International Relations

See Political Science, on page 519.

International Science Studies

This interdisciplinary minor in International Science Studies will intersect with the College of Agricultural and Environmental Sciences students to global issues, which affect their major disciplines in the current world, and also provide an opportunity to gain first hand experience abroad when appropriate. The goal of this minor is to enable our college students to develop greater international competence and to enhance their employability.

The minor assumes that the student will have a major in the sciences, and that classes taken under one of the three tracks in the minor will contribute depth to the existing major or establish depth in a selected additional field of study. Students will be expected to work closely with an academic advisor in developing an intellectually coherent program of the study. A minimum of 18 units of upper division work is required. Only a single course may be counted toward both major and minor and no course can be used to satisfy the requirements of more than one minor.

</table>

Select one of the following tracks .... 16-17

Education Abroad Program courses taught overseas and relevant international internship activities will count towards the minor. Students are required to have advisor's approval. For each track, students can take a maximum of three units from EAP courses, with a valid transcript, and three units from relevant international internship activities. The international internship activities would require a pre-approved study plan with the academic advisor before the maximum of three units can be awarded. Language and culture related courses are encouraged, but not required for the minor.

International Internship Program

Marcie Kirk Holland, Director
The Internship and Career Center; 2nd Floor, South Hall 530-752-2855
http://icc.ucdavis.edu

Program Areas
Agricultural and Environmental Sciences, Career Recruiting Programs, Engineering and Physical Sciences, Masters, Ph.D.s and Postdocs, Health and Biological Sciences, International Programs and Liberal Arts and Business.

Internship Experience
The Internship and Career Center facilitates a campus-wide internship program. All internships, both credit and non-credit, are for 3-12 weeks. All internships are for 3-12 weeks. Students are required to have an academic advisor in developing an intellectually coherent program of the study. A minimum of 18 units of upper division work is required. Only a single course may be counted toward both major and minor and no course can be used to satisfy the requirements of more than one minor.

Minor Adviser, Shu-Hua Chen (Land, Air and Water Resources) 530-752-1822, xchachen@ucdavis.edu

Jay Grossi, M.A., Lecturer

The Major Program
The major in Italian provides a solid language background that will enable the student to develop an appreciation for the numerous contributions Italians and italophones have made to literature, the arts, political theory, science, and other expressions of human creativity. The major emphasize the influence Italian culture continues to have on our global world.

The Program.
The Italian program is geared to the specific needs and interests of the students, who enjoy the advantages of a small classroom setting and the individualized mentoring of dedicated professors. While the use of Italian is stressed in language and literature courses, the program is interdisciplinary in nature. Starting at the lower-division level, students collaborate closely with academic advisers in order to design a major or minor curriculum that includes culture, film, art history, history, food science, and other courses in related fields offered on campus or in Italy. The Italian program actively participates in the UC-wide Education Abroad Program, the Quarter Abroad Program (Florence), the International Internships Program, and the Summer Sessions International (Rome), all of which offer opportunities for travel and study in Italy.

Career Alternatives.
The Italian program provides a solid foundation for a variety of career paths by offering training in the Italian language and culture and developing skills that are vital in any professional setting: critical analysis, interpersonal skills, effective written and oral communication, and cultural sensitivity. In addition to specific career paths in foreign service and education, knowledge of the Italian language and culture enhances professional opportunities in a variety of fields, such as viticulture and enology, food science, political science, medicine, architecture, and engineering.
