

COMPUTER ENGINEERING, BACHELOR OF SCIENCE

College of Engineering

Faculty (<https://ece.ucdavis.edu/directory/>)

The Electrical & Computer Engineering Undergraduate Programs

The department administers two undergraduate curricula in the College of Engineering: (1) the Electrical Engineering curriculum and (2) the Computer Engineering curriculum.

Integrated Degree Programs (IDP)

The IDP leads to both the Bachelor of Science and the Master of Science degrees. The program provides a student the opportunity to obtain superior breadth and depth of technical material. The IDP program in the Department of Electrical & Computer Engineering is available only to UC Davis undergraduates with strong academic records enrolled in the Electrical Engineering, Computer Engineering or Applied Physics curricula. Applicants in their junior year must apply for the IDP by March 31. For more information on IDP, see B.S./M.S. Integrated Degree Programs.

Mission

Under its land grant status, the University of California has a mission to provide the state with the trained workforce it needs and to advance knowledge and research in directions that contribute to the general welfare of the state and the nation. The Department of Electrical & Computer Engineering contributes to the mission of the University in three ways. First, its undergraduate and graduate education programs seek to provide students with an understanding of the fundamental principles of electrical and computer engineering, the skills needed to solve the complex technological problems of modern society and the ability to continue to learn and develop throughout their careers. Second, through its research programs, the department contributes to the development and progress of electronics, communications, and computer technology. Finally, the department helps to transfer research results to industry through publication, public service and professional activities.

Objectives

Teaching—To provide undergraduate students with sufficient breadth to allow them to participate in teams, continue their own education after graduation and select a focus area intelligently; to provide undergraduate students with sufficient depth in a narrower discipline to allow them to develop the ability to solve complex engineering problems; to educate the students in the graduate program to be leaders in industry or to do meaningful research in industry, government or academia.

Research—To develop and maintain research programs that produce useful technological advances while simultaneously training the next generation of researchers and leaders; to update and/or shift the foci of these programs frequently in response to the needs of our constituency and the nation; to provide a stimulating environment that encourages our graduate students to develop their abilities as far as possible.

Computer Engineering Undergraduate Program

The Computer Engineering (BS) program is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>) under the commission's General Criteria and Program Criteria for Electrical, Computer, Communications, Telecommunication(s), and Similarly Named Engineering Programs.

Objectives

The Electrical & Computer Engineering program educational objectives have been developed to address the needs of our constituencies. The objectives of the Electrical & Computer Engineering programs are as follow:

- Graduates will create value for their employers, demonstrating knowledge and initiative and making beneficial contributions beyond the workplace. This can also result in patents, awards, publications and presentations.
- Graduates will grow their capabilities through advanced education and professional development.
- Graduates will provide leadership and be proactive in their profession and/or communities.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

The major requirements below are in addition to meeting University Degree Requirements (<https://catalog.ucdavis.edu/undergraduate-education/university-degree-requirements/>) & College Degree Requirements (<https://catalog.ucdavis.edu/undergraduate-education/college-degree-requirements/>); unless otherwise noted. The minimum number of units required for the Computer Engineering Bachelor of Science is 138.

Passing the Upper Division Composition Exam.	
Upper Division Required Course Subtotal	68-77
Total Units	138-147

- 1
Transfer and change of major students who do not take EEC 010 will substitute 4 additional units of upper division electives.
- 2
Excluding ECS 132, ECS 155 Discontinued, ECS 157 Discontinued, ECS 188, ECS 154A, ECS 154B.
- 3
Except CHE 195, CHE 197.
- 4
Excluding ENG 100, ENG 160, ENG 190 (each restricted to 1 unit of technical elective), ENG 198, ECS 132, ECS 154A, ECS 154B, ECS 188.
- 5
Except MAT 135A, MAT 197TC.
- 6
Except PHY 116 Discontinued, PHY 137 Discontinued, PHY 160 (restricted to 1 unit of technical elective), PHY 195, PHY 197T.
- 7
Except STA 100, STA 102 Discontinued, STA 103, STA 104, STA 106, STA 108, STA 120 Discontinued, STA 130A.
- 8
Transfer students take 1 additional Technical Elective; instead of EEC 001.
