

CHILD DEVELOPMENT, MASTER OF SCIENCE

College of Agricultural & Environmental Sciences

Graduate Study

The Graduate Group in Child Development offers a multidisciplinary program leading to an M.S. degree. The program provides students with an opportunity to pursue a coordinated course of graduate study in the field of child development, which cuts across departmental boundaries. Students complete a practicum working with children and families, which may be in the community, as well as the University's Center for Child & Family Studies. Recipients of the degree gain sufficient background to engage in professions that directly (e.g., preschool, 4-H) or indirectly (e.g., social policy) involve children and families, obtain positions in teaching or research settings, or pursue further study leading to a doctorate in child development, human development, clinical psychology, or related fields.

Applicants seeking admissions and fellowships consideration must submit all materials by our priority December 15 deadline. The final admissions deadline is March 1. For more details, see Human Development Graduate Group (<http://humandevelopment.ucdavis.edu/>).
