about these rights and requirements. Student complaints regarding alleged violations of privacy rights should be submitted to Student Judicial Affairs.

**Social Security Numbers.** A student's Social Security number is used to verify personal identity in the UC Davis Student Records System. Students are mandated to disclose their social security number to UC Davis. In compliance with state law, Social security numbers are confidential and are not used as student identifiers.

**Release of Registration Material and Grades.** In compliance with student privacy rights under federal and state law and University policy, the Office of the University Registrar may not release a students grades, registration material, and/or identification card to anyone other than the student without specific written authorization signed by the student. The person to whom the information, material, or card is released must be designated by name and must present proof of identity. The signed authorization is kept in the “Record of Disclosures” in the student’s file.

**CAMPUS SECURITY, CRIME AWARENESS, AND ALCOHOL AND DRUG ABUSE PREVENTION**

In accordance with federal law, UC Davis annually provides students and employees with information regarding campus security, crime statistics, and alcohol and drug abuse prevention, pursuant to the Student Right to Know and Campus Security Act of 1990 and the Drug Free Schools Act of 1989. The UC Davis Police and Campus Administration make continual efforts to reduce crime on campus. A well-informed community is better served and safer.

For a copy of the complete UC Davis security and crime prevention report, including crime statistics, campus security measures and crime reporting procedures, applicants for admission or prospective employees may contact the UC Davis Campus Violence Prevention Office, located in the UC Davis Police Department, contact 530-752-3299, or mkspangler@ucdavis.edu.

**ACCREDITATION**

The University of California, Davis is accredited by the Accrediting Commission for Senior Colleges and Universities of the Western Association of Schools and Colleges (WASC), 985 Atlantic Avenue, Suite 100, Alameda, CA 94501 (510) 748-9001, an institutional accrediting body recognized by the Council for Higher Education and the U.S. Department of Education.

UC Davis is also accredited by the Accreditation Board for Engineering and Technology, Accreditation Council for Graduate Medical Education, Accreditation Review Commission on Education for the Physician Assistant (ARC-PA), American Association for Accreditation of Laboratory Animal Care, American Bar Association, American Chemical Society, American Dietetic Association, American Psychological Association, American Society of Crime Lab Directors Laboratory Accreditation Board (ASCLD/LAB); American Society of Landscape Architects, Association of American Law Schools, Association of American Medical Colleges, Association to Advance Collegiate Schools of Business; Commission on Collegiate Nursing Education; Commission on Teacher Credentialing, Computer Science Accreditation Commission, Council on Education and Public Health, the Council on Education of the American Veterinary Medical Association, Intersocietal Commission for the Accreditation of Vascular Laboratories (ICAVL), and the Liaison Committee on Medical Education.

Students interested in reviewing WASC accreditation documents may do so at http://wasc.ucdavis.edu. Those interested in reviewing profession-specific accreditation documents should contact the relevant Dean's office.
THE BOARD OF REGENTS

Governance of the University of California is entrusted to a corporation called the Board of Regents. Of the individuals composing the board, eighteen are California citizens appointed by the governor, and seven, including the president of the University and the governor of California, serve ex officio. A Student Regent is selected each year from a list of names submitted to the board by the Student Body Presidents’ Council.

The Regents delegate authority in academic matters to the Academic Senate of the faculty, which determines academic policy and supervises the instructional activities of the entire University. All of the permanent faculty, as well as key administrators, are members of the Senate.

The Regents delegate authority for the organization of the University to the president. Janet Napolitano is President and head of the Universitywide administration. Authority for the administration of each campus is delegated to a chancellor.

