

PUBLIC HEALTH SCIENCES, DOCTOR OF PHILOSOPHY

Graduate Studies

As a student in the doctoral degree program in Public Health Sciences at UC Davis, you will become a highly educated public health research professional prepared for leadership in governmental public health agencies, community-based public health organizations, and academic health centers. The Ph.D. in Public Health Sciences requires two years of research courses and rotations and completion of a dissertation to allow students to practice research and translational public health sciences techniques they have learned in the classroom.
