Program of Study

The UC Davis Graduate School of Management offers a minor in Business for undergraduate students. This minor complements a wide range of academic majors by introducing fundamental concepts in core business areas such as accounting, finance, marketing, operations, and management. The minor equips students with practical business skills and analytical frameworks that enhance their ability to apply their disciplinary knowledge in professional, organizational, and entrepreneurial settings.

The Business minor courses are open to all undergraduate and graduate majors at UC Davis.

The courses that count for the Business minor are offered by the Graduate School of Management. No substitutions (e.g., transfer courses, study abroad courses, or other UC Davis courses) are allowed for the upper division coursework.

No course overlap is allowed with other minors. No more than one course can be counted towards both the student's major and the minor.

Prerequisites for minor courses are required. Please plan accordingly.
