INTERNATIONAL SCIENCE STUDIES, MINOR

College of Agricultural & Environmental Sciences

Minor

This interdisciplinary minor in International Science Studies will introduce College of Agricultural & Environmental Sciences students to global issues, which affect their major disciplines in the current world, and also provide an opportunity to gain first-hand experience abroad when appropriate. The goal of this minor is to enable our college students to develop greater international competence and to enhance their employability.

The minor assumes that the student will have a major in the sciences and that classes taken under one of the three tracks in the minor will contribute depth to the existing major or establish depth in a selected additional field of study. Students will be expected to work closely with an academic advisor in developing an intellectually coherent program of the study. A minimum of 18 units of upper division work is required. Only a single course can be counted toward both major and minor and no course can be used to satisfy the requirements of more than one minor.

Lead Faculty Advisor

Shu-Hua Chen (shachen@ucdavis.edu) (Land, Air, & Water Resources); 530-752-1822.

Choose one of the following tracks: 16-17

Education Abroad Program courses taught overseas and relevant international internship activities will count towards the minor requirement with advisor’s approval. For each track, students can take a maximum of 3 units from EAP courses, with a valid transcript, and 3 units from relevant international internship activities. The international internship activities would require a pre-approved study plan with the academic advisor before the maximum of 3 units can be awarded.

Language and culture related courses are encouraged, but not required for the minor.