THE REGENTS OF THE UNIVERSITY OF CALIFORNIA

Regents Ex Officio

Jerry Brown
Governor of California and President of the Regents

Gavin Newsom
Lieutenant Governor of California

John A. Pérez
Speaker of the Assembly

Tom Torlakson
State Superintendent of Public Instruction

Janet Napolitano
President of the University

Ken Feingold
President of the Alumni Associations of the University of California

Van Schultz
Vice President of the Alumni Associations of the University of California

Tracy Ligtenberg, Assistant Dean—Division of Mathematical and Physical Sciences
George R. Mangun, Ph.D., Dean—Division of Social Sciences
Steven Roth, M.B.A., M.A., Assistant Dean—Division of Social Sciences
James S. McClain, Ph.D., Associate Dean—Undergraduate Education
Maureen Miller, Assistant Dean—College Relations and Development

School of Education
Harold G. Levine, Ph.D., Dean
Paul E. Heckman, Ph.D., Associate Dean
Damian Chapman, MBA, Assistant Dean—Finance, Administration and Strategy Development
Vacant, Executive Director, Development and External Relations

Graduate School of Management
Steven C. Currall, Ph.D., Dean
Kimberly Elsbach, Ph.D., Associate Dean—Academic Affairs
Paul Griffin, Ph.D., Associate Dean—Academic Personnel
Carl Gayden, M.B.A., Assistant Dean—Business and Finance and Strategy
Judy Nagai, Ph.D., Assistant Dean—Development and External Relations
James Stevens, M.B.A., Assistant Dean—Student Affairs

Graduate Studies
Jeffery Gibling, Ph.D., Vice Provost—Graduate Education and Dean—Graduate Studies
Lenora Timm, Ph.D., Associate Dean
Chris Calvert, Ph.D., Associate Dean
Richard Shintaku, Ph.D., Assistant Dean

School of Law
Kevin Johnson, J.D., Dean
Vikram D. Amar, J.D., Associate Dean—Academic Affairs
Craig Compton, J.D., Assistant Dean—Career Services
Karen L. Charney, Senior Director of Development
Hollis L. Kulwin, J.D., Senior Assistant Dean—Student Affairs
Krysten Mercado, J.D., Assistant Dean—Admission and Financial Aid
Brett C. Burns, Senior Assistant Dean—Administration

School of Medicine
Julie Ann Freischlag, M.D., Vice Chancellor of Human Health Sciences and Dean
Fred Meyers, M.D., M.A.C.P., Vice Dean
David Acosta, M.D., Associate Vice Chancellor for Equity, Diversity and Inclusion
Thomas Nesbitt, M.D., M.P.H., Associate Vice Chancellor for Strategic Technologies and Alliances
Heather Young, Ph.D., R.N., F.A.A.N., Associate Vice Chancellor for Nursing
Aaron Bair, M.D., M.S., Associate Dean for Continuing Medical Education
Lars Berglund, M.D., Ph.D, Senior Associate Dean for Clinical Research
William Cahill, M.D., Associate Dean for Veterans Affairs
Edward Callahan, Ph.D., Associate Dean for Academic Personnel
Ralph de Vere White, M.D., Associate Dean for Cancer Center
James Goodnight, M.D., Associate Dean for Clinical Affairs and Director of Practice Management Group
Penelope Herbert, M.S., Assistant Dean of Administration
Mark Henderson, M.D., Associate Dean for Admissions and Outreach
Lee Jones, M.D., Associate Dean for Student Affairs
Jana Katz-Bell, M.P.H., Assistant Dean for Interprofessional Education
Darin Latimore, M.D., Associate Dean for Student and Resident Diversity
James Nuovo, M.D., Associate Dean for Graduate Medical Education
Andrea Seritan, M.D., Associate Dean for Student Wellness
Mark Servis, M.D., Senior Associate Dean for Curriculum and Competency Development
Frank Sousa, M.D., Assistant Dean for Admissions and Student Development
Ted Wun, M.D., Associate Dean for Research

Betty Irene Moore School of Nursing
Heather M. Young, Ph.D., R.N., F.A.A.N., Associate Vice Chancellor for Nursing & Dean
Deborah Ward, Ph.D., R.N., F.A.A.N., Associate Dean for Academics
Jill G. Joseph, M.D., Ph.D., M.P.H., Associate Dean for Research
Kara Katz-Bell, M.P.H., Assistant Dean for Interprofessional Programs
Sallie-Grace Tate, Assistant Dean for Development

