

# GEOGRAPHIC STUDIES, MINOR

College of Agricultural & Environmental Sciences

## Minor

The minor in Geographic Studies is defined by its concern with place. Geographers strive to answer spatial questions regarding the Earth's surface; to describe and explain the character of regions; to ascertain the ways in which historical and contemporary humans have used and shaped the Earth's surface; and to understand the interactions of physical, biotic, and human systems within our global environment. The minor is compatible with a variety of environmental majors in the college.

The minor is sponsored by the Department of Human Ecology, Landscape Architecture & Environmental Design Program (<https://catalog.ucdavis.edu/departments-programs-degrees/human-ecology/landscape-architecture-bs/>).
