POPULATION BIOLOGY, DOCTOR OF PHILOSOPHY

College of Biological Sciences

Graduate Study

The Population Biology Graduate Group (PBGG) emphasizes programs of study and research leading to a Ph.D. degree. The PBGG concentrates on population biology as a broad discipline that unifies ecology, evolution, population genetics and phylogenetics. The course curriculum consists of a first-year core course offered by PBGG faculty, seminars, and advanced courses in population biology and related disciplines; chosen in consultation with a guidance committee.