School of Veterinary Medicine
Michael D. Laimore, D.V.M., Ph.D., Dean
John R. Pascoe, B.V.Sc., Ph.D., Executive Associate Dean
Jan E. Ikkwi, B.V.Sc., Ph.D., Associate Dean—Academic Programs
Terry Lehnenbauer, D.V.M., Ph.D., Associate Professor and Director—Veterinary Medicine Teaching and Research Center, Tulare
Rance LeFebvre, Ph.D., Associate Dean—Student Affairs
K.C. Kent Lloyd, D.V.M., Ph.D., Associate Dean for Research and Graduate Education
W. David Wilson, B.V.M.S., M.R.C.V.S., Associate Dean for Clinical Programs and Director—Veterinary Medical Teaching Hospital
Donald J. Klingborg, D.V.M., Associate Dean—Extension
Bruno Chemel, D.V.M., M.S., M.D., Co-Director—Masters of Preventive Veterinary Medicine Program

UC Davis Health System Leadership; Medical Center, School of Medicine, Betty Irene Moore School of Nursing
Claire Pomeroy, M.D., M.B.A., Vice Chancellor—Human Health Sciences and Dean
Heather Young, Ph.D., R.N., F.A.A.N., Associate Vice Chancellor—Nursing
Thomas S. Nesbitt, M.D., M.P.H., Assistant Vice Chancellor—Strategic Technologies and Alliances
Ann Madden Rice, Chief Executive Officer—UC Davis Medical Center
Fred Meyers, M.D., M.A.C.P., Executive Associate Dean
Michael Mirean, Chief Information Officer
Timothy Maurice, M.B.A., Chief Financial Officer
James Goodnight, M.D., Ph.D., Associate Dean—Clinical Affairs and Director—Practice Management Board
Shelton J. Durusseau, Ph.D., Associate Vice Chancellor—Diversity and Inclusion and Chief External Affairs Officer
Anna Orlowski, J.D., Chief Legal Counsel
Teresa Porter, Chief Compliance Officer
Allan D. Stiefkin, M.D., Chief Medical Officer—UC Davis Medical Center
Vincent J. Johnson, Chief Operating Officer—UC Davis Medical Center
Carol Robinson, R.N., M.P.A., N.E.A.-B.C., F.A.A.N., Chief Nursing Officer and Chief Patient Care Services Officer—UC Davis Medical Center
J. Douglas Kirk, M.D., F.A.C.E.P., Associate Chief Medical Officer—UC Davis Medical Center
School of Veterinary Medicine
Michael D. Lairmore, D.V.M., Ph.D., Dean
Patricia A. Conrad, D.V.M., Ph.D., Associate Dean—Global Programs
Jan E. Ilkiw, B.V.Sc., Ph.D., Associate Dean—Academic Programs
Karl E. Jandrey, D.V.M., Director, Continuing Professional Education Center
Terry W. Lehenbauer, D.V.M., M.P.V.M., Ph.D., Director—Veterinary Medicine Teaching and Research Center, Tulare
Sean D. Owens, D.V.M., Associate Dean—Student Programs

John R. Pascoe, B.V.Sc., Ph.D., Executive Associate Dean
Isaac N. Pessah, Ph.D., Associate Dean—Research and Graduate Education Programs
W. David Wilson, B.V.M.S., M.R.C.V.S, Director, Veterinary Medical Teaching Hospital

UC Davis Extension
Dennis Pendleton, Ph.D., Dean
Rita Bunch, M.B.A., Assistant Dean/COO
PROPORTION OF UC DAVIS GRADUATES FINDING WORK IN THEIR FIELDS OF CHOICE

The percent of alumni whose full-time job is in the field of their choice is shown by field of study. Figures do not include the five percent of graduates who had not decided on a career field at the time of the survey.

<table>
